(ii) Alternatively, the upper-tier entity (other than a trust or estate described in paragraph (e) of this section) may compute its share of QPAI attributable to items from a lower-tier entity solely for purposes of section 199(d)(1)(A)(iii)(II) by applying the small business simplified overall method described in § 1.199-4(f), regardless of whether such upper-tier entity would otherwise qualify to use the small business simplified overall method.

(3) *Example.* The following example illustrates the application of this paragraph (g). Assume that each partnership and each partner (whether or not an individual) is a calendar year taxpayer.

Example. (i) In 2006, A, an individual, owns a 50% interest in a partnership, UTP, which in turn owns a 50% interest in another partnership, LTP. All partnership items are allocated in proportion to these ownership percentages. LTP has \$900 DPGR, \$450 CGS (which includes W-2 wages of \$100), and \$50 other deductions. Before taking into account its share of items from LTP, UTP has \$500 DPGR, \$500 CGS (which includes W-2 wages of \$200), and \$500 other deductions. UTP chooses to compute its share of QPAI attributable to items from LTP for purposes of section 199(d)(1)(A)(iii)(II) by applying the small business simplified overall method described in § 1.199-4(f). For purposes of the wage limitation of section 199(d)(1)(A)(iii), UTP's distributive share of LTP's QPAI is \$200 (\$450 DPGR - \$250 CGS and other deductions).

(ii) UTP's share of LTP's W-2 wages for purposes of the section 199(d)(1)(A)(iii) limitation is \$12, the lesser of \$50 (UTP's 50% allocable share of LTP's \$100 of W-2 wages) or \$12 ($2 \times (\$200 \text{ QPAI} \times .03)$). After taking into account its share of items from LTP, UTP has \$950 DPGR, \$725 CGS, and \$525 other deductions. A is eligible for and uses the simplified deduction method described in § 1.199-4(e). For purposes of the wage limitation of section 199(d)(1)(A)(iii), A's distributive share of UTP's QPAI is (\$151) (\$475 DPGR - \$363 CGS - \$263 other deductions). A's wage limitation under section 199(d)(1)(A)(iii) with respect to A's interest in UTP is \$0, the lesser of \$106 (A's 50% allocable share of UTP's \$212 of W-2 wages) or \$0 (because A's share of UTP's QPAI (\$151), is less than zero).

(h) *No attribution of qualified activities.* Except as provided in paragraph (i) of this section regarding qualifying in-kind partnerships and paragraph (j) of this section regarding EAG partnerships, an owner of a pass-thru entity is not treated as conducting the qualified production activities of the pass-thru entity, and vice versa. This rule applies to all partnerships, including partnerships that have elected out of subchapter K under section 761(a). Accordingly, if a partnership MPGE QPP within the United States, or produces a qualified film or produces utilities in the United States, and distributes or leases, rents, licenses, sells, exchanges, or otherwise disposes of such property to a partner who then, without performing its own qualifying MPGE or other production, leases, rents, licenses, sells, exchanges, or otherwise disposes of such property, then the partner's gross receipts from this latter lease, rental, license, sale, ex-

change, or other disposition are treated as non-DPGR. In addition, if a partner MPGE QPP within the United States, or produces a qualified film or produces utilities in the United States, and contributes or leases, rents, licenses, sells, exchanges, or otherwise disposes of such property to a partnership which then, without performing its own qualifying MPGE or other production, leases, rents, licenses, sells, exchanges, or otherwise disposes of such property, then the partnership's gross receipts from this latter disposition are treated as non-DPGR.

(i) *Qualifying in-kind partnership—(1) In general.* If a partnership is a qualifying in-kind partnership described in paragraph (i)(2) of this section, then each partner is treated as MPGE or producing the property MPGE or produced by the partnership that is distributed to that partner. If a partner of a qualifying in-kind partnership derives gross receipts from the lease, rental, license, sale, exchange, or other disposition of the property that was MPGE or produced by the qualifying in-kind partnership, then, provided such partner is a partner of the qualifying in-kind partnership at the time the partner disposes of the property, the partner is treated as conducting the MPGE or production activities previously conducted by the qualifying in-kind partnership with respect to that property. With respect to a lease, rental, or license, the partner is treated as having disposed of the property on the date or dates on which it takes into account its gross receipts derived from the lease, rental, or license under its methods of accounting. With respect to a sale, exchange, or other disposition, the partner is treated as having disposed of the property on the date on which it ceases to own the property for Federal income tax purposes, even if no gain or loss is taken into account.

(2) *Definition of qualifying in-kind partnership.* For purposes of this paragraph (i), a qualifying in-kind partnership is a partnership engaged solely in—

(i) The extraction, refining, or processing of oil, natural gas (as described in § 1.199-3(l)(2)), petrochemicals, or products derived from oil, natural gas,

or petrochemicals in whole or in significant part within the United States;

(ii) The production or generation of electricity in the United States; or

(iii) An activity or industry designated by the Secretary by publication in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter).

(3) *Special rules for distributions.* If a qualifying in-kind partnership distributes property to a partner, then, solely for purposes of section 199(d)(1)(A)(iii)(II), the partnership is treated as having gross receipts in the taxable year of the distribution equal to the fair market value of the distributed property at the time of distribution to the partner and the deemed gross receipts are allocated to that partner, provided that the partner derives gross receipts from the distributed property (and takes into account such receipts under its method of accounting) during the taxable year of the partner with or within which the partnership's taxable year (in which the distribution occurs) ends. For rules for taking costs into account (such as costs included in the adjusted basis of the distributed property), see § 1.199-4.

(4) *Other rules.* Except as provided in this paragraph (i), a qualifying in-kind partnership is treated the same as other partnerships for purposes of section 199. Accordingly, a qualifying in-kind partnership is subject to the rules of this section regarding the application of section 199 to pass-thru entities, including application of the section 199(d)(1)(A)(iii) wage limitation under paragraph (b)(3) of this section. In determining whether a qualifying in-kind partnership or its partners MPGE QPP in whole or in significant part within the United States, see § 1.199-3(g)(2) and (3).

(5) *Example.* The following example illustrates the application of this paragraph (i). Assume that PRS and X are calendar year taxpayers.

Example. X, Y and Z are partners in PRS, a qualifying in-kind partnership described in paragraph (i)(2) of this section. X, Y, and Z are corporations. In 2006, PRS distributes oil to X that PRS derived from its oil extraction. PRS incurred \$600 of CGS, including \$500 of W-2 wages (as defined in § 1.199-2(e)), extracting the oil distributed to X, and X's adjusted basis in the distributed oil is \$600. The fair market value of the oil at the time

of the distribution to X is \$1,000. X incurs \$200 of CGS, including \$100 of W-2 wages, in refining the oil within the United States. In 2006, X, while it is a partner in PRS, sells the oil to a customer for \$1,500, taking the gross receipts into account under its method of accounting in the same taxable year. Under paragraph (i)(1) of this section, X is treated as having extracted the oil. The extraction and refining of the oil qualify as an MPGE activity under § 1.199-3(e)(1). Therefore, X's \$1,500 of gross receipts qualify as DPGR. X subtracts from the \$1,500 of DPGR the \$600 of CGS incurred by PRS and the \$200 of refining costs incurred by X. Thus, X's QPAI is \$700 for 2006. In addition, PRS is treated as having \$1,000 of DPGR solely for purposes of applying the wage limitation in section 199(d)(1)(A)(iii) based on the applicable percentage of QPAI. Accordingly, X's share of PRS's W-2 wages determined under section 199(d)(1)(A)(iii) is \$24, the lesser of \$500 (X's allocable share of PRS's W-2 wages included in CGS) and \$24 ($2 \times (\$400 (\$1,000 \text{ deemed DPGR less } \$600 \text{ of CGS}) \times .03)$). X adds the \$24 of PRS W-2 wages to its \$100 of W-2 wages incurred in refining the oil for purposes of section 199(b).

(j) *Partnerships owned by members of a single expanded affiliated group—(1) In general.* For purposes of this section, if all of the interests in the capital and profits of a partnership are owned by members of a single EAG at all times during the taxable year of the partnership (EAG partnership), then the EAG partnership and all members of that EAG are treated as a single taxpayer for purposes of section 199(c)(4) during that taxable year.

(2) *Attribution of activities—(i) In general.* If a member of an EAG (disposing member) derives gross receipts from the lease, rental, license, sale, exchange, or other disposition of property that was MPGE or produced by an EAG partnership, all the partners of which are members of the same EAG to which the disposing member belongs at the time that the disposing member disposes of such property, then the disposing member is treated as conducting the MPGE or production activities previously conducted by the EAG partnership with respect to that property. The previous sentence applies only for those taxable years in which the disposing member is a member of the EAG of which all the partners of the EAG partnership are members for the entire taxable year of the EAG partnership. With respect to a lease,

rental, or license, the disposing member is treated as having disposed of the property on the date or dates on which it takes into account its gross receipts from the lease, rental, or license under its methods of accounting. With respect to a sale, exchange, or other disposition, the disposing member is treated as having disposed of the property on the date on which it ceases to own the property for Federal income tax purposes, even if no gain or loss is taken into account. Likewise, if an EAG partnership derives gross receipts from the lease, rental, license, sale, exchange, or other disposition of property that was MPGE or produced by a member (or members) of the same EAG (the producing member) to which all the partners of the EAG partnership belong at the time that the EAG partnership disposes of such property, then the EAG partnership is treated as conducting the MPGE or production activities previously conducted by the producing member with respect to that property. The previous sentence applies only for those taxable years in which the producing member is a member of the EAG of which all the partners of the EAG partnership are members for the entire taxable year of the EAG partnership. With respect to a lease, rental, or license, the EAG partnership is treated as having disposed of the property on the date or dates on which it takes into account its gross receipts derived from the lease, rental, or license under its methods of accounting. With respect to a sale, exchange, or other disposition, the EAG partnership is treated as having disposed of the property on the date on which it ceases to own the property for Federal income tax purposes, even if no gain or loss is taken into account. See paragraph (j)(5) *Example 3* of this section.

(ii) *Attribution between EAG partnerships.* If an EAG partnership (disposing partnership) derives gross receipts from the lease, rental, license, sale, exchange, or other disposition of property that was MPGE or produced by another EAG partnership (producing partnership), then the disposing partnership is treated as conducting the MPGE or production activities previously conducted by the producing partnership with respect to that prop-

erty, provided that the producing partnership and the disposing partnership are owned by members of the same EAG for the entire taxable year of the respective partnership in which the disposing partnership disposes of such property. With respect to a lease, rental, or license, the disposing partnership is treated as having disposed of the property on the date or dates on which it takes into account its gross receipts from the lease, rental, or license under its methods of accounting. With respect to a sale, exchange, or other disposition, the disposing partnership is treated as having disposed of the property on the date on which it ceases to own the property for Federal income tax purposes, even if no gain or loss is taken into account.

(iii) *Exceptions to attribution.* Attribution of activities does not apply for purposes of the construction of real property under § 1.199-3(m)(1) and the performance of engineering and architectural services under § 1.199-3(n)(2) and (3), respectively.

(3) *Special rules for distributions.* If an EAG partnership distributes property to a partner, then, solely for purposes of section 199(d)(1)(A)(iii)(II), the EAG partnership is treated as having gross receipts in the taxable year of the distribution equal to the fair market value of the property at the time of distribution to the partner and the deemed gross receipts are allocated to that partner, provided that the partner derives gross receipts from the distributed property (and takes such receipts into account under its methods of accounting) during the taxable year of the partner with or within which the partnership's taxable year (in which the distribution occurs) ends. For rules for taking costs into account (such as costs included in the adjusted basis of the distributed property), see § 1.199-4.

(4) *Other rules.* Except as provided in this paragraph (j), an EAG partnership is treated the same as other partnerships for purposes of section 199. Accordingly, an EAG partnership is subject to the rules of this section regarding the application of section 199 to pass-thru entities, including application of the section 199(d)(1)(A)(iii) wage limitation under paragraph (b)(3) of this section. In determining whether a

member of an EAG or an EAG partnership MPGE QPP in whole or in significant part within the United States or produced a qualified film or produced utilities within the United States, see § 1.199-3(g)(2) and (3) and *Example 5* of paragraph (j)(5) of this section.

(5) *Examples.* The following examples illustrate the rules of this paragraph (j). Assume that PRS, X, Y, and Z all are calendar year taxpayers.

Example 1. Contribution. X and Y are the only partners in PRS, a partnership, for PRS's entire 2006 taxable year. X and Y are both members of a single EAG for the entire 2006 year. In 2006, X MPGE QPP within the United States and contributes the property to PRS. In 2006, PRS sells the QPP for \$1,000. Under this paragraph (j), PRS is treated as having MPGE the QPP within the United States, and PRS's \$1,000 gross receipts constitute DPGR. PRS, X, and Y must apply the rules of this section regarding the application of section 199 to pass-thru entities with respect to the activity of PRS, including application of the section 199(d)(1)(A)(iii) wage limitation under paragraph (b)(3) of this section.

Example 2. Sale. X, Y, and Z are the only members of a single EAG for the entire 2006 year. X and Y each own 50% of the capital and profits interests in PRS, a partnership, for PRS's entire 2006 taxable year. In 2006, PRS MPGE QPP within the United States and then sells the property to X for \$6,000, its fair market value at the time of the sale. PRS's gross receipts of \$6,000 qualify as DPGR. In 2006, X sells the QPP to customers for \$10,000, incurring selling expenses of \$2,000. Under this paragraph (j), X is treated as having MPGE the QPP within the United States, and X's \$10,000 of gross receipts qualify as DPGR. PRS, X and Y must apply the rules of this section regarding the application of section 199 to pass-thru entities with respect to the activity of PRS, including application of the section 199(d)(1)(A)(iii) wage limitation under paragraph (b)(3) of this section. The results would be the same if PRS sold the property to Z rather than to X.

Example 3. Lease. X, Y, and Z are the only members of a single EAG for the entire 2005 year. X and Y each own 50% of the capital and profits interests in PRS, a partnership, for PRS's entire 2005 taxable year. In 2005, PRS MPGE QPP within the United States and then sells the property to X for \$6,000, its fair market value at the time of the sale. PRS's gross receipts of \$6,000 qualify as DPGR. In 2005, X rents the QPP it acquired from PRS to customers unrelated to X. X takes the gross receipts attributable to the rental of the QPP into account under its methods of accounting in 2005 and 2006. On July 1, 2006, X ceases to be a member of the

same EAG to which Y, the other partner in PRS, belongs. For 2005, X is treated as having MPGE the QPP in the United States, and its gross receipts derived from the rental of the QPP qualify as DPGR. For 2006, however, because X and Y, partners in PRS, are no longer members of the same EAG for the entire year, the gross rental receipts X takes into account in 2006 do not qualify as DPGR.

Example 4. Distribution. X and Y are the only partners in PRS, a partnership, for PRS's entire 2006 taxable year. X and Y are both members of a single EAG for the entire 2006 year. In 2006, PRS MPGE QPP within the United States, incurring \$600 of CGS, including \$500 of W-2 wages (as defined in § 1.199-2(e)), and then distributes the QPP to X. X's adjusted basis in the QPP is \$600. At the time of the distribution, the fair market value of the QPP is \$1,000. X incurs \$200 of CGS, including \$100 of W-2 wages, to further MPGE the QPP within the United States. In 2006, X sells the QPP for \$1,500 to an unrelated customer and takes the gross receipts into account under its method of accounting in the same taxable year. Under paragraph (j)(1) of this section, X is treated as having MPGE the QPP within the United States, and X's \$1,500 of gross receipts qualify as DPGR. In addition, PRS is treated as having DPGR of \$1,000 solely for purposes of applying the wage limitation in section 199(d)(1)(A)(iii) based on the applicable percentage of QPAI.

Example 5. Multiple sales. (i) *Facts.* X and Y are the only partners in PRS, a partnership, for PRS's entire 2006 taxable year. X and Y are both non-consolidated members of a single EAG for the entire 2006 year. PRS produces in bulk form in the United States the active ingredient for a pharmaceutical product. Assume that PRS's own MPGE activity with respect to the active ingredient is not substantial in nature, taking into account all of the facts and circumstances, and PRS's direct labor and overhead to MPGE the active ingredient within the United States are \$15 and account for 15% of PRS's \$100 CGS of the active ingredient. In 2006, PRS sells the active ingredient in bulk form to X. X uses the active ingredient to produce the finished dosage form drug. Assume that X's own MPGE activity with respect to the finished dosage form drug is not substantial in nature, taking into account all of the facts and circumstances, and X's direct labor and overhead to MPGE the finished dosage form drug within the United States are \$12 and account for 10% of X's \$120 CGS of the finished dosage form drug. In 2006, X sells the finished dosage form drug in finished dosage to Y and Y sells the finished dosage form drug to customers. Assume that Y's own MPGE activity with respect to the finished dosage form drug is not substantial in nature, taking into account all of the facts and circumstances, and Y incurs \$2 of direct labor and overhead and Y's

CGS in selling the finished dosage form drug to customers is \$130.

(ii) *Analysis.* PRS's gross receipts from the sale of the active ingredient to X are non-DPGR because PRS's MPGE activity is not substantial in nature and PRS does not satisfy the safe harbor described in § 1.199-3(g)(3) because PRS's direct labor and overhead account for less than 20% of PRS's CGS of the active ingredient. X's gross receipts from the sale of the finished dosage form drug to Y are DPGR because X is considered to have MPGE the finished dosage form drug in significant part in the United States pursuant to the safe harbor described in § 1.199-3(g)(3) because the \$27 (\$15 + \$12) of direct labor and overhead incurred by PRS and X equals or exceeds 20% of X's total CGS (\$120) of the finished dosage form drug at the time X disposes of the drug to Y. Similarly, Y's gross receipts from the sale of the finished dosage form drug to customers are DPGR because Y is considered to have MPGE the drug in significant part in the United States pursuant to the safe harbor described in § 1.199-3(g)(3) because the \$29 (\$15 + \$12 + \$2) of direct labor and overhead incurred by PRS, X, and Y equals or exceeds 20% of Y's total CGS (\$130) of the finished dosage form drug at the time Y disposes of the finished dosage form drug to Y's customers.

(k) *Effective dates.* Section 199 applies to taxable years beginning after December 31, 2004. In determining the deduction under section 199, items arising from a taxable year of a partnership, S corporation, estate, or trust beginning before January 1, 2005, shall not be taken into account for purposes of section 199(d)(1). Section 1.199-9 does not apply to taxable years beginning after May 17, 2006, the enactment date of the Tax Increase Prevention and Reconciliation Act of 2005 (Public Law 109-222, 120 Stat. 345). For taxable years beginning on or before May 17, 2006, a taxpayer must apply § 1.199-9 if the taxpayer applies §§ 1.199-1 through 1.199-8 to that taxable year. Notwithstanding the preceding sentence, a partnership or S corporation that is a qualifying small taxpayer under § 1.199-4(f) of REG-105847-05 (2005-47 I.R.B. 987) (see § 601.601(d)(2) of this chapter) may use the small business simplified overall method to apportion CGS and deductions between DPGR and non-DPGR at the entity level under § 1.199-4(f) of REG-105847-05 for taxable years beginning on or before May 17, 2006. If a taxpayer chooses not to rely on §§ 1.199-1 through 1.199-9 (as provided in § 1.199-

8(i)) for a taxable year beginning before June 1, 2006, the guidance under section 199 that applies to taxable years beginning before June 1, 2006, is contained in Notice 2005-14 (2005-1 C.B. 498) (see § 601.601(d)(2) of this chapter). In addition, a taxpayer also may rely on the provisions of REG-105847-05 for taxable years beginning before June 1, 2006. If Notice 2005-14 and REG-105847-05 include different rules for the same particular issue, then a taxpayer may rely on either the rule set forth in Notice 2005-14 or the rule set forth in REG-105847-05. However, if REG-105847-05 includes a rule that was not included in Notice 2005-14, then a taxpayer is not permitted to rely on the absence of a rule in Notice 2005-14 to apply a rule contrary to REG-105847-05. For taxable years beginning after May 17, 2006, and before June 1, 2006, a taxpayer may not apply Notice 2005-14, REG-105847-05, or any other guidance under section 199 in a manner inconsistent with amendments made to section 199 by section 514 of the Tax Increase Prevention and Reconciliation Act of 2005.

[T.D. 9263, 71 FR 31283, June 1, 2006; 72 FR 6, Jan. 3, 2007, as amended by T.D. 9381, 73 FR 8814, Feb. 15, 2008]

ADDITIONAL ITEMIZED DEDUCTIONS FOR INDIVIDUALS

§ 1.211-1 Allowance of deductions.

In computing taxable income under section 63(a), the deductions provided by sections 212, 213, 214, 215, 216, and 217 shall be allowed subject to the exceptions provided in Part IX, Subchapter B, Chapter 1 of the Code (section 261 and following, relating to items not deductible).

[T.D. 6796, 30 FR 1037, Feb. 2, 1965]

§ 1.212-1 Nontrade or nonbusiness expenses.

(a) An expense may be deducted under section 212 only if:

(1) It has been paid or incurred by the taxpayer during the taxable year (i) for the production or collection of income which, if and when realized, will be required to be included in income for Federal income tax purposes, or (ii) for the management, conservation, or maintenance of property held for the production of such income, or (iii) in

connection with the determination, collection, or refund of any tax; and

(2) It is an ordinary and necessary expense for any of the purposes stated in subparagraph (1) of this paragraph.

(b) The term *income* for the purpose of section 212 includes not merely income of the taxable year but also income which the taxpayer has realized in a prior taxable year or may realize in subsequent taxable years; and is not confined to recurring income but applies as well to gains from the disposition of property. For example, if defaulted bonds, the interest from which if received would be includible in income, are purchased with the expectation of realizing capital gain on their resale, even though no current yield thereon is anticipated, ordinary and necessary expenses thereafter paid or incurred in connection with such bonds are deductible. Similarly, ordinary and necessary expenses paid or incurred in the management, conservation, or maintenance of a building devoted to rental purposes are deductible notwithstanding that there is actually no income therefrom in the taxable year, and regardless of the manner in which or the purpose for which the property in question was acquired. Expenses paid or incurred in managing, conserving, or maintaining property held for investment may be deductible under section 212 even though the property is not currently productive and there is no likelihood that the property will be sold at a profit or will otherwise be productive of income and even though the property is held merely to minimize a loss with respect thereto.

(c) In the case of taxable years beginning before January 1, 1970, expenses of carrying on transactions which do not constitute a trade or business of the taxpayer and are not carried on for the production or collection of income or for the management, conservation, or maintenance of property held for the production of income, but which are carried on primarily as a sport, hobby, or recreation are not allowable as nontrade or nonbusiness expenses. The question whether or not a transaction is carried on primarily for the production of income or for the management, conservation, or maintenance of property held for the production or collec-

tion of income, rather than primarily as a sport, hobby, or recreation, is not to be determined solely from the intention of the taxpayer but rather from all the circumstances of the case. For example, consideration will be given to the record of prior gain or loss of the taxpayer in the activity, the relation between the type of activity and the principal occupation of the taxpayer, and the uses to which the property or what it produces is put by the taxpayer. For provisions relating to activities not engaged in for profit applicable to taxable years beginning after December 31, 1969, see section 183 and the regulations thereunder.

(d) Expenses, to be deductible under section 212, must be "ordinary and necessary". Thus, such expenses must be reasonable in amount and must bear a reasonable and proximate relation to the production or collection of taxable income or to the management, conservation, or maintenance of property held for the production of income.

(e) A deduction under section 212 is subject to the restrictions and limitations in part IX (section 261 and following), subchapter B, chapter 1 of the Code, relating to items not deductible. Thus, no deduction is allowable under section 212 for any amount allocable to the production or collection of one or more classes of income which are not includible in gross income, or for any amount allocable to the management, conservation, or maintenance of property held for the production of income which is not included in gross income. See section 265. Nor does section 212 allow the deduction of any expenses which are disallowed by any of the provisions of subtitle A of the Code, even though such expenses may be paid or incurred for one of the purposes specified in section 212.

(f) Among expenditures not allowable as deductions under section 212 are the following: Commuter's expenses; expenses of taking special courses or training; expenses for improving personal appearance; the cost of rental of a safe-deposit box for storing jewelry and other personal effects; expenses such as those paid or incurred in seeking employment or in placing oneself

in a position to begin rendering personal services for compensation, campaign expenses of a candidate for public office, bar examination fees and other expenses paid or incurred in securing admission to the bar, and corresponding fees and expenses paid or incurred by physicians, dentists, accountants, and other taxpayers for securing the right to practice their respective professions. See, however, section 162 and the regulations thereunder.

(g) Fees for services of investment counsel, custodial fees, clerical help, office rent, and similar expenses paid or incurred by a taxpayer in connection with investments held by him are deductible under section 212 only if (1) they are paid or incurred by the taxpayer for the production or collection of income or for the management, conservation, or maintenance of investments held by him for the production of income; and (2) they are ordinary and necessary under all the circumstances, having regard to the type of investment and to the relation of the taxpayer to such investment.

(h) Ordinary and necessary expenses paid or incurred in connection with the management, conservation, or maintenance of property held for use as a residence by the taxpayer are not deductible. However, ordinary and necessary expenses paid or incurred in connection with the management, conservation, or maintenance of property held by the taxpayer as rental property are deductible even though such property was formerly held by the taxpayer for use as a home.

(i) Reasonable amounts paid or incurred by the fiduciary of an estate or trust on account of administration expenses, including fiduciaries' fees and expenses of litigation, which are ordinary and necessary in connection with the performance of the duties of administration are deductible under section 212, notwithstanding that the estate or trust is not engaged in a trade or business, except to the extent that such expenses are allocable to the production or collection of tax-exempt income. But see section 642 (g) and the regulations thereunder for disallowance of such deductions to an estate where such items are allowed as a de-

duction under section 2053 or 2054 in computing the net estate subject to the estate tax.

(j) Reasonable amounts paid or incurred for the services of a guardian or committee for a ward or minor, and other expenses of guardians and committees which are ordinary and necessary, in connection with the production or collection of income inuring to the ward or minor, or in connection with the management, conservation, or maintenance of property, held for the production of income, belonging to the ward or minor, are deductible.

(k) Expenses paid or incurred in defending or perfecting title to property, in recovering property (other than investment property and amounts of income which, if and when recovered, must be included in gross income), or in developing or improving property, constitute a part of the cost of the property and are not deductible expenses. Attorneys' fees paid in a suit to quiet title to lands are not deductible; but if the suit is also to collect accrued rents thereon, that portion of such fees is deductible which is properly allocable to the services rendered in collecting such rents. Expenses paid or incurred in protecting or asserting one's right to property of a decedent as heir or legatee, or as beneficiary under a testamentary trust, are not deductible.

(l) Expenses paid or incurred by an individual in connection with the determination, collection, or refund of any tax, whether the taxing authority be Federal, State, or municipal, and whether the tax be income, estate, gift, property, or any other tax, are deductible. Thus, expenses paid or incurred by a taxpayer for tax counsel or expenses paid or incurred in connection with the preparation of his tax returns or in connection with any proceedings involved in determining the extent of his tax liability or in contesting his tax liability are deductible.

(m) An expense (not otherwise deductible) paid or incurred by an individual in determining or contesting a liability asserted against him does not become deductible by reason of the fact that property held by him for the production of income may be required to be used or sold for the purpose of satisfying such liability.

(n) Capital expenditures are not allowable as nontrade or nonbusiness expenses. The deduction of an item otherwise allowable under section 212 will not be disallowed simply because the taxpayer was entitled under Subtitle A of the Code to treat such item as a capital expenditure, rather than to deduct it as an expense. For example, see section 266. Where, however, the item may properly be treated only as a capital expenditure or where it was properly so treated under an option granted in Subtitle A of the Code, no deduction is allowable under section 212; and this is true regardless of whether any basis adjustment is allowed under any other provision of the Code.

(o) The provisions of section 212 are not intended in any way to disallow expenses which would otherwise be allowable under section 162 and the regulations thereunder. Double deductions are not permitted. Amounts deducted under one provision of the Internal Revenue Code of 1954 cannot again be deducted under any other provision thereof.

(p) *Frustration of public policy.* The deduction of a payment will be disallowed under section 212 if the payment is of a type for which a deduction would be disallowed under section 162(c), (f), or (g) and the regulations thereunder in the case of a business expense.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 12, 1960, as amended by T.D. 7198, 37 FR 13685, July 13, 1972; T.D. 7345, 40 FR 7439, Feb. 20, 1975]

§ 1.213-1 Medical, dental, etc., expenses.

(a) *Allowance of deduction.* (1) Section 213 permits a deduction of payments for certain medical expenses (including expenses for medicine and drugs). Except as provided in paragraph (d) of this section (relating to special rule for decedents) a deduction is allowable only to individuals and only with respect to medical expenses actually paid during the taxable year, regardless of when the incident or event which occasioned the expenses occurred and regardless of the method of accounting employed by the taxpayer in making his income tax return. Thus, if the medical expenses are incurred but not

paid during the taxable year, no deduction for such expenses shall be allowed for such year.

(2) Except as provided in subparagraphs (4)(i) and (5)(i) of this paragraph, only such medical expenses (including the allowable expenses for medicine and drugs) are deductible as exceed 3 percent of the adjusted gross income for the taxable year. For taxable years beginning after December 31, 1966, the amounts paid during the taxable year for insurance that constitute expenses paid for medical care shall, for purposes of computing total medical expenses, be reduced by the amount determined under subparagraph (5)(i) of this paragraph. For the amounts paid during the taxable year for medicine and drugs which may be taken into account in computing total medical expenses, see paragraph (b) of this section. For the maximum deduction allowable under section 213 in the case of certain taxable years, see paragraph (c) of this section. As to what constitutes "adjusted gross income", see section 62 and the regulations thereunder.

(3)(i) For medical expenses paid (including expenses paid for medicine and drugs) to be deductible, they must be for medical care of the taxpayer, his spouse, or a dependent of the taxpayer and not be compensated for by insurance or otherwise. Expenses paid for the medical care of a dependent, as defined in section 152 and the regulations thereunder, are deductible under this section even though the dependent has gross income equal to or in excess of the amount determined pursuant to § 1.151-2 applicable to the calendar year in which the taxable year of the taxpayer begins. Where such expenses are paid by two or more persons and the conditions of section 152(c) and the regulations thereunder are met, the medical expenses are deductible only by the person designated in the multiple support agreement filed by such persons and such deduction is limited to the amount of medical expenses paid by such person.

(ii) An amount excluded from gross income under section 105 (c) or (d) (relating to amounts received under accident and health plans) and the regulations thereunder shall not constitute

compensation for expenses paid for medical care. Exclusion of such amounts from gross income will not affect the treatment of expenses paid for medical care.

(iii) The application of the rule allowing a deduction for medical expenses to the extent not compensated for by insurance or otherwise may be illustrated by the following example in which it is assumed that neither the taxpayer nor his wife has attained the age of 65:

Example. Taxpayer H, married to W and having one dependent child, had adjusted gross income for 1956 of \$3,000. During 1956 he paid \$300 for medical care, of which \$100 was for treatment of his dependent child and \$200 for an operation on W which was performed in September 1955. In 1956 he received a payment of \$50 for health insurance to cover a portion of the cost of W's operation performed during 1955. The deduction allowable under section 213 for the calendar year 1956, provided the taxpayer itemizes his deductions and does not compute his tax under section 3 by use of the tax table, is \$160, computed as follows:

Payments in 1956 for medical care	\$300
Less: Amount of insurance received in 1956	50
Payments in 1956 for medical care not compensated for during 1956	250
Less: 3 percent of \$3,000 (adjusted gross income)	90
Excess, allowable as a deduction for 1956	160

(4)(i) For taxable years beginning before January 1, 1967, where either the taxpayer or his spouse has attained the age of 65 before the close of the taxable year, the 3-percent limitation on the deduction for medical expenses does not apply with respect to expenses for medical care of the taxpayer or his spouse. Moreover, for taxable years beginning after December 31, 1959, and before January 1, 1967, the 3-percent limitation on the deduction for medical expenses does not apply to amounts paid for the medical care of a dependent (as defined in sec. 152) who is the mother or father of the taxpayer or his spouse and who has attained the age of 65 before the close of the taxpayer's taxable year. For taxable years beginning before January 1, 1964, and for taxable years beginning after December 31, 1966, all amounts paid by the taxpayer for medicine and drugs are subject to the 1-percent limitation provided by

section 213(b). For taxable years beginning after December 31, 1963, and before January 1, 1967, the 1-percent limitation provided by section 213(b) does not apply, under certain circumstances, to amounts paid by the taxpayer for medicine and drugs for the taxpayer and his spouse or for a dependent (as defined in sec. 152) who is the mother or father of the taxpayer or of his spouse. (For additional provisions relating to the 1-percent limitation with respect to medicine and drugs, see paragraph (b) of this section.) For taxable years beginning before January 1, 1967, whether or not the 3-percent or 1-percent limitation applies, the total medical expenses deductible under section 213 are subject to the limitations described in section 213(c) and paragraph (c) of this section and, where applicable, to the limitations described in section 213(g) and § 1.213-2.

(ii) The age of a taxpayer shall be determined as of the last day of his taxable year. In the event of the taxpayer's death, his taxable year shall end as of the date of his death. The age of a taxpayer's spouse shall be determined as of the last day of the taxpayer's taxable year, except that, if the spouse dies within such taxable year, her age shall be determined as of the date of her death. Likewise, the age of the taxpayer's dependent who is the mother or father of the taxpayer or of his spouse shall be determined as of the last day of the taxpayer's taxable year but not later than the date of death of such dependent.

(iii) The application of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example 1. Taxpayer A, who attained the age of 65 on February 22, 1956, makes his return on the basis of the calendar year. During the year 1956, A had adjusted gross income of \$8,000, and paid the following medical bills: (a) \$560 (7 percent of adjusted gross income) for the medical care of himself and his spouse, and (b) \$160 (2 percent of adjusted gross income) for the medical care of his dependent son. No part of these payments was for medicine and drugs nor compensated for by insurance or otherwise. The allowable deduction under section 213 for 1956 is \$560, the full amount of the medical expenses for the taxpayer and his spouse. No deduction is allowable for the amount of \$160 paid for medical care of the dependent son since the

amount of such payment (determined without regard to the payments for the care of the taxpayer and his spouse) does not exceed 3 percent of adjusted gross income.

Example 2. H and W, who have a dependent child, made a joint return for the calendar year 1956. H became 65 years of age on August 15, 1956. The adjusted gross income of H and W in 1956 was \$40,000 and they paid in such year the following amounts for medical care: (a) \$3,000 for the medical care of H; (b) \$2,000 for the medical care of W; and (c) \$3,000 for the medical care of the dependent child. No part of these payments was for medicine and drugs nor compensated for by insurance or otherwise. The allowable deduction under section 213 for medical expenses paid in 1956 is \$6,800 computed as follows:

Payments for medical care of H and W in 1956	\$5,000	
Payments for medical care of the dependent in 1956	\$3,000	
Less: 3 percent of \$40,000 (adjusted gross income)	1,200	
		1,800
Allowable deduction for 1956		6,800

Example 3. D and his wife, E, made a joint income tax return for the calendar year 1962, and reported adjusted gross income of \$30,000. On December 13, 1962, D attained the age of 65. During the year 1962, D's father, F, who was 87 years of age, received over half of his support from, and was a dependent (as defined in section 152) of, D. However, D could not claim an exemption under section 151 for F because F had gross income from rents in 1962 of \$800. D paid the following medical expenses in 1962, none of which were compensated for by insurance or otherwise: hospital and doctor bills for D and E, \$6,500; hospital and doctor bills for F, \$4,850; medicine and drugs for D and E, \$225, and for F, \$225. Since none of the medical expenses are subject to the 3-percent limitation, the amount of medical expenses to be taken into account (before computing the maximum deduction) is \$11,500, computed as follows:

Hospital and doctor bills—for D and E	\$6,500	
Hospital and doctor bills—for F	4,850	
Medicine and drugs—for D and E	\$225	
Medicine and drugs—for F	\$225	
Total medicine and drugs	450	
Less: 1 percent of adjusted gross income (\$30,000)	300	
Allowable expenses for medicine and drugs		\$150
Total medical expenses taken into account		11,500

Since an exemption cannot be claimed for F on the 1962 return of D and E, their deduction for medical expenses (assuming that section 213(g) does not apply) is limited to \$10,000 for that year (\$5,000 multiplied by the

two exemptions allowed for D and E under section 151(b)). If these identical facts had occurred in a taxable year beginning before January 1, 1962, the medical expense deduction for D and E would, for such taxable year, be limited to \$5,000 (\$2,500 multiplied by the two exemptions allowed for D and E under section 151(b)). See paragraph (c) of this section.

Example 4. Assume the same facts as in *Example 3*, except that D furnished the entire support of his father's twin sister, G, who had no gross income during 1962 and for whom D was entitled to a dependency exemption. In addition, D paid \$4,800 to doctors and hospitals during 1962 for the medical care of G. No part of the \$4,800 was for medicine and drugs, and no amount was compensated for by insurance or otherwise. For purposes of the maximum limitation under section 213(c), the maximum deduction for medical expenses on the 1962 return of D and E is limited to \$15,000 (\$5,000 multiplied by 3, the number of exemptions allowed under section 151, exclusive of the exemptions for old age or blindness). If these identical facts had occurred in a taxable year beginning before January 1, 1962, the medical expense deduction for D and E would, for such taxable year, be limited to \$7,500 (\$2,500 multiplied by the three exemptions allowed under section 151, exclusive of the exemptions for old age or blindness). The medical expenses to be taken into account by D and E for 1962 and the maximum deductions allowable for such expenses are \$15,400 and \$15,000, respectively, computed as follows:

Medical expenses per <i>Example 3</i>	\$11,500	
Add: Expenses paid for G	\$4,800	
Less: 3 percent of adjusted gross income (\$30,000)	900	
		3,900
Total medical expenses taken into account		15,400
Maximum deduction for 1962 (\$5,000 multiplied by 3 exemptions)		15,000
Medical expenses not deductible		400

Example 5. Assume that the facts set forth in *Example 3* had occurred in respect of the calendar year 1964 rather than the calendar year 1962. Since both D and his father, F, had attained the age of 65 before the close of the taxable year, the 1-percent limitation does not apply to the amounts paid for medicine and drugs for D, E, and F. Accordingly, the total medical expenses taken into account by D and E for 1964 would be \$11,800 (rather than \$11,500 as in *Example 3*) computed as follows:

Hospital and doctor bills—for D and E	\$6,500	
Hospital and doctor bills—for F	4,350	
Medicine and drugs—for D and E	225	
Medicine and drugs—for F	225	
Total medical expenses taken into account		11,800

Internal Revenue Service, Treasury

§ 1.213-1

(5)(i) For taxable years beginning after December 31, 1966, there may be deducted without regard to the 3-percent limitation the lesser of—(a) One-half of the amounts paid during the taxable year for insurance which constitute expenses for medical care for the taxpayer, his spouse, and dependents; or (b) \$150.

(ii) The application of subdivision (i) of this subparagraph may be illustrated by the following example:

Example. H and W made a joint return for the calendar year 1967. The adjusted gross income of H and W for 1967 was \$10,000 and they paid in such year \$370 for medical care of which amount \$350 was paid for insurance which constitutes medical care for H and W. No part of the payment was for medicine and drugs or was compensated for by insurance or otherwise. The allowable deduction under section 213 for medical expenses paid in 1967 is \$150, computed as follows:

(1) Lesser of \$175 (one-half of amounts paid for insurance) or \$150	\$150
(2) Payments for medical care	\$370
(3) Less line 1	150
(4) Medical expenses to be taken into account under 3-percent limitation (line 2 minus line 3)	\$220
(5) Less: 3 percent of \$10,000 (adjusted gross income)	300
(6) Excess allowable as a deduction for 1967 (excess of line 4 over line 5)	0
(7) Allowable medical expense deduction for 1967 (line 1 plus line 6)	\$150

(b) *Limitation with respect to medicine and drugs*—(1) *Taxable years beginning before January 1, 1964.* (i) Amounts paid during taxable years beginning before January 1, 1964, for medicine and drugs are to be taken into account in computing the allowable deduction for medical expenses paid during the taxable year only to the extent that the aggregate of such amounts exceeds 1 percent of the adjusted gross income for the taxable year. Thus, if the aggregate of the amounts paid for medicine and drugs exceeds 1 percent of adjusted gross income, the excess is added to other medical expenses for the purpose of computing the medical expense deduction. The application of this subdivision may be illustrated by the following example:

Example. The taxpayer, a single individual with no dependents, had an adjusted gross income of \$6,000 for the calendar year 1956. During 1956, he paid a doctor \$300 for medical

services, a hospital \$100 for hospital care, and also spent \$100 for medicine and drugs. These payments were not compensated for by insurance or otherwise. The deduction allowable under section 213 for the calendar year 1956 is \$260, computed as follows:

Payments for medical care in 1956:

Doctor	\$300
Hospital	100
Medicine and drugs	\$100
Less: 1 percent of \$6,000 (adjusted gross income)	60
Total medical expenses taken into account	440
Less: 3 percent of \$6,000 (adjusted gross income)	180
Allowable deduction for 1956	260

(ii) For taxable years beginning before January 1, 1964, the 1-percent limitation is applicable to all amounts paid by a taxpayer during the taxable year for medicine and drugs. Moreover, this limitation applies regardless of the fact that the amounts paid are for medicine and drugs for the taxpayer, his spouse, or dependent parent (the mother or father of the taxpayer or of his spouse) who has attained the age of 65 before the close of the taxable year. In a case where either a taxpayer or his spouse has attained the age of 65 and the taxpayer pays an amount in excess of 1 percent of adjusted gross income for medicine and drugs for himself, his spouse, and his dependents, it is necessary to apportion the 1 percent of adjusted gross income (the portion which is not taken into account as expenses paid for medical care) between the taxpayer and his spouse on the one hand and his dependents on the other. The part of the 1 percent allocable to the taxpayer and his spouse is an amount which bears the same ratio to 1 percent of his adjusted gross income which the amount paid for medicine and drugs for the taxpayer and his spouse bears to the total amount paid for medicine and drugs for the taxpayer, his spouse, and his dependents. The balance of the 1 percent shall be allocated to his dependents. The amount paid for medicine and drugs in excess of the allocated part of the 1 percent shall be taken into account as payments for medical care for the taxpayer and his spouse on the one hand and his dependents on the other, respectively. A similar apportionment must be made in the case of a dependent parent (65 years of age or over) of the taxpayer or his

§ 1.213-1

26 CFR Ch. I (4-1-17 Edition)

spouse. The application of this subdivision (ii) may be illustrated by the following example:

Example. H and W, who have a dependent child, made a joint return for the calendar year 1956. H became 65 years of age on September 15, 1956. The adjusted gross income of H and W for 1956 is \$10,000. During the year, H and W paid the following amounts for med-

ical care: (i) \$1,000 for doctors and hospital expenses and \$180 for medicine and drugs for themselves; and (ii) \$500 for doctors and hospital expenses and \$140 for medicine and drugs for the dependent child. These payments were not compensated for by insurance or otherwise. The deduction allowable under section 213(a)(2) for medical expenses paid in 1956 is \$1,420, computed as follows:

H and W:			
Payments for doctors and hospital			\$1,000.00
Payments for medicine and drugs		\$180.00	
Less: Limitation for medicine and drugs (see computation below)		56.25	123.75
Medical expenses for H and W to be taken into account			1,123.75
Dependent:			
Payments for doctors and hospital		500.00	
Payments for medicine and drugs		\$140.00	
Less: Limitation for medicine and drugs (see computation below)		43.75	96.25
Total medical expenses		596.25	
Less: 3 percent of \$10,000 (adjusted gross income)		300.00	
Medical expenses for the dependent to be taken into account			296.25
Allowable deductions for 1956			1,420.00
Payments for medicine and drugs:			
H and W			180.00
Dependent			140.00
Total payments			320.00
Less: 1 percent of \$10,000 (adjusted gross income)			100.00
Payments to be taken into account			20.00
Allocation of 1-percent exclusion:			
H and W $(180 \div 320 \times \$100)$			56.25
Dependent $(140 \div 320 \times \$100)$			43.75
Total			100.00

(2) *Taxable years beginning after December 31, 1963.* (i) Except as otherwise provided in subdivision (ii) of this subparagraph, amounts paid during taxable years beginning after December 31, 1963, for medicine and drugs are to be taken into account in computing the allowable deduction for medical expenses paid during the taxable year only to the extent that the aggregate of such amounts exceeds 1 percent of the adjusted gross income for the taxable year. Thus, if the aggregate of the amounts paid for medicine and drugs which are subject to the 1-percent limitation exceeds 1 percent of adjusted gross income, the excess is added to other medical expenses for the purpose of computing the medical expense deduction.

(ii) The 1-percent limitation provided by section 213 does not apply to amounts paid by a taxpayer during a taxable year beginning after December

31, 1963, and before January 1, 1967, for medicine and drugs for the medical care of the taxpayer and his spouse if either has attained the age of 65 before the close of the taxable year. Moreover, for taxable years beginning after December 31, 1963, and before January 1, 1967, the 1-percent limitation with respect to medicine and drugs does not apply to amounts paid for the medical care of a dependent (as defined in sec. 152) who is the mother or father of the taxpayer or of his spouse and who has attained the age of 65 before the close of the taxpayer's taxable year. Amounts paid for medicine and drugs which are not subject to the limitation on medicine and drugs are added to other medical expenses of a taxpayer and his spouse or the dependent (as the case may be) for the purpose of computing the medical expense deduction.

Internal Revenue Service, Treasury

§ 1.213-1

(iii) The application of this subparagraph may be illustrated by the following examples:

Example 1. H and W, who have a dependent child, C, were both under 65 years of age at the close of the calendar year 1964 and made a joint return for that calendar year. During the year 1964, H's mother, M, attained the age of 65, and was a dependent (as defined in section 152) of H. The adjusted gross income of H and W in 1964 was \$12,000. During 1964 H and W paid the following amounts for medical care: (i) \$600 for doctors and hospital expenses and \$120 for medicine and drugs for themselves; (ii) \$350 for doctors and hospital expenses and \$60 for medicine and drugs for C; and (iii) \$400 for doctors and hospital expenses and \$100 for medicine and drugs for M. These payments were not compensated for by insurance or otherwise. The deduction allowable under section 213(a) (1) for medical expenses paid in 1964 is \$1,150, computed as follows:

H, W, and C:			
Payments for doctors and hospital	\$950	
Payments for medicine and drugs	\$180	
Less: 1 percent of \$12,000 (adjusted gross income)	120	60
Total medical expenses	1,010	
Less: 3 percent of \$12,000 (adjusted gross income)	360	
Medical expenses of H, W, and C to be taken into account		\$650
M:			
Payments for doctors and hospitals	400	
Payments for medicine and drugs	100	
Medical expenses of M to be taken into account		500
Allowable deduction for 1964		1,150

Example 2. H and W, who have a dependent child, C, made a joint return for the calendar year 1964, and reported adjusted gross income of \$12,000. H became 65 years of age on January 23, 1964. F, the 87 year old father of W, was a dependent of H. During 1964, H and W paid the following amounts for medical care: (i) \$400 for doctors and hospital expenses and \$75 for medicine and drugs for H; (ii) \$200 for doctors and hospital expenses and \$100 for medicine and drugs for W; (iii) \$200 for doctors and hospital expenses and \$175 for medicine and drugs for C; and (iv) \$700 for doctors and hospital expenses and \$150 for medicine and drugs for F. These payments were not compensated for by insurance or otherwise. The deduction allowable under section 213(a) (2) for medical expenses paid in 1964 is \$1,625, computed as follows:

H and W:			
Payments for doctors and hospital	\$600	
Payments for medicine and drugs	175	

Medical expenses for H and W to be taken into account				\$775
F:				
Payments for doctors and hospital	700		
Payments for medicine and drugs	150		
Medical expenses for F to be taken into account			850
C:				
Payments for doctors and hospital	200		
Payments for medicine and drugs	\$175		
Less: 1 percent of \$12,000 (adjusted gross income)	120	55	
Total medical expenses		255	
Less: 3 percent of \$12,000 (adjusted gross income)		360	
Medical expenses for C to be taken into account			0
Allowable deduction for 1964			1,625

Example 3. Assume the same facts as example (2) except that the calendar year of the return is 1967 and the amounts paid for medical care were paid during 1967. The deduction allowable under section 213(a) for medical expenses paid in 1967 is \$1,520, computed as follows:

Payments for doctors and hospitals:				
H	\$400		
W	200		
C	200		
F	700		
				\$1,500
Payments for medicine and drugs:				
H	75		
W	100		
C	175		
F	150		
				\$500
Less: 1 percent of \$12,000 (adjusted gross income)	120	380	
Medical expenses to be taken into account			\$1,880
Less: 3 percent of \$12,000 (adjusted gross income)			360
Allowable medical expense deduction for 1967			1,520

(3) *Definition of medicine and drugs.* For definition of medicine and drugs, see paragraph (e) (2) of this section.

(c) *Maximum limitations.* (1) For taxable years beginning after December 31, 1966, there shall be no maximum limitation on the amount of the deduction allowable for payment of medical expenses.

(2) Except as provided in section 213(g) and § 1.213-2 (relating to maximum limitations with respect to certain aged and disabled individuals for taxable years beginning before January 1, 1967), for taxable years beginning

§ 1.213-1

26 CFR Ch. I (4-1-17 Edition)

after December 31, 1961, and before January 1, 1967, the maximum deduction allowable for medical expenses paid in any one taxable year is the lesser of:

(i) \$5,000 multiplied by the number of exemptions allowed under section 151 (exclusive of exemptions allowed under section 151(c) for a taxpayer or spouse attaining the age of 65, or section 151(d) for a taxpayer who is blind or a spouse who is blind);

(ii) \$10,000, if the taxpayer is single, not the head of a household (as defined in section 1(b) (2)) and not a surviving spouse (as defined in section 2(b)), or is married and files a separate return; or

(iii) \$20,000 if the taxpayer is married and files a joint return with his spouse under section 6013, or is the head of a household (as defined in section 1(b) (2)), or a surviving spouse (as defined in section 2(b)).

(3) The application of subparagraph (2) of this paragraph may be illustrated by the following example:

Example. H and W made a joint return for the calendar year 1962 and were allowed five exemptions (exclusive of exemptions under sec. 151 (c) and (d)), one for each taxpayer and three for their dependents. The adjusted gross income of H and W in 1962 was \$80,000. They paid during such year \$26,000 for medical care, no part of which is compensated for by insurance or otherwise. The deduction allowable under section 213 for the calendar year 1962 is \$20,000, computed as follows:

Payments for medical care in 1962	\$26,000
Less: 3 percent of \$80,000 (adjusted gross income)	2,400
Excess of medical expenses in 1962 over 3 percent of adjusted gross income	23,600
Allowable deduction for 1962 (\$5,000 multiplied by five exemptions allowed under sec. 151 (b) and (e) but not in excess of \$20,000)	20,000

(4) Except as provided in section 213(g) and § 1.213-2 (relating to certain aged and disabled individuals), for taxable years beginning before January 1, 1962, the maximum deduction allowable for medical expenses paid in any 1 taxable year is the lesser of:

(i) \$2,500 multiplied by the number of exemptions allowed under section 151 (exclusive of exemptions allowed under section 151(c) for a taxpayer or spouse attaining the age of 65, or section 151(d) for a taxpayer who is blind or a spouse who is blind);

(ii) \$5,000, if the taxpayer is single, not the head of a household (as defined

in section 1(b) (2)) and not a surviving spouse (as defined in section 2(b)) or is married and files a separate return; or

(iii) \$10,000, if the taxpayer is married and files a joint return with his spouse under section 6013, or is head of a household (as defined in section 1(b) (2)), or a surviving spouse (as defined in section 2(b)).

(5) For the maximum deduction allowable for taxable years beginning before January 1, 1967, if the taxpayer or his spouse is age 65 or over and is disabled, see § 1.213-2.

(d) *Special rule for decedents.* (1) For the purpose of section 213 (a), expenses for medical care of the taxpayer which are paid out of his estate during the 1-year period beginning with the day after the date of his death shall be treated as paid by the taxpayer at the time the medical services were rendered. However, no credit or refund of tax shall be allowed for any taxable year for which the statutory period for filing a claim has expired. See section 6511 and the regulations thereunder.

(2) The rule prescribed in subparagraph (1) of this paragraph shall not apply where the amount so paid is allowable under section 2053 as a deduction in computing the taxable estate of the decedent unless there is filed in duplicate (i) a statement that such amount has not been allowed as a deduction under section 2053 in computing the taxable estate of the decedent and (ii) a waiver of the right to have such amount allowed at any time as a deduction under section 2053. The statement and waiver shall be filed with or for association with the return, amended return, or claim for credit or refund for the decedent for any taxable year for which such an amount is claimed as a deduction.

(e) *Definitions*—(1) *General.* (i) The term *medical care* includes the diagnosis, cure, mitigation, treatment, or prevention of disease. Expenses paid for “medical care” shall include those paid for the purpose of affecting any structure or function of the body or for transportation primarily for and essential to medical care. See subparagraph (4) of this paragraph for provisions relating to medical insurance.

(ii) Amounts paid for operations or treatments affecting any portion of the

body, including obstetrical expenses and expenses of therapy or X-ray treatments, are deemed to be for the purpose of affecting any structure or function of the body and are therefore paid for medical care. Amounts expended for illegal operations or treatments are not deductible. Deductions for expenditures for medical care allowable under section 213 will be confined strictly to expenses incurred primarily for the prevention or alleviation of a physical or mental defect or illness. Thus, payments for the following are payments for medical care: hospital services, nursing services (including nurses' board where paid by the taxpayer), medical, laboratory, surgical, dental and other diagnostic and healing services, X-rays, medicine and drugs (as defined in subparagraph (2) of this paragraph, subject to the 1-percent limitation in paragraph (b) of this section), artificial teeth or limbs, and ambulance hire. However, an expenditure which is merely beneficial to the general health of an individual, such as an expenditure for a vacation, is not an expenditure for medical care.

(iii) Capital expenditures are generally not deductible for Federal income tax purposes. See section 263 and the regulations thereunder. However, an expenditure which otherwise qualifies as a medical expense under section 213 shall not be disqualified merely because it is a capital expenditure. For purposes of section 213 and this paragraph, a capital expenditure made by the taxpayer may qualify as a medical expense, if it has as its primary purpose the medical care (as defined in subdivisions (i) and (ii) of this subparagraph) of the taxpayer, his spouse, or his dependent. Thus, a capital expenditure which is related only to the sick person and is not related to permanent improvement or betterment of property, if it otherwise qualifies as an expenditure for medical care, shall be deductible; for example, an expenditure for eye glasses, a seeing eye dog, artificial teeth and limbs, a wheel chair, crutches, an inclinor or an air conditioner which is detachable from the property and purchased only for the use of a sick person, etc. Moreover, a capital expenditure for permanent improvement or betterment of property

which would not ordinarily be for the purpose of medical care (within the meaning of this paragraph) may, nevertheless, qualify as a medical expense to the extent that the expenditure exceeds the increase in the value of the related property, if the particular expenditure is related directly to medical care. Such a situation could arise, for example, where a taxpayer is advised by a physician to install an elevator in his residence so that the taxpayer's wife who is afflicted with heart disease will not be required to climb stairs. If the cost of installing the elevator is \$1,000 and the increase in the value of the residence is determined to be only \$700, the difference of \$300, which is the amount in excess of the value enhancement, is deductible as a medical expense. If, however, by reason of this expenditure, it is determined that the value of the residence has not been increased, the entire cost of installing the elevator would qualify as a medical expense. Expenditures made for the operation or maintenance of a capital asset are likewise deductible medical expenses if they have as their primary purpose the medical care (as defined in subdivisions (i) and (ii) of this subparagraph) of the taxpayer, his spouse, or his dependent. Normally, if a capital expenditure qualifies as a medical expense, expenditures for the operation or maintenance of the capital asset would also qualify provided that the medical reason for the capital expenditure still exists. The entire amount of such operation and maintenance expenditures qualifies, even if none or only a portion of the original cost of the capital asset itself qualified.

(iv) Expenses paid for transportation primarily for and essential to the rendition of the medical care are expenses paid for medical care. However, an amount allowable as a deduction for "transportation primarily for and essential to medical care" shall not include the cost of any meals and lodging while away from home receiving medical treatment. For example, if a doctor prescribes that a taxpayer go to a warm climate in order to alleviate a specific chronic ailment, the cost of meals and lodging while there would not be deductible. On the other hand, if the travel is undertaken merely for the

general improvement of a taxpayer's health, neither the cost of transportation nor the cost of meals and lodging would be deductible. If a doctor prescribes an operation or other medical care, and the taxpayer chooses for purely personal considerations to travel to another locality (such as a resort area) for the operation or the other medical care, neither the cost of transportation nor the cost of meals and lodging (except where paid as part of a hospital bill) is deductible.

(v) The cost of in-patient hospital care (including the cost of meals and lodging therein) is an expenditure for medical care. The extent to which expenses for care in an institution other than a hospital shall constitute medical care is primarily a question of fact which depends upon the condition of the individual and the nature of the services he receives (rather than the nature of the institution). A private establishment which is regularly engaged in providing the types of care or services outlined in this subdivision shall be considered an institution for purposes of the rules provided herein. In general, the following rules will be applied:

(a) Where an individual is in an institution because his condition is such that the availability of medical care (as defined in subdivisions (i) and (ii) of this subparagraph) in such institution is a principal reason for his presence there, and meals and lodging are furnished as a necessary incident to such care, the entire cost of medical care and meals and lodging at the institution, which are furnished while the individual requires continual medical care, shall constitute an expense for medical care. For example, medical care includes the entire cost of institutional care for a person who is mentally ill and unsafe when left alone. While ordinary education is not medical care, the cost of medical care includes the cost of attending a special school for a mentally or physically handicapped individual, if his condition is such that the resources of the institution for alleviating such mental or physical handicap are a principal reason for his presence there. In such a case, the cost of attending such a special school will include the cost of

meals and lodging, if supplied, and the cost of ordinary education furnished which is incidental to the special services furnished by the school. Thus, the cost of medical care includes the cost of attending a special school designed to compensate for or overcome a physical handicap, in order to qualify the individual for future normal education or for normal living, such as a school for the teaching of braille or lip reading. Similarly, the cost of care and supervision, or of treatment and training, of a mentally retarded or physically handicapped individual at an institution is within the meaning of the term *medical care*.

(b) Where an individual is in an institution, and his condition is such that the availability of medical care in such institution is not a principal reason for his presence there, only that part of the cost of care in the institution as is attributable to medical care (as defined in subdivisions (i) and (ii) of this subparagraph) shall be considered as a cost of medical care; meals and lodging at the institution in such a case are not considered a cost of medical care for purposes of this section. For example, an individual is in a home for the aged for personal or family considerations and not because he requires medical or nursing attention. In such case, medical care consists only of that part of the cost for care in the home which is attributable to medical care or nursing attention furnished to him; his meals and lodging at the home are not considered a cost of medical care.

(c) It is immaterial for purposes of this subdivision whether the medical care is furnished in a Federal or State institution or in a private institution.

(vi) See section 262 and the regulations thereunder for disallowance of deduction for personal living, and family expenses not falling within the definition of medical care.

(2) *Medicine and drugs.* The term *medicine and drugs* shall include only items which are legally procured and which are generally accepted as falling within the category of medicine and drugs (whether or not requiring a prescription). Such term shall not include toiletries or similar preparations (such as toothpaste, shaving lotion, shaving

cream, etc.) nor shall it include cosmetics (such as face creams, deodorants, hand lotions, etc., or any similar preparation used for ordinary cosmetic purposes) or sundry items. Amounts expended for items which, under this subparagraph, are excluded from the term *medicine and drugs* shall not constitute amounts expended for "medical care".

(3) *Status as spouse or dependent.* In the case of medical expenses for the care of a person who is the taxpayer's spouse or dependent, the deduction under section 213 is allowable if the status of such person as "spouse" or "dependent" of the taxpayer exists either at the time the medical services were rendered or at the time the expenses were paid. In determining whether such status as "spouse" exists, a taxpayer who is legally separated from his spouse under a decree of separate maintenance is not considered as married. Thus, payments made in June 1956 by A, for medical services rendered in 1955 to B, his wife, may be deducted by A for 1956 even though, before the payments were made, B may have died or in 1956 secured a divorce. Payments made in July 1956 by C, for medical services rendered to D in 1955 may be deducted by C for 1956 even though C and D were not married until June 1956.

(4) *Medical insurance.* (i)(a) For taxable years beginning after December 31, 1966, expenditures for insurance shall constitute expenses paid for medical care only to the extent that such amounts are paid for insurance covering expenses of medical care referred to in subparagraph (1) of this paragraph. In the case of an insurance contract under which amounts are payable for other than medical care (as, for example, a policy providing an indemnity for loss of income or for loss of life, limb, or sight):

(1) No amount shall be treated as paid for insurance covering expenses of medical care referred to in subparagraph (1) of this paragraph unless the charge for such insurance is either separately stated in the contract or furnished to the policyholder by the insurer in a separate statement,

(2) The amount taken into account as the amount paid for such medical in-

surance shall not exceed such charge, and

(3) No amount shall be treated as paid for such medical insurance if the amount specified in the contract (or furnished to the policyholder by the insurer in a separate statement) as the charge for such insurance is unreasonably large in relation to the total charges under the contract.

For purposes of the preceding sentence, amounts will be considered payable for other than medical care under the contract if the contract provides for the waiver of premiums upon the occurrence of an event. In determining whether a separately stated charge for insurance covering expenses of medical care is unreasonably large in relation to the total premium, the relationship of the coverages under the contract together with all of the facts and circumstances shall be considered. In determining whether a contract constitutes an "insurance" contract it is irrelevant whether the benefits are payable in cash or in services. For example, amounts paid for hospitalization insurance, for membership in an association furnishing cooperative or so-called free-choice medical service, or for group hospitalization and clinical care are expenses paid for medical care. Premiums paid under Part B, title XVIII of the Social Security Act (42 U.S.C. 1395j-1395w), relating to supplementary medical insurance benefits for the aged, are amounts paid for insurance covering expenses of medical care. Taxes imposed by any governmental unit do not, however, constitute amounts paid for such medical insurance.

(b) For taxable years beginning after December 31, 1966, subject to the rules of (a) of this subdivision, premiums paid during a taxable year by a taxpayer under the age of 65 for insurance covering expenses of medical care for the taxpayer, his spouse, or a dependent after the taxpayer attains the age of 65 are to be treated as expenses paid during the taxable year for insurance covering expenses of medical care if the premiums for such insurance are payable (on a level payment basis) under the contract:

(1) For a period of 10 years or more, or

(2) Until the year in which the taxpayer attains the age of 65 (but in no case for a period of less than 5 years). For purposes of this subdivision (b), premiums will be considered payable on a level payment basis if the total premium under the contract is payable in equal annual or more frequent installments. Thus, a total premium of \$10,000 payable over a period of 10 years at \$1,000 a year shall be considered payable on a level payment basis.

(ii) For taxable years beginning before January 1, 1967, expenses paid for medical care shall include amounts paid for accident or health insurance. In determining whether a contract constitutes an "insurance" contract it is irrelevant whether the benefits are payable in cash or in services. For example, amounts paid for hospitalization insurance, for membership in an association furnishing cooperative or so-called free-choice medical service, or for group hospitalization and clinical care are expenses paid for medical care.

(f) *Exclusion of amounts allowed for care of certain dependents.* Amounts taken into account under section 44A in computing a credit for the care of certain dependents shall not be treated as expenses paid for medical care.

(g) *Reimbursement for expenses paid in prior years.* (1) Where reimbursement, from insurance or otherwise, for medical expenses is received in a taxable year subsequent to a year in which a deduction was claimed on account of such expenses, the reimbursement must be included in gross income in such subsequent year to the extent attributable to (and not in excess of) deductions allowed under section 213 for any prior taxable year. See section 104, relating to compensation for injuries or sickness, and section 105(b), relating to amounts expended for medical care, and the regulations thereunder, with regard to amounts in excess of or not attributable to deductions allowed.

(2) If no medical expense deduction was taken in an earlier year, for example, if the standard deduction under section 141 was taken for the earlier year, the reimbursement received in the taxable year for the medical expense of the earlier year is not includible in gross income.

(3) In order to allow the same aggregate medical expense deductions as if the reimbursement received in a subsequent year or years had been received in the year in which the payments for medical care were made, the following rules shall be followed:

(i) If the amount of the reimbursement is equal to or less than the amount which was deducted in a prior year, the entire amount of the reimbursement shall be considered attributable to the deduction taken in such prior year (and hence includible in gross income); or

(ii) If the amount of the reimbursement received in such subsequent year or years is greater than the amount which was deducted for the prior year, that portion of the reimbursement received which is equal in amount to the deduction taken in the prior year shall be considered as attributable to such deduction (and hence includible in gross income); but

(iii) If the deduction for the prior year would have been greater but for the limitations on the maximum amount of such deduction provided by section 213 (c), then the amount of the reimbursement attributable to such deduction (and hence includible in gross income) shall be the amount of the reimbursement received in a subsequent year or years reduced by the amount disallowed as a deduction because of the maximum limitation, but not in excess of the deduction allowed for the previous year.

(4) The application of subparagraphs (1), (2), and (3) of this paragraph may be illustrated by the following examples. *Examples 1 and 2* reflect the maximum limitation on the medical expense deduction applicable to taxable years beginning after December 31, 1961. *Examples 3 and 4* reflect the maximum limitation on the medical expense deduction applicable to taxable years beginning prior to January 1, 1962. For explanation of such maximum medical expense limitations, see paragraph (c) of this section.

Example 1. Taxpayer A, a single individual (not the head of a household and not a surviving spouse) with one dependent, is entitled to two exemptions under the provisions of section 151. He had an adjusted gross income of \$35,000 for the calendar year 1962.

Internal Revenue Service, Treasury

§ 1.213-1

During 1962 he paid \$16,000 for medical care. A received no reimbursement for such medical expenses in 1962, but in 1963 he received \$6,000 upon an insurance policy covering the medical expenses which he paid in 1962. A was allowed a deduction of \$10,000 (the maximum) from his adjusted gross income for 1962. The amount which A must include in his gross income for 1963 is \$1,050, and the amount to be excluded from gross income for 1963 is \$4,950, computed as follows:

Payments for medical care in 1962 (not reimbursed in 1962)	\$16,000
Less: 3 percent of \$35,000 (adjusted gross income)	1,050
Excess of medical expenses not reimbursed in 1962 over 3 percent of adjusted gross income	10,000
Allowable deduction for 1962	10,000
Amount by which the medical deductions for 1962 would have been greater than \$10,000 but for the limitations on the maximum amount provided by section 213	4,950
Reimbursement received in 1963	\$6,000
Less: Amount by which the medical deduction for 1962 would have been greater than \$10,000 but for the limitation on the maximum amount provided by section 213	4,950
Reimbursement received in 1963 reduced by the amount by which the medical deduction for 1962 would have been greater than \$10,000 but for the limitations on the maximum amount provided by section 213	1,050
Amount attributed to medical deduction taken for 1962	1,050
Amount to be included in gross income for 1963	1,050
Amount to be excluded from gross income for 1963 (\$6,000 less \$1,050)	4,950

Example 2. Assuming that A, in example (1), received \$15,000 in 1963 as reimbursement for the medical expenses which he paid in 1962, the amount which A must include in his gross income for 1963 is \$10,000, and the amount to be excluded from gross income for 1963 is \$5,000, computed as follows:

Reimbursement received in 1963	\$15,000
Less: Amount by which the medical deduction for 1962 would have been greater than \$10,000 but for the limitations on the maximum amount provided by section 213	4,950
Reimbursement received in 1963 reduced by the amount by which the medical deduction for 1962 would have been greater than \$10,000 but for the limitations on the maximum amount provided by section 213	10,050
Deduction allowable for 1962	10,000
Amount of reimbursement received in 1963 to be included in gross income for 1963 as attributable to deduction allowable for 1962	10,000
Amount to be excluded from gross income for 1963 (\$15,000 less \$10,000)	5,000

Example 3. Taxpayer A, a single individual (not the head of a household and not a surviving spouse) with one dependent, is entitled to two exemptions under the provisions of section 151. He had an adjusted gross in-

come of \$35,000 for the calendar year 1956. During 1956 he paid \$9,000 for medical care. A received no reimbursement for such medical expenses in 1956, but in 1957 he received \$6,000 upon an insurance policy covering the medical expenses which he paid in 1956. A was allowed a deduction of \$5,000 (the maximum) from his adjusted gross income for 1956. The amount which A must include in his gross income for 1957 is \$3,050 and the amount to be excluded from gross income for 1957 is \$2,950, computed as follows:

Payments for medical care in 1956 (not reimbursed in 1956)	\$9,000
Less: 3 percent of \$35,000 (adjusted gross income)	1,050
Excess of medical expenses not reimbursed in 1956 over 3 percent of adjusted gross income	7,950
Allowable deduction for 1956	5,000
Amount by which the medical deductions for 1956 would have been greater than \$5,000 but for the limitations on the maximum amount provided by section 213	2,950
Reimbursement received in 1957	6,000
Less: Amount by which the medical deduction for 1956 would have been greater than \$5,000 but for the limitations on the maximum amount provided by section 213	2,950
Reimbursement received in 1957 reduced by the amount by which the medical deduction for 1956 would have been greater than \$5,000 but for the limitations on the maximum amount provided by section 213	8,050
Amount attributed to medical deduction taken for 1956	3,050
Amount to be included in gross income for 1957	3,050
Amount to be excluded from gross income for 1957 (\$6,000 less \$3,050) ...	2,950

Example 4. Assuming that A, in example (3), received \$8,000 in 1957 as reimbursement for the medical expenses which he paid in 1956, the amount which A must include in his gross income for 1957 is \$5,000 and the amount to be excluded from gross income for 1957 is \$3,000 computed as follows:

Reimbursement received in 1957	\$8,000
Less: Amount by which the medical deduction for 1956 would have been greater than \$5,000 but for the limitations on the maximum amount provided by section 213	2,950
Reimbursement received in 1957 reduced by the amount by which the medical deduction for 1956 would have been greater than \$5,000 but for the limitations on the maximum amount provided by section 213	5,050
Deduction allowable for 1956	5,000
Amount of reimbursement received in 1957 to be included in gross income for 1957 as attributable to deduction allowable for 1956	5,000
Amount to be excluded from gross income for 1957 (\$8,000 less \$5,000)	3,000

§ 1.215-1

26 CFR Ch. I (4-1-17 Edition)

(h) *Substantiation of deductions.* In connection with claims for deductions under section 213, the taxpayer shall furnish the name and address of each person to whom payment for medical expenses was made and the amount and date of the payment thereof in each case. If payment was made in kind, such fact shall be so reflected. Claims for deductions must be substantiated, when requested by the district director, by a statement or itemized invoice from the individual or entity to which payment for medical expenses was made showing the nature of the service rendered, and to or for whom rendered; the nature of any other item of expense and for whom incurred and for what specific purpose, the amount paid therefor and the date of the payment thereof; and by such other information as the district director may deem necessary.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.213-1, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

§ 1.215-1 Periodic alimony, etc., payments.

(a) A deduction is allowable under section 215 with respect to periodic payments in the nature of, or in lieu of, alimony or an allowance for support actually paid by the taxpayer during his taxable year and required to be included in the income of the payee wife or former wife, as the case may be, under section 71. As to the amounts required to be included in the income of such wife or former wife, see section 71 and the regulations thereunder. For definition of *husband* and *wife* see section 7701(a) (17).

(b) The deduction under section 215 is allowed only to the obligor spouse. It is not allowed to an estate, trust, corporation, or any other person who may pay the alimony obligation of such obligor spouse. The obligor spouse, however, is not allowed a deduction for any periodic payment includible under section 71 in the income of the wife or former wife, which payment is attributable to property transferred in discharge of his obligation and which,

under section 71(d) or section 682, is not includible in his gross income.

(c) The following examples, in which both H and W file their income tax returns on the basis of a calendar year, illustrate cases in which a deduction is or is not allowed under section 215:

Example 1. Pursuant to the terms of a decree of divorce, H, in 1956, transferred securities valued at \$100,000 in trust for the benefit of W, which fully discharged all his obligations to W. The periodic payments made by the trust to W are required to be included in W's income under section 71. Such payments are stated in section 71(d) not to be includible in H's income and, therefore, under section 215 are not deductible from his income.

Example 2. A decree of divorce obtained by W from H incorporated a previous agreement of H to establish a trust, the trustees of which were instructed to pay W \$5,000 a year for the remainder of her life. The court retained jurisdiction to order H to provide further payments if necessary for the support of W. In 1956 the trustee paid to W \$4,000 from the income of the trust and \$1,000 from the corpus of the trust. Under the provisions of sections 71 and 682(b), W would include \$5,000 in her income for 1956. H would not include any part of the \$5,000 in his income nor take a deduction therefor. If H had paid the \$1,000 to W pursuant to court order rather than allowing the trustees to pay it out of corpus, he would have been entitled to a deduction of \$1,000 under the provisions of section 215.

(d) For other examples, see sections 71 and 682 and the regulations thereunder.

§ 1.215-1T Alimony, etc., payments (temporary).

Q-1 What information is required by the Internal Revenue Service when an alimony or separate maintenance payment is claimed as a deduction by a payor?

A-1 The payor spouse must include on his/her first filed return of tax (Form 1040) for the taxable year in which the payment is made the payee's social security number, which the payee is required to furnish to the payor. For penalties applicable to a payor spouse who fails to include such information on his/her return of tax or to a payee spouse who fails to furnish

Internal Revenue Service, Treasury

§ 1.216-1

his/her social security number to the payor spouse, see section 6676.

(98 Stat. 798, 26 U.S.C. 1041(d)(4); 98 Stat. 802, 26 U.S.C. 152(e)(2)(A); 98 Stat. 800, 26 U.S.C. 215(c); 68A Stat. 917, 26 U.S.C. 7805)

[T.D. 7973, 49 FR 34458, Aug. 31, 1984]

§ 1.216-1 Amounts representing taxes and interest paid to cooperative housing corporation.

(a) *General rule.* A tenant-stockholder of a cooperative housing corporation may deduct from his gross income amounts paid or accrued within his taxable year to a cooperative housing corporation representing his proportionate share of:

(1) The real estate taxes allowable as a deduction to the corporation under section 164 which are paid or incurred by the corporation before the close of the taxable year of the tenant-stockholder on the houses (or apartment building) and the land on which the houses (or apartment building) are situated, or

(2) The interest allowable as a deduction to the corporation under section 163 which is paid or incurred by the corporation before the close of the taxable year of the tenant-stockholder on its indebtedness contracted in the acquisition, construction, alteration, rehabilitation, or maintenance of the houses (or apartment building), or in the acquisition of the land on which the houses (or apartment building) are situated.

(b) *Limitation.* The deduction allowable under section 216 shall not exceed the amount of the tenant-stockholder's proportionate share of the taxes and interest described therein. If a tenant-stockholder pays or incurs only a part of his proportionate share of such taxes and interest to the corporation, only the amount so paid or incurred which represents taxes and interest is allowable as a deduction under section 216. If a tenant-stockholder pays an amount, or incurs an obligation for an amount, to the corporation on account of such taxes and interest and other items, such as maintenance, overhead expenses, and reduction of mortgage indebtedness, the amount representing such taxes and interest is an amount which bears the same ratio to the total amount of the tenant-stockholder's

payment or liability, as the case may be, as the total amount of the tenant-stockholder's proportionate share of such taxes and interest bears to the total amount of the tenant-stockholder's proportionate share of the taxes, interest, and other items on account of which such payment is made or liability incurred. No deduction is allowable under section 216 for that part of amounts representing the taxes or interest described in that section which are deductible by a tenant-stockholder under any other provision of the Code.

(c) *Disallowance of deduction for certain payments to the corporation.* For taxable years beginning after December 31, 1986, no deduction shall be allowed to a stockholder during any taxable year for any amount paid or accrued to a cooperative housing corporation (in excess of the stockholder's proportionate share of the items described in paragraphs (a) (1) and (2) of this section) which is allocable to amounts that are paid or incurred at any time by the cooperative housing corporation and which is chargeable to the corporation's capital account. Examples of expenditures chargeable to the corporation's capital account include the cost of paving a community parking lot, the purchase of a new boiler or roof, and the payment of the principal of the corporation's building mortgage. The adjusted basis of the stockholder's stock in such corporation shall be increased by the amount of such disallowance. This paragraph may be illustrated by the following example:

Example. The X corporation is a cooperative housing corporation within the meaning of section 216. In 1988 X uses \$275,000 that it received from its shareholders in such year to purchase and place in service a new boiler. The \$275,000 will be chargeable to the corporation's capital account. A owns 10% of the shares of X and uses in a trade or business the dwelling unit appurtenant to A's shares and was responsible for paying 10% of the cost of the boiler. A is thus responsible for \$27,500 of the cost of the boiler, which amount A will not be able to deduct currently. A will, however, add the \$27,500 to A's basis for A's shares in X.

(d) *Tenant-stockholder's proportionate share—(1) General rule.* The tenant-stockholder's proportionate share is that proportion which the stock of the

cooperative housing corporation owned by the tenant-stockholder is of the total outstanding stock of the corporation, including any stock held by the corporation. For taxable years beginning after December 31, 1969, if the cooperative housing corporation had issued stock to a governmental unit, as defined in paragraph (g) of this section, then in determining the total outstanding stock of the corporation, the governmental unit shall be deemed to hold the number of shares that it would have held, with respect to the apartments or houses it is entitled to occupy, if it had been a tenant-stockholder. That is, the number of shares the governmental unit is deemed to hold is determined in the same manner as if stock had been issued to it as a tenant-stockholder. For example, if a cooperative housing corporation requires each tenant-stockholder to buy one share of stock for each one thousand dollars of value of the apartment he is entitled to occupy, a governmental unit shall be deemed to hold one share of stock for each one thousand dollars of value of the apartments it is entitled to occupy, regardless of the number of shares formally issued to it.

(2) *Special rule*—(i) *In general.* For taxable years beginning after December 31, 1986, if a cooperative housing corporation allocates to each tenant-stockholder a portion of the real estate taxes or interest (or both) that reasonably reflects the cost to the corporation of the taxes or interest attributable to each tenant-stockholder's dwelling unit (and the unit's share of the common areas), the cooperative housing corporation may elect to treat the amounts so allocated as the tenant-stockholders' proportionate shares.

(ii) *Time and manner of making election.* The election referred to in paragraph (d)(2)(i) of this section is effective only if, by January 31 of the year following the first calendar year that includes any period to which the election applies, the cooperative housing corporation furnishes to each person that is a tenant-stockholder during that period a written statement showing the amount of real estate taxes or interest (or both) allocated to the tenant-stockholder with respect to the

tenant-stockholder's dwelling unit or units and share of common areas for that period. The election must be made by attaching a statement to the corporation's timely filed tax return (taking extensions into account) for the first taxable year for which the election is to be effective. The statement must contain the name, address, and taxpayer identification number of the cooperative housing corporation, identify the election as an election under section 216(b)(3)(B)(ii) of the Code, indicate whether the election is being made with respect to the allocation of real estate taxes or interest (or both), and include a description of the method of allocation being elected. The election applies for the taxable year and succeeding taxable years. It is revocable only with the consent of the Commissioner and will be binding on all tenant-stockholders.

(iii) *Reasonable allocation.* It is reasonable to allocate to each tenant-stockholder a portion of the real estate taxes or interest (or both) that bears the same ratio to the cooperative housing corporation's total interest or real estate taxes as the fair market value of each dwelling unit (including the unit's share of the common areas) bears to the fair market value of all the dwelling units with respect to which stock is outstanding (including stock held by the corporation) at the time of allocation. If real estate taxes are separately assessed on each dwelling unit by the relevant taxing authority, an allocation of real estate taxes to tenant-stockholders based on separate assessments is a reasonable allocation. If one or more of the tenant-stockholders pre-pays any portion of the principal of the indebtedness and gives rise to interest, an allocation of interest to those tenant-stockholders will be a reasonable allocation of interest if the allocation is reduced to reflect the reduction in the debt service attributable to the prepayment. In addition, similar kinds of allocations may also be reasonable, depending on the facts and circumstances.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. The X Corporation is a cooperative housing corporation within the meaning

of section 216. In 1970, it acquires a building containing 40 category A apartments and 25 category B apartments, for \$750,000. The value of each category A apartment is \$12,500, and of each category B apartment is \$10,000. X values each share of stock issued with respect to the category A apartments at \$125, and sells 4,000 shares of its stock, along with the right to occupy the 40 category A apartments, to 40 tenant-stockholders for \$500,000. X also sells 1,000 shares of nonvoting stock to G, a State housing authority qualifying as a governmental unit under paragraph (f) of this section, for \$250,000. The purchase of this stock gives G the right to occupy all the category B apartments. G is deemed to hold the number of shares that it would have held if it had been a tenant-stockholder. G is therefore deemed to own 2,000 shares of stock of X. All stockholders are required to pay a specified part of the corporation's expenses. F, one of the tenant-stockholders, purchased 100 shares of the category A stock for \$12,500 in order to obtain a right to occupy a category A apartment. Since there are 6,000 total shares deemed outstanding, F's proportionate share is 1/60 (100/6,000).

Example 2. The X Corporation is a cooperative housing corporation within the meaning of section 216. In 1960 it acquired a housing development containing 100 detached houses, each house having the same value. X issued one share of stock to each of 100 tenant-stockholders, each share carrying the right to occupy one of the houses. In 1971 X redeemed 40 of its 100 shares. It then sold to G, a municipal housing authority qualifying as a governmental unit under paragraph (f) of this section, 1,000 shares of preferred stock and the right to occupy the 40 houses with respect to which the stock had been redeemed. X sold the preferred stock to G for an amount equal to the cost of redeeming the 40 shares. G also agreed to pay 40 percent of X's expenses. For purposes of determining the total stock which X has outstanding, G is deemed to hold 40 shares of X.

Example 3. The X Corporation is a cooperative housing corporation within the meaning of section 216. In 1987, it acquires for \$1,000,000 a building containing 10 category A apartments, 10 category B apartments, and 10 category C apartments. The value of each category A apartment is \$20,000, of each category B apartment is \$30,000 and of each category C apartment is \$50,000. X issues 1 share of stock to each of the 30 tenant-stockholders, each share carrying the right to occupy one of the apartments. X allocates the real estate taxes and interest to the tenant-stockholders on the basis of the fair market value of their respective apartments. Since the total fair market value of all of the apartments is \$1,000,000, the allocation of taxes and interest to each tenant-stockholder that has the right to occupy a cat-

egory A apartment is 2/100 (\$20,000/\$1,000,000). Similarly, the allocation of taxes and interest to each tenant-stockholder who has a right to occupy a category B apartment is 3/100 (\$30,000/\$1,000,000) and of a category C apartment is 5/100 (\$50,000/\$1,000,000). X may elect in accordance with the rules described in paragraph (d)(2) of this section to treat the amounts so allocated as each tenant-stockholder's proportionate share of real estate taxes and interest.

Example 4. The Y Corporation is a cooperative housing corporation within the meaning of section 216. In 1987, it acquires a housing development containing 5 detached houses for \$1,500,000, incurring an indebtedness of \$1,000,000 for the purchase of the property. Each house is valued at \$300,000, although the shares appurtenant to those houses have been sold to tenant-stockholders for \$100,000. Y issues one share of stock to each of the five tenant-stockholders, each share carrying the right to occupy one of the houses. A, a tenant-stockholder, prepays all of the corporation's indebtedness allocable to A's house. The periodic charges payable to Y by A are reduced commensurately with the reduction in Y's debt service. Because no part of the indebtedness remains outstanding with respect to A's house, A's share of the interest expense is \$0. The other four tenant-stockholders do not prepay their share of the indebtedness. Accordingly, 4/5 of the interest is allocated to each of the tenant-stockholders other than A. Y may elect in accordance with the rules described in paragraph (d)(2) of this section to treat the amounts so allocated as each tenant-stockholder's proportionate share of interest.

Example 5. The Z Corporation is a cooperative housing corporation within the meaning of section 216. In 1987, it acquires a building containing 10 apartments. One of the apartments is occupied by a senior citizen. Under local law, a senior citizen who owns and occupies a residential apartment is entitled to a \$500 reduction in local property taxes assessed upon the apartment. As a result, Z corporation is eligible under local law for a reduction in local property taxes assessed upon the building. Z's real estate tax assessment for the year would have been \$10,000, however, with the senior citizen reduction, the assessment is \$9,500. The proprietary lease provides for a reduced maintenance fee to the senior citizen tenant-stockholder in accordance with the real estate tax reduction. Accordingly, each apartment owner is assessed \$1,000 for local real estate taxes, except the senior citizen tenant-stockholder, who is assessed \$500. Z may elect in accordance with the rules described in paragraph (d)(2) of this section to treat the amounts so allocated as each tenant-stockholder's proportionate share of taxes.

(e) *Cooperative housing corporation.* In order to qualify as a “cooperative housing corporation” under section 216, the requirements of subparagraphs (1) through (4) of this paragraph must be met.

(1) *One class of stock.* The corporation shall have one and only one class of stock outstanding. However, a special classification of preferred stock, in a nominal amount not exceeding \$100, issued to a Federal housing agency or other governmental agency solely for the purpose of creating a security device on the mortgage indebtedness of the corporation, shall be disregarded for purposes of determining whether the corporation has one class of stock outstanding and such agency will not be considered a stockholder for purposes of section 216 and this section. Furthermore, for taxable years beginning after December 31, 1969, a special class of stock issued to a governmental unit, as defined in paragraph (g) of this section, shall also be disregarded for purposes of this paragraph in determining whether the corporation has one class of stock outstanding.

(2) *Right of occupancy.* Each stockholder of the corporation, whether or not the stockholder qualifies as a tenant-stockholder under section 216(b)(2) and paragraph (f) of this section, must be entitled to occupy for dwelling purposes an apartment in a building or a unit in a housing development owned or leased by such corporation. The stockholder is not required to occupy the premises. The right as against the corporation to occupy the premises is sufficient. Such right must be conferred on each stockholder solely by reasons of his or her ownership of stock in the corporation. That is, the stock must entitle the owner thereof either to occupy the premises or to a lease of the premises. The fact that the right to continue to occupy the premises is dependent upon the payment of charges to the corporation in the nature of rentals or assessments is immaterial. For taxable years beginning after December 31, 1986, the fact that, by agreement with the cooperative housing corporation, a person or his nominee may not occupy the house or apartment without the prior approval of such corporation will not be taken into account

for purposes of this paragraph in the following cases.

(i) In any case where a person acquires stock of the cooperative housing corporation by operation of law, by inheritance, or by foreclosure (or by instrument in lieu of foreclosure),

(ii) In any case where a person other than an individual acquires stock in the cooperative housing corporation, and

(iii) In any case where the person from whom the corporation has acquired the apartments or houses (or leaseholds therein) acquires any stock of the cooperative housing corporation from the corporation not later than one year after the date on which the apartments or houses (or leaseholds therein) are transferred to the corporation by such person. For purposes of the preceding sentence, paragraphs (e)(2) (i) and (ii) of this section will not apply to acquisitions of stock by foreclosure by the person from whom the corporation has acquired the apartments or houses (or leaseholds therein).

(3) *Distributions.* None of the stockholders of the corporation may be entitled, either conditionally or unconditionally, except upon a complete or partial liquidation of the corporation, to receive any distribution other than out of earnings and profits of the corporation.

(4) *Gross income.* Eighty percent or more of the gross income of the corporation for the taxable year of the corporation in which the taxes and interest are paid or incurred must be derived from the tenant-stockholders. For purposes of the 80-percent test, in taxable years beginning after December 31, 1969, gross income attributable to any house or apartment which a governmental unit is entitled to occupy, pursuant to a lease or stock ownership, shall be disregarded.

(f) *Tenant-stockholder.* The term *tenant-stockholder* means a person that is a stockholder in a cooperative housing corporation, as defined in section 216(b)(1) and paragraph (e) of this section, and whose stock is fully paid up in an amount at least equal to an amount shown to the satisfaction of the district director as bearing a reasonable relationship to the portion of

the fair market value, as of the date of the original issuance of the stock, of the corporation's equity in the building and the land on which it is situated that is attributable to the apartment or housing unit which such person is entitled to occupy (within the meaning of paragraph (e)(2) of this section). Notwithstanding the preceding sentence, for taxable years beginning before January 1, 1987, tenant-stockholders include only individuals, certain lending institutions, and certain persons from whom the cooperative housing corporation has acquired the apartments or houses (or leaseholds thereon).

(g) *Governmental unit.* For purposes of section 216(b) and this section, the term *governmental unit* means the United States or any of its possessions, a State or any political subdivision thereof, or any agency or instrumentality of the foregoing empowered to acquire shares in a cooperative housing corporation for the purpose of providing housing facilities.

(h) *Examples.* The application of section 216(a) and (b) and this section may be illustrated by the following examples, which refer to apartments but which are equally applicable to housing units:

Example 1. The X Corporation is a cooperative housing corporation within the meaning of section 216. In 1970, at a total cost of \$200,000, it purchased a site and constructed thereon a building with 15 apartments. The fair market value of the land and building was \$200,000 at the time of completion of the building. The building contains five category A apartment units, each of equal value, and 10 category B apartment units. The total value of all of the category A apartment units is \$100,000. The total value of all of the category B apartments is also \$100,000. Upon completion of the building, the X Corporation mortgaged the land and building for \$100,000, and sold its total authorized capital stock for \$100,000. The stock attributable to the category A apartments was purchased by five individuals, each of whom paid \$10,000 for 100 shares, or \$100 a share. Each certificate for 100 shares of such stock provides that the holder thereof is entitled to a lease of a particular apartment in the building for a specified term of years. The stock attributable to the category B apartments was purchased by a governmental unit for \$50,000. Since the shares sold to the tenant-stockholders are valued at \$100 per share, the governmental unit is deemed to hold a total of 500 shares. The certificate of such stock pro-

vides that the governmental unit is entitled to a lease of all of the category B apartments. All leases provide that the lessee shall pay his proportionate part of the corporation's expenses. In 1970 the original owner of 100 shares of stock attributable to the category A apartments and to the lease to apartment No. 1 made a gift of the stock and lease to A, an individual. The taxable year of A and of the X Corporation is the calendar year. The corporation computes its taxable income on an accrual method, while A computes his taxable income on the cash receipts and disbursements method. In 1971, the X Corporation incurred expenses aggregating \$13,800, including \$4,000 for the real estate taxes on the land and building, and \$5,000 for the interest on the mortgage. In 1972, A pays the X Corporation \$1,380, representing his proportionate part of the expenses incurred by the corporation. The entire gross income of the X Corporation for 1971 was derived from the five tenant-stockholders and from the governmental unit. A is entitled under section 216 to a deduction of \$900 in computing his taxable income for 1972. The deduction is computed as follows:

Shares of X Corporation owned by A	100
Shares of X Corporation owned by four other tenant-stockholders	400
Shares of X Corporation deemed owned by governmental unit	500
Total shares of X Corporation outstanding	1,000
A's proportionate share of the stock of X Corporation (100/1,000)	1/10
Expenses incurred by X Corporation:	
Real estate taxes	\$4,000
Interest	5,000
Other	4,800
Total	\$13,800
Amount paid by A	1,380
A's proportionate share of real estate taxes and interest based on his stock ownership (1/10 of \$9,000)	\$900
A's proportionate share of total corporate expenses based on his stock ownership (1/10 of \$13,800)	1,380
Amount of A's payment representing real estate taxes and interest (900/1,380 of \$1,380)	\$900
A's allowable deduction	\$900

Since the stock which A acquired by gift was fully paid up by his donor in an amount equal to the portion of the fair market value, as of the date of the original issuance of the stock, of the corporation's equity in the land and building which is attributable to apartment No. 1, the requirement of section 216 in this regard is satisfied. The fair market value at the time of the gift of the corporation's equity attributable to the apartment is immaterial.

Example 2. The facts are the same as in *Example 1* except that the building constructed by the X Corporation contained, in addition

§ 1.216-2

to the 15 apartments, business space on the ground floor, which the corporation rented at \$2,400 for the calendar year 1971. The corporation deducted the \$2,400 from its expenses in determining the amount of the expenses to be prorated among its tenant-stockholders. The amount paid by A to the corporation in 1972 is \$1,140 instead of \$1,380. More than 80 percent of the gross income of the corporation for 1971 was derived from tenant-stockholders. A is entitled under section 216 to a deduction of \$743.48 in computing his taxable income for 1972. The deduction is computed as follows:

Expenses incurred by X Corporation	\$13,800.00
Less: Rent from business space	2,400.00
Expenses to be prorated among tenant-stockholders	\$11,400.00
Amount paid by A	1,140.00
A's proportionate share of real estate taxes and interest based on his stock ownership (1/10 of \$9,000)	900.00
A's proportionate share of total corporate expenses based on his stock ownership (1/10 of \$13,800)	1,380.00
Amount of A's payment representing real estate taxes and interest (900/1380 of \$1,140)	743.48
A's allowable deduction	743.48

Since the portion of A's payment allocable to real estate taxes and interest is only \$743.48, that amount instead of \$900 is allowable as a deduction in computing A's taxable income for 1972.

Example 3. The facts are the same as in *Example 1* except that the amount paid by A to the X Corporation in 1972 is \$1,000 instead of \$1,380. A is entitled under section 216 to a deduction of \$652.17 in computing his taxable income for 1972. The deduction is computed as follows:

Amount paid by A	\$1,000.00
A's proportionate share of real estate taxes and interest based on his stock ownership (1/10 of \$9,000)	900.00
A's proportionate share of total corporate expenses based on his stock ownership (1/10 of \$13,800)	1,380.00
Amount of A's payment representing real estate taxes and interest (900/1380 of \$1,000)	652.17
A's allowable deduction	652.17

Since the portion of A's payment allocable to real estate taxes and interest is only \$652.17, that amount instead of \$900 is allowable as a deduction in computing A's taxable income for 1972.

Example 4. The facts are the same as in *Example 1* except that X Corporation leases recreational facilities from Y Corporation for use by the tenant-stockholders of X. Under the terms of the lease, X is obligated to pay an annual rental of \$5,000 plus all real estate taxes assessed against the facilities. In 1971 X paid, in addition to the \$13,800 of expenses enumerated in *Example 1*, \$5,000 rent and \$1,000 real estate taxes. In 1972 A pays the X

26 CFR Ch. I (4-1-17 Edition)

Corporation \$2,000, no part of which is refunded to him in 1972. A is entitled under section 216 to a deduction of \$900 in computing his taxable income for 1972. The deduction is computed as follows:

Expenses to be prorated among tenant-stockholders	\$19,800
Amount paid by A	2,000
A's proportionate share of real estate taxes and interest based on his stock ownership (1/10 of \$9,000)	900
A's proportionate share of total corporate expenses based on his stock ownership (1/10 of \$19,800)	1,980
Amount of A's payment representing real estate taxes and interest (900/1,980 of \$1,980)	900
A's allowable deduction	900

The \$1,000 of real estate taxes assessed against the recreational facilities constitutes additional rent and hence is not deductible by A as taxes under section 216. A's allowable deduction is limited to his proportionate share of real estate taxes and interest based on stock ownership and cannot be increased by the payment of an amount in excess of his proportionate share.

[T.D. 7092, 36 FR 4597, Mar. 10, 1971; 36 FR 4985, Mar. 16, 1971, as amended by T.D. 8316, 55 FR 42004, Oct. 17, 1990]

§ 1.216-2 Treatment as property subject to depreciation.

(a) *General rule.* For taxable years beginning after December 31, 1961, stock in a cooperative housing corporation (as defined by section 216(b) (1) and paragraph (c) of § 1.216-1) owned by a tenant-stockholder (as defined by section 216(b) (2) and paragraph (d) of § 1.216-1) who uses the proprietary lease or right of tenancy, which was conferred on him solely by reason of his ownership of such stock, in a trade or business or for the production of income shall be treated as property subject to the allowance for depreciation under section 167(a) in the manner and to the extent prescribed in this section.

(b) *Determination of allowance for depreciation—(1) In general.* Subject to the special rules provided in subparagraphs (2) and (3) of this paragraph and the limitation provided in paragraph (c) of this section, the allowance for depreciation for the taxable year with respect to stock of a tenant-stockholder, subject to the extent provided in this section to an allowance for depreciation, shall be determined:

(i) By computing the amount of depreciation (amortization in the case of a leasehold) which would be allowable

under one of the methods of depreciation prescribed in section 167(b) and the regulations thereunder (in paragraph (a) of § 1.162-11 and § 1.167(a)-4 in the case of a leasehold) in respect of the depreciable (amortizable) real property owned by the cooperative housing corporation in which such tenant-stockholder has a proprietary lease or right of tenancy,

(ii) By reducing the amount of depreciation (amortization) so computed in the same ratio as the rentable space in such property which is not subject to a proprietary lease or right of tenancy by reason of stock ownership but which is held for rental purposes bears to the total rentable space in such property, and

(iii) By computing such tenant-stockholder's proportionate share of such annual depreciation (amortization), so reduced.

As used in this section, the terms *depreciation* and *depreciable real property* include amortization and amortizable leasehold of real property. As used in this section, the tenant-stockholder's proportionate share is that proportion which stock of the cooperative housing corporation owned by the tenant-stockholder is of the total outstanding stock of the corporation, including any stock held by the corporation. In order to determine whether a tenant-stockholder may use one of the methods of depreciation prescribed in section 167(b) (2), (3), or (4) for purposes of subdivision (i) of this subparagraph, the limitations provided in section 167(c) on the use of such methods of depreciation shall be applied with respect to the depreciable real property owned by the cooperative housing corporation in which the tenant-stockholder has a proprietary lease or right of tenancy, rather than with respect to the stock in the cooperative housing corporation owned by the tenant-stockholder or with respect to the proprietary lease or right of tenancy conferred on the tenant-stockholder by reason of his ownership of such stock. The allowance for depreciation determined under this subparagraph shall be properly adjusted where only a portion of the property occupied under a proprietary lease or right of tenancy is used in a

trade or business or for the production of income.

(2) *Stock acquired subsequent to first offering.* Except as provided in subparagraph (3), in the case of a tenant-stockholder who purchases stock other than as part of the first offering of stock by the corporation, the basis of the depreciable real property for purposes of the computation required by subparagraph (1)(i) of this paragraph shall be the amount obtained by:

(i) Multiplying the taxpayer's cost per share by the total number of outstanding shares of stock of the corporation, including any shares held by the corporation,

(ii) Adding thereto the mortgage indebtedness to which such depreciable real property is subject on the date of purchase of such stock, and

(iii) Subtracting from the sum so obtained the portion thereof not properly allocable as of the date such stock was purchased to the depreciable real property owned by the cooperative housing corporation in which such tenant-stockholder has a proprietary lease or right of tenancy.

In order to prevent an overstatement or understatement of the basis of the depreciable real property for purposes of the computation required by subparagraph (1)(i) of this paragraph, appropriate adjustment for purposes of the computations described in subdivisions (i) and (ii) of this subparagraph shall be made in respect of prepayments and delinquencies on account of the corporation's mortgage indebtedness. Thus, for purposes of subdivision (i) of this subparagraph, the taxpayer's cost per share shall be reduced by an amount determined by dividing the total mortgage indebtedness prepayments in respect of the shares purchased by the taxpayer by the number of such shares. For purposes of subdivision (ii) of this subparagraph, the mortgage indebtedness shall be increased by the sum of all prepayments applied in reduction of the mortgage indebtedness and shall be decreased by any amount due under the terms of the mortgage and unpaid.

(3) *Conversion subsequent to date of acquisition.* In the case of a tenant-stockholder whose proprietary lease or right of tenancy is converted, in whole or in

part, to use in a trade or business or for the production of income on a date subsequent to the date on which he acquired the stock conferring on him such lease or right of tenancy, the basis of the depreciable real property for purposes of the computation required by subparagraph (1)(i) of this paragraph shall be the fair market value of such depreciable real property on the date of the conversion if the fair market value is less than the adjusted basis of such property in the hands of the cooperative housing corporation provided in section 1011 without taking into account any adjustment for depreciation required by section 1016(a)(2). Such fair market value shall be deemed to be equal to the adjusted basis of such property, taking into account adjustments required by section 1016(a)(2) computed as if the corporation had used the straight line method of depreciation, in the absence of evidence establishing that the fair market value so attributed to the property is unrealistic. In the case of a tenant-stockholder who purchases stock other than as part of the first offering of stock of the corporation, and at a later date converts his proprietary lease to use for business or production of income:

(i) The adjusted basis of the cooperative housing corporation's depreciable real property without taking into account any adjustment for depreciation shall be the amount determined in accordance with subdivisions (i), (ii), and (iii) of subparagraph (2) of this paragraph, and

(ii) The fair market value shall be deemed to be equal to such adjusted basis reduced by the amount of depreciation, computed under the straight line method, which would have been allowable in respect of depreciable real property having a cost or other basis equal to the amount representing such adjusted basis in the absence of evidence establishing that the fair market value so attributed to the property is unrealistic.

(c) *Limitation.* If the allowance for depreciation for the taxable year determined in accordance with the provisions of paragraph (b) of this section exceeds the adjusted basis (provided in section 1011) of the stock described in paragraph (a) of this section allocable

to the tenant-stockholder's proprietary lease or right of tenancy used in a trade or business or for the production of income, such excess is not allowable as a deduction. For taxable years beginning after December 31, 1986, such excess, subject to the provisions of this paragraph (c), is allowable as a deduction for depreciation in the succeeding taxable year. To determine the portion of the adjusted basis of such stock which is allocable to such proprietary lease or right of tenancy, the adjusted basis is reduced by taking into account the same factors as are taken into account under paragraph (b)(1) of this section in determining the allowance for depreciation.

(d) *Examples.* The provisions of section 216(c) and this section may be illustrated by the following examples:

Example 1. The Y corporation, a cooperative housing corporation within the meaning of section 216, in 1961 purchased a site and constructed thereon a building with 10 apartments at a total cost of \$250,000 (\$200,000 being allocable to the building and \$50,000 being allocable to the land). Such building was completed on January 1, 1962, and at that time had an estimated useful life of 50 years, with an estimated salvage value of \$20,000. Each apartment is of equal value. Upon completion of the building, Y corporation mortgaged the land and building for \$150,000 and sold its total authorized capital stock, consisting of 1000 shares of common stock, for \$100,000. The stock was purchased by 10 individuals each of whom paid \$10,000 for 100 shares. Each certificate for 100 shares provides that the holder thereof is entitled to a proprietary lease of a particular apartment in the building. Each lease provides that the lessee shall pay his proportionate share of the corporation's expenses including an amount on account of the curtailment of Y's mortgage indebtedness. B, a calendar year taxpayer, is the original owner of 100 shares of stock in Y corporation. On January 1, 1962, B subleases his apartment for a term of 5 years. B's stock in Y corporation is treated as property subject to the allowance for depreciation under section 167(a), and B, who uses the straight line method of depreciation for purposes of the computation prescribed by paragraph (b)(1)(i) of this section, computes the allowance for depreciation for the taxable year 1962 with respect to such stock as follows:

Y's basis in the building	\$200,000
Less: Estimated salvage value	\$20,000
Y's basis for depreciation	\$180,000

Internal Revenue Service, Treasury

§ 1.217-1

Annual straight line depreciation on Y's building (1/50 of \$180,000)	\$3,600
Proportion of outstanding shares of stock of Y corporation (1,000) owned by B (100)	1/10
B's proportionate share of annual depreciation (1/10 of \$3,600)	\$360
Depreciation allowance for 1962 with respect to B's stock (if the limitation in paragraph (c) of this section is not applicable)	\$360

Example 2. The facts are the same as in *Example 1* except that the building constructed by Y corporation contained, in addition to the 10 apartments, space on the ground floor for 2 stores which were rented to persons who do not have a proprietary lease of such space by reason of stock ownership. Y corporation's building has a total area of 16,000 square feet, the 10 apartments in such building have an area of 10,000 square feet, and the 2 stores on the ground floor have an area of 2,000 square feet. Thus, the total rentable space in Y corporation's building is 12,000 square feet. B, who uses the straight line method of depreciation for purposes of the computation prescribed by paragraph (b)(1)(i) of this section, computes the allowance for depreciation for the taxable year 1962 with respect to his stock in Y corporation as follows:

Y's basis in the building	\$200,000
Less: Estimated salvage value	20,000
Y's basis for depreciation	180,000
Annual straight line depreciation on Y's building (1/50 of \$180,000)	3,600
Less: Amount representing rentable space not subject to proprietary lease but held for rental purposes over total rentable space $2,000 \div 12,000$ (of \$3,600)	600
Annual depreciation, as reduced	3,000
B's proportionate share of annual depreciation (1/10 of \$3,000)	300
Depreciation allowance for 1962 with respect to B's stock (if the limitation in paragraph (c) of this section is not applicable)	300

Example 3. The facts are the same as in *Example 1* except that B occupies his apartment from January 1, 1962, until December 31, 1966, and that on January 1, 1967, B sells his stock to C, an individual, for \$15,000. C thereby obtains a proprietary lease from Y corporation with the same rights and obligations as B's lease provided. Y corporation's records disclose that its outstanding mortgage indebtedness is \$135,000 on January 1, 1967. C, a physician, uses the entire apartment solely as an office. C's stock in Y corporation is treated as property subject to the allowance for depreciation under section 167(a), and C, who uses the straight line method of depreciation for purposes of the computation prescribed by paragraph (b)(1)(i) of this section, computes the allowance for depreciation for the taxable year 1967 with respect to such stock as follows:

Price paid for each share of stock in Y corporation purchased by C on 1-1-67 ($\$15,000 \div 100$)	\$150
Per share price paid by C multiplied by total shares of stock in Y corporation outstanding on 1-1-67 ($\$150 \times 1,000$)	150,000
Y's mortgage indebtedness outstanding on 1-1-67	135,000
	285,000
Less: Amount attributable to land (assumed to be $\frac{1}{5}$ of \$285,000)	57,000
	228,000
Less: Estimated salvage value	20,000
Basis of Y's building for purposes of computing C's depreciation	208,000
Annual straight line depreciation (1/45 of \$208,000)	4,622.22
C's proportionate share of annual depreciation (1/10 of \$4,622.22)	462.22
Depreciation allowance for 1967 with respect to C's stock (if the limitation in paragraph (c) of this section is not applicable)	462.22

[T.D. 6725, 29 FR 5665, Apr. 29, 1964, as amended by T.D. 8316, 55 FR 42006, Oct. 17, 1990]

§ 1.217-1 Deduction for moving expenses paid or incurred in taxable years beginning before January 1, 1970.

(a) *Allowance of deduction*—(1) *In general.* Section 217(a) allows a deduction from gross income for moving expenses paid or incurred by the taxpayer during the taxable year in connection with the commencement of work as an employee at a new principal place of work. Except as provided in section 217, no deduction is allowable for any expenses incurred by the taxpayer in connection with moving himself, the members of his family or household, or household goods and personal effects. The deduction allowable under this section is only for expenses incurred after December 31, 1963, in taxable years ending after such date and beginning before January 1, 1970, except in cases where a taxpayer makes an election under paragraph (g) of § 1.217-2 with respect to moving expenses paid or incurred before January 1, 1971, in connection with the commencement of work by such taxpayer as an employee at a new principal place of work of which such taxpayer has been notified by his employer on or before December 19, 1969. To qualify for the deduction the expenses must meet the definition of the term "moving expenses" provided in section 217(b); the taxpayer

must meet the conditions set forth in section 217(c); and, if the taxpayer receives a reimbursement or other expense allowance for an item of expense, the deduction for the portion of the expense reimbursed is allowable only to the extent that such reimbursement or other expense allowance is included in his gross income as provided in section 217(e). The deduction is allowable only to a taxpayer who pays or incurs moving expenses in connection with his commencement of work as an employee and is not allowable to a taxpayer who pays or incurs such expenses in connection with his commencement of work as a self-employed individual. The term *employee* as used in this section has the same meaning as in §31.3401(c)-1 of this chapter (Employment Tax Regulations). All references to section 217 prior to the effective date of section 231 of the Tax Reform Act of 1969 (83 Stat. 577).

(2) *Commencement of work.* To be deductible, the moving expenses must be paid or incurred by the taxpayer in connection with the commencement of work by him at a new principal place of work (see paragraph (c)(3) of this section for a discussion of the term *principal place of work*). While it is not necessary that the taxpayer have a contract or commitment of employment prior to his moving to a new location, the deduction is not allowable unless employment actually does occur. The term *commencement* includes (i) the beginning of work by a taxpayer for the first time or after a substantial period of unemployment or part-time employment, (ii) the beginning of work by a taxpayer for a different employer, or (iii) the beginning of work by a taxpayer for the same employer at a new location. To qualify as being in connection with the commencement of work, the move for which moving expenses are incurred must bear a reasonable proximity both in time and place to such commencement. In general, moving expenses incurred within one year of the date of the commencement of work are considered to be reasonably proximate to such commencement. Moving expenses incurred in relocating the taxpayer's residence to a location which is farther from his new principal

place of work than was his former residence are not generally to be considered as incurred in connection with such commencement of work. For example, if A is transferred by his employer from place X to place Y and A's old residence while he worked at place X is 25 miles from Y, A will not generally be entitled to deduct moving expenses in moving to a new residence 40 miles from Y even though the minimum distance limitation contained in section 217(c)(1) is met. If, however, A is required, as a condition of his employment, to reside at a particular place, or if such residency will result in an actual decrease in his commuting time or expense, the expenses of the move may be considered as incurred in connection with his commencement of work at place Y.

(b) *Definition of moving expenses*—(1) *In general.* Section 217(b) defines the term *moving expenses* to mean only the reasonable expenses (i) of moving household goods and personal effects from the taxpayer's former residence to his new residence, and (ii) of traveling (including meals and lodging) from the taxpayer's former residence to his new place of residence. The test of deductibility thus is whether the expenses are reasonable and are incurred for the items set forth in (i) and (ii) above.

(2) *Reasonable expenses.* (i) The term *moving expenses* includes only those expenses which are reasonable under the circumstances of the particular move. Generally, expenses are reasonable only if they are paid or incurred for movement by the shortest and most direct route available from the taxpayer's former residence to his new residence by the conventional mode or modes of transportation actually used and in the shortest period of time commonly required to travel the distance involved by such mode. Expenses paid or incurred in excess of a reasonable amount are not deductible. Thus, if moving or travel arrangements are made to provide a circuitous route for scenic, stopover, or other similar reasons, the additional expenses resulting therefrom are not deductible since they do not meet the test of reasonableness.

(ii) The application of this subparagraph may be illustrated by the following example:

Example. A, an employee of the M Company works and maintains his principal residence in Boston, Massachusetts. Upon receiving orders from his employer that he is to be transferred to M's Los Angeles, California office, A motors to Los Angeles with his family with stopovers at various cities between Boston and Los Angeles to visit friends and relatives. In addition, A detours into Mexico for sight-seeing. Because of the stopovers and tour into Mexico, A's travel time and distance are increased over what they would have been had he proceeded directly to Los Angeles. To the extent that A's route of travel between Boston and Los Angeles is in a generally southwesterly direction it may be said that he is traveling by the shortest and most direct route available by motor vehicle. Since A's excursion into Mexico is away from the usual Boston-Los Angeles route, the portion of the expenses paid or incurred attributable to such excursion is not deductible. Likewise, that portion of the expenses attributable to A's delays en route not necessitated by reasons of rest or repair of his vehicle are not deductible.

(3) *Expenses of moving household goods and personal effects.* Expenses of moving household goods and personal effects include expenses of transporting such goods and effects owned by the taxpayer or a member of his household from the taxpayer's former residence to his new residence, and expenses of packing, crating and in-transit storage and insurance for such goods and effects. Expenses paid or incurred in moving household goods and personal effects to a taxpayer's new residence from a place other than his former residence are allowable, but only to the extent that such expenses do not exceed the amount which would be allowable had such goods and effects been moved from the taxpayer's former residence. Examples of items not deductible as moving expenses include, but are not limited to, storage charges (other than in-transit), costs incurred in the acquisition of property, costs incurred and losses sustained in the disposition of property, penalties for breaking leases, mortgage penalties, expenses of refitting rugs or draperies, expenses of connecting or disconnecting utilities, losses sustained on the disposal of memberships in clubs, tuition fees, and similar items.

(4) *Expenses of traveling.* Expenses of traveling include the cost of transportation and of meals and lodging en route (including the date of arrival) of both the taxpayer and members of his household, who have both the taxpayer's former residence and the taxpayer's new residence as their principal place of abode, from the taxpayer's former residence to his new place of residence. Expenses of traveling do not include, for example: living or other expenses of the taxpayer and members of his household following their date of arrival at the new place of residence and while they are waiting to enter the new residence or waiting for their household goods to arrive; expenses in connection with house or apartment hunting; living expenses preceding the date of departure for the new place of residence; expenses of trips for purposes of selling property; expenses of trips to the former residence by the taxpayer pending the move by his family to the new place of residence; or any allowance for depreciation. The deduction for traveling expenses is allowable for only one trip made by the taxpayer and members of his household; however, it is not necessary that the taxpayer and all members of his household travel together or at the same time.

(5) *Residence.* The term *former residence* refers to the taxpayer's principal residence before his departure for his new principal place of work. The term *new residence* refers to the taxpayer's principal residence within the general location of his new principal place of work. Thus, neither term includes other residences owned or maintained by the taxpayer or members of his family or seasonal residences such as a summer beach cottage. Whether or not property is used by the taxpayer as his residence, and whether or not property is used by the taxpayer as his principal residence (in the case of a taxpayer using more than one property as a residence), depends upon all the facts and circumstances in each case. Property used by the taxpayer as his principal residence may include a houseboat, a house trailer, or similar dwelling. The term *new place of residence* generally includes the area within which the taxpayer might reasonably be expected to

commute to his new principal place of work. The application of the terms *former residence*, *new residence* and *new place of residence* as defined in this paragraph and as used in section 217(b)(1) may be illustrated in the following manner: Expenses of moving household goods and personal effects are moving expenses when paid or incurred for transporting such items from the taxpayer's former residence to the taxpayer's new residence (such as from one street address to another). Expenses of traveling, on the other hand, are limited to those incurred between the taxpayer's former residence (a geographic point) and his new place of residence (a commuting area) up to and including the date of arrival. The date of arrival is the day the taxpayer secures lodging within that commuting area, even if on a temporary basis.

(6) *Individuals other than taxpayer.* In addition to the expenses set forth in section 217(b)(1) which are attributable to the taxpayer alone, the same type of expenses attributable to certain individuals other than the taxpayer, if paid or incurred by the taxpayer, are deductible. Those other individuals must (i) be members of the taxpayer's household, and (ii) have both the taxpayer's former residence and his new residence as their principal place of abode. A member of the taxpayer's household may not be, for example, a tenant residing in the taxpayer's residence, nor an individual such as a servant, governess, chauffeur, nurse, valet, or personal attendant.

(c) *Conditions for allowance—(1) In general.* Section 217(c) provides two conditions which must be satisfied in order for a deduction of moving expenses to be allowed under section 217(a). The first is a minimum distance requirement prescribed by section 217(c)(1), and the second is a minimum period of employment requirement prescribed by section 217(c)(2).

(2) *Minimum distance.* For purposes of applying the minimum distance requirement of section 217(c)(1) all taxpayers are divided into one or the other of the following categories: taxpayers having a former principal place of work, and taxpayers not having a former principal place of work. In this latter category are individuals who are

seeking full-time employment for the first time (for example, recent high school or college graduates), or individuals who are re-entering the labor force after a substantial period of unemployment or part-time employment.

(i) In the case of a taxpayer having a former principal place of work, section 217(c)(1)(A) provides that no deduction is allowable unless the distance between his new principal place of work and his former residence exceeds by at least 20 miles the distance between his former principal place of work and such former residence.

(ii) In the case of a taxpayer not having a former principal place of work, section 217(c)(1)(B) provides that no deduction is allowable unless the distance between his new principal place of work and his former residence is at least 20 miles.

(iii) For purposes of measuring distances under section 217(c)(1) all computations are to be made on the basis of a straight-line measurement.

(3) *Principal place of work.* (i) A taxpayer's "principal place of work" usually is the place at which he spends most of his working time. Generally, where a taxpayer performs services as an employee, his principal place of work is his employer's plant, office, shop, store or other property. However, a taxpayer may have a principal place of work even if there is no one place at which he spends a substantial portion of his working time. In such case, the taxpayer's principal place of work is the place at which his business activities are centered—for example, because he reports there for work, or is otherwise required either by his employer or the nature of his employment to "base" his employment there. Thus, while a member of a railroad crew, for example, may spend most of his working time aboard a train, his principal place of work is his home terminal, station, or other such central point where he reports in, checks out, or receives instructions. In those cases where the taxpayer is employed by a number of employers on a relatively short-term basis, and secures employment by means of a union hall system (such as a construction or building

trades worker), the taxpayer's principal place of work would be the union hall.

(ii) In cases where a taxpayer has more than one employment (i.e., more than one employer at any particular time) his principal place of work is usually determined with reference to his principal employment. The location of a taxpayer's principal place of work is necessarily a question of fact which must be determined on the basis of the particular circumstances in each case. The more important factors to be considered in making a factual determination regarding the location of a taxpayer's principal place of work are (a) the total time ordinarily spent by the taxpayer at each place, (b) the degree of the taxpayer's business activity at each place, and (c) the relative significance of the financial return to the taxpayer from each place.

(iii) In general, a place of work is not considered to be the taxpayer's principal place of work for purposes of this section if the taxpayer maintains an inconsistent position, for example, by claiming an allowable deduction under section 162 (relating to trade or business expenses) for traveling expenses "while away from home" with respect to expenses incurred while he is not away from such place of work and after he has incurred moving expenses for which a deduction is claimed under this section.

(4) *Minimum period of employment.* Under section 217(c)(2), no deduction is allowed unless, during the 12-month period immediately following the taxpayer's arrival in the general location of his new principal place of work, he is a full-time employee, in such general location, during at least 39 weeks.

(i) The 12-month period and the 39-week period set forth in section 217(c)(2) are measured from the date of the taxpayer's arrival in the general location of his new principal place of work. Generally, the taxpayer's date of arrival is the date of the termination of the last trip preceding the taxpayer's commencement of work on a regular basis, regardless of the date on which the taxpayer's family or household goods and effects arrive.

(ii) It is not necessary that the taxpayer remain in the employ of the

same employer for 39 weeks, but only that he be employed in the same general location of his new principal place of work during such period. The *general location* of the new principal place of work refers to the area within which an individual might reasonably be expected to commute to such place of work, and will usually be the same area as is known as the *new place of residence*; see paragraph (b)(5) of this section.

(iii) Only a week during which the taxpayer is a full-time employee qualifies as a week of work for purposes of the 39-week requirement of section 217(c)(2). Whether an employee is a full-time employee during any particular week depends upon the customary practices of the occupation in the geographic area in which the taxpayer works. In the case of occupations where employment is on a seasonal basis, weeks occurring in the off-season when no work is required or available (as the case may be) may be counted as weeks of full-time employment only if the employee's contract or agreement of employment covers the off-season period and the off-season period is less than 6 months. Thus, a school teacher whose employment contract covers a 12-month period and who teaches on a full-time basis for more than 6 months in fulfillment of such contract is considered a full-time employee during the entire 12-month period. A taxpayer will not be deemed as other than a full-time employee during any week merely because of periods of involuntary temporary absence from work, such as those due to illness, strikes, shutouts, layoffs, natural disasters, etc.

(iv) In the case of taxpayers filing a joint return, either spouse may satisfy this 39-week requirement. However, weeks worked by one spouse may not be added to weeks worked by the other spouse in order to satisfy such requirement.

(v) The application of this subparagraph may be illustrated by the following examples:

Example 1. A is an electrician residing in New York City. Having heard of the possibility of better employment prospects in Denver, Colorado, he moves himself, his family and his household goods and personal effects, at his own expense, to Denver where he

secures employment with the M Aircraft Corporation. After working full-time for 30 weeks his job is terminated, and he subsequently moves to and secures employment in Los Angeles, California, which employment lasts for more than 39 weeks. Since A was not employed in the general location of his new principal place of employment while in Denver for at least 39 weeks, no deduction is allowable for moving expenses paid or incurred between New York City and Denver. A will be allowed to deduct only those moving expenses attributable to his move from Denver to Los Angeles, assuming all other conditions of section 217 are met.

Example 2. Assume the same facts as in *Example 1*, except that B, A's wife, secures employment in Denver at the same time as A, and that she continues to work in Denver for at least 9 weeks after A's departure for Los Angeles. Since she has met the 39-week requirement in Denver, and assuming all other requirements of section 217 are met, the moving expenses paid by A attributable to the move from New York City to Denver will be allowed as a deduction, provided A and B filed a joint return.

Example 3. Assume the same facts as in *Example 1*, except that B, A's wife, secures employment in Denver on the same day that A departs for Los Angeles, and continues to work in Denver for 9 weeks thereafter. Since neither A (who has worked 30 weeks) nor B (who has worked 9 weeks) has independently satisfied the 39-week requirement, no deduction for moving expenses attributable to the move from New York City to Denver is allowable.

(d) *Rules for application of section 217(c)(2)—(1) Inapplicability of 39-week test to reimbursed expenses.* (i) Paragraph (1) of section 217(d) provides that the 39-week employment condition of section 217(c)(2) does not apply to any moving expense item to the extent that the taxpayer receives reimbursement or other allowance from his employer for such item. A reimbursement or other allowance to an employee for expenses of moving, in the absence of a specific allocation by the employer, is allocated first to items deductible under section 217(a) and then, if a balance remains, to items not so deductible.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example 1. A, a recent college graduate, with his residence in Washington, DC, is hired by the M Corporation in San Francisco, California. Under the terms of the employment contract, M agrees to reimburse A

for three-fifths of his moving expenses from Washington to San Francisco. A moves to San Francisco, and pays \$1,000 for expenses incurred, for which he is reimbursed \$600 by M. After working for M for a period of 3 months, A becomes dissatisfied with the job and returns to Washington to continue his education. Since he has failed to satisfy the 39-week requirement of section 217(c)(2) the expenses totaling \$400 for which A has received no reimbursement are not deductible. Under the special rule of section 217(d)(1), however, the deduction for the \$600 reimbursed moving expenses is not disallowed by reason of section 217(c)(2).

Example 2. B, a self-employed accountant, who works and resides in Columbus, Ohio, is hired by the N Company in St. Petersburg, Florida. Pursuant to its policy with respect to newly hired employees, N agrees to reimburse B to the extent of \$1,000 of the expenses incurred by him in connection with his move to St. Petersburg, allocating \$700 for the items specified in section 217(b)(1), and \$300 for "temporary living expenses." B moves to St. Petersburg, and incurs \$800 of "moving expenses" and \$300 of "temporary living expenses" in St. Petersburg. B receives reimbursement of \$1,000 from N, which amount is included in his gross income. Assuming B fails to satisfy the 39-week test of section 217(c)(2), he will nevertheless be allowed to deduct \$700 as a moving expense. On the other hand, had N made no allocation between deductible and non-deductible items, B would have been allowed to deduct \$800 since, in the absence of a specific allocation of the reimbursement by N, it is presumed that the reimbursement was for items specified in section 217(b)(1) to the extent thereof.

(2) *Election of deduction before 39-week test is satisfied.* (i) Paragraph (2) of section 217(d) provides a special rule which applies in those cases where a taxpayer paid or incurred, in a particular taxable year, moving expenses which would be deductible in that taxable year except for the fact that the 39-week employment condition of section 217(c)(2) has not been satisfied before the time prescribed by law (including extensions thereof) for filing the return for such taxable year. The rule provides that where a taxpayer has paid or incurred moving expenses and as of the date prescribed by section 6072 for filing his return for such taxable year, including extensions thereof as may be allowed under section 6081, there remains unexpired a sufficient portion of the 12-month period so that it is still possible for the taxpayer to satisfy the

39-week requirement, then the taxpayer may elect to claim a deduction for such moving expenses on the return for such taxable year. The election shall be exercised by taking the deduction on the return filed within the time prescribed by section 6072 (including extensions as may be allowed under section 6081). It is not necessary that the taxpayer wait until the date prescribed by law for filing his return in order to make the election. He may make the election on an early return based upon the facts known on the date such return is filed. However, an election made on an early return will become invalid if, as of the date prescribed by law for filing the return, it is not possible for the taxpayer to satisfy the 39-week requirement.

(ii) In the event that a taxpayer does not elect to claim a deduction for moving expenses on the return for the taxable year in which such expenses were paid or incurred in accordance with (i) of this subparagraph, and the 39-week employment condition of section 217(c)(2) (as well as all other requirements of section 217) is subsequently satisfied, then the taxpayer may file an amended return for the taxable year in which such moving expenses were paid or incurred on which he may claim a deduction under section 217. The taxpayer may, in lieu of filing an amended return, file a claim for refund based upon the deduction allowable under section 217.

(iii) The application of this subparagraph may be illustrated by the following examples:

Example 1. A is transferred by his employer, M, from Boston, Massachusetts, to Cleveland, Ohio, and begins working there on November 1, 1964, followed by his family and household goods and personal effects on November 15, 1964. Moving expenses are paid or incurred by A in 1964 in connection with this move. On April 15, 1965, when A files his income tax return for the year 1964, A has been a full-time employee in Cleveland for approximately 24 weeks. Notwithstanding the fact that as of April 15, 1965, A has not satisfied the 39-week employment condition of section 217(c)(2) he may nevertheless elect to claim his 1964 moving expenses on his 1964 income tax return since there is still sufficient time remaining before November 1, 1965, within which to satisfy the 39-week requirement.

Example 2. Assume the facts are the same as in *Example 1*, except that as of April 15, 1965, A has left the employ of M, and is in the process of seeking further employment in Cleveland. Since, under these conditions, A may be unsure whether or not he will be able to satisfy the 39-week requirement by November 1, 1965, he may not wish to avail himself of the election provided by section 217(d)(2). In such event, A may wait until he has actually satisfied the 39-week requirement, at which time he may file an amended return claiming as a deduction the moving expenses paid or incurred in 1964. A may, in lieu of filing an amended return, file a claim for refund based upon a deduction for such expenses. Should A fail to satisfy the 39-week requirement on or before November 1, 1965, no deduction is allowable for moving expenses incurred in 1964.

(3) *Recapture of deduction where 39-week test is not met.* Paragraph (3) of section 217(d) provides a special rule which applies in cases where a taxpayer has deducted moving expenses under the election provided in section 217(d)(2) prior to his satisfying the 39-week employment condition of section 217(c)(2), and the 39-week test is not satisfied during the taxable year immediately following the taxable year in which the expenses were deducted. In such cases an amount equal to the expenses which were deducted must be included in the taxpayer's gross income for the taxable year immediately following the taxable year in which the expenses were deducted. In the event the taxpayer has deducted moving expenses under the election provided in section 217(d)(2) for the taxable year, and subsequently files an amended return for such year on which he eliminates such deduction, such expenses will not be deemed to have been deducted for purposes of the recapture rule of the preceding sentence.

(e) *Disallowance of deduction with respect to reimbursements not included in gross income.* Section 217(e) provides that no deduction shall be allowed under section 217 for any item to the extent that the taxpayer receives reimbursement or other expense allowance for such item unless the amount of such reimbursement or other expense allowance is included in his gross income. A reimbursement or other allowance to an employee for expenses of moving, in the absence of a specific allocation by the employer, is allocated

first to items deductible under section 217(a) and then, if a balance remains, to items not so deductible. For purposes of this section, moving services furnished in-kind, directly or indirectly, by a taxpayer's employer to the taxpayer or members of his household are considered as being a reimbursement or other allowance received by the taxpayer for moving expenses. If a taxpayer pays or incurs moving expenses and either prior or subsequent thereto receives reimbursement or other expense allowance for such item, no deduction is allowed for such moving expenses unless the amount of the reimbursement or other expense allowance is included in his gross income in the year in which such reimbursement or other expense allowance is received. In those cases where the reimbursement or other expense allowance is received by a taxpayer for an item of moving expense subsequent to his having claimed a deduction for such item, and such reimbursement or other expense allowance is properly excluded from gross income in the year in which received, the taxpayer must file an amended return for the taxable year in which the moving expenses were deducted and decrease such deduction by the amount of the reimbursement or other expense allowance not included in gross income. This does not mean, however, that a taxpayer has an option to include or not include in his gross income an amount received as reimbursement or other expense allowance in connection with his move as an employee. This question remains one which must be resolved under section 61(a) (relating to the definition of gross income).

[T.D. 6796, 30 FR 1038, Feb. 2, 1965, as amended by T.D. 7195, 37 FR 13535, July 11, 1972]

§ 1.217-2 Deduction for moving expenses paid or incurred in taxable years beginning after December 31, 1969.

(a) *Allowance of deduction*—(1) *In general.* Section 217(a) allows a deduction from gross income for moving expenses paid or incurred by the taxpayer during the taxable year in connection with his commencement of work as an employee or as a self-employed individual at a new principal place of work. For purposes of this section, amounts are

considered as being paid or incurred by an individual whether goods or services are furnished to the taxpayer directly (by an employer, a client, a customer, or similar person) or indirectly (paid to a third party on behalf of the taxpayer by an employer, a client, a customer, or similar person). A cash basis taxpayer will treat moving expenses as being paid for purposes of section 217 and this section in the year in which the taxpayer is considered to have received such payment under section 82 and § 1.82-1. No deduction is allowable under section 162 for any expenses incurred by the taxpayer in connection with moving from one residence to another residence unless such expenses are deductible under section 162 without regard to such change in residence. To qualify for the deduction under section 217 the expenses must meet the definition of the term *moving expenses* provided in section 217(b) and the taxpayer must meet the conditions set forth in section 217(c). The term *employee* as used in this section has the same meaning as in § 31.3401(c)-1 of this chapter (Employment Tax Regulations). The term *self-employed individual* as used in this section is defined in paragraph (f)(1) of this section.

(2) *Expenses paid in a taxable year other than the taxable year in which reimbursement representing such expenses is received.* In general, moving expenses are deductible in the year paid or incurred. If a taxpayer who uses the cash receipts and disbursements method of accounting receives reimbursement for a moving expense in a taxable year other than the taxable year the taxpayer pays such expense, he may elect to deduct such expense in the taxable year that he receives such reimbursement, rather than the taxable year when he paid such expense in any case where:

- (i) The expense is paid in a taxable year prior to the taxable year in which the reimbursement is received, or
- (ii) The expense is paid in the taxable year immediately following the taxable year in which the reimbursement is received, provided that such expense is paid on or before the due date prescribed for filing the return (determined with regard to any extension of time for such filing) for the taxable

year in which the reimbursement is received.

An election to deduct moving expenses in the taxable year that the reimbursement is received shall be made by claiming the deduction on the return, amended return, or claim for refund for the taxable year in which the reimbursement is received.

(3) *Commencement of work.* (i) To be deductible the moving expenses must be paid or incurred by the taxpayer in connection with his commencement of work at a new principal place of work (see paragraph (c)(3) of this section for a discussion of the term *principal place of work*). Except for those expenses described in section 217(b)(1) (C) and (D) it is not necessary for the taxpayer to have made arrangements to work prior to his moving to a new location; however, a deduction is not allowable unless employment or self-employment actually does occur. The term *commencement* includes (a) the beginning of work by a taxpayer as an employee or as a self-employed individual for the first time or after a substantial period of unemployment or part-time employment, (b) the beginning of work by a taxpayer for a different employer or in the case of a self-employed individual in a new trade or business, or (c) the beginning of work by a taxpayer for the same employer or in the case of a self-employed individual in the same trade or business at a new location. To qualify as being in connection with the commencement of work, the move must bear a reasonable proximity both in time and place to such commencement at the new principal place of work. In general, moving expenses incurred within 1 year of the date of the commencement of work are considered to be reasonably proximate in time to such commencement. Moving expenses incurred after the 1-year period may be considered reasonably proximate in time if it can be shown that circumstances existed which prevented the taxpayer from incurring the expenses of moving within the 1-year period allowed. Whether circumstances existed which prevented the taxpayer from incurring the expenses of moving within the period allowed is dependent upon the facts and circumstances of each case. The length of the delay and

the fact that the taxpayer may have incurred part of the expenses of the move within the 1-year period allowed shall be taken into account in determining whether expenses incurred after such period are allowable. In general, a move is not considered to be reasonably proximate in place to the commencement of work at the new principal place of work where the distance between the taxpayer's new residence and his new principal place of work exceeds the distance between his former residence and his new principal place of work. A move to a new residence which does not satisfy this test may, however, be considered reasonably proximate in place to the commencement of work if the taxpayer can demonstrate, for example, that he is required to live at such residence as a condition of employment or that living at such residence will result in an actual decrease in commuting time or expense. For example, assume that in 1977 A is transferred by his employer to a new principal place of work and the distance between his former residence and his new principal place of work is 35 miles greater than was the distance between his former residence and his former principal place of work. However, the distance between his new residence and his new principal place of work is 10 miles greater than was the distance between his former residence and his new principal place of work. Although the minimum distance requirement of section 217(c)(1) is met the expenses of moving to the new residence are not considered as incurred in connection with A's commencement of work at his new principal place of work since the new residence is not proximate in place to the new place of work. If, however, A can demonstrate, for example, that he is required to live at such new residence as a condition of employment or if living at such new residence will result in an actual decrease in commuting time or expense, the expenses of the move may be considered as incurred in connection with A's commencement of work at his new principal place of work.

(ii) The provisions of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example 1. Assume that A is transferred by his employer from Boston, MA, to Washington, DC. A moves to a new residence in Washington, DC, and commences work on February 1, 1971. A's wife and his two children remain in Boston until June 1972 in order to allow A's children to complete their grade school education in Boston. On June 1, 1972, A sells his home in Boston and his wife and children move to the new residence in Washington, DC. The expenses incurred on June 1, 1972, in selling the old residence and in moving A's family, their household goods, and personal effects to the new residence in Washington are allowable as a deduction although they were incurred 16 months after the date of the commencement of work by A since A has moved to and established a new residence in Washington, DC, and thus incurred part of the total expenses of the move prior to the expiration of the 1-year period.

Example 2. Assume that A is transferred by his employer from Washington, DC, to Baltimore, MD. A commences work on January 1, 1971, in Baltimore. A commutes from his residence in Washington to his new principal place of work in Baltimore for a period of 18 months. On July 1, 1972, A decides to move to and establish a new residence in Baltimore. None of the moving expenses otherwise allowable under section 217 may be deducted since A neither incurred the expenses within 1 year nor has shown circumstances under which he was prevented from moving within such period.

(b) *Definition of moving expenses*—(1) *In general.* Section 217(b) defines the term *moving expenses* to mean only the reasonable expenses (i) of moving household goods and personal effects from the taxpayer's former residence to his new residence, (ii) of traveling (including meals and lodging) from the taxpayer's former residence to his new place of residence, (iii) of traveling (including meals and lodging), after obtaining employment, from the taxpayer's former residence to the general location of his new principal place of work and return, for the principal purpose of searching for a new residence, (iv) of meals and lodging while occupying temporary quarters in the general location of the new principal place of work during any period of 30 consecutive days after obtaining employment, or (v) of a nature constituting qualified residence sale, purchase, or lease expenses. Thus, the test of deductibility is whether the expenses are reasonable and are incurred for the items set forth in subdivisions (i) through (v) of this subparagraph.

(2) *Reasonable expenses.* (i) The term *moving expenses* includes only those expenses which are reasonable under the circumstances of the particular move. Expenses paid or incurred in excess of a reasonable amount are not deductible. Generally, expenses paid or incurred for movement of household goods and personal effects or for travel (including meals and lodging) are reasonable only to the extent that they are paid or incurred for such movement or travel by the shortest and most direct route available from the former residence to the new residence by the conventional mode or modes of transportation actually used and in the shortest period of time commonly required to travel the distance involved by such mode. Thus, if moving or travel arrangements are made to provide a circuitous route for scenic, stopover, or other similar reasons, additional expenses resulting therefrom are not deductible since they are not reasonable nor related to the commencement of work at the new principal place of work. In addition, expenses paid or incurred for meals and lodging while traveling from the former residence to the new place of residence or to the general location of the new principal place of work and return or occupying temporary quarters in the general location of the new principal place of work are reasonable only if under the facts and circumstances involved such expenses are not lavish or extravagant.

(ii) The application of this subparagraph may be illustrated by the following example:

Example. A, an employee of the M Company works and maintains his residence in Boston, MA. Upon receiving orders from his employer that he is to be transferred to M's Los Angeles, CA, office, A motors to Los Angeles with his family with stopovers at various cities between Boston and Los Angeles to visit friends and relatives. In addition, A detours into Mexico for sightseeing. Because of the stopovers and tour into Mexico, A's travel time and distance are increased over what they would have been had he proceeded directly to Los Angeles. To the extent that A's route of travel between Boston and Los Angeles is in a generally southwesterly direction it may be said that he is traveling by the shortest and most direct route available by motor vehicle. Since A's excursion into Mexico is away from the usual Boston-Los Angeles route, the portion of the expenses

paid or incurred attributable to such excursion is not deductible. Likewise, that portion of the expenses attributable to A's delay en route in visiting personal friends and sight-seeing are not deductible.

(3) *Expense of moving household goods and personal effects.* Expenses of moving household goods and personal effects include expenses of transporting such goods and effects from the taxpayer's former residence to his new residence, and expenses of packing, crating, and in-transit storage and insurance for such goods and effects. Such expenses also include any costs of connecting or disconnecting utilities required because of the moving of household goods, appliances, or personal effects. Expenses of storing and insuring household goods and personal effects constitute in-transit expenses if incurred within any consecutive 30-day period after the day such goods and effects are moved from the taxpayer's former residence and prior to delivery at the taxpayer's new residence. Expenses paid or incurred in moving household goods and personal effects to the taxpayer's new residence from a place other than his former residence are allowable, but only to the extent that such expenses do not exceed the amount which would be allowable had such goods and effects been moved from the taxpayer's former residence. Expenses of moving household goods and personal effects do not include, for example, storage charges (other than in-transit), costs incurred in the acquisition of property, costs incurred and losses sustained in the disposition of property, penalties for breaking leases, mortgage penalties, expenses of refitting rugs or draperies, losses sustained on the disposal of memberships in clubs, tuition fees, and similar items. The above expenses may, however, be described in other provisions of section 217(b) and if so a deduction may be allowed for them subject to the allowable dollar limitations.

(4) *Expenses of traveling from the former residence to the new place of residence.* Expenses of traveling from the former residence to the new place of residence include the cost of transportation and of meals and lodging en route (including the date of arrival) from the taxpayer's former residence

to his new place of residence. Expenses of meals and lodging incurred in the general location of the former residence within 1 day after the former residence is no longer suitable for occupancy because of the removal of household goods and personal effects shall be considered as expenses of traveling for purposes of this subparagraph. The date of arrival is the day the taxpayer secures lodging at the new place of residence, even if on a temporary basis. Expenses of traveling from the taxpayer's former residence to his new place of residence do not include, for example, living or other expenses following the date of arrival at the new place of residence and while waiting to enter the new residence or waiting for household goods to arrive, expenses in connection with house or apartment hunting, living expenses preceding date of departure for the new place of residence (other than expenses of meals and lodging incurred within 1 day after the former residence is no longer suitable for occupancy), expenses of trips for purposes of selling property, expenses of trips to the former residence by the taxpayer pending the move by his family to the new place of residence, or any allowance for depreciation. The above expenses may, however, be described in other provisions of section 217(b) and if so a deduction may be allowed for them subject to the allowable dollar limitations. The deduction for traveling expenses from the former residence to the new place of residence is allowable for only one trip made by the taxpayer and members of his household; however, it is not necessary that the taxpayer and all members of his household travel together or at the same time.

(5) *Expenses of traveling for the principal purpose of looking for a new residence.* Expenses of traveling, after obtaining employment, from the former residence to the general location of the new principal place of work and return, for the principal purpose of searching for a new residence include the cost of transportation and meals and lodging during such travel and while at the general location of the new place of work for the principal purpose of searching for a new residence. However, such expenses do not include, for

example, expenses of meals and lodging of the taxpayer and members of his household before departing for the new principal place of work, expenses for trips for purposes of selling property, expenses of trips to the former residence by the taxpayer pending the move by his family to the place of residence, or any allowance for depreciation. The above expenses may, however, be described in other provisions of section 217(b) and if so a deduction may be allowed for them. The deduction for expenses of traveling for the principal purpose of looking for a new residence is not limited to any number of trips by the taxpayer and by members of his household. In addition, the taxpayer and all members of his household need not travel together or at the same time. Moreover, a trip need not result in acquisition of a lease of property or purchase of property. An employee is considered to have obtained employment in the general location of the new principal place of work after he has obtained a contract or agreement of employment. A self-employed individual is considered to have obtained employment when he has made substantial arrangements to commence work at the new principal place of work (see paragraph (f)(2) of this section for a discussion of the term *made substantial arrangements to commence to work*).

(6) *Expenses of occupying temporary quarters.* Expenses of occupying temporary quarters include only the cost of meals and lodging while occupying temporary quarters in the general location of the new principal place of work during any period of 30 consecutive days after the taxpayer has obtained employment in such general location. Thus, expenses of occupying temporary quarters do not include, for example, the cost of entertainment, laundry, transportation, or other personal, living family expenses, or expenses of occupying temporary quarters in the general location of the former place of work. The 30 consecutive day period is any one period of 30 consecutive days which can begin, at the option of the taxpayer, on any day after the day the taxpayer obtains employment in the general location of the new principal place of work.

(7) *Qualified residence sale, purchase, or lease expenses.* Qualified residence sale, purchase, or lease expenses (hereinafter “qualified real estate expenses”) are only reasonable amounts paid or incurred for any of the following purposes:

(i) Expenses incident to the sale or exchange by the taxpayer or his spouse of the taxpayer’s former residence which, but for section 217 (b) and (e), would be taken into account in determining the amount realized on the sale or exchange of the residence. These expenses include real estate commissions, attorneys’ fees, title fees, escrow fees, so called “points” or loan placement charges which the seller is required to pay, State transfer taxes and similar expenses paid or incurred in connection with the sale or exchange. No deduction, however, is permitted under section 217 and this section for the cost of physical improvements intended to enhance salability by improving the condition or appearance of the residence.

(ii) Expenses incident to the purchase by the taxpayer or his spouse of a new residence in the general location of the new principal place of work which, but for section 217 (b) and (e), would be taken into account in determining either the adjusted basis of the new residence or the cost of a loan. These expenses include attorney’s fees, escrow fees, appraisal fees, title costs, so-called “points” or loan placement charges not representing payments or prepayments of interest, and similar expenses paid or incurred in connection with the purchase of the new residence. No deduction, however, is permitted under section 217 and this section for any portion of real estate taxes or insurance, so-called “points” or loan placement charges which are, in essence, prepayments of interest, or the purchase price of the residence.

(iii) Expenses incident to the settlement of an unexpired lease held by the taxpayer or his spouse on property used by the taxpayer as his former residence. These expenses include consideration paid to a lessor to obtain a release from a lease, attorneys’ fees, real estate commissions, or similar expenses incident to obtaining a release

from a lease or to obtaining an assignee or a sublessee such as the difference between rent paid under a primary lease and rent received under a sublease. No deduction, however, is permitted under section 217 and this section for the cost of physical improvement intended to enhance marketability of the leasehold by improving the condition or appearance of the residence.

(iv) Expenses incident to the acquisition of a lease by the taxpayer or his spouse. These expenses include the cost of fees or commissions for obtaining a lease, a sublease, or an assignment of an interest in property used by the taxpayer as his new residence in the general location of the new principal place of work. No deduction, however, is permitted under section 217 and this section for payments or prepayments of rent or payments representing the cost of a security or other similar deposit.

Qualified real estate expenses do not include losses sustained on the disposition of property or mortgage penalties, to the extent that such penalties are otherwise deductible as interest.

(8) *Residence*. The term *former residence* refers to the taxpayer's principal residence before his departure for his new principal place of work. The term *new residence* refers to the taxpayer's principal residence within the general location of his new principal place of work. Thus, neither term includes other residences owned or maintained by the taxpayer or members of his family or seasonal residences such as a summer beach cottage. Whether or not property is used by the taxpayer as his principal residence depends upon all the facts and circumstances in each case. Property used by the taxpayer as his principal residence may include a houseboat, a house trailer, or similar dwelling. The term *new place of residence* generally includes the area within which the taxpayer might reasonably be expected to commute to his new principal place of work.

(9) *Dollar limitations*. (i) Expenses described in subparagraphs (A) and (B) of section 217(b)(1) are not subject to an overall dollar limitation. Thus, assuming all other requirements of section 217 are satisfied, a taxpayer who, in connection with his commencement of

work at a new principal place of work, pays or incurs reasonable expenses of moving household goods and personal effects from his former residence to his new place of residence and reasonable expenses of traveling, including meals and lodging, from his former residence to his new place of residence is permitted to deduct the entire amount of these expenses.

(ii) Expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) are subject to an overall dollar limitation for each commencement of work of 3,000 (\$2,500 in the case of a commencement of work in a taxable year beginning before January 1, 1977), of which the expenses described in subparagraphs (C) and (D) of section 217(b)(1) cannot exceed \$1,500 (\$1,000 in the case of a commencement of work in a taxable year beginning before January 1, 1977). The dollar limitation applies to the amount of expenses paid or incurred in connection with each commencement of work and not to the amount of expenses paid or incurred in each taxable year. Thus, for example, a taxpayer who paid or incurred \$2,000 of expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) in taxable year 1977 in connection with his commencement of work at a principal place of work and paid or incurred an additional \$2,000 of such expenses in taxable year 1978 in connection with the same commencement of work is permitted to deduct the \$2,000 of such expenses paid or incurred in taxable year 1977 and only \$1,000 of such expenses paid or incurred in taxable year 1978.

(iii) A taxpayer who pays or incurs expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) in connection with the same commencement of work may choose to deduct any combination of such expenses within the dollar amounts specified in subdivision (ii) of this subparagraph. For example, a taxpayer who pays or incurs such expenses in connection with the same commencement of work may either choose to deduct: (a) Expenses described in subparagraphs (C) and (D) of section 217(b)(1) to the extent of \$1,500 (\$1,000 in the case of a commencement of work in a taxable year beginning before January 1, 1977)

before deducting any of the expenses described in subparagraph (E) of such section, or (b) expenses described in subparagraph (E) of section 217(b)(1) to the extent of \$3,000 (\$2,500 in the case of a commencement of work in a taxable year beginning before January 1, 1977) before deducting any of the expenses described in subparagraphs (C) and (D) of such section.

(iv) For the purpose of computing the dollar limitation contained in subparagraph (A) of section 217(b)(3) a commencement of work by a taxpayer at a new principal place of work and a commencement of work by his spouse at a new principal place of work which are in the same general location constitute a single commencement of work. Two principal places of work are treated as being in the same general location where the taxpayer and his spouse reside together and commute to their principal places of work. Two principal places of work are not treated as being in the same general location where, as of the close of the taxable year, the taxpayer and his spouse have not shared the same new residence nor made specific plans to share the same new residence within a determinable time. Under such circumstances, the separate commencements of work by a taxpayer and his spouse will be considered separately in assigning the dollar limitations and expenses to the appropriate return in the manner described in subdivisions (v) and (vi) of this subparagraph.

(v) Moving expenses (described in subparagraphs (C), (D), and (E) of section 217(b)(1)), paid or incurred with respect to the commencement of work by both a husband and wife which is considered a single commencement of work under subdivision (iv) of this subparagraph are subject to an overall dollar limitation of \$3,000 (\$2,500 in the case of a commencement of work in a taxable year beginning before January 1, 1977), per move of which the expenses described in subparagraphs (C) and (D) of section 217(b)(1) cannot exceed \$1,500 (\$1,000 in the case of a commencement of work in a taxable year beginning before January 1, 1977). If separate returns are filed with respect to the commencement of work by both a husband and wife which is considered a single

commencement of work under subdivision (iv) of this subparagraph, moving expenses (described in subparagraphs (C), (D), and (E) of section 217(b)(1)) are subject to an overall dollar limitation of \$1,500 (\$1,250 in the case of a commencement of work in a taxable year beginning before January 1, 1977), per move of which the expenses described in subparagraphs (C) and (D) of section 217(b)(1) cannot exceed \$750 (\$500 in the case of a commencement of work in a taxable year beginning before January 1, 1977) with respect to each return. Where moving expenses are paid or incurred in more than 1 taxable year with respect to a single commencement of work by a husband and wife they shall, for purposes of applying the dollar limitations to such move, be subject to a \$3,000 and \$1,500 limitation (\$2,500 and \$1,000, respectively, in the case of a commencement of work in a taxable year beginning before January 1, 1977) for all such years that they file a joint return and shall be subject to a separate \$1,500 and \$750 limitation (\$1,250 and \$500, respectively, in the case of a commencement of work in a taxable year beginning before January 1, 1977) for all such years that they file separate returns. If a joint return is filed for the first taxable year moving expenses are paid or incurred with respect to a move but separate returns are filed in a subsequent year, the unused portion of the amount which may be deducted shall be allocated equally between the husband and wife in the later year. If separate returns are filed for the first taxable year such moving expenses are paid or incurred but a joint return is filed in a subsequent year, the deductions claimed on their separate returns shall be aggregated for purposes of determining the unused portion of the amount which may be deducted in the later year.

(vi) The application of subdivisions (iv) and (v) of this subparagraph may be illustrated by the following examples:

Example 1. A, who was transferred by his employer, effective January 15, 1977, moved from Boston, MA, to Washington, DC. A's wife was transferred by her employer, effective January 15, 1977, from Boston, MA, to Baltimore, MD. A and his wife reside together at the same new residence. A and his wife are cash basis taxpayers and file a joint

return for taxable year 1977. Because A and his wife reside together at the new residence, the commencement of work by both is considered a single commencement of work under subdivision (iv) of this subparagraph. They are permitted to deduct with respect to their commencement of work in Washington and Baltimore up to \$3,000 of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) of which the expenses described in subparagraphs (C) and (D) of such section cannot exceed \$1,500.

Example 2. Assume the same facts as in *Example 1* except that for taxable year 1977, A and his wife file separate returns. Because A and his wife reside together, the commencement of work by both is considered a single commencement of work under subdivision (iv) of this subparagraph. A is permitted to deduct with respect to his commencement of work in Washington up to \$1,500 of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) of which the expenses described in subparagraphs (C) and (D) cannot exceed \$750. A is not permitted to deduct any of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) paid by his wife in connection with her commencement of work at a new principal place of work. A's wife is permitted to deduct with respect to her commencement of work in Baltimore up to \$1,500 of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) that are paid by her of which the expenses described in subparagraphs (C) and (D) cannot exceed \$750. A's wife is not permitted to deduct any of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) paid by A in connection with his commencement of work in Washington, DC.

Example 3. Assume the same facts as in *Example 1* except that A and his wife take up separate residences in Washington and Baltimore, do not reside together during the entire taxable year, and have no specific plans to reside together. The commencement of work by A in Washington, DC, and by his wife in Baltimore are considered separate commencements of work since their principal places of work are not treated as being in the same general location. If A and his wife file a joint return for taxable year 1977, the moving expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) paid in connection with the commencement of work by A in Washington, DC, and his wife in Baltimore, MD, are subject to an overall limitation of \$6,000 of which the expenses described in subparagraphs (C) and (D) cannot exceed \$3,000. If A and his wife file separate returns for taxable year 1977, A may deduct up to \$3,000 of the expenses described in subparagraphs (C), (D), and (E) of which the expenses described in subparagraphs (C) and (D) cannot exceed \$1,500. A's wife may deduct up to \$3,000 of the expenses described in sub-

paragraphs (C), (D), and (E) of which the expenses described in subparagraphs (C) and (D) cannot exceed \$1,500.

(10) *Individuals other than taxpayer.* (i) In addition to the expenses set forth in subparagraphs (A) through (D) of section 217(b)(1) attributable to the taxpayer alone, the same type of expenses attributable to certain individuals other than the taxpayer, if paid or incurred by the taxpayer, are deductible. These other individuals must be members of the taxpayer's household, and have both the taxpayer's former residence and his new residence as their principal place of abode. A member of the taxpayer's household includes any individual residing at the taxpayer's residence who is neither a tenant nor an employee of the taxpayer. Thus, for example, a member of the taxpayer's household may not be an individual such as a servant, governess, chauffeur, nurse, valet, or personal attendant. However, for purposes of this paragraph, a tenant or employee will be considered a member of the taxpayer's household where the tenant or employee is a dependent of the taxpayer as defined in section 152.

(ii) In addition to the expenses set forth in section 217(b)(2) paid or incurred by the taxpayer attributable to property sold, purchased, or leased by the taxpayer alone, the same type of expenses paid or incurred by the taxpayer attributable to property sold, purchased, or leased by the taxpayer's spouse or by the taxpayer and his spouse are deductible providing such property is used by the taxpayer as his principal place of residence.

(c) *Conditions for allowance—(1) In general.* Section 217(c) provides two conditions which must be satisfied in order for a deduction of moving expenses to be allowed under section 217(a). The first is a minimum distance condition prescribed by section 217(c)(1), and the second is a minimum period of employment condition prescribed by section 217(c)(2).

(2) *Minimum distance.* For purposes of applying the minimum distance condition of section 217(c)(1) all taxpayers are divided into one or the other of the following categories: Taxpayers having a former principal place of work, and

taxpayers not having a former principal place of work. Included in this latter category are individuals who are seeking fulltime employment for the first time either as an employee or on a self-employed basis (for example, recent high school or college graduates), or individuals who are reentering the labor force after a substantial period of unemployment or part-time employment.

(i) In the case of a taxpayer having a former principal place of work, section 217(c)(1)(A) provides that no deduction is allowable unless the distance between the former residence and the new principal place of work exceeds by at least 35 miles (50 miles in the case of expenses paid or incurred in taxable years beginning before January 1, 1977) the distance between the former residence and the former principal place of work.

(ii) In the case of a taxpayer not having a former principal place of work, section 217(c)(1)(B) provides that no deduction is allowable unless the distance between the former residence and the new principal place of work is at least 35 miles (50 miles in the case of expenses paid or incurred in taxable years beginning before January 1, 1977).

(iii) For purposes of measuring distances under section 217(c)(1) the distance between two geographic points is measured by the shortest of the more commonly traveled routes between such points. The shortest of the more commonly traveled routes refers to the line of travel and the mode or modes of transportation commonly used to go between two geographic points comprising the shortest distance between such points irrespective of the route used by the taxpayer.

(3) *Principal place of work.* (i) A taxpayer's *principal place of work* usually is the place where he spends most of his working time. The principal place of work of a taxpayer who performs services as an employee is his employer's plant, office, shop, store, or other property. The principal place of work of a taxpayer who is self-employed is the plant, office, shop, store, or other property which serves as the center of his business activities. However, a taxpayer may have a principal place of work even if there is no one place

where he spends a substantial portion of his working time. In such case, the taxpayer's principal place of work is the place where his business activities are centered—for example, because he reports there for work, or is required either by his employer or the nature of his employment to “base” his employment there. Thus, while a member of a railroad crew may spend most of his working time aboard a train, his principal place of work is his home terminal, station, or other such central point where he reports in, checks out, or receives instructions. The principal place of work of a taxpayer who is employed by a number of employers on a relatively short-term basis, and secures employment by means of a union hall system (such as a construction or building trades worker) would be the union hall.

(ii) Where a taxpayer has more than one employment (i.e., the taxpayer is employed by more than one employer, or is self-employed in more than one trade or business, or is an employee and is self-employed at any particular time) his principal place of work is determined with reference to his principal employment. The location of a taxpayer's principal place of work is a question of fact determined on the basis of the particular circumstances in each case. The more important factors to be considered in making this determination are (a) the total time ordinarily spent by the taxpayer at each place, (b) the degree of the taxpayer's business activity at each place, and (c) the relative significance of the financial return to the taxpayer from each place.

(iii) Where a taxpayer maintains inconsistent positions by claiming a deduction for expenses of meals and lodging while away from home (incurred in the general location of the new principal place of work) under section 162 (relating to trade or business expenses) and by claiming a deduction under this section for moving expenses incurred in connection with the commencement of work at such place of work, it will be a question of facts and circumstances as to whether such new place of work will be considered a principal place of work, and accordingly, which category of deductions he will be allowed.

(4) *Minimum period of employment.* (i) Under section 217(c)(2) no deduction is allowed unless:

(a) Where a taxpayer is an employee, during the 12-month period immediately following his arrival in the general location of the new principal place of work, he is a full-time employee, in such general location, during at least 39 weeks, or

(b) Where a taxpayer is a self-employed individual (including a taxpayer who is also an employee, but is unable to satisfy the requirements of the 39-week test of (a) of this subdivision (i)), during the 24-month period immediately following his arrival in the general location of the new principal place of work, he is a full-time employee or performs services as a self-employed individual on a full-time basis, in such general location, during at least 78 weeks, of which not less than 39 weeks are during the 12-month period referred to above.

Where a taxpayer works as an employee and at the same time performs services as a self-employed individual his principal employment (determined according to subdivision (i) of subparagraph (3) of this paragraph) governs whether the 39-week or 78-week test is applicable.

(ii) The 12-month period and the 39-week period set forth in subparagraph (A) of section 217(c)(2) and the 12- and 24-month periods as well as 39- and 78-week periods set forth in subparagraph (B) of such section are measured from the date of the taxpayer's arrival in the general location of the new principal place of work. Generally, date of arrival is the date of the termination of the last trip preceding the taxpayer's commencement of work on a regular basis and is not the date the taxpayer's family or household goods and effects arrive.

(iii) The taxpayer need not remain in the employ of the same employer or remain self-employed in the same trade or business for the required number of weeks. However, he must be employed in the same general location of the new principal place of work during such period. The *general location* of the new principal place of work refers to a general commutation area and is usually the same area as the "new place of res-

idence"; see paragraph (b)(8) of this section.

(iv) Only those weeks during which the taxpayer is a full-time employee or during which he performs services as a self-employed individual on a full-time basis qualify as a week of work for purposes of the minimum period of employment condition of section 217(c)(2).

(a) Whether an employee is a full-time employee during any particular week depends upon the customary practices of the occupation in the geographic area in which the taxpayer works. Where employment is on a seasonal basis, weeks occurring in the off-season when no work is required or available may be counted as weeks of full-time employment only if the employee's contract or agreement of employment covers the off-season period and such period is less than 6 months. Thus, for example, a schoolteacher whose employment contract covers a 12-month period and who teaches on a full-time basis for more than 6 months is considered a full-time employee during the entire 12-month period. A taxpayer will be treated as a full-time employee during any week of involuntary temporary absence from work because of illness, strikes, shutouts, layoffs, natural disasters, etc. A taxpayer will, also, be treated as a full-time employee during any week in which he voluntarily absents himself from work for leave or vacation provided for in his contract or agreement of employment.

(b) Whether a taxpayer performs services as a self-employed individual on a full-time basis during any particular week depends on the practices of the trade or business in the geographic area in which the taxpayer works. For example, a self-employed dentist maintaining office hours 4 days a week is considered to perform services as a self-employed individual on a full-time basis providing it is not unusual for other self-employed dentists in the geographic area in which the taxpayer works to maintain office hours only 4 days a week. Where a trade or business is seasonal, weeks occurring during the off-season when no work is required or available may be counted as weeks of performance of services on a full-time basis only if the off-season is less than 6 months and the

taxpayer performs services on a full-time basis both before and after the off-season. For example, a taxpayer who owns and operates a motel at a beach resort is considered to perform services as a self-employed individual on a full-time basis if the motel is closed for a period not exceeding 6 months during the off-season and if he performs services on a full-time basis as the operator of a motel both before and after the off-season. A taxpayer will be treated as performing services as a self-employed individual on a full-time basis during any week of involuntary temporary absence from work because of illness, strikes, natural disasters, etc.

(v) Where taxpayers file a joint return, either spouse may satisfy the minimum period of employment condition. However, weeks worked by one spouse may not be added to weeks worked by the other spouse in order to satisfy such condition. The taxpayer seeking to satisfy the minimum period of employment condition must satisfy the condition applicable to him. Thus, if a taxpayer is subject to the 39-week condition and his spouse is subject to the 78-week condition and the taxpayer satisfies the 39-week condition, his spouse need not satisfy the 78-week condition. On the other hand, if the taxpayer does not satisfy the 39-week condition, his spouse in such case must satisfy the 78-week condition.

(vi) The application of this subparagraph may be illustrated by the following examples:

Example 1. A is an electrician residing in New York City. He moves himself, his family, and his household goods and personal effects, at his own expense, to Denver where he commences employment with the M Aircraft Corporation. After working full-time for 30 weeks he voluntarily leaves his job, and he subsequently moves to and commences employment in Los Angeles, CA, which employment lasts for more than 39 weeks. Since A was not employed in the general location of his new principal place of employment in Denver for at least 39 weeks, no deduction is allowable for moving expenses paid or incurred between New York City and Denver. A will be allowed to deduct only those moving expenses attributable to his move from Denver to Los Angeles, assuming all other conditions of section 217 are met.

Example 2. Assume the same facts as in *Example 1*, except that A's wife commences em-

ployment in Denver at the same time as A, and that she continues to work in Denver for at least 9 weeks after A's departure for Los Angeles. Since she has met the 39-week requirement in Denver, and assuming all other requirements of section 217 are met, the moving expenses paid by A attributable to the move from New York City to Denver will be allowed as a deduction, provided A and his wife file a joint return. If A and his wife file separate returns moving expenses paid by A's wife attributable to the move from New York City to Denver will be allowed as a deduction on A's wife's return.

Example 3. Assume the same facts as in *Example 1*, except that A's wife commences employment in Denver on the same day that A departs for Los Angeles, and continues to work in Denver for 9 weeks thereafter. Since neither A (who has worked 30 weeks) nor his wife (who has worked 9 weeks) has independently satisfied the 39-week requirement, no deduction for moving expenses attributable to the move from New York City to Denver is allowable.

(d) *Rules for application of section 217(c)(2)*—(1) *Inapplicability of minimum period of employment condition in certain cases.* Section 217(d)(1) provides that the minimum period of employment condition of section 217(c)(2) does not apply in the case of a taxpayer who is unable to meet such condition by reason of:

(i) Death or disability, or

(ii) Involuntary separation (other than for willful misconduct) from the service of an employer or separation by reason of transfer for the benefit of an employer after obtaining full-time employment in which the taxpayer could reasonably have been expected to satisfy such condition.

For purposes of subdivision (i) of this paragraph disability shall be determined according to the rules in section 72(m)(7) and § 1.72-17(f). Subdivision (ii) of this subparagraph applies only where the taxpayer has obtained full-time employment in which he could reasonably have been expected to satisfy the minimum period of employment condition. A taxpayer could reasonably have been expected to satisfy the minimum period of employment condition if at the time he commences work at the new principal place of work he could have been expected, based upon the facts known to him at such time, to satisfy such condition. Thus, for example, if the taxpayer at

the time of transfer was not advised by his employer that he planned to transfer him within 6 months to another principal place of work, the taxpayer could, in the absence of other factors, reasonably have been expected to satisfy the minimum employment period condition at the time of the first transfer. On the other hand, a taxpayer could not reasonably have been expected to satisfy the minimum employment condition if at the time of the commencement of the move he knew that his employer's retirement age policy would prevent his satisfying the minimum employment period condition.

(2) *Election of deduction before minimum period of employment condition is satisfied.* (i) Paragraph (2) of section 217(d) provides a rule which applies where a taxpayer paid or incurred, in a taxable year, moving expenses which would be deductible in that taxable year except that the minimum period of employment condition of section 217(c)(2) has not been satisfied before the time prescribed by law for filing the return for such taxable year. The rule provides that where a taxpayer has paid or incurred moving expenses and as of the date prescribed by section 6072 for filing his return for such taxable year (determined with regard to extensions of time for filing) there remains unexpired a sufficient portion of the 12-month or the 24-month period so that it is still possible for the taxpayer to satisfy the applicable period of employment condition, the taxpayer may elect to claim a deduction for such moving expenses on the return for such taxable year. The election is exercised by taking the deduction on the return.

(ii) Where a taxpayer does not elect to claim a deduction for moving expenses on the return for the taxable year in which such expenses were paid or incurred in accordance with subdivision (i) of this subparagraph and the applicable minimum period of employment condition of section 217(c)(2) (as well as all other requirements of section 217) is subsequently satisfied, the taxpayer may file an amended return or a claim for refund for the taxable year such moving expenses were paid or incurred on which he may claim a deduction under section 217.

(iii) The application of this subparagraph may be illustrated by the following examples:

Example 1. A is transferred by his employer from Boston, MA, to Cleveland, OH. He begins working there on November 1, 1970. Moving expenses are paid by A in 1970 in connection with this move. On April 15, 1971, when he files his income tax return for the year 1970, A has been a full-time employee in Cleveland for approximately 24 weeks. Although he has not satisfied the 39-week employment condition at this time, A may elect to claim his 1970 moving expenses on his 1970 income tax return as there is still sufficient time remaining before November 1, 1971, to satisfy such condition.

Example 2. Assume the same facts as in *Example 1*, except that on April 15, 1971, A has voluntarily left his employer and is looking for other employment in Cleveland. A may not be sure he will be able to meet the 39-week employment condition by November 1, 1971. Thus, he may if he wishes wait until such condition is met and file an amended return claiming as a deduction the expenses paid in 1970. Instead of filing an amended return A may file a claim for refund based on a deduction for such expenses. If A fails to meet the 39-week employment condition on or before November 1, 1971, no deduction is allowable for such expenses.

Example 3. B is a self-employed accountant. He moves from Rochester, NY, to New York, NY, and begins to work there on December 1, 1970. Moving expenses are paid by B in 1970 and 1971 in connection with this move. On April 15, 1971, when he files his income tax return for the year 1970, B has been performing services as a self-employed individual on a full-time basis in New York City for approximately 20 weeks. Although he has not satisfied the 78-week employment condition at this time, A may elect to claim his 1970 moving expenses on his 1970 income tax return as there is still sufficient time remaining before December 1, 1972, to satisfy such condition. On April 15, 1972, when he files his income tax return for the year 1971, B has been performing services as a self-employed individual on a full-time basis in New York City for approximately 72 weeks. Although he has not met the 78-week employment condition at this time, B may elect to claim his 1971 moving expenses on his 1971 income tax return as there is still sufficient time remaining before December 1, 1972, to satisfy such requirement.

(3) *Recapture of deduction.* Paragraph (3) of section 217(d) provides a rule which applies where a taxpayer has deducted moving expenses under the election provided in section 217(d)(2) prior to satisfying the applicable minimum

period of employment condition and such condition cannot be satisfied at the close of a subsequent taxable year. In such cases an amount equal to the expenses deducted must be included in the taxpayer's gross income for the taxable year in which the taxpayer is no longer able to satisfy such minimum period of employment condition. Where the taxpayer has deducted moving expenses under the election provided in section 217(d)(2) for the taxable year and subsequently files an amended return for such year on which he does not claim the deduction, such expenses are not treated as having been deducted for purposes of the recapture rule of the preceding sentence.

(e) *Denial of double benefit*—(1) *In general.* Section 217(e) provides a rule for computing the amount realized and the basis where qualified real estate expenses are allowed as a deduction under section 217(a).

(2) *Sale or exchange of residence.* Section 217(e) provides that the amount realized on the sale or exchange of a residence owned by the taxpayer, by the taxpayer's spouse, or by the taxpayer and his spouse and used by the taxpayer as his principal place of residence is not decreased by the amount of any expenses described in subparagraph (A) of section 217(b)(2) and deducted under section 217(a). For the purposes of section 217(e) and of this paragraph the term "amount realized" has the same meaning as under section 1001(b) and the regulations thereunder. Thus, for example, if the taxpayer sells a residence used as his principal place of residence and real estate commissions or similar expenses described in subparagraph (A) of section 217(b)(2) are deducted by him pursuant to section 217(a), the amount realized on the sale of the residence is not reduced by the amount of such real estate commissions or such similar expenses described in subparagraph (A) of section 217(b)(2).

(3) *Purchase of a residence.* Section 217(e) provides that the basis of a residence purchased or received in exchange for other property by the taxpayer, by the taxpayer's spouse, or by the taxpayer and his spouse and used by the taxpayer as his principal place of residence is not increased by the

amount of any expenses described in subparagraph (B) of section 217(b)(2) and deducted under section 217(a). For the purposes of section 217(e) and of this paragraph the term *basis* has the same meaning as under section 1011 and the regulations thereunder. Thus, for example, if a taxpayer purchases a residence to be used as his principal place of residence and attorneys' fees or similar expenses described in subparagraph (B) of section 217(b)(2) are deducted pursuant to section 217(a), the basis of such residence is not increased by the amount of such attorneys' fees or such similar expenses described in subparagraph (B) of section 217(b)(2).

(4) *Inapplicability of section 217(e).* (i) Section 217(e) and subparagraphs (1) through (3) of this paragraph do not apply to any expenses with respect to which an amount is included in gross income under section 217(d)(3). Thus, the amount of any expenses described in subparagraph (A) of section 217(b)(2) deducted in the year paid or incurred pursuant to the election under section 217(d)(2) and subsequently recaptured pursuant to section 217(d)(3) may be taken into account in computing the amount realized on the sale or exchange of the residence described in such subparagraph. Also, the amount of expenses described in subparagraph (B) of section 217(b)(2) deducted in the year paid or incurred pursuant to such election under section 217(d)(2) and subsequently recaptured pursuant to section 217(d)(3) may be taken into account as an adjustment to the basis of the residence described in such subparagraph.

(ii) The application of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example 1. A was notified of his transfer effective December 15, 1972, from Seattle, WA, to Philadelphia, PA. In connection with the transfer A sold his house in Seattle on November 10, 1972. Expenses incident to the sale of the house of \$2,500 were paid by A prior to or at the time of the closing of the contract of sale on December 10, 1972. The amount realized on the sale of the house was \$47,500 and the adjusted basis of the house was \$30,000. Pursuant to the election provided in section 217(d)(2), A deducted the expenses of moving from Seattle to Philadelphia including the expenses incident to the sale of his

former residence in taxable year 1972. Dissatisfied with his position with his employer in Philadelphia, A took a position with an employer in Chicago, IL, on July 15, 1973. Since A was no longer able to satisfy the minimum period employment condition at the close of taxable year 1973 he included an amount equal to the amount deducted as moving expenses including the expenses incident to the sale of his former residence in gross income for taxable year 1973. A is permitted to decrease the amount realized on the sale of the house by the amount of the expenses incident to the sale of the house deducted from gross income and subsequently included in gross income. Thus, the amount realized on the sale of the house is decreased from \$47,500 to \$45,000 and thus, the gain on the sale of the house is reduced from \$17,500 to \$15,000. A is allowed to file an amended return or a claim for refund in order to reflect the recomputation of the amount realized.

Example 2. B, who is self-employed decided to move from Washington, DC, to Los Angeles, CA. In connection with the commencement of work in Los Angeles on March 1, 1973, B purchased a house in a suburb of Los Angeles for \$65,000. Expenses incident to the purchase of the house in the amount of \$1,500 were paid by B prior to or at the time of the closing of the contract of sale on September 15, 1973. Pursuant to the election provided in section 217(d)(2), B deducted the expenses of moving from Washington to Los Angeles including the expenses incident to the purchase of his new residence in taxable year 1973. Dissatisfied with his prospects in Los Angeles, B moved back to Washington on July 1, 1974. Since B was no longer able to satisfy the minimum period of employment condition at the close of taxable year 1974 he included an amount equal to the amount deducted as moving expenses incident to the purchase of the former residence in gross income for taxable year 1974. B is permitted to increase the basis of the house by the amount of the expenses incident to the purchase of the house deducted from gross income and subsequently included in gross income. Thus, the basis of the house is increased to \$66,500.

(f) *Rules for self-employed individuals—*

(1) *Definition.* Section 217(f)(1) defines the term *self-employed individual* for purposes of section 217 to mean an individual who performs personal services either as the owner of the entire interest in an unincorporated trade or business or as a partner in a partnership carrying on a trade or business. The term *self-employed individual* does not include the semiretired, part-time students, or other similarly situated taxpayers who work only a few hours each

week. The application of this subparagraph may be illustrated by the following example:

Example. A is the owner of the entire interest in an unincorporated construction business. A hires a manager who performs all of the daily functions of the business including the negotiation of contracts with customers, the hiring and firing of employees, the purchasing of materials used on the projects, and other similar services. A and his manager discuss the operations of the business about once a week over the telephone. Otherwise A does not perform any managerial services for the business. For the purposes of section 217, A is not considered to be a self-employed individual.

(2) *Rule for application of subsection (b)(1) (C) and (D).* Section 217(f)(2) provides that for purposes of subparagraphs (C) and (D) of section 217(b)(1) an individual who commences work at a new principal place of work as a self-employed individual is treated as having obtained employment when he has made substantial arrangements to commence such work. Whether the taxpayer has made substantial arrangements to commence work at a new principal place of work is determined on the basis of all the facts and circumstances in each case. The factors to be considered in this determination depend upon the nature of the taxpayer's trade or business and include such considerations as whether the taxpayer has: (i) Leased or purchased a plant, office, shop, store, equipment, or other property to be used in the trade or business, (ii) made arrangements to purchase inventory or supplies to be used in connection with the operation of the trade or business, (iii) entered into commitments with individuals to be employed in the trade or business, and (iv) made arrangements to contact customers or clients in order to advertise the business in the general location of the new principal place of work. The application of this subparagraph may be illustrated by the following examples:

Example 1. A, a partner in a growing chain of drug stores decided to move from Houston, TX, to Dallas, TX, in order to open a drug store in Dallas. A made several trips to Dallas for the purpose of looking for a site for the drug store. After the signing of a lease on a building in a shopping plaza, suppliers were contacted, equipment was purchased, and

employees were hired. Shortly before the opening of the store A and his wife moved from Houston to Dallas and took up temporary quarters in a motel until the time their apartment was available. By the time he and his wife took up temporary quarters in the motel A was considered to have made substantial arrangements to commence work at the new principal place of work.

Example 2. B, who is a partner in a securities brokerage firm in New York, NY, decided to move to Rochester, NY, to become the resident partner in the firm's new Rochester office. After a lease was signed on an office in downtown Rochester B moved to Rochester and took up temporary quarters in a motel until his apartment became available. Before the opening of the office B supervised the decoration of the office, the purchase of equipment and supplies necessary for the operation of the office, the hiring of personnel for the office, as well as other similar activities. By the time B took up temporary quarters in the motel he was considered to have made substantial arrangements to commence to work at the new principal place of work.

Example 3. C, who is about to complete his residency in ophthalmology at a hospital in Pittsburgh, PA, decided to fly to Philadelphia, PA, for the purpose of looking into opportunities for practicing in that city. Following his arrival in Philadelphia C decided to establish his practice in that city. He leased an office and an apartment. At the time he departed Pittsburgh for Philadelphia C was not considered to have made substantial arrangements to commence work at the new principal place of work, and, therefore, is not allowed to deduct expenses described in subparagraph (C) of section 217(b)(1) (relating to expenses of traveling (including meals and lodging), after obtaining employment, from the former residence to the general location of the new principal place of work and return, for the principal purpose of searching for a new residence).

(g) *Rules for members of the Armed Forces of the United States*—(1) *In general.* The rules in paragraphs (a)(1) and (2), (b), and (e) of this section apply to moving expenses paid or incurred by members of the Armed Forces of the United States on active duty who move pursuant to a military order and incident to a permanent change of station, except as provided in this paragraph (g). However, if the moving expenses are not paid or incurred incident to a permanent change of station, this paragraph (g) does not apply, but all other paragraphs of this section do apply. The provisions of this paragraph apply

to taxable years beginning December 31, 1975.

(2) *Treatment of services or reimbursement provided by Government*—(i) *Services in kind.* The value of any moving or storage services furnished by the United States Government to members of the Armed Forces, their spouses, or their dependents in connection with a permanent change of station is not includible in gross income. The Secretary of Defense and (in cases involving members of the peacetime Coast Guard) the Secretary of Transportation are not required to report or withhold taxes with respect to those services. Services furnished by the Government include services rendered directly by the Government or rendered by a third party who is compensated directly by the Government for the services.

(ii) *Reimbursements.* The following rules apply to reimbursements or allowances by the Government to members of the Armed Forces, their spouses, or their dependents for moving or storage expenses paid or incurred by them in connection with a permanent change of station. If the reimbursement or allowance exceeds the actual expenses paid or incurred, the excess is includible in the gross income of the member, and the Secretary of Defense or Secretary of Transportation must report the excess as payment of wages and withhold income taxes under section 3402 and the employee taxes under section 3102 with respect to that excess. If the reimbursement or allowance does not exceed the actual expenses, the reimbursement or allowance is not includible in gross income, and no reporting or withholding by the Secretary of Defense or Secretary of Transportation is required. If the actual expenses, as limited by paragraph (b)(9) of this section, exceed the reimbursement or allowance, the member may deduct the excess if the other requirements of this section, as modified by this paragraph, are met. The determination of the limitation on actual expenses under paragraph (b)(9) of this section is made without regard to any services in kind furnished by the Government.

(3) *Permanent change of station.* For purposes of this section, the term *permanent change of station* includes the following situations.

(i) A move from home to the first post of duty when appointed, reappointed, reinstated, or inducted.

(ii) A move from the last post of duty to home or a nearer point in the United States in connection with retirement, discharge, resignation, separation under honorable conditions, transfer, relief from active duty, temporary disability retirement, or transfer to a Fleet Reserve, if such move occurs within 1 year of such termination of active duty or within the period prescribed by the Joint Travel Regulations promulgated under the authority contained in sections 404 through 411 of title 37 of the United States Code.

(iii) A move from one permanent post of duty to another permanent post of duty at a different duty station, even if the member separates from the Armed Forces immediately or shortly after the move.

The term *permanent*, *post of duty*, *duty station*, and *honorable* have the meanings given them in appropriate Department of Defense or Department of Transportation rules and regulations.

(4) *Storage expenses.* This paragraph applies to storage expenses as well as to moving expenses described in paragraph (b)(1) of this section. the term *storage expenses* means the cost of storing personal effects of members of the Armed Forces, their spouses, and their dependents.

(5) *Moves of spouses and dependents.* (i) The following special rule applies for purposes of paragraphs (b)(9) and (10) of this section, if the spouse or dependents of a member of the Armed Forces move to or from a different location than does the member. In this case, the spouse is considered to have commenced work as an employee at a new principal place of work that is within the same general location as the location to which the member moves.

(ii) The following special rule applies for purposes of this paragraph to moves by spouses or dependents of members of the Armed Forces who die, are imprisoned, or desert while on active duty. In these cases, a move to a member's place of enlistment or induction or the

member's, spouse's, or dependent's home of record or nearer point in the United States is considered incident to a permanent change of station.

(6) *Disallowance of deduction.* No deduction is allowed under this section for any moving or storage expense reimbursed by an allowance that is excluded from gross income.

(h) *Special rules for foreign moves—*(1) *Increase in limitations.* In the case of a foreign move (as defined in paragraph (h)(3) of this section), paragraph (b)(6) of this section shall be applied by substituting "90 consecutive" for "30 consecutive" each time it appears. Paragraph (b)(9) (ii), (iii) and (v) of this section shall be applied by substituting "\$6,000" for "\$3,000" each time it appears and by substituting "\$4,500" for "\$1,500" each time it appears. Paragraph (b)(9)(ii) of this section shall be applied by substituting "\$5,000" for "\$2,000" each time it appears and by substituting "1979" for "1977" and "1980" for "1978" each time they appear in the last sentence. Paragraph (b)(9)(v) of this section shall be applied by substituting "\$2,250" for "\$750" each time it appears. Paragraph (b)(9)(vi) of this section does not apply.

(2) *Allowance of certain storage fees.* In the case of a foreign move, for purposes of this section, the moving expenses described in paragraph (b)(3) of this section shall include the reasonable expenses of moving household goods and personal effects to and from storage, and of storing such goods and effects for part or all of the period during which the new place of work continues to be the taxpayer's principal place of work.

(3) *Foreign move.* For purposes of this paragraph, the term *foreign move* means a move in connection with the commencement of work by the taxpayer at a new principal place of work located outside the United States. Thus, a move from the United States to a foreign country or from one foreign country to another foreign country qualifies as a foreign move. A move within a foreign country also qualifies as a foreign move. A move from a foreign country to the United States does not qualify as a foreign move.

(4) *United States*. For purposes of this paragraph, the term *United States* includes the possessions of the United States.

(5) *Effective date*. The provisions of this paragraph apply to expenses paid or incurred in taxable years beginning after December 31, 1978. The paragraph also applies to the expenses paid or incurred in the taxable year beginning during 1978 of taxpayers who do not make an election pursuant to section 209(c) of the Foreign Earned Income Act of 1978 (Pub. L. 95-615, 92 Stat. 3109) to have section 911 under prior law apply to that taxable year.

(i) *Allowance of deductions in case of retirees or decedents who were working abroad*—(1) *In general*. In the case of any qualified retiree moving expenses or qualified survivor moving expenses, this section (other than paragraph (h)) shall be applied to such expenses as if they were incurred in connection with the commencement of work by the taxpayer as an employee at a new principal place of work located within the United States and the limitations of paragraph (c)(4) of this section (relating to the minimum period of employment) shall not apply.

(2) *Qualified retiree moving expenses*. For purposes of this paragraph, the term *qualified retiree moving expenses* means any moving expenses which are incurred by an individual whose former principal place of work and former residence were outside the United States and which are incurred for a move to a new residence in the United States in connection with the bona fide retirement of the individual. *Bona fide retirement* means the permanent withdrawal from gainful full-time employment and self-employment. An individual who at the time of withdrawal from gainful full-time employment or self-employment, intends the withdrawal to be permanent shall be considered to be a *bona fide retiree* even though the individual ultimately resumes gainful full-time employment or self-employment. An individual's intention may be evidenced by relevant facts and circumstances which include the age and health of the individual, the customary retirement age of employees engaged in similar work, whether the individual is receiving a retirement allowance

under a pension annuity, retirement or similar fund or system, and the length of time before resuming full-time employment or self-employment.

(3) *Qualified survivor moving expenses*. (i) For purposes of this paragraph, the term *qualified survivor moving expenses* means any moving expenses:

(A) Which are paid or incurred by the spouse or any dependent (as defined in section 152) of any decedent who (as of the time of his death) had a principal place of work outside the United States, and

(B) Which are incurred for a move which begins within 6 months after the death of the decedent and which is to a residence in the United States from a former residence outside the United States which (as of the time of the decedent's death) was the residence of such decedent and the individual paying or incurring the expense.

(ii) For purposes of paragraph (i)(3) (i) (B) of this section, a move begins when:

(A) The taxpayer contracts for the moving of his or her household goods and personal effects to a residence in the United States but only if the move is completed within a reasonable time thereafter;

(B) The taxpayer's household goods and personal effects are packed and in transit to a residence in the United States; or

(C) The taxpayer leaves the former residence to travel to a new place of residence in the United States.

(4) *United States*. For purposes of this paragraph, the term *United States* includes the possessions of the United States.

(5) *Effective date*. The provisions of this paragraph apply to expenses paid or incurred in taxable years beginning after December 31, 1978. The paragraph also applies to the expenses paid or incurred in the taxable year beginning during 1978 of taxpayers who do not make an election pursuant to section 209(c) of the Foreign Earned Income Act of 1978 (Pub. L. 95-615, 92 Stat. 3109) to have section 911 under prior law apply to that taxable year.

(j) *Effective date*—(1) *In general*. This section, except as provided in subparagraphs (2) and (3) of this paragraph, is applicable to items paid or incurred in

taxable years beginning after December 31, 1969.

(2) *Reimbursement not included in gross income.* This section does not apply to items to the extent that the taxpayer received or accrued in a taxable year beginning before January 1, 1970, a reimbursement or other expense allowance for such items which was not included in his gross income.

(3) *Election in cases of expenses paid or incurred before January 1, 1971, in connection with certain moves—(i) In general.* A taxpayer who was notified by his employer on or before December 19, 1969, of a transfer to a new principal place of work and who pays or incurs moving expenses after December 31, 1969, but before January 1, 1971, in connection with such transfer may elect to have the rules governing moving expenses in effect prior to the effective date of section 231 of the Tax Reform Act of 1969 (83 Stat. 577) govern such expenses. If such election is made, this section and section 82 and the regulations thereunder do not apply to such expenses. A taxpayer is considered to have been notified on or before December 19, 1969, by his employer of a transfer, for example, if before such date the employer has sent a notice to all employees or a reasonably defined group of employees, which includes such taxpayer, of a relocation of the operations of such employer from one plant or facility to another plant or facility. An employee who is transferred to a new principal place of work for the benefit of his employer and who makes an election under this paragraph is permitted to exclude amounts received or accrued, directly or indirectly, as payment for or reimbursement of expenses of moving household goods and personal effects from the former residence to the new residence and of traveling (including meals and lodging) from the former residence to the new place of residence. Such exclusion is limited to amounts received or accrued, directly or indirectly, as a payment for or reimbursement of the expenses described above. Amounts in excess of actual expenses paid or incurred must be included in gross income. No deduction is allowable under section 217 for expenses representing amounts excluded from gross income. Also, an employee

who is transferred to a new principal place of work which is less than 50 miles but at least 20 miles farther from his former residence than was his former principal place of work and who is not reimbursed, either directly or indirectly, for the expenses described above is permitted to deduct such expenses providing all of the requirements of section 217 and the regulations thereunder prior to the effective date of section 231 of the Tax Reform Act of 1969 (83 Stat. 577) are satisfied.

(ii) *Election made before the date of publication of this notice as a Treasury decision.* An election under this subparagraph made before the date of publication of this notice as a Treasury decision shall be made pursuant to the procedure prescribed in temporary income tax regulations relating to treatment of payments of expenses of moving from one residence to another residence (Part 13 of this chapter) T.D. 7032 (35 FR 4330), approved Mar. 11, 1970.

(iii) *Election made on or after the date of publication of this notice as a Treasury decision.* An election made under this subparagraph on or after the date of publication of this notice as a Treasury decision shall be made not later than the time, including extensions thereof, prescribed by law for filing the income tax return for the year in which the expenses were paid or 30 days after the date of publication of this notice as a Treasury decision, whichever occurs last. The election shall be made by a statement attached to the return (or the amended return) for the taxable year, setting forth the following information:

(a) The items to which the election relates;

(b) The amount of each item;

(c) The date each item was paid or incurred; and

(d) The date the taxpayer was informed by his employer of his transfer to the new principal place of work.

(iv) *Revocation of election.* An election made in accordance with this subparagraph is revocable upon the filing by the taxpayer of an amended return or a claim for refund with the district director, or the director of the Internal Revenue service center with whom the election was filed not later than the

§ 1.219-1

26 CFR Ch. I (4-1-17 Edition)

time prescribed by law, including extensions thereof, for the filing of a claim for refund with respect to the items to which the election relates.

[T.D. 7195, 37 FR 13535, July 11, 1972, 37 FR 14230, July 18, 1972, as amended by T.D. 7578 43 FR 59355, Dec. 20, 1978; T.D. 7605, 44 FR 18970, Mar. 30, 1979; T.D. 7689, 45 FR 20796, Mar. 31, 1980; T.D. 7810, 47 FR 6003, Feb. 10, 1982; T.D. 8607, 60 FR 40077, Aug. 7, 1995]

§ 1.219-1 Deduction for retirement savings.

(a) *In general.* Subject to the limitations and restrictions of paragraph (b) and the special rules of paragraph (c)(3) of this section, there shall be allowed a deduction under section 62 from gross income of amounts paid for the taxable year of an individual on behalf of such individual to an individual retirement account described in section 408(a), for an individual retirement annuity described in section 408(b), or for a retirement bond described in section 409. The deduction described in the preceding sentence shall be allowed only to the individual on whose behalf such individual retirement account, individual retirement annuity, or retirement bond is maintained. The first sentence of this paragraph shall apply only in the case of a contribution of cash. A contribution of property other than cash is not allowable as a deduction under this section. In the case of a retirement bond, a deduction will not be allowed if the bond is redeemed within 12 months of its issue date.

(b) *Limitations and restrictions*—(1) *Maximum deduction.* The amount allowable as a deduction under section 219(a) to an individual for any taxable year cannot exceed an amount equal to 15 percent of the compensation includible in the gross income of the individual for such taxable year, or \$1,500, whichever is less.

(2) *Restrictions*—(i) *Individuals covered by certain other plans.* No deduction is allowable under section 219(a) to an individual for the taxable year if for any part of such year:

(A) He was an active participant in:

(1) A plan described in section 401(a) which includes a trust exempt from tax under section 501(a),

(2) An annuity plan described in section 403(a),

(3) A qualified bond purchase plan described in section 405(a), or

(4) A retirement plan established for its employees by the United States, by a State or political subdivision thereof, or by an agency or instrumentality of any of the foregoing, or

(B) Amounts were contributed by his employer for an annuity contract described in section 403(b) (whether or not the individual's rights in such contract are nonforfeitable).

(ii) *Contributions after age 70½.* No deduction is allowable under section 219(a) to an individual for the taxable year of the individual, if he has attained the age of 70½ before the close of such taxable year.

(iii) *Rollover contributions.* No deduction is allowable under section 219 for any taxable year of an individual with respect to a rollover contribution described in section 402(a)(5), 402(a)(7), 403(a)(4), 403(b)(8), 408(d)(3), or 409(b)(3)(C).

(3) *Amounts contributed under endowment contracts.* (i) For any taxable year, no deduction is allowable under section 219(a) for amounts paid under an endowment contract described in § 1.408-3(e) which is allocable under subdivision (ii) of this subparagraph to the cost of life insurance.

(ii) For any taxable year, the cost of current life insurance protection under an endowment contract described in paragraph (b)(3)(i) of this section is the product of the net premium cost, as determined by the Commissioner, and the excess, if any, of the death benefit payable under the contract during the policy year beginning in the taxable year over the cash value of the contract at the end of such policy year.

(iii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. A, an individual who is otherwise entitled to the maximum deduction allowed under section 219, purchases, at age 20, an endowment contract described in § 1.408-3(e) which provides for the payment of an annuity of \$100 per month, at age 65, with a minimum death benefit of \$10,000, and an annual premium of \$220. The cash value at the end of the first policy year is 0. The net premium cost, as determined by the Commissioner, for A's age is \$1.61 per thousand dollars of life insurance protection. The cost of current life insurance protection is \$16.10

(\$1.61 × 10). A's maximum deduction under section 219 with respect to amounts paid under the endowment contract for the taxable year in which the first policy year begins is \$203.90 (\$220 - \$16.10).

Example 2. Assume the same facts as in *Example 1*, except that the cash value at the end of the second policy year is \$200 and the net premium cost is \$1.67 per thousand for A's age. The cost of current life insurance protection is \$16.37 (\$1.67 × 9.8). A's maximum deduction under section 219 with respect to amounts paid under the endowment contract for the taxable year in which the second policy year begins is \$203.63 (\$220 - \$16.37).

(c) *Definitions and special rules*—(1) *Compensation.* For purposes of this section, the term *compensation* means wages, salaries, professional fees, or other amounts derived from or received for personal service actually rendered (including, but not limited to, commissions paid salesmen, compensation for services on the basis of a percentage of profits, commissions on insurance premiums, tips, and bonuses) and includes earned income, as defined in section 401 (c) (2), but does not include amounts derived from or received as earnings or profits from property (including, but not limited to, interest and dividends) or amounts not includible in gross income.

(2) *Active participant.* For the definition of active participant, see § 1.219-2.

(3) *Special rules.* (i) The maximum deduction allowable under section 219(b)(1) is computed separately for each individual. Thus, if a husband and wife each has compensation of \$10,000 for the taxable year and they are each otherwise eligible to contribute to an individual retirement account and they file a joint return, then the maximum amount allowable as a deduction under section 219 is \$3,000, the sum of the individual maximums of \$1,500. However, if, for example, the husband has compensation of \$20,000, the wife has no compensation, each is otherwise eligible to contribute to an individual retirement account for the taxable year, and they file a joint return, the maximum amount allowable as a deduction under section 219 is \$1,500.

(ii) Section 219 is to be applied without regard to any community property laws. Thus, if, for example, a husband and wife, who are otherwise eligible to contribute to an individual retirement

account, live in a community property jurisdiction and the husband alone has compensation of \$20,000 for the taxable year, then the maximum amount allowable as a deduction under section 219 is \$1,500.

(4) *Employer contributions.* For purposes of this chapter, any amount paid by an employer to an individual retirement account or for an individual retirement annuity or retirement bond constitutes the payment of compensation to the employee (other than a self-employed individual who is an employee within the meaning of section 401(c)(1)) includible in his gross income, whether or not a deduction for such payment is allowable under section 219 to such employee after the application of section 219(b). Thus, an employer will be entitled to a deduction for compensation paid to an employee for amounts the employer contributes on the employee's behalf to an individual retirement account, for an individual retirement annuity, or for a retirement bond if such deduction is otherwise allowable under section 162.

[T.D. 7714, 45 FR 52738, Aug. 8, 1980]

§ 1.219-2 Definition of active participant.

(a) *In general.* This section defines the term *active participant* for individuals who participate in retirement plans described in section 219(b)(2). Any individual who is an active participant in such a plan is not allowed a deduction under section 219(a) for contributions to an individual retirement account.

(b) *Defined benefit plans*—(1) *In general.* Except as provided in subparagraphs (2), (3) and (4) of this paragraph, an individual is an active participant in a defined benefit plan if for any portion of the plan year ending with or within such individual's taxable year he is not excluded under the eligibility provisions of the plan. An individual is not an active participant in a particular taxable year merely because the individual meets the plan's eligibility requirements during a plan year beginning in that particular taxable year but ending in a later taxable year of the individual. However, for purposes of this section, an individual is deemed not to satisfy the eligibility

provisions for a particular plan year if his compensation is less than the minimum amount of compensation needed under the plan to accrue a benefit. For example, assume a plan is integrated with Social Security and only those individuals whose compensation exceeds a certain amount accrue benefits under the plan. An individual whose compensation for the plan year ending with or within his taxable year is less than the amount necessary under the plan to accrue a benefit is not an active participant in such plan.

(2) *Rules for plans maintained by more than one employer.* In the case of a defined benefit plan described in section 413(a) and funded at least in part by service-related contributions, *e.g.*, so many cents-per-hour, an individual is an active participant if an employer is contributing or is required to contribute to the plan an amount based on that individual's service taken into account for the plan year ending with or within the individual's taxable year. The general rule in paragraph (b)(1) of this section applies in the case of plans described in section 413(a) and funded only on some non-service-related unit, *e.g.*, so many cents-per-ton of coal.

(3) *Plans in which accruals for all participants have ceased.* In the case of a defined benefit plan in which accruals for all participants have ceased, an individual in such a plan is not an active participant. However, any benefit that may vary with future compensation of an individual provides additional accruals. For example, a plan in which future benefit accruals have ceased, but the actual benefit depends upon final average compensation will not be considered as one in which accruals have ceased.

(4) *No accruals after specified age.* An individual in a defined benefit plan who accrues no additional benefits in a plan year ending with or within such individual's taxable year by reason of attaining a specified age is not an active participant by reason of his participation in that plan.

(c) *Money purchase plan.* An individual is an active participant in a money purchase plan if under the terms of the plan employer contributions must be allocated to the individual's account with respect to the plan

year ending with or within the individual's taxable year. This rule applies even if an individual is not employed at any time during the individual's taxable year.

(d) *Profit-sharing and stock-bonus plans*—(1) *In general.* This paragraph applies to profit-sharing and stock bonus plans. An individual is an active participant in such plans in a taxable year if a forfeiture is allocated to his account as of a date in such taxable year. An individual is also an active participant in a taxable year in such plans if an employer contribution is added to the participant's account in such taxable year. A contribution is added to a participant's account as of the later of the following two dates: the date the contribution is made or the date as of which it is allocated. Thus, if a contribution is made in an individual's taxable year 2 and allocated as of a date in individual's taxable year 1, the later of the relevant dates is the date the contribution is made. Consequently, the individual is an active participant in year 2 but not in year 1 as a result of that contribution.

(2) *Special rule.* An individual is not an active participant for a particular taxable year by reason of a contribution made in such year allocated to a previous year if such individual was an active participant in such previous year by reason of a prior contribution that was allocated as of a date in such previous year.

(e) *Employee contributions.* If an employee makes a voluntary or mandatory contribution to a plan described in paragraphs (b), (c), or (d) of this section, such employee is an active participant in the plan for the taxable year in which such contribution is made.

(f) *Certain individuals not active participants.* For purposes of this section, an individual is not an active participant under a plan for any taxable year of such individual for which such individual elects, pursuant to the plan, not to participate in such plan.

(g) *Retirement savings for married individuals.* The provisions of this section apply in determining whether an individual or his spouse is an active participant in a plan for purposes of section

220 (relating to retirement savings for certain married individuals).

(h) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. The X Corporation maintains a defined benefit plan which has the following rules on participation and accrual of benefits. Each employee who has attained the age of 25 or has completed one year of service is a participant in the plan. The plan further provides that each participant shall receive upon retirement \$12 per month for each year of service in which the employee completes 1,000 hours of service. The plan year is the calendar year. B, a calendar-year taxpayer, enters the plan on January 2, 1980, when he is 27 years of age. Since B has attained the age of 25, he is a participant in the plan. However, B completes less than 1,000 hours of service in 1980 and 1981. Although B is not accruing any benefits under the plan in 1980 and 1981, he is an active participant under section 219(b)(2) because he is a participant in the plan. Thus, B cannot make deductible contributions to an individual retirement arrangement for his taxable years of 1980 and 1981.

Example 2. The Y Corporation maintains a profit-sharing plan for its employees. The plan year of the plan is the calendar year. C is a calendar-year taxpayer and a participant in the plan. On June 30, 1980, the employer makes a contribution for 1980 which is allocated on July 31, 1980. In 1981 the employer makes a second contribution for 1980, allocated as of December 31, 1980. Under the general rule stated in § 1.219-2(d)(1), C is an active participant in 1980. Under the special rule stated in § 1.219-2(d)(2), however, C is not an active participant in 1981 by reason of that contribution made in 1981.

(i) *Effective date.* The provisions set forth in this section are effective for taxable years beginning after December 31, 1978.

[T.D. 7714, 45 FR 52789, Aug. 8, 1980]

§ 1.221-1 Deduction for interest paid on qualified education loans after December 31, 2001.

(a) *In general*—(1) *Applicability.* Under section 221, an individual taxpayer may deduct from gross income certain interest paid by the taxpayer during the taxable year on a qualified education loan. See paragraph (b)(4) of this section for rules on payments of interest by third parties. The rules of this section are applicable to periods governed by section 221 as amended in 2001, which relates to deductions for interest

paid on qualified education loans after December 31, 2001, in taxable years ending after December 31, 2001, and on or before December 31, 2010. For rules applicable to interest due and paid on qualified education loans after January 21, 1999, if paid before January 1, 2002, see § 1.221-2. Taxpayers also may apply § 1.221-2 to interest due and paid on qualified education loans after December 31, 1997, but before January 21, 1999. To the extent that the effective date limitation (sunset) of the 2001 amendment remains in force unchanged, section 221 before amendment in 2001, to which § 1.221-2 relates, also applies to interest due and paid on qualified education loans in taxable years beginning after December 31, 2010.

(2) *Example.* The following example illustrates the rules of this paragraph (a). In the example, assume that the institution the student attends is an eligible educational institution, the loan is a qualified education loan, the student is legally obligated to make interest payments under the terms of the loan, and any other applicable requirements, if not otherwise specified, are fulfilled. The example is as follows:

Example. Effective dates. Student A begins to make monthly interest payments on her loan beginning January 1, 1997. Student A continues to make interest payments in a timely fashion. However, under the effective date provisions of section 221, no deduction is allowed for interest Student A pays prior to January 1, 1998. Student A may deduct interest due and paid on the loan after December 31, 1997. Student A may apply the rules of § 1.221-2 to interest due and paid during the period beginning January 1, 1998, and ending January 20, 1999. Interest due and paid during the period January 21, 1999, and ending December 31, 2001, is deductible under the rules of § 1.221-2, and interest paid after December 31, 2001, is deductible under the rules of this section.

(b) *Eligibility*—(1) *Taxpayer must have a legal obligation to make interest payments.* A taxpayer is entitled to a deduction under section 221 only if the taxpayer has a legal obligation to make interest payments under the terms of the qualified education loan.

(2) *Claimed dependents not eligible*—(i) *In general.* An individual is not entitled to a deduction under section 221 for a taxable year if the individual is a dependent (as defined in section 152) for

whom another taxpayer is allowed a deduction under section 151 on a Federal income tax return for the same taxable year (or, in the case of a fiscal year taxpayer, the taxable year beginning in the same calendar year as the individual's taxable year).

(ii) *Examples.* The following examples illustrate the rules of this paragraph (b)(2):

Example 1. Student not claimed as dependent. Student B pays \$750 of interest on qualified education loans during 2003. Student B's parents are not allowed a deduction for her as a dependent for 2003. Assuming fulfillment of all other relevant requirements, Student B may deduct under section 221 the \$750 of interest paid in 2003.

Example 2. Student claimed as dependent. Student C pays \$750 of interest on qualified education loans during 2003. Only Student C has the legal obligation to make the payments. Student C's parent claims him as a dependent and is allowed a deduction under section 151 with respect to Student C in computing the parent's 2003 Federal income tax. Student C is not entitled to a deduction under section 221 for the \$750 of interest paid in 2003. Because Student C's parent was not legally obligated to make the payments, Student C's parent also is not entitled to a deduction for the interest.

(3) *Married taxpayers.* If a taxpayer is married as of the close of a taxable year, he or she is entitled to a deduction under this section only if the taxpayer and the taxpayer's spouse file a joint return for that taxable year.

(4) *Payments of interest by a third party—(i) In general.* If a third party who is not legally obligated to make a payment of interest on a qualified education loan makes a payment of interest on behalf of a taxpayer who is legally obligated to make the payment, then the taxpayer is treated as receiving the payment from the third party and, in turn, paying the interest.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (b)(4):

Example 1. Payment by employer. Student D obtains a qualified education loan to attend college. Upon Student D's graduation from college, Student D works as an intern for a non-profit organization during which time Student D's loan is in deferment and Student D makes no interest payments. As part of the internship program, the non-profit organization makes an interest payment on behalf of Student D after the deferment period.

This payment is not excluded from Student D's income under section 108(f) and is treated as additional compensation includible in Student D's gross income. Assuming fulfillment of all other requirements of section 221, Student D may deduct this payment of interest for Federal income tax purposes.

Example 2. Payment by parent. Student E obtains a qualified education loan to attend college. Upon graduation from college, Student E makes legally required monthly payments of principal and interest. Student E's mother makes a required monthly payment of interest as a gift to Student E. A deduction for Student E as a dependent is not allowed on another taxpayer's tax return for that taxable year. Assuming fulfillment of all other requirements of section 221, Student E may deduct this payment of interest for Federal income tax purposes.

(c) *Maximum deduction.* The amount allowed as a deduction under section 221 for any taxable year may not exceed \$2,500.

(d) *Limitation based on modified adjusted gross income—(1) In general.* The deduction allowed under section 221 is phased out ratably for taxpayers with modified adjusted gross income between \$50,000 and \$65,000 (\$100,000 and \$130,000 for married individuals who file a joint return). Section 221 does not allow a deduction for taxpayers with modified adjusted gross income of \$65,000 or above (\$130,000 or above for married individuals who file a joint return). See paragraph (d)(3) of this section for inflation adjustment of amounts in this paragraph (d)(1).

(2) *Modified adjusted gross income defined.* The term *modified adjusted gross income* means the adjusted gross income (as defined in section 62) of the taxpayer for the taxable year increased by any amount excluded from gross income under section 911, 931, or 933 (relating to income earned abroad or from certain United States possessions or Puerto Rico). Modified adjusted gross income must be determined under this section after taking into account the inclusions, exclusions, deductions, and limitations provided by sections 86 (social security and tier 1 railroad retirement benefits), 135 (redemption of qualified United States savings bonds), 137 (adoption assistance programs), 219

(deductible qualified retirement contributions), and 469 (limitation on passive activity losses and credits), but before taking into account the deductions provided by sections 221 and 222 (qualified tuition and related expenses).

(3) *Inflation adjustment.* For taxable years beginning after 2002, the amounts in paragraph (d)(1) of this section will be increased for inflation occurring after 2001 in accordance with section 221(f)(1). If any amount adjusted under section 221(f)(1) is not a multiple of \$5,000, the amount will be rounded to the next lowest multiple of \$5,000.

(e) *Definitions*—(1) *Eligible educational institution.* In general, an *eligible educational institution* means any college, university, vocational school, or other postsecondary educational institution described in section 481 of the Higher Education Act of 1965 (20 U.S.C. 1088), as in effect on August 5, 1997, and certified by the U.S. Department of Education as eligible to participate in student aid programs administered by the Department, as described in section 25A(f)(2) and § 1.25A-2(b). For purposes of this section, an eligible educational institution also includes an institution that conducts an internship or residency program leading to a degree or certificate awarded by an institution, a hospital, or a health care facility that offers postgraduate training.

(2) *Qualified higher education expenses*—(i) *In general.* *Qualified higher education expenses* means the cost of attendance (as defined in section 472 of the Higher Education Act of 1965, 20 U.S.C. 108711, as in effect on August 4, 1997), at an eligible educational institution, reduced by the amounts described in paragraph (e)(2)(ii) of this section. Consistent with section 472 of the Higher Education Act of 1965, a student's cost of attendance is determined by the eligible educational institution and includes tuition and fees normally assessed a student carrying the same academic workload as the student, an allowance for room and board, and an allowance for books, supplies, transportation, and miscellaneous expenses of the student.

(ii) *Reductions.* Qualified higher education expenses are reduced by any amount that is paid to or on behalf of

a student with respect to such expenses and that is—

(A) A qualified scholarship that is excludable from income under section 117;

(B) An educational assistance allowance for a veteran or member of the armed forces under chapter 30, 31, 32, 34 or 35 of title 38, United States Code, or under chapter 1606 of title 10, United States Code;

(C) Employer-provided educational assistance that is excludable from income under section 127;

(D) Any other amount that is described in section 25A(g)(2)(C) (relating to amounts excludable from gross income as educational assistance);

(E) Any otherwise includible amount excluded from gross income under section 135 (relating to the redemption of United States savings bonds);

(F) Any otherwise includible amount distributed from a Coverdell education savings account and excluded from gross income under section 530(d)(2); or

(G) Any otherwise includible amount distributed from a qualified tuition program and excluded from gross income under section 529(c)(3)(B).

(3) *Qualified education loan*—(i) *In general.* A *qualified education loan* means indebtedness incurred by a taxpayer solely to pay qualified higher education expenses that are—

(A) Incurred on behalf of a student who is the taxpayer, the taxpayer's spouse, or a dependent (as defined in section 152) of the taxpayer at the time the taxpayer incurs the indebtedness;

(B) Attributable to education provided during an academic period, as described in section 25A and the regulations thereunder, when the student is an eligible student as defined in section 25A(b)(3) (requiring that the student be a degree candidate carrying at least half the normal full-time workload); and

(C) Paid or incurred within a reasonable period of time before or after the taxpayer incurs the indebtedness.

(ii) *Reasonable period.* Except as otherwise provided in this paragraph (e)(3)(ii), what constitutes a reasonable period of time for purposes of paragraph (e)(3)(i)(C) of this section generally is determined based on all the

relevant facts and circumstances. However, qualified higher education expenses are treated as paid or incurred within a reasonable period of time before or after the taxpayer incurs the indebtedness if—

(A) The expenses are paid with the proceeds of education loans that are part of a Federal postsecondary education loan program; or

(B) The expenses relate to a particular academic period and the loan proceeds used to pay the expenses are disbursed within a period that begins 90 days prior to the start of that academic period and ends 90 days after the end of that academic period.

(iii) *Related party.* A qualified education loan does not include any indebtedness owed to a person who is related to the taxpayer, within the meaning of section 267(b) or 707(b)(1). For example, a parent or grandparent of the taxpayer is a related person. In addition, a qualified education loan does not include a loan made under any qualified employer plan as defined in section 72(p)(4) or under any contract referred to in section 72(p)(5).

(iv) *Federal issuance or guarantee not required.* A loan does not have to be issued or guaranteed under a Federal postsecondary education loan program to be a qualified education loan.

(v) *Refinanced and consolidated indebtedness—(A) In general.* A qualified education loan includes indebtedness incurred solely to refinance a qualified education loan. A qualified education loan includes a single, consolidated indebtedness incurred solely to refinance two or more qualified education loans of a borrower.

(B) *Treatment of refinanced and consolidated indebtedness.* [Reserved]

(4) *Examples.* The following examples illustrate the rules of this paragraph (e):

Example 1. Eligible educational institution. University F is a postsecondary educational institution described in section 481 of the Higher Education Act of 1965. The U.S. Department of Education has certified that University F is eligible to participate in federal financial aid programs administered by that Department, although University F chooses not to participate. University F is an eligible educational institution.

Example 2. Qualified higher education expenses. Student G receives a \$3,000 qualified

scholarship for the 2003 fall semester that is excludable from Student G's gross income under section 117. Student G receives no other forms of financial assistance with respect to the 2003 fall semester. Student G's cost of attendance for the 2003 fall semester, as determined by Student G's eligible educational institution for purposes of calculating a student's financial need in accordance with section 472 of the Higher Education Act, is \$16,000. For the 2003 fall semester, Student G has qualified higher education expenses of \$13,000 (the cost of attendance as determined by the institution (\$16,000) reduced by the qualified scholarship proceeds excludable from gross income (\$3,000)).

Example 3. Qualified education loan. Student H borrows money from a commercial bank to pay qualified higher education expenses related to his enrollment on a half-time basis in a graduate program at an eligible educational institution. Student H uses all the loan proceeds to pay qualified higher education expenses incurred within a reasonable period of time after incurring the indebtedness. The loan is not federally guaranteed. The commercial bank is not related to Student H within the meaning of section 267(b) or 707(b)(1). Student H's loan is a qualified education loan within the meaning of section 221.

Example 4. Qualified education loan. Student I signs a promissory note for a loan on August 15, 2003, to pay for qualified higher education expenses for the 2003 fall and 2004 spring semesters. On August 20, 2003, the lender disburses loan proceeds to Student I's college. The college credits them to Student I's account to pay qualified higher education expenses for the 2003 fall semester, which begins on August 25, 2003. On January 26, 2004, the lender disburses additional loan proceeds to Student I's college. The college credits them to Student I's account to pay qualified higher education expenses for the 2004 spring semester, which began on January 12, 2004. Student I's qualified higher education expenses for the two semesters are paid within a reasonable period of time, as the first loan disbursement occurred within the 90 days prior to the start of the fall 2003 semester and the second loan disbursement occurred during the spring 2004 semester.

Example 5. Qualified education loan. The facts are the same as in *Example 4* except that in 2005 the college is not an eligible educational institution because it loses its eligibility to participate in certain federal financial aid programs administered by the U.S. Department of Education. The qualification of Student I's loan, which was used to pay for qualified higher education expenses for the 2003 fall and 2004 spring semesters, as a qualified education loan is not affected by the college's subsequent loss of eligibility.

Example 6. Mixed-use loans. Student J signs a promissory note for a loan secured by Student J's personal residence. Student J will use part of the loan proceeds to pay for certain improvements to Student J's residence and part of the loan proceeds to pay qualified higher education expenses of Student J's spouse. Because Student J obtains the loan not solely to pay qualified higher education expenses, the loan is not a qualified education loan.

(f) *Interest*—(1) *In general.* Amounts paid on a qualified education loan are deductible under section 221 if the amounts are interest for Federal income tax purposes. For example, interest includes—

(i) Qualified stated interest (as defined in § 1.1273-1(c)); and

(ii) Original issue discount, which generally includes capitalized interest. For purposes of section 221, capitalized interest means any accrued and unpaid interest on a qualified education loan that, in accordance with the terms of the loan, is added by the lender to the outstanding principal balance of the loan.

(2) *Operative rules for original issue discount*—(i) *In general.* The rules to determine the amount of original issue discount on a loan and the accruals of the discount are in sections 163(e), 1271 through 1275, and the regulations thereunder. In general, original issue discount is the excess of a loan's stated redemption price at maturity (all payments due under the loan other than qualified stated interest payments) over its issue price (the amount loaned). Although original issue discount generally is deductible as it accrues under section 163(e) and § 1.163-7, original issue discount on a qualified education loan is not deductible until paid. See paragraph (f)(3) of this section to determine when original issue discount is paid.

(ii) *Treatment of loan origination fees by the borrower.* If a loan origination fee is paid by the borrower other than for property or services provided by the lender, the fee reduces the issue price of the loan, which creates original issue discount (or additional original issue discount) on the loan in an amount equal to the fee. See § 1.1273-2(g). For an example of how a loan origination fee is taken into account,

see *Example 2* of paragraph (f)(4) of this section.

(3) *Allocation of payments.* See §§ 1.446-2(e) and 1.1275-2(a) for rules on allocating payments between interest and principal. In general, these rules treat a payment first as a payment of interest to the extent of the interest that has accrued and remains unpaid as of the date the payment is due, and second as a payment of principal. The characterization of a payment as either interest or principal under these rules applies regardless of how the parties label the payment (either as interest or principal). Accordingly, the taxpayer may deduct the portion of a payment labeled as principal that these rules treat as a payment of interest on the loan, including any portion attributable to capitalized interest or loan origination fees.

(4) *Examples.* The following examples illustrate the rules of this paragraph (f). In the examples, assume that the institution the student attends is an eligible educational institution, the loan is a qualified education loan, the student is legally obligated to make interest payments under the terms of the loan, and any other applicable requirements, if not otherwise specified, are fulfilled. The examples are as follows:

Example 1. Capitalized interest. Interest on Student K's loan accrues while Student K is in school, but Student K is not required to make any payments on the loan until six months after he graduates or otherwise leaves school. At that time, the lender capitalizes all accrued but unpaid interest and adds it to the outstanding principal amount of the loan. Thereafter, Student K is required to make monthly payments of interest and principal on the loan. The interest payable on the loan, including the capitalized interest, is original issue discount. See section 1273 and the regulations thereunder. Therefore, in determining the total amount of interest paid on the loan each taxable year, Student K may deduct any payments that § 1.1275-2(a) treats as payments of interest, including any principal payments that are treated as payments of capitalized interest. See paragraph (f)(3) of this section.

Example 2. Allocation of payments. The facts are the same as in *Example 1*, except that, in addition, the lender charges Student K a loan origination fee, which is not for any property or services provided by the lender. Under § 1.1273-2(g), the loan origination fee reduces the issue price of the loan, which reduction increases the amount of original

issue discount on the loan by the amount of the fee. The amount of original issue discount (which includes the capitalized interest and loan origination fee) that accrues each year is determined under section 1272 and § 1.1272-1. In effect, the loan origination fee accrues over the entire term of the loan. Because the loan has original issue discount, the payment ordering rules in § 1.1275-2(a) must be used to determine how much of each payment is interest for federal tax purposes. See paragraph (f)(3) of this section. Under § 1.1275-2(a), each payment (regardless of its designation by the parties as either interest or principal) generally is treated first as a payment of original issue discount, to the extent of the original issue discount that has accrued as of the date the payment is due and has not been allocated to prior payments, and second as a payment of principal. Therefore, in determining the total amount of interest paid on the qualified education loan for a taxable year, Student K may deduct any payments that the parties label as principal but that are treated as payments of original issue discount under § 1.1275-2(a).

(g) *Additional Rules*—(1) *Payment of interest made during period when interest payment not required.* Payments of interest on a qualified education loan to which this section is applicable are deductible even if the payments are made during a period when interest payments are not required because, for example, the loan has not yet entered repayment status or is in a period of deferment or forbearance.

(2) *Denial of double benefit.* No deduction is allowed under this section for any amount for which a deduction is allowable under another provision of Chapter 1 of the Internal Revenue Code. No deduction is allowed under this section for any amount for which an exclusion is allowable under section 108(f) (relating to cancellation of indebtedness).

(3) *Examples.* The following examples illustrate the rules of this paragraph (g). In the examples, assume that the institution the student attends is an eligible educational institution, the loan is a qualified education loan, and the student is legally obligated to make interest payments under the terms of the loan:

Example 1. Voluntary payment of interest before loan has entered repayment status. Student L obtains a loan to attend college. The terms of the loan provide that interest accrues on the loan while Student L earns his undergraduate degree but that Student L is

not required to begin making payments of interest until six full calendar months after he graduates or otherwise leaves school. Nevertheless, Student L voluntarily pays interest on the loan during 2003, while enrolled in college. Assuming all other relevant requirements are met, Student L is allowed a deduction for interest paid while attending college even though the payments were made before interest payments were required.

Example 2. Voluntary payment during period of deferment or forbearance. The facts are the same as in *Example 2*, except that Student L makes no payments on the loan while enrolled in college. Student L graduates in June 2003 and begins making monthly payments of principal and interest on the loan in January 2004, as required by the terms of the loan. In August 2004, Student L enrolls in graduate school on a full-time basis. Under the terms of the loan, Student L may apply for deferment of the loan payments while Student L is enrolled in graduate school. Student L applies for and receives a deferment on the outstanding loan. However, Student L continues to make some monthly payments of interest during graduate school. Student L may deduct interest paid on the loan during the period beginning in January 2004, including interest paid while Student L is enrolled in graduate school.

(h) *Effective date.* This section is applicable to periods governed by section 221 as amended in 2001, which relates to interest paid on a qualified education loan after December 31, 2001, in taxable years ending after December 31, 2001, and on or before December 31, 2010.

[T.D. 9125, 69 FR 25492, May 7, 2004]

§ 1.221-2 Deduction for interest due and paid on qualified education loans before January 1, 2002.

(a) *In general.* Under section 221, an individual taxpayer may deduct from gross income certain interest due and paid by the taxpayer during the taxable year on a qualified education loan. The deduction is allowed only with respect to interest due and paid on a qualified education loan during the first 60 months that interest payments are required under the terms of the loan. See paragraph (e) of this section for rules relating to the 60-month rule. See paragraph (b)(4) of this section for rules on payments of interest by third parties. The rules of this section are applicable to interest due and paid on qualified education loans after January 21, 1999, if paid before January 1, 2002. Taxpayers also may apply the rules of

this section to interest due and paid on qualified education loans after December 31, 1997, but before January 21, 1999. To the extent that the effective date limitation ("sunset") of the 2001 amendment remains in force unchanged, section 221 before amendment in 2001, to which this section relates, also applies to interest due and paid on qualified education loans in taxable years beginning after December 31, 2010. For rules applicable to periods governed by section 221 as amended in 2001, which relates to deductions for interest paid on qualified education loans after December 31, 2001, in taxable years ending after December 31, 2001, and before January 1, 2011, see § 1.221-1.

(b) *Eligibility*—(1) *Taxpayer must have a legal obligation to make interest payments.* A taxpayer is entitled to a deduction under section 221 only if the taxpayer has a legal obligation to make interest payments under the terms of the qualified education loan.

(2) *Claimed dependents not eligible*—(i) *In general.* An individual is not entitled to a deduction under section 221 for a taxable year if the individual is a dependent (as defined in section 152) for whom another taxpayer is allowed a deduction under section 151 on a Federal income tax return for the same taxable year (or, in the case of a fiscal year taxpayer, the taxable year beginning in the same calendar year as the individual's taxable year).

(ii) *Examples.* The following examples illustrate the rules of this paragraph (b)(2):

Example 1. Student not claimed as dependent. Student A pays \$750 of interest on qualified education loans during 1998. Student A's parents are not allowed a deduction for her as a dependent for 1998. Assuming fulfillment of all other relevant requirements, Student A may deduct the \$750 of interest paid in 1998 under section 221.

Example 2. Student claimed as dependent. Student B pays \$750 of interest on qualified education loans during 1998. Only Student B has the legal obligation to make the payments. Student B's parent claims him as a dependent and is allowed a deduction under section 151 with respect to Student B in computing the parent's 1998 Federal income tax. Student B may not deduct the \$750 of interest paid in 1998 under section 221. Because Student B's parent was not legally obligated to make the payments, Student B's parent also may not deduct the interest.

(3) *Married taxpayers.* If a taxpayer is married as of the close of a taxable year, he or she is entitled to a deduction under this section only if the taxpayer and the taxpayer's spouse file a joint return for that taxable year.

(4) *Payments of interest by a third party*—(i) *In general.* If a third party who is not legally obligated to make a payment of interest on a qualified education loan makes a payment of interest on behalf of a taxpayer who is legally obligated to make the payment, then the taxpayer is treated as receiving the payment from the third party and, in turn, paying the interest.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (b)(4):

Example 1. Payment by employer. Student C obtains a qualified education loan to attend college. Upon Student C's graduation from college, Student C works as an intern for a non-profit organization during which time Student C's loan is in deferment and Student C makes no interest payments. As part of the internship program, the non-profit organization makes an interest payment on behalf of Student C after the deferment period. This payment is not excluded from Student C's income under section 108(f) and is treated as additional compensation includible in Student C's gross income. Assuming fulfillment of all other requirements of section 221, Student C may deduct this payment of interest for Federal income tax purposes.

Example 2. Payment by parent. Student D obtains a qualified education loan to attend college. Upon graduation from college, Student D makes legally required monthly payments of principal and interest. Student D's mother makes a required monthly payment of interest as a gift to Student D. A deduction for Student D as a dependent is not allowed on another taxpayer's tax return for that taxable year. Assuming fulfillment of all other requirements of section 221, Student D may deduct this payment of interest for Federal income tax purposes.

(c) *Maximum deduction.* In any taxable year beginning before January 1, 2002, the amount allowed as a deduction under section 221 may not exceed the amount determined in accordance with the following table:

Taxable year beginning in	Maximum deduction
1998	\$1,000
1999	1,500
2000	2,000
2001	2,500

(d) *Limitation based on modified adjusted gross income*—(1) *In general.* The deduction allowed under section 221 is phased out ratably for taxpayers with modified adjusted gross income between \$40,000 and \$55,000 (\$60,000 and \$75,000 for married individuals who file a joint return). Section 221 does not allow a deduction for taxpayers with modified adjusted gross income of \$55,000 or above (\$75,000 or above for married individuals who file a joint return).

(2) *Modified adjusted gross income defined.* The term *modified adjusted gross income* means the adjusted gross income (as defined in section 62) of the taxpayer for the taxable year increased by any amount excluded from gross income under section 911, 931, or 933 (relating to income earned abroad or from certain United States possessions or Puerto Rico). Modified adjusted gross income must be determined under this section after taking into account the inclusions, exclusions, deductions, and limitations provided by sections 86 (social security and tier 1 railroad retirement benefits), 135 (redemption of qualified United States savings bonds), 137 (adoption assistance programs), 219 (deductible qualified retirement contributions), and 469 (limitation on passive activity losses and credits), but before taking into account the deduction provided by section 221.

(e) *60-month rule*—(1) *In general.* A deduction for interest paid on a qualified education loan is allowed only for payments made during the first 60 months that interest payments are required on the loan. The 60-month period begins on the first day of the month that includes the date on which interest payments are first required and ends 60 months later, unless the 60-month period is suspended for periods of deferment or forbearance within the meaning of paragraph (e)(3) of this section. The 60-month period continues to run regardless of whether the required interest payments are actually made. The date on which the first interest payment is required is determined under the terms of the loan agreement or, in the case of a loan issued or guaranteed under a federal postsecondary education loan program (such as loan programs under title IV of the Higher

Education Act of 1965 (20 U.S.C. 1070) and titles VII and VIII of the Public Health Service Act (42 U.S.C. 292., and 42 U.S.C. 296)) under applicable Federal regulations. For a discussion of interest, see paragraph (h) of this section. For special rules relating to loan refinancings, consolidated loans, and collapsed loans, see paragraph (i) of this section.

(2) *Loans that entered repayment status prior to January 1, 1998.* In the case of any qualified education loan that entered repayment status prior to January 1, 1998, section 221 allows no deduction for interest paid during the portion of the 60-month period described in paragraph (e)(1) of this section that occurred prior to January 1, 1998. Section 221 allows a deduction only for interest due and paid during that portion, if any, of the 60-month period remaining after December 31, 1997.

(3) *Periods of deferment or forbearance.* The 60-month period described in paragraph (e)(1) of this section generally is suspended for any period when interest payments are not required on a qualified education loan because the lender has granted the taxpayer a period of deferment or forbearance (including postponement in anticipation of cancellation). However, in the case of a qualified education loan that is not issued or guaranteed under a Federal postsecondary education loan program, the 60-month period will be suspended under this paragraph (e)(3) only if the promissory note contains conditions substantially similar to the conditions for deferment or forbearance established by the U.S. Department of Education for Federal student loan programs under title IV of the Higher Education Act of 1965, such as half-time study at a postsecondary educational institution, study in an approved graduate fellowship program or in an approved rehabilitation program for the disabled, inability to find full-time employment, economic hardship, or the performance of services in certain occupations or federal programs, and the borrower satisfies one of those conditions. For any qualified education loan, the 60-month period is not suspended if under the terms of the loan interest continues to accrue while the loan is in deferment or forbearance and either—

(i) In the case of deferment, the taxpayer agrees to pay interest currently during the deferment period; or

(ii) In the case of forbearance, the taxpayer agrees to make reduced payments, or payments of interest only, during the forbearance period.

(4) *Late payments.* A deduction is allowed for a payment of interest required in one month but actually made in a subsequent month prior to the expiration of the 60-month period. A deduction is not allowed for a payment of interest required in one month but actually made in a subsequent month after the expiration of the 60-month period. A late payment made during a period of deferment or forbearance is treated, solely for purposes of determining whether it is made during the 60-month period, as made on the date it is due.

(5) *Examples.* The following examples illustrate the rules of this paragraph (e). In the examples, assume that the institution the student attends is an eligible educational institution, the loan is a qualified education loan and is issued or guaranteed under a federal postsecondary education loan program, the student is legally obligated to make interest payments under the terms of the loan, the interest payments occur after December 31, 1997, but before January 1, 2002, and with respect to any period after December 31, 1997, but before January 21, 1999, the taxpayer elects to apply the rules of this section. The examples are as follows:

Example 1. Payment prior to 60-month period. Student E obtains a loan to attend college. The terms of the loan provide that interest accrues on the loan while Student E earns his undergraduate degree but that Student E is not required to begin making payments of interest until six full calendar months after he graduates. Nevertheless, Student E voluntarily pays interest on the loan while attending college. Student E is not allowed a deduction for interest paid during that period, because those payments were made prior to the start of the 60-month period. Similarly, Student E would not be allowed a deduction for any interest paid during the six month grace period after graduation when interest payments are not required.

Example 2. Deferment option not exercised. The facts are the same as in *Example 1* except that Student E makes no payments on the loan while enrolled in college. Student E

graduates in June 1999, and is required to begin making monthly payments of principal and interest on the loan in January 2000. The 60-month period described in paragraph (e)(1) of this section begins in January 2000. In August 2000, Student E enrolls in graduate school on a full-time basis. Under the terms of the loan, Student E may apply for deferment of the loan payments while enrolled in graduate school. However, Student E elects not to apply for deferment and continues to make required monthly payments on the loan during graduate school. Assuming fulfillment of all other relevant requirements, Student E may deduct interest paid on the loan during the 60-month period beginning in January 2000, including interest paid while enrolled in graduate school.

Example 3. Late payment, within 60-month period. The facts are the same as in *Example 2* except that, after the loan enters repayment status in January 2000, Student E makes no interest payments until March 2000. In March 2000, Student E pays interest required for the months of January, February, and March 2000. Assuming fulfillment of all other relevant requirements, Student E may deduct the interest paid in March for the months of January, February, and March because the interest payments are required under the terms of the loan and are paid within the 60-month period, even though the January and February interest payments may be late.

Example 4. Late payment during deferment but within 60-month period. The terms of Student F's loan require her to begin making monthly payments of interest on the loan in January 2000. The 60-month period described in paragraph (e)(1) of this section begins in January 2000. Student F fails to make the required interest payments for the months of November and December 2000. In January 2001, Student F enrolls in graduate school on a half-time basis. Under the terms of the loan, Student F obtains a deferment of the loan payments due while enrolled in graduate school. The deferment becomes effective January 1, 2001. In March 2001, while the loan is in deferment, Student F pays the interest due for the months of November and December 2000. Assuming fulfillment of all other relevant requirements, Student F may deduct interest paid in March 2001, for the months of November and December 2000, because the late interest payments are treated, solely for purposes of determining whether they were made during the 60-month period, as made in November and December 2000.

Example 5. 60-month period. The terms of Student G's loan require him to begin making monthly payments of interest on the loan in November 1999. The 60-month period described in paragraph (e)(1) of this section begins in November 1999. In January 2000, Student G enrolls in graduate school on a half-time basis. As permitted under the

terms of the loan, Student G applies for deferment of the loan payments due while enrolled in graduate school. While awaiting formal approval from the lender of his request for deferment, Student G pays interest due for the month of January 2000. In February 2000, the lender approves Student G's request for deferment, effective as of January 1, 2000. Assuming fulfillment of all other relevant requirements, Student G may deduct interest paid in January 2000, prior to his receipt of the lender's approval, even though the deferment was retroactive to January 1, 2000. As of February 2000, there are 57 months remaining in the 60-month period for that loan. Because Student G is not required to make interest payments during the period of deferment, the 60-month period is suspended. After January 2000, Student G may not deduct any voluntary payments of interest made during the period of deferment.

Example 6. 60-month period. The terms of Student H's loan require her to begin making monthly payments of interest on the loan in November 1999. The 60-month period described in paragraph (e)(1) of this section begins in November 1999. In January 2000, Student H enrolls in graduate school on a half-time basis. As permitted under the terms of the loan, Student H applies to make reduced payments of principal and interest while enrolled in graduate school. After the lender approves her application, Student H pays principal and interest due for the month of January 2000 at the reduced rate. Assuming fulfillment of all other relevant requirements, Student H may deduct interest paid in January 2000. As of February 2000, there are 57 months remaining in the 60-month period for that loan.

Example 7. Reduction of 60-month period for months prior to January 1, 1998. The first payment of interest on a loan is due in January 1997. Thereafter, interest payments are required on a monthly basis. The 60-month period described in paragraph (e)(1) of this section for this loan begins on January 1, 1997, the first day of the month that includes the date on which the first interest payment is required. However, the borrower may not deduct interest paid prior to January 1, 1998, under the effective date provisions of section 221. Assuming fulfillment of all other relevant requirements, the borrower may deduct interest due and paid on the loan during the 48 months beginning on January 1, 1998 (unless such period is extended for periods of deferment or forbearance under paragraph (e)(3) of this section).

(f) *Definitions*—(1) *Eligible educational institution.* In general, an *eligible educational institution* means any college, university, vocational school, or other post-secondary educational institution

described in section 481 of the Higher Education Act of 1965, 20 U.S.C. 1088, as in effect on August 5, 1997, and certified by the U.S. Department of Education as eligible to participate in student aid programs administered by the Department, as described in section 25A(f)(2) and § 1.25A-2(b). For purposes of this section, an eligible educational institution also includes an institution that conducts an internship or residency program leading to a degree or certificate awarded by an institution, a hospital, or a health care facility that offers postgraduate training.

(2) *Qualified higher education expenses*—(i) *In general.* *Qualified higher education expenses* means the cost of attendance (as defined in section 472 of the Higher Education Act of 1965, 20 U.S.C. 108711, as in effect on August 4, 1997), at an eligible educational institution, reduced by the amounts described in paragraph (f)(2)(ii) of this section. Consistent with section 472 of the Higher Education Act of 1965, a student's cost of attendance is determined by the eligible educational institution and includes tuition and fees normally assessed a student carrying the same academic workload as the student, an allowance for room and board, and an allowance for books, supplies, transportation, and miscellaneous expenses of the student.

(ii) *Reductions.* Qualified higher education expenses are reduced by any amount that is paid to or on behalf of a student with respect to such expenses and that is—

(A) A qualified scholarship that is excludable from income under section 117;

(B) An educational assistance allowance for a veteran or member of the armed forces under chapter 30, 31, 32, 34 or 35 of title 38, United States Code, or under chapter 1606 of title 10, United States Code;

(C) Employer-provided educational assistance that is excludable from income under section 127;

(D) Any other amount that is described in section 25A(g)(2)(C) (relating to amounts excludable from gross income as educational assistance);

(E) Any otherwise includible amount excluded from gross income under section 135 (relating to the redemption of United States savings bonds); or

(F) Any otherwise includible amount distributed from a Coverdell education savings account and excluded from gross income under section 530(d)(2).

(3) *Qualified education loan*—(i) *In general.* A *qualified education loan* means indebtedness incurred by a taxpayer solely to pay qualified higher education expenses that are—

(A) Incurred on behalf of a student who is the taxpayer, the taxpayer's spouse, or a dependent (as defined in section 152) of the taxpayer at the time the taxpayer incurs the indebtedness;

(B) Attributable to education provided during an academic period, as described in section 25A and the regulations thereunder, when the student is an eligible student as defined in section 25A(b)(3) (requiring that the student be a degree candidate carrying at least half the normal full-time workload); and

(C) Paid or incurred within a reasonable period of time before or after the taxpayer incurs the indebtedness.

(i) *Reasonable period.* Except as otherwise provided in this paragraph (f)(3)(ii), what constitutes a reasonable period of time for purposes of paragraph (f)(3)(i)(C) of this section generally is determined based on all the relevant facts and circumstances. However, qualified higher education expenses are treated as paid or incurred within a reasonable period of time before or after the taxpayer incurs the indebtedness if—

(A) The expenses are paid with the proceeds of education loans that are part of a federal postsecondary education loan program; or

(B) The expenses relate to a particular academic period and the loan proceeds used to pay the expenses are disbursed within a period that begins 90 days prior to the start of that academic period and ends 90 days after the end of that academic period.

(iii) *Related party.* A qualified education loan does not include any indebtedness owed to a person who is related to the taxpayer, within the meaning of section 267(b) or 707(b)(1). For example, a parent or grandparent of the

taxpayer is a related person. In addition, a qualified education loan does not include a loan made under any qualified employer plan as defined in section 72(p)(4) or under any contract referred to in section 72(p)(5).

(iv) *Federal issuance or guarantee not required.* A loan does not have to be issued or guaranteed under a federal postsecondary education loan program to be a qualified education loan.

(v) *Refinanced and consolidated indebtedness*—(A) *In general.* A qualified education loan includes indebtedness incurred solely to refinance a qualified education loan. A qualified education loan includes a single, consolidated indebtedness incurred solely to refinance two or more qualified education loans of a borrower.

(B) *Treatment of refinanced and consolidated indebtedness.* [Reserved]

(4) *Examples.* The following examples illustrate the rules of this paragraph (f):

Example 1. Eligible educational institution. University J is a postsecondary educational institution described in section 481 of the Higher Education Act of 1965. The U.S. Department of Education has certified that University J is eligible to participate in federal financial aid programs administered by that Department, although University J chooses not to participate. University J is an eligible educational institution.

Example 2. Qualified higher education expenses. Student K receives a \$3,000 qualified scholarship for the 1999 fall semester that is excludable from Student K's gross income under section 117. Student K receives no other forms of financial assistance with respect to the 1999 fall semester. Student K's cost of attendance for the 1999 fall semester, as determined by Student K's eligible educational institution for purposes of calculating a student's financial need in accordance with section 472 of the Higher Education Act, is \$16,000. For the 1999 fall semester, Student K has qualified higher education expenses of \$13,000 (the cost of attendance as determined by the institution (\$16,000) reduced by the qualified scholarship proceeds excludable from gross income (\$3,000)).

Example 3. Qualified education loan. Student L borrows money from a commercial bank to pay qualified higher education expenses related to his enrollment on a half-time basis in a graduate program at an eligible educational institution. Student L uses all the loan proceeds to pay qualified higher education expenses incurred within a reasonable period of time after incurring the indebtedness. The loan is not federally guaranteed.

The commercial bank is not related to Student L within the meaning of section 267(b) or 707(b)(1). Student L's loan is a qualified education loan within the meaning of section 221.

Example 4. Qualified education loan. Student M signs a promissory note for a loan on August 15, 1999, to pay for qualified higher education expenses for the 1999 fall and 2000 spring semesters. On August 20, 1999, the lender disburses loan proceeds to Student M's college. The college credits them to Student M's account to pay qualified higher education expenses for the 1999 fall semester, which begins on August 23, 1999. On January 25, 2000, the lender disburses additional loan proceeds to Student M's college. The college credits them to Student M's account to pay qualified higher education expenses for the 2000 spring semester, which began on January 10, 2000. Student M's qualified higher education expenses for the two semesters are paid within a reasonable period of time, as the first loan disbursement occurred within the 90 days prior to the start of the fall 1999 semester, and the second loan disbursement occurred during the spring 2000 semester.

Example 5. Qualified education loan. The facts are the same as in *Example 4*, except that in 2001 the college is not an eligible educational institution because it loses its eligibility to participate in certain federal financial aid programs administered by the U.S. Department of Education. The qualification of Student M's loan, which was used to pay for qualified higher education expenses for the 1999 fall and 2000 spring semesters, as a qualified education loan is not affected by the college's subsequent loss of eligibility.

Example 6. Mixed-use loans. Student N signs a promissory note for a loan that is secured by Student N's personal residence. Student N will use part of the loan proceeds to pay for certain improvements to Student N's residence and part of the loan proceeds to pay qualified higher education expenses of Student N's spouse. Because Student N obtains the loan not solely to pay qualified higher education expenses, the loan is not a qualified education loan.

(g) *Denial of double benefit.* No deduction is allowed under this section for any amount for which a deduction is allowable under another provision of Chapter 1 of the Internal Revenue Code. No deduction is allowed under this section for any amount for which an exclusion is allowable under section 108(f) (relating to cancellation of indebtedness).

(h) *Interest*—(1) *In general.* Amounts paid on a qualified education loan are deductible under section 221 if the amounts are interest for Federal in-

come tax purposes. For example, interest includes—

(i) Qualified stated interest (as defined in § 1.1273-1(c)); and

(ii) Original issue discount, which generally includes capitalized interest. For purposes of section 221, capitalized interest means any accrued and unpaid interest on a qualified education loan that, in accordance with the terms of the loan, is added by the lender to the outstanding principal balance of the loan.

(2) *Operative rules for original issue discount*—(i) *In general.* The rules to determine the amount of original issue discount on a loan and the accruals of the discount are in sections 163(e), 1271 through 1275, and the regulations thereunder. In general, original issue discount is the excess of a loan's stated redemption price at maturity (all payments due under the loan other than qualified stated interest payments) over its issue price (the amount loaned). Although original issue discount generally is deductible as it accrues under section 163(e) and § 1.163-7, original issue discount on a qualified education loan is not deductible until paid. See paragraph (h)(3) of this section to determine when original issue discount is paid.

(ii) *Treatment of loan origination fees by the borrower.* If a loan origination fee is paid by the borrower other than for property or services provided by the lender, the fee reduces the issue price of the loan, which creates original issue discount (or additional original issue discount) on the loan in an amount equal to the fee. See § 1.1273-2(g). For an example of how a loan origination fee is taken into account, see *Example 2* of paragraph (h)(4) of this section.

(3) *Allocation of payments.* See §§ 1.446-2(e) and 1.1275-2(a) for rules on allocating payments between interest and principal. In general, these rules treat a payment first as a payment of interest to the extent of the interest that has accrued and remains unpaid as of the date the payment is due, and second as a payment of principal. The characterization of a payment as either interest or principal under these rules applies regardless of how the parties label the payment (either as interest or

principal). Accordingly, the taxpayer may deduct the portion of a payment labeled as principal that these rules treat as a payment of interest on the loan, including any portion attributable to capitalized interest or loan origination fees.

(4) *Examples.* The following examples illustrate the rules of this paragraph (h). In the examples, assume that the institution the student attends is an eligible educational institution, the loan is a qualified education loan, the student is legally obligated to make interest payments under the terms of the loan, and any other applicable requirements, if not otherwise specified, are fulfilled. The examples are as follows:

Example 1. Capitalized interest. Interest on Student O's qualified education loan accrues while Student O is in school, but Student O is not required to make any payments on the loan until six months after he graduates or otherwise leaves school. At that time, the lender capitalizes all accrued but unpaid interest and adds it to the outstanding principal amount of the loan. Thereafter, Student O is required to make monthly payments of interest and principal on the loan. The interest payable on the loan, including the capitalized interest, is original issue discount. Therefore, in determining the total amount of interest paid on the qualified education loan during the 60-month period described in paragraph (e)(1) of this section, Student O may deduct any payments that § 1.1275-2(a) treats as payments of interest, including any principal payments that are treated as payments of capitalized interest. See paragraph (h)(3) of this section.

Example 2. Allocation of payments. The facts are the same as in *Example 1* of this paragraph (h)(4), except that, in addition, the lender charges Student O a loan origination fee, which is not for any property or services provided by the lender. Under § 1.1273-2(g), the loan origination fee reduces the issue price of the loan, which reduction increases the amount of original issue discount on the loan by the amount of the fee. The amount of original issue discount (which includes the capitalized interest and loan origination fee) that accrues each year is determined under section § 1272 and § 1.1272-1. In effect, the loan origination fee accrues over the entire term of the loan. Because the loan has original issue discount, the payment ordering rules in § 1.1275-2(a) must be used to determine how much of each payment is interest for federal tax purposes. See paragraph (h)(3) of this section. Under § 1.1275-2(a), each payment (regardless of its designation by the parties as either interest or principal) generally is treated first as a payment of original issue

discount, to the extent of the original issue discount that has accrued as of the date the payment is due and has not been allocated to prior payments, and second as a payment of principal. Therefore, in determining the total amount of interest paid on the qualified education loan during the 60-month period described in paragraph (e)(1) of this section, Student O may deduct any payments that the parties label as principal but that are treated as payments of original issue discount under § 1.1275-2(a). The 60-month period does not begin in the month in which the lender charges Student O the loan origination fee.

(i) *Special rules regarding 60-month limitation—(1) Refinancing.* A qualified education loan and all indebtedness incurred solely to refinance that loan constitute a single loan for purposes of calculating the 60-month period described in paragraph (e)(1) of this section.

(2) *Consolidated loans.* A consolidated loan is a single loan that refinances more than one qualified education loan of a borrower. For consolidated loans, the 60-month period described in paragraph (e)(1) of this section begins on the latest date on which any of the underlying loans entered repayment status and includes any subsequent month in which the consolidated loan is in repayment status.

(3) *Collapsed loans.* A collapsed loan is two or more qualified education loans of a single taxpayer that constitute a single qualified education loan for loan servicing purposes and for which the lender or servicer does not separately account. For a collapsed loan, the 60-month period described in paragraph (e)(1) of this section begins on the latest date on which any of the underlying loans entered repayment status and includes any subsequent month in which any of the underlying loans is in repayment status.

(4) *Examples.* The following examples illustrate the rules of this paragraph (i):

Example 1. Refinancing. Student P obtains a qualified education loan to pay for an undergraduate degree at an eligible educational institution. After graduation, Student P is required to make monthly interest payments on the loan beginning in January 2000. Student P makes the required interest payments for 15 months. In April 2001, Student P borrows money from another lender exclusively to repay the first qualified education loan.

§ 1.241-1

26 CFR Ch. I (4-1-17 Edition)

The new loan requires interest payments to start immediately. At the time Student P must begin interest payments on the new loan, which is a qualified education loan, there are 45 months remaining of the original 60-month period referred to in paragraph (e)(1) of this section.

Example 2. Collapsed loans. To finance his education, Student Q obtains four separate qualified education loans from Lender R. The loans enter repayment status, and their respective 60-month periods described in paragraph (e)(1) of this section begin, in July, August, September, and December of 1999. After all of Student Q's loans have entered repayment status, Lender R informs Student Q that Lender R will transfer all four loans to Lender S. Following the transfer, Lender S treats the loans as a single loan for loan servicing purposes. Lender S sends Student Q a single statement that shows the total principal and interest, and does not keep separate records with respect to each loan. With respect to the single collapsed loan, the 60-month period described in paragraph (e)(1) of this section begins in December 1999.

(j) *Effective date.* This section is applicable to interest due and paid on qualified education loans after January 21, 1999, if paid before January 1, 2002. Taxpayers also may apply this section to interest due and paid on qualified education loans after December 31, 1997, but before January 21, 1999. This section also applies to interest due and paid on qualified education loans in a taxable year beginning after December 31, 2010.

[T.D. 9125, 69 FR 25492, May 7, 2004]

SPECIAL DEDUCTIONS FOR CORPORATIONS

§ 1.241-1 Allowance of special deductions.

A corporation, in computing its taxable income, is allowed as deductions the items specified in Part VIII (section 242 and following), Subchapter B, Chapter 1 of the Code, in addition to the deductions provided in part VI (section 161 and following) Subchapter B, Chapter 1 of the Code.

§ 1.242-1 Deduction for partially tax-exempt interest.

A corporation is allowed a deduction under section 242(a) in an amount equal to certain interest received on obligations of the United States, or an obligation of corporations organized under Acts of Congress which are instrumen-

talities of the United States. The interest for which a deduction shall be allowed is interest which is included in gross income and which is exempt from normal tax under the act, as amended and supplemented, which authorized the issuance of the obligations. The deduction allowed by section 242(a) is allowed only for the purpose of computing normal tax, and therefore, no deduction is allowed for such interest in the computation of any surtax imposed by Subtitle A of the Internal Revenue Code of 1954.

[T.D. 7100, 36 FR 5333, Mar. 20, 1971]

§ 1.243-1 Deduction for dividends received by corporations.

(a)(1) A corporation is allowed a deduction under section 243 for dividends received from a domestic corporation which is subject to taxation under Chapter 1 of the Internal Revenue Code of 1954.

(2) Except as provided in section 243(c) and in section 246, the deduction is:

(i) For the taxable year, an amount equal to 85 percent of the dividends received from such domestic corporations during the taxable year (other than dividends to which subdivision (ii) or (iii) of this subparagraph applies).

(ii) For a taxable year beginning after September 2, 1958, an amount equal to 100 percent of the dividends received from such domestic corporations if at the time of receipt of such dividends the recipient corporation is a Federal licensee under the Small Business Investment Act of 1958 (15 U.S.C. ch. 14B). However, to claim the deduction provided by section 243(a)(2) the company must file with its return a statement that it was a Federal licensee under the Small Business Investment Act of 1958 at the time of the receipt of the dividends.

(iii) For a taxable year ending after December 31, 1963, an amount equal to 100 percent of the dividends received which are *qualifying dividends*, as defined in section 243(b) and § 1.243-4.

(3) To determine the amount of the distribution to a recipient corporation and the amount of the dividend, see §§ 1.301-1 and 1.316-1.

Internal Revenue Service, Treasury

§ 1.243-3

(b) For limitation on the dividends received deduction, see section 246 and the regulations thereunder.

[T.D. 6992, 34 FR 817, Jan. 18, 1969]

§ 1.243-2 Special rules for certain distributions.

(a) *Dividends paid by mutual savings banks, etc.* In determining the deduction provided in section 243(a), any amount allowed as a deduction under section 591 (relating to deduction for dividends paid by mutual savings banks, cooperative banks, and domestic building and loan associations) shall not be considered as a dividend.

(b) *Dividends received from regulated investment companies.* In determining the deduction provided in section 243(a), dividends received from a regulated investment company shall be subject to the limitations provided in section 854.

(c) *Dividends received from real estate investment trusts.* See section 857(c) and paragraph (d) of §1.857-6 for special rules which deny a deduction under section 243 in the case of dividends received from a real estate investment trust with respect to a taxable year for which such trust is taxable under Part II, Subchapter M, Chapter 1 of the Code.

(d) *Dividends received on preferred stock of a public utility.* The deduction allowed by section 243(a) shall be determined without regard to any dividends described in section 244 (relating to dividends on the preferred stock of a public utility). That is, such deduction shall be determined without regard to any dividends received on the preferred stock of a public utility which is subject to taxation under Chapter 1 of the Code and with respect to which a deduction is allowed by section 247 (relating to dividends paid on certain preferred stock of public utilities). For a deduction with respect to such dividends received on the preferred stock of a public utility, see section 244. If a deduction for dividends paid is not allowable to the distributing corporation under section 247 with respect to the dividends on its preferred stock, such dividends received from a domestic public utility corporation subject to taxation under Chapter 1 of the Code

are includible in determining the deduction allowed by section 243(a).

[T.D. 6598, 27 FR 4092, Apr. 28, 1962, as amended by T.D. 6992, 34 FR 817, Jan. 18, 1969; T.D. 7767, 46 FR 11264, Feb. 6, 1981]

§ 1.243-3 Certain dividends from foreign corporations.

(a) *In general.* (1) In determining the deduction provided in section 243(a), section 243(d) provides that a dividend received from a foreign corporation after December 31, 1959, shall be treated as a dividend from a domestic corporation which is subject to taxation under chapter 1 of the Code, but only to the extent that such dividend is out of earnings and profits accumulated by a domestic corporation during a period with respect to which such domestic corporation was subject to taxation under Chapter 1 of the Code (or corresponding provisions of prior law). Thus, for example, if a domestic corporation accumulates earnings and profits during a period or periods with respect to which it is subject to taxation under Chapter 1 of the Code (or corresponding provisions of prior law) and subsequently such domestic corporation reincorporates in a foreign country, any dividends paid out of such earnings and profits after such reincorporation are eligible for the deduction provided in section 243(a) (1) and (2).

(2) Section 243(d) and this section do not apply to dividends paid out of earnings and profits accumulated (i) by a corporation organized under the China Trade Act, 1922, (ii) by a domestic corporation during any period with respect to which such corporation was exempt from taxation under section 501 (relating to certain charitable, etc. organizations) or 521 (relating to farmers' cooperative associations), or (iii) by a domestic corporation during any period to which section 931 (relating to income from sources within possessions of the United States), as in effect for taxable years beginning before January 1, 1976, applied.

(b) *Establishing separate earnings and profits accounts.* A foreign corporation shall, for purposes of section 243(d), maintain a separate account for earnings and profits to which it succeeds which were accumulated by a domestic

§ 1.243-3

corporation, and such foreign corporation shall treat such earnings and profits as having been accumulated during the accounting periods in which earned by such domestic corporation. Such foreign corporation shall also maintain such a separate account for the earnings and profits, or deficit in earnings and profits, accumulated by it or accumulated by any other corporations to the earnings and profits of which it succeeds.

(c) *Effect of dividends on earnings and profits accounts.* Dividends paid out of the accumulated earnings and profits (see section 316(a)(1) of such foreign corporation shall be treated as having been paid out of the most recently accumulated earnings and profits of such corporation. A deficit in an earnings and profits account for any accounting period shall reduce the most recently accumulated earnings and profits for a prior accounting period in such account. If there are no accumulated earnings and profits in an earnings and profits account because of a deficit incurred in a prior accounting period, such deficit must be restored before earnings and profits can be accumulated in a subsequent accounting period. If a dividend is paid out of earnings and profits of a foreign corporation which maintains two or more accounts (established under the provisions of paragraph (b) of this section) with respect to two or more accounting periods ending on the same day, then the portion of such dividend considered as paid out of each account shall be the same proportion of the total dividend as the amount of earnings and profits in that account bears to the sum of the earnings and profits in all such accounts.

(d) *Illustration.* The application of the principles of this section in the determination of the amount of the dividends received deduction may be illustrated by the following example:

Example. On December 31, 1960, corporation X, a calendar-year corporation organized in the United States on January 1, 1958, consolidated with corporation Y, a foreign corporation organized on January 1, 1958, which used an annual accounting period based on the calendar year, to form corporation Z, a foreign corporation not engaged in trade or business within the United States. Corporation Z is a wholly-owned subsidiary of cor-

26 CFR Ch. I (4-1-17 Edition)

poration M, a domestic corporation. On January 1, 1961, corporation Z's accumulated earnings and profits of \$31,000 are, under the provisions of paragraph (b) of this section, maintained in separate earnings and profits accounts containing the following amounts:

Earnings and profits accumulated for—	Domestic corp. X	Foreign corp. Y
1958	(\$1,000)	\$11,000
1959	10,000	9,000
1960	5,000	(3,000)

Corporation Z had earnings and profits of \$10,000 in each of the years 1961, 1962, and 1963 and makes distributions with respect to its stock to corporation M for such years in the following amounts:

1961	\$14,000
1962	23,000
1963	16,000

(1) For 1961, a deduction of \$3,400 is allowable to M with respect to the \$14,000 distribution from Z, computed as follows:

(i) Dividend from current year earnings and profits (1961)	\$10,000
(ii) Dividend from earnings and profits of corporation X accumulated for 1960	4,000
(iii) Deduction: 85 percent of \$4,000 (the amount distributed from the accumulated earnings and profits of corporation X)	3,400

(2) For 1962, a deduction of \$6,970 is allowable to corporation M with respect to the \$23,000 distribution from corporation Z, computed as follows:

(i) Dividend from current year earnings and profits (1962)	\$10,000
(ii) Dividend from earnings and profits of corporation X accumulated for:	
1960	\$1,000
1959: \$9,000 (i.e., \$10,000 - \$1,000) divided by \$15,000 (i.e., \$9,000 + \$9,000 - \$3,000) multiplied by \$12,000 (i.e., \$23,000 - \$11,000)	7,200
Total	8,200
(iii) Dividend from earnings and profits of corporation Y accumulated for:	
1959: \$6,000/\$15,000 × \$12,000	4,800
(iv) Deduction: 85 percent of \$8,200 (the amount distributed from the accumulated earnings and profits of corporation X)	6,970

(3) For 1963, a deduction of \$1,530 is allowable to M with respect to the \$16,000 distribution from Z, computed as follows:

(i) Dividend from current year earnings and profits (1963)	\$10,000
(ii) Dividend from earnings and profits of corporation X accumulated for 1959:	
Earnings and profits remaining after 1962 distribution (i.e., \$9,000 - \$7,200)	1,800
(iii) Dividend from earnings and profits of corporation Y accumulated for 1959:	
Earnings and profits remaining after 1962 distribution (i.e., \$6,000 - \$4,800)	1,200
1958	8,000

Internal Revenue Service, Treasury

§ 1.243-4

(iv) Deduction: 85 percent of \$1,800 (the amount distributed from the accumulated earnings and profits of corporation X) 1,530

[T.D. 6830, 30 FR 8045, June 23, 1965, as amended by T.D. 9194, 70 FR 18928, Apr. 11, 2005]

§ 1.243-4 Qualifying dividends.

(a) *Definition of qualifying dividends—*
(1) *General.* For purposes of section 243(a)(3), the term *qualifying dividends* means dividends received by a corporation if:

(i) At the close of the day the dividends are received, such corporation is a member of the same affiliated group of corporations (as defined in paragraph (b) of this section) as the corporation distributing the dividends,

(ii) An election by such affiliated group under section 243(b)(2) and paragraph (c) of this section is effective for the taxable years of its members which include such day, and

(iii) The dividends are distributed out of earnings and profits specified in subparagraph (2) of this paragraph.

(2) *Earnings and profits.* The earnings and profits specified in this subparagraph are earnings and profits of a taxable year of the distributing corporation (or a predecessor corporation) which satisfies each of the following conditions:

(i) Such year must end after December 31, 1963;

(ii) On each day of such year the distributing corporation (or the predecessor corporation) and the corporation receiving the dividends must have been members of the affiliated group of which the distributing corporation and the corporation receiving the dividends are members on the day the dividends are received; and

(iii) An election under section 1562 (relating to the election of multiple surtax exemptions) was never effective (or is no longer effective pursuant to section 1562(c)) for such year.

(3) *Special rule for insurance companies.* Notwithstanding the provisions of subparagraph (2) of this paragraph, if an insurance company subject to taxation under section 802 or 821 distributes a dividend out of earnings and profits of a taxable year with respect to which the company would have been a component member of a controlled

group of corporations within the meaning of section 1563 were it not for the application of section 1563(b)(2)(D), such dividend shall not be treated as a qualifying dividend unless an election under section 243(b)(2) is effective for such taxable year.

(4) *Predecessor corporations.* For purposes of this paragraph, a corporation shall be considered to be a predecessor corporation with respect to a distributing corporation if the distributing corporation succeeds to the earnings and profits of such corporation, for example, as the result of a transaction to which section 381(a) applies. A distributing corporation shall, for purposes of this section, maintain, in respect of each predecessor corporation, a separate account for earnings and profits to which it succeeds, and such earnings and profits shall be considered to be earnings and profits of the predecessor's taxable year in which the earnings and profits were accumulated.

(5) *Mere change in form.* (i) For purposes of subparagraph (2)(ii) of this paragraph, the affiliated group in existence during the taxable year out of the earnings and profits of which the dividend is distributed shall not be considered as a different group from that in existence on the day on which the dividend is received merely because:

(a) The common parent corporation has undergone a mere change in identity, form, or place of organization (within the meaning of section 368(a)(1)(F)), or

(b) A newly organized corporation (the "acquiring corporation") has acquired substantially all of the outstanding stock of the common parent corporation (the "acquired corporation") solely in exchange for stock of such acquiring corporation, and the stockholders (immediately before the acquisition) of the acquired corporation, as a result of owning stock of the acquired corporation, own (immediately after the acquisition) all of the outstanding stock of the acquiring corporation.

If a transaction described in the preceding sentence has occurred, the acquiring corporation shall be treated as having been a member of the affiliated group for the entire period during

which the acquired corporation was a member of such group.

(ii) For purposes of subdivision (i) (b) of this subparagraph, if immediately before the acquisition:

(a) The stockholders of the acquired corporation also owned all of the outstanding stock of another corporation (the “second corporation”), and

(b) Stock of the acquired corporation and of the second corporation could be acquired or transferred only as a unit (hereinafter referred to as the “limitation on transferability”), then the second corporation shall be treated as an acquired corporation and such second corporation shall be treated as having been a member of the affiliated group for the entire period (while such group was in existence) during which the limitation on transferability was in existence, and if the second corporation is itself the common parent corporation of an affiliated group (the “second group”) any other member of the second group shall be treated as having been a member of the affiliated group for the entire period during which it was a member of the second group while the limitation on transferability existed. For purposes of (a) of this subdivision and subdivision (i)(b) of this subparagraph, if the limitation on transferability of stock of the acquired corporation and the second corporation is achieved by using a voting trust, then the stock owned by the trust shall be considered as owned by the holders of the beneficial interests in the trust.

(6) *Source of distributions.* In determining from what year’s earnings and profits a dividend is treated as having been distributed for purposes of this section, the principles of paragraph (a) of § 1.316-2 shall apply. A dividend shall be considered to be distributed, first, out of the earnings and profits of the taxable year which includes the date the dividend is distributed, second, out of the earnings and profits accumulated for the immediately preceding taxable year, third, out of the earnings and profits accumulated for the second preceding taxable year, etc. A deficit in an earnings and profits account for any taxable year shall reduce the most recently accumulated earnings and profits for a prior year in such account. If there are no accumulated earnings and

profits in an earnings and profits account because of a deficit incurred in a prior year, such deficit must be restored before earnings and profits can be accumulated in a subsequent year. If a dividend is distributed out of separate earnings and profits accounts (established under the provisions of subparagraph (4) of this paragraph) for two or more taxable years ending on the same day, then the portion of such dividend considered as distributed out of each account shall be the same proportion of the total dividend as the amount of earnings and profits in that account bears to the sum of the earnings and profits in all such accounts.

(7) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. On March 1, 1965, corporation P, a publicly owned corporation, acquires all of the stock of corporation S and continues to hold the stock throughout the remainder of 1965 and all of 1966. P and S are domestic corporations which file separate returns on the basis of a calendar year. The affiliated group consisting of P and S makes an election under section 243(b)(2) which is effective for the 1966 taxable years of P and S. A multiple surtax exemption election under section 1562 is not effective for their 1965 taxable years. On February 1, 1966, S distributes \$50,000 with respect to its stock which is received by P on the same date. S had earnings and profits of \$40,000 for 1966 (computed without regard to distributions during 1966). S also had earnings and profits accumulated for 1965 of \$70,000. Since \$40,000 was distributed out of earnings and profits for 1966 and since each of the conditions prescribed in subparagraphs (1) and (2) of this paragraph is satisfied, P is entitled to a 100-percent dividends received deduction with respect to \$40,000 of the \$50,000 distribution. However, since \$10,000 was distributed out of earnings and profits accumulated for 1965, and since on each day of 1965 S and P were not members of the affiliated group of which S and P were members on February 1, 1966, \$10,000 of the \$50,000 distribution does not satisfy the condition specified in subparagraph (2)(ii) of this paragraph and thus does not qualify for the 100-percent dividends received deduction.

Example 2. Assume the same facts as in *Example 1*, except that corporation P acquires all the stock of corporation S on January 1, 1965, and sells such stock on November 1, 1966. Since \$10,000 is distributed out of earnings and profits for 1965, and since each of the conditions prescribed in subparagraphs (1) and (2) of this paragraph is satisfied, P is entitled to a 100-percent dividends received deduction with respect to \$10,000 of the

Internal Revenue Service, Treasury

§ 1.243-4

\$50,000 distribution. However, since \$40,000 of the \$50,000 distribution was made out of earnings and profits of S for its 1966 taxable year, and on each day of such year S and P were not members of the affiliated group of which S and P were members on February 1, 1966, \$40,000 of the distribution does not satisfy the condition specified in subparagraph (2)(ii) of this paragraph and thus does not qualify for the 100-percent dividends received deduction.

Example 3. Assume the same facts as in *Example 1*, except that corporation P acquires all the stock of corporation S on January 1, 1965, and that a multiple surtax exemption election under section 1562 is effective for P's and S's 1965 taxable years. Further assume that the section 1562 election is terminated effective with respect to their 1966 taxable years, and that an election under section 243(b)(2) is effective for such taxable years. Since \$10,000 of the February 1, 1966, distribution was made out of earnings and profits of S for its 1965 taxable year and since a multiple surtax exemption election is effective for such year, \$10,000 of the distribution does not satisfy the condition specified in subparagraph (2)(iii) of this paragraph and thus does not qualify for the 100-percent dividends received deduction. However, the portion of the distribution which was distributed out of earnings and profits of S's 1966 year (\$40,000) qualifies for the 100-percent dividends received deduction.

Example 4. Assume the same facts as in *Example 1*, except that corporation P acquires all the stock of corporation S on January 1, 1965, and that S is a life insurance company subject to taxation under section 802. Accordingly, S would have been a member of a controlled group of corporations except for the application of section 1563(b)(2)(D). Since \$10,000 of the distribution was made out of earnings and profits of S for its 1965 taxable year, and since with respect to such year an election under section 243(b)(2) was not effective, \$10,000 of the distribution is not a qualifying dividend by reason of subparagraph (3) of this paragraph. On the other hand, the portion of the distribution which was distributed out of earnings and profits for S's 1966 year (\$40,000) does qualify for the 100-percent dividends received deduction because the distribution was out of earnings and profits of a year for which an election under section 243(b)(2) is effective, and because the other conditions specified in subparagraphs (1) and (2) of this paragraph are satisfied. However, if P were also a life insurance company subject to taxation under section 802, then subparagraph (3) of this paragraph would not result in the disqualification of the portion of the distribution made out of S's 1965 earnings and profits because S would be a component member of an insurance group of corporations (as defined in section 1563(a)(4)),

consisting of P and S, with respect to its 1965 year.

Example 5. Corporation X owns all the stock of corporation Y from January 1, 1965, through December 31, 1969. X and Y are domestic corporations which file separate returns on the basis of a calendar year. On June 30, 1965, Y acquired all the stock of domestic corporation Z, a calendar year taxpayer, and on December 31, 1967, Y acquired the assets of Z in a transaction to which section 381(a) applied. A multiple surtax exemption election under section 1562, was not effective for any taxable year of X, Y, or Z, and an election under section 243(b)(2) is effective for the 1968 and 1969 taxable years of X and Y. On January 1, 1968, Y's accumulated earnings and profits are, under the provisions of subparagraph (4) of this paragraph, maintained in separate earnings and profits accounts containing the following amounts:

Earnings and profits accumulated for	Corp	Corp
	Y	Z
1964	\$60,000	\$40,000
1965	30,000	15,000
1966	(5,000)	2,000
1967	12,000	6,000

Corporation Y had earnings and profits of \$10,000 in each of the years 1968 and 1969, and made distributions during such years in the following amounts:

1968	\$29,000
1969	31,000

(i) The source of the 1968 distribution, determined in accordance with the rules of subparagraph (6) of this paragraph, is as follows:

(a) Dividend from Y's current year's earnings and profits (1968)	\$10,000
(b) Dividend from earnings and profits of Y accumulated for 1967	12,000
(c) Dividend from earnings and profits of Z accumulated for:	
1967	6,000
1966	1,000
	<hr/>
	29,000

Since the 1968 dividend is considered paid out of earnings and profits of Y's 1968 and 1967 years, and Z's 1967 and 1966 years, and since each of these years satisfies each of the conditions specified in subparagraph (2) of this paragraph, X is entitled to a 100-percent dividends received deduction with respect to the entire 1968 distribution of \$29,000 from Y.

(ii) The source of the 1969 distribution of \$31,000, determined in accordance with the rules of subparagraph (6) of this paragraph, is as follows:

(a) Dividend from Y's current year's earnings and profits (1969)	\$10,000
(b) Dividend from earnings and profits of Z accumulated for 1966 (1966 earnings and profits remaining after 1968 distribution, i.e., \$2,000 - \$1,000)	1,000

§ 1.243-4

26 CFR Ch. I (4-1-17 Edition)

(c) Dividend from earnings and profits of Y and Z accumulated for 1965:

Corporation Y: \$25,000 (i.e., \$30,000—\$5,000 deficit) divided by \$40,000 (i.e., the sum of the 1965 earnings and profits of Y and Z) multiplied by \$20,000 (the portion of the distribution from the 1965 earnings and profits of Y and Z)	12,500
Corporation Z: \$15,000 divided by \$40,000 multiplied by \$20,000	7,500
	<hr/> 31,000

The sum of the dividends from Y's 1969 year (\$10,000), Z's 1966 year (\$1,000), and Y's 1965 year (\$12,500), or \$23,500, qualifies for the 100-percent dividends received deduction. However, the dividends paid out of Z's 1965 year (\$7,500) do not qualify because on each day of 1965 Z and X were not members of the affiliated group of which Y (the distributing corporation) and X (the corporation receiving the dividends) were members on the day in 1969 when the dividends were received by X.

(b) *Definition of affiliated group.* For purposes of this section and § 1.243-5, the term *affiliated group* shall have the meaning assigned to it by section 1504(a), except that insurance companies subject to taxation under section 802 or 821 shall be treated as includible corporations (notwithstanding section 1504(b)(2)), and the provisions of section 1504(c) shall not apply.

(c) *Election*—(1) *Manner and time of making election*—(i) *General.* The election provided by section 243(b)(2) shall be made for an affiliated group by the common parent corporation and shall be made for a particular taxable year of the common parent corporation. Such election may not be made for any taxable year of the common parent corporation for which a multiple surtax exemption election under section 1562 is effective. The election shall be made by means of a statement, signed by any person who is duly authorized to act on behalf of the common parent corporation, stating that the affiliated group elects under section 243(b)(2) for such taxable year. The statement shall be filed with the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the common parent. The statement shall set forth the name, address, taxpayer account number, and taxable year of each corporation (including wholly-owned subsidiaries) that is a member of the affiliated group at the time the elec-

tion is filed. The statement may be filed at any time, provided that, with respect to each corporation the tax liability of which for its matching taxable year of election (or for any subsequent taxable year) would be increased because of the election, at the time of filing there is at least 1 year remaining in the statutory period (including any extensions thereof) for the assessment of a deficiency against such corporation for such year. (If there is less than 1 year remaining with respect to any taxable year, the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the corporation will ordinarily, upon request, enter into an agreement to extend such statutory period for assessment and collection of deficiencies.

(ii) *Information statement by common parent.* If a corporation becomes a member of the affiliated group after the date on which the election is filed and during its matching taxable year of election, then the common parent shall file, within 60 days after such corporation becomes a member of the affiliated group, an additional statement containing the name, address, taxpayer account number, and taxable year of such corporation. Such additional statement shall be filed with the internal revenue officer with whom the election was filed.

(iii) *Definition of matching taxable year of election.* For purposes of this paragraph and paragraphs (d) and (e) of this section, the term *matching taxable year of election* shall mean the taxable year of each member (including the common parent corporation) of the electing affiliated group which includes the last day of the taxable year of the common parent corporation for which an election by the affiliated group is made under section 243(b)(2).

(2) *Consents by subsidiary corporations*—(i) *General.* Each corporation (other than the common parent corporation) which is a member of the electing affiliated group (including any member which joins in the filing of a consolidated return) at any time during its matching taxable year of election must consent to such election in

the manner and time provided in subdivision (ii) or (iii) of this subparagraph, whichever is applicable.

(ii) *Wholly owned subsidiary.* If all of the stock of a corporation is owned by a member or members of the affiliated group on each day of such corporation's matching taxable year of election, then such corporation (referred to in this paragraph as a "wholly owned subsidiary") shall be deemed to consent to such election.

(iii) *Other members.* The consent of each member of the affiliated group (other than a wholly owned subsidiary) shall be made by means of a statement, signed by any person who is duly authorized to act on behalf of the consenting member, stating that such member consents to the election under section 243(b)(2). The statement shall set forth the name, address, taxpayer account number, and taxable year of the consenting member and of the common parent corporation, and in the case of a statement filed after December 31, 1968, the identity of the internal revenue district in which is located the principal place of business or principal office or agency of the common parent corporation. The consent of more than one such member may be incorporated in a single statement. The statement (or statements) shall be attached to the election filed by the common parent corporation. The consent of a corporation that, after the date the election was filed and during its matching taxable year of election, either (a) becomes a member, or (b) ceases to be a wholly owned subsidiary but continues to be a member, shall be filed with the internal revenue officer with whom the election was filed and shall be filed on or before the date prescribed by law (including extensions of time) for the filing of the consenting member's income tax return for such taxable year, or on or before June 10, 1964, whichever is later.

(iv) *Statement attached to return.* Each corporation that consents to an election by means of a statement described in subdivision (iii) of this subparagraph should attach a copy of the statement to its income tax return for its matching taxable year of election, or, if such return has already been filed, to its first income tax return filed on or after

the date on which the statement is filed. However, if such return is filed on or before June 10, 1964, a copy of such statement should be filed on or before June 10, 1964, with the district director with whom such return is filed. Each wholly owned subsidiary should attach a statement to its income tax return for its matching taxable year of election, or, if such return has already been filed, to its first income tax return filed on or after the date on which the statement is filed stating that it is subject to an election under section 243(b)(2) and the taxable year to which the election applies, and setting forth the name, address, taxpayer account number, and taxable year of the common parent corporation, and in the case of a statement filed after December 31, 1968, the identity of the internal revenue district in which is located the principal place of business or principal office or agency of the common parent corporation. However, if the due date for such return (including extensions of time) is before June 10, 1964, such statement should be filed on or before June 10, 1964, with the district director with whom such return is filed.

(3) *Information statement by member.* If a corporation becomes a member of the affiliated group during a taxable year that begins after the last day of the common parent corporation's matching taxable year of election, then (unless such election has been terminated) such corporation should attach a statement to its income tax return for such taxable year stating that it is subject to an election under section 243(b)(2) for such taxable year and setting forth the name, address, taxpayer account number, and taxable year of the common parent corporation, and the identity of the internal revenue district in which is located the principal place of business or principal office or agency of the common parent corporation. In the case of an affiliated group that made an election under the rules provided in Treasury Decision 6721, approved April 8, 1964 (29 FR 4997, C.B. 1964-1 (Part 1), 625), such statement shall be filed, on or before March 15, 1969, with the district director for the internal revenue district in which is located such member's principal place of business or principal office or agency.

(4) *Years for which election effective—*
 (i) *General rule.* An election under section 243(b)(2) by an affiliated group shall be effective:

(a) In the case of each corporation which is a member of such group at any time during its matching taxable year of election, for such taxable year, and

(b) In the case of each corporation which is a member of such group at any time during a taxable year ending after the last day of the common parent's taxable year of election but which does not include such last day, for such taxable year, unless the election is terminated under section 243(b)(4) and paragraph (e) of this section. Thus, the election has a continuing effect and need not be renewed annually.

(ii) *Special rule for certain taxable years ending in 1964.* In the case of a taxable year of a member (other than the common parent corporation) of the affiliated group (a) which begins in 1963 and ends in 1964, and (b) for which an election is not effective under subdivision (i)(a) of this subparagraph, if an election under section 243(b)(2) is effective for the taxable year of the common parent corporation which includes the last day of such taxable year of such member, then such election shall be effective for such taxable year of such member if such member files a separate consent with respect to such taxable year. However, in order for a dividend distributed by such member during such taxable year to meet the requirements of section 243(b)(1), an election under section 243(b)(2) must be effective for the taxable year of each member of the affiliated group which includes the date such dividend is received. See section 243(b)(1)(A) and paragraph (a)(1) of this section. Accordingly, if the dividend is to qualify for the 100-percent dividends received deduction under section 243(a)(3), a consent must be filed under this subdivision by each member of the affiliated group with respect to its taxable year which includes the day the dividend is received (unless an election is effective for such taxable year under subdivision (i)(a) of this subparagraph). For purposes of this subdivision, a consent shall be made by means of a statement meeting the requirements of subpara-

graph (2)(iii) of this paragraph, and shall be attached to the election made by the common parent corporation for its taxable year which includes the last day of the taxable year of the member with respect to which the consent is made. A copy of the statement should be filed, within 60 days after such election is filed by the common parent corporation, with the district director with whom the consenting member filed its income tax return for such taxable year.

(iii) *Examples.* The provisions of subdivision (ii) of this subparagraph, relating to the special rule for certain taxable years ending in 1964, may be illustrated by the following examples:

Example 1. P Corporation owns all the stock of S-1 Corporation on each day of 1963, 1964, and 1965. P uses the calendar year as its taxable year and S-1 uses a fiscal year ending June 30 as its taxable year. P makes an election under section 243(b)(2) for 1964. Since S-1 is a wholly owned subsidiary for its taxable year ending June 30, 1965, it is deemed to consent to the election. However, in order for the election to be effective with respect to S-1's taxable year ending June 30, 1964, a statement specifying that S-1 consents to the election with respect to such taxable year and containing the information required in a statement of consent under subparagraph (2)(iii) of this paragraph must be attached to the election.

Example 2. Assume the same facts as in *Example 1*, except that P also owns all the stock of S-2 Corporation on each day of 1963, 1964, and 1965. S-2 uses a fiscal year ending May 31 as its taxable year. If S-1 distributes a dividend to P on January 15, 1964, the dividend may qualify under section 243(a)(3) only if S-1 and S-2 both consent to the election made by P for 1964 with respect to their taxable years ending in 1964.

Example 3. Assume the same facts as in *Example 1*, except that P uses a fiscal year ending on January 31 as its taxable year and makes an election under subparagraph (1) of this paragraph for its taxable year ending January 31, 1964. Since S-1's taxable year beginning in 1963 and ending in 1964 includes January 31, 1964, the last day of P's taxable year for which the election was made, the election is effective under subdivision (i)(a) of this subparagraph, for S-1's taxable year ending June 30, 1964. Accordingly, the special rule of subdivision (ii) of this subparagraph has no application.

(d) *Effect of election.* For restrictions and limitations applicable to corporations which are members of an electing

affiliated group on each day of their taxable years, see § 1.243-5.

(e) *Termination of election*—(1) *In general.* An election under section 243(b)(2) by an affiliated group may be terminated with respect to any taxable year of the common parent corporation after the matching taxable year of election of the common parent corporation. The election is terminated as a result of one of the occurrences described in subparagraph (2) or (3) of this paragraph. For years affected by termination, see subparagraph (4) of this paragraph.

(2) *Consent of members*—(i) *General.* An election may be terminated for an affiliated group by its common parent corporation with respect to a taxable year of the common parent corporation provided each corporation (other than the common parent) that was a member of the affiliated group at any time during its taxable year that includes the last day of such year of the common parent (the “matching taxable year of termination”) consents to such termination. The statement of termination may be filed by the common parent corporation at any time, provided that, with respect to each corporation the tax liability of which for its matching taxable year of termination (or for any subsequent taxable year) would be increased because of the termination, at the time of filing there is at least 1 year remaining in the statutory period (including any extensions thereof) for the assessment of a deficiency against such corporation for such year. (If there is less than 1 year remaining with respect to any taxable year, the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the corporation will ordinarily, upon request, enter into agreement to extend such statutory period for assessment and collection of deficiencies.)

(ii) *Statements filed after December 31, 1968.* With respect to statements of termination filed after December 31, 1968:

(a) The statement shall be filed with the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the common parent corporation;

(b) The statement shall be signed by any person who is duly authorized to act on behalf of the common parent corporation and shall state that the affiliated group terminates the election under section 243(b)(2) for such taxable year;

(c) The statement shall set forth the name, address, taxpayer account number, and taxable year of each corporation (including wholly owned subsidiaries) which is a member of the affiliated group at the time the termination is filed; and

(d) The consents to the termination shall be given in accordance with the rules prescribed in paragraph (c)(2) of this section, relating to manner and time for giving consents to an election under section 243(b)(2).

(3) *Refusal by new member to consent*—

(i) *Manner of giving refusal.* If any corporation which is a new member of an affiliated group with respect to a taxable year of the common parent corporation (other than the matching taxable year of election of the common parent corporation) files a statement that it does not consent to an election under section 243(b)(2) with respect to such taxable year, then such election shall terminate with respect to such taxable year. Such statement shall be signed by any person who is duly authorized to act on behalf of the new member, and shall be filed with the timely filed income tax return of such new member for its taxable year within which falls the last day of such taxable year of the common parent corporation. In the event of a termination under this subparagraph, each corporation (other than such new member) that is a member of the affiliated group at any time during its taxable year which includes such last day should, within 30 days after such new member files the statement of refusal to consent, notify the district director of such termination. Such notification should be filed with the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the corporation.

(ii) *Corporation considered as new member.* For purposes of subdivision (i) of this subparagraph, a corporation shall be considered to be a new member of an

affiliated group of corporations with respect to a taxable year of the common parent corporation if such corporation:

(a) Is a member of the affiliated group at any time during such taxable year of the common parent corporation, and

(b) Was not a member of the affiliated group at any time during the common parent corporation's immediately preceding taxable year.

(4) *Effect of termination.* A termination under subparagraph (2) or (3) of this paragraph is effective with respect to (i) the common parent corporation's taxable year referred to in the particular subparagraph under which the termination occurs, and (ii) the taxable years of the other members of the affiliated group which include the last day of such taxable year of the common parent. An election, once terminated, is no longer effective. Accordingly, the termination is also effective with respect to the succeeding taxable years of the members of the group. However, the affiliated group may make a new election in accordance with the provisions of section 243(b)(2) and paragraph (c) of this section.

[T.D. 6992, 34 FR 817, Jan. 18, 1969]

§ 1.243-5 Effect of election.

(a) *General*—(1) *Corporations subject to restrictions and limitations.* If an election by an affiliated group under section 243(b)(2) is effective with respect to a taxable year of the common parent corporation, then each corporation (including the common parent corporation) which is a member of such group on each day of its matching taxable year shall be subject to the restrictions and limitations prescribed by paragraphs (b), (c), and (d) of this section for such taxable year. For purposes of this section, the term *matching taxable year* shall mean the taxable year of each member (including the common parent corporation) of an affiliated group which includes the last day of a particular taxable year of the common parent corporation for which an election by the affiliated group under section 243(b)(2) is effective. If a corporation is a member of an affiliated group on each day of a short taxable year which does not include the last day of

a taxable year of the common parent corporation, and if an election under section 243(b)(2) is effective for such short year, see paragraph (g) of this section. In the case of taxable years beginning in 1963 and ending in 1964 for which an election under section 243(b)(2) is effective under paragraph (c)(4)(ii) of § 1.243-4, see paragraph (f)(9) of this section.

(2) *Members filing consolidated returns.* The restrictions and limitations prescribed by this section shall apply notwithstanding the fact that some of the corporations which are members of the electing affiliated group (within the meaning of section 243(b)(5)) join in the filing of a consolidated return. Thus, for example, if an electing affiliated group includes one or more corporations taxable under section 11 of the Code and two or more insurance companies taxable under section 802 of the Code, and if the insurance companies join in the filing of a consolidated return, the amount of such companies' exemptions from estimated tax (for purposes of sections 6016 and 6655) shall be the amounts determined under paragraph (d)(5) of this section and not the amounts determined pursuant to the regulations under section 1502.

(b) *Multiple surtax exemption election*—(1) *General rule.* If an election by an affiliated group under section 243(b)(2) is effective with respect to a taxable year of the common parent corporation, then no corporation which is a member of such affiliated group on each day of its matching taxable year may consent (or shall be deemed to consent) to an election under section 1562(a)(1), relating to election of multiple surtax exemptions, which would be effective for such matching taxable year. Thus, each corporation which is a component member of the controlled group of corporations with respect to its matching taxable year (determined by applying section 1563(b) without regard to paragraph (2)(D) thereof) shall determine its surtax exemption for such taxable year in accordance with section 1561 and the regulations thereunder.

(2) *Special rule for certain insurance companies.* Under section 243(b)(6)(A), if the provisions of subparagraph (1) of this paragraph apply with respect to

the taxable year of an insurance company subject to taxation under section 802 or 821, then the surtax exemption of such insurance company for such taxable year shall be determined by applying part II (section 1561 and following), subchapter B, chapter 6 of the Code, with respect to such insurance company and the other corporations which are component members of the controlled group of corporations (as determined under section 1563 without regard to subsections (a)(4) and (b)(2)(D) thereof) of which such insurance company is a member, without regard to section 1563(a)(4) (relating to certain insurance companies treated as a separate controlled group) and section 1563(b)(2)(D) (relating to certain insurance companies treated as excluded members).

(3) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. Throughout 1965 corporation M owns all the stock of corporations L-1, L-2, S-1, and S-2. M is a domestic mutual insurance company subject to tax under section 821 of the Code, L-1 and L-2 are domestic life insurance companies subject to tax under section 802 of the Code, and S-1 and S-2 are domestic corporations subject to tax under section 11 of the Code. Each corporation uses the calendar year as its taxable year. M makes a valid election under section 243(b)(2) for the affiliated group consisting of M, L-1, L-2, S-1, and S-2. If part II, subchapter B, chapter 6 of the Code were applied with respect to the 1965 taxable years of the corporations without regard to section 243(b)(6)(A), the following would result: S-1 and S-2 would be treated as component members of a controlled group of corporations on such date; L-1 and L-2 would be treated as component members of a separate controlled group on such date; and M would be treated as an excluded member. However, since section 243(b)(6)(A) requires that part II of subchapter B be applied without regard to section 1563(a)(4) and (b)(2)(D), for purposes of determining the surtax exemptions of M, L-1, L-2, S-1, and S-2 for their 1965 taxable years, such corporations are treated for purposes of such part II as component members of a single controlled group of corporations on December 31, 1965. Moreover, by reason of having made the election under section 243(b)(2), M, L-1, L-2, S-1, and S-2 cannot consent to multiple surtax exemption elections under section 1562 which would be effective for their 1965 taxable years. Thus, such corporations are limited to a single \$25,000 surtax exemption for such taxable

years (to be apportioned among such corporations in accordance with section 1561 and the regulations thereunder).

(c) *Foreign tax credit*—(1) *General.* If an election by an affiliated group under section 243(b)(2) is effective with respect to a taxable year of the common parent corporation, then:

(i) The credit under section 901 for taxes paid or accrued to any foreign country or possession of the United States shall be allowed to a corporation which is a member of such affiliated group for each day of its matching taxable year only if each other corporation which pays or accrues such foreign taxes to any foreign country or possession, and which is a member of such group on each day of its matching taxable year, does not deduct such taxes in computing its tax liability for its matching taxable year, and

(ii) A corporation which is a member of such affiliated group on each day of its matching taxable year may use the overall limitation provided in section 904(a)(2) for such matching taxable year only if each other corporation which pays or accrues foreign taxes to any foreign country or possession, and which is a member of such group on each day of its matching taxable year, uses such limitation for its matching taxable year.

(2) *Consent of the Commissioner.* In the absence of unusual circumstances, a request by a corporation for the consent of the Commissioner to the revocation of an election of the overall limitation, or to a new election of the overall limitation, for the purpose of satisfying the requirements of subparagraph (1)(ii) of this paragraph will be given favorable consideration, notwithstanding the fact that there has been no change in the basic nature of the corporation's business or changes in conditions in a foreign country which substantially affect the corporation's business. See paragraph (d)(3) of § 1.904-1.

(d) *Other restrictions and limitations*—(1) *General rule.* If an election by an affiliated group under section 243(b)(2) is effective with respect to a taxable year of the common parent corporation, then, except to the extent that an apportionment plan adopted under paragraph (f) of this section for such taxable year provides otherwise with

respect to a restriction or limitation described in this paragraph, the rules provided in subparagraphs (2), (3), (4), and (5) of this paragraph shall apply to each corporation which is a member of such affiliated group on each day of its matching taxable year for the purpose of computing the amount of such restriction or limitation for its matching taxable year. For purposes of this paragraph, each corporation which is a member of an electing affiliated group (including any member which joins in filing a consolidated return) shall be treated as a separate corporation for purposes of determining the amount of such restrictions and limitations.

(2) *Accumulated earnings credit*—(i) *General*. Except as provided in subdivision (ii) of this subparagraph, in determining the minimum accumulated earnings credit under section 535(c)(2) (or the accumulated earnings credit of a mere holding or investment company under section 535(c)(3) for each corporation which is a member of the affiliated group on each day of its matching taxable year, in lieu of the \$150,000 amount (\$100,000 amount in the case of taxable years beginning before January 1, 1975) mentioned in such sections there shall be substituted an amount equal to (a) \$150,000 (\$100,000 in the case of taxable years beginning before January 1, 1975), divided by (b) the number of such members.

(ii) *Allocation of excess*. If, with respect to one or more members, the amount determined under subdivision (i) of this subparagraph exceeds the

sum of (a) such member's accumulated earnings and profits as of the close of the preceding taxable year, plus (b) such member's earnings and profits for the taxable year which are retained (within the meaning of section 535(c)(1), then any such excess shall be subtracted from the amount determined under subdivision (i) of this subparagraph and shall be divided equally among those remaining members of the affiliated group that do not have such an excess (until no such excess remains to be divided among those remaining members that have not had such an excess). The excess so divided among such remaining members shall be added to the amount determined under subdivision (i) with respect to such members.

(iii) *Apportionment plan not allowed*. An affiliated group may not adopt an apportionment plan, as provided in paragraph (f) of this section, with respect to the amounts computed under the provisions of this subparagraph.

(iv) *Example*. The provisions of this subparagraph may be illustrated by the following example;

Example. An affiliated group is composed of four member corporations, W, X, Y, and Z. The sum of the accumulated earnings and profits (as of the close of the preceding taxable year ending December 31, 1975) plus the earnings and profits for the taxable year ending December 31, 1976 which are retained is \$15,000, \$75,000, \$37,500, and \$300,000 in the case of W, X, Y, and Z, respectively. The amounts determined under this subparagraph for W, X, Y, and Z are \$15,000, \$48,750, \$37,500 and \$48,750, respectively, computed as follows:

	Component members			
	W	X	Y	Z
Earnings and profits	\$15,000	\$75,000	\$37,500	\$300,000
Amount computed under subpar. (1)	37,500	37,500	37,500	37,500
Excess	22,500	0	0	0
Allocation of excess	7,500	7,500	7,500
New excess	7,500
Reallocation of new excess	3,750	3,750
Amount to be used for purposes of sec. 535(c) (2) and (3) ..	15,000	48,750	37,500	48,750

(3) *Mine exploration expenditures*—(i) *Limitation under section 615(a)*. If the aggregate of the expenditures to which section 615(a) applies, which are paid or incurred by corporations which are members of the affiliated group on

each day of their matching taxable years (during such taxable years) exceeds \$100,000, then the deduction (or amount deferrable) under section 615 for any such member for its matching taxable year shall be limited to an

amount equal to the amount which bears the same ratio to \$100,000 as the amount deductible or deferrable by such member under section 615 (computed without regard to this subdivision) bears to the aggregate of the amounts deductible or deferrable under section 615 (as so computed) by all such members.

(ii) *Limitation under section 615(c).* If the aggregate of the expenditures to which section 615(a) applies which are paid or incurred by the corporations which are members of such affiliated group on each day of their matching taxable years (during such taxable years) would, when added to the aggregate of the amounts deducted or deferred in prior taxable years which are taken into account by such corporations in applying the limitation of section 615(c), exceed \$400,000, then section 615 shall not apply to any such expenditure so paid or incurred by any such member to the extent such expenditure would exceed the amount which bears the same ratio to (a) the amount, if any, by which \$400,000 exceeds the amounts so deducted or deferred in prior years, as (b) such member's deduction (or amount deferrable) under section 615 (computed without regard to this subdivision) for such expenditures paid or incurred by such member during its matching taxable year, bears to (c) the aggregate of the amounts deductible or deferrable under section 615 (as so computed) by all such members during their matching taxable years.

(iii) *Treatment of corporations filing consolidated returns.* For purposes of making the computations under subdivisions (i) and (ii) of this subparagraph, a corporation which joins in the filing of a consolidated return shall be treated as if it filed a separate return.

(iv) *Estimate of exploration expenditures.* If, on the date a corporation (which is a member of an affiliated group on each day of its matching taxable year) files its income tax return for such taxable year, it cannot be determined whether or not the \$100,000 limitation prescribed by subdivision (i) of this subparagraph, or the \$400,000 limitation prescribed by subdivision (ii) of this subparagraph, will apply with respect to such taxable year, then such member shall, for purposes of

such return, apply the provisions of such subdivisions (i) and (ii) with respect to such taxable year on the basis of an estimate of the aggregate of the exploration expenditures by all such members of the affiliated group for their matching taxable years. Such estimate shall be made on the basis of the facts and circumstances known at the time of such estimate. If an estimate is used by any such member of the affiliated group pursuant to this subdivision, and if the actual expenditures by all such members differ from the estimate, then each such member shall file as soon as possible an original or amended return reflecting an amended apportionment (either pursuant to an apportionment plan adopted under paragraph (f) of this section or pursuant to the application of the rule provided by subdivision (i) or (ii) of this subparagraph) based upon such actual expenditures.

(v) *Amount apportioned under apportionment plan.* If an electing affiliated group adopts an apportionment plan as provided in paragraph (f) of this section with respect to the limitation under section 615(a) or 615(c), then the amount apportioned under such plan to any corporation which is a member of such group may not exceed the amount which such member could have deducted (or deferred) under section 615 had such affiliated group not filed an election under section 243(b)(2).

(4) *Small business deductions of life insurance companies.* In the case of a life insurance company taxable under section 802 which is a member of such affiliated group on each day of its matching taxable year, the small business deduction under sections 804(a)(4) and 809(d)(10) shall not exceed an amount equal to \$25,000 divided by the number of life insurance companies taxable under section 802 which are members of such group on each day of their matching taxable years.

(5) *Estimated tax—(i) Exemption from estimated tax.* Except as otherwise provided in subdivision (ii) of this subparagraph, the exemption from estimated tax (for purposes of estimated tax filing requirements under section 6016 and the addition to tax under section 6655 for failure to pay estimated tax) of each corporation which is a

member of such affiliated group on each day of its matching taxable year shall be (in lieu of the \$100,000 amount specified in section 6016(a) and (b)(2)(A) and in section 6655(d)(1) and (e)(2)(A) an amount equal to \$100,000 divided by the number of such members.

(ii) *Nonapplication to certain taxable years beginning in 1963 and ending in 1964.* For purposes of this section, if a corporation has a taxable year beginning in 1963 and ending in 1964 the last day of the eighth month of which falls on or before April 10, 1964, then (notwithstanding the fact that an election under section 243(b)(2) is effective for such taxable year) subdivision (i) of this subparagraph shall not apply to such corporation for such taxable year. Thus, such corporation shall be entitled to a \$100,000 exemption from estimated tax for such taxable year. Also, with respect to a taxable year described in the first sentence of this subdivision, any such corporation shall not be considered to be a member of the affiliated group for purposes of determining the number of members referred to in subdivision (i) of this subparagraph.

(iii) *Examples.* The provisions of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example 1. Corporation P owns all the stock of corporation S-1 on each day of 1965. On March 1, 1965, P acquires all the stock of corporation S-2. Corporations P, S-1, and S-2 file separate returns on a calendar year basis. On March 31, 1965, the affiliated group consisting of P, S-1, and S-2 anticipates making an election under section 243(b)(2) for P's 1965 taxable year. If the affiliated group does make a valid election under section 243(b)(2) for P's 1965 year, under subdivision (i) of this subparagraph the exemption from estimated tax of P for 1965, and the exemption from estimated tax of S-1 for 1965, will be (assuming an apportionment plan is not filed pursuant to paragraph (f) of this section) an amount equal to \$50,000 (\$100,000 ÷ 2). (Since S-2 is not a member of the affiliated group on each day of 1965, S-2's exemption from estimated tax will be determined for the year 1965 without regard to subdivision (i) of this subparagraph, whether or not the affiliated group makes the election under section 243(b)(2).) P and S-1 file declarations of estimated tax on April 15, 1965, on such basis and make payments with respect to such declarations on such basis. Thus, if the affiliated group does make a

valid election under section 243(b)(2) for P's 1965 year, P and S-1 will not incur (as a result of the application of subdivision (i) of this subparagraph to their 1965 years) additions to tax under section 6655 for failure to pay estimated tax.

Example 2. Assume the same facts as in *Example 1*, except that, on March 31, 1965, S-1 anticipates that it will incur a loss for its 1965 year. Accordingly, in anticipation of making an election under section 243(b)(2) for P's 1965 year and adopting an apportionment plan under paragraph (f) of this section, P computes its estimated tax liability for 1965 on the basis of a \$100,000 exemption, and S-1 computes its estimated tax liability for 1965 on the basis of a zero exemption. Assume S-1 incurs a loss for 1965 as anticipated. Thus, if P does make the election for 1965, and an apportionment plan is adopted apportioning \$100,000 to P and zero to S-1 (for their 1965 years), P and S-1 will not incur (as a result of the application of subdivision (i) of this subparagraph to their 1965 years) additions to tax under section 6655 for failure to pay estimated tax.

Example 3. Assume the same facts as in *Example 1*, except that P and S-1 file declarations of estimated tax on April 15, 1965, on the basis of separate \$100,000 exemptions from estimated tax for their 1965 years, and make payments with respect to such declarations on such basis. Assume that the affiliated group makes an election under section 243(b)(2) for P's 1965 year. Under subdivision (i) of this subparagraph, P and S-1 are limited in the aggregate to a single \$100,000 exemption from estimated tax for their 1965 years. The provisions of section 6655 will be applied to the 1965 year of P and the 1965 year of S-1 on the basis of a \$50,000 exemption from estimated tax for each corporation, unless a different apportionment of the \$100,000 amount is adopted under paragraph (f) of this section. Since the election was made under section 243(b)(2), regardless of whether or not the affiliated group anticipated making the election, P or S-1 (or both) may incur additions to tax under section 6655 for failure to pay estimated tax.

(e) *Effect of election for certain taxable years beginning in 1963 and ending in 1964.* If an election under section 243(b)(2) by an affiliated group is effective for a taxable year of a corporation under paragraph (c)(4)(ii) of § 1.243-4 (relating to election for certain taxable years beginning in 1963 and ending in 1964), and if such corporation is a member of such group on each day of such taxable year, then the restrictions and limitations prescribed by paragraphs (b), (c), and (d) of this section shall apply to all such members having such

taxable years (for such taxable years). For purposes of this paragraph, such paragraphs shall be applied with respect to such taxable years as if such taxable years included the last day of a taxable year of the common parent corporation for which an election was effective under section 243(b)(2), *i.e.*, as if such taxable years were matching taxable years. For apportionment plans with respect to such taxable years, see paragraph (f) (9) of this section.

(f) *Apportionment plans*—(1) *In general.* In the case of corporations which are members of an affiliated group of corporations on each day of their matching taxable years:

(i) The \$100,000 amount referred to in paragraph (d)(3)(i) of this section (relating to limitation under section 615(a)),

(ii) The amount determined under paragraph (d)(3)(ii)(a) of this section (relating to limitation under section 615(c)),

(iii) The \$25,000 amount referred to in paragraph (d)(4) of this section (relating to small business deduction of life insurance companies), and

(iv) The \$100,000 amount referred to in paragraph (d)(5)(i) of this section (relating to exemption from estimated tax), may be apportioned among such members (for such taxable years) if the common parent corporation files an apportionment plan with respect to such taxable years in the manner provided in subparagraph (4) of this paragraph, and if all other members consent to the plan, in the manner provided in subparagraph (5) or (6) of this paragraph (whichever is applicable). The plan may provide for the apportionment to one or more of such members, in fixed dollar amounts, of one or more of the amounts referred to in subdivisions (i), (ii), (iii), and (iv) of this subparagraph, but in no event shall the sum of the amounts so apportioned in respect to any such subdivision exceed the amount referred to in such subdivision. See also paragraph (d)(3)(v) of this section, relating to the maximum amount that may be apportioned to a corporation under this subparagraph with respect to exploration expenditures to which section 615 applies.

(2) *Time for adopting plan.* An affiliated group may adopt an apportion-

ment plan with respect to the matching taxable years of its members only if, at the time such plan is sought to be adopted, there is at least 1 year remaining in the statutory period (including any extensions thereof) for the assessment of a deficiency against any corporation the tax liability of which for any taxable year would be increased by the adoption of such plan. (If there is less than 1 year remaining with respect to any taxable year, the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the corporation will ordinarily, upon request, enter into an agreement to extend such statutory period for assessment and collection of deficiencies.)

(3) *Years for which effective.* A valid apportionment plan with respect to matching taxable years of members of an affiliated group shall be effective for such matching taxable years, and for all succeeding matching taxable years of such members, unless the plan is amended in accordance with subparagraph (8) of this paragraph or is terminated. Thus, the apportionment plan (including any amendments thereof) has a continuing effect and need not be renewed annually. An apportionment plan with respect to a particular taxable year of the common parent shall terminate with respect to the taxable years of the members of the affiliated group which include the last day of a succeeding taxable year of the common parent if:

(i) Any corporation which was a member of the affiliated group on each day of its matching taxable year which included the last day of the particular taxable year of the common parent is not a member of such group on each day of its taxable year which includes the last day of such succeeding taxable year of the common parent, or

(ii) Any corporation which was not a member of such group on each day of its taxable year which included the last day of the particular taxable year of the common parent is a member of such group on each day of its taxable year which includes the last day of such succeeding taxable year of the common parent.

An apportionment plan, once terminated, is no longer effective. Accordingly, unless a new apportionment plan is filed and consented to (or the section 243(b)(2) election is terminated) the amounts referred to in subparagraph (1) of this paragraph will be apportioned among the corporations which are members of the affiliated group on each day of their matching taxable years in accordance with the rules provided in paragraphs (d)(3)(i), (d)(3)(ii), (d)(4), and (d)(5)(i) of this section.

(4) *Filing of plan.* The apportionment plan shall be in the form of a statement filed by the common parent corporation with the district director for the internal revenue district in which is located the principal place of business or principal office or agency of such common parent. The statement shall be signed by any person who is duly authorized to act on behalf of the common parent corporation and shall set forth the name, address, internal revenue district, taxpayer account number, and taxable year of each member to whom the common parent could apportion an amount under subparagraph (1) of this paragraph (or, in the case of an apportionment plan referred to in subparagraph (9) of this paragraph, each member to whom the common parent could apportion an amount under such subparagraph) and the amount (or amounts) apportioned to each such member under the plan.

(5) *Consent of wholly owned subsidiaries.* If all the stock of a corporation which is a member of the affiliated group on each day of its matching taxable year is owned on each such day by another corporation (or corporations) which is a member of such group on each day of its matching taxable year, such corporation (hereinafter in this paragraph referred to as a “wholly owned subsidiary”) shall be deemed to consent to the apportionment plan. Each wholly owned subsidiary should attach a copy of the plan filed by the common parent corporation to an income tax return, amended return, or claim for refund for its matching taxable year.

(6) *Consent of other members.* The consent of each member (other than the common parent corporation and wholly owned subsidiaries) to an apportion-

ment plan shall be in the form of a statement, signed by any person who is duly authorized to act on behalf of the member consenting to the plan, stating that such member consents to the plan. The consent of more than one such member may be incorporated in a single statement. The statement (or statements) shall be attached to the apportionment plan filed by the common parent corporation. The consent of any such member which, after the date the apportionment plan was filed and during its matching taxable year referred to in subparagraph (1) of this paragraph, ceases to be a wholly owned subsidiary but continues to be a member, shall be filed with the district director with whom the apportionment plan is filed (as soon as possible after it ceases to be a wholly owned subsidiary). Each consenting member should attach a copy of the apportionment plan filed by the common parent to an income tax return, amended return, or claim for refund for its matching taxable year which includes the last day of the taxable year of the common parent corporation for which the apportionment plan was filed.

(7) *Members of group filing consolidated return*—(i) *General rule.* Except as provided in subdivision (ii) of this subparagraph, if the members of an affiliated group of corporations include one or more corporations taxable under section 11 of the Code and one or more insurance companies taxable under section 802 or 821 of the Code and if the affiliated group includes corporations which join in the filing of a consolidated return, then, for purposes of determining the amount to be apportioned to a corporation under an apportionment plan adopted under this paragraph, the corporations filing the consolidated return shall be treated as a single member.

(ii) *Consenting to an apportionment plan.* For purposes of consenting to an apportionment plan under subparagraphs (5) and (6) of this paragraph, if the members of an affiliated group of corporations include corporations which join in the filing of a consolidated return, each corporation which joins in filing the consolidated return shall be treated as a separate member.

(8) *Amendment of plan.* An apportionment plan, which is effective for the matching taxable years of members of an affiliated group, may be amended if an amended plan is filed (and consented to) within the time and in accordance with the rules prescribed in this paragraph for the adoption of an original plan with respect to such taxable years.

(9) *Certain taxable years beginning in 1963 and ending in 1964.* In the case of corporations which are members of an affiliated group of corporations on each day of their taxable years referred to in paragraph (e) of this section:

(i) The \$100,000 amount referred to in paragraph (d)(3)(i) of this section (relating to limitation under section 615(a)),

(ii) The amount determined under paragraph (d)(3)(ii)(a) of this section (relating to limitation under section 615(c)),

(iii) The \$25,000 amount referred to in paragraph (d)(4) of this section (relating to small business deduction of life insurance companies), and

(iv) The \$100,000 amount referred to in paragraph (d)(5)(i) of this section (relating to exemption from estimated tax), may be apportioned among such members (for such taxable years) if an apportionment plan is filed (and consented to) with respect to such taxable years in accordance with the rules provided in subparagraphs (2), (4), (5), (6), (7), and (8) of this paragraph. For purposes of this subparagraph, such subparagraphs shall be applied as if such taxable years included the last day of a taxable year of the common parent corporation, i.e., as if such taxable years were matching taxable years. An apportionment plan adopted under this subparagraph shall be effective only with respect to taxable years referred to in paragraph (e) of this section. The plan may provide for the apportionment to one or more of such members, in fixed dollar amounts, of one or more of the amounts referred to in subdivisions (i), (ii), (iii), and (iv) of this subparagraph, but in no event shall the sum of the amounts so apportioned in respect of any such subdivision exceed the amount referred to in such subdivision. See also paragraph (d)(3)(v) of this section, relating to the maximum

amount that may be apportioned to a corporation under an apportionment plan described in this subparagraph with respect to exploration expenditures to which section 615 applies.

(g) *Short taxable years*—(1) *General.* If:

(i) The return of a corporation is for a short period (ending after December 31, 1963) on each day of which such corporation is a member of an affiliated group,

(ii) The last day of the common parent's taxable year does not end with or within such short period, and

(iii) An election under section 243(b)(2) by such group is effective under paragraph (c) (4) (i) of § 1.243-4 for the taxable year of the common parent within which falls such short period, then the restrictions and limitations prescribed by section 243(b)(3) shall be applied in the manner provided in subparagraph (2) of this paragraph.

(2) *Manner of applying restrictions.* In the case of a corporation described in subparagraph (1) of this paragraph having a short period described in such subparagraph:

(i) Such corporation may not consent to an election under section 1562, relating to election of multiple surtax exemptions, which would be effective for such short period;

(ii) The credit under section 901 shall be allowed to such corporation for such short period if, and only if, each corporation, which pays or accrues foreign taxes and which is a member of the affiliated group on each day of its taxable year which includes the last day of the common parent's taxable year within which falls such short period, does not deduct such taxes in computing its tax liability for its taxable year which includes such last day;

(iii) The overall limitation provided in section 904(a)(2) shall be allowed to such corporation for such short period if, and only if, each corporation, which pays or accrues foreign taxes and which is a member of the affiliated group on each day of its taxable year which includes the last day of the common parent's taxable year within which falls such short period, uses such limitation for its taxable year which includes such last day;

(iv) The minimum accumulated earnings credit provided by section 535(c)(2)

§ 1.244-1

26 CFR Ch. I (4-1-17 Edition)

(or in the case of a mere holding or investment company, the accumulated earnings credit provided by section 535(c)(3)) allowable for such short period shall be the amount computed by dividing (a) the amount (if any) by which \$100,000 exceeds the aggregate of the accumulated earnings and profits of the corporations, which are members of the affiliated group on the last day of such short period, as of the close of their taxable years preceding the taxable year which includes the last day of such short period, by (b) the number of such members on the last day of such short period;

(v) The deduction allowable under section 615(a) for such short period shall be limited to an amount equal to \$100,000 divided by the number of corporations which are members of the affiliated group on the last day of such short period;

(vi) If the expenditures to which section 615(a) applies which are paid or incurred by such corporation during such short period would, when added to the aggregate of the amounts deducted or deferred (in taxable years ending before the last day of such short period) which are taken into account in applying the limitation of section 615(c) by corporations which are members of the affiliated group on the last day of such short period exceed \$400,000, then section 615 shall not apply to any such expenditure so paid or incurred by such corporation to the extent such expenditure would exceed an amount equal to (a) the amount (if any) by which \$400,000 exceeds the aggregate of the amounts so deducted or deferred in such taxable years (computed as if each member filed a separate return), divided by (b) the number of corporations in the group which have taxable years ending on such last day;

(vii) If such corporation is a life insurance company taxable under section 802, the small business deduction under sections 804(a)(4) and 809(d)(10) shall not exceed an amount equal to (a) \$25,000, divided by (b) the number of life insurance companies taxable under section 802 which are members of the affiliated group on the last day of such short period; and

(viii) The exemption from estimated tax (for purposes of estimated tax fil-

ing requirements under section 6016 and the addition to tax under section 6655 for failure to pay estimated tax) for such short period shall be an amount equal to \$100,000 divided by the number of corporations which are members of the affiliated group on the last day of such short period.

[T.D. 6992, 34 FR 821, Jan. 18, 1969, as amended by T.D. 7376, 40 FR 42745, Sept. 16, 1975]

§ 1.244-1 Deduction for dividends received on certain preferred stock.

A corporation is allowed a deduction under section 244 for dividends received on certain preferred stock of certain public utility corporations subject to taxation under chapter 1 of the Code. The deduction is allowable only for dividends received on the preferred stock of a public utility with respect to which the deduction for dividends paid provided in section 247 (relating to dividends paid on certain preferred stock of public utilities) is allowable to the distributing corporation.

§ 1.244-2 Computation of deduction.

(a) *General rule.* Section 244(a) provides a formula for the computation of the deduction for dividends received on the preferred stock of a public utility. For purposes of this computation, the normal tax rate referred to in section 244(a)(2)(B) shall be determined without regard to any additional tax imposed by section 1562(b). See section 1562(b)(4). The deduction computed under section 244(a) is subject to the limitation provided in section 246.

(b) *Qualifying dividends.* Section 244(b) provides that in the case of dividends received on the preferred stock of a public utility in taxable years ending after December 31, 1963, which are “qualifying dividends” (as defined in section 243(b)(1), but determined without regard to section 243(c)(4)), the computation of the deduction for dividends received shall be made by applying the formula provided by section 244(a) separately to such qualifying dividends. For such purposes, 100 percent shall be used in lieu of the 85 percent specified in section 244(a)(3).

(c) *Examples.* The computation of the deduction provided in section 244 may be illustrated by the following examples:

Example 1. Corporation X, which files its income tax returns on the calendar year basis, received in 1965 \$100,000 as dividends on the preferred stock of corporation Y, a public utility corporation which is subject to taxation under chapter 1 of the Code. The deduction provided in section 247 is allowable to Y, the distributing corporation, with respect to these dividends and they are not "qualifying dividends" (as defined in section 243(b)(1) but determined without regard to section 243(c)(4)). The corporation normal tax rate and the surtax rate for the calendar year 1965 are 22 percent and 26 percent, respectively. The deduction allowable to X under section 244(a) for the year 1965 with respect to these dividends is \$60,208.33, computed as follows:

Dividends received on preferred stock of corporation Y	\$100,000.00
Less: The fraction specified in section 244(a)(2): $14/48 \times \$100,000$	29,166.67
Amount subject to 85-percent deduction	70,833.33
Deduction—85 percent of \$70,833.33	60,208.33

The result would be the same if X or Y (or both) were subject to the 6-percent additional tax imposed by section 1562(b) for 1965.

Example 2. Assume the same facts as in *Example 1* and also assume that in 1965 corporation X received \$200,000 as dividends on the preferred stock of Corporation Z, a public utility corporation which is subject to taxation under chapter 1 of the Code. Assume further that such dividends are "qualifying dividends" (as defined in section 243(b)(1) but determined without regard to section 243(c)(4)). The deduction provided in section 247 is allowable to Z, the distributing corporation, with respect to these dividends. The deduction allowable to X under section 244 for the year 1965 is \$201,875, computed as follows:

Deduction allowable under section 244(a) with respect to the dividend received from Y (see <i>Example 1</i>)	\$60,208.33
Deduction allowable under section 244(b) with respect to the dividend received from Z: Qualifying dividends received on preferred stock of corporation Z	200,000.00
Less: The fraction specified in section 244(a)(2): $14/48 \times \$200,000$	58,333.33
Deduction	141,666.67
Deduction allowable under section 244 for 1965	201,875.00

[T.D. 6992, 34 FR 825, Jan. 18, 1969]

§ 1.245-1 Dividends received from certain foreign corporations.

(a) *General rule.* (1) A corporation is allowed a deduction under section 245(a) for dividends received from a foreign corporation (other than a foreign

personal holding company as defined in section 552) which is subject to taxation under chapter 1 of the Code if, for an uninterrupted period of not less than 36 months ending with the close of the foreign corporation's taxable year in which the dividends are paid, (i) the foreign corporation is engaged in trade or business in the United States, and (ii) 50 percent or more of the foreign corporation's entire gross income is effectively connected with the conduct of a trade or business in the United States by that corporation. If the foreign corporation has been in existence less than 36 months as of the close of the taxable year in which the dividends are paid, then the applicable uninterrupted period to be taken into consideration in lieu of the uninterrupted period of 36 or more months is the entire period such corporation has been in existence as of the close of such taxable year. An uninterrupted period which satisfied the twofold requirement with respect to business activity and gross income may start at a date later than the date on which the foreign corporation first commenced an uninterrupted period of engaging in trade or business within the United States, but the applicable uninterrupted period is in any event the longest uninterrupted period which satisfies such twofold requirement. The deduction under section 245(a) is allowable to any corporation, whether foreign or domestic, receiving dividends from a distributing corporation which meets the requirements of that section.

(2) Any taxable year of a foreign corporation which falls within the uninterrupted period described in section 245(a)(2) shall not be taken into account in applying section 245(a)(2) and this paragraph if the 100 percent dividends received deduction would be allowable under paragraph (b) of this section, whether or not in fact allowed, with respect to any dividends payable, whether or not in fact paid, out of the earnings and profits of such foreign corporation for that taxable year. Thus, in such case the foreign corporation shall be treated as having no earnings and profits for that taxable year for purposes of determining the dividends received deduction allowable

under section 245(a) and this paragraph. However, that taxable year may be taken into account for purposes of determining whether the foreign corporation meets the requirements of section 245(a) that, for the uninterrupted period specified therein, the foreign corporation is engaged in trade or business in the United States and meets the 50 percent gross income requirement.

(b) *Dividends from wholly owned foreign subsidiaries.* (1) A domestic corporation is allowed a deduction under section 245(b) for any taxable year beginning after December 31, 1966, for dividends received from a foreign corporation (other than a foreign personal holding company as defined in section 552) which is subject to taxation under Chapter 1 of the Code if:

(i) The domestic corporation owns either directly or indirectly all of the outstanding stock of the foreign corporation during the entire taxable year of the domestic corporation in which the dividends are received, and

(ii) The dividends are paid out of earnings and profits of a taxable year of the foreign corporation during which (a) the domestic corporation receiving the dividends owns directly or indirectly throughout such year all of the outstanding stock of the foreign corporation, and (b) all of the gross income of the foreign corporation from all sources is effectively connected for that year with the conduct of a trade or business in the United States by that corporation.

(2) The deduction allowed by section 245(b) does not apply if an election under section 1562, relating to the privilege of a controlled group of corporations to elect multiple surtax exemptions, is effective for either the taxable year of the domestic corporation in which the dividends are received or the taxable year of the foreign corporation out of the earnings and profits of which the dividends are paid.

(c) *Rules of application.* (1) Except as provided in section 246, the deduction provided by section 245 for any taxable year is the sum of the amounts computed under paragraphs (1) and (2) of section 245(a) plus, in the case of a domestic corporation for any taxable

year beginning after December 31, 1966, the sum of the amounts computed under section 245(b)(2).

(2) To the extent that a dividend received from a foreign corporation is treated as a dividend from a domestic corporation in accordance with section 243(d) and § 1.243-3, it shall not be treated as a dividend received from a foreign corporation for purposes of this section.

(3) For purposes of section 245 (a) and (b), the amount of a distribution shall be determined under subparagraph (B) (without reference to subparagraph (C)) of section 301(b)(1).

(4) In determining from what year's earnings and profits a dividend is treated as having been distributed for purposes of this section, the principles of paragraph (a) of § 1.316-2 shall apply. A dividend shall be considered to be distributed, first, out of the earnings and profits of the taxable year which includes the date the dividend is distributed, second, out of the earnings and profits accumulated for the immediately preceding taxable year, third, out of the earnings and profits accumulated for the second preceding taxable year, etc. A deficit in an earnings and profits account for any taxable year shall reduce the most recently accumulated earnings and profits for a prior year in such account. If there are no accumulated earnings and profits in an earnings and profits account because of a deficit incurred in a prior year, such deficit must be restored before earnings and profits can be accumulated in a subsequent accounting year. See also paragraph (c) of § 1.243-3 and paragraph (a)(6) of § 1.243-4.

(5) For purposes of this section the gross income of a foreign corporation for any period before its first taxable year beginning after December 31, 1966, which is from sources within the United States shall be treated as gross income which is effectively connected for that period with the conduct of a trade or business in the United States by that corporation.

(6) For the determination of the source of income and the income which is effectively connected with the conduct of a trade or business in the United States, see sections 861 through 864, and the regulations thereunder.

(d) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. Corporation A (a foreign corporation filing its income tax returns on a calendar year basis) whose stock is 100 percent owned by Corporation B (a domestic corporation filing its income tax returns on a calendar year basis) for the first time engaged in trade or business within the United States on January 1, 1943, and qualifies under section 245 for the entire period beginning on that date and ending on December 31, 1954. Corporation A had accumulated earnings and profits of \$50,000 immediately prior to January 1, 1943, and had earnings and profits of \$10,000 for each taxable year during the uninterrupted period from January 1, 1943, through December 31, 1954. It derived for the period from January 1, 1943, through December 31, 1953, 90 percent of its gross income from sources within the United States and in 1954 derived 95 percent of its gross income from sources within the United States. During the calendar years 1943, 1944, 1945, 1946, and 1947 Corporation A distributed in each year \$15,000; during the calendar years 1948, 1949, 1950, 1951, 1952, and 1953 it distributed in each year \$5,000; and during the year 1954, \$50,000. An analysis of the accumulated earnings and profits under the above statement of facts discloses that at December 31, 1953, the accumulation amounted to \$55,000, of which \$25,000 was accumulated prior to the "uninterrupted period" and \$30,000 was accumulated during the uninterrupted period. (See section 316(a) and paragraph (c) of this section.) For 1954 a deduction under section 245 of \$31,025 (\$8,075 on 1954 earnings of the foreign corporation, plus \$22,950 from the \$30,000 accumulation at December 31, 1953) for dividends received from a foreign corporation is allowable to Corporation B with respect to the \$50,000 received from Corporation A, computed as follows:

(i) \$8,075, which is \$8,500 (85 percent—the percent specified in section 243 for the calendar year 1954—of the \$10,000 of earnings and profits of the taxable year) multiplied by 95 percent (the portion of the gross income of Corporation A derived during the taxable year 1954 from sources within the United States), plus

(ii) \$22,950, which is \$25,500 (85 percent—the percent specified in section 243 for the calendar year 1954—of \$30,000, the part of the earnings and profits accumulated after the beginning of the uninterrupted period) multiplied by 90 percent (the portion of the gross income of Corporation A derived from sources within the United States during that portion of the uninterrupted period ending at the beginning of the taxable year 1954).

Example 2. If in *Example 1*, Corporation A for the taxable year 1954 had incurred a deficit of \$10,000 (shown to have been incurred

before December 31) the amount of the earnings and profits accumulated after the beginning of the uninterrupted period would be \$20,000. If Corporation A had distributed \$50,000 on December 31, 1954, the deduction under section 245 for dividends received from a foreign corporation allowable to Corporation B for 1954 would be \$15,300, computed by multiplying \$17,000 (85 percent—the percent specified in section 243 for the calendar year 1954—of \$20,000 earnings and profits accumulated after the beginning of the uninterrupted period) by 90 percent (the portion of the gross income of Corporation A derived from United States sources during that portion of the uninterrupted period ending at the beginning of the taxable year 1954).

Example 3. Corporation A (a foreign corporation filing its income tax returns on a calendar year basis) whose stock is 100 percent owned by corporation B (a domestic corporation filing its income tax returns on a calendar year basis) for the first time engaged in trade or business within the United States on January 1, 1960, and qualifies under section 245 for the entire period beginning on that date and ending on December 31, 1963. In 1963, A derived 75 percent of its gross income from sources within the United States. A's earnings and profits for 1963 (computed as of the close of the taxable year without diminution by reason of any distributions made during the taxable year) are \$200,000. On December 31, 1963, corporation A distributes to corporation B 100 shares of corporation C stock which have an adjusted basis in A's hands of \$40,000 and a fair market value of \$100,000. For purposes of computing the deduction under section 245 for dividends received from a foreign corporation, the amount of the distribution is \$40,000. B is allowed a deduction under section 245 of \$25,500, i.e., \$34,000 (\$40,000 multiplied by 85 percent, the percent specified in section 243 for 1963), multiplied by 75 percent (the portion of the gross income of corporation A derived during 1963 from sources within the United States).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6752, 29 FR 12701, Sept. 9, 1964; T.D. 6830; 30 FR 8046, June 23, 1965; T.D. 7293, 38 FR 32793, Nov. 28, 1973]

§ 1.246-1 Deductions not allowed for dividends from certain corporations.

The deductions provided in sections 243 (relating to dividends received by corporations), 244 (relating to dividends received on certain preferred stock), and 245 (relating to dividends received from certain foreign corporations), are not allowable with respect to any dividend received from:

§ 1.246-2

26 CFR Ch. I (4-1-17 Edition)

(a) A corporation organized under the China Trade Act, 1922 (15 U.S.C. ch. 4) (see section 941); or

(b) A corporation which is exempt from tax under section 501 (relating to certain charitable, etc., organizations) or section 521 (relating to farmers' cooperative associations) for the taxable year of the corporation in which the distribution is made or for its next preceding taxable year; for

(c) A corporation to which section 931 (relating to income from sources within possessions of the United States) applies for the taxable year of the corporation in which the distribution is made or for its next preceding taxable year; or

(d) A real estate investment trust which, for its taxable year in which the distribution is made, is taxable under Part II, Subchapter M, Chapter 1 of the Code. See section 243(c)(3), paragraph (c) of § 1.243-2, section 857(c), and paragraph (d) of § 1.857-6.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6598, 27 FR 4092, Apr. 28, 1962; T.D. 7767, 46 FR 11264, Feb. 6, 1981]

§ 1.246-2 Limitation on aggregate amount of deductions.

(a) *General rule.* The sum of the deductions allowed by sections 243(a)(1) (relating to dividends received by corporations), 244(a) (relating to dividends received on certain preferred stock), and 245 (relating to dividends received from certain foreign corporations), except as provided in section 246(b)(2) and in paragraph (b) of this section, is limited to 85 percent of the taxable income of the corporation. The taxable income of the corporation for this purpose is computed without regard to the net operating loss deduction allowed by section 172, the deduction for dividends paid on certain preferred stock of public utilities allowed by section 247, any capital loss carryback under section 1212(a)(1), and the deductions provided in sections 243(a)(1), 244(a), and 245. For definition of the term *taxable income*, see section 63.

(b) *Effect of net operating loss.* If the shareholder corporation has a net operating loss (as determined under sec. 172) for a taxable year, the limitation provided in section 246(b)(1) and in paragraph (a) of this section is not ap-

plicable for such taxable year. In that event, the deductions provided in sections 243(a)(1), 244(a), and 245 shall be allowable for all tax purposes to the shareholder corporation for such taxable year without regard to such limitation. If the shareholder corporation does not have a net operating loss for the taxable year, however, the limitation will be applicable for all tax purposes for such taxable year. In determining whether the shareholder corporation has a net operating loss for a taxable year under section 172, the deductions allowed by sections 243(a)(1), 244(a), and 245 are to be computed without regard to the limitation provided in section 246(b)(1) and in paragraph (a) of this section.

[T.D. 6992, 34 FR 825, Jan. 18, 1969, as amended by T.D. 7301, 39 FR 963, Jan. 4, 1974]

§ 1.246-3 Exclusion of certain dividends.

(a) *In general.* Corporate taxpayers are denied, in certain cases, the dividends-received deduction provided by section 243 (dividends received by corporations), section 244 (dividends received on certain preferred stock), and section 245 (dividends received from certain foreign corporations). The above-mentioned dividends-received deductions are denied, under section 246(c)(1), to corporate shareholders:

(1) If the dividend is in respect of any share of stock which is sold or otherwise disposed of in any case where the taxpayer has held such share for 15 days or less; or

(2) If and to the extent that the taxpayer is under an obligation to make corresponding payments with respect to substantially identical stock or securities. It is immaterial whether the obligation has arisen pursuant to a short sale or otherwise.

(b) *Ninety-day rule for certain preference dividends.* In the case of any stock having a preference in dividends, a special rule is provided by section 246(c)(2) in lieu of the 15-day rule described in section 246(c)(1) and paragraph (a)(1) of this section. If the taxpayer receives dividends on such stock which are attributable to a period or periods aggregating in excess of 366 days, the holding period specified in

section 246(c)(1)(A) shall be 90 days (in lieu of 15 days).

(c) *Definitions*—(1) “*Otherwise disposed of*”. As used in this section the term *otherwise disposed of* includes disposal by gift.

(2) “*Substantially identical stock or securities*”. The term *substantially identical stock or securities* is to be applied according to the facts and circumstances in each case. In general, the term has the same meaning as the corresponding terms in sections 1091 and 1233 and the regulations thereunder. See paragraph (d)(1) of § 1.1233-1.

(3) *Obligation to make corresponding payments*. (i) Section 246(c)(1)(B) of the Code denies the dividends-received deduction to a corporate taxpayer to the extent that such taxpayer is under an obligation, with respect to substantially identical stock or securities, to make payments corresponding to the dividend received. Thus, for example, where a corporate taxpayer is in both a “long” and “short” position with respect to the same stock on the date that such stock goes ex-dividend, the dividend received on the stock owned by the taxpayer will not be eligible for the dividends-received deduction to the extent that the taxpayer is obligated to make payments to cover the dividends with respect to its offsetting short position in the same stock. The dividends-received deduction is denied in such a case without regard to the length of time the taxpayer has held the stock on which such dividends are received.

(ii) The provisions of subdivision (i) of this subparagraph may be illustrated by the following example:

Example. Y Corporation owns 100 shares of the Z Corporation’s common stock on January 1, 1959. Z Corporation on January 15, 1959, declares a dividend of \$1.00 per share payable to shareholders of record on January 30, 1959. On January 21, 1959, Y Corporation sells short 25 shares of the Z Corporation’s common stock and remains in the short position on January 31, 1959, the day that Z Corporation’s common stock goes ex-dividend. Y Corporation is therefore obligated to make a payment to the lender of the 25 shares of Z Corporation’s common stock which were sold short, corresponding to the \$1.00 a share dividend that the lender would have received on those 25 shares, or \$25.00. Therefore, \$25.00 of the \$100.00 that the Y Corporation receives as dividends from the Z Corporation with re-

spect to the 100 shares of common stock in which it has a long position is not eligible for the dividends-received deduction.

(d) *Determination of holding period*—(1) *In general.* Special rules are provided by paragraph (3) of section 246(c) for determining the period for which the taxpayer has held any share of stock for purposes of the restriction provided by such section. In computing the holding period the day of disposition but not the day of acquisition shall be taken into account. Also, there shall not be taken into account any day which is more than 15 days after the date on which the share of stock becomes ex-dividend. Thus, the holding period is automatically terminated at the end of such 15-day period without regard to how long the stock may be held after that date. In the case of stock qualifying under paragraph (2) of section 246(c) (as having preference in dividends) a 90-day period is substituted for the 15-day period prescribed in this subparagraph. Finally, section 1223(4), relating to holding periods in the case of wash sales, shall not apply. Therefore, tacking of the holding period of the stock disposed of to the holding period of the stock acquired where a wash sale occurs is not permitted for purposes of determining the holding period described in section 246(c).

(2) *Special rules.* Section 246(c) requires that the holding periods determined thereunder shall be appropriately reduced for any period that the taxpayer’s stock holding is offset by a corresponding short position resulting from an option to sell, a contractual obligation to sell, or a short sale of, substantially identical stock or securities. The holding periods of stock held for a period of 15 days or less on the date such short position is created shall accordingly be reduced to the extent of such short position. Where the amount of stock acquired within such period exceeds the amount as to which the taxpayer establishes a short position, the stock the holding period of which must be reduced because of such short position shall be that most recently acquired within such period. If, on the date the short position is created, the amount of stock subject to the short position exceeds the amount, if any, of stock held by the taxpayer

for 15 days or less, the excess shares of stock sold short shall, to the extent thereof, postpone until the termination of the short position the commencement of the holding periods of subsequently acquired stock. Stock having a preference in dividends is also subject to the rules prescribed in this subparagraph, except that the 90-day period provided by paragraph (b) of this section shall apply in lieu of the 15-day period otherwise applicable. The rules prescribed in this subparagraph may be illustrated by the following examples:

Example 1. L Company purchased 100 shares of Z Corporation's common stock during January 1959. On November 26, 1959, L Company purchased an additional 100 shares of the same stock. On December 1, 1959, Z Corporation declared a dividend payable on its common stock to shareholders of record on December 20, 1959. Also on December 1, L Company sold short 150 shares of Z Corporation's common stock. On December 16, 1959 (before the stock went ex-dividend), L Company closed its short sale with 150 shares purchased on that date. In determining, for purposes of section 246(c), whether L Company has held the 100 shares of stock acquired on November 26 for a period in excess of 15 days, the period of the short position (from December 2 through December 16) shall be excluded. Thus, if on or before December 26, 1959, L Company sold the 100 shares of Z Corporation stock which it purchased on November 26, 1959, it would not be entitled to a dividends-received deduction for the dividends received on such shares because it would have held such shares for 15 days or less on the date of the sale. Since L Company had held the 100 shares acquired during January 1959 for more than 15 days on December 2, 1959, and since it was under no obligation to make payments corresponding to the dividends received thereon, section 246(c) is inapplicable to the dividends received with respect to those shares.

Example 2. Assume the same facts as in *Example 1* above except that the additional 100 shares of Z Corporation common stock were purchased by L Company on December 10, 1959, rather than November 26, 1959. In determining, for purposes of section 246(c), whether L Company has held such shares for a period in excess of 15 days, the period from December 11, 1959, until December 16, 1959 (the date the short sale made on December 1 was closed), shall be excluded.

(e) *Effective date.* The provisions of this section shall apply to stock acquired after December 31, 1957, or with respect to stock acquired before that date where the taxpayer has made a

short sale of substantially identical stock or securities after that date.

§ 1.246-4 Dividends from a DISC or former DISC.

The deduction provided in section 243 (relating to dividends received by corporations) is not allowable with respect to any dividend (whether in the form of a deemed or actual distribution or an amount treated as a dividend pursuant to section 995(c)) from a corporation which is a DISC or former DISC (as defined in section 992(a)(1) or (3) as the case may be) to the extent such dividend is from the corporation's accumulated DISC income (as defined in section 996(f)(1)) or previously taxed income (as defined in section 996(f)(2)) or is a deemed distribution pursuant to section 995(b)(1) in a taxable year for which the corporation qualifies (or is treated) as a DISC. To the extent that a dividend is paid out of earnings and profits which are not made up of accumulated DISC income or previously taxed income, the corporate recipient is entitled to the deduction provided in section 243 in the same manner and to the same extent as a dividend from a domestic corporation which is not a DISC or former DISC.

[T.D. 7283, 38 FR 20824, Aug. 3, 1973]

§ 1.246-5 Reduction of holding periods in certain situations.

(a) *In general.* Under section 246(c)(4)(C), the holding period of stock for purposes of the dividends received deduction is appropriately reduced for any period in which a taxpayer has diminished its risk of loss by holding one or more other positions with respect to substantially similar or related property. This section provides rules for applying section 246(c)(4)(C).

(b) *Definitions—(1) Substantially similar or related property.* The term substantially similar or related property is applied according to the facts and circumstances in each case. In general, property is substantially similar or related to stock when—

(i) The fair market values of the stock and the property primarily reflect the performance of—

- (A) A single firm or enterprise;
 - (B) The same industry or industries;
- or

(C) The same economic factor or factors such as (but not limited to) interest rates, commodity prices, or foreign-currency exchange rates; and

(ii) Changes in the fair market value of the stock are reasonably expected to approximate, directly or inversely, changes in the fair market value of the property, a fraction of the fair market value of the property, or a multiple of the fair market value of the property.

(2) *Diminished risk of loss.* A taxpayer has diminished its risk of loss on its stock by holding positions with respect to substantially similar or related property if changes in the fair market values of the stock and the positions are reasonably expected to vary inversely.

(3) *Position.* For purposes of this section, a position with respect to property is an interest (including a futures or forward contract or an option) in property or any contractual right to a payment, whether or not severable from stock or other property. A position does not include traditional equity rights to demand payment from the issuer, such as the rights traditionally provided by mandatorily redeemable preferred stock.

(4) *Reasonable expectations.* For purposes of paragraphs (b)(1)(i), (b)(2), or (c)(1)(vi) of this section, reasonable expectations are the expectations of a reasonable person, based on all the facts and circumstances at the later of the time the stock is acquired or the positions are entered into. Reasonable expectations include all explicit or implicit representations made with respect to the marketing or sale of the position.

(c) *Special rules*—(1) *Positions in more than one stock*—(i) *In general.* This paragraph (c)(1) provides rules for the treatment of positions that reflect the value of more than one stock. In general, positions that reflect the value of a portfolio of stocks are treated under the rules of paragraphs (c)(1) (ii) through (iv) of this section, and positions that reflect the value of more than one stock but less than a portfolio are treated under the rules of paragraph (c)(1)(v) of this section. A portfolio for this purpose is any group of stocks of 20 or more unrelated issuers. Para-

graph (c)(1)(vi) of this section provides an anti-abuse rule.

(ii) *Portfolios.* Notwithstanding paragraph (b)(1) of this section, a position reflecting the value of a portfolio of stocks is substantially similar or related to the stocks held by the taxpayer only if the position and the taxpayer's holdings substantially overlap as of the most recent testing date. A position may be substantially similar or related to a taxpayer's entire stock holdings or a portion of a taxpayer's stock holdings.

(iii) *Determining substantial overlap.* This paragraph (c)(1)(iii) provides rules for determining whether a position and a taxpayer's stock holdings or a portion of a taxpayer's stock holdings substantially overlap. Paragraphs (c)(1)(iii) (A) through (C) of this section determine whether there is substantial overlap as of any testing date.

(A) *Step One.* Construct a subportfolio (the Subportfolio) that consists of stock in an amount equal to the lesser of the fair market value of each stock represented in the position and the fair market value of the stock in the taxpayer's stock holdings. (The Subportfolio may contain fewer than 20 stocks.)

(B) *Step Two.* If the fair market value of the Subportfolio is equal to or greater than 70 percent of the fair market value of the stocks represented in the position, the position and the Subportfolio substantially overlap.

(C) *Step Three.* If the position does not substantially overlap with the Subportfolio, repeat Steps One and Two (paragraphs (c)(1)(iii)(A) and (B) of this section) reducing the size of the position. The largest percentage of the position that results in a substantial overlap is substantially similar or related to the Subportfolio determined with respect to that percentage of the position.

(iv) *Testing date.* A testing date is any day on which the taxpayer purchases or sells any stock if the fair market value of the stock or the fair market value of substantially similar or related property is reflected in the position, any day on which the taxpayer changes the position, or any day on which the composition of the position changes.

(v) *Nonportfolio positions.* A position that reflects the fair market value of more than one stock but not of a portfolio of stocks is treated as a separate position with respect to each of the stocks the value of which the position reflects.

(vi) *Anti-abuse rule.* Notwithstanding paragraphs (c)(1)(i) through (v) of this section, a position that reflects the value of more than one stock is a position in substantially similar or related property to the appropriate portion of the taxpayer's stock holdings if—

(A) Changes in the value of the position or the stocks reflected in the position are reasonably expected to virtually track (directly or inversely) changes in the value of the taxpayer's stock holdings, or any portion of the taxpayer's stock holdings and other positions of the taxpayer; and

(B) The position is acquired or held as part of a plan a principal purpose of which is to obtain tax savings (including by deferring tax) the value of which is significantly in excess of the expected pre-tax economic profits from the plan.

(2) *Options*—(i) *Options that are significantly out of the money.* For purposes of paragraph (b)(2) of this section, an option to sell that is significantly out of the money does not diminish the taxpayer's risk of loss on its stock unless the option is held as part of a strategy to substantially offset changes in the fair market value of the stock.

(ii) *Conversion rights.* Notwithstanding paragraphs (b)(1) and (2) of this section, a taxpayer is treated as diminishing its risk of loss by holding substantially similar or related property if it engages in the following transactions or their substantial equivalents—

(A) A short sale of common stock while holding convertible preferred stock of the same issuer and the price changes of the convertible preferred stock and the common stock are related;

(B) A short sale of a convertible debenture while holding convertible preferred stock into which the debenture is convertible or common stock; or

(C) A short sale of convertible preferred stock while holding common stock.

(3) *Stacking rule.* If a taxpayer diminishes its risk of loss by holding a position in substantially similar or related property with respect to only a portion of the shares that the taxpayer holds in a particular stock, the holding period of those shares having the shortest holding period is reduced.

(4) *Guarantees, surety agreements, or similar arrangements.* A taxpayer has diminished its risk of loss on stock by holding a position in substantially similar or related property if the taxpayer is the beneficiary of a guarantee, surety agreement, or similar arrangement and the guarantee, surety agreement, or similar arrangement provides for payments that will substantially offset decreases in the fair market value of the stock.

(5) *Hedges counted only once.* A position established as a hedge of one outstanding position, transaction, or obligation of the taxpayer (other than stock) is not treated as diminishing the risk of loss with respect to any other position held by the taxpayer. In determining whether a position is established to hedge an outstanding position, transaction, or obligation of the taxpayer, substantial deference will be given to the relationships that are established in its books and records at the time the position is entered into.

(6) *Use of related persons or pass-through entities.* Positions held by a party related to the taxpayer within the meaning of sections 267(b) or 707(b)(1) are treated as positions held by the taxpayer if the positions are held with a view to avoiding the application of this section or §1.1092(d)-2. In addition, a taxpayer is treated as diminishing its risk of loss by holding substantially similar or related property if the taxpayer holds an interest in, or is the beneficiary of, a pass-through entity, intermediary, or other arrangement with a view to avoiding the application of this section or §1.1092(d)-2.

(7) *Notional principal contracts.* For purposes of this section, rights and obligations under notional principal contracts are considered separately even though payments with regard to those rights and obligations are generally netted for other purposes. Therefore, if

Internal Revenue Service, Treasury

§ 1.246-5

a taxpayer is treated under the preceding sentence as receiving payments under a notional principal contract when the fair market value of the taxpayer's stock declines, the taxpayer has diminished its risk of loss by holding a position in substantially similar or related property regardless of the netting of the payments under the contract for any other purposes.

(d) *Examples.* The following examples illustrate the provisions of this section:

Example 1. General application to common stock. Corporation A and Corporation B are both automobile manufacturers. The fair market values of Corporation A and Corporation B common stock primarily reflect the value of the same industry. Because Corporation A and Corporation B common stock are affected not only by the general level of growth in the industry but also by individual corporate management decisions and corporate capital structures, changes in the fair market value of Corporation A common stock are not reasonably expected to approximate changes in the fair market value of the Corporation B common stock. Under paragraph (b)(1) of this section, Corporation A common stock is not substantially similar or related to Corporation B common stock.

Example 2. Common stock value primarily reflects commodity price. Corporation C and Corporation D both hold gold as their primary asset, and historically changes in the fair market value of Corporation C common stock approximated changes in the fair market value of Corporation D common stock. Corporation M purchased Corporation C common stock and sold short Corporation D common stock. Corporation C common stock is substantially similar or related to Corporation D common stock because their fair market values primarily reflect the performance of the same economic factor, the price of gold, and changes in the fair market value of Corporation C common stock are reasonably expected to approximate changes in the fair market value of Corporation D common stock. It was reasonably expected that changes in the fair market values of the Corporation C common stock and the short position in Corporation D common stock would vary inversely. Thus, Corporation M has diminished its risk of loss on its Corporation C common stock for purposes of section 246(c)(4)(C) and this section by holding a position in substantially similar or related property.

Example 3. Portfolios of stocks. (i) Corporation Z holds a portfolio of stocks and acquires a short position on a publicly traded index through a regulated futures contract (RFC) that reflects the value of a portfolio of

stocks as defined in paragraph (c)(1)(i) of this section. The index reflects the fair market value of stocks A through T. The values of stocks reflected in the index and the values of the same stocks in Corporation Z's holdings are as follows:

Stock	Z's holdings	RFC	Subportfolio
A	\$300	\$300	\$300
B	300	300	300
C	—	300	—
D	400	500	400
E	300	500	300
F	300	500	300
G	500	600	500
H	300	300	300
I	—	300	—
J	400	450	400
K	200	500	200
L	200	400	200
M	200	500	200
N	100	200	100
O	—	200	—
P	200	200	200
Q	100	300	100
R	200	100	100
S	100	100	100
T	100	200	100
Totals	\$4,200	\$6,750	\$4,100

(ii) The position is substantially similar or related to Z's stock holdings only if they substantially overlap. To determine whether they substantially overlap, Corporation Z must construct a Subportfolio of stocks with the lesser of the value of the stock as reflected in the RFC and its holdings. The Subportfolio is given in the rightmost column above. The value of the Subportfolio is 60.74 percent of the value of the stocks represented in the position (\$4100 ÷ \$6750), so the position and the Subportfolio do not substantially overlap.

(iii) To determine whether any portion of the position substantially overlaps with any portion of the Z's stock holdings, the values of the stocks in the RFC are reduced for purposes of the above steps. Eighty percent of the position and the corresponding subportfolio (consisting of stocks with a value of the lesser of the stocks represented in Z's holdings and in 80 percent of the RFC) substantially overlap, computed as follows:

Stock	Z's holdings	80% of RFC	Subportfolio
A	\$300	\$240	\$240
B	300	240	240
C	—	240	—
D	400	400	400
E	300	400	300
F	300	400	300
G	500	480	480
H	300	240	240
I	—	240	—
J	400	360	360
K	200	400	200
L	200	320	200

§ 1.247-1

26 CFR Ch. I (4-1-17 Edition)

Stock	Z's holdings	80% of RFC	Subportfolio
M	200	400	200
N	100	160	100
O	—	160	—
P	200	160	160
Q	100	240	100
R	200	80	80
S	100	80	80
T	100	160	100
Totals	\$4,200	\$5,400	\$3,780

(iv) Because \$3,780 is 70 percent of \$5,400, the Subportfolio substantially overlaps with 80 percent of the position. Under paragraph (c)(3) of this section, Z's stocks having the shortest holding period are treated as included in the Subportfolio. A larger portion of Z's stocks may be treated as substantially similar or related property under the anti-abuse rule of paragraph (c)(1)(vi) of this section.

Example 4. Hedges counted only once. January 1, 1996, Corporation X owns a \$100 million portfolio of stocks all of which would substantially overlap with a \$100 million regulated futures contract (RFC) on a commonly used index (the Index). On January 15, Corporation X enters into a \$100 million short position in an RFC on the Index with a March delivery date and enters into a \$75 million long position in an RFC on the Index for June delivery. Also on January 15, 1996, Corporation X indicates in its books and records that the long and short RFC positions are intended to offset one another. Under paragraph (c)(5) of this section, \$75 million of the short position in the RFC is not treated as diminishing the risk of loss on the stock portfolio and instead is treated as a straddle or a hedging transaction, as appropriate, with respect to the \$75 million long position in the RFC, under section 1092. The remaining \$25 million short position is treated as diminishing the risk of loss on the portfolio by holding a position in substantially similar or related property. The rules of paragraph (c)(1) determine how much of the portfolio is subject to this rule and the rules of paragraph (c)(3) determine which shares have their holding periods tolled.

(e) *Effective date—(1) In general.* The provisions of this section apply to dividends received on or after March 17, 1995, on stock acquired after July 18, 1984.

(2) *Special rule for dividends received on certain stock.* Notwithstanding paragraph (e)(1) of this section, this section applies to any dividends received by a taxpayer on stock acquired after July 18, 1984, if the taxpayer has diminished its risk of loss by holding substantially

similar or related property involving the following types of transactions—

(i) The short sale of common stock when holding convertible preferred stock of the same issuer and the price changes of the two stocks are related, or the short sale of a convertible debenture while holding convertible preferred stock into which the debenture is convertible (or common stock), or a short sale of convertible preferred stock while holding common stock; or

(ii) The acquisition of a short position in a regulated futures contract on a stock index, or the acquisition of an option to sell the regulated futures contract or the stock index itself, or the grant of a deep-in-the-money option to buy the regulated futures contract or the stock index while holding the stock of an investment company whose principal holdings mimic the performance of the stocks included in the stock index; or alternatively, while holding a portfolio composed of stocks that mimic the performance of the stocks included in the stock index.

[T.D. 8590, 60 FR 14638, Mar. 20, 1995]

§ 1.247-1 Deduction for dividends paid on preferred stock of public utilities.

(a) *Amount of deduction.* (1) A deduction is provided in section 247 for dividends paid during the taxable year by certain public utility corporations (see paragraph (b) of this section) on certain preferred stock (see paragraph (c) of this section). This deduction is an amount equal to the product of a specified fraction times the lesser of (i) the amount of the dividends paid during the taxable year by a public utility on its preferred stock (as defined in paragraph (c) of this section), or (ii) the taxable income of the public utility for such taxable year (computed without regard to the deduction allowed by section 247). The specified fraction for any taxable year is the fraction the numerator of which is 14 and the denominator of which is the sum of the corporation normal tax rate and the surtax rate for such taxable year specified in section 11. Since section 11 provides that for the calendar year 1954 the corporation normal tax rate is 30 percent and the surtax rate is 22 percent, the sum of the two tax rates is 52 percent and the

specified fraction for the calendar year 1954 is $14/52$. If, for example, section 11 should specify that the corporation's normal tax rate is 25 percent and the surtax rate is 22 percent for the calendar year, the sum of the two tax rates will be 47 percent and the specified fraction for the calendar year will be $14/47$. If Corporation A, a public utility which files its income tax return on the calendar year basis, pays \$100,000 dividends on its preferred stock in the calendar year 1954 and if its taxable income for such year is greater than \$100,000 the deduction allowable to Corporation A under section 247 for 1954 is \$100,000 times $14/52$, or \$26,923.08. If in 1954 Corporation A's taxable income, computed without regard to the deduction provided in section 247, had been \$90,000 (that is, less than the amount of the dividends which it paid on its preferred stock in that year), the deduction allowable under section 247 for 1954 would have been \$90,000 times $14/52$, or \$24,230.77.

(2) For the purpose of determining the amount of the deduction provided in section 247(a) and in subparagraph (1) of this paragraph, the amount of dividends paid in a given taxable year shall not include any amount distributed in such year with respect to dividends unpaid and accumulated in any taxable year ending before October 1, 1942. If any distribution is made in the current taxable year with respect to dividends unpaid and accumulated for a prior taxable year, such distribution will be deemed to have been made with respect to the earliest year or years for which there are dividends unpaid and accumulated. Thus, if a public utility makes a distribution with respect to a prior taxable year, it shall be considered that such distribution was made with respect to the earliest year or years for which there are dividends unpaid and accumulated, whether or not the public utility states that the distribution was made with respect to such year or years and even though the public utility stated that the distribution was made with respect to a later year. Even though it has dividends unpaid and accumulated with respect to a taxable year ending before October 1, 1942, a public utility may, however, include the dividends paid with respect

to the current taxable year in computing the deduction under section 247. If there are no dividends unpaid and accumulated with respect to a taxable year ending before October 1, 1942, a public utility may include the dividends paid with respect to a prior taxable year which ended after October 1, 1942, in computing the deduction under section 247; such public utility in addition may include the dividends paid with respect to the current taxable year in computing the deduction under section 247. However, if local law or its own charter requires a public utility to pay all unpaid and accumulated dividends before any dividends can be paid with respect to the current taxable year, such public utility may not include any distribution in the current year in computing the deduction under section 247 to the extent that there are dividends unpaid and accumulated with respect to taxable years ending before October 1, 1942.

(3) If a corporation which is engaged in one or more of the four types of business activities (called utility activities in this section) enumerated in section 247(b)(1) (the furnishing of telephone service or the sale of electrical energy, gas, or water) is also engaged in some other business that does not fall within any of the enumerated categories, the deduction under section 247 is allowable only for such portion of the amount computed under section 247(a) as is allocable to the income from utility activities. For this purpose, the allocation may be made on the basis of the ratio which the total income from the utility activities bears to total income from all sources (total income being considered either gross income or gross receipts, whichever method results in the higher deduction). However, if such an allocation reaches an inequitable result and the books of the corporation are so kept that the taxable income attributable to the utility activities can be readily determined, particularly where the books of the corporation are required by governmental bodies to be so kept for rate making or other purposes, the allocation may be made upon the basis of taxable income. No such apportionment will be required if the income

from sources other than utility activities is less than 20 percent of the total income of the corporation, irrespective of the method used in determining such total income.

(b) *Public utility.* As used in section 247 and this section, public utility means a corporation engaged in the furnishing of telephone service, or in the sale of electric energy, gas, or water if the rates charged by such corporation for such furnishing or sale, as the case may be, have been established or approved by a State or political subdivision thereof or by an agency or instrumentality of the United States or by a public utility or public service commission or other similar body of the District of Columbia or of any State or political subdivision thereof. If a schedule of rates has been filed with any of the above bodies having the power to disapprove such rates, then such rates shall be considered as established or approved rates even though such body has taken no action on the filed schedule. Rates fixed by contract between the corporation and the purchaser, except where the purchaser is the United States, a State, the District of Columbia, or an agency or political subdivision of the United States, a State, or the District of Columbia, shall not be considered as established or approved rates in those cases where they are not subject to direct control, or where no maximum rate for such contract rates has been established by the United States, a State, the District of Columbia, or by an agency or political subdivision thereof. The deduction provided in section 247 will not be denied solely because part of the gross income of the corporation consists of revenue derived from such furnishing or sale at rates which are not so regulated, provided the corporation establishes to the satisfaction of the Commissioner (1) that the revenue from regulated rates and the revenue from unregulated rates are derived from the operation of a single interconnected and coordinated system within a single area or region in one or more States, or from the operation of more than one such system and (2) that the regulation to which it is subject in part of its operating territory in one such system is effective to control

rates within the unregulated territory of the same system so that the rates within the unregulated territory have been and are substantially as favorable to users and consumers as are the rates within the regulated territory.

(c) *Preferred stock.* (1) For the purposes of section 247 and this section, preferred stock means stock (i) which was issued before October 1, 1942, (ii) the dividends in respect of which (during the whole of the taxable year, or the part of the taxable year after the actual date of the issue of such stock) were cumulative, nonparticipating as to current distributions, and payable in preference to the payment of dividends on other stock, and (iii) the rate of return on which is fixed and cannot be changed by a vote of the board of directors or by some similar method. However, if there are several classes of preferred stock, all of which meet the above requirements, the deduction provided in section 247 shall not be denied in the case of a given class of preferred stock merely because there is another class of preferred stock whose dividends are to be paid before those of the given class of stock. Likewise, it is immaterial for the purposes of section 247 and this section whether the stock be voting or nonvoting stock.

(2) Preferred stock issued on or after October 1, 1942, under certain circumstances will be considered as having been issued before October 1, 1942, for purposes of the deduction provided in section 247. If the new stock is issued on or after October 1, 1942, to refund or replace bonds or debentures which were issued before October 1, 1942, or to refund or replace other stock which was preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), such new stock shall be considered as having been issued before October 1, 1942. If preferred stock is issued to refund or replace stock which was preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), it shall be immaterial whether the preferred stock so refunded or replaced was issued before, on, or after October 1, 1942. If stock issued on or after October 1, 1942, to refund or replace stock which

was issued before October 1, 1942, and which was preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), is not itself preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), no stock issued to refund or replace such stock can be considered preferred stock for purposes of the deduction provided in section 247.

(3) In the case of any preferred stock issued on or after October 1, 1942, to refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other stock which was preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), only that portion of the stock issued on or after October 1, 1942, will be considered as having been issued before October 1, 1942, the par or stated value of which does not exceed the par, stated, or face value of such bonds, debentures, or other preferred stock which the new stock was issued to refund or replace. In such case no shares of the new stock issued on or after October 1, 1942, shall be earmarked in determining the deduction allowable under section 247, but the appropriate allocable portion of the total amount of dividends paid on such stock will be considered as having been paid on stock which was issued before October 1, 1942.

(4) The provisions of section 247(b)(2) may be illustrated by the following example:

Example. A public utility has outstanding 1,000 bonds which were issued before October 1, 1942, and each of which has a face value of \$100. On or after October 1, 1942, each of such bonds is retired in exchange for $1\frac{1}{10}$ shares of preferred stock issued on or after October 1, 1942, and having a par value of \$100 per share. Only $\frac{10}{11}$ of the dividends paid on the preferred stock thus issued in exchange for the bonds will be considered as having been paid on stock which was issued before October 1, 1942. Likewise, if preferred stock which is issued on or after October 1, 1942, has no par value but a stated value of \$50 per share and such stock is issued in a ratio of three shares to one share to refund or replace preferred stock having a par value of \$100 per share, only two-thirds of the dividends paid on the new shares of stock will be considered as

having been paid on stock which was issued before October 1, 1942.

(5) Whether or not preferred stock issued on or after October 1, 1942, was issued to refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other preferred stock, is in each case a question of fact. Among the factors to be considered is whether such stock is new in an economic sense to the corporation or whether it was issued merely to take the place, directly or indirectly, of bonds, debentures, or other preferred stock of such corporation. It is not necessary that the new preferred stock be issued in exchange for such bonds, debentures, or other preferred stock. The mere fact that the bonds, debentures, or other preferred stock remain in existence for a short period of time after the issuance of the new stock (or were retired before the issuance of the new stock) does not necessarily mean that such new stock was not issued to refund or replace such bonds, debentures, or other preferred stock. It is necessary to consider the entire transaction, including the issuance of the new preferred stock, the date of such issuance, the retirement of the old bonds, debentures, or preferred stock, and the date of such retirement, in order to determine whether such new stock really was issued to take the place of bonds, debentures, or other preferred stock of the corporation or whether it represents something essentially new in an economic sense in the corporation's financial structure. If, for example, a public utility, which has outstanding bonds issued before October 1, 1942, issues new preferred stock on October 1, 1954, in order to secure funds with which to retire such bonds and with the money paid in for such stock retires the bonds on November 1, 1954, such stock may be considered as having been issued to refund or replace bonds issued before October 1, 1942. Whether the money used to retire the bonds can be traced back and identified as the money paid in for the stock will have evidentiary value, but will not be conclusive, in determining whether the stock was issued to refund or replace the bonds. Similarly, whether the amount of money used to retire the bonds was smaller than, equal to, or

greater than that paid in for the stock, or whether the entire issue of bonds is retired, will be important, but not decisive, in making such determination.

(6) Preferred stock issued on or after October 1, 1942, by a corporation to refund or replace bonds or debentures of a second corporation which were issued before October 1, 1942, or to refund or replace other preferred stock of such second corporation, may be considered as having been issued before October 1, 1942, if such new stock was issued (i) in a transaction which is a reorganization within the meaning of section 368(a) or the corresponding provisions of the Internal Revenue Code of 1939; or (ii) in a transaction to which section 371 (relating to insolvency reorganizations), or the corresponding provisions of the Internal Revenue Code of 1939, is applicable; or (iii) in a transaction which is subject to the provisions of Part VI, Subchapter O, Chapter 1 of the Code (relating to exchanges and distributions in obedience to orders of the Securities and Exchange Commission) or to the corresponding provisions of the Internal Revenue Code of 1939. Whether the stock actually was issued to refund or replace bonds or debentures of the second corporation issued before October 1, 1942, or to refund or replace preferred stock of such second corporation, shall be determined under the same principles as if only one corporation were involved. A corporation may issue stock to refund or replace its own bonds, debentures, or other preferred stock in a transaction which is a reorganization within the meaning of section 368(a) or the corresponding provisions of the Internal Revenue Code of 1939, in a transaction to which section 371 or the corresponding provisions of the Internal Revenue Code of 1939 is applicable, or in a transaction which is subject to the provisions of Part VI, Subchapter O, Chapter 1 of the Code, or to the corresponding provisions of the Internal Revenue Code of 1939. The provisions of this paragraph, in addition, are applicable in case a corporation issues stock on or after October 1, 1942, to refund or replace its own bonds, debentures, or other preferred stock even though the issuance of such stock may not fall within one of the categories enumerated above.

(7) Even though stock issued on or after October 1, 1942, is considered as having been issued before October 1, 1942, by reason of having been issued to refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other preferred stock, such stock will not be deemed to be preferred stock within the meaning of section 247(b)(2), and no deduction will be allowable in respect of dividends paid on such stock, unless the stock fulfills all the other requirements of a preferred stock set forth in section 247(b)(2) and in this paragraph.

§ 1.248-1 Election to amortize organizational expenditures.

(a) *In general.* Under section 248(a), a corporation may elect to amortize organizational expenditures as defined in section 248(b) and § 1.248-1(b). In the taxable year in which a corporation begins business, an electing corporation may deduct an amount equal to the lesser of the amount of the organizational expenditures of the corporation, or \$5,000 (reduced (but not below zero) by the amount by which the organizational expenditures exceed \$50,000). The remainder of the organizational expenditures is deducted ratably over the 180-month period beginning with the month in which the corporation begins business. All organizational expenditures of the corporation are considered in determining whether the organizational expenditures exceed \$50,000, including expenditures incurred on or before October 22, 2004.

(b) *Organizational expenditures defined.* (1) Section 248(b) defines the term *organizational expenditures*. Such expenditures, for purposes of section 248 and this section, are those expenditures which are directly incident to the creation of the corporation. An expenditure, in order to qualify as an organizational expenditure, must be (i) incident to the creation of the corporation, (ii) chargeable to the capital account of the corporation, and (iii) of a character which, if expended incident to the creation of a corporation having a limited life, would be amortizable over such life. An expenditure which fails to meet each of these three tests may not

be considered an organizational expenditure for purposes of section 248 and this section.

(2) The following are examples of organizational expenditures within the meaning of section 248 and this section: legal services incident to the organization of the corporation, such as drafting the corporate charter, by-laws, minutes of original stock certificates, and the like; necessary accounting services; expenses of temporary directors and of organizational meetings of directors or stockholders; and fees paid to the State of incorporation.

(3) The following expenditures are not organizational expenditures within the meaning of section 248 and this section:

(i) Expenditures connected with issuing or selling shares of stock or other securities, such as commissions, professional fees, and printing costs. This is so even where the particular issue of stock to which the expenditures relate is for a fixed term of years;

(ii) Expenditures connected with the transfer of assets to a corporation.

(4) Expenditures connected with the reorganization of a corporation, unless directly incident to the creation of a corporation, are not organizational expenditures within the meaning of section 248 and this section.

(c) *Time and manner of making election.* A corporation is deemed to have made an election under section 248(a) to amortize organizational expenditures as defined in section 248(b) and § 1.248-1(b) for the taxable year in which the corporation begins business. A corporation may choose to forgo the deemed election by affirmatively electing to capitalize its organizational expenditures on a timely filed Federal income tax return (including extensions) for the taxable year in which the corporation begins business. The election either to amortize organizational expenditures under section 248(a) or to capitalize organizational expenditures is irrevocable and applies to all organizational expenditures of the corporation. A change in the characterization of an item as an organizational expenditure is a change in method of accounting to which sections 446 and 481(a) apply if the corporation treated the

item consistently for two or more taxable years. A change in the determination of the taxable year in which the corporation begins business also is treated as a change in method of accounting if the corporation amortized organizational expenditures for two or more taxable years.

(d) *Determination of when corporation begins business.* The deduction allowed under section 248 must be spread over a period beginning with the month in which the corporation begins business. The determination of the date the corporation begins business presents a question of fact which must be determined in each case in light of all the circumstances of the particular case. The words “begins business,” however, do not have the same meaning as “in existence.” Ordinarily, a corporation begins business when it starts the business operations for which it was organized; a corporation comes into existence on the date of its incorporation. Mere organizational activities, such as the obtaining of the corporate charter, are not alone sufficient to show the beginning of business. If the activities of the corporation have advanced to the extent necessary to establish the nature of its business operations, however, it will be deemed to have begun business. For example, the acquisition of operating assets which are necessary to the type of business contemplated may constitute the beginning of business.

(e) *Examples.* The following examples illustrate the application of this section:

Example 1. Expenditures of \$5,000 or less. Corporation X, a calendar year taxpayer, incurs \$3,000 of organizational expenditures after October 22, 2004, and begins business on July 1, 2011. Under paragraph (c) of this section, Corporation X is deemed to have elected to amortize organizational expenditures under section 248(a) in 2011. Therefore, Corporation X may deduct the entire amount of the organizational expenditures in 2011, the taxable year in which Corporation X begins business.

Example 2. Expenditures of more than \$5,000 but less than or equal to \$50,000. The facts are the same as in *Example 1* except that Corporation X incurs organizational expenditures of \$41,000. Under paragraph (c) of this section, Corporation X is deemed to have elected to amortize organizational expenditures under section 248(a) in 2011. Therefore,

Corporation X may deduct \$5,000 and the portion of the remaining \$36,000 that is allocable to July through December of 2011 ($\$36,000/180 \times 6 = \$1,200$) in 2011, the taxable year in which Corporation X begins business. Corporation X may amortize the remaining \$34,800 ($\$36,000 - \$1,200 = \$34,800$) ratably over the remaining 174 months.

Example 3. Subsequent change in the characterization of an item. The facts are the same as in *Example 2* except that Corporation X determines in 2013 that Corporation X incurred \$10,000 for an additional organizational expenditure erroneously deducted in 2011 under section 162 as a business expense. Under paragraph (c) of this section, Corporation X is deemed to have elected to amortize organizational expenditures under section 248(a) in 2011, including the additional \$10,000 of organizational expenditures. Corporation X is using an impermissible method of accounting for the additional \$10,000 of organizational expenditures and must change its method under § 1.446-1(e) and the applicable general administrative procedures in effect in 2013.

Example 4. Subsequent redetermination of year in which business begins. The facts are the same as in *Example 2* except that, in 2012, Corporation X deducted the organizational expenditures allocable to January through December of 2012 ($\$36,000/180 \times 12 = \$2,400$). In addition, in 2013 it is determined that Corporation X actually began business in 2012. Under paragraph (c) of this section, Corporation X is deemed to have elected to amortize organizational expenditures under section 248(a) in 2012. Corporation X impermissibly deducted organizational expenditures in 2011, and incorrectly determined the amount of organizational expenditures deducted in 2012. Therefore, Corporation X is using an impermissible method of accounting for the organizational expenditures and must change its method under § 1.446-1(e) and the applicable general administrative procedures in effect in 2013.

Example 5. Expenditures of more than \$50,000 but less than or equal to \$55,000. The facts are the same as in *Example 1* except that Corporation X incurs organizational expenditures of \$54,500. Under paragraph (c) of this section, Corporation X is deemed to have elected to amortize organizational expenditures under section 248(a) in 2011. Therefore, Corporation X may deduct \$500 ($\$5,000 - \$4,500$) and the portion of the remaining \$54,000 that is allocable to July through December of 2011 ($\$54,000/180 \times 6 = \$1,800$) in 2011, the taxable year in which Corporation X begins business. Corporation X may amortize the remaining \$52,200 ($\$54,000 - \$1,800 = \$52,200$) ratably over the remaining 174 months.

Example 6. Expenditures of more than \$55,000. The facts are the same as in *Example 1* except that Corporation X incurs organizational ex-

pensitures of \$450,000. Under paragraph (c) of this section, Corporation X is deemed to have elected to amortize organizational expenditures under section 248(a) in 2011. Therefore, Corporation X may deduct the amounts allocable to July through December of 2011 ($\$450,000/180 \times 6 = \$15,000$) in 2011, the taxable year in which Corporation X begins business. Corporation X may amortize the remaining \$435,000 ($\$450,000 - \$15,000 = \$435,000$) ratably over the remaining 174 months.

(f) *Effective/applicability date.* This section applies to organizational expenditures paid or incurred after August 16, 2011. However, taxpayers may apply all the provisions of this section to organizational expenditures paid or incurred after October 22, 2004, provided that the period of limitations on assessment of tax for the year the election under paragraph (c) of this section is deemed made has not expired. For organizational expenditures paid or incurred on or before September 8, 2008, taxpayers may instead apply § 1.248-1, as in effect prior to that date (§ 1.248-1 as contained in 26 CFR part 1 edition revised as of April 1, 2008).

[T.D. 9411, 73 FR 38913, July 8, 2008, as amended by T.D. 9542, 76 FR 50889, Aug. 17, 2011]

§ 1.249-1 Limitation on deduction of bond premium on repurchase.

(a) *Limitation*—(1) *General rule.* No deduction is allowed to the issuing corporation for any “repurchase premium” paid or incurred to repurchase a convertible obligation to the extent the repurchase premium exceeds a “normal call premium.”

(2) *Exception.* Under paragraph (e) of this section, the preceding sentence shall not apply to the extent the corporation demonstrates that such excess is attributable to the cost of borrowing and not to the conversion feature.

(b) *Obligations*—(1) *Definition.* For purposes of this section, the term *obligation* means any bond, debenture, note, or certificate or other evidence of indebtedness.

(2) *Convertible obligation.* Section 249 applies to an obligation which is convertible into the stock of the issuing corporation or a corporation which, at the time the obligation is issued or repurchased, is in control of or controlled by the issuing corporation. For purposes of this subparagraph, the term

control has the meaning assigned to such term by section 368(c).

(3) *Comparable nonconvertible obligation.* A nonconvertible obligation is comparable to a convertible obligation if both obligations are of the same grade and classification, with the same issue and maturity dates, and bearing the same rate of interest. The term *comparable nonconvertible obligation* does not include any obligation which is convertible into property.

(c) *Repurchase premium.* For purposes of this section, the term *repurchase premium* means the excess of the repurchase price paid or incurred to repurchase the obligation over its adjusted issue price (within the meaning of § 1.1275-1(b)) as of the repurchase date. For the general rules applicable to the deductibility of repurchase premium, see § 1.163-7(c). This paragraph (c) applies to convertible obligations repurchased on or after March 2, 1998.

(d) *Normal call premium*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph, for purposes of this section, a *normal call premium* on a convertible obligation is an amount equal to a normal call premium on a nonconvertible obligation which is comparable to the convertible obligation. A normal call premium on a comparable nonconvertible obligation is a call premium specified in dollars under the terms of such obligation. Thus, if such a specified call premium is constant over the entire term of the obligation, the normal call premium is the amount specified. If, however, the specified call premium varies during the period the comparable nonconvertible obligation is callable or if such obligation is not callable over its entire term, the normal call premium is the amount specified for the period during the term of such comparable nonconvertible obligation which corresponds to the period during which the convertible obligation was repurchased.

(2) *One-year's interest rule.* For a convertible obligation repurchased on or after March 2, 1998, a call premium specified in dollars under the terms of the obligation is considered to be a normal call premium on a nonconvertible obligation if the call premium applicable when the obligation is repurchased does not exceed an amount

equal to the interest (including original issue discount) that otherwise would be deductible for the taxable year of repurchase (determined as if the obligation were not repurchased). The provisions of this subparagraph shall not apply if the amount of interest payable for the corporation's taxable year is subject under the terms of the obligation to any contingency other than repurchase prior to the close of such taxable year.

(e) *Exception*—(1) *In general.* If a repurchase premium exceeds a normal call premium, the general rule of paragraph (a) (1) of this section does not apply to the extent that the corporation demonstrates to the satisfaction of the Commissioner or his delegate that such repurchase premium is attributable to the cost of borrowing and is not attributable to the conversion feature. For purposes of this paragraph, if a normal call premium cannot be established under paragraph (d) of this section, the amount thereof shall be considered to be zero.

(2) *Determination of the portion of a repurchase premium attributable to the cost of borrowing and not attributable to the conversion feature.* (i) For purposes of subparagraph (1) of this paragraph, the portion of a repurchase premium which is attributable to the cost of borrowing and which is not attributable to the conversion feature is the amount by which the selling price of the convertible obligation increased between the dates it was issued and repurchased by reason of a decline in yields on comparable nonconvertible obligations traded on an established securities market or, if such comparable traded obligations do not exist, by reason of a decline in yields generally on nonconvertible obligations which are as nearly comparable as possible.

(ii) In determining the amount under paragraph (e)(2)(i) of this section, appropriate consideration shall be given to all factors affecting the selling price or yields of comparable nonconvertible obligations. Such factors include general changes in prevailing yields of comparable obligations between the dates the convertible obligation was issued and repurchased and the amount (if any) by which the selling price of

the nonconvertible obligation was affected by reason of any change in the issuing corporation's credit quality or the credit quality of the obligation during such period (determined on the basis of widely published financial information or on the basis of other relevant facts and circumstances which reflect the relative credit quality of the corporation or the comparable obligation).

(iii) The relationship between selling price and yields in subdivision (i) of this subparagraph shall ordinarily be determined by means of standard bond tables.

(f) *Effective/applicability dates*—(1) *In general.* Under section 414(c) of the Tax Reform Act of 1969, the provisions of section 249 and this section shall apply to any repurchase of a convertible obligation occurring after April 22, 1969, other than a convertible obligation repurchased pursuant to a binding obligation incurred on or before April 22, 1969, to repurchase such convertible obligation at a specified call premium. A binding obligation on or before such date may arise if, for example, the issuer irrevocably obligates itself, on or before such date, to repurchase the convertible obligation at a specified price after such date, or if, for example, the issuer, without regard to the terms of the convertible obligation, negotiates a contract which, on or before such date, irrevocably obligates the issuer to repurchase the convertible obligation at a specified price after such date. A binding obligation on or before such date does not include a privilege in the convertible obligation permitting the issuer to call such convertible obligation after such date, which privilege was not exercised on or before such date.

(2) *Effect on transactions not subject to this section.* No inferences shall be drawn from the provisions of section 249 and this section as to the proper treatment of transactions not subject to such provisions because of the effective date limitations thereof. For provisions relating to repurchases of convertible bonds or other evidences of indebtedness to which section 249 and this section do not apply, see §§ 1.163-3(c) and 1.163-4(c).

(3) *Portion of repurchase premium attributable to cost of borrowing.* Paragraph (e)(2)(ii) of this section applies to any repurchase of a convertible obligation occurring on or after July 6, 2011.

(g) *Example.* The provisions of this section may be illustrated by the following example:

Example. On May 15, 1968, corporation A issues a callable 20-year convertible bond at face for \$1,000 bearing interest at 10 percent per annum. The bond is convertible at any time into 2 shares of the common stock of corporation A. Under the terms of the bond, the applicable call price prior to May 15, 1975, is \$1,100. On June 1, 1974, corporation A calls the bond for \$1,100. Since the repurchase premium, \$100 (i.e., \$1,100 minus \$1,000), was specified in dollars in the obligation and does not exceed 1 year's interest at the rate fixed in the obligation, the \$100 is considered under paragraph (d) (2) of this section to be a normal call premium on a comparable nonconvertible obligation. Accordingly, A may deduct the \$100 under § 1.163-3(c).

[T.D. 7259, 38 FR 4254, Feb. 12, 1973, as amended by T.D. 8746, 62 FR 68182, Dec. 31, 1997; T.D. 9533, 76 FR 39281, July 6, 2011; T.D. 9637, 78 FR 54759, Sept. 6, 2013]

ITEMS NOT DEDUCTIBLE

§ 1.261-1 General rule for disallowance of deductions.

In computing taxable income, no deduction shall be allowed, except as otherwise expressly provided in Chapter 1 of the Code, in respect of any of the items specified in Part IX (section 262 and following), Subchapter B, Chapter 1 of the Code, and the regulations thereunder.

§ 1.262-1 Personal, living, and family expenses.

(a) *In general.* In computing taxable income, no deduction shall be allowed, except as otherwise expressly provided in chapter 1 of the Code, for personal, living, and family expenses.

(b) *Examples of personal, living, and family expenses.* Personal, living, and family expenses are illustrated in the following examples:

(1) Premiums paid for life insurance by the insured are not deductible. See also section 264 and the regulations thereunder.

(2) The cost of insuring a dwelling owned and occupied by the taxpayer as a personal residence is not deductible.

(3) Expenses of maintaining a household, including amounts paid for rent, water, utilities, domestic service, and the like, are not deductible. A taxpayer who rents a property for residential purposes, but incidentally conducts business there (his place of business being elsewhere) shall not deduct any part of the rent. If, however, he uses part of the house as his place of business, such portion of the rent and other similar expenses as is properly attributable to such place of business is deductible as a business expense.

(4) Losses sustained by the taxpayer upon the sale or other disposition of property held for personal, living, and family purposes are not deductible. But see section 165 and the regulations thereunder for deduction of losses sustained to such property by reason of casualty, etc.

(5) Expenses incurred in traveling away from home (which include transportation expenses, meals, and lodging) and any other transportation expenses are not deductible unless they qualify as expenses deductible under section 162 (relating to trade or business expenses), section 170 (relating to charitable contributions), section 212 (relating to expenses for production of income), section 213 (relating to medical expenses), or section 217 (relating to moving expenses), and the regulations under those sections. The taxpayer's costs of commuting to his place of business or employment are personal expenses and do not qualify as deductible expenses. For expenses paid or incurred before October 1, 2014, a taxpayer's expenses for lodging when not traveling away from home (local lodging) are nondeductible personal expenses. However, taxpayers may deduct local lodging expenses that qualify under section 162 and are paid or incurred in taxable years for which the period of limitation on credit or refund under section 6511 has not expired. For expenses paid or incurred on or after October 1, 2014, a taxpayer's local lodging expenses are personal expenses and are not deductible unless they qualify as deductible expenses under section 162. Except as permitted under section 162 or 212, the costs of a taxpayer's meals not incurred in traveling away

from home are nondeductible personal expenses.

(6) Amounts paid as damages for breach of promise to marry, and attorney's fees and other costs of suit to recover such damages, are not deductible.

(7) Generally, attorney's fees and other costs paid in connection with a divorce, separation, or decree for support are not deductible by either the husband or the wife. However, the part of an attorney's fee and the part of the other costs paid in connection with a divorce, legal separation, written separation agreement, or a decree for support, which are properly attributable to the production or collection of amounts includible in gross income under section 71 are deductible by the wife under section 212.

(8) The cost of equipment of a member of the armed services is deductible only to the extent that it exceeds nontaxable allowances received for such equipment and to the extent that such equipment is especially required by his profession and does not merely take the place of articles required in civilian life. For example, the cost of a sword is an allowable deduction in computing taxable income, but the cost of a uniform is not. However, amounts expended by a reservist for the purchase and maintenance of uniforms which may be worn only when on active duty for training for temporary periods, when attending service school courses, or when attending training assemblies are deductible except to the extent that nontaxable allowances are received for such amounts.

(9) Expenditures made by a taxpayer in obtaining an education or in furthering his education are not deductible unless they qualify under section 162 and § 1.162-5 (relating to trade or business expenses).

(c) *Cross references.* Certain items of a personal, living, or family nature are deductible to the extent expressly provided under the following sections, and the regulations under those sections:

- (1) Section 163 (interest).
- (2) Section 164 (taxes).
- (3) Section 165 (losses).
- (4) Section 166 (bad debts).
- (5) Section 170 (charitable, etc., contributions and gifts).

§ 1.263(a)-0

(6) Section 213 (medical, dental, etc., expenses).

(7) Section 214 (expenses for care of certain dependents).

(8) Section 215 (alimony, etc., payments).

(9) Section 216 (amounts representing taxes and interest paid to cooperative housing corporation).

(10) Section 217 (moving expenses).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6796, 30 FR 1041, Feb. 2, 1965; T.D. 6918, 32 FR 6681, May 2, 1967; T.D. 7207, 37 FR 20795, Oct. 4, 1972; T.D. 9696, 79 FR 59114, Oct. 1, 2014]

§ 1.263(a)-0 Outline of regulations under section 263(a).

This section lists the paragraphs in §§ 1.263(a)-1 through 1.263(a)-3 and § 1.263(a)-6.

§ 1.263(a)-1 Capital expenditures; in general.

(a) General rule for capital expenditures.
(b) Coordination with other provisions of the Internal Revenue Code.

(c) Definitions.

(1) Amount paid.

(2) Produce.

(d) Examples of capital expenditures.

(e) Amounts paid to sell property.

(1) In general.

(2) Dealer in property.

(3) Examples.

(f) De minimis safe harbor election.

(1) In general.

(i) Taxpayer with applicable financial statement.

(ii) Taxpayer without applicable financial statement.

(iii) Taxpayer with both an applicable financial statement and a non-qualifying financial statement.

(2) Exceptions to de minimis safe harbor.

(3) Additional rules.

(i) Transaction and other additional costs.

(ii) Materials and supplies.

(iii) Sale or disposition.

(iv) Treatment of de minimis amounts.

(v) Coordination with section 263A.

(vi) Written accounting procedures for groups of entities.

(vii) Combined expensing accounting procedures.

(4) Definition of applicable financial statement.

(5) Time and manner of making election.

(6) Anti-abuse rule.

(7) Examples.

(g) Accounting method changes.

(h) Effective/applicability date.

(1) In general.

(2) Early application of this section.

(iv) Leased property other than buildings.

(4) Improvements to property.

(5) Additional rules.

(i) Year placed in service.

(ii) Change in subsequent taxable year.

(6) Examples.

(f) Improvements to leased property.

(1) In general.

(2) Lessee improvements.

(i) Requirement to capitalize.

(ii) Unit of property for lessee improvements.

(3) Lessor improvements.

(i) Requirement to capitalize.

(ii) Unit of property for lessor improvements.

(4) Examples.

(g) Special rules for determining improvement costs.

(1) Certain costs incurred during an improvement.

(i) In general.

(ii) Exception for individuals' residences.

(2) Removal costs.

(i) In general.

(ii) Examples.

(3) Related amounts.

(4) Compliance with regulatory requirements.

(h) Safe harbor for small taxpayers.

(1) In general.

(2) Application with other safe harbor provisions.

(3) Qualifying taxpayer.

(i) In general.

(ii) Application to new taxpayers.

(iii) Treatment of short taxable year.

(iv) Definition of gross receipts.

(4) Eligible building property.

(5) Unadjusted basis.

(i) Eligible building property owned by the taxpayer.

(ii) Eligible building property leased to the taxpayer.

(6) Time and manner of election.

(7) Treatment of safe harbor amounts.

(8) Safe harbor exceeded.

(9) Modification of safe harbor amounts.

(10) Examples.

(i) Safe harbor for routine maintenance.

(1) In general.

(i) Routine maintenance for buildings.

(ii) Routine maintenance for property other than buildings.

(2) Rotable and temporary spare parts.

(3) Exceptions.

(4) Class life.

(5) Coordination with section 263A.

(6) Examples.

(j) Capitalization of betterments.

(1) In general.

(2) Application of betterment rules.

(i) In general.

(ii) Application of betterment rules to buildings.

(iii) Unavailability of replacement parts.

(iv) Appropriate comparison.

(A) In general.

(B) Normal wear and tear.

(C) Damage to property.

(4) Examples.

(k) Capitalization of restorations.

(1) In general.

(2) Application of restorations to buildings.

(3) Exception for losses based on salvage value.

(4) Restoration of damage from casualty.

(i) Limitation.

(ii) Amounts in excess of limitation.

(5) Rebuild to like-new condition.

(6) Replacement of a major component or substantial structural part.

(i) In general.

(A) Major component.

(B) Substantial structural part.

(ii) Major components and substantial structural parts of buildings.

(7) Examples.

(1) Capitalization of amounts to adapt property to a new or different use.

(1) In general.

(2) Application of adaptation rule to buildings.

(3) Examples.

(m) Optional regulatory accounting method.

(1) In general.

§ 1.263(a)-0

26 CFR Ch. I (4-1-17 Edition)

(2) Eligibility for regulatory accounting method.

(3) Description of regulatory accounting method.

(4) Examples.

(n) Election to capitalize repair and maintenance costs.

(1) In general.

(2) Time and manner of election.

(3) Exception.

(4) Examples.

(o) Treatment of capital expenditures.

(p) Recovery of capitalized amounts.

(q) Accounting method changes.

(r) Effective/applicability date.

(1) In general.

(2) Early application of this section.

(i) In general.

(ii) Transition rule for elections on 2012 and 2013 returns.

(3) Optional application of TD 9564.

§ 1.263(a)-4 *Amounts paid to acquire or create intangibles.*

(a) Overview.

(b) Capitalization with respect to intangibles.

(1) In general.

(2) Published guidance.

(3) Separate and distinct intangible asset.

(i) Definition.

(ii) Creation or termination of contract rights.

(iii) Amounts paid in performing services.

(iv) Creation of computer software.

(v) Creation of package design.

(4) Coordination with other provisions of the Internal Revenue Code.

(i) In general.

(ii) Example.

(c) Acquired intangibles.

(1) In general.

(2) Readily available software.

(3) Intangibles acquired from an employee.

(4) Examples.

(d) Created intangibles.

(1) In general.

(2) Financial interests.

(i) In general.

(ii) Amounts paid to create, originate, enter into, renew or renegotiate.

(iii) Renegotiate.

(iv) Coordination with other provisions of this paragraph (d).

(v) Coordination with § 1.263(a)-5.

(vi) Examples.

(3) Prepaid expenses.

(i) In general.

(ii) Examples.

(4) Certain memberships and privileges.

(i) In general.

(ii) Examples.

(5) Certain rights obtained from a government agency.

(i) In general.

(ii) Examples.

(6) Certain contract rights.

(i) In general.

(ii) Amounts paid to create, originate, enter into, renew or renegotiate.

(iii) Renegotiate.

(iv) Right.

(v) *De minimis* amounts.

(vi) Exception for lessee construction allowances.

(vii) Examples.

(7) Certain contract terminations.

(i) In general.

(ii) Certain break-up fees.

(iii) Examples.

(8) Certain benefits arising from the provision, production, or improvement of real property.

(i) In general.

(ii) Exclusions.

(iii) Real property.

(iv) Impact fees and dedicated improvements.

(v) Examples.

(9) Defense or perfection of title to intangible property.

(i) In general.

(ii) Certain break-up fees.

(iii) Example.

(e) Transaction costs.

(1) Scope of facilitate.

(i) In general.

(ii) Treatment of termination payments.

(iii) Special rule for contracts.

(iv) Borrowing costs.

(v) Special rule for stock redemption costs of open-end regulated investment companies.

(2) Coordination with paragraph (d) of this section.

(3) Transaction.

(4) Simplifying conventions.

(i) In general.

(ii) Employee compensation.

(iii) *De minimis* costs.

(iv) Election to capitalize.

(5) Examples.

(f) 12-month rule.

(1) In general.

(2) Duration of benefit for contract terminations.

(3) Inapplicability to created financial interests and self-created amortizable section 197 intangibles.

(4) Inapplicability to rights of indefinite duration.

(5) Rights subject to renewal.

(i) In general.

(ii) Reasonable expectancy of renewal.

(iii) Safe harbor pooling method.

(6) Coordination with section 461.

(7) Election to capitalize.

(8) Examples.

(g) Treatment of capitalized costs.

(1) In general.

(2) Financial instruments.

(h) Special rules applicable to pooling.

(1) In general.

(2) Method of accounting.

§ 1.263(a)–1 Capital expenditures; in general.

(a) *General rule for capital expenditures.* Except as provided in chapter 1 of the Internal Revenue Code, no deduction is allowed for—

(1) Any amount paid for new buildings or for permanent improvements or betterments made to increase the value of any property or estate; or

(2) Any amount paid in restoring property or in making good the exhaustion thereof for which an allowance is or has been made.

(b) *Coordination with other provisions of the Internal Revenue Code.* Nothing in this section changes the treatment of any amount that is specifically provided for under any provision of the Internal Revenue Code or the Treasury Regulations other than section 162(a) or section 212 and the regulations under those sections. For example, see section 263A, which requires taxpayers to capitalize the direct and allocable indirect costs to property produced by the taxpayer and property acquired for resale. See also section 195 requiring taxpayers to capitalize certain costs as start-up expenditures.

(c) *Definitions.* For purposes of this section, the following definitions apply:

(1) *Amount paid.* In the case of a taxpayer using an accrual method of accounting, the terms *amount paid* and *payment* mean a liability incurred (within the meaning of § 1.446-1(c)(1)(ii)). A liability may not be taken into account under this section prior to the taxable year during which the liability is incurred.

(2) *Produce* means construct, build, install, manufacture, develop, create, raise, or grow. This definition is intended to have the same meaning as the definition used for purposes of section 263A(g)(1) and § 1.263A-2(a)(1)(i), except that improvements are excluded from the definition in this paragraph (c)(2) and are separately defined and addressed in § 1.263(a)-3.

(d) *Examples of capital expenditures.* The following amounts paid are examples of capital expenditures:

(1) An amount paid to acquire or produce a unit of real or personal tangible property. See § 1.263(a)-2.

(2) An amount paid to improve a unit of real or personal tangible property. See § 1.263(a)-3.

(3) An amount paid to acquire or create intangibles. See § 1.263(a)-4.

(4) An amount paid or incurred to facilitate an acquisition of a trade or business, a change in capital structure of a business entity, and certain other transactions. See § 1.263(a)-5.

(5) An amount paid to acquire or create interests in land, such as easements, life estates, mineral interests, timber rights, zoning variances, or other interests in land.

(6) An amount assessed and paid under an agreement between bondholders or shareholders of a corporation to be used in a reorganization of the corporation or voluntary contributions by shareholders to the capital of the corporation for any corporate purpose. See section 118 and § 1.118-1.

(7) An amount paid by a holding company to carry out a guaranty of dividends at a specified rate on the stock of a subsidiary corporation for the purpose of securing new capital for the subsidiary and increasing the value of its stockholdings in the subsidiary. This amount must be added to the cost of the stock in the subsidiary.

(e) *Amounts paid to sell property—(1) In general.* Commissions and other

transaction costs paid to facilitate the sale of property are not currently deductible under section 162 or 212. Instead, the amounts are capitalized costs that reduce the amount realized in the taxable year in which the sale occurs or are taken into account in the taxable year in which the sale is abandoned if a deduction is permissible. These amounts are not added to the basis of the property sold or treated as an intangible asset under § 1.263(a)-4. See § 1.263(a)-5(g) for the treatment of amounts paid to facilitate the disposition of assets that constitute a trade or business.

(2) *Dealer in property.* In the case of a dealer in property, amounts paid to facilitate the sale of such property are treated as ordinary and necessary business expenses.

(3) *Examples.* The following examples, which assume the sale is not an installment sale under section 453, illustrate the rules of this paragraph (e):

Example 1. Sales costs of real property. A owns a parcel of real estate. A sells the real estate and pays legal fees, recording fees, and sales commissions to facilitate the sale. A must capitalize the fees and commissions and, in the taxable year of the sale, must reduce the amount realized from the sale of the real estate by the fees and commissions.

Example 2. Sales costs of dealers. Assume the same facts as in *Example 1*, except that A is a dealer in real estate. The commissions and fees paid to facilitate the sale of the real estate may be deducted as ordinary and necessary business expenses under section 162.

Example 3. Sales costs of personal property used in a trade or business. B owns a truck for use in B's trade or business. B decides to sell the truck on November 15, Year 1. B pays for an appraisal to determine a reasonable asking price. On February 15, Year 2, B sells the truck to C. In Year 1, B must capitalize the amount paid to appraise the truck, and in Year 2, must reduce the amount realized from the sale of the truck by the amount paid for the appraisal.

Example 4. Costs of abandoned sale of personal property used in a trade or business. Assume the same facts as in *Example 3*, except that, instead of selling the truck on February 15, Year 2, B decides on that date not to sell the truck and takes the truck off the market. In Year 1, B must capitalize the amount paid to appraise the truck. However, B may recognize the amount paid to appraise the truck as a loss under section 165 in Year 2, the taxable year when the sale is abandoned.

Example 5. Sales costs of personal property not used in a trade or business. Assume the same facts as in *Example 3*, except that B does not use the truck in B's trade or business but instead uses it for personal purposes. In Year 1, B must capitalize the amount paid to appraise the truck, and in Year 2, must reduce the amount realized from the sale of the truck by the amount paid for the appraisal.

Example 6. Costs of abandoned sale of personal property not used in a trade or business. Assume the same facts as in *Example 5*, except that, instead of selling the truck on February 15, Year 2, B decides on that date not to sell the truck and takes the truck off the market. In Year 1, B must capitalize the amount paid to appraise the truck. Although B abandons the sale in Year 2, B may not treat the amount paid to appraise the truck as a loss under section 165 because the truck was not used in B's trade or business or in a transaction entered into for profit.

(f) *De minimis safe harbor election*—(1) *In general.* Except as otherwise provided in paragraph (f)(2) of this section, a taxpayer electing to apply the de minimis safe harbor under this paragraph (f) may not capitalize under § 1.263(a)-2(d)(1) or § 1.263(a)-3(d) any amount paid in the taxable year for the acquisition or production of a unit of tangible property nor treat as a material or supply under § 1.162-3(a) any amount paid in the taxable year for tangible property if the amount specified under this paragraph (f)(1) meets the requirements of paragraph (f)(1)(i) or (f)(1)(ii) of this section. However, section 263A and the regulations under section 263A require taxpayers to capitalize the direct and allocable indirect costs of property produced by the taxpayer (for example, property improved by the taxpayer) and property acquired for resale.

(i) *Taxpayer with applicable financial statement.* A taxpayer electing to apply the de minimis safe harbor may not capitalize under § 1.263(a)-2(d)(1) or § 1.263(a)-3(d) nor treat as a material or supply under § 1.162-3(a) any amount paid in the taxable year for property described in paragraph (f)(1) of this section if—

(A) The taxpayer has an applicable financial statement (as defined in paragraph (f)(4) of this section);

(B) The taxpayer has at the beginning of the taxable year written ac-

counting procedures treating as an expense for non-tax purposes—

(1) Amounts paid for property costing less than a specified dollar amount; or

(2) Amounts paid for property with an economic useful life (as defined in § 1.162-3(c)(4)) of 12 months or less;

(C) The taxpayer treats the amount paid for the property as an expense on its applicable financial statement in accordance with its written accounting procedures; and

(D) The amount paid for the property does not exceed \$5,000 per invoice (or per item as substantiated by the invoice) or other amount as identified in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter).

(ii) *Taxpayer without applicable financial statement.* A taxpayer electing to apply the de minimis safe harbor may not capitalize under § 1.263(a)-2(d)(1) or § 1.263(a)-3(d) nor treat as a material or supply under § 1.162-3(a) any amount paid in the taxable year for property described in paragraph (f)(1) of this section if—

(A) The taxpayer does not have an applicable financial statement (as defined in paragraph (f)(4) of this section);

(B) The taxpayer has at the beginning of the taxable year accounting procedures treating as an expense for non-tax purposes—

(1) Amounts paid for property costing less than a specified dollar amount; or

(2) Amounts paid for property with an economic useful life (as defined in § 1.162-3(c)(4)) of 12 months or less;

(C) The taxpayer treats the amount paid for the property as an expense on its books and records in accordance with these accounting procedures; and

(D) The amount paid for the property does not exceed \$500 per invoice (or per item as substantiated by the invoice) or other amount as identified in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter).

(iii) *Taxpayer with both an applicable financial statement and a non-qualifying financial statement.* For purposes of this paragraph (f)(1), if a taxpayer has an applicable financial statement defined

§ 1.263(a)-1

26 CFR Ch. I (4-1-17 Edition)

in paragraph (f)(4) of this section in addition to a financial statement that does not meet requirements of paragraph (f)(4) of this section, the taxpayer must meet the requirements of paragraph (f)(1)(i) of this section to qualify to elect the de minimis safe harbor under this paragraph (f).

(2) *Exceptions to de minimis safe harbor.* The de minimis safe harbor in paragraph (f)(1) of this section does not apply to the following:

(i) Amounts paid for property that is or is intended to be included in inventory property;

(ii) Amounts paid for land;

(iii) Amounts paid for rotatable, temporary, and standby emergency spare parts that the taxpayer elects to capitalize and depreciate under § 1.162-3(d); and

(iv) Amounts paid for rotatable and temporary spare parts that the taxpayer accounts for under the optional method of accounting for rotatable parts pursuant to § 1.162-3(e).

(3) *Additional rules*—(i) *Transaction and other additional costs.* A taxpayer electing to apply the de minimis safe harbor under paragraph (f)(1) of this section is not required to include in the cost of the tangible property the additional costs of acquiring or producing such property if these costs are not included in the same invoice as the tangible property. However, the taxpayer electing to apply the de minimis safe harbor under paragraph (f)(1) of this section must include in the cost of such property all additional costs (for example, delivery fees, installation services, or similar costs) if these additional costs are included on the same invoice with the tangible property. For purposes of this paragraph, if the invoice includes amounts paid for multiple tangible properties and such invoice includes additional invoice costs related to these multiple properties, then the taxpayer must allocate the additional invoice costs to each property using a reasonable method, and each property, including allocable labor and overhead, must meet the requirements of paragraph (f)(1)(i) or paragraph (f)(1)(ii) of this section, whichever is applicable. Reasonable allocation methods include, but are not limited to specific identification, a pro

rata allocation, or a weighted average method based on the property's relative cost. For purposes of this paragraph (f)(3)(i), additional costs consist of the costs of facilitating the acquisition or production of such tangible property under § 1.263(a)-2(f) and the costs for work performed prior to the date that the tangible property is placed in service under § 1.263(a)-2(d).

(ii) *Materials and supplies.* If a taxpayer elects to apply the de minimis safe harbor provided under this paragraph (f), then the taxpayer must also apply the de minimis safe harbor to amounts paid for all materials and supplies (as defined under § 1.162-3) that meet the requirements of § 1.263(a)-1(f). See paragraph (f)(3)(iv) of this section for treatment of materials and supplies under the de minimis safe harbor.

(iii) *Sale or disposition.* Property to which a taxpayer applies the de minimis safe harbor contained in this paragraph (f) is not treated upon sale or other disposition as a capital asset under section 1221 or as property used in the trade or business under section 1231.

(iv) *Treatment of de minimis amounts.* An amount paid for property to which a taxpayer properly applies the de minimis safe harbor contained in this paragraph (f) is not treated as a capital expenditure under § 1.263(a)-2(d)(1) or § 1.263(a)-3(d) or as a material and supply under § 1.162-3, and may be deducted under § 1.162-1 in the taxable year the amount is paid provided the amount otherwise constitutes an ordinary and necessary expense incurred in carrying on a trade or business.

(v) *Coordination with section 263A.* Amounts paid for tangible property described in paragraph (f)(1) of this section may be subject to capitalization under section 263A if the amounts paid for tangible property comprise the direct or allocable indirect costs of other property produced by the taxpayer or property acquired for resale. See, for example, § 1.263A-1(e)(3)(ii)(R) requiring taxpayers to capitalize the cost of tools and equipment allocable to property produced or property acquired for resale.

(vi) *Written accounting procedures for groups of entities.* If the taxpayer's financial results are reported on the applicable financial statement (as defined in paragraph (f)(4) of this section) for a group of entities then, for purposes of paragraph (f)(1)(i)(A) of this section, the group's applicable financial statement may be treated as the applicable financial statement of the taxpayer, and for purposes of paragraphs (f)(1)(i)(B) and (f)(1)(i)(C) of this section, the written accounting procedures provided for the group and utilized for the group's applicable financial statement may be treated as the written accounting procedures of the taxpayer.

(vii) *Combined expensing accounting procedures.* For purposes of paragraphs (f)(1)(i) and (f)(1)(ii) of this section, if the taxpayer has, at the beginning of the taxable year, accounting procedures treating as an expense for non-tax purposes amounts paid for property costing less than a specified dollar amount and amounts paid for property with an economic useful life (as defined in § 1.162-3(c)(4)) of 12 months or less, then a taxpayer electing to apply the de minimis safe harbor under this paragraph (f) must apply the provisions of this paragraph (f) to amounts qualifying under either accounting procedure.

(4) *Definition of applicable financial statement.* For purposes of this paragraph (f), the taxpayer's applicable financial statement (AFS) is the taxpayer's financial statement listed in paragraphs (f)(4)(i) through (iii) of this section that has the highest priority (including within paragraph (f)(4)(ii) of this section). The financial statements are, in descending priority—

(i) A financial statement required to be filed with the Securities and Exchange Commission (SEC) (the 10-K or the Annual Statement to Shareholders);

(ii) A certified audited financial statement that is accompanied by the report of an independent certified public accountant (or in the case of a foreign entity, by the report of a similarly qualified independent professional) that is used for—

(A) Credit purposes;

(B) Reporting to shareholders, partners, or similar persons; or

(C) Any other substantial non-tax purpose; or

(iii) A financial statement (other than a tax return) required to be provided to the federal or a state government or any federal or state agency (other than the SEC or the Internal Revenue Service).

(5) *Time and manner of election.* A taxpayer that makes the election under this paragraph (f) must make the election for all amounts paid during the taxable year for property described in paragraph (f)(1) of this section and meeting the requirements of paragraph (f)(1)(i) or paragraph (f)(1)(ii) of this section, as applicable. A taxpayer makes the election by attaching a statement to the taxpayer's timely filed original Federal tax return (including extensions) for the taxable year in which these amounts are paid. Sections 301.9100-1 through 301.9100-3 of this chapter provide the rules governing extensions of the time to make regulatory elections. The statement must be titled "Section 1.263(a)-1(f) de minimis safe harbor election" and include the taxpayer's name, address, taxpayer identification number, and a statement that the taxpayer is making the de minimis safe harbor election under § 1.263(a)-1(f). In the case of a consolidated group filing a consolidated income tax return, the election is made for each member of the consolidated group by the common parent, and the statement must also include the names and taxpayer identification numbers of each member for which the election is made. In the case of an S corporation or a partnership, the election is made by the S corporation or the partnership and not by the shareholders or partners. An election may not be made through the filing of an application for change in accounting method or, before obtaining the Commissioner's consent to make a late election, by filing an amended Federal tax return. A taxpayer may not revoke an election made under this paragraph (f). The manner of electing the de minimis safe harbor under this paragraph (f) may be modified through guidance of general applicability (see

§§ 601.601(d)(2) and 601.602 of this chapter).

(6) *Anti-abuse rule.* If a taxpayer acts to manipulate transactions with the intent to achieve a tax benefit or to avoid the application of the limitations provided under paragraphs (f)(1)(i)(B)(I), (f)(1)(i)(D), (f)(1)(ii)(B)(I), and (f)(1)(ii)(D) of this section, appropriate adjustments will be made to carry out the purposes of this section. For example, a taxpayer is deemed to act to manipulate transactions with an intent to avoid the purposes and requirements of this section if—

(i) The taxpayer applies the de minimis safe harbor to amounts substantiated with invoices created to componentize property that is generally acquired or produced by the taxpayer (or other taxpayers in the same or similar trade or business) as a single unit of tangible property; and

(ii) This property, if treated as a single unit, would exceed any of the limitations provided under paragraphs (f)(1)(i)(B)(I), (f)(1)(i)(D), (f)(1)(ii)(B)(I), and (f)(1)(ii)(D) of this section, as applicable.

(7) *Examples.* The following examples illustrate the application of this paragraph (f). Unless otherwise provided, assume that section 263A does not apply to the amounts described.

Example 1. De minimis safe harbor; taxpayer without AFS. In Year 1, A purchases 10 printers at \$250 each for a total cost of \$2,500 as indicated by the invoice. Assume that each printer is a unit of property under § 1.263(a)-3(e). A does not have an AFS. A has accounting procedures in place at the beginning of Year 1 to expense amounts paid for property costing less than \$500, and A treats the amounts paid for the printers as an expense on its books and records. The amounts paid for the printers meet the requirements for the de minimis safe harbor under paragraph (f)(1)(ii) of this section. If A elects to apply the de minimis safe harbor under this paragraph (f) in Year 1, A may not capitalize the amounts paid for the 10 printers or any other amounts meeting the criteria for the de minimis safe harbor under paragraph (f)(1). Instead, in accordance with paragraph (f)(3)(iv) of this section, A may deduct these amounts under § 1.162-1 in the taxable year the amounts are paid provided the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on a trade or business.

Example 2. De minimis safe harbor; taxpayer without AFS. In Year 1, B purchases 10 com-

puters at \$600 each for a total cost of \$6,000 as indicated by the invoice. Assume that each computer is a unit of property under § 1.263(a)-3(e). B does not have an AFS. B has accounting procedures in place at the beginning of Year 1 to expense amounts paid for property costing less than \$1,000 and B treats the amounts paid for the computers as an expense on its books and records. The amounts paid for the printers do not meet the requirements for the de minimis safe harbor under paragraph (f)(1)(ii) of this section because the amount paid for the property exceeds \$500 per invoice (or per item as substantiated by the invoice). B may not apply the de minimis safe harbor election to the amounts paid for the 10 computers under paragraph (f)(1) of this section.

Example 3. De minimis safe harbor; taxpayer with AFS. C is a member of a consolidated group for Federal income tax purposes. C's financial results are reported on the consolidated applicable financial statements for the affiliated group. C's affiliated group has a written accounting policy at the beginning of Year 1, which is followed by C, to expense amounts paid for property costing \$5,000 or less. In Year 1, C pays \$6,250,000 to purchase 1,250 computers at \$5,000 each. C receives an invoice from its supplier indicating the total amount due (\$6,250,000) and the price per item (\$5,000). Assume that each computer is a unit of property under § 1.263(a)-3(e). The amounts paid for the computers meet the requirements for the de minimis safe harbor under paragraph (f)(1)(i) of this section. If C elects to apply the de minimis safe harbor under this paragraph (f) for Year 1, C may not capitalize the amounts paid for the 1,250 computers or any other amounts meeting the criteria for the de minimis safe harbor under paragraph (f)(1) of this section. Instead, in accordance with paragraph (f)(3)(iv) of this section, C may deduct these amounts under § 1.162-1 in the taxable year the amounts are paid provided the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on a trade or business.

Example 4. De minimis safe harbor; taxpayer with AFS. D is a member of a consolidated group for Federal income tax purposes. D's financial results are reported on the consolidated applicable financial statements for the affiliated group. D's affiliated group has a written accounting policy at the beginning of Year 1, which is followed by D, to expense amounts paid for property costing less than \$15,000. In Year 1, D pays \$4,800,000 to purchase 800 elliptical machines at \$6,000 each. D receives an invoice from its supplier indicating the total amount due (\$4,800,000) and the price per item (\$6,000). Assume that each elliptical machine is a unit of property under § 1.263(a)-3(e). D may not apply the de minimis safe harbor election to the amounts paid

for the 800 elliptical machines under paragraph (f)(1) of this section because the amount paid for the property exceeds \$5,000 per invoice (or per item as substantiated by the invoice).

Example 5. De minimis safe harbor; additional invoice costs. E is a member of a consolidated group for Federal income tax purposes. E's financial results are reported on the consolidated applicable financial statements for the affiliated group. E's affiliated group has a written accounting policy at the beginning of Year 1, which is followed by E, to expense amounts paid for property costing less than \$5,000. In Year 1, E pays \$45,000 for the purchase and installation of wireless routers in each of its 10 office locations. Assume that each wireless router is a unit of property under § 1.263(a)-3(e). E receives an invoice from its supplier indicating the total amount due (\$45,000), including the material price per item (\$2,500), and total delivery and installation (\$20,000). E allocates the additional invoice costs to the materials on a pro rata basis, bringing the cost of each router to \$4,500 (\$2,500 materials + \$2,000 labor and overhead). The amounts paid for each router, including the allocable additional invoice costs, meet the requirements for the de minimis safe harbor under paragraph (f)(1)(i) of this section. If E elects to apply the de minimis safe harbor under this paragraph (f) for Year 1, E may not capitalize the amounts paid for the 10 routers (including the additional invoice costs) or any other amounts meeting the criteria for the de minimis safe harbor under paragraph (f)(1) of this section. Instead, in accordance with paragraph (f)(3)(iv) of this section, E may deduct these amounts under § 1.162-1 in the taxable year the amounts are paid provided the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on a trade or business.

Example 6. De minimis safe harbor; non-invoice additional costs. F is a corporation that provides consulting services to its customer. F does not have an AFS, but F has accounting procedures in place at the beginning of Year 1 to expense amounts paid for property costing less than \$500. In Year 1, F pays \$600 to an interior designer to shop for, evaluate, and make recommendations regarding purchasing new furniture for F's conference room. As a result of the interior designer's recommendations, F acquires a conference table for \$500 and 10 chairs for \$300 each. In Year 1, F receives an invoice from the interior designer for \$600 for his services, and F receives a separate invoice from the furniture supplier indicating a total amount due of \$500 for the table and \$300 for each chair. For Year 1, F treats the amount paid for the table and each chair as an expense on its books and records, and F elects to use the de minimis safe harbor for amounts paid for tangible property that qualify under the safe

harbor. The amount paid to the interior designer is a cost of facilitating the acquisition of the table and chairs under § 1.263(a)-2(f). Under paragraph (f)(3)(i) of this section, F is not required to include in the cost of tangible property the additional costs of acquiring such property if these costs are not included in the same invoice as the tangible property. Thus, F is not required to include a pro rata allocation of the amount paid to the interior designer to determine the application of the de minimis safe harbor to the table and the chairs. Accordingly, the amounts paid by F for the table and each chair meet the requirements for the de minimis safe harbor under paragraph (f)(1)(ii) of this section, and F may not capitalize the amounts paid for the table or each chair under paragraph (f)(1) of this section. In addition, F is not required to capitalize the amounts paid to the interior designer as a cost that facilitates the acquisition of tangible property under § 1.263(a)-2(f)(3)(i). Instead, F may deduct the amounts paid for the table, chairs, and interior designer under § 1.162-1 in the taxable year the amounts are paid provided the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on a trade or business.

Example 7. De minimis safe harbor; 12-month economic useful life. G operates a restaurant. In Year 1, G purchases 10 hand-held point-of-service devices at \$300 each for a total cost of \$3,000 as indicated by invoice. G also purchases 3 tablet computers at \$500 each for a total cost of \$1,500 as indicated by invoice. Assume each point-of-service device and each tablet computer has an economic useful life of 12 months or less, beginning when they are used in G's business. Assume that each device and each tablet is a unit of property under § 1.263(a)-3(e). G does not have an AFS, but G has accounting procedures in place at the beginning of Year 1 to expense amounts paid for property costing \$300 or less and to expense amounts paid for property with an economic useful life of 12 months or less. Thus, G expenses the amounts paid for the hand-held devices on its books and records because each device costs \$300. G also expenses the amounts paid for the tablet computers on its books and records because the computers have an economic useful life of 12 months or less, beginning when they are used. The amounts paid for the hand-held devices and the tablet computers meet the requirements for the de minimis safe harbor under paragraph (f)(1)(ii) of this section. If G elects to apply the de minimis safe harbor under this paragraph (f) in Year 1, G may not capitalize the amounts paid for the hand-held devices, the tablet computers, or any other amounts meeting the criteria for the de minimis safe harbor under paragraph (f)(1) of this section. Instead, in accordance with paragraph

§ 1.263(a)-1

26 CFR Ch. I (4-1-17 Edition)

(f)(3)(iv) of this section, G may deduct the amounts paid for the hand-held devices and tablet computers under § 1.162-1 in the taxable year the amounts are paid provided the amounts otherwise constitute deductible ordinary and necessary business expenses incurred in carrying on a trade or business.

Example 8. De minimis safe harbor; limitation. Assume the facts as in *Example 7*, except G purchases the 3 tablet computers at \$600 each for a total cost of \$1,800. The amounts paid for the tablet computers do not meet the de minimis rule safe harbor under paragraphs (f)(1)(ii) and (f)(3)(vii) of this section because the cost of each computer exceeds \$500. Therefore, the amounts paid for the tablet computers may not be deducted under the safe harbor.

Example 9. De minimis safe harbor; materials and supplies. H is a corporation that provides consulting services to its customers. H has an AFS and a written accounting policy at the beginning of the taxable year to expense amounts paid for property costing \$5,000 or less. In Year 1, H purchases 1,000 computers at \$500 each for a total cost of \$500,000. Assume that each computer is a unit of property under § 1.263(a)-3(e) and is not a material or supply under § 1.162-3. In addition, H purchases 200 office chairs at \$100 each for a total cost of \$20,000 and 250 customized briefcases at \$80 each for a total cost of \$20,000. Assume that each office chair and each briefcase is a material or supply under § 1.162-3(c)(1). H treats the amounts paid for the computers, office chairs, and briefcases as expenses on its AFS. The amounts paid for computers, office chairs, and briefcases meet the requirements for the de minimis safe harbor under paragraph (f)(1)(i) of this section. If H elects to apply the de minimis safe harbor under this paragraph (f) in Year 1, H may not capitalize the amounts paid for the 1,000 computers, the 200 office chairs, and the 250 briefcases under paragraph (f)(1) of this section. H may deduct the amounts paid for the computers, the office chairs, and the briefcases under § 1.162-1 in the taxable year the amounts are paid provided the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on a trade or business.

Example 10. De minimis safe harbor; coordination with section 263A. J is a member of a consolidated group for Federal income tax purposes. J's financial results are reported on the consolidated AFS for the affiliated group. J's affiliated group has a written accounting policy at the beginning of Year 1, which is followed by J, to expense amounts paid for property costing less than \$1,000 or that has an economic useful life of 12 months or less. In Year 1, J acquires jigs, dies, molds, and patterns for use in the manufacture of J's products. Assume each jig, die, mold, and pattern is a unit of property under § 1.263(a)-3(e) and costs less than \$1,000. In

Year 1, J begins using the jigs, dies, molds and patterns to manufacture its products. Assume these items are materials and supplies under § 1.162-3(c)(1)(iii), and J elects to apply the de minimis safe harbor under paragraph (f)(1)(i) of this section to amounts qualifying under the safe harbor in Year 1. Under paragraph (f)(3)(v) of this section, the amounts paid for the jigs, dies, molds, and patterns may be subject to capitalization under section 263A if the amounts paid for these tangible properties comprise the direct or allocable indirect costs of other property produced by the taxpayer or property acquired for resale.

Example 11. De minimis safe harbor; anti-abuse rule. K is a corporation that provides hauling services to its customers. In Year 1, K decides to purchase a truck to use in its business. K does not have an AFS. K has accounting procedures in place at the beginning of Year 1 to expense amounts paid for property costing less than \$500. K arranges to purchase a used truck for a total of \$1,500. Prior to the acquisition, K requests the seller to provide multiple invoices for different parts of the truck. Accordingly, the seller provides K with four invoices during Year 1—one invoice of \$500 for the cab, one invoice of \$500 for the engine, one invoice of \$300 for the trailer, and a fourth invoice of \$200 for the tires. K treats the amounts paid under each invoice as an expense on its books and records. K elects to apply the de minimis safe harbor under paragraph (f) of this section in Year 1 and does not capitalize the amounts paid for each invoice pursuant to the safe harbor. Under paragraph (f)(6) of this section, K has applied the de minimis rule to amounts substantiated with invoices created to componentize property that is generally acquired as a single unit of tangible property in the taxpayer's type of business, and this property, if treated as single unit, would exceed the limitations provided under the de minimis rule. Accordingly, K is deemed to manipulate the transaction to acquire the truck with the intent to avoid the purposes of this paragraph (f). As a result, K may not apply the de minimis rule to these amounts and is subject to appropriate adjustments.

(g) *Accounting method changes.* Except for paragraph (f) of this section (the de minimis safe harbor election), a change to comply with this section is a change in method of accounting to which the provisions of sections 446 and 481 and the accompanying regulations apply. A taxpayer seeking to change to a method of accounting permitted in this section must secure the consent of the Commissioner in accordance with § 1.446-1(e) and follow the administrative procedures issued under § 1.446-

1(e)(3)(ii) for obtaining the Commissioner's consent to change its accounting method.

(h) *Effective/applicability date*—(1) *In general.* Except for paragraph (f) of this section, this section generally applies to taxable years beginning on or after January 1, 2014. Paragraph (f) of this section applies to amounts paid in taxable years beginning on or after January 1, 2014. Except as provided in paragraph (h)(1) and paragraph (h)(2) of this section, § 1.263(a)-1 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014.

(2) *Early application of this section*—(i) *In general.* Except for paragraph (f) of this section, a taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012. A taxpayer may choose to apply paragraph (f) of this section to amounts paid in taxable years beginning on or after January 1, 2012.

(ii) *Transition rule for de minimis safe harbor election on 2012 or 2013 returns.* If under paragraph (h)(2)(i) of this section, a taxpayer chooses to make the election to apply the de minimis safe harbor under paragraph (f) of this section for amounts paid in its taxable year beginning on or after January 1, 2012, and ending on or before September 19, 2013 (applicable taxable year), and the taxpayer did not make the election specified in paragraph (f)(5) of this section on its timely filed original Federal tax return for the applicable taxable year, the taxpayer must make the election specified in paragraph (f)(5) of this section for the applicable taxable year by filing an amended Federal tax return for the applicable taxable year on or before 180 days from the due date including extensions of the taxpayer's Federal tax return for the applicable taxable year, notwithstanding that the taxpayer may not have extended the due date.

(3) *Optional application of TD 9564.* A taxpayer may choose to apply § 1.263(a)-1T as contained in TD 9564 (76 FR 81060) December 27, 2011, to taxable years beginning on or after January 1, 2012, and before January 1, 2014.

[T.D. 9636, 78 FR 57710, Sept. 19, 2013, as amended by T.D. 9636, 79 FR 42191, July 21, 2014]

§ 1.263(a)-2 Amounts paid to acquire or produce tangible property.

(a) *Overview.* This section provides rules for applying section 263(a) to amounts paid to acquire or produce a unit of real or personal property. Paragraph (b) of this section contains definitions. Paragraph (c) of this section contains the rules for coordinating this section with other provisions of the Internal Revenue Code (Code). Paragraph (d) of this section provides the general requirement to capitalize amounts paid to acquire or produce a unit of real or personal property. Paragraph (e) of this section provides the requirement to capitalize amounts paid to defend or perfect title to real or personal property. Paragraph (f) of this section provides the rules for determining the extent to which taxpayers must capitalize transaction costs related to the acquisition of tangible property. Paragraphs (g) and (h) of this section address the treatment and recovery of capital expenditures. Paragraph (i) of this section provides for changes in methods of accounting to comply with this section, and paragraph (j) of this section provides the effective and applicability dates for the rules under this section.

(b) *Definitions.* For purposes of this section, the following definitions apply:

(1) *Amount paid.* In the case of a taxpayer using an accrual method of accounting, the terms *amount paid* and *payment* mean a liability incurred (within the meaning of § 1.446-1(c)(1)(ii)). A liability may not be taken into account under this section prior to the taxable year during which the liability is incurred.

(2) *Personal property* means tangible personal property as defined in § 1.48-1(c).

(3) *Real property* means land and improvements thereto, such as buildings or other inherently permanent structures (including items that are structural components of the buildings or structures) that are not personal property as defined in paragraph (b)(2) of this section. Any property that constitutes other tangible property under § 1.48-1(d) is treated as real property for purposes of this section. Local law is not controlling in determining whether

§ 1.263(a)-2

26 CFR Ch. I (4-1-17 Edition)

property is real property for purposes of this section.

(4) *Produce* means construct, build, install, manufacture, develop, create, raise, or grow. This definition is intended to have the same meaning as the definition used for purposes of section 263A(g)(1) and § 1.263A-2(a)(1)(i), except that improvements are excluded from the definition in this paragraph (b)(4) and are separately defined and addressed in § 1.263(a)-3.

(c) *Coordination with other provisions of the Code*—(1) *In general*. Nothing in this section changes the treatment of any amount that is specifically provided for under any provision of the Code or the Treasury Regulations other than section 162(a) or section 212 and the regulations under those sections. For example, see section 263A requiring taxpayers to capitalize the direct and allocable indirect costs of property produced by the taxpayer and property acquired for resale. See also section 195 requiring taxpayers to capitalize certain costs as start-up expenditures.

(2) *Materials and supplies*. Nothing in this section changes the treatment of amounts paid to acquire or produce property that is properly treated as materials and supplies under § 1.162-3.

(d) *Acquired or produced tangible property*—(1) *Requirement to capitalize*. Except as provided in § 1.162-3 (relating to materials and supplies) and in § 1.263(a)-1(f) (providing a de minimis safe harbor election), a taxpayer must capitalize amounts paid to acquire or produce a unit of real or personal property (as determined under § 1.263(a)-3(e)), including leasehold improvements, land and land improvements, buildings, machinery and equipment, and furniture and fixtures. Section 1.263(a)-3(f) provides the rules for determining whether amounts are for leasehold improvements. Amounts paid to acquire or produce a unit of real or personal property include the invoice price, transaction costs as determined under paragraph (f) of this section, and costs for work performed prior to the date that the unit of property is placed in service by the taxpayer (without regard to any applicable convention under section 168(d)). A taxpayer also must capitalize amounts paid to ac-

quire real or personal property for resale.

(2) *Examples*. The following examples illustrate the rules of this paragraph (d). Unless otherwise provided, assume that the taxpayer does not elect the de minimis safe harbor under § 1.263(a)-1(f) and that the property is not acquired for resale under section 263A.

Example 1. Acquisition of personal property. A purchases new cash registers for use in its retail store located in leased space in a shopping mall. Assume each cash register is a unit of property as determined under § 1.263(a)-3(e) and is not a material or supply under § 1.162-3. A must capitalize under paragraph (d)(1) of this section the amount paid to acquire each cash register.

Example 2. Acquisition of personal property that is a material or supply; coordination with § 1.162-3. B operates a fleet of aircraft. In Year 1, B acquires a stock of component parts, which it intends to use to maintain and repair its aircraft. Assume that each component part is a material or supply under § 1.162-3(c)(1) and B does not make elections under § 1.162-3(d) to treat the materials and supplies as capital expenditures. In Year 2, B uses the component parts in the repair and maintenance of its aircraft. Because the parts are materials and supplies under § 1.162-3, B is not required to capitalize the amounts paid for the parts under paragraph (d)(1) of this section. Rather, to determine the treatment of these amounts, B must apply the rules under § 1.162-3, governing the treatment of materials and supplies.

Example 3. Acquisition of unit of personal property; coordination with § 1.162-3. C operates a rental business that rents out a variety of small individual items to customers (rental items). C maintains a supply of rental items on hand to replace worn or damaged items. C purchases a large quantity of rental items to be used in its business. Assume that each of these rental items is a unit of property under § 1.263(a)-3(e). Also assume that a portion of the rental items are materials and supplies under § 1.162-3(c)(1). Under paragraph (d)(1) of this section, C must capitalize the amounts paid for the rental items that are not materials and supplies under § 1.162-3(c)(1). However, C must apply the rules in § 1.162-3 to determine the treatment of the rental items that are materials and supplies under § 1.162-3(c)(1).

Example 4. Acquisition or production cost. D purchases and produces jigs, dies, molds, and patterns for use in the manufacture of D's products. Assume that each of these items is a unit of property as determined under § 1.263(a)-3(e) and is not a material and supply under § 1.162-3(c)(1). D is required to capitalize under paragraph (d)(1) of this section

the amounts paid to acquire and produce the jigs, dies, molds, and patterns.

Example 5. Acquisition of land. F purchases a parcel of undeveloped real estate. F must capitalize under paragraph (d)(1) of this section the amount paid to acquire the real estate. See paragraph (f) of this section for the treatment of amounts paid to facilitate the acquisition of real property.

Example 6. Acquisition of building. G purchases a building. G must capitalize under paragraph (d)(1) of this section the amount paid to acquire the building. See paragraph (f) of this section for the treatment of amounts paid to facilitate the acquisition of real property.

Example 7. Acquisition of property for resale and production of property for sale; coordination with section 263A. H purchases goods for resale and produces other goods for sale. H must capitalize under paragraph (d)(1) of this section the amounts paid to acquire and produce the goods. See section 263A for the amounts required to be capitalized to the property produced or to the property acquired for resale.

Example 8. Production of building; coordination with section 263A. J constructs a building. J must capitalize under paragraph (d)(1) of this section the amount paid to construct the building. See section 263A for the costs required to be capitalized to the real property produced by J.

Example 9. Acquisition of assets constituting a trade or business. K owns tangible and intangible assets that constitute a trade or business. L purchases all the assets of K in a taxable transaction. L must capitalize under paragraph (d)(1) of this section the amount paid for the tangible assets of K. See § 1.263(a)-4 for the treatment of amounts paid to acquire or create intangibles and § 1.263(a)-5 for the treatment of amounts paid to facilitate the acquisition of assets that constitute a trade or business. See section 1060 for special allocation rules for certain asset acquisitions.

Example 10. Work performed prior to placing the property in service. In Year 1, M purchases a building for use as a business office. Prior to placing the building in service, M pays amounts to repair cement steps, refinish wood floors, patch holes in walls, and paint the interiors and exteriors of the building. In Year 2, M places the building in service and begins using the building as its business office. Assume that the work that M performs does not constitute an improvement to the building or its structural components under § 1.263(a)-3. Under § 1.263-3(e)(2)(i), the building and its structural components is a single unit of property. Under paragraph (d)(1) of this section, the amounts paid must be capitalized as amounts to acquire the building unit of property because they were for work performed prior to M's placing the building in service.

Example 11. Work performed prior to placing the property in service. In January Year 1, N purchases a new machine for use in an existing production line of its manufacturing business. Assume that the machine is a unit of property under § 1.263(a)-3(e) and is not a material or supply under § 1.162-3. N pays amounts to install the machine, and after the machine is installed, N pays amounts to perform a critical test on the machine to ensure that it will operate in accordance with quality standards. On November 1, Year 1, the critical test is complete, and N places the machine in service on the production line. N pays amounts to perform periodic quality control testing after the machine is placed in service. Under paragraph (d)(1) of this section, the amounts paid for the installation and the critical test performed before the machine is placed in service must be capitalized by N as amounts to acquire the machine. However, amounts paid for periodic quality control testing after N placed the machine in service are not required to be capitalized as amounts paid to acquire the machine.

(e) *Defense or perfection of title to property—(1) In general.* Amounts paid to defend or perfect title to real or personal property are amounts paid to acquire or produce property within the meaning of this section and must be capitalized.

(2) *Examples.* The following examples illustrate the rule of this paragraph (e):

Example 1. Amounts paid to contest condemnation. X owns real property located in County. County files an eminent domain complaint condemning a portion of X's property to use as a roadway. X hires an attorney to contest the condemnation. The amounts that X paid to the attorney must be capitalized because they were to defend X's title to the property.

Example 2. Amounts paid to invalidate ordinance. Y is in the business of quarrying and supplying for sale sand and stone in a certain municipality. Several years after Y establishes its business, the municipality in which it is located passes an ordinance that prohibits the operation of Y's business. Y incurs attorney's fees in a successful prosecution of a suit to invalidate the municipal ordinance. Y prosecutes the suit to preserve its business activities and not to defend Y's title in the property. Therefore, the attorney's fees that Y paid are not required to be capitalized under paragraph (e)(1) of this section.

Example 3. Amounts paid to challenge building line. The board of public works of a municipality establishes a building line across Z's business property, adversely affecting the value of the property. Z incurs legal fees in unsuccessfully litigating the establishment

of the building line. The amounts Z paid to the attorney must be capitalized because they were to defend Z's title to the property.

(f) *Transaction costs*—(1) *In general.* Except as provided in § 1.263(a)-1(f)(3)(i) (for purposes of the de minimis safe harbor), a taxpayer must capitalize amounts paid to facilitate the acquisition of real or personal property. See § 1.263(a)-5 for the treatment of amounts paid to facilitate the acquisition of assets that constitute a trade or business. See § 1.167(a)-5 for allocations of facilitative costs between depreciable and non-depreciable property.

(2) *Scope of facilitate*—(i) *In general.* Except as otherwise provided in this section, an amount is paid to facilitate the acquisition of real or personal property if the amount is paid in the process of investigating or otherwise pursuing the acquisition. Whether an amount is paid in the process of investigating or otherwise pursuing the acquisition is determined based on all of the facts and circumstances. In determining whether an amount is paid to facilitate an acquisition, the fact that the amount would (or would not) have been paid but for the acquisition is relevant but is not determinative. Amounts paid to facilitate an acquisition include, but are not limited to, inherently facilitative amounts specified in paragraph (f)(2)(ii) of this section.

(ii) *Inherently facilitative amounts.* An amount is paid in the process of investigating or otherwise pursuing the acquisition of real or personal property if the amount is inherently facilitative. An amount is inherently facilitative if the amount is paid for—

(A) Transporting the property (for example, shipping fees and moving costs);

(B) Securing an appraisal or determining the value or price of property;

(C) Negotiating the terms or structure of the acquisition and obtaining tax advice on the acquisition;

(D) Application fees, bidding costs, or similar expenses;

(E) Preparing and reviewing the documents that effectuate the acquisition of the property (for example, preparing the bid, offer, sales contract, or purchase agreement);

(F) Examining and evaluating the title of property;

(G) Obtaining regulatory approval of the acquisition or securing permits related to the acquisition, including application fees;

(H) Conveying property between the parties, including sales and transfer taxes, and title registration costs;

(I) Finders' fees or brokers' commissions, including contingency fees (defined in paragraph (f)(3)(iii) of this section);

(J) Architectural, geological, survey, engineering, environmental, or inspection services pertaining to particular properties; or

(K) Services provided by a qualified intermediary or other facilitator of an exchange under section 1031.

(iii) *Special rule for acquisitions of real property*—(A) *In general.* Except as provided in paragraph (f)(2)(ii) of this section (relating to inherently facilitative amounts), an amount paid by the taxpayer in the process of investigating or otherwise pursuing the acquisition of real property does not facilitate the acquisition if it relates to activities performed in the process of determining whether to acquire real property and which real property to acquire.

(B) *Acquisitions of real and personal property in a single transaction.* An amount paid by the taxpayer in the process of investigating or otherwise pursuing the acquisition of personal property facilitates the acquisition of such personal property, even if such property is acquired in a single transaction that also includes the acquisition of real property subject to the special rule set out in paragraph (f)(2)(iii)(A) of this section. A taxpayer may use a reasonable allocation method to determine which costs facilitate the acquisition of personal property and which costs relate to the acquisition of real property and are subject to the special rule of paragraph (f)(2)(iii)(A) of this section.

(iv) *Employee compensation and overhead costs*—(A) *In general.* For purposes of paragraph (f) of this section, amounts paid for employee compensation (within the meaning of § 1.263(a)-4(e)(4)(ii)) and overhead are treated as amounts that do not facilitate the acquisition of real or personal property. However, section 263A provides rules

for employee compensation and overhead costs required to be capitalized to property produced by the taxpayer or to property acquired for resale.

(B) *Election to capitalize.* A taxpayer may elect to treat amounts paid for employee compensation or overhead as amounts that facilitate the acquisition of property. The election is made separately for each acquisition and applies to employee compensation or overhead, or both. For example, a taxpayer may elect to treat overhead, but not employee compensation, as amounts that facilitate the acquisition of property. A taxpayer makes the election by treating the amounts to which the election applies as amounts that facilitate the acquisition in the taxpayer's timely filed original Federal tax return (including extensions) for the taxable year during which the amounts are paid. Sections 301.9100-1 through 301.9100-3 of this chapter provide the rules governing extensions of the time to make regulatory elections. In the case of an S corporation or a partnership, the election is made by the S corporation or by the partnership, and not by the shareholders or partners. A taxpayer may revoke an election made under this paragraph (f)(2)(iv)(B) with respect to each acquisition only by filing a request for a private letter ruling and obtaining the Commissioner's consent to revoke the election. The Commissioner may grant a request to revoke this election if the taxpayer acted reasonably and in good faith and the revocation will not prejudice the interests of Government. See generally § 301.9100-3 of this chapter. The manner of electing and revoking the election to capitalize under this paragraph (f)(2)(iv)(B) may be modified through guidance of general applicability (see §§ 606.601(d)(2) and 601.602 of this section). An election may not be made or revoked through the filing of an application for change in accounting method or, before obtaining the Commissioner's consent to make the late election or to revoke the election, by filing an amended Federal tax return.

(3) *Treatment of transaction costs—(i) In general.* Except as provided under § 1.263(a)-1(f)(3)(i) (for purposes of the de minimis safe harbor), all amounts paid to facilitate the acquisition of

real or personal property are capital expenditures. Facilitative amounts allocable to real or personal property must be included in the basis of the property acquired.

(ii) *Treatment of inherently facilitative amounts allocable to property not acquired.* Inherently facilitative amounts allocable to real or personal property are capital expenditures related to such property, even if the property is not eventually acquired. Except for contingency fees as defined in paragraph (f)(3)(iii) of this section, inherently facilitative amounts allocable to real or personal property not acquired may be allocated to those properties and recovered as appropriate in accordance with the applicable provisions of the Code and the Treasury Regulations (for example, sections 165, 167, or 168). See paragraph (h) of this section for the recovery of capitalized amounts.

(iii) *Contingency fees.* For purposes of this section, a contingency fee is an amount paid that is contingent on the successful closing of the acquisition of real or personal property. Contingency fees must be included in the basis of the property acquired and may not be allocated to the property not acquired.

(4) *Examples.* The following examples illustrate the rules of paragraph (f) of this section. For purposes of these examples, assume that the taxpayer does not elect the de minimis safe harbor under § 1.263(a)-1(f):

Example 1. Broker's fees to facilitate an acquisition. A decides to purchase a building in which to relocate its offices and hires a real estate broker to find a suitable building. A pays fees to the broker to find property for A to acquire. Under paragraph (f)(2)(ii)(I) of this section, A must capitalize the amounts paid to the broker because these costs are inherently facilitative of the acquisition of real property.

Example 2. Inspection and survey costs to facilitate an acquisition. B decides to purchase Building X and pays amounts to third-party contractors for a termite inspection and an environmental survey of Building X. Under paragraph (f)(2)(ii)(J) of this section, B must capitalize the amounts paid for the inspection and the survey of the building because these costs are inherently facilitative of the acquisition of real property.

Example 3. Moving costs to facilitate an acquisition. C purchases all the assets of D and, in connection with the purchase, hires a transportation company to move storage

tanks from D's plant to C's plant. Under paragraph (f)(2)(ii)(A) of this section, C must capitalize the amount paid to move the storage tanks from D's plant to C's plant because this cost is inherently facilitative to the acquisition of personal property.

Example 4. Geological and geophysical costs; coordination with other provisions E is in the business of exploring, purchasing, and developing properties in the United States for the production of oil and gas. E considers acquiring a particular property but first incurs costs for the services of an engineering firm to perform geological and geophysical studies to determine if the property is suitable for oil or gas production. Assume that the amounts that E paid to the engineering firm constitute geological and geophysical expenditures under section 167(h). Although the amounts that E paid for the geological and geophysical services are inherently facilitative to the acquisition of real property under paragraph (f)(2)(ii)(J) of this section, E is not required to include those amounts in the basis of the real property acquired. Rather, under paragraph (c) of this section, E must capitalize these costs separately and amortize such costs as required under section 167(h) (addressing the amortization of geological and geophysical expenditures).

Example 5. Scope of facilitate F is in the business of providing legal services to clients. F is interested in acquiring a new conference table for its office. F hires and incurs fees for an interior designer to shop for, evaluate, and make recommendations to F regarding which new table to acquire. Under paragraphs (f)(1) and (2) of this section, F must capitalize the amounts paid to the interior designer to provide these services because they are paid in the process of investigating or otherwise pursuing the acquisition of personal property.

Example 6. Transaction costs allocable to multiple properties G, a retailer, wants to acquire land for the purpose of building a new distribution facility for its products. G considers various properties on Highway X in State Y. G incurs fees for the services of an architect to advise and evaluate the suitability of the sites for the type of facility that G intends to construct on the selected site. G must capitalize the architect fees as amounts paid to acquire land because these amounts are inherently facilitative to the acquisition of land under paragraph (f)(2)(ii)(J) of this section.

Example 7. Transaction costs; coordination with section 263A H, a retailer, wants to acquire land for the purpose of building a new distribution facility for its products. H considers various properties on Highway X in State Y. H incurs fees for the services of an architect to prepare preliminary floor plans for a building that H could construct at any of the sites. Under these facts, the architect's fees are not facilitative to the acquisition of land under paragraph (f) of this section.

Therefore, H is not required to capitalize the architect fees as amounts paid to acquire land. However, the amounts paid for the architect's fees may be subject to capitalization under section 263A if these amounts comprise the direct or allocable indirect cost of property produced by H, such as the building.

Example 8. Special rule for acquisitions of real property J owns several retail stores. J decides to examine the feasibility of opening a new store in City X. In October, Year 1, J hires and incurs costs for a development consulting firm to study City X and perform market surveys, evaluate zoning and environmental requirements, and make preliminary reports and recommendations as to areas that J should consider for purposes of locating a new store. In December, Year 1, J continues to consider whether to purchase real property in City X and which property to acquire. J hires, and incurs fees for, an appraiser to perform appraisals on two different sites to determine a fair offering price for each site. In March, Year 2, J decides to acquire one of these two sites for the location of its new store. At the same time, J determines not to acquire the other site. Under paragraph (f)(2)(iii) of this section, J is not required to capitalize amounts paid to the development consultant in Year 1 because the amounts relate to activities performed in the process of determining whether to acquire real property and which real property to acquire, and the amounts are not inherently facilitative costs under paragraph (f)(2)(ii) of this section. However, J must capitalize amounts paid to the appraiser in Year 1 because the appraisal costs are inherently facilitative costs under paragraph (f)(2)(ii)(B) of this section. In Year 2, J must include the appraisal costs allocable to property acquired in the basis of the property acquired. In addition, J may recover the appraisal costs allocable to the property not acquired in accordance with paragraphs (f)(3)(ii) and (h) of this section. See, for example, § 1.165-2 for losses on the permanent withdrawal of non-depreciable property.

Example 9. Contingency fee K owns several restaurant properties. K decides to open a new restaurant in City X. In October, Year 1, K hires a real estate consultant to identify potential property upon which K may locate its restaurant, and is obligated to compensate the consultant upon the acquisition of property. The real estate consultant identifies three properties, and K decides to acquire one of those properties. Upon closing of the acquisition of that property, K pays the consultant its fee. The amount paid to the consultant constitutes a contingency fee under paragraph (f)(3)(iii) of this section because the payment is contingent on the successful closing of the acquisition of property. Accordingly, under paragraph (f)(3)(iii) of

this section, K must include the amount paid to the consultant in the basis of the property acquired. K is not permitted to allocate the amount paid between the properties acquired and not acquired.

Example 10. Employee compensation and overhead. L, a freight carrier, maintains an acquisition department whose sole function is to arrange for the purchase of vehicles and aircraft from manufacturers or other parties to be used in its freight carrying business. As provided in paragraph (f)(2)(iv)(A) of this section, L is not required to capitalize any portion of the compensation paid to employees in its acquisition department or any portion of its overhead allocable to its acquisition department. However, under paragraph (f)(2)(iv)(B) of this section, L may elect to capitalize the compensation and/or overhead costs allocable to the acquisition of a vehicle or aircraft by treating these amounts as costs that facilitate the acquisition of that property in its timely filed original Federal tax return for the year the amounts are paid.

(g) *Treatment of capital expenditures.* Amounts required to be capitalized under this section are capital expenditures and must be taken into account through a charge to capital account or basis, or in the case of property that is inventory in the hands of a taxpayer, through inclusion in inventory costs.

(h) *Recovery of capitalized amounts—*
(1) *In general.* Amounts that are capitalized under this section are recovered through depreciation, cost of goods sold, or by an adjustment to basis at the time the property is placed in service, sold, used, or otherwise disposed of by the taxpayer. Cost recovery is determined by the applicable provisions of the Code and regulations relating to the use, sale, or disposition of property.

(2) *Examples.* The following examples illustrate the rule of paragraph (h)(1) of this section. For purposes of these examples, assume that the taxpayer does not elect the de minimis safe harbor under § 1.263(a)-1(f).

Example 1. Recovery when property placed in service. X owns a 10-unit apartment building. The refrigerator in one of the apartments stops functioning, and X purchases a new refrigerator to replace the old one. X pays for the acquisition, delivery, and installation of the new refrigerator. Assume that the refrigerator is the unit of property, as determined under § 1.263(a)-3(e), and is not a material or supply under § 1.162-3. Under paragraph (d)(1) of this section, X is required to capitalize the amounts paid for the acquisition, delivery,

and installation of the refrigerator. Under this paragraph (h), the capitalized amounts are recovered through depreciation, which begins when the refrigerator is placed in service by X.

Example 2. Recovery when property used in the production of property. Y operates a plant where it manufactures widgets. Y purchases a tractor loader to move raw materials into and around the plant for use in the manufacturing process. Assume that the tractor loader is a unit of property, as determined under § 1.263(a)-3(e), and is not a material or supply under § 1.162-3. Under paragraph (d)(1) of this section, Y is required to capitalize the amounts paid to acquire the tractor loader. Under this paragraph (h), the capitalized amounts are recovered through depreciation, which begins when Y places the tractor loader in service. However, because the tractor loader is used in the production of property, under section 263A the cost recovery (that is, the depreciation) may also be capitalized to Y's property produced, and, consequently, recovered through cost of goods sold. See § 1.263A-1(e)(3)(ii)(I).

(i) *Accounting method changes.* Unless otherwise provided under this section, a change to comply with this section is a change in method of accounting to which the provisions of sections 446 and 481 and the accompanying regulations apply. A taxpayer seeking to change to a method of accounting permitted in this section must secure the consent of the Commissioner in accordance with § 1.446-1(e) and follow the administrative procedures issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner's consent to change its accounting method.

(j) *Effective/applicability date—*(1) *In general.* Except for paragraphs (f)(2)(iii), (f)(2)(iv), and (f)(3)(ii) of this section, this section generally applies to taxable years beginning on or after January 1, 2014. Paragraphs (f)(2)(iii), (f)(2)(iv), and (f)(3)(ii) of this section apply to amounts paid in taxable years beginning on or after January 1, 2014. Except as provided in paragraphs (j)(1) and (j)(2) of this section, § 1.263(a)-2 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014.

(2) *Early application of this section—*(i) *In general.* Except for paragraphs (f)(2)(iii), (f)(2)(iv), and (f)(3)(ii) of this section of this section, a taxpayer may choose to apply this section to taxable years beginning on or after January 1,

2012. A taxpayer may choose to apply paragraphs (f)(2)(iii), (f)(2)(iv), and (f)(3)(ii) of this section to amounts paid in taxable years beginning on or after January 1, 2012.

(ii) *Transition rule for election to capitalize employee compensation and overhead costs on 2012 or 2013 returns.* If under paragraph (j)(2)(i) of this section, a taxpayer chooses to make the election to capitalize employee compensation and overhead costs under paragraph (f)(2)(iv)(B) of this section for amounts paid in its taxable year beginning on or after January 1, 2012, and ending on or before September 19, 2013 (applicable taxable year), and the taxpayer did not make the election specified in paragraph (f)(2)(iv)(B) of this section on its timely filed original Federal tax return for the applicable taxable year, the taxpayer must make the election specified in paragraph (f)(2)(iv)(B) of this section for the applicable taxable year by filing an amended Federal tax return for the applicable taxable year on or before 180 days from the due date including extensions of the taxpayer's Federal tax return for the applicable taxable year, notwithstanding that the taxpayer may not have extended the due date.

(3) *Optional application of TD 9564.* Except for § 1.263(a)-2T(f)(2)(iii), (f)(2)(iv), (f)(3)(ii), and (g), a taxpayer may choose to apply § 1.263(a)-2T as contained in TD 9564 (76 FR 81060) December 27, 2011, to taxable years beginning on or after January 1, 2012, and before January 1, 2014. A taxpayer may choose to apply § 1.263(a)-2T(f)(2)(iii), (f)(2)(iv), (f)(3)(ii) and (g) as contained in TD 9564 (76 FR 81060) December 27, 2011, to amounts paid in taxable years beginning on or after January 1, 2012, and before January 1, 2014.

[T.D. 9636, 78 FR 57714, Sept. 19, 2013, as amended by T.D. 9636, 79 FR 42191, July 21, 2014]

§ 1.263(a)-3 Amounts paid to improve tangible property.

(a) *Overview.* This section provides rules for applying section 263(a) to amounts paid to improve tangible property. Paragraph (b) of this section provides definitions. Paragraph (c) of this section provides rules for coordinating this section with other provisions of

the Internal Revenue Code (Code). Paragraph (d) of this section provides the requirement to capitalize amounts paid to improve tangible property and provides the general rules for determining whether a unit of property is improved. Paragraph (e) of this section provides the rules for determining the appropriate unit of property. Paragraph (f) of this section provides rules for leasehold improvements. Paragraph (g) of this section provides special rules for determining improvement costs in particular contexts, including indirect costs incurred during an improvement, removal costs, aggregation of related costs, and regulatory compliance costs. Paragraph (h) of this section provides a safe harbor for small taxpayers. Paragraph (i) provides a safe harbor for routine maintenance costs. Paragraph (j) of this section provides rules for determining whether amounts are paid for betterments to the unit of property. Paragraph (k) of this section provides rules for determining whether amounts are paid to restore the unit of property. Paragraph (l) of this section provides rules for amounts paid to adapt the unit of property to a new or different use. Paragraph (m) of this section provides an optional regulatory accounting method. Paragraph (n) of this section provides an election to capitalize repair and maintenance costs consistent with books and records. Paragraphs (o) and (p) of this section provide for the treatment and recovery of amounts capitalized under this section. Paragraphs (q) and (r) of this section provide for accounting method changes and state the effective/applicability date for the rules in this section.

(b) *Definitions.* For purposes of this section, the following definitions apply:

(1) *Amount paid.* In the case of a taxpayer using an accrual method of accounting, the terms *amounts paid* and *payment* mean a liability incurred (within the meaning of § 1.446-1(c)(1)(ii)). A liability may not be taken into account under this section prior to the taxable year during which the liability is incurred.

(2) *Personal property* means tangible personal property as defined in § 1.48-1(c).

(3) *Real property* means land and improvements thereto, such as buildings or other inherently permanent structures (including items that are structural components of the buildings or structures) that are not personal property as defined in paragraph (b)(2) of this section. Any property that constitutes other tangible property under § 1.48-1(d) is also treated as real property for purposes of this section. Local law is not controlling in determining whether property is real property for purposes of this section.

(4) *Owner* means the taxpayer that has the benefits and burdens of ownership of the unit of property for Federal income tax purposes.

(c) *Coordination with other provisions of the Code*—(1) *In general.* Nothing in this section changes the treatment of any amount that is specifically provided for under any provision of the Code or the regulations other than section 162(a) or section 212 and the regulations under those sections. For example, see section 263A requiring taxpayers to capitalize the direct and allocable indirect costs of property produced and property acquired for resale.

(2) *Materials and supplies.* A material or supply as defined in § 1.162-3(c)(1) that is acquired and used to improve a unit of tangible property is subject to this section and is not treated as a material or supply under § 1.162-3.

(3) *Example.* The following example illustrates the rules of this paragraph (c):

Example. Railroad rolling stock X is a railroad that properly treats amounts paid for the rehabilitation of railroad rolling stock as deductible expenses under section 263(d). X is not required to capitalize the amounts paid because nothing in this section changes the treatment of amounts specifically provided for under section 263(d).

(d) *Requirement to capitalize amounts paid for improvements.* Except as provided in paragraph (h) or paragraph (n) of this section or under § 1.263(a)-1(f), a taxpayer generally must capitalize the related amounts (as defined in paragraph (g)(3) of this section) paid to improve a unit of property owned by the taxpayer. However, paragraph (f) of this section applies to the treatment of amounts paid to improve leased property. Section 263A provides the require-

ment to capitalize the direct and allocable indirect costs of property produced by the taxpayer and property acquired for resale. Section 1016 provides for the addition of capitalized amounts to the basis of the property, and section 168 governs the treatment of additions or improvements for depreciation purposes. For purposes of this section, a unit of property is improved if the amounts paid for activities performed after the property is placed in service by the taxpayer—

(1) Are for a betterment to the unit of property (see paragraph (j) of this section);

(2) Restore the unit of property (see paragraph (k) of this section); or

(3) Adapt the unit of property to a new or different use (see paragraph (l) of this section).

(e) *Determining the unit of property*—

(1) *In general.* The unit of property rules in this paragraph (e) apply only for purposes of section 263(a) and §§ 1.263(a)-1, 1.263(a)-2, 1.263(a)-3, and 1.162-3. Unless otherwise specified, the unit of property determination is based upon the functional interdependence standard provided in paragraph (e)(3)(i) of this section. However, special rules are provided for buildings (see paragraph (e)(2) of this section), plant property (see paragraph (e)(3)(ii) of this section), network assets (see paragraph (e)(3)(iii) of this section), leased property (see paragraph (e)(2)(v) of this section for leased buildings and paragraph (e)(3)(iv) of this section for leased property other than buildings), and improvements to property (see paragraph (e)(4) of this section). Additional rules are provided if a taxpayer has assigned different MACRS classes or depreciation methods to components of property or subsequently changes the class or depreciation method of a component or other item of property (see paragraph (e)(5) of this section). Property that is aggregated or subject to a general asset account election or accounted for in a multiple asset account (that is, pooled) may not be treated as a single unit of property.

(2) *Building*—(i) *In general.* Except as otherwise provided in paragraphs (e)(4), and (e)(5)(ii) of this section, in the case of a building (as defined in § 1.48-1(e)(1)), each building and its structural

components (as defined in § 1.48-1(e)(2)) is a single unit of property ("building"). Paragraph (e)(2)(iii) of this section provides the unit of property for condominiums, paragraph (e)(2)(iv) of this section provides the unit of property for cooperatives, and paragraph (e)(2)(v) of this section provides the unit of property for leased buildings.

(ii) *Application of improvement rules to a building.* An amount is paid to improve a building under paragraph (d) of this section if the amount is paid for an improvement under paragraphs (j), (k), or paragraph (l) of this section to any of the following:

(A) *Building structure.* A building structure consists of the building (as defined in § 1.48-1(e)(1)), and its structural components (as defined in § 1.48-1(e)(2)), other than the structural components designated as buildings systems in paragraph (e)(2)(ii)(B) of this section.

(B) *Building system.* Each of the following structural components (as defined in § 1.48-1(e)(2)), including the components thereof, constitutes a building system that is separate from the building structure, and to which the improvement rules must be applied—

(1) Heating, ventilation, and air conditioning ("HVAC") systems (including motors, compressors, boilers, furnace, chillers, pipes, ducts, radiators);

(2) Plumbing systems (including pipes, drains, valves, sinks, bathtubs, toilets, water and sanitary sewer collection equipment, and site utility equipment used to distribute water and waste to and from the property line and between buildings and other permanent structures);

(3) Electrical systems (including wiring, outlets, junction boxes, lighting fixtures and associated connectors, and site utility equipment used to distribute electricity from the property line to and between buildings and other permanent structures);

(4) All escalators;

(5) All elevators;

(6) Fire-protection and alarm systems (including sensing devices, computer controls, sprinkler heads, sprinkler mains, associated piping or plumbing, pumps, visual and audible alarms, alarm control panels, heat and smoke

detection devices, fire escapes, fire doors, emergency exit lighting and signage, and fire fighting equipment, such as extinguishers, and hoses);

(7) Security systems for the protection of the building and its occupants (including window and door locks, security cameras, recorders, monitors, motion detectors, security lighting, alarm systems, entry and access systems, related junction boxes, associated wiring and conduit);

(8) Gas distribution system (including associated pipes and equipment used to distribute gas to and from the property line and between buildings or permanent structures); and

(9) Other structural components identified in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter) that are excepted from the building structure under paragraph (e)(2)(ii)(A) of this section and are specifically designated as building systems under this section.

(iii) *Condominium—(A) In general.* In the case of a taxpayer that is the owner of an individual unit in a building with multiple units (such as a condominium), the unit of property ("condominium") is the individual unit owned by the taxpayer and the structural components (as defined in § 1.48-1(e)(2)) that are part of the unit.

(B) *Application of improvement rules to a condominium.* An amount is paid to improve a condominium under paragraph (d) of this section if the amount is paid for an improvement under paragraphs (j), (k), or paragraph (l) of this section to the building structure (as defined in paragraph (e)(2)(ii)(A) of this section) that is part of the condominium or to the portion of any building system (as defined in paragraph (e)(2)(ii)(B) of this section) that is part of the condominium. In the case of the condominium management association, the association must apply the improvement rules to the building structure or to any building system described under paragraphs (e)(2)(ii)(A) and (e)(2)(ii)(B) of this section.

(iv) *Cooperative—(A) In general.* In the case of a taxpayer that has an ownership interest in a cooperative housing

corporation, the unit of property (“co-operative”) is the portion of the building in which the taxpayer has possessory rights and the structural components (as defined in § 1.48-1(e)(2)) that are part of the portion of the building subject to the taxpayer’s possessory rights (cooperative).

(B) *Application of improvement rules to a cooperative.* An amount is paid to improve a cooperative under paragraph (d) of this section if the amount is paid for an improvement under paragraphs (j), (k), or (l) of this section to the portion of the building structure (as defined in paragraph (e)(2)(ii)(A) of this section) in which the taxpayer has possessory rights or to the portion of any building system (as defined in paragraph (e)(2)(ii)(B) of this section) that is part of the portion of the building structure subject to the taxpayer’s possessory rights. In the case of a cooperative housing corporation, the corporation must apply the improvement rules to the building structure or to any building system as described under paragraphs (e)(2)(ii)(A) and (e)(2)(ii)(B) of this section.

(v) *Leased building—(A) In general.* In the case of a taxpayer that is a lessee of all or a portion of a building (such as an office, floor, or certain square footage), the unit of property (“leased building property”) is each building and its structural components or the portion of each building subject to the lease and the structural components associated with the leased portion.

(B) *Application of improvement rules to a leased building.* An amount is paid to improve a leased building property under paragraphs (d) and (f)(2) of this section if the amount is paid for an improvement, under paragraphs (j), (k), or (l) of this section, to any of the following:

(1) *Entire building.* In the case of a taxpayer that is a lessee of an entire building, the building structure (as defined under paragraph (e)(2)(ii)(A) of this section) or any building system (as defined under paragraph (e)(2)(ii)(B) of this section) that is part of the leased building.

(2) *Portion of a building.* In the case of a taxpayer that is a lessee of a portion of a building (such as an office, floor, or certain square footage), the portion

of the building structure (as defined under paragraph (e)(2)(ii)(A) of this section) subject to the lease or the portion of any building system (as defined under paragraph (e)(2)(ii)(B) of this section) subject to the lease.

(3) *Property other than building—(i) In general.* Except as otherwise provided in paragraphs (e)(3), (e)(4), (e)(5), and (f)(1) of this section, in the case of real or personal property other than property described in paragraph (e)(2) of this section, all the components that are functionally interdependent comprise a single unit of property. Components of property are functionally interdependent if the placing in service of one component by the taxpayer is dependent on the placing in service of the other component by the taxpayer.

(ii) *Plant property—(A) Definition.* For purposes of this paragraph (e), the term *plant property* means functionally interdependent machinery or equipment, other than network assets, used to perform an industrial process, such as manufacturing, generation, warehousing, distribution, automated materials handling in service industries, or other similar activities.

(B) *Unit of property for plant property.* In the case of plant property, the unit of property determined under the general rule of paragraph (e)(3)(i) of this section is further divided into smaller units comprised of each component (or group of components) that performs a discrete and major function or operation within the functionally interdependent machinery or equipment.

(iii) *Network assets—(A) Definition.* For purposes of this paragraph (e), the term *network assets* means railroad track, oil and gas pipelines, water and sewage pipelines, power transmission and distribution lines, and telephone and cable lines that are owned or leased by taxpayers in each of those respective industries. The term includes, for example, trunk and feeder lines, pole lines, and buried conduit. It does not include property that would be included as building structure or building systems under paragraphs (e)(2)(ii)(A) and (e)(2)(ii)(B) of this section, nor does it include separate property that is adjacent to, but not part of a network asset, such as bridges, culverts, or tunnels.

(B) *Unit of property for network assets.* In the case of network assets, the unit of property is determined by the taxpayer's particular facts and circumstances except as otherwise provided in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter). For these purposes, the functional interdependence standard provided in paragraph (e)(3)(i) of this section is not determinative.

(iv) *Leased property other than buildings.* In the case of a taxpayer that is a lessee of real or personal property other than property described in paragraph (e)(2) of this section, the unit of property for the leased property is determined under paragraphs (e)(3)(i),(ii), (iii), and (e)(5) of this section except that, after applying the applicable rules under those paragraphs, the unit of property may not be larger than the property subject to the lease.

(4) *Improvements to property.* An improvement to a unit of property generally is not a unit of property separate from the unit of property improved. For the unit of property for lessee improvements, see also paragraph (f)(2)(ii) of this section. If a taxpayer elects to treat as a capital expenditure under § 1.162-3(d) the amount paid for a rotatable spare part, temporary spare part, or standby emergency spare part, and such part is used in an improvement to a unit of property, then for purposes of applying paragraph (d) of this section to the unit of property improved, the part is not a unit of property separate from the unit of property improved.

(5) *Additional rules—(i) Year placed in service.* Notwithstanding the unit of property determination under paragraph (e)(3) of this section, a component (or a group of components) of a unit property must be treated as a separate unit of property if, at the time the unit of property is initially placed in service by the taxpayer, the taxpayer has properly treated the component as being within a different class of property under section 168(e) (MACRS classes) than the class of the unit of property of which the component is a part, or the taxpayer has properly depreciated the component using a different depreciation method than the

depreciation method of the unit of property of which the component is a part.

(ii) *Change in subsequent taxable year.* Notwithstanding the unit of property determination under paragraphs (e)(2), (3), (4), or (5)(i) of this section, in any taxable year after the unit of property is initially placed in service by the taxpayer, if the taxpayer or the Internal Revenue Service changes the treatment of that property (or any portion thereof) to a proper MACRS class or a proper depreciation method (for example, as a result of a cost segregation study or a change in the use of the property), then the taxpayer must change the unit of property determination for that property (or the portion thereof) under this section to be consistent with the change in treatment for depreciation purposes. Thus, for example, if a portion of a unit of property is properly reclassified to a MACRS class different from the MACRS class of the unit of property of which it was previously treated as a part, then the reclassified portion of the property should be treated as a separate unit of property for purposes of this section.

(6) *Examples.* The following examples illustrate the application of this paragraph (e) and assume that the taxpayer has not made a general asset account election with regard to property or accounted for property in a multiple asset account. In addition, unless the facts specifically indicate otherwise, assume that the additional rules in paragraph (e)(5) of this section do not apply:

Example 1. Building systems A owns an office building that contains a HVAC system. The HVAC system incorporates ten roof-mounted units that service different parts of the building. The roof-mounted units are not connected and have separate controls and duct work that distribute the heated or cooled air to different spaces in the building's interior. A pays an amount for labor and materials for work performed on the roof-mounted units. Under paragraph (e)(2)(i) of this section, A must treat the building and its structural components as a single unit of property. As provided under paragraph (e)(2)(ii) of this section, an amount is paid to improve a building if it is for an improvement to the building structure or any designated building system. Under paragraph (e)(2)(ii)(B)(i) of this section, the entire HVAC system, including all of the roof-

mounted units and their components, comprise a building system. Therefore, under paragraph (e)(2)(ii) of this section, if an amount paid by A for work on the roof-mounted units is an improvement (for example, a betterment) to the HVAC system, A must treat this amount as an improvement to the building.

Example 2. Building systems B owns a building that it uses in its retail business. The building contains two elevator banks in different locations in its building. Each elevator bank contains three elevators. B pays an amount for labor and materials for work performed on the elevators. Under paragraph (e)(2)(i) of this section, B must treat the building and its structural components as a single unit of property. As provided under paragraph (e)(2)(ii) of this section, an amount is paid to improve a building if it is for an improvement to the building structure or any designated building system. Under paragraph (e)(2)(ii)(B)(5) of this section, all six elevators, including all their components, comprise a building system. Therefore, under paragraph (e)(2)(ii) of this section, if an amount paid by B for work on the elevators is an improvement (for example, a betterment) to the elevator system, B must treat this amount as an improvement to the building.

Example 3. Building structure and systems; condominium C owns a condominium unit in a condominium office building. C uses the condominium unit in its business of providing medical services. The condominium unit contains two restrooms, each of which contains a sink, a toilet, water and drainage pipes and other bathroom fixtures. C pays an amount for labor and materials to perform work on the pipes, sinks, toilets, and plumbing fixtures that are part of the condominium. Under paragraph (e)(2)(iii) of this section, C must treat the individual unit that it owns, including the structural components that are part of that unit, as a single unit of property. As provided under paragraph (e)(2)(iii)(B) of this section, an amount is paid to improve the condominium if it is for an improvement to the building structure that is part of the condominium or to a portion of any designated building system that is part of the condominium. Under paragraph (e)(2)(ii)(B)(2) of this section, the pipes, sinks, toilets, and plumbing fixtures that are part of C's condominium comprise the plumbing system for the condominium. Therefore, under paragraph (e)(2)(iii) of this section, if an amount paid by C for work on pipes, sinks, toilets, and plumbing fixtures is an improvement (for example, a betterment) to the portion of the plumbing system that is part of C's condominium, C must treat this amount as an improvement to the condominium.

Example 4. Building structure and systems; property other than buildings D, a manufac-

turer, owns a building adjacent to its manufacturing facility that contains office space and related facilities for D's employees that manage and administer D's manufacturing operations. The office building contains equipment, such as desks, chairs, computers, telephones, and bookshelves that are not building structure or building systems. D pays an amount to add an extension to the office building. Under paragraph (e)(2)(i) of this section, D must treat the building and its structural components as a single unit of property. As provided under paragraph (e)(2)(ii) of this section, an amount is paid to improve a building if it is for an improvement to the building structure or any designated building system. Therefore, under paragraph (e)(2)(ii) of this section, if an amount paid by D for the addition of an extension to the office building is an improvement (for example, a betterment) to the building structure or any of the building systems, D must treat this amount as an improvement to the building. In addition, because the equipment contained within the office building constitutes property other than the building, the units of property for the office equipment are initially determined under paragraph (e)(3)(i) of this section and are comprised of all the components that are functionally interdependent (for example, each desk, each chair, and each book shelf).

Example 5. Plant property; discrete and major function E is an electric utility company that operates a power plant to generate electricity. The power plant includes a structure that is not a building under § 1.48-1(e)(1), and, among other things, one pulverizer that grinds coal, a single boiler that produces steam, one turbine that converts the steam into mechanical energy, and one generator that converts mechanical energy into electrical energy. In addition, the turbine contains a series of blades that cause the turbine to rotate when affected by the steam. Because the plant is composed of real and personal tangible property other than a building, the unit of property for the generating equipment is initially determined under the general rule in paragraph (e)(3)(i) of this section and is comprised of all the components that are functionally interdependent. Under this rule, the initial unit of property is the entire plant because the components of the plant are functionally interdependent. However, because the power plant is plant property under paragraph (e)(3)(ii) of this section, the initial unit of property is further divided into smaller units of property by determining the components (or groups of components) that perform discrete and major functions within the plant. Under this paragraph, E must treat the structure, the boiler, the turbine, the generator, and the pulverizer each as a separate

unit of property because each of these components performs a discrete and major function within the power plant. E may not treat components, such as the turbine blades, as separate units of property because each of these components does not perform a discrete and major function within the plant.

Example 6. Plant property; discrete and major function F is engaged in a uniform and linen rental business. F owns and operates a plant that utilizes many different machines and equipment in an assembly line-like process to treat, launder, and prepare rental items for its customers. F utilizes two laundering lines in its plant, each of which can operate independently. One line is used for uniforms and another line is used for linens. Both lines incorporate a sorter, boiler, washer, dryer, ironer, folder, and waste water treatment system. Because the laundering equipment contained within the plant is property other than a building, the unit of property for the laundering equipment is initially determined under the general rule in paragraph (e)(3)(i) of this section and is comprised of all the components that are functionally interdependent. Under this rule, the initial units of property are each laundering line because each line is functionally independent and is comprised of components that are functionally interdependent. However, because each line is comprised of plant property under paragraph (e)(3)(ii) of this section, F must further divide these initial units of property into smaller units of property by determining the components (or groups of components) that perform discrete and major functions within the line. Under paragraph (e)(3)(ii) of this section, F must treat each sorter, boiler, washer, dryer, ironer, folder, and waste water treatment system in each line as a separate unit of property because each of these components performs a discrete and major function within the line.

Example 7. Plant property; industrial process G operates a restaurant that prepares and serves food to retail customers. Within its restaurant, G has a large piece of equipment that uses an assembly line-like process to prepare and cook tortillas that G serves only to its restaurant customers. Because the tortilla-making equipment is property other than a building, the unit of property for the equipment is initially determined under the general rule in paragraph (e)(3)(i) of this section and is comprised of all the components that are functionally interdependent. Under this rule, the initial unit of property is the entire tortilla-making equipment because the various components of the equipment are functionally interdependent. The equipment is not plant property under paragraph (e)(3)(ii) of this section because the equipment is not used in an industrial process, as it performs a small-scale function in G's restaurant operations. Thus, G is not required to further divide the equipment into sepa-

rate units of property based on the components that perform discrete and major functions.

Example 8. Personal property H owns locomotives that it uses in its railroad business. Each locomotive consists of various components, such as an engine, generators, batteries, and trucks. H acquired a locomotive with all its components. Because H's locomotive is property other than a building, the initial unit of property is determined under the general rule in paragraph (e)(3)(i) of this section and is comprised of the components that are functionally interdependent. Under paragraph (e)(3)(i) of this section, the locomotive is a single unit of property because it consists entirely of components that are functionally interdependent.

Example 9. Personal property J provides legal services to its clients. J purchased a laptop computer and a printer for its employees to use in providing legal services. Because the computer and printer are property other than a building, the initial units of property are determined under the general rule in paragraph (e)(3)(i) of this section and are comprised of the components that are functionally interdependent. Under paragraph (e)(3)(i) of this section, the computer and the printer are separate units of property because the computer and the printer are not components that are functionally interdependent (that is, the placing in service of the computer is not dependent on the placing in service of the printer).

Example 10. Building structure and systems; leased building K is a retailer of consumer products. K conducts its retail sales in a building that it leases from L. The leased building consists of the building structure (including the floor, walls, and roof) and various building systems, including a plumbing system, an electrical system, an HVAC system, a security system, and a fire protection and prevention system. K pays an amount for labor and materials to perform work on the HVAC system of the leased building. Under paragraph (e)(2)(v)(A) of this section, because K leases the entire building, K must treat the leased building and its structural components as a single unit of property. As provided under paragraph (e)(2)(v)(B) of this section, an amount is paid to improve a leased building property if it is for an improvement (for example, a betterment) to the leased building structure or to any building system within the leased building. Therefore, under paragraphs (e)(2)(v)(B)(i) and (e)(2)(ii)(B)(i) of this section, if an amount paid by K for work on the HVAC system is for an improvement to the HVAC system in the leased building, K must treat this amount as an improvement to the entire leased building property.

Example 11. Production of real property related to leased property Assume the same facts as in *Example 10*, except that K receives a

construction allowance from L, and K uses the construction allowance to build a driveway adjacent to the leased building. Assume that under the terms of the lease, K, the lessee, is treated as the owner of any property that it constructs on or nearby the leased building. Also assume that section 110 does not apply to the construction allowance. Finally, assume that the driveway is not plant property or a network asset. Because the construction of the driveway consists of the production of real property other than a building, all the components of the driveway are functionally interdependent and are a single unit of property under paragraphs (e)(3)(i) and (e)(3)(iv) of this section.

Example 12. Leasehold improvements; construction allowance used for lessor-owned improvements. Assume the same facts as *Example 11*, except that, under the terms of the lease, L, the lessor, is treated as the owner of any property constructed on the leased premises. Because L, the lessor, is the owner of the driveway and the driveway is real property other than a building, all the components of the driveway are functionally interdependent and are a single unit of property under paragraph (e)(3)(i) of this section.

Example 13. Buildings and structural components; leased office space. M provides consulting services to its clients. M conducts its consulting services business in two office spaces in the same building, each of which it leases from N under separate lease agreements. Each office space contains a separate HVAC system, which is part of the leased property. Both lease agreements provide that M is responsible for maintaining, repairing, and replacing the HVAC system that is part of the leased property. M pays amounts to perform work on the HVAC system in each office space. Because M leases two separate office spaces subject to two leases, M must treat the portion of the building structure and the structural components subject to each lease as a separate unit of property under paragraph (e)(2)(v)(A) of this section. As provided under paragraph (e)(2)(v)(B) of this section, an amount is paid to improve a leased building property, if it is for an improvement to the leased portion of the building structure or the portion of any designated building system subject to each lease. Under paragraphs (e)(2)(v)(B)(i) and (e)(2)(ii)(B)(i) of this section, M must treat the HVAC system associated with each leased office space as a building system of that leased building property. Thus, M must treat the HVAC system associated with the first leased office space as a building system of the first leased office space and the HVAC system associated with the second leased office space as a building system of the second leased office space. Under paragraph (e)(2)(v)(B) of this section, if the amount paid by M for work on the HVAC system in one leased office space is for an improvement (for

example, a betterment) to the HVAC system that is part of that leased space, then M must treat the amount as an improvement to that individual leased property.

Example 14. Leased property; personal property. N is engaged in the business of transporting passengers on private jet aircraft. To conduct its business, N leases several aircraft from O. Under paragraph (e)(3)(iv) of this section (referencing paragraph (e)(3)(i) of this section), N must treat all of the components of each leased aircraft that are functionally interdependent as a single unit of property. Thus, N must treat each leased aircraft as a single unit of property.

Example 15. Improvement property. (i) P is a retailer of consumer products. In Year 1, P purchases a building from Q, which P intends to use as a retail sales facility. Under paragraph (e)(2)(i) of this section, P must treat the building and its structural components as a single unit of property. As provided under paragraph (e)(2)(ii) of this section, an amount is paid to improve a building if it is for an improvement to the building structure or any designated building system.

(ii) In Year 2, P pays an amount to construct an extension to the building to be used for additional warehouse space. Assume that the extension involves the addition of walls, floors, roof, and doors, but does not include the addition or extension of any building systems described in paragraph (e)(2)(ii)(B) of this section. Also assume that the amount paid to build the extension is a betterment to the building structure under paragraph (j) of this section, and is therefore treated as an amount paid for an improvement to the entire building under paragraph (e)(2)(ii) of this section. Accordingly, P capitalizes the amount paid as an improvement to the building under paragraph (d) of this section. Under paragraph (e)(4) of this section, the extension is not a unit of property separate from the building, the unit of property improved. Thus, to determine whether any future expenditure constitutes an improvement to the building under paragraph (e)(2)(ii) of this section, P must determine whether the expenditure constitutes an improvement to the building structure, including the building extension, or to any of the designated building systems.

Example 16. Additional rules; year placed in service. R is engaged in the business of transporting freight throughout the United States. To conduct its business, R owns a fleet of truck tractors and trailers. Each tractor and trailer is comprised of various components, including tires. R purchased a truck tractor with all of its components, including tires. The tractor tires have an average useful life to R of more than one year. At the time R placed the tractor in service, it treated the tractor tires as a separate asset for depreciation purposes under section 168. R properly treated the tractor (excluding the

cost of the tires) as 3-year property and the tractor tires as 5-year property under section 168(e). Because R's tractor is property other than a building, the initial units of property for the tractor are determined under the general rule in paragraph (e)(3)(i) of this section and are comprised of all the components that are functionally interdependent. Under this rule, R must treat the tractor, including its tires, as a single unit of property because the tractor and the tires are functionally interdependent (that is, the placing in service of the tires is dependent upon the placing in service of the tractor). However, under paragraph (e)(5)(i) of this section, R must treat the tractor and tires as separate units of property because R properly treated the tires as being within a different class of property under section 168(e).

Example 17. Additional rules; change in subsequent year S is engaged in the business of leasing nonresidential real property to retailers. In Year 1, S acquired and placed in service a building for use in its retail leasing operation. In Year 5, to accommodate the needs of a new lessee, S incurred costs to improve the building structure. S capitalized the costs of the improvement under paragraph (d) of this section and depreciated the improvement in accordance with section 168(i)(6) as nonresidential real property under section 168(e). In Year 7, S determined that the structural improvement made in Year 5 qualified under section 168(e)(8) as qualified retail improvement property and, therefore, was 15-year property under section 168(e). In Year 7, S changed its method of accounting to use a 15-year recovery period for the improvement. Under paragraph (e)(5)(ii) of this section, in Year 7, S must treat the improvement as a unit of property separate from the building.

Example 18. Additional rules; change in subsequent year In Year 1, T acquired and placed in service a building and parking lot for use in its retail operations. Under § 1.263(a)-2 of the regulations, T capitalized the cost of the building and the parking lot and began depreciating the building and the parking lot as nonresidential real property under section 168(e). In Year 3, T completed a cost segregation study under which it properly determined that the parking lot qualified as 15-year property under section 168(e). In Year 3, T changed its method of accounting for the parking lot to use a 15-year recovery period and the 150-percent declining balance method of depreciation. Under paragraph (e)(5)(ii) of this section, beginning in Year 3, T must treat the parking lot as a unit of property separate from the building.

Example 19. Additional rules; change in subsequent year In Year 1, U acquired and placed in service a building for use in its manufacturing business. U capitalized the costs allocable to the building's wiring separately from the building and depreciated the wiring

as 7-year property under section 168(e). U capitalized the cost of the building and all other structural components of the building and began depreciating them as nonresidential real property under section 168(e). In Year 3, U completed a cost segregation study under which it properly determined that the wiring is a structural component of the building and, therefore, should have been depreciated as nonresidential real property. In Year 3, U changed its method of accounting to treat the wiring as nonresidential real property. Under paragraph (e)(5)(ii) of this section, U must change the unit of property for the wiring in a manner that is consistent with the change in treatment for depreciation purposes. Therefore, U must change the unit of property for the wiring to treat it as a structural component of the building, and as part of the building unit of property, in accordance with paragraph (e)(2)(i) of this section.

(f) *Improvements to leased property*—(1) *In general.* Except as provided in paragraph (h) of this section (safe harbor for small taxpayers) and under § 1.263(a)-1(f) (de minimis safe harbor), this paragraph (f) provides the exclusive rules for determining whether amounts paid by a taxpayer are for an improvement to a leased property and must be capitalized. In the case of a leased building or a leased portion of a building, an amount is paid to improve a leased property if the amount is paid for an improvement to any of the properties specified in paragraph (e)(2)(ii) of this section (for lessor improvements) or in paragraph (e)(2)(v)(B) of this section (for lessee improvements, except as provided in paragraph (f)(2)(ii) of this section). Section 1.263(a)-4 does not apply to amounts paid for improvements to leased property or to amounts paid for the acquisition or production of leasehold improvement property.

(2) *Lessee improvements*—(i) *Requirement to capitalize.* A taxpayer lessee must capitalize the related amounts, as determined under paragraph (g)(3) of this section, that it pays to improve, as defined under paragraph (d) of this section, a leased property except to the extent that section 110 applies to a construction allowance received by the lessee for the purpose of such improvement or when the improvement constitutes a substitute for rent. See § 1.61-8(c) for the treatment of lessee expenditures that constitute a substitute for

rent. A taxpayer lessee must also capitalize the related amounts that a lessor pays to improve, as defined under paragraph (d) of this section, a leased property if the lessee is the owner of the improvement, except to the extent that section 110 applies to a construction allowance received by the lessee for the purpose of such improvement. An amount paid for a lessee improvement under this paragraph (f)(2)(i) is treated as an amount paid to acquire or produce a unit of real or personal property under § 1.263(a)-2(d)(1) of the regulations.

(ii) *Unit of property for lessee improvements.* For purposes of determining whether an amount paid by a lessee constitutes a lessee improvement to a leased property under paragraph (f)(2)(i) of this section, the unit of property and the improvement rules are applied to the leased property in accordance with paragraph (e)(2)(v) (leased buildings) or paragraph (e)(3)(iv) (leased property other than buildings) of this section and include previous lessee improvements. However, if a lessee improvement is comprised of an entire building erected on leased property, then the unit of property for the building and the application of the improvement rules to the building are determined under paragraphs (e)(2)(i) and (e)(2)(ii) of this section.

(3) *Lessor improvements*—(i) *Requirement to capitalize.* A taxpayer lessor must capitalize the related amounts, as determined under paragraph (g)(3) of this section, that it pays directly, or indirectly through a construction allowance to the lessee, to improve, as defined in paragraph (d) of this section, a leased property when the lessor is the owner of the improvement or to the extent that section 110 applies to the construction allowance. A lessor must also capitalize the related amounts that the lessee pays to improve a leased property, as defined in paragraph (e) of this section, when the lessee's improvement constitutes a substitute for rent. See § 1.61-8(c) for treatment of expenditures by lessees that constitute a substitute for rent. Amounts capitalized by the lessor under this paragraph (f)(3)(i) may not be capitalized by the lessee. If a lessor improvement is comprised of an entire building erected on leased

property, then the amount paid for the building is treated as an amount paid by the lessor to acquire or produce a unit of property under § 1.263(a)-2(d)(1). See paragraph (e)(2) of this section for the unit of property for a building and paragraph (e)(3) of this section for the unit of property for real or personal property other than a building.

(ii) *Unit of property for lessor improvements.* In general, an amount capitalized as a lessor improvement under paragraph (f)(3)(i) of this section is not a unit of property separate from the unit of property improved. See paragraph (e)(4) of this section. However, if a lessor improvement is comprised of an entire building erected on leased property, then the unit of property for the building and the application of the improvement rules to the building are determined under paragraphs (e)(2)(i) and (e)(2)(ii) of this section.

(4) *Examples.* The following examples illustrate the application of this paragraph (f) and do not address whether capitalization is required under another provision of the Code (for example, section 263A). For purposes of the following examples, assume that section 110 does not apply to the lessee and the amounts paid by the lessee are not a substitute for rent.

Example 1. Lessee improvements; additions to building (i) T is a retailer of consumer products. In Year 1, T leases a building from L, which T intends to use as a retail sales facility. The leased building consists of the building structure under paragraph (e)(2)(ii)(A) of this section and various building systems under paragraph (e)(2)(ii)(B) of this section, including a plumbing system, an electrical system, and an HVAC system. Under the terms of the lease, T is permitted to improve the building at its own expense. Under paragraph (e)(2)(v)(A) of this section, because T leases the entire building, T must treat the leased building and its structural components as a single unit of property. As provided under paragraph (e)(2)(v)(B)(I) of this section, an amount is paid to improve a leased building property if the amount is paid for an improvement to the leased building structure or to any building system within the leased building. Therefore, under paragraphs (e)(2)(v)(B)(I) and (e)(2)(ii) of this section, if T pays an amount that improves the building structure, the plumbing system, the electrical system, or the HVAC system, then T must treat this amount as an improvement to the entire leased building property.

(ii) In Year 2, T pays an amount to construct an extension to the building to be used for additional warehouse space. Assume that this amount is for a betterment (as defined under paragraph (j) of this section) to T's leased building structure and does not affect any building systems. Accordingly, the amount that T pays for the building extension is for a betterment to the leased building structure, and thus, under paragraph (e)(2)(v)(B)(I) of this section, is treated as an improvement to the entire leased building under paragraph (d) of this section. Because T, the lessee, paid an amount to improve a leased building property, T is required to capitalize the amount paid for the building extension as a leasehold improvement under paragraph (f)(2)(i) of this section. In addition, paragraph (f)(2)(i) of this section requires T to treat the amount paid for the improvement as the acquisition or production of a unit of property (leasehold improvement property) under § 1.263(a)-2(d)(1).

(iii) In Year 5, T pays an amount to add a large overhead door to the building extension that it constructed in Year 2 to accommodate the loading of larger products into the warehouse space. Under paragraph (f)(2)(ii) of this section, to determine whether the amount paid by T is for a leasehold improvement, the unit of property and the improvement rules are applied in accordance with paragraph (e)(2)(v) of this section and include T's previous improvements to the leased property. Therefore, under paragraph (e)(2)(v)(A) of this section, the unit of property is the entire leased building, including the extension built in Year 2. In addition, under paragraph (e)(2)(v)(B) of this section, the leased building property is improved if the amount is paid for an improvement to the building structure or any building system. Assume that the amount paid to add the overhead door is for a betterment, under paragraph (j) of this section, to the building structure, which includes the extension. Accordingly, T must capitalize the amounts paid to add the overhead door as a leasehold improvement to the leased building property. In addition, paragraph (f)(2)(i) of this section requires T to treat the amount paid for the improvement as the acquisition or production of a unit of property (leasehold improvement property) under § 1.263(a)-2(d)(1). However, to determine whether a future amount paid by T is for a leasehold improvement to the leased building, the unit of property and the improvement rules are again applied in accordance with paragraph (e)(2)(v) of this section and include the new overhead door.

Example 2. Lessee improvements; additions to certain structural components of buildings (i) Assume the same facts as *Example 1* except that in Year 2, T also pays an amount to construct an extension of the HVAC system into the building extension. Assume that the ex-

tension is a betterment, under paragraph (j) of this section, to the leased HVAC system (a building system under paragraph (e)(2)(ii)(B)(I) of this section). Accordingly, the amount that T pays for the extension of the HVAC system is for a betterment to the leased building system, the HVAC system, and thus, under paragraph (e)(2)(v)(B)(I) of this section, is treated as an improvement to the entire leased building property under paragraph (d) of this section. Because T, the lessee, pays an amount to improve a leased building property, T is required to capitalize the amount paid as a leasehold improvement under paragraph (f)(2)(i) of this section. Under paragraph (f)(2)(i) of this section, T must treat the amount paid for the HVAC extension as the acquisition and production of a unit of property (leasehold improvement property) under § 1.263(a)-2(d)(1).

(ii) In Year 5, T pays an amount to add an additional chiller to the portion of the HVAC system that it constructed in Year 2 to accommodate the climate control requirements for new product offerings. Under paragraph (f)(2)(ii) of this section, to determine whether the amount paid by T is for a leasehold improvement, the unit of property and the improvement rules are applied in accordance with paragraph (e)(2)(v) of this section and include T's previous improvements to the leased building property. Therefore, under paragraph (e)(2)(v)(B) of this section, the leased building property is improved if the amount is paid for an improvement to the building structure or any building system. Assume that the amount paid to add the chiller is for a betterment, under paragraph (j) of this section, to the HVAC system, which includes the extension of the system in Year 2. Accordingly, T must capitalize the amounts paid to add the chiller as a leasehold improvement to the leased building property. In addition, paragraph (f)(2)(i) of this section requires T to treat the amount paid for the chiller as the acquisition or production of a unit of property (leasehold improvement property) under § 1.263(a)-2(d)(1). However, to determine whether a future amount paid by T is for a leasehold improvement to the leased building, the unit of property and the improvement rules are again applied in accordance with paragraph (e)(2)(v) of this section and include the new chiller.

Example 3. Lessor Improvements; additions to building (i) T is a retailer of consumer products. In Year 1, T leases a building from L, which T intends to use as a retail sales facility. Pursuant to the lease, L provides a construction allowance to T, which T intends to use to construct an extension to the retail sales facility for additional warehouse space. Assume that the amount paid for any improvement to the building does not exceed the construction allowance and that L is treated as the owner of any improvement to

the building. Under paragraph (e)(2)(i) of this section, L must treat the building and its structural components as a single unit of property. As provided under paragraph (e)(2)(ii) of this section, an amount is paid to improve a building if it is paid for an improvement to the building structure or to any building system.

(ii) In Year 2, T uses L's construction allowance to construct an extension to the leased building to provide additional warehouse space in the building. Assume that the extension is a betterment (as defined under paragraph (j) of this section) to the building structure, and therefore, the amount paid for the extension results in an improvement to the building under paragraph (d) of this section. Under paragraph (f)(3)(i) of this section, L, the lessor and owner of the improvement, must capitalize the amounts paid to T to construct the extension to the retail sales facility. T is not permitted to capitalize the amounts paid for the lessor-owned improvement. Finally, under paragraph (f)(3)(ii) of this section, the extension to L's building is not a unit of property separate from the building and its structural components.

Example 4. Lessee property; personal property added to leased building T is a retailer of consumer products. T leases a building from L, which T intends to use as a retail sales facility. Pursuant to the lease, L provides a construction allowance to T, which T uses to acquire and construct partitions for fitting rooms, counters, and shelving. Assume that each partition, counter, and shelving unit is a unit of property under paragraph (e)(3) of this section. Assume that for Federal income tax purposes T is treated as the owner of the partitions, counters, and shelving. T's expenditures for the partitions, counters, and shelving are not improvements to the leased property under paragraph (d) of this section, but rather constitute amounts paid to acquire or produce separate units of personal property under § 1.263(a)-2(d)(1).

Example 5. Lessor property; buildings on leased property L is the owner of a parcel of unimproved real property that L leases to T. Pursuant to the lease, L provides a construction allowance to T of \$500,000, which T agrees to use to construct a building costing not more than \$500,000 on the leased real property and to lease the building from L after it is constructed. Assume that for Federal income tax purposes, L is treated as the owner of the building that T will construct. T uses the \$500,000 to construct the building as required under the lease. The building consists of the building structure and the following building systems: (1) a plumbing system; (2) an electrical system; and (3) an HVAC system. Because L provides a construction allowance to T to construct a building and L is treated as the owner of the building, L must capitalize the amounts that it pays indirectly to T to construct the

building as a lessor improvement under paragraph (f)(3)(i) of this section. In addition, the amounts paid by L for the construction allowance are treated as amounts paid by L to acquire and produce the building under § 1.263(a)-2(d)(1). Further, under paragraph (e)(2)(i) of this section, L must treat the building and its structural components as a single unit of property. Under paragraph (f)(3)(i) of this section, T, the lessee, may not capitalize the amounts paid (with the construction allowance received from L) for construction of the building.

Example 6. Lessee contribution to construction costs Assume the same facts as in *Example 5*, except T spends \$600,000 to construct the building. T uses the \$500,000 construction allowance provided by L plus \$100,000 of its own funds to construct the building that L will own pursuant to the lease. Also assume that the additional \$100,000 that T pays is not a substitute for rent. For the reasons discussed in *Example 5*, L must capitalize the \$500,000 it paid T to construct the building under § 1.263(a)-2(d)(1). In addition, because T spends its own funds to complete the building, T has a depreciable interest of \$100,000 in the building and must capitalize the \$100,000 it paid to construct the building as a leasehold improvement under § 1.263(a)-2(d)(1) of the regulations. Under paragraph (e)(2)(i) of this section, L must treat the building as a single unit of property to the extent of its depreciable interest of \$500,000. In addition, under paragraphs (f)(2)(ii) and (e)(2)(i) of this section, T must also treat the building as a single unit of property to the extent of its depreciable interest of \$100,000.

(g) *Special rules for determining improvement costs*—(1) *Certain costs incurred during an improvement*—(i) *In general.* A taxpayer must capitalize all the direct costs of an improvement and all the indirect costs (including, for example, otherwise deductible repair costs) that directly benefit or are incurred by reason of an improvement. Indirect costs arising from activities that do not directly benefit and are not incurred by reason of an improvement are not required to be capitalized under section 263(a), regardless of whether the activities are performed at the same time as an improvement.

(ii) *Exception for individuals' residences.* A taxpayer who is an individual may capitalize amounts paid for repairs and maintenance that are made at the same time as capital improvements to units of property not used in the taxpayer's trade or business or for the production of income if the

amounts are paid as part of an improvement (for example, a remodeling) of the taxpayer's residence.

(2) *Removal costs*—(i) *In general.* If a taxpayer disposes of a depreciable asset, including a partial disposition under Prop. Reg. § 1.168(i)-1(e)(2)(ix) (September 19, 2013), or § 1.168(i)-8(d), for Federal income tax purposes and has taken into account the adjusted basis of the asset or component of the asset in realizing gain or loss, then the costs of removing the asset or component are not required to be capitalized under this section. If a depreciable asset is included in a general asset account under section 168(i)(4), and neither the regulations under section 168(i)(4) and § 1.168(i)-1(e)(3), apply to a disposition of such asset, or a portion of such asset under § 1.168(i)-1(e)(1)(ii), a loss is treated as being realized in the amount of zero upon the disposition of the asset solely for purposes of this paragraph (g)(2)(i). If a taxpayer disposes of a component of a unit of property, but the disposal of the component is not a disposition for Federal tax purposes, then the taxpayer must deduct or capitalize the costs of removing the component based on whether the removal costs directly benefit or are incurred by reason of a repair to the unit of property or an improvement to the unit of property. But see § 1.280B-1 for the rules applicable to demolition of structures.

(ii) *Examples.* The following examples illustrate the application of paragraph (g)(2)(i) of this section and, unless otherwise stated, do not address whether capitalization is required under another provision of this section or another provision of the Code (for example, section 263A). For purposes of the following examples, assume that § 1.168(i)-1(e) or § 1.168(i)-8, applies and that § 1.280B-1 does not apply.

Example 1. Component removed during improvement; no disposition X owns a factory building with a storage area on the second floor. X pays an amount to remove the original columns and girders supporting the second floor and replace them with new columns and girders to permit storage of supplies with a gross weight 50 percent greater than the previous load-carrying capacity of the storage area. Assume that the replacement of the columns and girders constitutes a betterment to the building structure and is

therefore an improvement to the building unit of property under paragraphs (d)(1) and (j) of this section. Assume that X disposes of the original columns and girders and the disposal of these structural components is not a disposition under § 1.168(i)-1(e) or § 1.168(i)-8. Under paragraphs (g)(2)(i) and (j) of this section, the amount paid to remove the columns and girders must be capitalized as a cost of the improvement, because it directly benefits and is incurred by reason of the improvement to the building.

Example 2. Component removed during improvement; disposition Assume the same facts as *Example 1*, except X disposes of the original columns and girders and elects to treat the disposal of these structural components as a partial disposition of the factory building under § 1.168(i)-8(d), taking into account the adjusted basis of the components in realizing loss on the disposition. Under paragraph (g)(2)(i) of this section, the amount paid to remove the columns and girders is not required to be capitalized as part of the cost of the improvement regardless of their relation to the improvement. However, all the remaining costs of replacing the columns and girders must be capitalized as improvements to the building unit of property under paragraphs (d)(1), (j), and (g)(1) of this section.

Example 3. Component removed during repair or maintenance; no disposition Y owns a building in which it conducts its retail business. The roof over Y's building is covered with shingles. Over time, the shingles begin to wear and Y begins to experience leaks into its retail premises. However, the building still functions in Y's business. To eliminate the problems, a contractor recommends that Y remove the original shingles and replace them with new shingles. Accordingly, Y pays the contractor to replace the old shingles with new but comparable shingles. The new shingles are comparable to original shingles but correct the leakage problems. Assume that replacement of old shingles with new shingles to correct the leakage is not a betterment or a restoration of the building structure or systems under paragraph (j) or (k) of this section and does not adapt the building structure or systems to a new or different use under paragraph (l) of this section. Thus, the amounts paid by Y to replace the shingles are not improvements to the building unit of property under paragraph (d) of this section. Under paragraph (g)(2)(i) of this section, the amounts paid to remove the shingles are not required to be capitalized because they directly benefit and are incurred by reason of repair or maintenance to the building structure.

Example 4. Component removed with disposition and restoration Assume the same facts as *Example 3* except Y disposes of the original shingles, and Y elects to treat the disposal of these components as a partial disposition of

the building under § 1.168(i)-8(d), and deducts the adjusted basis of the components as a loss on the disposition. Under paragraph (k)(1)(i) of this section, amounts paid for replacement of the shingles constitute a restoration of the building structure because the amounts are paid for the replacement of a component of the structure and the taxpayer has properly deducted a loss for that component. Thus, under paragraphs (d)(2) and (k) of this section, Y is required to capitalize the amounts paid for the replacement of the shingles as an improvement to the building unit of property. However, under paragraph (g)(2)(i) of this section, the amounts paid by Y to remove the original shingles are not required to be capitalized as part of the costs of the improvement, regardless of their relation to the improvement.

(3) *Related amounts.* For purposes of paragraph (d) of this section, amounts paid to improve a unit of property include amounts paid over a period of more than one taxable year. Whether amounts are related to the same improvement depends on the facts and circumstances of the activities being performed.

(4) *Compliance with regulatory requirements.* For purposes of this section, a Federal, state, or local regulator's requirement that a taxpayer perform certain repairs or maintenance on a unit of property to continue operating the property is not relevant in determining whether the amount paid improves the unit of property.

(h) *Safe harbor for small taxpayers*—(1) *In general.* A qualifying taxpayer (as defined in paragraph (h)(3) of this section) may elect to not apply paragraph (d) or paragraph (f) of this section to an eligible building property (as defined in paragraph (h)(4) of this section) if the total amount paid during the taxable year for repairs, maintenance, improvements, and similar activities performed on the eligible building property does not exceed the lesser of—

(i) 2 percent of the unadjusted basis (as defined under paragraph (h)(5) of this section) of the eligible building property; or

(ii) \$10,000.

(2) *Application with other safe harbor provisions.* For purposes of paragraph (h)(1) of this section, amounts paid for repairs, maintenance, improvements, and similar activities performed on eligible building property include those amounts not capitalized under the de

minimis safe harbor election under § 1.263(a)-1(f) and those amounts deemed not to improve property under the safe harbor for routine maintenance under paragraph (i) of this section.

(3) *Qualifying taxpayer*—(i) *In general.* For purposes of this paragraph (h), the term *qualifying taxpayer* means a taxpayer whose average annual gross receipts as determined under this paragraph (h)(3) for the three preceding taxable years is less than or equal to \$10,000,000.

(ii) *Application to new taxpayers.* If a taxpayer has been in existence for less than three taxable years, the taxpayer determines its average annual gross receipts for the number of taxable years (including short taxable years) that the taxpayer (or its predecessor) has been in existence.

(iii) *Treatment of short taxable year.* In the case of any taxable year of less than 12 months (a short taxable year), the gross receipts shall be annualized by—

(A) Multiplying the gross receipts for the short period by 12; and

(B) Dividing the product determined in paragraph (h)(3)(iii)(A) of this section by the number of months in the short period.

(iv) *Definition of gross receipts.* For purposes of applying paragraph (h)(3)(i) of this section, the term *gross receipts* means the taxpayer's receipts for the taxable year that are properly recognized under the taxpayer's methods of accounting used for Federal income tax purposes for the taxable year. For this purpose, gross receipts include total sales (net of returns and allowances) and all amounts received for services. In addition, gross receipts include any income from investments and from incidental or outside sources. For example, gross receipts include interest (including original issue discount and tax-exempt interest within the meaning of section 103), dividends, rents, royalties, and annuities, regardless of whether such amounts are derived in the ordinary course of the taxpayer's trade or business. Gross receipts are not reduced by cost of goods sold or by the cost of property sold if such property is described in section 1221(a)(1), (3), (4), or (5). With respect to sales of capital assets as defined in section 1221, or

sales of property described in section 1221(a)(2) (relating to property used in a trade or business), gross receipts shall be reduced by the taxpayer's adjusted basis in such property. Gross receipts do not include the repayment of a loan or similar instrument (for example, a repayment of the principal amount of a loan held by a commercial lender) and, except to the extent of gain recognized, do not include gross receipts derived from a non-recognition transaction, such as a section 1031 exchange. Finally, gross receipts do not include amounts received by the taxpayer with respect to sales tax or other similar state and local taxes if, under the applicable state or local law, the tax is legally imposed on the purchaser of the good or service, and the taxpayer merely collects and remits the tax to the taxing authority. If, in contrast, the tax is imposed on the taxpayer under the applicable law, then gross receipts include the amounts received that are allocable to the payment of such tax.

(4) *Eligible building property.* For purposes of this section, the term *eligible building property* refers to each unit of property defined in paragraph (e)(2)(i) (building), paragraph (e)(2)(iii)(A) (condominium), paragraph (e)(2)(iv)(A) (cooperative), or paragraph (e)(2)(v)(A) (leased building or portion of building) of this section, as applicable, that has an unadjusted basis of \$1,000,000 or less.

(5) *Unadjusted basis*—(i) *Eligible building property owned by taxpayer.* For purposes of this section, the unadjusted basis of eligible building property owned by the taxpayer means the basis as determined under section 1012, or other applicable sections of Chapter 1, including subchapters O (relating to gain or loss on dispositions of property), C (relating to corporate distributions and adjustments), K (relating to partners and partnerships), and P (relating to capital gains and losses). Unadjusted basis is determined without regard to any adjustments described in section 1016(a)(2) or (3) or to amounts for which the taxpayer has elected to treat as an expense (for example, under sections 179, 179B, or 179C).

(ii) *Eligible building property leased to the taxpayer.* For purposes of this section, the unadjusted basis of eligible

building property leased to the taxpayer is the total amount of (undiscounted) rent paid or expected to be paid by the lessee under the lease for the entire term of the lease, including renewal periods if all the facts and circumstances in existence during the taxable year in which the lease is entered indicate a reasonable expectancy of renewal. Section 1.263(a)-4(f)(5)(ii) provides the factors that are significant in determining whether there exists a reasonable expectancy of renewal for purposes of this paragraph.

(6) *Time and manner of election.* A taxpayer makes the election described in paragraph (h)(1) of this section by attaching a statement to the taxpayer's timely filed original Federal tax return (including extensions) for the taxable year in which amounts are paid for repairs, maintenance, improvements, and similar activities performed on the eligible building property providing that such amounts qualify under the safe harbor provided in paragraph (h)(1) of this section. Sections 301.9100-1 through 301.9100-3 of this chapter provide the rules governing extensions of the time to make regulatory elections. The statement must be titled, "Section 1.263(a)-3(h) Safe Harbor Election for Small Taxpayers" and include the taxpayer's name, address, taxpayer identification number, and a description of each eligible building property to which the taxpayer is applying the election. In the case of an S corporation or a partnership, the election is made by the S corporation or by the partnership, and not by the shareholders or partners. An election may not be made through the filing of an application for change in accounting method or, before obtaining the Commissioner's consent to make a late election, by filing an amended Federal tax return. A taxpayer may not revoke an election made under this paragraph (h). The time and manner of making the election under this paragraph (h) may be modified through guidance of general applicability (see §§ 601.601(d)(2) and 601.602 of this chapter).

(7) *Treatment of safe harbor amounts.* Amounts paid by the taxpayer for repairs, maintenance, improvements, and similar activities to which the taxpayer properly applies the safe harbor

under paragraph (h)(1) of this section and for which the taxpayer properly makes the election under paragraph (h)(6) of this section are not treated as improvements under paragraph (d) or (f) of this section and may be deducted under § 1.162-1 or § 1.212-1, as applicable, in the taxable year these amounts are paid, provided the amounts otherwise qualify for a deduction under these sections.

(8) *Safe harbor exceeded.* If total amounts paid by a qualifying taxpayer during the taxable year for repairs, maintenance, improvements, and similar activities performed on an eligible building property exceed the safe harbor limitations specified in paragraph (h)(1) of this section, then the safe harbor election is not available for that eligible building property and the taxpayer must apply the general improvement rules under this section to determine whether amounts are for improvements to the unit of property, including the safe harbor for routine maintenance under paragraph (i) of this section. The taxpayer may also elect to apply the de minimis safe harbor under § 1.263(a)-1(f) to amounts qualifying under that safe harbor irrespective of the application of this paragraph (h).

(9) *Modification of safe harbor amounts.* The amount limitations provided in paragraphs (h)(1)(i), (h)(1)(ii), and (h)(3) of this section may be modified through published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter).

(10) *Examples.* The following examples illustrate the rules of this paragraph (h). Assume that § 1.212-1 does not apply to the amounts paid.

Example 1. Safe harbor for small taxpayers applicable. A is a qualifying taxpayer under paragraph (h)(3) of this section. A owns an office building in which A provides consulting services. In Year 1, A's building has an unadjusted basis of \$750,000 as determined under paragraph (h)(5)(i) of this section. In Year 1, A pays \$5,500 for repairs, maintenance, improvements and similar activities to the office building. Because A's building unit of property has an unadjusted basis of \$1,000,000 or less, A's building constitutes eligible building property under paragraph (h)(4) of this section. The aggregate amount paid by A during Year 1 for repairs, maintenance,

improvements and similar activities on this eligible building property does not exceed the lesser of \$15,000 (2 percent of the building's unadjusted basis of \$750,000) or \$10,000. Therefore, under paragraph (h)(1) of this section, A may elect to not apply the capitalization rule of paragraph (d) of this section to the amounts paid for repair, maintenance, improvements, or similar activities on the office building in Year 1. If A properly makes the election under paragraph (h)(6) of this section for the office building and the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on a trade or business, A may deduct these amounts under § 1.162-1 in Year 1.

Example 2. Safe harbor for small taxpayers inapplicable. Assume the same facts as in *Example 1*, except that A pays \$10,500 for repairs, maintenance, improvements, and similar activities performed on its office building in Year 1. Because this amount exceeds \$10,000, the lesser of the two limitations provided in paragraph (h)(1) of this section, A may not apply the safe harbor for small taxpayers under paragraph (h)(1) of this section to the total amounts paid for repairs, maintenance, improvements, and similar activities performed on the building. Therefore, A must apply the general improvement rules under this section to determine which of the aggregate amounts paid are for improvements and must be capitalized under paragraph (d) of this section and which of the amounts are for repair and maintenance under § 1.162-4.

Example 3. Safe harbor applied building-by-building. (i) B is a qualifying taxpayer under paragraph (h)(3) of this section. B owns two rental properties, Building M and Building N. Building M and Building N are both multi-family residential buildings. In Year 1, each property has an unadjusted basis of \$300,000 under paragraph (h)(5) of this section. Because Building M and Building N each have an unadjusted basis of \$1,000,000 or less, Building M and Building N each constitute eligible building property in Year 1 under paragraph (h)(4) of this section. In Year 1, B pays \$5,000 for repairs, maintenance, improvements, and similar activities performed on Building M. In Year 1, B also pays \$7,000 for repairs, maintenance, improvements, and similar activities performed on Building N.

(ii) The total amount paid by B during Year 1 for repairs, maintenance, improvements and similar activities on Building M (\$5,000) does not exceed the lesser of \$6,000 (2 percent of the building's unadjusted basis of \$300,000) or \$10,000. Therefore, under paragraph (h)(1) of this section, for Year 1, B may elect to not apply the capitalization rule under paragraph (d) of this section to the amounts it paid for repairs, maintenance, improvements, and similar activities on Building M. If B properly makes the election under paragraph (h)(6) of this section for

Building M and the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on B's trade or business, B may deduct these amounts under § 1.162-1.

(iii) The total amount paid by B during Year 1 for repairs, maintenance, improvements and similar activities on Building N (\$7,000) exceeds \$6,000 (2 percent of the building's unadjusted basis of \$300,000), the lesser of the two limitations provided under paragraph (h)(1) of this section. Therefore, B may not apply the safe harbor under paragraph (h)(1) of this section to the total amounts paid for repairs, maintenance, improvements, and similar activities performed on Building N. Instead, B must apply the general improvement rules under this section to determine which of the total amounts paid for work performed on Building N are for improvements and must be capitalized under paragraph (d) of this section and which amounts are for repair and maintenance under § 1.162-4.

Example 4. Safe harbor applied to leased building property. C is a qualifying taxpayer under paragraph (h)(3) of this section. C is the lessee of a building in which C operates a retail store. The lease is a triple-net lease, and the lease term is 20 years, including reasonably expected renewals. C pays \$4,000 per month in rent. In Year 1, C pays \$7,000 for repairs, maintenance, improvements, and similar activities performed on the building. Under paragraph (h)(5)(ii) of this section, the unadjusted basis of C's leased unit of property is \$960,000 (\$4,000 monthly rent \times 12 months \times 20 years). Because C's leased building has an unadjusted basis of \$1,000,000 or less, the building is eligible building property for Year 1 under paragraph (h)(4) of this section. The total amount paid by C during Year 1 for repairs, maintenance, improvements, and similar activities on the leased building (\$7,000) does not exceed the lesser of \$19,200 (2 percent of the building's unadjusted basis of \$960,000) or \$10,000. Therefore, under paragraph (h)(1) of this section, for Year 1, C may elect to not apply the capitalization rule under paragraph (d) of this section to the amounts it paid for repairs, maintenance, improvements, and similar activities on the leased building. If C properly makes the election under paragraph (h)(6) of this section for the leased building and the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on C's trade or business, C may deduct these amounts under § 1.162-1.

(i) *Safe harbor for routine maintenance on property—(1) In general.* An amount paid for routine maintenance (as defined in paragraph (i)(1)(i) or (i)(1)(ii) of this section, as applicable) on a unit of tangible property, or in the case of a

building, on any of the properties designated in paragraphs (e)(2)(ii), (e)(2)(iii)(B), (e)(2)(iv)(B), or paragraph (e)(2)(v)(B) of this section, is deemed not to improve that unit of property.

(i) *Routine maintenance for buildings.* Routine maintenance for a building unit of property is the recurring activities that a taxpayer expects to perform as a result of the taxpayer's use of any of the properties designated in paragraphs (e)(2)(ii), (e)(2)(iii)(B), (e)(2)(iv)(B), or (e)(2)(v)(B) of this section to keep the building structure or each building system in its ordinarily efficient operating condition. Routine maintenance activities include, for example, the inspection, cleaning, and testing of the building structure or each building system, and the replacement of damaged or worn parts with comparable and commercially available replacement parts. Routine maintenance may be performed any time during the useful life of the building structure or building systems. However, the activities are routine only if the taxpayer reasonably expects to perform the activities more than once during the 10-year period beginning at the time the building structure or the building system upon which the routine maintenance is performed is placed in service by the taxpayer. A taxpayer's expectation will not be deemed unreasonable merely because the taxpayer does not actually perform the maintenance a second time during the 10-year period, provided that the taxpayer can otherwise substantiate that its expectation was reasonable at the time the property was placed in service. Factors to be considered in determining whether maintenance is routine and whether a taxpayer's expectation is reasonable include the recurring nature of the activity, industry practice, manufacturers' recommendations, and the taxpayer's experience with similar or identical property. With respect to a taxpayer that is a lessor of a building or a part of the building, the taxpayer's use of the building unit of property includes the lessee's use of its unit of property.

(ii) *Routine maintenance for property other than buildings.* Routine maintenance for property other than buildings

is the recurring activities that a taxpayer expects to perform as a result of the taxpayer's use of the unit of property to keep the unit of property in its ordinarily efficient operating condition. Routine maintenance activities include, for example, the inspection, cleaning, and testing of the unit of property, and the replacement of damaged or worn parts of the unit of property with comparable and commercially available replacement parts. Routine maintenance may be performed any time during the useful life of the unit of property. However, the activities are routine only if, at the time the unit of property is placed in service by the taxpayer, the taxpayer reasonably expects to perform the activities more than once during the class life (as defined in paragraph (i)(4) of this section) of the unit of property. A taxpayer's expectation will not be deemed unreasonable merely because the taxpayer does not actually perform the maintenance a second time during the class life of the unit of property, provided that the taxpayer can otherwise substantiate that its expectation was reasonable at the time the property was placed in service. Factors to be considered in determining whether maintenance is routine and whether the taxpayer's expectation is reasonable include the recurring nature of the activity, industry practice, manufacturers' recommendations, and the taxpayer's experience with similar or identical property. With respect to a taxpayer that is a lessor of a unit of property, the taxpayer's use of the unit of property includes the lessee's use of the unit of property.

(2) *Rotable and temporary spare parts.* Except as provided in paragraph (i)(3) of this section, for purposes of paragraph (i)(1)(ii) of this section, amounts paid for routine maintenance include routine maintenance performed on (and with regard to) rotable and temporary spare parts.

(3) *Exceptions.* Routine maintenance does not include the following:

(i) Amounts paid for a betterment to a unit of property under paragraph (j) of this section;

(ii) Amounts paid for the replacement of a component of a unit of property for which the taxpayer has prop-

erly deducted a loss for that component (other than a casualty loss under § 1.165-7) (see paragraph (k)(1)(i) of this section);

(iii) Amounts paid for the replacement of a component of a unit of property for which the taxpayer has properly taken into account the adjusted basis of the component in realizing gain or loss resulting from the sale or exchange of the component (see paragraph (k)(1)(ii) of this section);

(iv) Amounts paid for the restoration of damage to a unit of property for which the taxpayer is required to take a basis adjustment as a result of a casualty loss under section 165, or relating to a casualty event described in section 165, subject to the limitation in paragraph (k)(4) of this section (see paragraph (k)(1)(iii) of this section);

(v) Amounts paid to return a unit of property to its ordinarily efficient operating condition, if the property has deteriorated to a state of disrepair and is no longer functional for its intended use (see paragraph (k)(1)(iv) of this section);

(vi) Amounts paid to adapt a unit of property to a new or different use under paragraph (l) of this section;

(vii) Amounts paid for repairs, maintenance, or improvement of network assets (as defined in paragraph (e)(3)(iii)(A) of this section); or

(viii) Amounts paid for repairs, maintenance, or improvement of rotatable and temporary spare parts to which the taxpayer applies the optional method of accounting for rotatable and temporary spare parts under § 1.162-3(e).

(4) *Class life.* The class life of a unit of property is the recovery period prescribed for the property under sections 168(g)(2) and (3) for purposes of the alternative depreciation system, regardless of whether the property is depreciated under section 168(g). For purposes of determining class life under this section, section 168(g)(3)(A) (relating to tax-exempt use property subject to lease) does not apply. If the unit of property is comprised of components with different class lives, then the class life of the unit of property is deemed to be the same as the component with the longest class life.

(5) *Coordination with section 263A.* Amounts paid for routine maintenance

under this paragraph (i) may be subject to capitalization under section 263A if these amounts comprise the direct or allocable indirect costs of other property produced by the taxpayer or property acquired for resale. See, for example, § 1.263A-1(e)(3)(ii)(O) requiring taxpayers to capitalize the cost of repairing equipment or facilities allocable to property produced or property acquired for resale.

(6) *Examples.* The following examples illustrate the application of this paragraph (i) and, unless otherwise stated, do not address the treatment under other provisions of the Code (for example, section 263A). In addition, unless otherwise stated, assume that the taxpayer has not applied the optional method of accounting for rotatable and temporary spare parts under § 1.162-3(e).

Example 1. Routine maintenance on component (i) A is a commercial airline engaged in the business of transporting passengers and freight throughout the United States and abroad. To conduct its business, A owns or leases various types of aircraft. As a condition of maintaining its airworthiness certification for these aircraft, A is required by the Federal Aviation Administration (FAA) to establish and adhere to a continuous maintenance program for each aircraft within its fleet. These programs, which are designed by A and the aircraft's manufacturer and approved by the FAA, are incorporated into each aircraft's maintenance manual. The maintenance manuals require a variety of periodic maintenance visits at various intervals. One type of maintenance visit is an engine shop visit (ESV), which A expects to perform on its aircraft engines approximately every 4 years to keep its aircraft in its ordinarily efficient operating condition. In Year 1, A purchased a new aircraft, which included four new engines attached to the airframe. The four aircraft engines acquired with the aircraft are not materials or supplies under § 1.162-3(c)(1)(i) because they are acquired as part of a single unit of property, the aircraft. In Year 5, A performs its first ESV on the aircraft engines. The ESV includes disassembly, cleaning, inspection, repair, replacement, reassembly, and testing of the engine and its component parts. During the ESV, the engine is removed from the aircraft and shipped to an outside vendor who performs the ESV. If inspection or testing discloses a discrepancy in a part's conformity to the specifications in A's maintenance program, the part is repaired, or if necessary, replaced with a comparable and commercially available replacement part.

After the ESVs, the engines are returned to A to be reinstalled on another aircraft or stored for later installation. Assume that the class life for A's aircraft, including the engines, is 12 years. Assume that none of the exceptions set out in paragraph (i)(3) of this section apply to the costs of performing the ESVs.

(ii) Because the ESVs involve the recurring activities that A expects to perform as a result of its use of the aircraft to keep the aircraft in ordinarily efficient operating condition and consist of maintenance activities that A expects to perform more than once during the 12 year class life of the aircraft, A's ESVs are within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts paid for the ESVs are deemed not to improve the aircraft and are not required to be capitalized under paragraph (d) of this section.

Example 2. Routine maintenance after class life Assume the same facts as in *Example 1*, except that in year 15 A pays amounts to perform an ESV on one of the original aircraft engines after the end of the class life of the aircraft. Because this ESV involves the same routine maintenance activities that were performed on aircraft engines in *Example 1*, this ESV also is within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts paid for this ESV, even though performed after the class life of the aircraft, are deemed not to improve the aircraft and are not required to be capitalized under paragraph (d) of this section.

Example 3. Routine maintenance on rotatable spare parts (i) Assume the same facts as in *Example 1*, except that in addition to the four engines purchased as part of the aircraft, A separately purchases four additional new engines that A intends to use in its aircraft fleet to avoid operational downtime when ESVs are required to be performed on the engines previously installed on an aircraft. Later in Year 1, A installs these four engines on an aircraft in its fleet. In Year 5, A performs the first ESVs on these four engines. Assume that these ESVs involve the same routine maintenance activities that were performed on the engines in *Example 1*, and that none of the exceptions set out in paragraph (i)(3) of this section apply to these ESVs. After the ESVs were performed, these engines were reinstalled on other aircraft or stored for later installation.

(ii) The additional aircraft engines are rotatable spare parts under § 1.162-3(c)(2) because they were acquired separately from the aircraft, are removable from the aircraft, and are repaired and reinstalled on other aircraft or stored for later installation. Assume the class life of an engine is the same as the airframe, 12 years. Because the ESVs involve the recurring activities that A expects to perform as a result of its use of the engines

to keep the engines in ordinarily efficient operating condition, and consist of maintenance activities that A expects to perform more than once during the 12 year class life of the engine, the ESVs fall within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts paid for the ESVs for the four additional engines are deemed not to improve these engines and are not required to be capitalized under paragraph (d) of this section. For the treatment of amounts paid to acquire the engines, see § 1.162-3(a).

Example 4. Routine maintenance resulting from prior owner's use (i) In January, Year 1, B purchases a used machine for use in its manufacturing operations. Assume that the machine is the unit of property and has a class life of 10 years. B places the machine in service in January, Year 1, and at that time, B expects to perform manufacturer recommended scheduled maintenance on the machine approximately every three years. The scheduled maintenance includes the cleaning and oiling of the machine, the inspection of parts for defects, and the replacement of minor items such as springs, bearings, and seals with comparable and commercially available replacement parts. At the time B purchased the machine, the machine was approaching the end of a three-year scheduled maintenance period. As a result, in February, Year 1, B pays amounts to perform the manufacturer recommended scheduled maintenance. Assume that none of the exceptions set out in paragraph (i)(3) of this section apply to the amounts paid for the scheduled maintenance.

(ii) The majority of B's costs do not qualify under the routine maintenance safe harbor in paragraph (i)(1)(ii) of this section because the costs were incurred primarily as a result of the prior owner's use of the property and not B's use. B acquired the machine just before it had received its three-year scheduled maintenance. Accordingly, the amounts paid for the scheduled maintenance resulted from the prior owner's, and not B's, use of the property and must be capitalized if those amounts result in a betterment under paragraph (i) of this section, including the amelioration of a material condition or defect, or otherwise result in an improvement under paragraph (d) of this section.

Example 5. Routine maintenance resulting from new owner's use Assume the same facts as in *Example 4*, except that after B pays amounts for the maintenance in Year 1, B continues to operate the machine in its manufacturing business. In Year 4, B pays amounts to perform the next scheduled manufacturer recommended maintenance on the machine. Assume that the scheduled maintenance activities performed are the same as those performed in *Example 4* and that none of the exceptions set out in paragraph (i)(3) of this section apply to the amounts paid for

the scheduled maintenance. Because the scheduled maintenance performed in Year 4 involves the recurring activities that B performs as a result of its use of the machine, keeps the machine in an ordinarily efficient operating condition, and consists of maintenance activities that B expects to perform more than once during the 10-year class life of the machine, B's scheduled maintenance costs are within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts paid for the scheduled maintenance in Year 4 are deemed not to improve the machine and are not required to be capitalized under paragraph (d) of this section.

Example 6. Routine maintenance; replacement of substantial structural part; coordination with section 263A C is in the business of producing commercial products for sale. As part of the production process, C places raw materials into lined containers in which a chemical reaction is used to convert raw materials into the finished product. The lining, which comprises 60 percent of the total physical structure of the container, is a substantial structural part of the container. Assume that each container, including its lining, is the unit of property and that a container has a class life of 12 years. At the time that C placed the container into service, C was aware that approximately every three years, the container lining would need to be replaced with comparable and commercially available replacement materials. At the end of three years, the container will continue to function, but will become less efficient and the replacement of the lining will be necessary to keep the container in an ordinarily efficient operating condition. In Year 1, C acquired 10 new containers and placed them into service. In Year 4, Year 7, Year 9, and Year 12, C pays amounts to replace the containers' linings with comparable and commercially available replacement parts. Assume that none of the exceptions set out in paragraph (i)(3) of this section apply to the amounts paid for the replacement linings. Because the replacement of the linings involves recurring activities that C expects to perform as a result of its use of the containers to keep the containers in their ordinarily efficient operating condition and consists of maintenance activities that C expects to perform more than once during the 12-year class life of the containers, C's lining replacement costs are within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts that C paid for the replacement of the container linings are deemed not to improve the containers and are not required to be capitalized under paragraph (d) of this section. However, the amounts paid to replace the lining may be subject to capitalization under section 263A if the amounts paid for this maintenance comprise the direct or

§ 1.263(a)-3

26 CFR Ch. I (4-1-17 Edition)

allocable indirect costs of the property produced by C. See § 1.263A-1(e)(3)(i)(O).

Example 7. Routine maintenance once during class life D is a Class I railroad that owns a fleet of freight cars. Assume that a freight car, including all its components, is a unit of property and has a class life of 14 years. At the time that D places a freight car into service, D expects to perform cyclical reconditioning to the car every 8 to 10 years to keep the freight car in ordinarily efficient operating condition. During this reconditioning, D pays amounts to disassemble, inspect, and recondition or replace components of the freight car with comparable and commercially available replacement parts. Ten years after D places the freight car in service, D pays amounts to perform a cyclical reconditioning on the car. Because D expects to perform the reconditioning only once during the 14 year class life of the freight car, the amounts D pays for the reconditioning do not qualify for the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, D must capitalize the amounts paid for the reconditioning of the freight car if these amounts result in an improvement under paragraph (d) of this section.

Example 8. Routine maintenance; reasonable expectation Assume the same facts as *Example 7*, except in Year 1, D acquires and places in service several refrigerated freight cars, which also have a class life of 14 years. Because of the special requirements of these cars, at the time they are placed in service, D expects to perform a reconditioning of the refrigeration components of the freight car every 6 years to keep the freight car in an ordinarily efficient operating condition. During the reconditioning, D pays amounts to disassemble, inspect, and recondition or replace the refrigeration components of the freight car with comparable and commercially available replacement parts. Assume that none of the exceptions set out in paragraph (i)(3) of this section apply to the amounts paid for the reconditioning of these freight cars. In Year 6, D pays amounts to perform a reconditioning on the refrigeration components on one of the freight cars. However, because of changes in the frequency that D utilizes this freight car, D does not perform the second reconditioning on the same freight car until Year 15, after the end of the 14-year class life of the car. Under paragraph (i)(1)(ii) of this section, D's reasonable expectation that it would perform the reconditioning every 6 years will not be deemed unreasonable merely because D did not actually perform the reconditioning a second time during the 14-year class life, provided that D can substantiate that its expectation was reasonable at the time the property was placed in service. If D can demonstrate that its expectation was reasonable in Year 1 using the factors provided in para-

graph (i)(1)(ii) of this section, then the amounts paid by D to recondition the refrigerated freight car components in Year 6 and in Year 15 are within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section.

Example 9. Routine maintenance on non-rotatable part E is a towboat operator that owns and leases a fleet of towboats. Each towboat is equipped with two diesel-powered engines. Assume that each towboat, including its engines, is the unit of property and that a towboat has a class life of 18 years. At the time that E places its towboats into service, E is aware that approximately every three to four years E will need to perform scheduled maintenance on the two towboat engines to keep the engines in their ordinarily efficient operating condition. This maintenance is completed while the engines are attached to the towboat and involves the cleaning and inspecting of the engines to determine which parts are within acceptable operating tolerances and can continue to be used, which parts must be reconditioned to be brought back to acceptable tolerances, and which parts must be replaced. Engine parts replaced during these procedures are replaced with comparable and commercially available replacement parts. Assume the towboat engines are not rotatable spare parts under § 1.162-3(c)(2). In Year 1, E acquired a new towboat, including its two engines, and placed the towboat into service. In Year 5, E pays amounts to perform scheduled maintenance on both engines in the towboat. Assume that none of the exceptions set out in paragraph (i)(3) of this section apply to the scheduled maintenance costs. Because the scheduled maintenance involves recurring activities that E expects to perform more than once during the 18-year class life of the towboat, the maintenance results from E's use of the towboat, and the maintenance is performed to keep the towboat in an ordinarily efficient operating condition, the scheduled maintenance on E's towboat is within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts paid for the scheduled maintenance to its towboat engines in Year 5 are deemed not to improve the towboat and are not required to be capitalized under paragraph (d) of this section.

Example 10. Routine maintenance with related betterments Assume the same facts as *Example 9*, except that in Year 9 E's towboat engines are due for another scheduled maintenance visit. At this time, E decides to upgrade the engines to increase their horsepower and propulsion, which would permit the towboats to tow heavier loads. Accordingly, in Year 9, E pays amounts to perform many of the same activities that it would perform during the typical scheduled maintenance activities such as cleaning, inspecting, reconditioning, and replacing minor parts, but at the same

time, E incurs costs to upgrade certain engine parts to increase the towing capacity of the boats in excess of the capacity of the boats when E placed them in service. In combination with the replacement of parts with new and upgraded parts, the scheduled maintenance must be completed to perform the horsepower and propulsion upgrade. Thus, the work done on the engines encompasses more than the recurring activities that E expected to perform as a result of its use of the towboats and did more than keep the towboat in its ordinarily efficient operating condition. Rather under paragraph (j) of this section, the amounts paid to increase the horsepower and propulsion of the engines are for a betterment to the towboat, and such amounts are excepted from the routine maintenance safe harbor under paragraph (i)(3)(i) of this section. In addition, under paragraph (g)(1)(i) of this section, the scheduled maintenance procedures directly benefit the upgrades. Therefore, the amounts that E paid in Year 9 for the maintenance and upgrade of the engines do not qualify for the routine maintenance safe harbor described under paragraph (i)(1)(ii) of this section. Rather, E must capitalize the amounts paid for maintenance and upgrades of the engines as an improvement to the towboats under paragraph (d) of this section.

Example 11. Routine maintenance with unrelated improvements Assume the same facts as *Example 9*, except in Year 5, in addition to paying amounts to perform the scheduled engine maintenance on both engines, E also incurs costs to upgrade the communications and navigation systems in the pilot house of the towboat with new state-of-the-art systems. Assume the amounts paid to upgrade the communications and navigation systems are for betterments under paragraph (j) of this section, and therefore result in an improvement to the towboat under paragraph (d) of this section. In contrast with *Example 9*, the amounts paid for the scheduled maintenance on E's towboat engines are not otherwise related to the upgrades to the navigation systems. Because the scheduled maintenance on the towboat engines does not directly benefit and is not incurred by reason of the upgrades to the communication and navigation systems, the amounts paid for the scheduled engine maintenance are not a direct or indirect cost of the improvement under paragraph (g)(1)(i) of this section. Accordingly, the amounts paid for the scheduled maintenance to its towboat engines in Year 5 are routine maintenance deemed not to improve the towboat and are not required to be capitalized under paragraph (d) of this section.

Example 12. Exceptions to routine maintenance F owns and operates a farming and cattle ranch with an irrigation system that provides water for crops. Assume that each canal in the irrigation system is a sin-

gle unit of property and has a class life of 20 years. At the time F placed the canals into service, F expected to have to perform major maintenance on the canals every three years to keep the canals in their ordinarily efficient operating condition. This maintenance includes draining the canals, and then cleaning, inspecting, repairing, and reconditioning or replacing parts of the canal with comparable and commercially available replacement parts. F placed the canals into service in Year 1 and did not perform any maintenance on the canals until Year 6. At that time, the canals had fallen into a state of disrepair and no longer functioned for irrigation. In Year 6, F pays amounts to drain the canals and do extensive cleaning, repairing, reconditioning, and replacing parts of the canals with comparable and commercially available replacement parts. Although the work performed on F's canals was similar to the activities that F expected to perform, but did not perform, every three years, the costs of these activities do not fall within the routine maintenance safe harbor. Specifically, under paragraph (i)(3)(v) of this section, routine maintenance does not include activities that return a unit of property to its former ordinarily efficient operating condition if the property has deteriorated to a state of disrepair and is no longer functional for its intended use. Accordingly, amounts that F pays for work performed on the canals in Year 6 must be capitalized if they result in improvements under paragraph (d) of this section (for example, restorations under paragraph (k) of this section).

Example 13. Routine maintenance on a building; escalator system In Year 1, G acquires a large retail mall in which it leases space to retailers. The mall contains an escalator system with 40 escalators, which includes landing platforms, trusses, tracks, steps, handrails, and safety brushes. In Year 1, when G placed its building into service, G reasonably expected that it would need to replace the handrails on the escalators approximately every four years to keep the escalator system in its ordinarily efficient operating condition. After a routine inspection and test of the escalator system in Year 4, G determines that the handrails need to be replaced and pays an amount to replace the handrails with comparable and commercially available handrails. The escalator system, including the handrails, is a building system under paragraph (e)(2)(ii)(B)(4) of this section. Assume that none of the exceptions in paragraph (i)(3) of this section apply to the scheduled maintenance costs. Because the replacement of the handrails involves recurring activities that G expects to perform as a result of its use of the escalator system to keep the escalator system in an ordinarily efficient operating condition, and G reasonably expects to perform these activities

more than once during the 10-year period beginning at the time building system was placed in service, the amounts paid by G for the handrail replacements are within the routine maintenance safe harbor under paragraph (i)(1)(i) of this section. Accordingly, the amounts paid for the replacement of the handrails in Year 4 are deemed not to improve the building unit of property and are not required to be capitalized under paragraph (d) of this section.

Example 14. Not routine maintenance; escalator system. Assume the same facts as in *Example 13*, except that in Year 9, G pays amounts to replace the steps of the escalators. In Year 1, when G placed its building into service, G reasonably expected that approximately every 18 to 20 years G would need to replace the steps to keep the escalator system in its ordinarily efficient operating condition. Because the replacement does not involve recurring activities that G expects to perform more than once during the 10-year period beginning at the time the building structure or the building system was placed in service, the costs of these activities do not fall within the routine maintenance safe harbor. Accordingly, amounts that G pays to replace the steps in Year 9 must be capitalized if they result in improvements under paragraph (d) of this section (for example, restorations under paragraph (k) of this section).

Example 15. Routine maintenance on building; reasonable expectation. In Year 1, H acquires a new office building, which it uses to provide services. The building contains an HVAC system, which is a building system under paragraph (e)(2)(ii)(B)(1) of this section. In Year 1, when H placed its building into service, H reasonably expected that every four years H would need to pay an outside contractor to perform detailed testing, monitoring, and preventative maintenance on its HVAC system to keep the HVAC system in its ordinarily efficient operating condition. This scheduled maintenance includes disassembly, cleaning, inspection, repair, replacement, reassembly, and testing of the HVAC system and many of its component parts. If inspection or testing discloses a problem with any component, the part is repaired, or if necessary, replaced with a comparable and commercially available replacement part. The scheduled maintenance at these intervals is recommended by the manufacturer of the HVAC system and is routinely performed on similar systems in similar buildings. Assume that none of the exceptions in paragraph (i)(3) of this section apply to the amounts paid for the maintenance on the HVAC system. In Year 4, H pays amounts to a contractor to perform the scheduled maintenance. However, H does not perform this scheduled maintenance on its building again until Year 11. Under paragraph (i)(1)(i) of this section, H's reasonable expectation

that it would perform the maintenance every 4 years will not be deemed unreasonable merely because H did not actually perform the maintenance a second time during the 10-year period, provided that H can substantiate that its expectation was reasonable at the time the property was placed in service. If H can demonstrate that its expectation was reasonable in Year 1 using the other factors considered in paragraph (i)(1)(i), then the amounts H paid for the maintenance of the HVAC system in Year 4 and in Year 11 are within the routine maintenance safe harbor under paragraph (i)(1)(i) of this section.

(j) *Capitalization of betterments*—(1) *In general.* A taxpayer must capitalize as an improvement an amount paid for a betterment to a unit of property. An amount is paid for a betterment to a unit of property only if it—

(i) Ameliorates a material condition or defect that either existed prior to the taxpayer's acquisition of the unit of property or arose during the production of the unit of property, whether or not the taxpayer was aware of the condition or defect at the time of acquisition or production;

(ii) Is for a material addition, including a physical enlargement, expansion, extension, or addition of a major component (as defined in paragraph (k)(6) of this section) to the unit of property or a material increase in the capacity, including additional cubic or linear space, of the unit of property; or

(iii) Is reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of the unit of property.

(2) *Application of betterment rules*—(i) *In general.* The applicability of each quantitative and qualitative factor provided in paragraphs (j)(1)(ii) and (j)(1)(iii) of this section to a particular unit of property depends on the nature of the unit of property. For example, if an addition or an increase in a particular factor cannot be measured in the context of a specific type of property, this factor is not relevant in the determination of whether an amount has been paid for a betterment to the unit of property.

(ii) *Application of betterment rules to buildings.* An amount is paid to improve a building if it is paid for a betterment, as defined under paragraph (j)(1) of this section, to a property specified under

paragraph (e)(2)(ii) (building), paragraph (e)(2)(iii)(B) (condominium), paragraph (e)(2)(iv)(B) (cooperative), or paragraph (e)(2)(v)(B) (leased building or leased portion of building) of this section. For example, an amount is paid to improve a building if it is paid for an increase in the efficiency of the building structure or any one of its building systems (for example, the HVAC system).

(iii) *Unavailability of replacement parts.* If a taxpayer replaces a part of a unit of property that cannot reasonably be replaced with the same type of part (for example, because of technological advancements or product enhancements), the replacement of the part with an improved, but comparable, part does not, by itself, result in a betterment to the unit of property.

(iv) *Appropriate comparison—(A) In general.* In cases in which an expenditure is necessitated by normal wear and tear or damage to the unit of property that occurred during the taxpayer's use of the unit of property, the determination of whether an expenditure is for the betterment of the unit of property is made by comparing the condition of the property immediately after the expenditure with the condition of the property immediately prior to the circumstances necessitating the expenditure.

(B) *Normal wear and tear.* If the expenditure is made to correct the effects of normal wear and tear to the unit of property that occurred during the taxpayer's use of the unit of property, the condition of the property immediately prior to the circumstances necessitating the expenditure is the condition of the property after the last time the taxpayer corrected the effects of normal wear and tear (whether the amounts paid were for maintenance or improvements) or, if the taxpayer has not previously corrected the effects of normal wear and tear, the condition of the property when placed in service by the taxpayer.

(C) *Damage to property.* If the expenditure is made to correct damage to a unit of property that occurred during the taxpayer's use of the unit of property, the condition of the property immediately prior to the circumstances necessitating the expenditure is the

condition of the property immediately prior to damage.

(3) *Examples.* The following examples illustrate the application of this paragraph (j) only and do not address whether capitalization is required under another provision of this section or another provision of the Internal Revenue Code (for example, section 263A). Unless otherwise provided, assume that the appropriate comparison in paragraph (j)(2)(iv) of this section is not applicable under the facts.

Example 1. Amelioration of pre-existing material condition or defect. In Year 1, A purchases a store located on a parcel of land that contains underground gasoline storage tanks left by prior occupants. Assume that the parcel of land is the unit of property. The tanks had leaked prior to A's purchase, causing soil contamination. A is not aware of the contamination at the time of purchase. In Year 2, A discovers the contamination and incurs costs to remediate the soil. The remediation costs are for a betterment to the land under paragraph (j)(1)(i) of this section because A incurred the costs to ameliorate a material condition or defect that existed prior to A's acquisition of the land.

Example 2. Not amelioration of pre-existing condition or defect. B owns an office building that was constructed with insulation that contained asbestos. The health dangers of asbestos were not widely known when the building was constructed. Several years after B places the building into service, B determines that certain areas of asbestos-containing insulation have begun to deteriorate and could eventually pose a health risk to employees. Therefore, B pays an amount to remove the asbestos-containing insulation from the building structure and replace it with new insulation that is safer to employees, but no more efficient or effective than the asbestos insulation. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. Although the asbestos is determined to be unsafe under certain circumstances, the presence of asbestos insulation in a building, by itself, is not a pre-existing material condition or defect of the building structure under paragraph (j)(1)(i) of this section. In addition, the removal and replacement of the asbestos is not for a material addition to the building structure or a material increase in the capacity of the building structure under paragraphs (j)(1)(ii) and (j)(2)(iv) of this section as compared to the condition of the property prior to the deterioration of the insulation. Similarly, the removal and replacement of asbestos is not

reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of the building structure under paragraphs (j)(1)(iii) and (j)(2)(iv) of this section as compared to the condition of the property prior to the deterioration of the insulation. Therefore, the amount paid to remove and replace the asbestos insulation is not for a betterment to the building structure or an improvement to the building under paragraph (j) of this section.

Example 3. Not amelioration of pre-existing material condition or defect (i) In January, Year 1, C purchased a used machine for use in its manufacturing operations. Assume that the machine is a unit of property and has a class life of 10 years. C placed the machine in service in January, Year 1 and at that time expected to perform manufacturer recommended scheduled maintenance on the machine every three years. The scheduled maintenance includes cleaning and oiling the machine, inspecting parts for defects, and replacing minor items, such as springs, bearings, and seals, with comparable and commercially available replacement parts. The scheduled maintenance does not include any material additions or materially increase the capacity, productivity, efficiency, strength, quality, or output of the machine. At the time C purchased the machine, it was approaching the end of a three-year scheduled maintenance period. As a result, in February, Year 1, C pays an amount to perform the manufacturer recommended scheduled maintenance to keep the machine in its ordinarily efficient operating condition.

(ii) The amount that C pays does not qualify under the routine maintenance safe harbor in paragraph (i) of this section, because the cost primarily results from the prior owner's use of the property and not the taxpayer's use. C acquired the machine just before it had received its three-year scheduled maintenance. Accordingly, the amount that C pays for the scheduled maintenance results from the prior owner's use of the property and ameliorates conditions or defects that existed prior to C's ownership of the machine. Nevertheless, considering the purpose and minor nature of the work performed, this amount does not ameliorate a material condition or defect in the machine under paragraph (j)(1)(i) of this section, is not for a material addition to or increase in capacity of the machine under paragraph (j)(1)(ii) of this section, and is not reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of the machine under paragraph (j)(1)(iii) of this section. Therefore, C is not required to capitalize the amount paid for the scheduled maintenance as a betterment to the unit of property under this paragraph (j).

Example 4. Not amelioration of pre-existing material condition or defect D purchases a used ice resurfacing machine for use in the oper-

ation of its ice skating rink. To comply with local regulations, D is required to routinely monitor the air quality in the ice skating rink. One week after D places the machine into service, during a routine air quality check, D discovers that the operation of the machine is adversely affecting the air quality in the skating rink. As a result, D pays an amount to inspect and retune the machine, which includes replacing minor components of the engine that had worn out prior to D's acquisition of the machine. Assume the resurfacing machine, including the engine, is the unit of property. The routine maintenance safe harbor in paragraph (i) of this section does not apply to the amounts paid, because the activities performed do not relate solely to the taxpayer's use of the machine. The amount that D pays to inspect, retune, and replace minor components of the ice resurfacing machine ameliorates a condition or defect that existed prior to D's acquisition of the equipment. Nevertheless, considering the purpose and minor nature of the work performed, this amount does not ameliorate a material condition or defect in the machine under paragraph (j)(1)(i) of this section. In addition, the amount is not paid for a material addition to the machine or a material increase in the capacity of the machine under paragraph (j)(1)(ii) of this section. Also, the activities are not reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of the machine under paragraph (j)(1)(iii) of this section. Therefore, D is not required to capitalize the amount paid to inspect, retune, and replace minor components of the machine as a betterment under this paragraph (j).

Example 5. Amelioration of material condition or defect (i) E acquires a building for use in its business of providing assisted living services. Before and after the purchase, the building functions as an assisted living facility. However, at the time of the purchase, E is aware that the building is in a condition that is below the standards that E requires for facilities used in its business. Immediately after the acquisition and during the following two years, while E continues to use the building as an assisted living facility, E pays amounts for extensive repairs and maintenance, and the acquisition of new property to bring the facility into the high-quality condition for which E's facilities are known. The work on E's building includes repairing damaged drywall, repainting, re-wallpapering, replacing windows, repairing and replacing doors, replacing and regrouting tile, repairing millwork, and repairing and replacing roofing materials. The work also involves the replacement of section 1245 property, including window treatments, furniture, and cabinets. The work that E performs affects only the building structure under paragraph (e)(2)(ii)(A) of this

section and does not affect any of the building systems described in paragraph (e)(2)(ii)(B) of this section. Assume that each section 1245 property is a separate unit of property.

(ii) Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. Considering the purpose of the expenditure and the effect of the expenditures on the building structure, the amounts that E paid for repairs and maintenance to the building structure comprise a betterment to the building structure under paragraph (j)(1)(i) of this section because the amounts ameliorate material conditions that existed prior to E's acquisition of the building. Therefore, E must treat the amounts paid for the betterment to the building structure as an improvement to the building and must capitalize the amounts under paragraphs (j) and (d)(1) of this section. Moreover, E is required to capitalize the amounts paid to acquire and install each section 1245 property, including each window treatment, each item of furniture, and each cabinet, in accordance with § 1.263(a)-2(d)(1).

Example 6. Not a betterment; building refresh

(i) F owns a nationwide chain of retail stores that sell a wide variety of items. To maintain the appearance and functionality of its store buildings after several years of wear, F periodically pays amounts to refresh the look and layout of its stores. The work that F performs during a refresh consists of cosmetic and layout changes to the store's interiors and general repairs and maintenance to the store building to modernize the store buildings and reorganize the merchandise displays. The work to each store consists of replacing and reconfiguring display tables and racks to provide better exposure of the merchandise, making corresponding lighting relocations and flooring repairs, moving one wall to accommodate the reconfiguration of tables and racks, patching holes in walls, repainting the interior structure with a new color scheme to coordinate with new signage, replacing damaged ceiling tiles, cleaning and repairing wood flooring throughout the store building, and power washing building exteriors. The display tables and the racks all constitute section 1245 property. F pays amounts to refresh 50 stores during the taxable year. Assume that each section 1245 property within each store is a separate unit of property. Finally, assume that the work does not ameliorate any material conditions or defects that existed when F acquired the store buildings or result in any material additions to the store buildings.

(ii) Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. Considering the

facts and circumstances including the purpose of the expenditure, the physical nature of the work performed, and the effect of the expenditure on the buildings' structure and systems, the amounts paid for the refresh of each building are not for any material additions to, or material increases in the capacity of, the buildings' structure or systems as compared with the condition of the structure or systems after the previous refresh. Moreover, the amounts paid are not reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of any building structure or system under as compared to the condition of the structures or systems after the previous refresh. Rather, the work performed keeps F's store buildings' structures and buildings' systems in their ordinarily efficient operating condition. Therefore, F is not required to treat the amounts paid for the refresh of its store buildings' structures and buildings' systems as betterments under paragraphs (j)(1)(ii), (j)(1)(iii), and (j)(2)(iv) of this section. However, F is required to capitalize the amounts paid to acquire and install each section 1245 property in accordance with § 1.263(a)-2(d)(1).

Example 7. Building refresh; limited improvement

(i) Assume the same facts as *Example 6* except, in the course of the refresh to one of its store buildings, F also pays amounts to increase the building's storage space, add a second loading dock, and add a second overhead door. Specifically, at the same time F pays amounts to perform the refresh, F pays additional amounts to construct an addition to the back of the store building, including adding a new overhead door and loading dock to the building. The work also involves upgrades to the electrical system of the building, including the addition of a second service box with increased amperage and new wiring from the service box to provide lighting and power throughout the new space. Although it is performed at the same time, the construction of the additions does not affect, and is not otherwise related to, the refresh of the retail space.

(ii) Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. Under paragraph (j)(1)(ii) of this section, the amounts paid by F to add the storage space, loading dock, overhead door, and expand the electrical system are for betterments to F's building structure and to the electrical system because they are for material additions to, and a material increase in capacity of, the structure and the electrical system of F's store building. Accordingly, F must treat the amounts paid for these betterments as improvements to the building unit of property and capitalize these amounts under

paragraphs (d)(1) and (j) of this section. However, for the reasons discussed in *Example 6*, F is not required to treat the amounts paid for the refresh of its store building structure and systems as a betterments under paragraph (j)(1) of this section. In addition, F is not required under paragraph (g)(1) of this section to capitalize the refresh costs described in *Example 6* because these costs do not directly benefit and are not incurred by reason of the additions to the building structure and electrical system. As in *Example 6*, F is required to capitalize the amounts paid to acquire and install each section 1245 property in accordance with § 1.263(a)-2(d)(1).

Example 8. Betterment; building remodel. (i) G owns a large chain of retail stores that sell a variety of items. G determines that due to changes in the retail market, it can no longer compete in its current store class and decides to upgrade its stores to offer higher end products to a different type of customer. To offer these products and attract different types of customers, G must substantially remodel its stores. Thus, G pays amounts to remodel its stores by performing work on the buildings' structures and systems as defined under paragraphs (e)(2)(ii)(A) and (e)(2)(ii)(B) of this section. This work includes replacing large parts of the exterior walls with windows, replacing the escalators with a monumental staircase, adding a new glass enclosed elevator, rebuilding the interior and exterior facades, replacing vinyl floors with ceramic flooring, replacing ceiling tiles with acoustical tiles, and removing and rebuilding walls to move changing rooms and create specialty departments. The work also includes upgrades to increase the capacity of the buildings' electrical system to accommodate the structural changes and the addition of new section 1245 property, such as new product information kiosks and point of sale systems. The work to the electrical system also involves the installation of new more efficient and mood enhancing lighting fixtures. In addition, the work includes remodeling all bathrooms by replacing contractor-grade plumbing fixtures with designer-grade fixtures that conserve water and energy. Finally, G also pays amounts to clean debris resulting from construction during the remodel, patch holes in walls that were made to upgrade the electrical system, repaint existing walls with a new color scheme to match the new interior construction, and to power wash building exteriors to enhance the new exterior facade.

(ii) Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. Considering the facts and circumstances, including the purpose of the expenditure, the physical nature of the work performed, and the effect of the work on the buildings' structures and build-

ings' systems, the amounts that G pays for the remodeling of its stores result in betterments to the buildings' structures and several of its systems under paragraph (j) of this section. Specifically, the amounts paid to replace large parts of the exterior walls with windows, replace the escalators with a monumental staircase, add a new elevator, rebuild the interior and exterior facades, replace vinyl floors with ceramic flooring, replace the ceiling tiles with acoustical tiles, and to remove and rebuild walls are for material additions, that is the addition of major components, to the building structure under paragraph (j)(1)(ii) of this section and are reasonably expected to increase the quality of the building structure under paragraph (j)(1)(iii) of this section. Similarly, the amounts paid to upgrade the electrical system are to materially increase the capacity of the electrical system under paragraph (j)(1)(ii) of this section and are reasonably expected to increase the quality of this system under paragraph (j)(1)(iii) of this section. In addition, the amounts paid to remodel the bathrooms with higher grade and more resource-efficient materials are reasonably expected to increase the efficiency and quality of the plumbing system under paragraph (j)(1)(iii) of this section. Finally, the amounts paid to clean debris, patch and repaint existing walls with a new color scheme, and to power wash building exteriors, while not betterments by themselves, directly benefitted and were incurred by reason of the improvements to G's store buildings' structures and electrical systems under paragraph (g)(1) of this section. Therefore, G must treat the amounts paid for betterments to the store buildings' structures and systems, including the costs of cleaning, patching, repairing, and power washing the building, as improvements to G's buildings and must capitalize these amounts under paragraphs (d)(1) and (j) of this section. Moreover, G is required to capitalize the amounts paid to acquire and install each section 1245 property in accordance with § 1.263(a)-2(d)(1). For the treatment of amounts paid to remove components of property, see paragraph (g)(2) of this section.

Example 9. Not betterment; relocation and re-installation of personal property. In Year 1, H purchases new cash registers for use in its retail store located in leased space in a shopping mall. Assume that each cash register is a unit of property as determined under paragraph (e)(3) of this section. In Year 1, H capitalizes the costs of acquiring and installing the new cash registers under § 1.263(a)-2(d)(1). In Year 3, H's lease expires, and H decides to relocate its retail store to a different building. In addition to various other costs, H pays \$5,000 to move the cash registers and \$1,000 to reinstall them in the new store. The cash registers are used for the same purpose and in the same manner that they were used

in the former location. The amounts that H pays to move and reinstall the cash registers into its new store do not result in a betterment to the cash registers under paragraph (j) of this section.

Example 10. Betterment; relocation and re-installation of equipment J operates a manufacturing facility in Building A, which contains various machines that J uses in its manufacturing business. J decides to expand part of its operations by relocating a machine to Building B to reconfigure the machine with additional components. Assume that the machine is a single unit of property under paragraph (e)(3) of this section. J pays amounts to disassemble the machine, to move the machine to the new location, and to reinstall the machine in a new configuration with additional components. Assume that the reinstallation, including the reconfiguration and the addition of components, is for an increase in capacity of the machine, and therefore is for a betterment to the machine under paragraph (j)(1)(ii) of this section. Accordingly, J must capitalize the costs of reinstalling the machine as an improvement to the machine under paragraphs (j) and (d)(1) of this section. J is also required to capitalize the costs of disassembling and moving the machine to Building B because these costs directly benefit and are incurred by reason of the improvement to the machine under paragraph (g)(1) of this section.

Example 11. Betterment; regulatory requirement K owns a building that it uses in its business. In Year 1, City C passes an ordinance setting higher safety standards for buildings because of the hazardous conditions caused by earthquakes. To comply with the ordinance, K pays an amount to add expansion bolts to its building structure. These bolts anchor the wooden framing of K's building to its cement foundation, providing additional structural support and resistance to seismic forces, making the building more resistant to damage from lateral movement. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The framing and foundation are part of the building structure as defined in paragraph (e)(2)(ii)(A) of this section. Prior to the ordinance, the old building was in good condition but did not meet City C's new requirements for earthquake resistance. The amount paid by K for the addition of the expansion bolts met City C's new requirement, but also materially increased the strength of the building structure under paragraph (j)(1)(iii) of this section. Therefore, K must treat the amount paid to add the expansion bolts as a betterment to the building structure and must capitalize this amount as an improvement to building under paragraphs (d)(1) and (j) of

this section. Under paragraph (g)(4) of this section, City C's new requirement that K's building meet certain safety standards to continue to operate is not relevant in determining whether the amount paid improved the building.

Example 12. Not a betterment; regulatory requirement L owns a meat processing plant. After operating the plant for many years, L discovers that oil is seeping through the concrete walls of the plant. Federal inspectors advise L that it must correct the seepage problem or shut down its plant. To correct the problem, L pays an amount to add a concrete lining to the walls from the floor to a height of about four feet and also to add concrete to the floor of the plant. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The walls are part of the building structure as defined in paragraph (e)(2)(ii)(A) of this section. The condition necessitating the expenditure was the seepage of the oil into the plant. Prior to the seepage, the walls did not leak and were functioning for their intended use. L is not required to treat the amount paid as a betterment under paragraphs (j)(1)(ii) and (j)(2)(iv) of this section because it is not paid for a material addition to, or a material increase in the capacity of, the building's structure as compared to the condition of the structure prior to the seepage of oil. Moreover, the amount paid is not reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of the building structure under paragraphs (j)(1)(iii) and (j)(2)(iv) as compared to the condition of the structure prior to the seepage of the oil. Therefore, L is not required to treat the amount paid to correct the seepage as a betterment to the building under paragraph (d)(1) or (j) of this section. The federal inspectors' requirement that L correct the seepage to continue operating the plant is not relevant in determining whether the amount paid improves the plant.

Example 13. Not a betterment; new roof membrane M owns a building that it uses for its retail business. Over time, the waterproof membrane (top layer) on the roof of M's building begins to wear, and M began to experience water seepage and leaks throughout its retail premises. To eliminate the problems, a contractor recommends that M put a new rubber membrane on the worn membrane. Accordingly, M pays the contractor to add the new membrane. The new membrane is comparable to the worn membrane when it was originally placed in service by the taxpayer. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The

roof is part of the building structure under paragraph (e)(2)(ii)(A) of this section. The condition necessitating the expenditure was the normal wear of M's roof. Under paragraph (j)(2)(iv) of this section, to determine whether the amounts are for a betterment, the condition of the building structure after the expenditure must be compared to the condition of the structure when M placed the building into service because M has not previously corrected the effects of normal wear and tear. Under these facts, the amount paid to add the new membrane to the roof is not for a material addition or a material increase in the capacity of the building structure under paragraph (j)(1)(ii) of this section as compared to the condition of the structure when it was placed in service. Moreover, the new membrane is not reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of the building structure under paragraph (j)(1)(iii) of this section as compared to the condition of the building structure when it was placed in service. Therefore, M is not required to treat the amount paid to add the new membrane as a betterment to the building under paragraph (d)(1) or (j) of this section.

Example 14. Material increase in capacity; building N owns a factory building with a storage area on the second floor. N pays an amount to reinforce the columns and girders supporting the second floor to permit storage of supplies with a gross weight 50 percent greater than the previous load-carrying capacity of the storage area. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The columns and girders are part of the building structure defined under paragraph (e)(2)(ii)(A) of this section. N must treat the amount paid to reinforce the columns and girders as a betterment under paragraphs (j)(1)(ii) and (j)(1)(iii) of this section because it materially increases the load-carrying capacity and the strength of the building structure. Therefore, N must capitalize this amount as an improvement to the building under paragraphs (d)(1) and (j) of this section.

Example 15. Material increase in capacity; channel O owns harbor facilities consisting of a slip for the loading and unloading of barges and a channel leading from the slip to the river. At the time of purchase, the channel was 150 feet wide, 1,000 feet long, and 10 feet deep. Several years after purchasing the harbor facilities, to allow for ingress and egress and for the unloading of larger barges, O decides to deepen the channel to a depth of 20 feet. O pays a contractor to dredge the channel to 20 feet. Assume the channel is the unit of property. O must capitalize the amounts paid for the dredging as an improvement to

the channel because they are for a material increase in the capacity of the unit of property under paragraph (j)(1)(ii) of this section.

Example 16. Not a material increase in capacity; channel Assume the same facts as in *Example 15*, except that the channel was susceptible to siltation and, after dredging to 20 feet, the channel depth had been reduced to 18 feet. O pays a contractor to redredge the channel to a depth of 20 feet. The expenditure was necessitated by the siltation of the channel. Both prior to the siltation and after the redredging, the depth of the channel was 20 feet. Applying the comparison rule under paragraph (j)(2)(iv) of this section, the amounts paid by O to redredge the channel are not for a betterment under paragraph (j)(1)(ii) of this section because they are not for a material addition to, or a material increase in the capacity of, the unit of property as compared to the condition of the property prior to the siltation. Similarly, these amounts are not for a betterment under paragraph (j)(1)(iii) of this section because the amounts are not reasonably expected to increase the productivity, efficiency, strength, quality, or output of the unit of property as compared to the condition of the property before the siltation. Therefore, O is not required to capitalize these amounts as improvement under paragraphs (d)(1) and (j) of this section.

Example 17. Material increase in capacity; channel Assume the same facts as in *Example 16* except that after the redredging, there is more siltation, and the channel depth is reduced back to 18 feet. In addition, to allow for additional ingress and egress and for the unloading of even larger barges, O decides to deepen the channel to a depth of 25 feet. O pays a contractor to redredge the channel to 25 feet. O must capitalize the amounts paid for the dredging as an improvement to the channel because the amounts are for a material increase in the capacity of the unit of property under paragraph (j)(1)(ii) of this section as compared to condition of the unit of property before the siltation. As part of this improvement, O is also required to capitalize the portion of the redredge costs allocable to restoring the depth lost to the siltation because, under paragraph (g)(1)(i) of this section, these amounts directly benefit and are incurred by reason of the improvement to the unit of property.

Example 18. Not a material increase in capacity; building P owns a building used in its trade or business. The first floor has a drop ceiling. To fully expose windows on the first floor, P pays an amount to remove the drop ceiling and repaint the original ceiling. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The ceiling is part of the building structure as defined

under paragraph (e)(2)(ii)(A) of this section. P is not required to treat the amount paid to remove the drop-ceiling as a betterment to the building because it was not for a material addition or material increase in the capacity of the building structure under paragraph (j)(1)(ii) of this section and it was not reasonably expected to materially increase to the efficiency, strength, or quality of the building structure under paragraph (j)(1)(iii) of this section. In addition, under paragraph (j)(2)(i) of this section, because the effect on productivity and output of the building structure cannot be measured in this context, these factors are not relevant in determining whether there is a betterment to the building structure.

Example 19. Material increase in capacity; building Q owns a building that it uses in its retail business. The building contains one floor of retail space with very high ceilings. Q pays an amount to add a stairway and a mezzanine for the purposes of adding additional selling space within its building. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The stairway and the mezzanine are part of the building structure as defined under paragraph (e)(2)(ii)(A) of this section. Q is required to treat the amount paid to add the stairway and mezzanine as a betterment because it is for a material addition to, and an increase in the capacity of, the building structure under paragraph (j)(1)(ii) of this section. Therefore, Q must capitalize this amount as an improvement to the building unit of property under paragraphs (d)(1) and (j) of this section.

Example 20. Not material increase in efficiency; HVAC system R owns an office building that it uses to provide services to customers. The building contains an HVAC system that incorporates 10 roof-mounted units that provide heating and air conditioning for different parts of the building. The HVAC system also consists of controls for the entire system and duct work that distributes the heated or cooled air to the various spaces in the building's interior. After many years of use of the HVAC system, R begins to experience climate control problems in various offices throughout the office building and consults with a contractor to determine the cause. The contractor recommends that R replace two of the roof-mounted units. R pays an amount to replace the two specified units. The two new units are expected to eliminate the climate control problems and to be 10 percent more energy efficient than the replaced units in their original condition. No work is performed on the other roof-mounted heating/cooling units, the duct work, or the controls. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an

amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The HVAC system, including the two-roof mounted units, is a building system under paragraph (e)(2)(ii)(B)(i) of this section. The replacement of the two roof-mounted units is not a material addition to or a material increase in the capacity of the HVAC system under paragraphs (j)(1)(ii) and (j)(3)(ii) of this section as compared to the condition of the system prior to the climate control problems. In addition, given the 10 percent efficiency increase in two units of the entire HVAC system, the replacement is not expected to materially increase the productivity, efficiency, strength, quality, or output of the HVAC system under paragraphs (j)(1)(iii) and (j)(2)(iv) of this section as compared to the condition of the system prior to the climate control problems. Therefore, R is not required to capitalize the amounts paid for these replacements as betterments to the building unit of property under paragraphs (d)(1) and (j) of this section.

Example 21. Material increase in efficiency; building S owns a building that it uses in its service business. S conducts an energy assessment and determines that it could significantly reduce its energy costs by adding insulation to its building. S pays an insulation contractor to apply a combination of loose-fill, spray foam, and blanket insulation throughout S's building structure, including within the attic, walls, and crawl spaces. S reasonably expects the new insulation to make the building more energy efficient because the contractor indicated that the new insulation would reduce its annual energy and power costs by approximately 50 percent of its annual costs during the last five years. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building if the amount is paid for a betterment to the building structure or any building system. Therefore, under paragraphs (d)(1) and (j) of this section, S must capitalize as a betterment the amount paid to add the insulation because the insulation is reasonably expected to materially increase the efficiency of the building structure under paragraph (j)(1)(iii) of this section.

Example 22. Material addition; building T owns and operates a restaurant, which provides a variety of prepared foods to its customers. To better accommodate its customers and increase customer traffic, T decides to add a drive-through service area. As a result, T pays amounts to partition an area within its restaurant for a drive-through service counter, to construct a service window with necessary security features, to build an overhang for vehicles, and to construct a drive-up menu board. Assume that the drive-up menu board is section 1245 property that is a separate unit of property under

paragraph (e)(3) of this section. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The amounts paid for the partition, service window and overhang are betterments to the building structure because they comprise a material addition (that is, a physical expansion, extension, and addition of a major component) to the building structure under paragraph (j)(1)(ii) of this section. Accordingly, T must capitalize as an improvement the amounts paid to add the partition, drive-through window, and overhang under paragraphs (d)(1) and (j) of this section. T is also required to capitalize the amounts paid to acquire and install each section 1245 property in accordance with § 1.263(a)-2(d)(1).

Example 23. Costs incurred during betterment U owns a building that it uses in its service business. To accommodate new employees and equipment, U pays amounts to increase the load capacity of its electrical system by adding a second electrical panel with additional circuits and adding wiring and outlets throughout the electrical system of its building. To complete the upgrades to the electrical system, the contractor makes several holes in walls. As a result, U also incurs costs to patch the holes and repaint several walls. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The amounts paid to upgrade the panel and wiring are for betterments to U's electrical system because they increase the capacity of the electrical system under paragraph (j)(1)(ii) of this section and increase the strength and output of the electrical system under paragraph (j)(1)(iii) of this section. Accordingly, U is required to capitalize the costs of the upgrade to the electrical system as an improvement to the building unit of property under paragraphs (d)(1) and (j) of this section. Moreover, under paragraph (g)(1) of this section, U is required to capitalize the amounts paid to patch holes and repaint several walls in its building because these costs directly benefit and are incurred by reason of the improvement to U's building unit of property.

(k) *Capitalization of restorations*—(1) *In general.* A taxpayer must capitalize as an improvement an amount paid to restore a unit of property, including an amount paid to make good the exhaustion for which an allowance is or has been made. An amount restores a unit of property only if it—

(i) Is for the replacement of a component of a unit of property for which the taxpayer has properly deducted a loss

for that component, other than a casualty loss under § 1.165-7;

(ii) Is for the replacement of a component of a unit of property for which the taxpayer has properly taken into account the adjusted basis of the component in realizing gain or loss resulting from the sale or exchange of the component;

(iii) Is for the restoration of damage to a unit of property for which the taxpayer is required to take a basis adjustment as a result of a casualty loss under section 165, or relating to a casualty event described in section 165, subject to the limitation in paragraph (k)(4) of this section;

(iv) Returns the unit of property to its ordinarily efficient operating condition if the property has deteriorated to a state of disrepair and is no longer functional for its intended use;

(v) Results in the rebuilding of the unit of property to a like-new condition as determined under paragraph (k)(5) of this section after the end of its class life as defined in paragraph (i)(4) of this section; or

(vi) Is for the replacement of a part or combination of parts that comprise a major component or a substantial structural part of a unit of property as determined under paragraph (k)(6) of this section.

(2) *Application of restorations to buildings.* An amount is paid to improve a building if it is paid to restore, as defined under paragraph (k)(1) of this section, a property specified under paragraph (e)(2)(ii) (building), paragraph (e)(2)(iii)(B) (condominium), paragraph (e)(2)(iv)(B) (cooperative), or paragraph (e)(2)(v)(B) (leased building or portion of building) of this section. For example, an amount is paid to improve a building if it is paid for the replacement of a part or combination of parts that comprise a major component or substantial structural part of the building structure or any one of its building systems (for example, the HVAC system). See paragraph (k)(6) of this section.

(3) *Exception for losses based on salvage value.* A taxpayer is not required to treat as a restoration amounts paid under paragraph (k)(1)(i) or paragraph (k)(1)(ii) of this section if the unit of property has been fully depreciated and

the loss is attributable only to remaining salvage value as computed for federal income tax purposes.

(4) *Restoration of damage from casualty*—(i) *Limitation*. For purposes of paragraph (k)(1)(iii) of this section, the amount paid for restoration of damage to the unit of property that must be capitalized under this paragraph (k) is limited to the excess (if any) of—

(A) The amount prescribed by §1.1011-1 as the adjusted basis of the single, identifiable property (under §1.167-7(b)(2)(i)) for determining the loss allowable on account of the casualty, over

(B) The amount paid for restoration of damage to the unit of property under paragraph (k)(1)(iii) of this section that also constitutes an improvement under any other provision of paragraph (k)(1) of this section.

(ii) *Amounts in excess of limitation*. The amounts paid for restoration of damage to a unit of property as described in paragraph (k)(1)(iii) of this section, but that exceed the limitation provided in paragraph (k)(4)(i) of this section, must be treated in accordance with the provisions of the Internal Revenue Code and regulations that are otherwise applicable. See, for example, §1.162-4 (repairs and maintenance); §1.263(a)-2 (costs to acquire and produce units of property); and §1.263(a)-3 (costs to improve units of property).

(5) *Rebuild to like-new condition*. For purposes of paragraph (k)(1)(v) of this section, a unit of property is rebuilt to a like-new condition if it is brought to the status of new, rebuilt, remanufactured, or a similar status under the terms of any federal regulatory guideline or the manufacturer's original specifications. Generally, a comprehensive maintenance program, even though substantial, does not return a unit of property to a like-new condition.

(6) *Replacement of a major component or a substantial structural part*—(i) *In general*. To determine whether an amount is for the replacement of a part or a combination of parts that comprise a major component or a substantial structural part of the unit of property under paragraph (k)(1)(vi) of this section, it is appropriate to consider all the facts and circumstances. These

facts and circumstances include the quantitative and qualitative significance of the part or combination of parts in relation to the unit of property.

(A) *Major component*. A major component is a part or combination of parts that performs a discrete and critical function in the operation of the unit of property. An incidental component of the unit of property, even though such component performs a discrete and critical function in the operation of the unit of property, generally will not, by itself, constitute a major component.

(B) *Substantial structural part*. A substantial structural part is a part or combination of parts that comprises a large portion of the physical structure of the unit of property.

(ii) *Major components and substantial structural parts of buildings*. In the case of a building, an amount is for the replacement of a major component or a substantial structural part of the building unit of property if—

(A) The replacement includes a part or combination of parts that comprise a major component (as defined in paragraph (k)(6)(i)(A) of this section), or a significant portion of a major component, of any of the properties designated in paragraph (e)(2)(ii) (building), paragraph (e)(2)(iii)(B) (condominium), paragraph (e)(2)(iv)(B) (cooperative), or paragraph (e)(2)(v)(B) (leased building or leased portion of a building) of this section; or

(B) The replacement includes a part or combination of parts that comprises a large portion of the physical structure of any of the properties designated in paragraph (e)(2)(ii) (building), paragraph (e)(2)(iii)(B) (condominium), paragraph (e)(2)(iv)(B) (cooperative), or paragraph (e)(2)(v)(B) (leased building or portion of building) of this section.

(7) *Examples*. The following examples illustrate the application of this paragraph (k) only and do not address whether capitalization is required under another provision of this section or another provision of the Code (for example, section 263A). Unless otherwise stated, assume that the taxpayer has not properly deducted a loss for, nor taken into account the adjusted basis on a sale or exchange of, any unit

of property, asset, or component of a unit of property that is replaced.

Example 1. Replacement of loss component A owns a manufacturing building containing various types of manufacturing equipment. A does a cost segregation study of the manufacturing building and properly determines that a walk-in freezer in the manufacturing building is section 1245 property as defined in section 1245(a)(3). The freezer is not part of the building structure or the HVAC system under paragraph (e)(2)(i) or (e)(2)(ii)(B)(1) of this section. Several components of the walk-in freezer cease to function, and A decides to replace them. A abandons the old freezer components and properly recognizes a loss from the abandonment of the components. A replaces the abandoned freezer components with new components and incurs costs to acquire and install the new components. Under paragraph (k)(1)(i) of this section, A must capitalize the amounts paid to acquire and install the new freezer components because A replaced components for which it had properly deducted a loss.

Example 2. Replacement of sold component Assume the same facts as in *Example 1*, except that A did not abandon the components but instead sold them to another party and properly recognized a loss on the sale. Under paragraph (k)(1)(ii) of this section, A must capitalize the amounts paid to acquire and install the new freezer components because A replaced components for which it had properly taken into account the adjusted basis of the components in realizing a loss from the sale of the components.

Example 3. Restoration after casualty loss B owns an office building that it uses in its trade or business. A storm damages the office building at a time when the building has an adjusted basis of \$500,000. B deducts under section 165 a casualty loss in the amount of \$50,000, and properly reduces its basis in the office building to \$450,000. B hires a contractor to repair the damage to the building, including the repair of the building roof and the removal of debris from the building premises. B pays the contractor \$50,000 for the work. Under paragraph (k)(1)(iii) of this section, B must treat the \$50,000 amount paid to the contractor as a restoration of the building structure because B properly adjusted its basis in that amount as a result of a casualty loss under section 165, and the amount does not exceed the limit in paragraph (k)(4) of this section. Therefore, B must treat the amount paid as an improvement to the building unit of property and, under paragraph (d)(2) of this section, must capitalize the amount paid.

Example 4. Restoration after casualty event Assume the same facts as in *Example 3*, except that B receives insurance proceeds of \$50,000 after the casualty to compensate for its loss. B cannot deduct a casualty loss

under section 165 because its loss was compensated by insurance. However, B properly reduces its basis in the property by the amount of the insurance proceeds. Under paragraph (k)(1)(iii) of this section, B must treat the \$50,000 amount paid to the contractor as a restoration of the building structure because B has properly taken a basis adjustment relating to a casualty event described in section 165, and the amount does not exceed the limit in paragraph (k)(4) of this section. Therefore, B must treat the amount paid as an improvement to the building unit of property and, under paragraph (d)(2) of this section, must capitalize the amount paid.

Example 5. Restoration after casualty loss; limitation (i) C owns a building that it uses in its trade or business. A storm damages the building at a time when the building has an adjusted basis of \$500,000. C determines that the cost of restoring its property is \$750,000, deducts a casualty loss under section 165 in the amount of \$500,000, and properly reduces its basis in the building to \$0. C hires a contractor to repair the damage to the building and pays the contractor \$750,000 for the work. The work involves replacing the entire roof structure of the building at a cost of \$350,000 and pumping water from the building, cleaning debris from the interior and exterior, and replacing areas of damaged dry wall and flooring at a cost of \$400,000. Although resulting from the casualty event, the pumping, cleaning, and replacing damaged drywall and flooring, does not directly benefit and is not incurred by reason of the roof replacement.

(ii) Under paragraph (k)(1)(vi) of this section, C must capitalize as an improvement the \$350,000 amount paid to the contractor to replace the roof structure because the roof structure constitutes a major component and a substantial structural part of the building unit of property. In addition, under paragraphs (k)(1)(iii) and (k)(4)(i), C must treat as a restoration the remaining costs, limited to the excess of the adjusted basis of the building over the amounts paid for the improvement under paragraph (k)(1)(vi). Accordingly, C must treat as a restoration \$150,000 (\$500,000—\$350,000) of the \$400,000 paid for the portion of the costs related to repairing and cleaning the building structure under paragraph (k)(1)(iii) of this section. Thus, in addition to the \$350,000 to replace the roof structure, C must also capitalize the \$150,000 as an improvement to the building unit of property under paragraph (d)(2) of this section. C is not required to capitalize the remaining \$250,000 repair and cleaning costs under paragraph (k)(1)(iii) of this section.

Example 6. Restoration of property in a state of disrepair D owns and operates a farm with several barns and outbuildings. D did not use

or maintain one of the outbuildings on a regular basis, and the outbuilding fell into a state of disrepair. The outbuilding previously was used for storage but can no longer be used for that purpose because the building is not structurally sound. D decides to restore the outbuilding and pays an amount to shore up the walls and replace the siding. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount is paid to restore the building structure or any building system. The walls and siding are part of the building structure under paragraph (e)(2)(ii)(A) of this section. Under paragraph (k)(1)(iv) of this section, D must treat the amount paid to shore up the walls and replace the siding as a restoration of the building structure because the amounts return the building structure to its ordinarily efficient operating condition after it had deteriorated to a state of disrepair and was no longer functional for its intended use. Therefore, D must treat the amount paid to shore up the walls and replace the siding as an improvement to the building unit of property and, under paragraph (d)(2) of this section, must capitalize the amount paid.

Example 7. Rebuild of property to like-new condition before end of class life E is a Class I railroad that owns a fleet of freight cars. Assume the freight cars have a recovery period of 7 years under section 168(c) and a class life of 14 years. Every 8 to 10 years, E rebuilds its freight cars. Ten years after E places the freight car in service, E performs a rebuild to the manufacturer's original specification, which includes a complete disassembly, inspection, and reconditioning or replacement of components of the suspension and draft systems, trailer hitches, and other special equipment. E also modifies the car to upgrade various components to the latest engineering standards. The freight car is stripped to the frame, with all of its substantial components either reconditioned or replaced. The frame itself is the longest-lasting part of the car and is reconditioned. The walls of the freight car are replaced or are sandblasted and repainted. New wheels are installed on the car. All the remaining components of the car are restored before they are reassembled. At the end of the rebuild, the freight car has been restored to like-new condition under the manufacturer's specifications. Assume the freight car is the unit of property. E is not required to treat as an improvement and capitalize the amounts paid to rebuild the freight car under paragraph (k)(1)(v) of this section because, although the amounts paid restore the freight car to like-new condition, the amounts were not paid after the end of the class life of the freight car. However, paragraphs (k)(1)(vi) and (k)(6) of this section are applicable for determining whether any amounts must be capitalized because they are paid for the replacement of a major

component or a substantial structural part of the unit of property.

Example 8. Rebuild of property to like-new condition after end of class life Assume the same facts as in *Example 7*, except that E rebuilds the freight car 15 years after E places it in service. Under paragraph (k)(1)(v) of this section, E must treat as an improvement and capitalize the amounts paid to rebuild the freight car because the amounts paid restore the freight car to like-new condition after the end of the class life of the freight car.

Example 9. Not a rebuild to a like-new condition F is a commercial airline engaged in the business of transporting freight and passengers. To conduct its business, F owns several aircraft. As a condition of maintaining its airworthiness certificates, F is required by the FAA to establish and adhere to a continuous maintenance program for each aircraft in its fleet. F performs heavy maintenance on its airframes every 8 to 10 years. In Year 1, F purchased an aircraft for \$15 million. In Year 16, F paid \$2 million for the labor and materials necessary to perform the second heavy maintenance visit on the airframe of an aircraft. To perform the heavy maintenance visit, F extensively disassembles the airframe, removing items such as engines, landing gear, cabin and passenger compartment seats, side and ceiling panels, baggage stowage bins, galleys, lavatories, floor boards, cargo loading systems, and flight control surfaces. As specified by F's maintenance manual for the aircraft, F then performs certain tasks on the disassembled airframe for the purpose of preventing deterioration of the inherent safety and reliability levels of the airframe. These tasks include lubrication and service, operational and visual checks, inspection and functional checks, reconditioning of minor parts and components, and removal, discard, and replacement of certain life-limited single cell parts, such as cartridges, canisters, cylinders, and disks. Reconditioning of parts includes burnishing corrosion, repairing cracks, dents, gouges, punctures, tightening or replacing loose or missing fasteners, replacing damaged seals, gaskets, or valves, and similar activities. In addition to the tasks described above, to comply with certain FAA airworthiness directives, F inspects specific skin locations, applies doublers over small areas where cracks were found, adds structural reinforcements, and replaces skin panels on a small section of the fuselage. However, the heavy maintenance does not include the replacement of any major components or substantial structural parts of the aircraft with new components. In addition, the heavy maintenance visit does not bring the aircraft to the status of new, rebuilt, remanufactured, or a similar status under FAA guidelines or the manufacturer's original specifications. After the

heavy maintenance, the aircraft was reassembled. Assume the aircraft, including the engines, is a unit of property and has a class life of 12 years under section 168(c). Although the heavy maintenance is performed after the end of the class life of the aircraft, F is not required to treat the heavy maintenance as a restoration and improvement of the unit of property under paragraph (k)(1)(v) of this section because, although extensive, the amounts paid do not restore the aircraft to like-new condition. See also paragraph (i)(1)(iii) of this section for the application of the safe harbor for routine maintenance.

Example 10. Replacement of major component or substantial structural part; personal property G is a common carrier that owns a fleet of petroleum hauling trucks. G pays amounts to replace the existing engine, cab, and petroleum tank with a new engine, cab, and tank. Assume the tractor of the truck (which includes the cab and the engine) is a single unit of property and that the trailer (which contains the petroleum tank) is a separate unit of property. The new engine and the cab each constitute a part or combination of parts that comprise a major component of G's tractor, because they perform a discrete and critical function in the operation of the tractor. In addition, the cab constitutes a part or combination of parts that comprise a substantial structural part of G's tractor. Therefore, the amounts paid for the replacement of the engine and the cab must be capitalized under paragraph (k)(1)(vi) of this section. Moreover, the new petroleum tank constitutes a part or combination of parts that comprise a major component and a substantial structural part of the trailer. Accordingly, the amounts paid for the replacement of the tank also must be capitalized under paragraph (k)(1)(vi) of this section.

Example 11. Repair performed during restoration Assume the same facts as in *Example 10*, except that, at the same time the engine and cab of the tractor are replaced, G pays amounts to paint the cab of the tractor with its company logo and to fix a broken taillight on the tractor. The repair of the broken taillight and the painting of the cab generally are deductible expenses under § 1.162-4. However, under paragraph (g)(1)(i) of this section, a taxpayer must capitalize all the direct costs of an improvement and all the indirect costs that directly benefit or are incurred by reason of an improvement. Repairs and maintenance that do not directly benefit or are not incurred by reason of an improvement are not required to be capitalized under section 263(a), regardless of whether they are made at the same time as an improvement. For the amounts paid to paint the logo on the cab, G's need to paint the logo arose from the replacement of the cab with a new cab. Therefore, under paragraph (g)(1)(i) of this section, G must capitalize the amounts paid to paint the cab as part of the improve-

ment to the tractor because these amounts directly benefit and are incurred by reason of the restoration of the tractor. The amounts paid to repair the broken taillight are not for the replacement of a major component, do not directly benefit, and are not incurred by reason of the replacement of the cab or the engine under paragraph (g)(1)(i) of this section, even though the repair was performed at the same time as these replacements. Thus, G is not required to capitalize the amounts paid to repair the broken taillight.

Example 12. Related amounts to replace major component or substantial structural part; personal property (i) H owns a retail gasoline station, consisting of a paved area used for automobile access to the pumps and parking areas, a building used to market gasoline, and a canopy covering the gasoline pumps. The premises also consist of underground storage tanks (USTs) that are connected by piping to the pumps and are part of the gasoline pumping system used in the immediate retail sale of gas. The USTs are components of the gasoline pumping system. To comply with regulations issued by the Environmental Protection Agency, H is required to remove and replace leaking USTs. In Year 1, H hires a contractor to perform the removal and replacement, which consists of removing the old tanks and installing new tanks with leak detection systems. The removal of the old tanks includes removing the paving material covering the tanks, excavating a hole large enough to gain access to the old tanks, disconnecting any strapping and pipe connections to the old tanks, and lifting the old tanks out of the hole. Installation of the new tanks includes placement of a liner in the excavated hole, placement of the new tanks, installation of a leak detection system, installation of an overfill system, connection of the tanks to the pipes leading to the pumps, backfilling of the hole, and replacement of the paving. H also is required to pay a permit fee to the county to undertake the installation of the new tanks.

(ii) H pays the permit fee to the county on October 15, Year 1. On December 15, Year 1, the contractor completes the removal of the old USTs and bills H for the costs of removal. On January 15, Year 2, the contractor completes the installation of the new USTs and bills H for the remainder of the work. Assume that H computes its taxes on a calendar year basis and H's gasoline pumping system is the unit of property. Under paragraph (k)(1)(vi) of this section, H must capitalize the amounts paid to replace the USTs as a restoration to the gasoline pumping system because the USTs are parts or combinations of parts that comprise a major component and substantial structural part of the gasoline pumping system. Moreover, under paragraph (g)(2) of this section, H must capitalize the costs of removing the old USTs

because H has not taken a loss on the disposition of the USTs, and the amounts to remove the USTs directly benefit and are incurred by reason of the restoration of, and improvement to, the gasoline pumping system. In addition, under paragraph (g)(1) of this section, H must capitalize the permit fees because they directly benefit and are incurred by reason of the improvement to the gasoline pumping system. Finally, under paragraph (g)(3) of this section, H must capitalize the related amounts paid to improve the gasoline pumping system, including the permit fees, the amount paid to remove the old USTs, and the amount paid to install the new USTs, even though the amounts were separately invoiced, paid to different parties, and incurred in different tax years.

Example 13. Not replacement of major component; incidental J owns a machine shop in which it makes dies used by manufacturers. In Year 1, J purchased a drill press for use in its production process. In Year 3, J discovers that the power switch assembly, which controls the supply of electric power to the drill press, has become damaged and cannot operate. To correct this problem, J pays amounts to replace the power switch assembly with comparable and commercially available replacement parts. Assume that the drill press is a unit of property under paragraph (e) of this section and the power switch assembly is a small component of the drill press that may be removed and installed with relative ease. The power switch assembly is not a major component of the unit of property under paragraph (k)(6)(i)(A) of this section because, although the power assembly may affect the function of J's drill press by controlling the supply of electric power, the power assembly is an incidental component of the drill press. In addition, the power assembly is not a substantial structural part of J's drill press under paragraph (k)(6)(i)(B) of this section. Therefore, J is not required to capitalize the costs to replace the power switch assembly under paragraph (k)(1)(vi) of this section.

Example 14. Replacement of major component or substantial structural part; roof K owns a manufacturing building. K discovers several leaks in the roof of the building and hires a contractor to inspect and fix the roof. The contractor discovers that a major portion of the decking has rotted and recommends the replacement of the entire roof. K pays the contractor to replace the entire roof, including the decking, insulation, asphalt, and various coatings. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount is paid to restore the building structure or any building system. The roof is part of the building structure as defined under paragraph (e)(2)(ii)(A) of this section. Because the entire roof performs a discrete and critical function in the building structure, the roof

comprises a major component of the building structure under paragraph (k)(6)(ii)(A) of this section. In addition, because the roof comprises a large portion of the physical structure of the building structure, the roof comprises a substantial structural part of the building structure under paragraph (k)(6)(ii)(B) of this section. Therefore, under either analysis, K must treat the amount paid to replace the roof as a restoration of the building under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amount paid as an improvement under paragraph (d)(2) of this section.

Example 15. Not replacement of major component or substantial structural part; roof membrane L owns a building in which it conducts its retail business. The roof decking over L's building is covered with a waterproof rubber membrane. Over time, the rubber membrane begins to wear, and L begins to experience leaks into its retail premises. However, the building is still functioning in L's business. To eliminate the problems, a contractor recommends that L replace the membrane on the roof with a new rubber membrane. Accordingly, L pays the contractor to strip the original membrane and replace it with a new rubber membrane. The new membrane is comparable to the original membrane but corrects the leakage problems. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount is paid to restore the building structure or any building system. The roof, including the membrane, is part of the building structure as defined under paragraph (e)(2)(ii)(A) of this section. Because the entire roof performs a discrete and critical function in the building structure, the roof comprises a major component of the building structure under paragraph (k)(6)(ii)(A) of this section. Although the replacement membrane may aid in the function of the building structure, it does not, by itself, comprise a significant portion of the roof major component under paragraph (k)(6)(ii)(A) of this section. In addition, the replacement membrane does not comprise a substantial structural part of L's building structure under paragraph (k)(6)(ii)(B) of this section. Therefore, L is not required to capitalize the amount paid to replace the membrane as a restoration of the building under paragraph (k)(1)(vi) of this section.

Example 16. Not a replacement of major component or substantial structural part; HVAC system M owns a building in which it operates an office that provides medical services. The building contains one HVAC system, which is comprised of three furnaces, three air conditioning units, and duct work that runs throughout the building to distribute the hot or cold air throughout the building. One furnace in M's building breaks down, and M pays an amount to replace it with a new furnace. Under paragraphs (e)(2)(ii) and

(k)(2) of this section, an amount is paid to improve a building if the amount is paid to restore the building structure or any building system. The HVAC system, including the furnaces, is a building system under paragraph (e)(2)(ii)(B)(1) of this section. As the parts that provide the heating function in the system, the three furnaces, together, perform a discrete and critical function in the operation of the HVAC system and are therefore a major component of the HVAC system under paragraph (k)(6)(i)(A) of this section. However, the single furnace is not a significant portion of this major component of the HVAC system under paragraph (k)(6)(ii)(A) of this section, or a substantial structural part of the HVAC system under paragraph (k)(6)(ii)(B) of this section. Therefore, M is not required to treat the amount paid to replace the furnace as a restoration of the building under paragraph (k)(1)(vi) of this section.

Example 17. Replacement of major component or substantial structural part; HVAC system N owns a large office building in which it provides consulting services. The building contains one HVAC system, which is comprised of one chiller unit, one boiler, pumps, duct work, diffusers, air handlers, outside air intake, and a cooling tower. The chiller unit includes the compressor, evaporator, condenser, and expansion valve, and it functions to cool the water used to generate air conditioning throughout the building. N pays an amount to replace the chiller with a comparable unit. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount is paid to restore the building structure or any building system. The HVAC system, including the chiller unit, is a building system under paragraph (e)(2)(ii)(B)(1) of this section. The chiller unit performs a discrete and critical function in the operation of the HVAC system because it provides the cooling mechanism for the entire system. Therefore, the chiller unit is a major component of the HVAC system under paragraph (k)(6)(ii)(A) of this section. Because the chiller unit comprises a major component of a building system, N must treat the amount paid to replace the chiller unit as a restoration to the building under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amount paid as an improvement to the building under paragraph (d)(2) of this section.

Example 18. Not replacement of major component or substantial structural part; HVAC system O owns an office building that it uses to provide services to customers. The building contains a HVAC system that incorporates ten roof-mounted units that provide heating and air conditioning for the building. The HVAC system also consists of controls for the entire system and duct work that distributes the heated or cooled air to the various spaces in the building's interior. O be-

gins to experience climate control problems in various offices throughout the office building and consults with a contractor to determine the cause. The contractor recommends that O replace three of the roof-mounted heating and cooling units. O pays an amount to replace the three specified units. No work is performed on the other roof-mounted heating and cooling units, the duct work, or the controls. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The HVAC system, including the 10 roof-mounted heating and cooling units, is a building system under paragraph (e)(2)(ii)(B)(1) of this section. As the components that generate the heat and the air conditioning in the HVAC system, the 10 roof-mounted units, together, perform a discrete and critical function in the operation of the HVAC system and, therefore, are a major component of the HVAC system under paragraph (k)(6)(ii)(A) of this section. The three roof-mounted heating and cooling units are not a significant portion of a major component of the HVAC system under (k)(6)(ii)(A) of this section, or a substantial structural part of the HVAC system, under paragraph (k)(6)(ii)(B) of this section. Accordingly, O is not required to treat the amount paid to replace the three roof-mounted heating and cooling units as a restoration of the building under paragraph (k)(1)(iv) of this section.

Example 19. Replacement of major component or substantial structural part; fire protection system P owns a building that it uses to operate its business. P pays an amount to replace the sprinkler system in the building with a new sprinkler system. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The fire protection and alarm system, including the sprinkler system, is a building system under paragraph (e)(2)(ii)(B)(6) of this section. As the component that provides the fire suppression mechanism in the system, the sprinkler system performs a discrete and critical function in the operation of the fire protection and alarm system and is therefore a major component of the system under paragraph (k)(6)(ii)(A) of this section. Because the sprinkler system comprises a major component of a building system, P must treat the amount paid to replace the sprinkler system as restoration to the building unit of property under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amount paid as an improvement to the building under paragraph (d)(2) of this section.

Example 20. Replacement of major component or substantial structural part; electrical system Q owns a building that it uses to operate its business. Q pays an amount to replace the wiring throughout the building with new

wiring that meets building code requirements. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The electrical system, including the wiring, is a building system under paragraph (e)(2)(ii)(B)(3) of this section. As the component that distributes the electricity throughout the system, the wiring performs a discrete and critical function in the operation of the electrical system under paragraph (k)(6)(ii)(A) of this section. The wiring also comprises a large portion of the physical structure of the electrical system under paragraph (k)(6)(ii)(B) of this section. Because the wiring comprises a major component and a substantial structural part of a building system, Q must treat the amount paid to replace the wiring as a restoration to the building under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amount paid as an improvement to the building under paragraph (d)(2) of this section.

Example 21. Not a replacement of major component or substantial structural part; electrical system R owns a building that it uses to operate its business. R pays an amount to replace 30 percent of the wiring throughout the building with new wiring that meets building code requirements. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The electrical system, including the wiring, is a building system under paragraph (e)(2)(ii)(B)(3) of this section. All the wiring in the building comprises a major component because it performs a discrete and critical function in the operation of the electrical system. However, the portion of the wiring that was replaced is not a significant portion of the wiring major component under paragraph (k)(6)(ii)(A) of this section, nor does it comprise a substantial structural part of the electrical system under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6) of this section, the replacement of 30 percent of the wiring is not the replacement of a major component or substantial structural part of the building, and R is not required to treat the amount paid to replace 30 percent of the wiring as a restoration to the building under paragraph (k)(1)(iv) of this section.

Example 22. Replacement of major component or substantial structural part; plumbing system S owns a building in which it conducts a retail business. The retail building has three floors. The retail building has men's and women's restrooms on two of the three floors. S decides to update the restrooms by paying an amount to replace the plumbing fixtures in all of the restrooms, including all the toilets and sinks, with modern style plumbing fixtures of similar quality and function. S does not replace the pipes con-

necting the fixtures to the building's plumbing system. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The plumbing system, including the plumbing fixtures, is a building system under paragraph (e)(2)(ii)(B)(2) of this section. All the toilets together perform a discrete and critical function in the operation of the plumbing system, and all the sinks, together, also perform a discrete and critical function in the operation of the plumbing system. Therefore, under paragraph (k)(6)(ii)(A) of this section, all the toilets comprise a major component of the plumbing system, and all the sinks comprise a major component of the plumbing system. Accordingly, S must treat the amount paid to replace all of the toilets and all of the sinks as a restoration of the building under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amount paid as an improvement to the building under paragraph (d)(2) of this section.

Example 23. Not replacement of major component or substantial structural part; plumbing system Assume the same facts as *Example 22* except that S does not update all the bathroom fixtures. Instead, S only pays an amount to replace 8 of the total of 20 sinks located in the various restrooms. The 8 replaced sinks, by themselves, do not comprise a significant portion of a major component (the 20 sinks) of the plumbing system under paragraph (k)(6)(ii)(A) of this section nor do they comprise a large portion of the physical structure of the plumbing system under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6) of this section, the replacement of the eight sinks does not constitute the replacement of a major component or substantial structural part of the building, and S is not required to treat the amount paid to replace the eight sinks as a restoration of a building under paragraph (k)(1)(iv) of this section.

Example 24. Replacement of major component or substantial structural part; plumbing system (i) T owns and operates a hotel building. T decides that, to attract customers and to remain competitive, it needs to update the guest rooms in its facility. Accordingly, T pays amounts to replace the bathtubs, toilets, and sinks, and to repair, repaint, and retile the bathroom walls and floors, which is necessitated by the installation of the new plumbing components. The replacement bathtubs, toilets, sinks, and tile are new and in a different style, but are similar in function and quality to the replaced items. T also pays amounts to replace certain section 1245 property, such as the guest room furniture, carpeting, drapes, table lamps, and partition walls separating the bathroom area. T completes this work on two floors at a time, closing those floors and leaving the

rest of the hotel open for business. In Year 1, T pays amounts to perform the updates for 4 of the 20 hotel room floors and expects to complete the renovation of the remaining rooms over the next two years.

(ii) Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The plumbing system, including the bathtubs, toilets, and sinks, is a building system under paragraph (e)(2)(ii)(B)(2) of this section. All the bathtubs, together, all the toilets, together, and all the sinks together in the hotel building perform discrete and critical functions in the operation of the plumbing system under paragraph (k)(6)(ii)(A) of this section and comprise a large portion of the physical structure of the plumbing system under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6)(ii) of this section, these plumbing components comprise major components and substantial structural parts of the plumbing system, and T must treat the amount paid to replace these plumbing components as a restoration of, and improvement to, the building under paragraphs (k)(1)(vi) and (k)(2) of this section. In addition, under paragraph (g)(1)(i) of this section, T must treat the costs of repairing, repainting, and retiling the bathroom walls and floors as improvement costs because these costs directly benefit and are incurred by reason of the improvement to the building. Further, under paragraph (g)(3) of this section, T must treat the costs incurred in Years 1, 2, and 3 for the bathroom remodeling as improvement costs, even though they are incurred over a period of several taxable years, because they are related amounts paid to improve the building unit of property. Accordingly, under paragraph (d)(2) of this section, T must treat all the amounts it incurs to update its hotel restrooms as an improvement to the hotel building and capitalize these amounts. In addition, under § 1.263(a)-2 of the regulations, T must capitalize the amounts paid to acquire and install each section 1245 property.

Example 25. Not replacement of major component or substantial structural part; windows U owns a large office building that it uses to provide office space for employees that manage U's operations. The building has 300 exterior windows that represent 25 percent of the total surface area of the building. In Year 1, U pays an amount to replace 100 of the exterior windows that had become damaged. At the time of these replacements, U has no plans to replace any other windows in the near future. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The exterior windows are part of the building structure as defined under paragraph (e)(2)(ii)(A) of this section. The 300 ex-

terior windows perform a discrete and critical function in the operation of the building structure and are, therefore, a major component of the building structure under paragraph (k)(6)(i)(A) of this section. However, the 100 windows do not comprise a significant portion of this major component of the building structure under paragraph (k)(6)(ii)(A) of this section or a substantial structural part of the building structure under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6) of this section, the replacement of the 100 windows does not constitute the replacement of a major component or substantial structural part of the building, and U is not required to treat the amount paid to replace the 100 windows as restoration of the building under paragraph (k)(1)(iv) of this section.

Example 26. Replacement of major component; windows Assume the same facts as *Example 25*, except that that U replaces 200 of the 300 windows on the building. The 300 exterior windows perform a discrete and critical function in the operation of the building structure and are, therefore, a major component of the building structure under paragraph (k)(6)(i)(A) of this section. The 200 windows comprise a significant portion of this major component of the building structure under paragraph (k)(6)(ii)(A) of this section. Therefore, under paragraph (k)(6) of this section, the replacement of the 200 windows comprise the replacement of a major component of the building structure. Accordingly, U must treat the amount paid to replace the 200 windows as a restoration of the building under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amount paid as an improvement to the building under paragraph (d)(2) of this section.

Example 27. Replacement of substantial structural part; windows Assume the same facts as *Example 25*, except that the building is a modern design and the 300 windows represent 90 percent of the total surface area of the building. U replaces 100 of the 300 windows on the building. The 300 exterior windows perform a discrete and critical function in the operation of the building structure and are, therefore, a major component of the building structure under paragraph (k)(6)(i)(A) of this section. The 100 windows do not comprise a significant portion of this major component of the building structure under paragraph (k)(6)(ii)(A) of this section, however, they do comprise a substantial structural part of the building structure under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6) of this section, the replacement of the 100 windows comprise the replacement of a substantial structural part of the building structure. Accordingly, U must treat the amount paid to replace the 100 windows as a restoration of the building unit of property under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the

amount paid as an improvement to the building under paragraph (d)(2) of this section.

Example 28. Not replacement of major component or substantial structural part; floors V owns and operates a hotel building. V decides to refresh the appearance of the hotel lobby by replacing the floors in the lobby. The hotel lobby comprises less than 10 percent of the square footage of the entire hotel building. V pays an amount to replace the wood flooring in the lobby with new wood flooring of a similar quality. V did not replace any other flooring in the building. Assume that the wood flooring constitutes section 1250 property. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The wood flooring is part of the building structure under paragraph (e)(2)(ii)(A) of this section. All the floors in the hotel building comprise a major component of the building structure because they perform a discrete and critical function in the operation of the building structure. However, the lobby floors are not a significant portion of a major component (that is, all the floors) under paragraph (k)(6)(ii)(A) of this section, nor do the lobby floors comprise a substantial structural part of the building structure under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6) of this section, the replacement of the lobby floors is not the replacement of a major component or substantial structural part of the building unit of property, and V is not required to treat the amount paid for the replacement of the lobby floors as a restoration to the building under paragraph (k)(1)(iv) of this section.

Example 29. Replacement of major component or substantial structural part; floors Assume the same facts as *Example 28*, except that V decides to refresh the appearance of all the public areas of the hotel building by replacing all the floors in the public areas. To that end, V pays an amount to replace all the wood floors in all the public areas of the hotel building with new wood floors. The public areas include the lobby, the hallways, the meeting rooms, the ballrooms, and other public rooms throughout the hotel interiors. The public areas comprise approximately 40 percent of the square footage of the entire hotel building. All the floors in the hotel building comprise a major component of the building structure because they perform a discrete and critical function in the operation of the building structure. The floors in all the public areas of the hotel comprise a significant portion of a major component (that is, all the building floors) of the building structure. Therefore, under paragraph (k)(6)(ii)(A) of this section, the replacement of all the public area floors constitutes the replacement of a major component of the building structure. Accordingly, V must treat the amount paid to replace the public

area floors as a restoration of the building unit of property under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amounts as an improvement to the building under paragraph (d)(2) of this section.

Example 30. Replacement with no disposition (i) X owns an office building with four elevators serving all floors in the building. X replaces one of the elevators. The elevator is a structural component of the office building. X chooses to apply § 1.168(i)-8 to taxable years beginning on or after January 1, 2012, and before the applicability date of the final regulations. In accordance with § 1.168(i)-8(c)(4)(ii)(A), the office building (including its structural components) is the asset for tax disposition purposes. X also does not make the partial disposition election provided under § 1.168(i)-8(d)(2) for the elevator. Thus, the retirement of the replaced elevator is not a disposition under section 168, and no loss is taken into account for purposes of paragraph (k)(1)(i) of this section.

(ii) Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The elevator system, including all four elevators, is a building system under paragraph (e)(2)(ii)(B)(5) of this section. The replacement elevator does not perform a discrete and critical function in the operation of elevator system under paragraph (k)(6)(ii)(A) of this section nor does it comprise a large portion of the physical structure of the elevator system under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6) of this section, the replacement elevator does not constitute the replacement of a major component or substantial structural part of the elevator system. Accordingly, X is not required to treat the amount paid to replace the elevator as a restoration to the building under either paragraph (k)(1)(i) or paragraph (k)(1)(vi) of this section.

Example 31. Replacement with disposition The facts are the same as in *Example 30*, except X makes the partial disposition election provided under paragraph § 1.168(i)-8(d)(2) for the elevator. Although the office building (including its structural components) is the asset for disposition purposes, the result of X making the partial disposition election for the elevator is that the retirement of the replaced elevator is a disposition. Thus, depreciation for the retired elevator ceases at the time of its retirement (taking into account the applicable convention), and X recognizes a loss upon this retirement. Accordingly, X must treat the amount paid to replace the elevator as a restoration of the building under paragraphs (k)(1)(i) and (k)(2) of this section and must capitalize the amount paid as an improvement to the building under paragraph (d)(2) of this section. In addition,

the replacement elevator is treated as a separate asset for tax disposition purposes pursuant to § 1.168(i)-8(c)(4)(ii)(D), and for depreciation purposes pursuant to section 168(i)(6).

(1) *Capitalization of amounts to adapt property to a new or different use*—(1) *In general.* A taxpayer must capitalize as an improvement an amount paid to adapt a unit of property to a new or different use. In general, an amount is paid to adapt a unit of property to a new or different use if the adaptation is not consistent with the taxpayer's ordinary use of the unit of property at the time originally placed in service by the taxpayer.

(2) *Application of adaption rule to buildings.* In the case of a building, an amount is paid to improve a building if it is paid to adapt to a new or different use a property specified under paragraph (e)(2)(ii) (building), paragraph (e)(2)(iii)(B) (condominium), paragraph (e)(2)(iv)(B) (cooperative), or paragraph (e)(2)(v)(B) (leased building or leased portion of building) of this section. For example, an amount is paid to improve a building if it is paid to adapt the building structure or any one of its buildings systems to a new or different use.

(3) *Examples.* The following examples illustrate the application of this paragraph (1) only and do not address whether capitalization is required under another provision of this section or under another provision of the Code (for example, section 263A). Unless otherwise stated, assume that the taxpayer has not properly deducted a loss for any unit of property, asset, or component of a unit of property that is removed and replaced.

Example 1. New or different use; change in building use. A is a manufacturer and owns a manufacturing building that it has used for manufacturing since Year 1, when A placed it in service. In Year 30, A pays an amount to convert its manufacturing building into a showroom for its business. To convert the facility, A removes and replaces various structural components to provide a better layout for the showroom and its offices. A also repaints the building interiors as part of the conversion. When building materials are removed and replaced, A uses comparable and commercially available replacement materials. Under paragraphs (1)(2) and (e)(2)(ii) of this section, an amount is paid to improve A's manufacturing building if the amount adapts the building structure or any des-

ignated building system to a new or different use. Under paragraph (1)(1) of this section, the amount paid to convert the manufacturing building into a showroom adapts the building structure to a new or different use because the conversion to a showroom is not consistent with A's ordinary use of the building structure at the time it was placed in service. Therefore, A must capitalize the amount paid to convert the building into a showroom as an improvement to the building under paragraphs (d)(3) and (1) of this section.

Example 2. Not a new or different use; leased building. B owns and leases out space in a building consisting of twenty retail spaces. The space was designed to be reconfigured; that is, adjoining spaces could be combined into one space. One of the tenants expands its occupancy by leasing two adjoining retail spaces. To facilitate the new lease, B pays an amount to remove the walls between the three retail spaces. Assume that the walls between spaces are part of the building and its structural components. Under paragraphs (1)(2) and (e)(2)(ii) of this section, an amount is paid to improve B's building if it adapts the building structure or any of the building systems to a new or different use. Under paragraph (1)(1) of this section, the amount paid to convert three retail spaces into one larger space for an existing tenant does not adapt B's building structure to a new or different use because the combination of retail spaces is consistent with B's intended, ordinary use of the building structure. Therefore, the amount paid by B to remove the walls does not improve the building under paragraph (1) of this section and is not required to be capitalized under paragraph (d)(3) of this section.

Example 3. Not a new or different use; preparing building for sale. C owns a building consisting of twenty retail spaces. C decides to sell the building. In anticipation of selling the building, C pays an amount to repaint the interior walls and to refinish the hardwood floors. Under paragraphs (1)(2) and (e)(2)(ii) of this section, an amount is paid to improve C's building to a new or different use if it adapts the building structure or any of the building systems to a new or different use. Preparing the building for sale does not constitute a new or different use for the building structure under paragraph (1)(1) of this section. Therefore, the amount paid by C to prepare the building structure for sale does not improve the building under paragraph (1) of this section and is not required to be capitalized under paragraph (d)(3) of this section.

Example 4. New or different use; land. D owns a parcel of land on which it previously operated a manufacturing facility. Assume that the land is the unit of property. During the course of D's operation of the manufacturing facility, the land became contaminated with

wastes from its manufacturing processes. D discontinues manufacturing operations at the site and decides to develop the property for residential housing. In anticipation of building residential property, D pays an amount to remediate the contamination caused by D's manufacturing process. In addition, D pays an amount to regrade the land so that it can be used for residential purposes. Amounts that D pays to clean up wastes do not adapt the land to a new or different use, regardless of the extent to which the land was cleaned, because this cleanup merely returns the land to the condition it was in before the land was contaminated in D's operations. Therefore, D is not required to capitalize the amount paid for the cleanup under paragraph (1)(1) of this section. However, the amount paid to regrade the land so that it can be used for residential purposes adapts the land to a new or different use that is inconsistent with D's intended ordinary use of the property at the time it was placed in service. Accordingly, the amounts paid to regrade the land must be capitalized as improvements to the land under paragraphs (d)(3) and (1) of this section.

Example 5. New or different use; part of building (i) E owns a building in which it operates a retail drug store. The store consists of a pharmacy for filling medication prescriptions and various departments where customers can purchase food, toiletries, home goods, school supplies, cards, over-the-counter medications, and other similar items. E decides to create a walk-in medical clinic where nurse practitioners and physicians' assistants diagnose, treat, and write prescriptions for common illnesses and injuries, administer common vaccinations, conduct physicals and wellness screenings, and provide routine lab tests and services for common chronic conditions. To create the clinic, E pays amounts to reconfigure the pharmacy building. E incurs costs to build new walls creating an examination room, lab room, reception area, and waiting area. E installs additional plumbing, electrical wiring, and outlets to support the lab. E also acquires section 1245 property, such as computers, furniture, and equipment necessary for the new clinic. E treats the amounts paid for those units of property as costs of acquiring new units of property under § 1.263(a)-2.

(ii) Under paragraphs (1)(2) and (e)(2)(ii) of this section, an amount is paid to improve E's building if it adapts the building structure or any of the building systems to a new or different use. Under paragraph (1)(1) of this section, the amount paid to convert part of the retail drug store building structure into a medical clinic adapts the building structure to a new and different use, because the use of the building structure to provide clinical medical services is not consistent with E's intended ordinary use of the building structure at the time it was placed in

service. Similarly, the amounts paid to add to the plumbing system and the electrical systems to support the new medical services is not consistent with E's intended ordinary use of these systems when the systems were placed in service. Therefore, E must treat the amount paid for the conversion of the building structure, plumbing system, and electrical system as an improvement to the building and capitalize the amount under paragraphs (d)(3) and (1) of this section.

Example 6. Not a new or different use; part of building (i) F owns a building in which it operates a grocery store. The grocery store includes various departments for fresh produce, frozen foods, fresh meats, dairy products, toiletries, and over-the-counter medicines. The grocery store also includes separate counters for deli meats, prepared foods, and baked goods, often made to order. To better accommodate its customers' shopping needs, F decides to add a sushi bar where customers can order freshly prepared sushi from the counter for take-home or to eat at the counter. To create the sushi bar, F pays amounts to add a sushi counter and chairs, add additional wiring and outlets to support the counter, and install additional pipes and a sink, to provide for the safe handling of the food. F also pays amounts to replace flooring and wall coverings in the sushi bar area with decorative coverings to reflect more appropriate décor. Assume the sushi counter and chairs are section 1245 property, and F treats the amounts paid for those units of property as costs of acquiring new units of property under § 1.263(a)-2.

(ii) Under paragraphs (1)(2) and (e)(2)(ii) of this section, an amount is paid to improve F's building if it adapts the building structure or any of the building systems to a new or different use. Under paragraph (1)(1) of this section, the amount paid to convert a part of F's retail grocery into a sushi bar area does not adapt F's building structure, plumbing system, or electrical system to a new or different use, because the sale of sushi is consistent with F's intended, ordinary use of the building structure and these systems in its grocery sales business, which includes selling food to its customers at various specialized counters. Accordingly, the amount paid by F to replace the wall and floor finishes, add wiring, and add plumbing to create the sushi bar space does not improve the building unit of property under paragraph (1) of this section and is not required to be capitalized under paragraph (d)(3) of this section.

Example 7. Not a new or different use; part of building (i) G owns a hospital with various departments dedicated to the provision of clinical medical care. To better accommodate its patients' needs, G decides to modify the emergency room space to provide both emergency care and outpatient surgery. To modify the space, G pays amounts to move

interior walls, add additional wiring and outlets, replace floor tiles and doors, and repaint the walls. To complete the outpatient surgery center, G also pays amounts to install miscellaneous medical equipment necessary for the provision of surgical services. Assume the medical equipment is section 1245 property, and G treats the amounts paid for those units of property as costs of acquiring new units of property under § 1.263(a)-2.

(ii) Under paragraphs (1)(2) and (e)(2)(ii) of this section, an amount is paid to improve G's building if it adapts the building structure or any of the building systems to a new or different use. Under paragraph (1)(1) of this section, the amount paid to convert part of G's emergency room into an outpatient surgery center does not adapt G's building structure or electrical system to a new or different use, because the provision of outpatient surgery is consistent with G's intended, ordinary use of the building structure and these systems in its clinical medical care business. Accordingly, the amounts paid by G to relocate interior walls, add additional wiring and outlets, replace floor tiles and doors, and repaint the walls to create outpatient surgery space do not improve the building under paragraph (1) of this section and are not required to be capitalized under paragraph (d)(3) of this section.

(m) *Optional regulatory accounting method*—(1) *In general.* This paragraph (m) provides an optional simplified method (the regulatory accounting method) for regulated taxpayers to determine whether amounts paid to repair, maintain, or improve tangible property are to be treated as deductible expenses or capital expenditures. A taxpayer that uses the regulatory accounting method described in paragraph (m)(3) of this section must use that method for property subject to regulatory accounting instead of determining whether amounts paid to repair, maintain, or improve property are capital expenditures or deductible expenses under the general principles of sections 162(a), 212, and 263(a). Thus, the capitalization rules in paragraph (d) (and the routine maintenance safe harbor described in paragraph (i)) of this section do not apply to amounts paid to repair, maintain, or improve property subject to regulatory accounting by taxpayers that use the regulatory accounting method under this paragraph (m).

(2) *Eligibility for regulatory accounting method.* A taxpayer that is engaged in a trade or business in a regulated indus-

try is a regulated taxpayer and may use the regulatory accounting method under this paragraph (m). For purposes of this paragraph (m), a taxpayer is in a regulated industry only if the taxpayer is subject to the regulatory accounting rules of the Federal Energy Regulatory Commission (FERC), the Federal Communications Commission (FCC), or the Surface Transportation Board (STB).

(3) *Description of regulatory accounting method.* Under the regulatory accounting method, a taxpayer must follow the method of accounting for regulatory accounting purposes that it is required to follow for FERC, FCC, or STB (whichever is applicable) in determining whether an amount paid repairs, maintains, or improves property under this section. Therefore, a taxpayer must capitalize for Federal income tax purposes an amount paid that is capitalized as an improvement for regulatory accounting purposes. A taxpayer may not capitalize for Federal income tax purposes under this section an amount paid that is not capitalized as an improvement for regulatory accounting purposes. A taxpayer that uses the regulatory accounting method must use that method for all of its tangible property that is subject to regulatory accounting rules. The method does not apply to tangible property that is not subject to regulatory accounting rules. The method also does not apply to property for the taxable years in which the taxpayer elected to apply the repair allowance under § 1.167(a)-11(d)(2). The regulatory accounting method is a method of accounting under section 446(a).

(4) *Examples.* The following examples illustrate the application of this paragraph (m):

Example 1. Taxpayer subject to regulatory accounting rules of FERC. W is an electric utility company that operates a power plant that generates electricity and that owns and operates network assets to transmit and distribute the electricity to its customers. W is subject to the regulatory accounting rules of FERC, and W uses the regulatory accounting method under paragraph (m) of this section. W does not capitalize on its books and records for regulatory accounting purposes the cost of repairs and maintenance performed on its turbines or its network assets. Under the regulatory accounting method, W

may not capitalize for Federal income tax purposes amounts paid for repairs performed on its turbines or its network assets.

Example 2. Taxpayer not subject to regulatory accounting rules of FERC X is an electric utility company that operates a power plant to generate electricity. X previously was subject to the regulatory accounting rules of FERC, but currently X is not required to use FERC's regulatory accounting rules. X cannot use the regulatory accounting method provided in this paragraph (m).

Example 3. Taxpayer subject to regulatory accounting rules of FCC Y is a telecommunications company that is subject to the regulatory accounting rules of the FCC. Y uses the regulatory accounting method under this paragraph (m). Y's assets include a telephone central office switching center, which contains numerous switches and various switching equipment. Y capitalizes on its books and records for regulatory accounting purposes the cost of replacing each switch. Under the regulatory accounting method, Y is required to capitalize for Federal income tax purposes amounts paid to replace each switch.

Example 4. Taxpayer subject to regulatory accounting rules of STB Z is a Class I railroad that is subject to the regulatory accounting rules of the STB. Z uses the regulatory accounting method under this paragraph (m). Z capitalizes on its books and records for regulatory accounting purposes the cost of locomotive rebuilds. Under the regulatory accounting method, Z is required to capitalize for Federal income tax purposes amounts paid to rebuild its locomotives.

(n) *Election to capitalize repair and maintenance costs*—(1) *In general.* A taxpayer may elect to treat amounts paid during the taxable year for repair and maintenance (as defined under § 1.162-4) to tangible property as amounts paid to improve that property under this section and as an asset subject to the allowance for depreciation if the taxpayer incurs these amounts in carrying on the taxpayer's trade or business and if the taxpayer treats these amounts as capital expenditures on its books and records regularly used in computing income ("books and records"). A taxpayer that elects to apply this paragraph (n) in a taxable year must apply this paragraph to all amounts paid for repair and maintenance to tangible property that it treats as capital expenditures on its books and records in that taxable year. Any amounts for which this election is made shall not be treated as amounts paid for repair or maintenance under § 1.162-4.

(2) *Time and manner of election.* A taxpayer makes this election under this paragraph (n) by attaching a statement to the taxpayer's timely filed original Federal tax return (including extensions) for the taxable year in which the taxpayer pays amounts described under paragraph (n)(1) of this paragraph. Sections 301.9100-1 through 301.9100-3 of this chapter provide the rules governing extensions of the time to make regulatory elections. The statement must be titled "Section 1.263(a)-3(n) Election" and include the taxpayer's name, address, taxpayer identification number, and a statement that the taxpayer is making the election to capitalize repair and maintenance costs under § 1.263(a)-3(n). In the case of a consolidated group filing a consolidated income tax return, the election is made for each member of the consolidated group by the common parent, and the statement must also include the names and taxpayer identification numbers of each member for which the election is made. In the case of an S corporation or a partnership, the election is made by the S corporation or partnership and not by the shareholders or partners. A taxpayer making this election for a taxable year must treat any amounts paid for repairs and maintenance during the taxable year that are capitalized on the taxpayer's books and records as improvements to tangible property. The taxpayer must begin to depreciate the cost of such improvements amounts when they are placed in service by the taxpayer under the applicable provisions of the Code and regulations. An election may not be made through the filing of an application for change in accounting method or, before obtaining the Commissioner's consent to make a late election, by filing an amended Federal tax return. The time and manner of electing to capitalize repair and maintenance costs under this paragraph (n) may be modified through guidance of general applicability (see §§ 601.601(d)(2) and 601.602 of this chapter).

(3) *Exception.* This paragraph (n) does not apply to amounts paid for repairs or maintenance of rotatable or temporary spare parts to which the taxpayer applies the optional method of

accounting for rotatable and temporary spare parts under § 1.162-3(e).

(4) *Examples.* The following examples illustrate the application of this paragraph (n):

Example 1. Election to capitalize routine maintenance on non-rotatable part. (i) Q is a towboat operator that owns a fleet of towboats that it uses in its trade or business. Each towboat is equipped with two diesel-powered engines. Assume that each towboat, including its engines, is the unit of property and that a towboat has a class life of 18 years. Assume the towboat engines are not rotatable spare parts under § 1.162-3(c)(2). In Year 1, Q acquired a new towboat, including its two engines, and placed the towboat into service. In Year 4, Q pays amounts to perform scheduled maintenance on both engines in the towboat. Assume that none of the exceptions set out in paragraph (i)(3) of this section apply to the scheduled maintenance costs and that the scheduled maintenance on Q's towboat is within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts paid for the scheduled maintenance to its towboat engines in Year 4 are deemed not to improve the towboat and are not required to be capitalized under paragraph (d) of this section.

(ii) On its books and records, Q treats amounts paid for scheduled maintenance on its towboat engines as capital expenditures. For administrative convenience, Q decides to account for these costs in the same way for Federal income tax purposes. Under paragraph (n) of this section, in Year 4, Q may elect to capitalize the amounts paid for the scheduled maintenance on its towboat engines. If Q elects to capitalize such amounts, Q must capitalize all amounts paid for repair and maintenance to tangible property that Q treats as capital expenditures on its books and records in Year 4.

Example 2. No election to capitalize routine maintenance. Assume the same facts as *Example 1*, except in Year 8, Q pays amounts to perform scheduled maintenance for a second time on the towboat engines. On its books and records, Q treats the amounts paid for this scheduled maintenance as capital expenditures. However, in Year 8, Q decides not to make the election to capitalize the amounts paid for scheduled maintenance under paragraph (n) of this section. Because Q does not make the election under paragraph (n) for Year 8, Q may apply the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section to the amounts paid in Year 8, and not treat these amounts as capital expenditures. Because the election is made for each taxable year, there is no effect on the scheduled maintenance costs capital-

ized by Q on its Federal tax return for Year 4.

Example 3. Election to capitalize replacement of building component. (i) R owns an office building that it uses to provide services to customers. The building contains a HVAC system that incorporates ten roof-mounted units that provide heating and air conditioning for different parts of the building. In Year 1, R pays an amount to replace 2 of the 10 units to address climate control problems in various offices throughout the office building. Assume that the replacement of the two units does not constitute an improvement to the HVAC system, and, accordingly, to the building unit of property under paragraph (d) of this section, and that R may deduct these amounts as repairs and maintenance under § 1.162-4.

(ii) On its books and records, R treats amounts paid for the two HVAC components as capital expenditures. R determines that it would prefer to account for these amounts in the same way for Federal income tax purposes. Under this paragraph (n), in Year 1, R may elect to capitalize the amounts paid for the new HVAC components. If R elects to capitalize such amounts, R must capitalize all amounts paid for repair and maintenance to tangible property that R treats as capital expenditures on its books and records in Year 1.

(o) *Treatment of capital expenditures.* Amounts required to be capitalized under this section are capital expenditures and must be taken into account through a charge to capital account or basis, or in the case of property that is inventory in the hands of a taxpayer, through inclusion in inventory costs.

(p) *Recovery of capitalized amounts.* Amounts that are capitalized under this section are recovered through depreciation, cost of goods sold, or by an adjustment to basis at the time the property is placed in service, sold, used, or otherwise disposed of by the taxpayer. Cost recovery is determined by the applicable Code and regulation provisions relating to the use, sale, or disposition of property.

(q) *Accounting method changes.* Except as otherwise provided in this section, a change to comply with this section is a change in method of accounting to which the provisions of sections 446 and 481 and the accompanying regulations apply. A taxpayer seeking to change to a method of accounting permitted in this section must secure the consent of the Commissioner in accordance with

Internal Revenue Service, Treasury

§ 1.263(a)–4

§1.446–1(e) and follow the administrative procedures issued under §1.446–1(e)(3)(ii) for obtaining the Commissioner’s consent to change its accounting method.

(r) *Effective/applicability date*—(1) *In general.* Except for paragraphs (h), (m), and (n) of this section, this section applies to taxable years beginning on or after January 1, 2014. Paragraphs (h), (m), and (n) of this section apply to amounts paid in taxable years beginning on or after January 1, 2014. Except as provided in paragraphs (r)(2) and (r)(3) of this section, §1.263(a)–3 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014.

(2) *Early application of this section*—(i) *In general.* Except for paragraphs (h), (m), and (n) of this section, a taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012. A taxpayer may choose to apply paragraphs (h), (m), and (n) of this section to amounts paid in taxable years beginning on or after January 1, 2012.

(ii) *Transition rule for certain elections on 2012 or 2013 returns.* If under paragraph (r)(2)(i) of this section, a taxpayer chooses to make the election to apply the safe harbor for small taxpayers under paragraph (h) of this section or the election to capitalize repair and maintenance costs under paragraph (n) of this section for amounts paid in its taxable year beginning on or after January 1, 2012, and ending on or before September 19, 2013 (applicable taxable year), and the taxpayer did not make the election specified in paragraph (h)(6) or paragraph (n)(2) of this section on its timely filed original Federal tax return for the applicable taxable year, the taxpayer must make the election specified in paragraph (h)(6) or paragraph (n)(2) of this section for the applicable taxable year by filing an amended Federal tax return (including the required statements) for the applicable taxable year on or before 180 days from the due date including extensions of the taxpayer’s Federal tax return for the applicable taxable year, notwithstanding that the taxpayer may not have extended the due date.

(3) *Optional application of TD 9564.* A taxpayer may choose to apply

§1.263(a)–3T as contained in TD 9564 (76 FR 81060) December 27, 2011, to taxable years beginning on or after January 1, 2012, and before January 1, 2014.

[T.D. 9636, 78 FR 57718, Sept. 19, 2013, as amended by T.D. 9636, 79 FR 42191, July 21, 2014; T.D. 9689, 79 FR 48684, Aug. 18, 2014]

§ 1.263(a)–4 Amounts paid to acquire or create intangibles.

(a) *Overview.* This section provides rules for applying section 263(a) to amounts paid to acquire or create intangibles. Except to the extent provided in paragraph (d)(8) of this section, the rules provided by this section do not apply to amounts paid to acquire or create tangible assets. Paragraph (b) of this section provides a general principle of capitalization. Paragraphs (c) and (d) of this section identify intangibles for which capitalization is specifically required under the general principle. Paragraph (e) of this section provides rules for determining the extent to which taxpayers must capitalize transaction costs. Paragraph (f) of this section provides a 12-month rule intended to simplify the application of the general principle to certain payments that create benefits of a brief duration. Additional rules and examples relating to these provisions are provided in paragraphs (g) through (n) of this section. The applicability date of the rules in this section is provided in paragraph (o) of this section. Paragraph (p) of this section provides rules applicable to changes in methods of accounting made to comply with this section.

(b) *Capitalization with respect to intangibles*—(1) *In general.* Except as otherwise provided in this section, a taxpayer must capitalize—

(i) An amount paid to acquire an intangible (see paragraph (c) of this section);

(ii) An amount paid to create an intangible described in paragraph (d) of this section;

(iii) An amount paid to create or enhance a separate and distinct intangible asset within the meaning of paragraph (b)(3) of this section;

(iv) An amount paid to create or enhance a future benefit identified in published guidance in the FEDERAL REGISTER or in the Internal Revenue

Bulletin (see § 601.601(d)(2)(ii) of this chapter) as an intangible for which capitalization is required under this section; and

(v) An amount paid to facilitate (within the meaning of paragraph (e)(1) of this section) an acquisition or creation of an intangible described in paragraph (b)(1)(i), (ii), (iii) or (iv) of this section.

(2) *Published guidance.* Any published guidance identifying a future benefit as an intangible for which capitalization is required under paragraph (b)(1)(iv) of this section applies only to amounts paid on or after the date of publication of the guidance.

(3) *Separate and distinct intangible asset*—(i) *Definition.* The term *separate and distinct intangible asset* means a property interest of ascertainable and measurable value in money's worth that is subject to protection under applicable State, Federal or foreign law and the possession and control of which is intrinsically capable of being sold, transferred or pledged (ignoring any restrictions imposed on assignability) separate and apart from a trade or business. In addition, for purposes of this section, a fund (or similar account) is treated as a separate and distinct intangible asset of the taxpayer if amounts in the fund (or account) may revert to the taxpayer. The determination of whether a payment creates a separate and distinct intangible asset is made based on all of the facts and circumstances existing during the taxable year in which the payment is made.

(ii) *Creation or termination of contract rights.* Amounts paid to another party to create, originate, enter into, renew or renegotiate an agreement with that party that produces rights or benefits for the taxpayer (and amounts paid to facilitate the creation, origination, enhancement, renewal or renegotiation of such an agreement) are treated as amounts that do not create (or facilitate the creation of) a separate and distinct intangible asset within the meaning of this paragraph (b)(3). Further, amounts paid to another party to terminate (or facilitate the termination of) an agreement with that party are treated as amounts that do not create a separate and distinct intangible asset

within the meaning of this paragraph (b)(3). See paragraphs (d)(2), (d)(6), and (d)(7) of this section for rules that specifically require capitalization of amounts paid to create or terminate certain agreements.

(iii) *Amounts paid in performing services.* Amounts paid in performing services under an agreement are treated as amounts that do not create a separate and distinct intangible asset within the meaning of this paragraph (b)(3), regardless of whether the amounts result in the creation of an income stream under the agreement.

(iv) *Creation of computer software.* Except as otherwise provided in the Internal Revenue Code, the regulations thereunder, or other published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii) of this chapter), amounts paid to develop computer software are treated as amounts that do not create a separate and distinct intangible asset within the meaning of this paragraph (b)(3).

(v) *Creation of package design.* Amounts paid to develop a package design are treated as amounts that do not create a separate and distinct intangible asset within the meaning of this paragraph (b)(3). For purposes of this section, the term *package design* means the specific graphic arrangement or design of shapes, colors, words, pictures, lettering, and other elements on a given product package, or the design of a container with respect to its shape or function.

(4) *Coordination with other provisions of the Internal Revenue Code*—(i) *In general.* Nothing in this section changes the treatment of an amount that is specifically provided for under any other provision of the Internal Revenue Code (other than section 162(a) or 212) or the regulations thereunder.

(ii) *Example.* The following example illustrates the rule of this paragraph (b)(4):

Example. On January 1, 2004, G enters into an interest rate swap agreement with unrelated counterparty H under which, for a term of five years, G is obligated to make annual payments at 11% and H is obligated to make annual payments at LIBOR on a notional principal amount of \$100 million. At the time G and H enter into this swap agreement, the rate for similar on-market swaps is LIBOR

to 10%. To compensate for this difference, on January 1, 2004, H pays G a yield adjustment fee of \$3,790,786. This yield adjustment fee constitutes an amount paid to create an intangible and would be capitalized under paragraph (d)(2) of this section. However, because the yield adjustment fee is a nonperiodic payment on a notional principal contract as defined in § 1.446-3(c), the treatment of this fee is governed by § 1.446-3 and not this section.

(c) *Acquired intangibles*—(1) *In general.* A taxpayer must capitalize amounts paid to another party to acquire any intangible from that party in a purchase or similar transaction. Examples of intangibles within the scope of this paragraph (c) include, but are not limited to, the following (if acquired from another party in a purchase or similar transaction):

(i) An ownership interest in a corporation, partnership, trust, estate, limited liability company, or other entity.

(ii) A debt instrument, deposit, stripped bond, stripped coupon (including a servicing right treated for federal income tax purposes as a stripped coupon), regular interest in a REMIC or FASIT, or any other intangible treated as debt for federal income tax purposes.

(iii) A financial instrument, such as—

(A) A notional principal contract;

(B) A foreign currency contract;

(C) A futures contract;

(D) A forward contract (including an agreement under which the taxpayer has the right and obligation to provide or to acquire property (or to be compensated for such property, regardless of whether the taxpayer provides or acquires the property));

(E) An option (including an agreement under which the taxpayer has the right to provide or to acquire property (or to be compensated for such property, regardless of whether the taxpayer provides or acquires the property)); and

(F) Any other financial derivative.

(iv) An endowment contract, annuity contract, or insurance contract.

(v) Non-functional currency.

(vi) A lease.

(vii) A patent or copyright.

(viii) A franchise, trademark or tradename (as defined in § 1.197-2(b)(10)).

(ix) An assembled workforce (as defined in § 1.197-2(b)(3)).

(x) Goodwill (as defined in § 1.197-2(b)(1)) or going concern value (as defined in § 1.197-2(b)(2)).

(xi) A customer list.

(xii) A servicing right (for example, a mortgage servicing right that is not treated for Federal income tax purposes as a stripped coupon).

(xiii) A customer-based intangible (as defined in § 1.197-2(b)(6)) or supplier-based intangible (as defined in § 1.197-2(b)(7)).

(xiv) Computer software.

(xv) An agreement providing either party the right to use, possess or sell an intangible described in paragraphs (c)(1)(i) through (v) of this section.

(2) *Readily available software.* An amount paid to obtain a nonexclusive license for software that is (or has been) readily available to the general public on similar terms and has not been substantially modified (within the meaning of § 1.197-2(c)(4)) is treated for purposes of this paragraph (c) as an amount paid to another party to acquire an intangible from that party in a purchase or similar transaction.

(3) *Intangibles acquired from an employee.* Amounts paid to an employee to acquire an intangible from that employee are not required to be capitalized under this section if the amounts are includible in the employee's income in connection with the performance of services under section 61 or 83. For purposes of this section, whether an individual is an employee is determined in accordance with the rules contained in section 3401(c) and the regulations thereunder.

(4) *Examples.* The following examples illustrate the rules of this paragraph (c):

Example 1. Debt instrument. X corporation, a commercial bank, purchases a portfolio of existing loans from Y corporation, another financial institution. X pays Y \$2,000,000 in exchange for the portfolio. The \$2,000,000 paid to Y constitutes an amount paid to acquire an intangible from Y and must be capitalized.

Example 2. Option. W corporation owns all of the outstanding stock of X corporation. Y corporation holds a call option entitling it to purchase from W all of the outstanding stock

of X at a certain price per share. Z corporation acquires the call option from Y in exchange for \$5,000,000. The \$5,000,000 paid to Y constitutes an amount paid to acquire an intangible from Y and must be capitalized.

Example 3. Ownership interest in a corporation. Same as *Example 2*, but assume Z exercises its option and purchases from W all of the outstanding stock of X in exchange for \$100,000,000. The \$100,000,000 paid to W constitutes an amount paid to acquire an intangible from W and must be capitalized.

Example 4. Customer list. N corporation, a retailer, sells its products through its catalog and mail order system. N purchases a customer list from R corporation. N pays R \$100,000 in exchange for the customer list. The \$100,000 paid to R constitutes an amount paid to acquire an intangible from R and must be capitalized.

Example 5. Goodwill. Z corporation pays W corporation \$10,000,000 to purchase all of the assets of W in a transaction that constitutes an applicable asset acquisition under section 1060(c). Of the \$10,000,000 consideration paid in the transaction, \$9,000,000 is allocable to tangible assets purchased from W and \$1,000,000 is allocable to goodwill. The \$1,000,000 allocable to goodwill constitutes an amount paid to W to acquire an intangible from W and must be capitalized.

(d) *Created intangibles—(1) In general.* Except as provided in paragraph (f) of this section (relating to the 12-month rule), a taxpayer must capitalize amounts paid to create an intangible described in this paragraph (d). The determination of whether an amount is paid to create an intangible described in this paragraph (d) is to be made based on all of the facts and circumstances, disregarding distinctions between the labels used in this paragraph (d) to describe the intangible and the labels used by the taxpayer and other parties to the transaction.

(2) *Financial interests—(i) In general.* A taxpayer must capitalize amounts paid to another party to create, originate, enter into, renew or renegotiate with that party any of the following financial interests, whether or not the interest is regularly traded on an established market:

(A) An ownership interest in a corporation, partnership, trust, estate, limited liability company, or other entity.

(B) A debt instrument, deposit, stripped bond, stripped coupon (including a servicing right treated for federal income tax purposes as a stripped coupon), regular interest in a REMIC or FASIT, or any other intangible treated as debt for Federal income tax purposes.

(C) A financial instrument, such as—

- (1) A letter of credit;
- (2) A credit card agreement;
- (3) A notional principal contract;
- (4) A foreign currency contract;
- (5) A futures contract;

(6) A forward contract (including an agreement under which the taxpayer has the right and obligation to provide or to acquire property (or to be compensated for such property, regardless of whether the taxpayer provides or acquires the property));

(7) An option (including an agreement under which the taxpayer has the right to provide or to acquire property (or to be compensated for such property, regardless of whether the taxpayer provides or acquires the property)); and

(8) Any other financial derivative.

(D) An endowment contract, annuity contract, or insurance contract that has or may have cash value.

(E) Non-functional currency.

(F) An agreement providing either party the right to use, possess or sell a financial interest described in this paragraph (d)(2).

(ii) *Amounts paid to create, originate, enter into, renew or renegotiate.* An amount paid to another party is not paid to create, originate, enter into, renew or renegotiate a financial interest with that party if the payment is made with the mere hope or expectation of developing or maintaining a business relationship with that party and is not contingent on the origination, renewal or renegotiation of a financial interest with that party.

(iii) *Renegotiate.* A taxpayer is treated as renegotiating a financial interest if the terms of the financial interest are modified. A taxpayer also is treated as renegotiating a financial interest if the taxpayer enters into a new financial interest with the same party (or substantially the same parties) to a terminated financial interest, the taxpayer could not cancel the terminated financial interest without the consent of the other party (or parties), and the other party (or parties) would not have consented to the cancellation unless

the taxpayer entered into the new financial interest. A taxpayer is treated as unable to cancel a financial interest without the consent of the other party (or parties) if, under the terms of the financial interest, the taxpayer is subject to a termination penalty and the other party (or parties) to the financial interest modifies the terms of the penalty.

(iv) *Coordination with other provisions of this paragraph (d).* An amount described in this paragraph (d)(2) that is also described elsewhere in paragraph (d) of this section is treated as described only in this paragraph (d)(2).

(v) *Coordination with § 1.263(a)-5.* See § 1.263(a)-5 for the treatment of borrowing costs and the treatment of amounts paid by an option writer.

(vi) *Examples.* The following examples illustrate the rules of this paragraph (d)(2):

Example 1. Loan. X corporation, a commercial bank, makes a loan to A in the principal amount of \$250,000. The \$250,000 principal amount of the loan paid to A constitutes an amount paid to another party to create a debt instrument with that party under paragraph (d)(2)(i)(B) of this section and must be capitalized.

Example 2. Option. W corporation owns all of the outstanding stock of X corporation. Y corporation pays W \$1,000,000 in exchange for W's grant of a 3-year call option to Y permitting Y to purchase all of the outstanding stock of X at a certain price per share. Y's payment of \$1,000,000 to W constitutes an amount paid to another party to create an option with that party under paragraph (d)(2)(i)(C)(7) of this section and must be capitalized.

Example 3. Partnership interest. Z corporation pays \$10,000 to P, a partnership, in exchange for an ownership interest in P. Z's payment of \$10,000 to P constitutes an amount paid to another party to create an ownership interest in a partnership with that party under paragraph (d)(2)(i)(A) of this section and must be capitalized.

Example 4. Take or pay contract. Q corporation, a producer of natural gas, pays \$1,000,000 to R during 2005 to induce R corporation to enter into a 5-year "take or pay" gas purchase contract. Under the contract, R is liable to pay for a specified minimum amount of gas, whether or not R takes such gas. Q's payment of \$1,000,000 is an amount paid to another party to induce that party to enter into an agreement providing Q the right and obligation to provide property or be compensated for such property (regardless of whether the property is provided) under

paragraph (d)(2)(i)(C)(6) of this section and must be capitalized.

Example 5. Agreement to provide property. P corporation pays R corporation \$1,000,000 in exchange for R's agreement to purchase 1,000 units of P's product at any time within the three succeeding calendar years. The agreement describes P's \$1,000,000 as a sales discount. P's \$1,000,000 payment is an amount paid to induce R to enter into an agreement providing P the right and obligation to provide property under paragraph (d)(2)(i)(C)(6) of this section and must be capitalized.

Example 6. Customer incentive payment. S corporation, a computer manufacturer, seeks to develop a business relationship with V corporation, a computer retailer. As an incentive to encourage V to purchase computers from S, S enters into an agreement with V under which S agrees that, if V purchases \$20,000,000 of computers from S within 3 years from the date of the agreement, S will pay V \$2,000,000 on the date that V reaches the \$20,000,000 threshold. V reaches the \$20,000,000 threshold during the third year of the agreement, and S pays V \$2,000,000. S is not required to capitalize its payment to V under this paragraph (d)(2) because the payment does not provide S the right or obligation to provide property and does not create a separate and distinct intangible asset for S within the meaning of paragraph (b)(3)(i) of this section.

(3) *Prepaid expenses*—(i) In general. A taxpayer must capitalize prepaid expenses.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (d)(3):

Example 1. Prepaid insurance. N corporation, an accrual method taxpayer, pays \$10,000 to an insurer to obtain three years of coverage under a property and casualty insurance policy. The \$10,000 is a prepaid expense and must be capitalized under this paragraph (d)(3). Paragraph (d)(2) of this section does not apply to the payment because the policy has no cash value.

Example 2. Prepaid rent. X corporation, a cash method taxpayer, enters into a 24-month lease of office space. At the time of the lease signing, X prepays \$240,000. No other amounts are due under the lease. The \$240,000 is a prepaid expense and must be capitalized under this paragraph (d)(3).

(4) *Certain memberships and privileges*—(i) In general. A taxpayer must capitalize amounts paid to an organization to obtain, renew, renegotiate, or upgrade a membership or privilege from that organization. A taxpayer is not required to capitalize under this

paragraph (d)(4) an amount paid to obtain, renew, renegotiate or upgrade certification of the taxpayer's products, services, or business processes.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (d)(4):

Example 1. Hospital privilege. B, a physician, pays \$10,000 to Y corporation to obtain life-time staff privileges at a hospital operated by Y. B must capitalize the \$10,000 payment under this paragraph (d)(4).

Example 2. Initiation fee. X corporation pays a \$50,000 initiation fee to obtain membership in a trade association. X must capitalize the \$50,000 payment under this paragraph (d)(4).

Example 3. Product rating. V corporation, an automobile manufacturer, pays W corporation, a national quality ratings association, \$100,000 to conduct a study and provide a rating of the quality and safety of a line of V's automobiles. V's payment is an amount paid to obtain a certification of V's product and is not required to be capitalized under this paragraph (d)(4).

Example 4. Business process certification. Z corporation, a manufacturer, seeks to obtain a certification that its quality control standards meet a series of international standards known as ISO 9000. Z pays \$50,000 to an independent registrar to obtain a certification from the registrar that Z's quality management system conforms to the ISO 9000 standard. Z's payment is an amount paid to obtain a certification of Z's business processes and is not required to be capitalized under this paragraph (d)(4).

(5) *Certain rights obtained from a governmental agency—(i) In general.* A taxpayer must capitalize amounts paid to a governmental agency to obtain, renew, renegotiate, or upgrade its rights under a trademark, trade name, copyright, license, permit, franchise, or other similar right granted by that governmental agency.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (d)(5):

Example 1. Business license. X corporation pays \$15,000 to state Y to obtain a business license that is valid indefinitely. Under this paragraph (d)(5), the amount paid to state Y is an amount paid to a government agency for a right granted by that agency. Accordingly, X must capitalize the \$15,000 payment.

Example 2. Bar admission. A, an individual, pays \$1,000 to an agency of state Z to obtain a license to practice law in state Z that is valid indefinitely, provided A adheres to the requirements governing the practice of law in state Z. Under this paragraph (d)(5), the amount paid to state Z is an amount paid to

a government agency for a right granted by that agency. Accordingly, A must capitalize the \$1,000 payment.

(6) *Certain contract rights—(i) In general.* Except as otherwise provided in this paragraph (d)(6), a taxpayer must capitalize amounts paid to another party to create, originate, enter into, renew or renegotiate with that party—

(A) An agreement providing the taxpayer the right to use tangible or intangible property or the right to be compensated for the use of tangible or intangible property;

(B) An agreement providing the taxpayer the right to provide or to receive services (or the right to be compensated for services regardless of whether the taxpayer provides such services);

(C) A covenant not to compete or an agreement having substantially the same effect as a covenant not to compete (except, in the case of an agreement that requires the performance of services, to the extent that the amount represents reasonable compensation for services actually rendered);

(D) An agreement not to acquire additional ownership interests in the taxpayer; or

(E) An agreement providing the taxpayer (as the covered party) with an annuity, an endowment, or insurance coverage.

(ii) *Amounts paid to create, originate, enter into, renew or renegotiate.* An amount paid to another party is not paid to create, originate, enter into, renew or renegotiate an agreement with that party if the payment is made with the mere hope or expectation of developing or maintaining a business relationship with that party and is not contingent on the origination, renewal or renegotiation of an agreement with that party.

(iii) *Renegotiate.* A taxpayer is treated as renegotiating an agreement if the terms of the agreement are modified. A taxpayer also is treated as renegotiating an agreement if the taxpayer enters into a new agreement with the same party (or substantially the same parties) to a terminated agreement, the taxpayer could not cancel the terminated agreement without the consent of the other party (or parties), and the other party (or parties) would not

have consented to the cancellation unless the taxpayer entered into the new agreement. A taxpayer is treated as unable to cancel an agreement without the consent of the other party (or parties) if, under the terms of the agreement, the taxpayer is subject to a termination penalty and the other party (or parties) to the agreement modifies the terms of the penalty.

(iv) *Right.* An agreement does not provide the taxpayer a right to use property or to provide or receive services if the agreement may be terminated at will by the other party (or parties) to the agreement before the end of the period prescribed by paragraph (f)(1) of this section. An agreement is not terminable at will if the other party (or parties) to the agreement is economically compelled not to terminate the agreement until the end of the period prescribed by paragraph (f)(1) of this section. All of the facts and circumstances will be considered in determining whether the other party (or parties) to an agreement is economically compelled not to terminate the agreement. An agreement also does not provide the taxpayer the right to provide services if the agreement merely provides that the taxpayer will stand ready to provide services if requested, but places no obligation on another person to request or pay for the taxpayer's services.

(v) *De minimis amounts.* A taxpayer is not required to capitalize amounts paid to another party (or parties) to create, originate, enter into, renew or renegotiate with that party (or those parties) an agreement described in paragraph (d)(6)(i) of this section if the aggregate of all amounts paid to that party (or those parties) with respect to the agreement does not exceed \$5,000. If the aggregate of all amounts paid to the other party (or parties) with respect to that agreement exceeds \$5,000, then all amounts must be capitalized. For purposes of this paragraph (d)(6), an amount paid in the form of property is valued at its fair market value at the time of the payment. In general, a taxpayer must determine whether the rules of this paragraph (d)(6)(v) apply by accounting for the specific amounts paid with respect to each agreement. However, a taxpayer that reasonably

expects to create, originate, enter into, renew or renegotiate at least 25 similar agreements during the taxable year may establish a pool of agreements for purposes of determining the amounts paid with respect to the agreements in the pool. Under this pooling method, the amount paid with respect to each agreement included in the pool is equal to the average amount paid with respect to all agreements included in the pool. A taxpayer computes the average amount paid with respect to all agreements included in the pool by dividing the sum of all amounts paid with respect to all agreements included in the pool by the number of agreements included in the pool. See paragraph (h) of this section for additional rules relating to pooling.

(vi) *Exception for lessee construction allowances.* Paragraph (d)(6)(i) of this section does not apply to amounts paid by a lessor to a lessee as a construction allowance to the extent the lessee expends the amount for the tangible property that is owned by the lessor for Federal income tax purposes (see, for example, section 110).

(vii) *Examples.* The following examples illustrate the rules of this paragraph (d)(6):

Example 1. New lease agreement. V seeks to lease commercial property in a prominent downtown location of city R. V pays Z, the owner of the commercial property, \$50,000 in exchange for Z entering into a 10-year lease with V. V's payment is an amount paid to another party to enter into an agreement providing V the right to use tangible property. Because the \$50,000 payment exceeds \$5,000, no portion of the amount paid to Z is *de minimis* for purposes of paragraph (d)(6)(v) of this section. Under paragraph (d)(6)(i)(A) of this section, V must capitalize the entire \$50,000 payment.

Example 2. Modification of lease agreement. Partnership Y leases a piece of equipment for use in its business from Z corporation. When the lease has a remaining term of 3 years, Y requests that Z modify the existing lease by extending the remaining term by 5 years. Y pays \$50,000 to Z in exchange for Z's agreement to modify the existing lease. Y's payment of \$50,000 is an amount paid to another party to renegotiate an agreement providing Y the right to use property. Because the \$50,000 payment exceeds \$5,000, no portion of the amount paid to Z is *de minimis* for purposes of paragraph (d)(6)(v) of this section. Under paragraph (d)(6)(i)(A) of this section, Y must capitalize the entire \$50,000 payment.

Example 3. Modification of lease agreement. In 2004, R enters into a 5-year, non-cancelable lease of a mainframe computer for use in its business. R subsequently determines that the mainframe computer that R is leasing is no longer adequate for its needs. In 2006, R and P corporation (the lessor) agree to terminate the 2004 lease and to enter into a new 5-year lease for a different and more powerful mainframe computer. R pays P a \$75,000 early termination fee. P would not have agreed to terminate the 2004 lease unless R agreed to enter into the 2006 lease. R's payment of \$75,000 is an amount paid to another party to renegotiate an agreement providing R the right to use property. Because the \$75,000 payment exceeds \$5,000, no portion of the amount paid to P is *de minimis* for purposes of paragraph (d)(6)(v) of this section. Under paragraph (d)(6)(i)(A) of this section, R must capitalize the entire \$75,000 payment.

Example 4. Modification of lease agreement. Same as *Example 3*, except the 2004 lease agreement allows R to terminate the lease at any time subject to a \$75,000 early termination fee. Because R can terminate the lease without P's approval, R's payment of \$75,000 is not an amount paid to another party to renegotiate an agreement. Accordingly, R is not required to capitalize the \$75,000 payment under this paragraph (d)(6).

Example 5. Modification of lease agreement. Same as *Example 4*, except P agreed to reduce the early termination fee to \$60,000. Because R did not pay an amount to renegotiate the early termination fee, R's payment of \$60,000 is not an amount paid to another party to renegotiate an agreement. Accordingly, R is not required to capitalize the \$60,000 payment under this paragraph (d)(6).

Example 6. Covenant not to compete. R corporation enters into an agreement with A, an individual, that prohibits A from competing with R for a period of three years. To encourage A to enter into the agreement, R agrees to pay A \$100,000 upon the signing of the agreement. R's payment is an amount paid to another party to enter into a covenant not to compete. Because the \$100,000 payment exceeds \$5,000, no portion of the amount paid to A is *de minimis* for purposes of paragraph (d)(6)(v) of this section. Under paragraph (d)(6)(i)(C) of this section, R must capitalize the entire \$100,000 payment.

Example 7. Standstill agreement. During 2004 through 2005, X corporation acquires a large minority interest in the stock of Z corporation. To ensure that X does not take control of Z, Z pays X \$5,000,000 for a standstill agreement under which X agrees not to acquire any more stock in Z for a period of 10 years. Z's payment is an amount paid to another party to enter into an agreement not to acquire additional ownership interests in Z. Because the \$5,000,000 payment exceeds \$5,000, no portion of the amount paid to X is

de minimis for purposes of paragraph (d)(6)(v) of this section. Under paragraph (d)(6)(i)(D) of this section, Z must capitalize the entire \$5,000,000 payment.

Example 8. Signing bonus. Employer B pays a \$25,000 signing bonus to employee C to induce C to come to work for B. C can leave B's employment at any time to work for a competitor of B and is not required to repay the \$25,000 bonus to B. Because C is not economically compelled to continue his employment with B, B's payment does not provide B the right to receive services from C. Accordingly, B is not required to capitalize the \$25,000 payment.

Example 9. Renewal. In 2000, M corporation and N corporation enter into a 5-year agreement that gives M the right to manage N's investment portfolio. In 2005, N has the option of renewing the agreement for another three years. During 2004, M pays \$10,000 to send several employees of N to an investment seminar. M pays the \$10,000 to help develop and maintain its business relationship with N with the expectation that N will renew its agreement with M in 2005. Because M's payment is not contingent on N agreeing to renew the agreement, M's payment is not an amount paid to renew an agreement under paragraph (d)(6)(ii) of this section and is not required to be capitalized.

Example 10. De minimis payments. X corporation is engaged in the business of providing wireless telecommunications services to customers. To induce customer B to enter into a 3-year non-cancelable telecommunications contract, X provides B with a free wireless telephone. The fair market value of the wireless telephone is \$300 at the time it is provided to B. X's provision of a wireless telephone to B is an amount paid to B to induce B to enter into an agreement providing X the right to provide services, as described in paragraph (d)(6)(i)(B) of this section. Because the amount of the inducement is \$300, the amount of the inducement is *de minimis* under paragraph (d)(6)(v) of this section. Accordingly, X is not required to capitalize the amount of the inducement provided to B.

(7) Certain contract terminations—(i) In general. A taxpayer must capitalize amounts paid to another party to terminate—

(A) A lease of real or tangible personal property between the taxpayer (as lessor) and that party (as lessee);

(B) An agreement that grants that party the exclusive right to acquire or use the taxpayer's property or services or to conduct the taxpayer's business (other than an intangible described in paragraph (c)(1)(i) through (iv) of this

section or a financial interest described in paragraph (d)(2) of this section); or

(C) An agreement that prohibits the taxpayer from competing with that party or from acquiring property or services from a competitor of that party.

(ii) *Certain break-up fees.* Paragraph (d)(7)(i) of this section does not apply to the termination of a transaction described in § 1.263(a)-5(a) (relating to an acquisition of a trade or business, a change in the capital structure of a business entity, and certain other transactions). See § 1.263(a)-5(c)(8) for rules governing the treatment of amounts paid to terminate a transaction to which that section applies.

(iii) *Examples.* The following examples illustrate the rules of this paragraph (d)(7):

Example 1. Termination of exclusive license agreement. On July 1, 2005, N enters into a license agreement with R corporation under which N grants R the exclusive right to manufacture and distribute goods using N's design and trademarks for a period of 10 years. On June 30, 2007, N pays R \$5,000,000 in exchange for R's agreement to terminate the exclusive license agreement. N's payment to terminate its license agreement with R constitutes a payment to terminate an exclusive license to use the taxpayer's property, as described in paragraph (d)(7)(i)(B) of this section. Accordingly, N must capitalize its \$5,000,000 payment to R.

Example 2. Termination of exclusive distribution agreement. On March 1, 2005, L, a manufacturer, enters into an agreement with M granting M the right to be the sole distributor of L's products in state X for 10 years. On July 1, 2008, L pays M \$50,000 in exchange for M's agreement to terminate the distribution agreement. L's payment to terminate its agreement with M constitutes a payment to terminate an exclusive right to acquire L's property, as described in paragraph (d)(7)(i)(B) of this section. Accordingly, L must capitalize its \$50,000 payment to M.

Example 3. Termination of covenant not to compete. On February 1, 2005, Y corporation enters into a covenant not to compete with Z corporation that prohibits Y from competing with Z in city V for a period of 5 years. On January 31, 2007, Y pays Z \$1,000,000 in exchange for Z's agreement to terminate the covenant not to compete. Y's payment to terminate the covenant not to compete with Z constitutes a payment to terminate an agreement that prohibits Y from competing with Z, as described in paragraph (d)(7)(i)(C)

of this section. Accordingly, Y must capitalize its \$1,000,000 payment to Z.

Example 4. Termination of merger agreement. N corporation and U corporation enter into an agreement under which N agrees to merge into U. Subsequently, N pays U \$10,000,000 to terminate the merger agreement. As provided in paragraph (d)(7)(ii) of this section, N's \$10,000,000 payment to terminate the merger agreement with U is not required to be capitalized under this paragraph (d)(7). In addition, N's \$10,000,000 does not create a separate and distinct intangible asset for N within the meaning of paragraph (b)(3)(i) of this section. (See § 1.263(a)-5 for additional rules regarding termination of merger agreements).

(8) *Certain benefits arising from the provision, production, or improvement of real property—(i) In general.* A taxpayer must capitalize amounts paid for real property if the taxpayer transfers ownership of the real property to another person (except to the extent the real property is sold for fair market value) and if the real property can reasonably be expected to produce significant economic benefits to the taxpayer after the transfer. A taxpayer also must capitalize amounts paid to produce or improve real property owned by another (except to the extent the taxpayer is selling services at fair market value to produce or improve the real property) if the real property can reasonably be expected to produce significant economic benefits for the taxpayer.

(ii) *Exclusions.* A taxpayer is not required to capitalize an amount under paragraph (d)(8)(i) of this section if the taxpayer transfers real property or pays an amount to produce or improve real property owned by another in exchange for services, the purchase or use of property, or the creation of an intangible described in paragraph (d) of this section (other than in this paragraph (d)(8)). The preceding sentence does not apply to the extent the taxpayer does not receive fair market value consideration for the real property that is relinquished or for the amounts that are paid by the taxpayer to produce or improve real property owned by another.

(iii) *Real property.* For purposes of this paragraph (d)(8), real property includes property that is affixed to real property and that will ordinarily remain affixed for an indefinite period of time, such as roads, bridges, tunnels,

pavements, wharves and docks, breakwaters and sea walls, elevators, power generation and transmission facilities, and pollution control facilities.

(iv) *Impact fees and dedicated improvements.* Paragraph (d)(8)(i) of this section does not apply to amounts paid to satisfy one-time charges imposed by a State or local government against new development (or expansion of existing development) to finance specific offsite capital improvements for general public use that are necessitated by the new or expanded development. In addition, paragraph (d)(8)(i) of this section does not apply to amounts paid for real property or improvements to real property constructed by the taxpayer where the real property or improvements benefit new development or expansion of existing development, are immediately transferred to a State or local government for dedication to the general public use, and are maintained by the State or local government. See section 263A and the regulations thereunder for capitalization rules that apply to amounts referred to in this paragraph (d)(8)(iv).

(v) *Examples.* The following examples illustrate the rules of this paragraph (d)(8):

Example 1. Amount paid to produce real property owned by another. W corporation operates a quarry on the east side of a river in city Z and a crusher on the west side of the river. City Z's existing bridges are of insufficient capacity to be traveled by trucks in transferring stone from W's quarry to its crusher. As a result, the efficiency of W's operations is greatly reduced. W contributes \$1,000,000 to city Z to defray in part the cost of constructing a publicly owned bridge capable of accommodating W's trucks. W's payment to city Z is an amount paid to produce or improve real property (within the meaning of paragraph (d)(8)(iii) of this section) that can reasonably be expected to produce significant economic benefits for W. Under paragraph (d)(8)(i) of this section, W must capitalize the \$1,000,000 paid to city Z.

Example 2. Transfer of real property to another. K corporation, a shipping company, uses smaller vessels to unload its ocean-going vessels at port X. There is no natural harbor at port X, and during stormy weather the transfer of freight between K's ocean vessels and port X is extremely difficult and sometimes impossible, which can be very costly to K. Consequently, K constructs a short breakwater at a cost of \$50,000. The short breakwater, however, is inadequate, so

K persuades the port authority to build a larger breakwater that will allow K to unload its vessels at any time of the year and during all kinds of weather. K contributes the short breakwater and pays \$200,000 to the port authority for use in building the larger breakwater. Because the transfer of the small breakwater and \$200,000 is reasonably expected to produce significant economic benefits for K, K must capitalize both the adjusted basis of the small breakwater (determined at the time the small breakwater is contributed) and the \$200,000 payment under this paragraph (d)(8).

Example 3. Dedicated improvements. X corporation is engaged in the development and sale of residential real estate. In connection with a residential real estate project under construction by X in city Z, X is required by city Z to construct ingress and egress roads to and from its project and immediately transfer the roads to city Z for dedication to general public use. The roads will be maintained by city Z. X pays its subcontractor \$100,000 to construct the ingress and egress roads. X's payment is a dedicated improvement within the meaning of paragraph (d)(8)(iv) of this section. Accordingly, X is not required to capitalize the \$100,000 payment under this paragraph (d)(8). See section 263A and the regulations thereunder for capitalization rules that apply to amounts referred to in paragraph (d)(8)(iv) of this section.

(9) *Defense or perfection of title to intangible property*—(i) *In general.* A taxpayer must capitalize amounts paid to another party to defend or perfect title to intangible property if that other party challenges the taxpayer's title to the intangible property.

(ii) *Certain break-up fees.* Paragraph (d)(9)(i) of this section does not apply to the termination of a transaction described in § 1.263(a)-5(a) (relating to an acquisition of a trade or business, a change in the capital structure of a business entity, and certain other transactions). See § 1.263(a)-5 for rules governing the treatment of amounts paid to terminate a transaction to which that section applies. Paragraph (d)(9)(i) of this section also does not apply to an amount paid to another party to terminate an agreement that grants that party the right to purchase the taxpayer's intangible property.

(iii) *Example.* The following example illustrates the rules of this paragraph (d)(9):

Example. Defense of title. R corporation claims to own an exclusive patent on a particular technology. U corporation brings a lawsuit against R, claiming that U is the true owner of the patent and that R stole the technology from U. The sole issue in the suit involves the validity of R's patent. R chooses to settle the suit by paying U \$100,000 in exchange for U's release of all future claim to the patent. R's payment to U is an amount paid to defend or perfect title to intangible property under paragraph (d)(9) of this section and must be capitalized.

(e) *Transaction costs*—(1) *Scope of facilitate*—(i) *In general.* Except as otherwise provided in this section, an amount is paid to facilitate the acquisition or creation of an intangible (the transaction) if the amount is paid in the process of investigating or otherwise pursuing the transaction. Whether an amount is paid in the process of investigating or otherwise pursuing the transaction is determined based on all of the facts and circumstances. In determining whether an amount is paid to facilitate a transaction, the fact that the amount would (or would not) have been paid but for the transaction is relevant, but is not determinative. An amount paid to determine the value or price of an intangible is an amount paid in the process of investigating or otherwise pursuing the transaction.

(ii) *Treatment of termination payments.* An amount paid to terminate (or facilitate the termination of) an existing agreement does not facilitate the acquisition or creation of another agreement under this section. See paragraph (d)(6)(iii) of this section for the treatment of termination fees paid to the other party (or parties) of a renegotiated agreement.

(iii) *Special rule for contracts.* An amount is treated as not paid in the process of investigating or otherwise pursuing the creation of an agreement described in paragraph (d)(2) or (d)(6) of this section if the amount relates to activities performed before the earlier of the date the taxpayer begins preparing its bid for the agreement or the date the taxpayer begins discussing or negotiating the agreement with another party to the agreement.

(iv) *Borrowing costs.* An amount paid to facilitate a borrowing does not facilitate an acquisition or creation of an intangible described in paragraphs

(b)(1)(i) through (iv) of this section. See §§1.263(a)-5 and 1.446-5 for the treatment of an amount paid to facilitate a borrowing.

(v) *Special rule for stock redemption costs of open-end regulated investment companies.* An amount paid by an open-end regulated investment company (within the meaning of section 851) to facilitate a redemption of its stock is treated as an amount that does not facilitate the acquisition of an intangible under this section.

(2) *Coordination with paragraph (d) of this section.* In the case of an amount paid to facilitate the creation of an intangible described in paragraph (d) of this section, the provisions of this paragraph (e) apply regardless of whether a payment described in paragraph (d) is made.

(3) *Transaction.* For purposes of this section, the term *transaction* means all of the factual elements comprising an acquisition or creation of an intangible and includes a series of steps carried out as part of a single plan. Thus, a transaction can involve more than one invoice and more than one intangible. For example, a purchase of intangibles under one purchase agreement constitutes a single transaction, notwithstanding the fact that the acquisition involves multiple intangibles and the amounts paid to facilitate the acquisition are capable of being allocated among the various intangibles acquired.

(4) *Simplifying conventions*—(i) *In general.* For purposes of this section, employee compensation (within the meaning of paragraph (e)(4)(ii) of this section), overhead, and *de minimis* costs (within the meaning of paragraph (e)(4)(iii) of this section) are treated as amounts that do not facilitate the acquisition or creation of an intangible.

(ii) *Employee compensation*—(A) *In general.* The term *employee compensation* means compensation (including salary, bonuses and commissions) paid to an employee of the taxpayer. For purposes of this section, whether an individual is an employee is determined in accordance with the rules contained in section 3401(c) and the regulations thereunder.

(B) *Certain amounts treated as employee compensation.* For purposes of

this section, a guaranteed payment to a partner in a partnership is treated as employee compensation. For purposes of this section, annual compensation paid to a director of a corporation is treated as employee compensation. For example, an amount paid to a director of a corporation for attendance at a regular meeting of the board of directors (or committee thereof) is treated as employee compensation for purposes of this section. However, an amount paid to a director for attendance at a special meeting of the board of directors (or committee thereof) is not treated as employee compensation. An amount paid to a person that is not an employee of the taxpayer (including the employer of the individual who performs the services) is treated as employee compensation for purposes of this section only if the amount is paid for secretarial, clerical, or similar administrative support services. In the case of an affiliated group of corporations filing a consolidated Federal income tax return, a payment by one member of the group to a second member of the group for services performed by an employee of the second member is treated as employee compensation if the services provided by the employee are provided at a time during which both members are affiliated.

(iii) *De minimis costs*—(A) *In general.* Except as provided in paragraph (e)(4)(iii)(B) of this section, the term *de minimis costs* means amounts (other than employee compensation and overhead) paid in the process of investigating or otherwise pursuing a transaction if, in the aggregate, the amounts do not exceed \$5,000 (or such greater amount as may be set forth in published guidance). If the amounts exceed \$5,000 (or such greater amount as may be set forth in published guidance), none of the amounts are *de minimis costs* within the meaning of this paragraph (e)(4)(iii)(A). For purposes of this paragraph (e)(4)(iii), an amount paid in the form of property is valued at its fair market value at the time of the payment. In determining the amount of transaction costs paid in the process of investigating or otherwise pursuing a transaction, a taxpayer generally must account for the specific costs paid with respect to each trans-

action. However, a taxpayer that reasonably expects to enter into at least 25 similar transactions during the taxable year may establish a pool of similar transactions for purposes of determining the amount of transaction costs paid in the process of investigating or otherwise pursuing the transactions in the pool. Under this pooling method, the amount of transaction costs paid in the process of investigating or otherwise pursuing each transaction included in the pool is equal to the average transaction costs paid in the process of investigating or otherwise pursuing all transactions included in the pool. A taxpayer computes the average transaction costs paid in the process of investigating or otherwise pursuing all transactions included in the pool by dividing the sum of all transaction costs paid in the process of investigating or otherwise pursuing all transactions included in the pool by the number of transactions included in the pool. See paragraph (h) of this section for additional rules relating to pooling.

(B) *Treatment of commissions.* The term *de minimis costs* does not include commissions paid to facilitate the acquisition of an intangible described in paragraphs (c)(1)(i) through (v) of this section or to facilitate the creation, origination, entrance into, renewal or renegotiation of an intangible described in paragraph (d)(2)(i) of this section.

(iv) *Election to capitalize.* A taxpayer may elect to treat employee compensation, overhead, or *de minimis costs* paid in the process of investigating or otherwise pursuing a transaction as amounts that facilitate the transaction. The election is made separately for each transaction and applies to employee compensation, overhead, or *de minimis costs*, or to any combination thereof. For example, a taxpayer may elect to treat overhead and *de minimis costs*, but not employee compensation, as amounts that facilitate the transaction. A taxpayer makes the election by treating the amounts to which the election applies as amounts that facilitate the transaction in the taxpayer's timely filed original Federal income tax return (including extensions) for the taxable year during which the

amounts are paid. In the case of an affiliated group of corporations filing a consolidated return, the election is made separately with respect to each member of the group, and not with respect to the group as a whole. In the case of an S corporation or partnership, the election is made by the S corporation or by the partnership, and not by the shareholders or partners. An election made under this paragraph (e)(4)(iv) is revocable with respect to each taxable year for which made only with the consent of the Commissioner.

(5) *Examples.* The following examples illustrate the rules of this paragraph (e):

Example 1. Costs to facilitate. In December 2005, R corporation, a calendar year taxpayer, enters into negotiations with X corporation to lease commercial property from X for a period of 25 years. R pays A, its outside legal counsel, \$4,000 in December 2005 for services rendered by A during December in assisting with negotiations with X. In January 2006, R and X finalize the terms of the lease and execute the lease agreement. R pays B, another of its outside legal counsel, \$2,000 in January 2006 for services rendered by B during January in drafting the lease agreement. The agreement between R and X is an agreement providing R the right to use property, as described in paragraph (d)(6)(i)(A) of this section. R's payments to its outside counsel are amounts paid to facilitate the creation of the agreement. As provided in paragraph (e)(4)(iii)(A) of this section, R must aggregate its transaction costs for purposes of determining whether the transaction costs are *de minimis*. Because R's aggregate transaction costs exceed \$5,000, R's transaction costs are not *de minimis* costs within the meaning of paragraph (e)(4)(iii)(A) of this section. Accordingly, R must capitalize the \$4,000 paid to A and the \$2,000 paid to B under paragraph (b)(1)(v) of this section.

Example 2. Costs to facilitate. Partnership X leases its manufacturing equipment from Y corporation under a 10-year lease. During 2005, when the lease has a remaining term of 4 years, X enters into a written agreement with Z corporation, a competitor of Y, under which X agrees to lease its manufacturing equipment from Z, subject to the condition that X first successfully terminates its lease with Y. X pays Y \$50,000 in exchange for Y's agreement to terminate the equipment lease. Under paragraph (e)(1)(ii), X's \$50,000 payment does not facilitate the creation of the new lease with Z. In addition, X's \$50,000 payment does not terminate an agreement described in paragraph (d)(7) of this section. Accordingly, X is not required to capitalize

the \$50,000 termination payment under this section.

Example 3. Costs to facilitate. W corporation enters into a lease agreement with X corporation under which W agrees to lease property to X for a period of 5 years. W pays its outside counsel \$7,000 for legal services rendered in drafting the lease agreement and negotiating with X. The agreement between W and X is an agreement providing W the right to be compensated for the use of property, as described in paragraph (d)(6)(i)(A) of this section. Under paragraph (e)(1)(i) of this section, W's payment to its outside counsel is an amount paid to facilitate the creation of that agreement. As provided by paragraph (e)(2) of this section, W must capitalize its \$7,000 payment to outside counsel notwithstanding the fact that W made no payment described in paragraph (d)(6)(i) of this section.

Example 4. Costs to facilitate. U corporation, which owns a majority of the common stock of T corporation, votes its controlling interest in favor of a perpetual extension of T's charter. M, a minority shareholder in T, votes against the extension. Under applicable state law, U is required to purchase the stock of T held by M. When U and M are unable to agree on the value of M's shares, U brings an action in state court to appraise the value of M's stock interest. U pays attorney, accountant and appraisal fees of \$25,000 for services rendered in connection with the negotiation and litigation with M. Because U's attorney, accountant and appraisal costs help establish the purchase price of M's stock, U's \$25,000 payment facilitates the acquisition of stock. Accordingly, U must capitalize the \$25,000 payment under paragraph (b)(1)(v) of this section.

Example 5. Costs to facilitate. For several years, H corporation has provided services to J corporation whenever requested by J. H wants to enter into a multiple-year contract with J that would give H the right to provide services to J. On June 10, 2004, H starts to prepare a bid to provide services to J and pays a consultant \$15,000 to research potential competitors. On August 10, 2004, H raises the possibility of a multi-year contract with J. On October 10, 2004, H and J enter into a contract giving H the right to provide services to J for five years. During 2004, H pays \$7,000 to travel to the city in which J's offices are located to continue providing services to J under their prior arrangement and pays \$6,000 for travel to the city in which J's offices are located to further develop H's business relationship with J (for example, to introduce new employees, update J on current developments and take J's executives to dinner). H also pays \$8,000 for travel costs to meet with J to discuss and negotiate the contract. Because the contract gives H the

right to provide services to J, H must capitalize amounts paid to facilitate the creation of the contract. The \$7,000 of travel expenses paid to provide services to J under their prior arrangement does not facilitate the creation of the contract and is not required to be capitalized, regardless of when the travel occurs. The \$6,000 of travel expenses paid to further develop H's business relationship with J is paid in the process of pursuing the contract (and therefore must be capitalized) only to the extent the expenses relate to travel on or after June 10, 2004 (the date H begins to prepare a bid) and before October 11, 2004 (the date after H and J enter into the contract). The \$8,000 of travel expenses paid to meet with J to discuss and negotiate the contract is paid in the process of pursuing the contract and must be capitalized. The \$15,000 of consultant fees is paid to investigate the contract and also must be capitalized.

Example 6. Costs that do not facilitate. X corporation brings a legal action against Y corporation to recover lost profits resulting from Y's alleged infringement of X's copyright. Y does not challenge X's copyright, but argues that it did not infringe upon X's copyright. X pays its outside counsel \$25,000 for legal services rendered in pursuing the suit against Y. Because X's title to its copyright is not in question, X's action against Y does not involve X's defense or perfection of title to intangible property. Thus, the amount paid to outside counsel does not facilitate the creation of an intangible described in paragraph (d)(9) of this section. Accordingly, X is not required to capitalize its \$25,000 payment under this section.

Example 7. De minimis rule. W corporation, a commercial bank, acquires a portfolio containing 100 loans from Y corporation. As part of the acquisition, W pays an independent appraiser a fee of \$10,000 to appraise the portfolio. The fee is an amount paid to facilitate W's acquisition of an intangible. The acquisition of the loan portfolio is a single transaction within the meaning of paragraph (e)(3) of this section. Because the amount paid to facilitate the transaction exceeds \$5,000, the amount is not *de minimis* as defined in paragraph (e)(4)(iii)(A) of this section. Accordingly, W must capitalize the \$10,000 fee under paragraph (b)(1)(v) of this section.

Example 8. Compensation and overhead. P corporation, a commercial bank, maintains a loan acquisition department whose sole function is to acquire loans from other financial institutions. As provided in paragraph (e)(4)(i) of this section, P is not required to capitalize any portion of the compensation paid to the employees in its loan acquisition department or any portion of its overhead allocable to the loan acquisition department.

(f) *12-month rule*—(1) *In general.* Except as otherwise provided in this paragraph (f), a taxpayer is not required to capitalize under this section amounts paid to create (or to facilitate the creation of) any right or benefit for the taxpayer that does not extend beyond the earlier of—

(i) 12 months after the first date on which the taxpayer realizes the right or benefit; or

(ii) The end of the taxable year following the taxable year in which the payment is made.

(2) *Duration of benefit for contract terminations.* For purposes of this paragraph (f), amounts paid to terminate a contract or other agreement described in paragraph (d)(7)(i) of this section prior to its expiration date (or amounts paid to facilitate such termination) create a benefit for the taxpayer that lasts for the unexpired term of the agreement immediately before the date of the termination. If the terms of a contract or other agreement described in paragraph (d)(7)(i) of this section permit the taxpayer to terminate the contract or agreement after a notice period, amounts paid by the taxpayer to terminate the contract or agreement before the end of the notice period create a benefit for the taxpayer that lasts for the amount of time by which the notice period is shortened.

(3) *Inapplicability to created financial interests and self-created amortizable section 197 intangibles.* Paragraph (f)(1) of this section does not apply to amounts paid to create (or facilitate the creation of) an intangible described in paragraph (d)(2) of this section (relating to amounts paid to create financial interests) or to amounts paid to create (or facilitate the creation of) an intangible that constitutes an amortizable section 197 intangible within the meaning of section 197(c).

(4) *Inapplicability to rights of indefinite duration.* Paragraph (f)(1) of this section does not apply to amounts paid to create (or facilitate the creation of) an intangible of indefinite duration. A right has an indefinite duration if it has no period of duration fixed by agreement or by law, or if it is not based on a period of time, such as a right attributable to an agreement to provide or receive a fixed amount of

goods or services. For example, a license granted by a governmental agency that permits the taxpayer to operate a business conveys a right of indefinite duration if the license may be revoked only upon the taxpayer's violation of the terms of the license.

(5) *Rights subject to renewal*—(i) *In general.* For purposes of paragraph (f)(1) of this section, the duration of a right includes any renewal period if all of the facts and circumstances in existence during the taxable year in which the right is created indicate a reasonable expectancy of renewal.

(ii) *Reasonable expectancy of renewal.* The following factors are significant in determining whether there exists a reasonable expectancy of renewal:

(A) *Renewal history.* The fact that similar rights are historically renewed is evidence of a reasonable expectancy of renewal. On the other hand, the fact that similar rights are rarely renewed is evidence of a lack of a reasonable expectancy of renewal. Where the taxpayer has no experience with similar rights, or where the taxpayer holds similar rights only occasionally, this factor is less indicative of a reasonable expectancy of renewal.

(B) *Economics of the transaction.* The fact that renewal is necessary for the taxpayer to earn back its investment in the right is evidence of a reasonable expectancy of renewal. For example, if a taxpayer pays \$14,000 to enter into a renewable contract with an initial 9-month term that is expected to generate income to the taxpayer of \$1,000 per month, the fact that renewal is necessary for the taxpayer to earn back its \$14,000 payment is evidence of a reasonable expectancy of renewal.

(C) *Likelihood of renewal by other party.* Evidence that indicates a likelihood of renewal by the other party to a right, such as a bargain renewal option or similar arrangement, is evidence of a reasonable expectancy of renewal. However, the mere fact that the other party will have the opportunity to renew on the same terms as are available to others is not evidence of a reasonable expectancy of renewal.

(D) *Terms of renewal.* The fact that material terms of the right are subject to renegotiation at the end of the initial term is evidence of a lack of a rea-

sonable expectancy of renewal. For example, if the parties to an agreement must renegotiate price or amount, the renegotiation requirement is evidence of a lack of a reasonable expectancy of renewal.

(E) *Terminations.* The fact that similar rights are typically terminated prior to renewal is evidence of a lack of a reasonable expectancy of renewal.

(iii) *Safe harbor pooling method.* In lieu of applying the reasonable expectancy of renewal test described in paragraph (f)(5)(ii) of this section to each separate right created during a taxable year, a taxpayer that reasonably expects to enter into at least 25 similar rights during the taxable year may establish a pool of similar rights for which the initial term does not extend beyond the period prescribed in paragraph (f)(1) of this section and may elect to apply the reasonable expectancy of renewal test to that pool. See paragraph (h) of this section for additional rules relating to pooling. The application of paragraph (f)(1) of this section to each pool is determined in the following manner:

(A) All amounts (except *de minimis* costs described in paragraph (d)(6)(v) of this section) paid to create the rights included in the pool and all amounts paid to facilitate the creation of the rights included in the pool are aggregated.

(B) If less than 20 percent of the rights in the pool are reasonably expected to be renewed beyond the period prescribed in paragraph (f)(1) of this section, all rights in the pool are treated as having a duration that does not extend beyond the period prescribed in paragraph (f)(1) of this section, and the taxpayer is not required to capitalize under this section any portion of the aggregate amount described in paragraph (f)(5)(iii)(A) of this section.

(C) If more than 80 percent of the rights in the pool are reasonably expected to be renewed beyond the period prescribed in paragraph (f)(1) of this section, all rights in the pool are treated as having a duration that extends beyond the period prescribed in paragraph (f)(1) of this section, and the taxpayer is required to capitalize under

this section the aggregate amount described in paragraph (f)(5)(iii)(A) of this section.

(D) If 20 percent or more, but 80 percent or less, of the rights in the pool are reasonably expected to be renewed beyond the period prescribed in paragraph (f)(1) of this section, the aggregate amount described in paragraph (f)(5)(iii)(A) of this section is multiplied by the percentage of the rights in the pool that are reasonably expected to be renewed beyond the period prescribed in paragraph (f)(1) of this section and the taxpayer must capitalize the resulting amount under this section by treating such amount as creating a separate intangible. The amount determined by multiplying the aggregate amount described in paragraph (f)(5)(iii)(A) of this section by the percentage of rights in the pool that are not reasonably expected to be renewed beyond the period prescribed in paragraph (f)(1) of this section is not required to be capitalized under this section.

(6) *Coordination with section 461.* In the case of a taxpayer using an accrual method of accounting, the rules of this paragraph (f) do not affect the determination of whether a liability is incurred during the taxable year, including the determination of whether economic performance has occurred with respect to the liability. See § 1.461-4 for rules relating to economic performance.

(7) *Election to capitalize.* A taxpayer may elect not to apply the rule contained in paragraph (f)(1) of this section. An election made under this paragraph (f)(7) applies to all similar transactions during the taxable year to which paragraph (f)(1) of this section would apply (but for the election under this paragraph (f)(7)). For example, a taxpayer may elect under this paragraph (f)(7) to capitalize its costs of prepaying insurance contracts for 12 months, but may continue to apply the rule in paragraph (f)(1) to its costs of entering into non-renewable, 12-month service contracts. A taxpayer makes the election by treating the amounts as capital expenditures in its timely filed original federal income tax return (including extensions) for the taxable year during which the amounts are

paid. In the case of an affiliated group of corporations filing a consolidated return, the election is made separately with respect to each member of the group, and not with respect to the group as a whole. In the case of an S corporation or partnership, the election is made by the S corporation or by the partnership, and not by the shareholders or partners. An election made under this paragraph (f)(7) is revocable with respect to each taxable year for which made only with the consent of the Commissioner.

(8) *Examples.* The rules of this paragraph (f) are illustrated by the following examples, in which it is assumed (unless otherwise stated) that the taxpayer is a calendar year, accrual method taxpayer that does not have a short taxable year in any taxable year and has not made an election under paragraph (f)(7) of this section:

Example 1. Prepaid expenses. On December 1, 2005, N corporation pays a \$10,000 insurance premium to obtain a property insurance policy (with no cash value) with a 1-year term that begins on February 1, 2006. The amount paid by N is a prepaid expense described in paragraph (d)(3) of this section and not paragraph (d)(2) of this section. Because the right or benefit attributable to the \$10,000 payment extends beyond the end of the taxable year following the taxable year in which the payment is made, the 12-month rule provided by this paragraph (f) does not apply. N must capitalize the \$10,000 payment.

Example 2. Prepaid expenses. (i) Assume the same facts as in *Example 1*, except that the policy has a term beginning on December 15, 2005. The 12-month rule of this paragraph (f) applies to the \$10,000 payment because the right or benefit attributable to the payment neither extends more than 12 months beyond December 15, 2005 (the first date the benefit is realized by the taxpayer) nor beyond the end of the taxable year following the taxable year in which the payment is made. Accordingly, N is not required to capitalize the \$10,000 payment.

(ii) Alternatively, assume N capitalizes prepaid expenses for financial accounting and reporting purposes and elects under paragraph (f)(7) of this section not to apply the 12-month rule contained in paragraph (f)(1) of this section. N must capitalize the \$10,000 payment for Federal income tax purposes.

Example 3. Financial interests. On October 1, 2005, X corporation makes a 9-month loan to B in the principal amount of \$250,000. The

principal amount of the loan to B constitutes an amount paid to create or originate a financial interest under paragraph (d)(2)(i)(B) of this section. The 9-month term of the loan does not extend beyond the period prescribed by paragraph (f)(1) of this section. However, as provided by paragraph (f)(3) of this section, the rules of this paragraph (f) do not apply to intangibles described in paragraph (d)(2) of this section. Accordingly, X must capitalize the \$250,000 loan amount.

Example 4. Financial interests. X corporation owns all of the outstanding stock of Z corporation. On December 1, 2005, Y corporation pays X \$1,000,000 in exchange for X's grant of a 9-month call option to Y permitting Y to purchase all of the outstanding stock of Z. Y's payment to X constitutes an amount paid to create or originate an option with X under paragraph (d)(2)(i)(C)(7) of this section. The 9-month term of the option does not extend beyond the period prescribed by paragraph (f)(1) of this section. However, as provided by paragraph (f)(3) of this section, the rules of this paragraph (f) do not apply to intangibles described in paragraph (d)(2) of this section. Accordingly, Y must capitalize the \$1,000,000 payment.

Example 5. License. (i) On July 1, 2005, R corporation pays \$10,000 to state X to obtain a license to operate a business in state X for a period of 5 years. The terms of the license require R to pay state X an annual fee of \$500 due on July 1, 2005, and each of the succeeding four years. R pays the \$500 fee on July 1 as required by the license.

(ii) R's payment of \$10,000 is an amount paid to a governmental agency for a license granted by that agency to which paragraph (d)(5) of this section applies. Because R's payment creates rights or benefits for R that extend beyond 12 months after the first date on which R realizes the rights or benefits attributable to the payment and beyond the end of 2006 (the taxable year following the taxable year in which the payment is made), the rules of this paragraph (f) do not apply to R's payment. Accordingly, R must capitalize the \$10,000 payment.

(iii) R's payment of each \$500 annual fee is a prepaid expense described in paragraph (d)(3) of this section. R is not required to capitalize the \$500 fee in each taxable year. The rules of this paragraph (f) apply to each such payment because each payment provides a right or benefit to R that does not extend beyond 12 months after the first date on which R realizes the rights or benefits attributable to the payment and does not extend beyond the end of the taxable year following the taxable year in which the payment is made.

Example 6. Lease. On December 1, 2005, W corporation enters into a lease agreement with X corporation under which W agrees to lease property to X for a period of 9 months,

beginning on December 1, 2005. W pays its outside counsel \$7,000 for legal services rendered in drafting the lease agreement and negotiating with X. The agreement between W and X is an agreement providing W the right to be compensated for the use of property, as described in paragraph (d)(6)(i)(A) of this section. W's \$7,000 payment to its outside counsel is an amount paid to facilitate W's creation of the lease as described in paragraph (e)(1)(i) of this section. The 12-month rule of this paragraph (f) applies to the \$7,000 payment because the right or benefit that the \$7,000 payment facilitates the creation of neither extends more than 12 months beyond December 1, 2005 (the first date the benefit is realized by the taxpayer) nor beyond the end of the taxable year following the taxable year in which the payment is made. Accordingly, W is not required to capitalize its payment to its outside counsel.

Example 7. Certain contract terminations. V corporation owns real property that it has leased to A for a period of 15 years. When the lease has a remaining unexpired term of 5 years, V and A agree to terminate the lease, enabling V to use the property in its trade or business. V pays A \$100,000 in exchange for A's agreement to terminate the lease. V's payment to A to terminate the lease is described in paragraph (d)(7)(i)(A) of this section. Under paragraph (f)(2) of this section, V's payment creates a benefit for V with a duration of 5 years, the remaining unexpired term of the lease as of the date of the termination. Because the benefit attributable to the expenditure extends beyond 12 months after the first date on which V realizes the rights or benefits attributable to the payment and beyond the end of the taxable year following the taxable year in which the payment is made, the rules of this paragraph (f) do not apply to the payment. V must capitalize the \$100,000 payment.

Example 8. Certain contract terminations. Assume the same facts as in *Example 7*, except that the lease is terminated when it has a remaining unexpired term of 10 months. Under paragraph (f)(2) of this section, V's payment creates a benefit for V with a duration of 10 months. The 12-month rule of this paragraph (f) applies to the payment because the benefit attributable to the payment neither extends more than 12 months beyond the date of termination (the first date the benefit is realized by V) nor beyond the end of the taxable year following the taxable year in which the payment is made. Accordingly, V is not required to capitalize the \$100,000 payment.

Example 9. Certain contract terminations. Assume the same facts as in *Example 7*, except that either party can terminate the lease upon 12 months notice. When the lease has a remaining unexpired term of 5 years, V wants to terminate the lease, however, V does not want to wait another 12 months. V pays A \$50,000 for the ability to terminate

§ 1.263(a)-4

26 CFR Ch. I (4-1-17 Edition)

the lease with one month's notice. V's payment to A to terminate the lease is described in paragraph (d)(7)(i)(A) of this section. Under paragraph (f)(2) of this section, V's payment creates a benefit for V with a duration of 11 months, the time by which the notice period is shortened. The 12-month rule of this paragraph (f) applies to V's \$50,000 payment because the benefit attributable to the payment neither extends more than 12 months beyond the date of termination (the first date the benefit is realized by V) nor beyond the end of the taxable year following the taxable year in which the payment is made. Accordingly, V is not required to capitalize the \$50,000 payment.

Example 10. Coordination with section 461. (i) U corporation leases office space from W corporation at a monthly rental rate of \$2,000. On August 1, 2005, U prepays its office rent expense for the first six months of 2006 in the amount of \$12,000. For purposes of this example, it is assumed that the recurring item exception provided by § 1.461-5 does not apply and that the lease between W and U is not a section 467 rental agreement as defined in section 467(d).

(ii) Under § 1.461-4(d)(3), U's prepayment of rent is a payment for the use of property by U for which economic performance occurs ratably over the period of time U is entitled to use the property. Accordingly, because economic performance with respect to U's prepayment of rent does not occur until 2006, U's prepaid rent is not incurred in 2005 and therefore is not properly taken into account through capitalization, deduction, or otherwise in 2005. Thus, the rules of this paragraph (f) do not apply to U's prepayment of its rent.

(iii) Alternatively, assume that U uses the cash method of accounting and the economic performance rules in § 1.461-4 therefore do not apply to U. The 12-month rule of this paragraph (f) applies to the \$12,000 payment because the rights or benefits attributable to U's prepayment of its rent do not extend beyond December 31, 2006. Accordingly, U is not required to capitalize its prepaid rent.

Example 11. Coordination with section 461. N corporation pays R corporation, an advertising and marketing firm, \$40,000 on August 1, 2005, for advertising and marketing services to be provided to N throughout calendar year 2006. For purposes of this example, it is assumed that the recurring item exception provided by § 1.461-5 does not apply. Under § 1.461-4(d)(2), N's payment arises out of the provision of services to N by R for which economic performance occurs as the services are provided. Accordingly, because economic performance with respect to N's prepaid advertising expense does not occur until 2006, N's prepaid advertising expense is not incurred in 2005 and therefore is not properly taken into account through capitalization, deduction, or otherwise in 2005. Thus, the

rules of this paragraph (f) do not apply to N's payment.

(g) *Treatment of capitalized costs*—(1) *In general.* An amount required to be capitalized by this section is not currently deductible under section 162. Instead, the amount generally is added to the basis of the intangible acquired or created. See section 1012.

(2) *Financial instruments.* In the case of a financial instrument described in paragraph (c)(1)(iii) or (d)(2)(i)(C) of this section, notwithstanding paragraph (g)(1) of this section, if under other provisions of law the amount required to be capitalized is not required to be added to the basis of the intangible acquired or created, then the other provisions of law will govern the tax treatment of the amount.

(h) *Special rules applicable to pooling*—(1) *In general.* Except as otherwise provided, the rules of this paragraph (h) apply to the pooling methods described in paragraph (d)(6)(v) of this section (relating to *de minimis* rules applicable to certain contract rights), paragraph (e)(4)(iii)(A) of this section (relating to *de minimis* rules applicable to transaction costs), and paragraph (f)(5)(iii) of this section (relating to the application of the 12-month rule to renewable rights).

(2) *Method of accounting.* A pooling method authorized by this section constitutes a method of accounting for purposes of section 446. A taxpayer that adopts or changes to a pooling method authorized by this section must use the method for the year of adoption and for all subsequent taxable years during which the taxpayer qualifies to use the pooling method unless a change to another method is required by the Commissioner in order to clearly reflect income, or unless permission to change to another method is granted by the Commissioner as provided in § 1.446-1(e).

(3) *Adopting or changing to a pooling method.* A taxpayer adopts (or changes to) a pooling method authorized by this section for any taxable year by establishing one or more pools for the taxable year in accordance with the rules governing the particular pooling method and the rules prescribed by this paragraph (h), and by using the pooling

method to compute its taxable income for the year of adoption (or change).

(4) *Definition of pool.* A taxpayer may use any reasonable method of defining a pool of similar transactions, agreements or rights, including a method based on the type of customer or the type of product or service provided under a contract. However, a taxpayer that pools similar transactions, agreements or rights must include in the pool all similar transactions, agreements or rights created during the taxable year. For purposes of the pooling methods described in paragraph (d)(6)(v) of this section (relating to *de minimis* rules applicable to certain contract rights) and paragraph (e)(4)(iii)(A) of this section (relating to *de minimis* rules applicable to transaction costs), an agreement (or a transaction) is treated as not similar to other agreements (or transactions) included in the pool if the amount at issue with respect to that agreement (or transaction) is reasonably expected to differ significantly from the average amount at issue with respect to the other agreements (or transactions) properly included in the pool.

(5) *Consistency requirement.* A taxpayer that uses the pooling method described in paragraph (f)(5)(iii) of this section for purposes of applying the 12-month rule to a right or benefit—

(i) Must use the pooling methods described in paragraph (d)(6)(v) of this section (relating to *de minimis* rules applicable to certain contract rights) and paragraph (e)(4)(iii)(A) of this section (relating to *de minimis* rules applicable to transaction costs) for purposes of determining the amount paid to create, or facilitate the creation of, the right or benefit; and

(ii) Must use the same pool for purposes of paragraph (d)(6)(v) of this section and paragraph (e)(4)(iii)(A) of this section as is used for purposes of paragraph (f)(5)(iii) of this section.

(6) *Additional guidance pertaining to pooling.* The Internal Revenue Service may publish guidance in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter) prescribing additional rules for applying the pooling methods authorized by this section to specific industries or to specific types of transactions.

(7) *Example.* The following example illustrates the rules of this paragraph (h):

Example. Pooling. (i) In the course of its business, W corporation enters into 3-year non-cancelable contracts that provide W the right to provide services to its customers. W generally pays certain amounts in the process of pursuing an agreement with a customer, including amounts paid to credit reporting agencies to verify the credit history of the potential customer and commissions paid to the independent sales agent who secures the agreement with the customer. In the case of agreements that W enters into with customers who are individuals, the agreements contain substantially similar terms and conditions and W typically pays between \$100 and \$200 in the process of pursuing each transaction. During 2005, W enters into agreements with 300 individuals. Also during 2005, W enters into an agreement with X corporation containing terms and conditions that are substantially similar to those contained in the agreements W enters into with its customers who are individuals. W pays certain amounts in the process of pursuing the agreement with X that W would not typically incur in the process of pursuing an agreement with its customers who are individuals. For example, W pays amounts to prepare and submit a bid for the agreement with X and amounts to travel to X's headquarters to make a sales presentation to X's management. In the aggregate, W pays \$11,000 in the process of obtaining the agreement with X.

(ii) The agreements between W and its customers are agreements providing W the right to provide services, as described in paragraph (d)(6)(i)(B) of this section. Under paragraph (b)(1)(v) of this section, W must capitalize transaction costs paid to facilitate the creation of these agreements. Because W enters into at least 25 similar transactions during 2005, W may pool its transactions for purposes of determining whether its transaction costs are *de minimis* within the meaning of paragraph (e)(4)(iii)(A) of this section. W adopts a pooling method by establishing one or more pools of similar transactions and by using the pooling method to compute its taxable income beginning in its 2005 taxable year. If W adopts a pooling method, W must include all similar transactions in the pool. Under paragraph (h)(4) of this section, the transaction with X is not similar to the transactions W enters into with its customers who are individuals. While the agreement with X contains terms and conditions that are substantially similar to those contained in the agreements W enters into with its customers who are individuals, the transaction costs paid in the process of pursuing

the agreement with X are reasonably expected to differ significantly from the average transaction costs attributable to transactions with its customers who are individuals. Accordingly, W may not include the transaction with X in the pool of transactions with customers who are individuals.

(i) [Reserved]

(j) *Application to accrual method taxpayers.* For purposes of this section, the terms *amount paid* and *payment* mean, in the case of a taxpayer using an accrual method of accounting, a liability incurred (within the meaning of § 1.446-1(c)(1)(ii)). A liability may not be taken into account under this section prior to the taxable year during which the liability is incurred.

(k) *Treatment of related parties and indirect payments.* For purposes of this section, references to a party other than the taxpayer include persons related to that party and persons acting for or on behalf of that party (including persons to whom the taxpayer becomes obligated as a result of assuming a liability of that party). For this purpose, persons are related only if their relationship is described in section 267(b) or 707(b) or they are engaged in trades or businesses under common control within the meaning of section 41(f)(1). References to an amount paid to or by a party include an amount paid on behalf of that party.

(l) *Examples.* The rules of this section are illustrated by the following examples in which it is assumed that the Internal Revenue Service has not published guidance that requires capitalization under paragraph (b)(1)(iv) of this section (relating to amounts paid to create or enhance a future benefit that is identified in published guidance as an intangible for which capitalization is required):

Example 1. License granted by a governmental unit. (i) X corporation pays \$25,000 to state R to obtain a license to sell alcoholic beverages in its restaurant. The license is valid indefinitely, provided X complies with all applicable laws regarding the sale of alcoholic beverages in state R. X pays its outside counsel \$4,000 for legal services rendered in preparing the license application and otherwise representing X during the licensing process. In addition, X determines that \$2,000 of salaries paid to its employees is allocable to services rendered by the employees in obtaining the license.

(ii) X's payment of \$25,000 is an amount paid to a governmental unit to obtain a license granted by that agency, as described in paragraph (d)(5)(i) of this section. The right has an indefinite duration and constitutes an amortizable section 197 intangible. Accordingly, as provided in paragraph (f)(3) of this section, the provisions of paragraph (f) of this section (relating to the 12-month rule) do not apply to X's payment. X must capitalize its \$25,000 payment to obtain the license from state R.

(iii) As provided in paragraph (e)(4) of this section, X is not required to capitalize employee compensation because such amounts are treated as amounts that do not facilitate the acquisition or creation of an intangible. Thus, X is not required to capitalize the \$2,000 of employee compensation allocable to the transaction.

(iv) X's payment of \$4,000 to its outside counsel is an amount paid to facilitate the creation of an intangible, as described in paragraph (e)(1)(i) of this section. Because X's transaction costs do not exceed \$5,000, X's transaction costs are *de minimis* within the meaning of paragraph (e)(4)(iii)(A) of this section. Accordingly, X is not required to capitalize the \$4,000 payment to its outside counsel under this section.

Example 2. Franchise agreement. (i) R corporation is a franchisor of income tax return preparation outlets. V corporation negotiates with R to obtain the right to operate an income tax return preparation outlet under a franchise from R. V pays an initial \$100,000 franchise fee to R in exchange for the franchise agreement. In addition, V pays its outside counsel \$4,000 to represent V during the negotiations with R. V also pays \$2,000 to an industry consultant to advise V during the negotiations with R.

(ii) Under paragraph (d)(6)(i)(A) of this section, V's payment of \$100,000 is an amount paid to another party to enter into an agreement with that party providing V the right to use tangible or intangible property. Accordingly, V must capitalize its \$100,000 payment to R. The franchise agreement is a self-created amortizable section 197 intangible within the meaning of section 197(c). Accordingly, as provided in paragraph (f)(3) of this section, the 12-month rule contained in paragraph (f)(1) of this section does not apply.

(iii) V's payment of \$4,000 to its outside counsel and \$2,000 to the industry consultant are amounts paid to facilitate the creation of an intangible, as described in paragraph (e)(1)(i) of this section. Because V's aggregate transaction costs exceed \$5,000, V's transaction costs are not *de minimis* within the meaning of paragraph (e)(4)(iii)(A) of this section. Accordingly, V must capitalize the \$4,000 payment to its outside counsel and the \$2,000 payment to the industry consultant

under this section into the basis of the franchise, as provided in paragraph (g) of this section.

Example 3. Covenant not to compete. (i) On December 1, 2005, N corporation, a calendar year taxpayer, enters into a covenant not to compete with B, a key employee that is leaving the employ of N. The covenant not to compete is not entered into in connection with the acquisition of an interest in a trade or business. The covenant not to compete prohibits B from competing with N for a period of 9 months, beginning December 1, 2005. N pays B \$25,000 in full consideration for B's agreement not to compete. In addition, N pays its outside counsel \$6,000 to facilitate the creation of the covenant not to compete with B. N does not have a short taxable year in 2005 or 2006.

(ii) Under paragraph (d)(6)(i)(C) of this section, N's payment of \$25,000 is an amount paid to another party to induce that party to enter into a covenant not to compete with N. However, because the covenant not to compete has a duration that does not extend beyond 12 months after the first date on which N realizes the rights attributable to its payment (*i.e.*, December 1, 2005) or beyond the end of the taxable year following the taxable year in which payment is made, the 12-month rule contained in paragraph (f)(1) of this section applies. Accordingly, N is not required to capitalize its \$25,000 payment to B or its \$6,000 payment to facilitate the creation of the covenant not to compete.

Example 4. Demand-side management. (i) X corporation, a public utility engaged in generating and distributing electrical energy, provides programs to its customers to promote energy conservation and energy efficiency. These programs are aimed at reducing electrical costs to X's customers, building goodwill with X's customers, and reducing X's future operating and capital costs. X provides these programs without obligating any of its customers participating in the programs to purchase power from X in the future. Under these programs, X pays a consultant to help industrial customers design energy-efficient manufacturing processes, to conduct "energy efficiency audits" that serve to identify for customers inefficiencies in their energy usage patterns, and to provide cash allowances to encourage residential customers to replace existing appliances with more energy efficient appliances.

(ii) The amounts paid by X to the consultant are not amounts to acquire or create an intangible under paragraph (c) or (d) of this section or to facilitate such an acquisition or creation. In addition, the amounts do not create a separate and distinct intangible asset within the meaning of paragraph (b)(3) of this section. Accordingly, the amounts paid to the consultant are not required to be capitalized under this section. While the amounts may serve to reduce future oper-

ating and capital costs and create goodwill with customers, these benefits, without more, are not intangibles for which capitalization is required under this section.

Example 5. Business process re-engineering. (i) V corporation manufactures its products using a batch production system. Under this system, V continuously produces component parts of its various products and stockpiles these parts until they are needed in V's final assembly line. Finished goods are stockpiled awaiting orders from customers. V discovers that this process ties up significant amounts of V's capital in work-in-process and finished goods inventories. V hires B, a consultant, to advise V on improving the efficiency of its manufacturing operations. B recommends a complete re-engineering of V's manufacturing process to a process known as just-in-time manufacturing. Just-in-time manufacturing involves reconfiguring a manufacturing plant to a configuration of "cells" where each team in a cell performs the entire manufacturing process for a particular customer order, thus reducing inventory stockpiles.

(ii) V incurred three categories of costs to convert its manufacturing process to a just-in-time system. First, V paid B, a consultant, \$250,000 in professional fees to implement the conversion of V's plant to a just-in-time system. Second, V paid C, a contractor, \$100,000 to relocate and reconfigure V's manufacturing equipment from an assembly line layout to a configuration of cells. Third, V paid D, a consultant, \$50,000 to train V's employees in the just-in-time manufacturing process.

(iii) The amounts paid by V to B, C, and D are not amounts to acquire or create an intangible under paragraph (c) or (d) of this section or to facilitate such an acquisition or creation. In addition, the amounts do not create a separate and distinct intangible asset within the meaning of paragraph (b)(3) of this section. Accordingly, the amounts paid to B, C, and D are not required to be capitalized under this section. While the amounts produce long term benefits to V in the form of reduced inventory stockpiles, improved product quality, and increased efficiency, these benefits, without more, are not intangibles for which capitalization is required under this section.

Example 6. Defense of business reputation. (i) X, an investment adviser, serves as the fund manager of a money market investment fund. X, like its competitors in the industry, strives to maintain a constant net asset value for its money market fund of \$1.00 per share. During 2005, in the course of managing the fund assets, X incorrectly predicts the direction of market interest rates, resulting in significant investment losses to the fund. Due to these significant losses, X is faced with the prospect of reporting a net asset value that is less than \$1.00 per share. X is

not aware of any investment adviser in its industry that has ever reported a net asset value for its money market fund of less than \$1.00 per share. X is concerned that reporting a net asset value of less than \$1.00 per share will significantly harm its reputation as an investment adviser, and could lead to litigation by shareholders. X decides to contribute \$2,000,000 to the fund in order to raise the net asset value of the fund to \$1.00 per share. This contribution is not a loan to the fund and does not give X any ownership interest in the fund.

(ii) The \$2,000,000 contribution is not an amount paid to acquire or create an intangible under paragraph (c) or (d) of this section or to facilitate such an acquisition or creation. In addition, the amount does not create a separate and distinct intangible asset within the meaning of paragraph (b)(3) of this section. Accordingly, the amount contributed to the fund is not required to be capitalized under this section. While the amount serves to protect the business reputation of the taxpayer and may protect the taxpayer from litigation by shareholders, these benefits, without more, are not intangibles for which capitalization is required under this section.

Example 7. Product launch costs. (i) R corporation, a manufacturer of pharmaceutical products, is required by law to obtain regulatory approval before selling its products. While awaiting regulatory approval on Product A, R pays to develop and implement a marketing strategy and an advertising campaign to raise consumer awareness of the purported need for Product A. R also pays to train health care professionals and other distributors in the proper use of Product A.

(ii) The amounts paid by R are not amounts paid to acquire or create an intangible under paragraph (c) or (d) of this section or to facilitate such an acquisition or creation. In addition, the amounts do not create a separate and distinct intangible asset within the meaning of paragraph (b)(3) of this section. Accordingly, R is not required to capitalize these amounts under this section. While the amounts may benefit R by creating consumer demand for Product A and increasing awareness of Product A among distributors, these benefits, without more, are not intangibles for which capitalization is required under this section.

Example 8. Stocklifting costs. (i) N corporation is a wholesale distributor of Brand A aftermarket automobile replacement parts. In an effort to induce a retail automobile parts supply store to stock only Brand A parts, N offers to replace all of the store's inventory of other branded parts with Brand A parts, and to credit the store for its cost of other branded parts. The store is under no obligation to continue stocking Brand A parts or to purchase a minimum volume of Brand A parts from N in the future.

(ii) The amount paid by N as a credit to the store for the cost of other branded parts is not an amount paid to acquire or create an intangible under paragraph (c) or (d) of this section or to facilitate such an acquisition or creation. In addition, the amount does not create a separate and distinct intangible asset within the meaning of paragraph (b)(3) of this section. Accordingly, N is not required to capitalize the amount under this section. While the amount may create a hope or expectation by N that the store will continue to stock Brand A parts, this benefit, without more, is not an intangible for which capitalization is required under this section.

(iii) Alternatively, assume that N agrees to credit the store for its cost of other branded parts in exchange for the store's agreement to purchase all of its inventory requirements for such parts from N for a period of at least 3 years. The amount paid by N as a credit to the store for the cost of other branded parts is an amount paid to induce the store to enter into an agreement providing R the right to provide property. Accordingly, R must capitalize its payment.

Example 9. Package design costs. (i) Z corporation manufactures and markets personal care products. Z pays \$100,000 to a consultant to develop a package design for Z's newest product, Product A. Z also pays a fee to a government agency to obtain trademark and copyright protection on certain elements of the package design. Z pays its outside legal counsel \$10,000 for services rendered in preparing and filing the trademark and copyright applications and for other services rendered in securing the trademark and copyright protection.

(ii) The \$100,000 paid by Z to the consultant for development of the package design is not an amount paid to acquire or create an intangible under paragraph (c) or (d) of this section or to facilitate such an acquisition or creation. In addition, as provided in paragraph (b)(3)(v) of this section, amounts paid to develop a package design are treated as amounts that do not create a separate and distinct intangible asset. Accordingly, Z is not required to capitalize the \$100,000 payment under this section.

(iii) The amounts paid by Z to the government agency to obtain trademark and copyright protection are amounts paid to a government agency for a right granted by that agency. Accordingly, Z must capitalize the payment. In addition, the \$10,000 paid by Z to its outside counsel is an amount paid to facilitate the creation of the trademark and copyright. Because the aggregate amounts paid to facilitate the transaction exceed \$5,000, the amounts are not *de minimis* as defined in paragraph (e)(4)(iii)(A) of this section. Accordingly, Z must capitalize the \$10,000 payment to its outside counsel under paragraph (b)(1)(v) of this section.

(iv) Alternatively, assume that Z acquires an existing package design for Product A as part of an acquisition of a trade or business that constitutes an applicable asset acquisition within the meaning of section 1060(c). Assume further that \$100,000 of the consideration paid by N in the acquisition is properly allocable to the package design for Product A. Under paragraph (c)(1) of this section, Z must capitalize the \$100,000 payment.

Example 10. Contract to provide services. (i) Q corporation, a financial planning firm, provides financial advisory services on a fee-only basis. During 2005, Q and several other financial planning firms submit separate bids to R corporation for a contract to become one of three providers of financial advisory services to R's employees. Q pays \$2,000 to a printing company to develop and produce materials for its sales presentation to R's management. Q also pays \$6,000 to travel to R's corporate headquarters to make the sales presentation, and \$20,000 of salaries to its employees for services performed in preparing the bid and making the presentation to R's management. Q's bid is successful and Q enters into an agreement with R in 2005 under which Q agrees to provide financial advisory services to R's employees, and R agrees to pay Q's fee on behalf of each employee who chooses to utilize such services. R enters into similar agreements with two other financial planning firms, and R's employees may choose to use the services of any one of the three firms. Based on its past experience, Q reasonably expects to provide services to at least 5 percent of R's employees.

(ii) Q's agreement with R is not an agreement providing Q the right to provide services, as described in paragraph (d)(6)(i)(B) of this section. Under paragraph (d)(6)(iv) the agreement places no obligation on another person to request or pay for Q's services. Accordingly, Q is not required to capitalize any of the amounts paid in the process of pursuing the agreement with R.

Example 11. Mutual fund distributor. (i) D incurs costs to enter into a distribution agreement with M, a mutual fund. The initial term of the distribution agreement is two years, and afterwards must be approved annually by M. The distribution agreement can be terminated by either party on 60 days notice. Although distribution agreements are rarely terminated in the mutual fund industry, M is not economically compelled to continue D's distribution agreement. Under the distribution agreement, D has the exclusive right to sell shares of M and agrees to use its best efforts to solicit orders for the sale of shares of M. D sells shares in M directly to the general public as well as through brokers. When an investor places an order for M shares with a broker, D pays the broker a commission for selling the shares to the investor. Under the distribution agreement, D

receives compensation from M in the form of 12b-1 fees (which equal a percentage of M's net asset value attributable to investors that have held their shares for up to 6 years) and contingent deferred sales charges (which are paid if the investor redeems the purchased shares within 6 years).

(ii) The distribution agreement is not an agreement providing D with the right to provide services, as described in paragraph (d)(6)(i)(B) of this section, because the distribution agreement can be terminated by M at will upon 60 days notice and M is not economically compelled to continue the distribution agreement. Accordingly, D is not required to capitalize the costs of creating (or facilitating the creation of) the distribution agreement under paragraphs (b)(1)(ii) or (v) of this section. In addition, as provided in paragraph (b)(3)(ii) of this section, amounts paid to create an agreement are treated as amounts that do not create a separate and distinct intangible asset. Accordingly, D also is not required to capitalize the costs of creating (or facilitating the creation of) the distribution agreement under paragraph (b)(1)(iii) or (v) of this section.

(iii) Under paragraph (b)(3)(iii), the broker commissions paid by D in performing services under the distribution agreement do not create (or facilitate the creation of) a separate and distinct intangible asset. In addition, the broker commissions do not create an intangible described in paragraph (d) of this section. Accordingly, D is not required to capitalize the broker commissions under this section.

(m) *Amortization.* For rules relating to amortization of certain intangibles, see § 1.167(a)-3.

(n) *Intangible interests in land.* [Reserved].

(o) *Effective date.* This section applies to amounts paid or incurred on or after December 31, 2003.

(p) *Accounting method changes—(1) In general.* A taxpayer seeking to change a method of accounting to comply with this section must secure the consent of the Commissioner in accordance with the requirements of § 1.446-1(e). For the taxpayer's first taxable year ending on or after December 31, 2003, the taxpayer is granted the consent of the Commissioner to change its method of accounting to comply with this section, provided the taxpayer follows the administrative procedures issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in accounting method (for further guidance, for example, see Rev. Proc. 2002-

9 (2002-1 C.B. 327) and § 601.601(d)(2)(ii)(b) of this chapter).

(2) *Scope limitations.* Any limitations on obtaining the automatic consent of the Commissioner do not apply to a taxpayer seeking to change to a method of accounting to comply with this section for its first taxable year ending on or after December 31, 2003.

(3) *Section 481(a) adjustment.* With the exception of a change to a pooling method authorized by this section, the section 481(a) adjustment for a change in method of accounting to comply with this section for a taxpayer's first taxable year ending on or after December 31, 2003 is determined by taking into account only amounts paid or incurred in taxable years ending on or after January 24, 2002. A taxpayer seeking to change to a pooling method authorized by this section on or after the effective date of these regulations must change to the method using a cut-off method.

[T.D. 9107, 69 FR 446, Jan. 5, 2004]

§ 1.263(a)-5 Amounts paid or incurred to facilitate an acquisition of a trade or business, a change in the capital structure of a business entity, and certain other transactions.

(a) *General rule.* A taxpayer must capitalize an amount paid to facilitate (within the meaning of paragraph (b) of this section) each of the following transactions, without regard to whether the transaction is comprised of a single step or a series of steps carried out as part of a single plan and without regard to whether gain or loss is recognized in the transaction:

(1) An acquisition of assets that constitute a trade or business (whether the taxpayer is the acquirer in the acquisition or the target of the acquisition).

(2) An acquisition by the taxpayer of an ownership interest in a business entity if, immediately after the acquisition, the taxpayer and the business entity are related within the meaning of section 267(b) or 707(b) (*see* § 1.263(a)-4 for rules requiring capitalization of amounts paid by the taxpayer to acquire an ownership interest in a business entity, or to facilitate the acquisition of an ownership interest in a business entity, where the taxpayer and the business entity are not related

within the meaning of section 267(b) or 707(b) immediately after the acquisition).

(3) An acquisition of an ownership interest in the taxpayer (other than an acquisition by the taxpayer of an ownership interest in the taxpayer, whether by redemption or otherwise).

(4) A restructuring, recapitalization, or reorganization of the capital structure of a business entity (including reorganizations described in section 368 and distributions of stock by the taxpayer as described in section 355).

(5) A transfer described in section 351 or section 721 (whether the taxpayer is the transferor or transferee).

(6) A formation or organization of a disregarded entity.

(7) An acquisition of capital.

(8) A stock issuance.

(9) A borrowing. For purposes of this section, a borrowing means any issuance of debt, including an issuance of debt in an acquisition of capital or in a recapitalization. A borrowing also includes debt issued in a debt for debt exchange under § 1.1001-3.

(10) Writing an option.

(b) *Scope of facilitate*—(1) *In general.* Except as otherwise provided in this section, an amount is paid to facilitate a transaction described in paragraph (a) of this section if the amount is paid in the process of investigating or otherwise pursuing the transaction. Whether an amount is paid in the process of investigating or otherwise pursuing the transaction is determined based on all of the facts and circumstances. In determining whether an amount is paid to facilitate a transaction, the fact that the amount would (or would not) have been paid but for the transaction is relevant, but is not determinative. An amount paid to determine the value or price of a transaction is an amount paid in the process of investigating or otherwise pursuing the transaction. An amount paid to another party in exchange for tangible or intangible property is not an amount paid to facilitate the exchange. For example, the purchase price paid to the target of an asset acquisition in exchange for its assets is not an amount paid to facilitate the acquisition. Similarly, the purchase price paid by an acquirer to the target's shareholders in

exchange for their stock in a stock acquisition is not an amount paid to facilitate the acquisition of the stock. See § 1.263(a)-1, § 1.263(a)-2, and § 1.263(a)-4 for rules requiring capitalization of the purchase price paid to acquire property.

(2) *Ordering rules.* An amount paid in the process of investigating or otherwise pursuing both a transaction described in paragraph (a) of this section and an acquisition or creation of an intangible described in § 1.263(a)-4 is subject to the rules contained in this section, and not to the rules contained in § 1.263(a)-4. In addition, an amount required to be capitalized by § 1.263(a)-1, § 1.263(a)-2, or § 1.263(a)-4 does not facilitate a transaction described in paragraph (a) of this section.

(c) *Special rules for certain costs*—(1) *Borrowing costs.* An amount paid to facilitate a borrowing does not facilitate another transaction (other than the borrowing) described in paragraph (a) of this section.

(2) *Costs of asset sales.* An amount paid by a taxpayer to facilitate a sale of its assets does not facilitate another transaction (other than the sale) described in paragraph (a) of this section. For example, where a target corporation, in preparation for a merger with an acquiring corporation, sells assets that are not desired by the acquiring corporation, amounts paid to facilitate the sale of the unwanted assets are not required to be capitalized as amounts paid to facilitate the merger.

(3) *Mandatory stock distributions.* An amount paid in the process of investigating or otherwise pursuing a distribution of stock by a taxpayer to its shareholders does not facilitate a transaction described in paragraph (a) of this section if the divestiture of the stock (or of properties transferred to an entity whose stock is distributed) is required by law, regulatory mandate, or court order. A taxpayer is not required to capitalize (under this section or § 1.263(a)-4) an amount paid to organize (or facilitate the organization of) an entity if the entity is organized solely to receive properties that the taxpayer is required to divest by law, regulatory mandate, or court order and if the taxpayer distributes the stock of the entity to its shareholders. A tax-

payer also is not required to capitalize (under this section or § 1.263(a)-4) an amount paid to transfer property to an entity if the taxpayer is required to divest itself of that property by law, regulatory mandate, or court order and if the stock of the recipient entity is distributed to the taxpayer's shareholders.

(4) *Bankruptcy reorganization costs.* An amount paid to institute or administer a proceeding under Chapter 11 of the Bankruptcy Code by a taxpayer that is the debtor under the proceeding constitutes an amount paid to facilitate a reorganization within the meaning of paragraph (a)(4) of this section, regardless of the purpose for which the proceeding is instituted. For example, an amount paid to prepare and file a petition under Chapter 11, to obtain an extension of the exclusivity period under Chapter 11, to formulate plans of reorganization under Chapter 11, to analyze plans of reorganization formulated by another party in interest, or to contest or obtain approval of a plan of reorganization under Chapter 11 facilitates a reorganization within the meaning of this section. However, amounts specifically paid to formulate, analyze, contest or obtain approval of the portion of a plan of reorganization under Chapter 11 that resolves tort liabilities of the taxpayer do not facilitate a reorganization within the meaning of paragraph (a)(4) of this section if the amounts would have been treated as ordinary and necessary business expenses under section 162 had the bankruptcy proceeding not been instituted. In addition, an amount paid by the taxpayer to defend against the commencement of an involuntary bankruptcy proceeding against the taxpayer does not facilitate a reorganization within the meaning of paragraph (a)(4) of this section. An amount paid by the debtor to operate its business during a Chapter 11 bankruptcy proceeding is not an amount paid to institute or administer the bankruptcy proceeding and does not facilitate a reorganization. Such amount is treated in the same manner as it would have been treated had the bankruptcy proceeding not been instituted.

(5) *Stock issuance costs of open-end regulated investment companies.* Amounts

paid by an open-end regulated investment company (within the meaning of section 851) to facilitate an issuance of its stock are treated as amounts that do not facilitate a transaction described in paragraph (a) of this section unless the amounts are paid during the initial stock offering period.

(6) *Integration costs.* An amount paid to integrate the business operations of the taxpayer with the business operations of another does not facilitate a transaction described in paragraph (a) of this section, regardless of when the integration activities occur.

(7) *Registrar and transfer agent fees for the maintenance of capital stock records.* An amount paid by a taxpayer to a registrar or transfer agent in connection with the transfer of the taxpayer's capital stock does not facilitate a transaction described in paragraph (a) of this section unless the amount is paid with respect to a specific transaction described in paragraph (a). For example, a taxpayer is not required to capitalize periodic payments to a transfer agent for maintaining records of the names and addresses of shareholders who trade the taxpayer's shares on a national exchange. By comparison, a taxpayer is required to capitalize an amount paid to the transfer agent for distributing proxy statements requesting shareholder approval of a transaction described in paragraph (a) of this section.

(8) *Termination payments and amounts paid to facilitate mutually exclusive transactions.* An amount paid to terminate (or facilitate the termination of) an agreement to enter into a transaction described in paragraph (a) of this section constitutes an amount paid to facilitate a second transaction described in paragraph (a) of this section only if the transactions are mutually exclusive. An amount paid to facilitate a transaction described in paragraph (a) of this section is treated as an amount paid to facilitate a second transaction described in paragraph (a) of this section only if the transactions are mutually exclusive.

(d) *Simplifying conventions*—(1) *In general.* For purposes of this section, employee compensation (within the meaning of paragraph (d)(2) of this section), overhead, and *de minimis* costs (within

the meaning of paragraph (d)(3) of this section) are treated as amounts that do not facilitate a transaction described in paragraph (a) of this section.

(2) *Employee compensation*—(i) *In general.* The term *employee compensation* means compensation (including salary, bonuses and commissions) paid to an employee of the taxpayer. For purposes of this section, whether an individual is an employee is determined in accordance with the rules contained in section 3401(c) and the regulations thereunder.

(ii) *Certain amounts treated as employee compensation.* For purposes of this section, a guaranteed payment to a partner in a partnership is treated as employee compensation. For purposes of this section, annual compensation paid to a director of a corporation is treated as employee compensation. For example, an amount paid to a director of a corporation for attendance at a regular meeting of the board of directors (or committee thereof) is treated as employee compensation for purposes of this section. However, an amount paid to the director for attendance at a special meeting of the board of directors (or committee thereof) is not treated as employee compensation. An amount paid to a person that is not an employee of the taxpayer (including the employer of the individual who performs the services) is treated as employee compensation for purposes of this section only if the amount is paid for secretarial, clerical, or similar administrative support services (other than services involving the preparation and distribution of proxy solicitations and other documents seeking shareholder approval of a transaction described in paragraph (a) of this section). In the case of an affiliated group of corporations filing a consolidated federal income tax return, a payment by one member of the group to a second member of the group for services performed by an employee of the second member is treated as employee compensation if the services provided by the employee are provided at a time during which both members are affiliated.

(3) *De minimis costs*—(i) *In general.* The term *de minimis costs* means

amounts (other than employee compensation and overhead) paid in the process of investigating or otherwise pursuing a transaction described in paragraph (a) of this section if, in the aggregate, the amounts do not exceed \$5,000 (or such greater amount as may be set forth in published guidance). If the amounts exceed \$5,000 (or such greater amount as may be set forth in published guidance), none of the amounts are *de minimis costs* within the meaning of this paragraph (d)(3). For purposes of this paragraph (d)(3), an amount paid in the form of property is valued at its fair market value at the time of the payment.

(ii) *Treatment of commissions.* The term *de minimis costs* does not include commissions paid to facilitate a transaction described in paragraph (a) of this section.

(4) *Election to capitalize.* A taxpayer may elect to treat employee compensation, overhead, or *de minimis costs* paid in the process of investigating or otherwise pursuing a transaction described in paragraph (a) of this section as amounts that facilitate the transaction. The election is made separately for each transaction and applies to employee compensation, overhead, or *de minimis costs*, or to any combination thereof. For example, a taxpayer may elect to treat overhead and *de minimis costs*, but not employee compensation, as amounts that facilitate the transaction. A taxpayer makes the election by treating the amounts to which the election applies as amounts that facilitate the transaction in the taxpayer's timely filed original federal income tax return (including extensions) for the taxable year during which the amounts are paid. In the case of an affiliated group of corporations filing a consolidated return, the election is made separately with respect to each member of the group, and not with respect to the group as a whole. In the case of an S corporation or partnership, the election is made by the S corporation or by the partnership, and not by the shareholders or partners. An election made under this paragraph (d)(4) is revocable with respect to each taxable year for which made only with the consent of the Commissioner.

(e) *Certain acquisitive transactions*—(1) *In general.* Except as provided in paragraph (e)(2) of this section (relating to inherently facilitative amounts), an amount paid by the taxpayer in the process of investigating or otherwise pursuing a covered transaction (as described in paragraph (e)(3) of this section) facilitates the transaction within the meaning of this section only if the amount relates to activities performed on or after the earlier of—

(i) The date on which a letter of intent, exclusivity agreement, or similar written communication (other than a confidentiality agreement) is executed by representatives of the acquirer and the target; or

(ii) The date on which the material terms of the transaction (as tentatively agreed to by representatives of the acquirer and the target) are authorized or approved by the taxpayer's board of directors (or committee of the board of directors) or, in the case of a taxpayer that is not a corporation, the date on which the material terms of the transaction (as tentatively agreed to by representatives of the acquirer and the target) are authorized or approved by the appropriate governing officials of the taxpayer. In the case of a transaction that does not require authorization or approval of the taxpayer's board of directors (or appropriate governing officials in the case of a taxpayer that is not a corporation) the date determined under this paragraph (e)(1)(ii) is the date on which the acquirer and the target execute a binding written contract reflecting the terms of the transaction.

(2) *Exception for inherently facilitative amounts.* An amount paid in the process of investigating or otherwise pursuing a covered transaction facilitates that transaction if the amount is inherently facilitative, regardless of whether the amount is paid for activities performed prior to the date determined under paragraph (e)(1) of this section. An amount is inherently facilitative if the amount is paid for—

(i) Securing an appraisal, formal written evaluation, or fairness opinion related to the transaction;

(ii) Structuring the transaction, including negotiating the structure of

the transaction and obtaining tax advice on the structure of the transaction (for example, obtaining tax advice on the application of section 368);

(iii) Preparing and reviewing the documents that effectuate the transaction (for example, a merger agreement or purchase agreement);

(iv) Obtaining regulatory approval of the transaction, including preparing and reviewing regulatory filings;

(v) Obtaining shareholder approval of the transaction (for example, proxy costs, solicitation costs, and costs to promote the transaction to shareholders); or

(vi) Conveying property between the parties to the transaction (for example, transfer taxes and title registration costs).

(3) *Covered transactions.* For purposes of this paragraph (e), the term *covered transaction* means the following transactions:

(i) A taxable acquisition by the taxpayer of assets that constitute a trade or business.

(ii) A taxable acquisition of an ownership interest in a business entity (whether the taxpayer is the acquirer in the acquisition or the target of the acquisition) if, immediately after the acquisition, the acquirer and the target are related within the meaning of section 267(b) or 707(b).

(iii) A reorganization described in section 368(a)(1)(A), (B), or (C) or a reorganization described in section 368(a)(1)(D) in which stock or securities of the corporation to which the assets are transferred are distributed in a transaction which qualifies under section 354 or 356 (whether the taxpayer is the acquirer or the target in the reorganization).

(f) *Documentation of success-based fees*—An amount paid that is contingent on the successful closing of a transaction described in paragraph (a) of this section is an amount paid to facilitate the transaction except to the extent the taxpayer maintains sufficient documentation to establish that a portion of the fee is allocable to activities that do not facilitate the transaction. This documentation must be completed on or before the due date of the taxpayer's timely filed original federal income tax return (including ex-

tensions) for the taxable year during which the transaction closes. For purposes of this paragraph (f), documentation must consist of more than merely an allocation between activities that facilitate the transaction and activities that do not facilitate the transaction, and must consist of supporting records (for example, time records, itemized invoices, or other records) that identify—

(1) The various activities performed by the service provider;

(2) The amount of the fee (or percentage of time) that is allocable to each of the various activities performed;

(3) Where the date the activity was performed is relevant to understanding whether the activity facilitated the transaction, the amount of the fee (or percentage of time) that is allocable to the performance of that activity before and after the relevant date; and

(4) The name, business address, and business telephone number of the service provider.

(g) *Treatment of capitalized costs*—(1) *Tax-free acquisitive transactions.* [Reserved]

(2) *Taxable acquisitive transactions*—(i) *Acquirer.* In the case of an acquisition, merger, or consolidation that is not described in section 368, an amount required to be capitalized under this section by the acquirer is added to the basis of the acquired assets (in the case of a transaction that is treated as an acquisition of the assets of the target for federal income tax purposes) or the acquired stock (in the case of a transaction that is treated as an acquisition of the stock of the target for federal income tax purposes).

(ii) *Target*—(A) *Asset acquisition.* In the case of an acquisition, merger, or consolidation that is not described in section 368 and that is treated as an acquisition of the assets of the target for federal income tax purposes, an amount required to be capitalized under this section by the target is treated as a reduction of the target's amount realized on the disposition of its assets.

(B) *Stock acquisition.* [Reserved]

(3) *Stock issuance transactions.* [Reserved]

(4) *Borrowings.* For the treatment of amounts required to be capitalized

under this section with respect to a borrowing, see § 1.446-5.

(5) *Treatment of capitalized amounts by option writer.* An amount required to be capitalized by an option writer under paragraph (a)(10) of this section is not currently deductible under section 162 or 212. Instead, the amount required to be capitalized generally reduces the total premium received by the option writer. However, other provisions of law may limit the reduction of the premium by the capitalized amount (for example, if the capitalized amount is never deductible by the option writer).

(h) *Application to accrual method taxpayers.* For purposes of this section, the terms *amount paid* and *payment* mean, in the case of a taxpayer using an accrual method of accounting, a liability incurred (within the meaning of § 1.446-1(c)(1)(ii)). A liability may not be taken into account under this section prior to the taxable year during which the liability is incurred.

(i) [Reserved]

(j) *Coordination with other provisions of the Internal Revenue Code.* Nothing in this section changes the treatment of an amount that is specifically provided for under any other provision of the Internal Revenue Code (other than section 162(a) or 212) or regulations thereunder.

(k) *Treatment of indirect payments.* For purposes of this section, references to an amount paid to or by a party include an amount paid on behalf of that party.

(l) *Examples.* The following examples illustrate the rules of this section:

Example 1. Costs to facilitate. Q corporation pays its outside counsel \$20,000 to assist Q in registering its stock with the Securities and Exchange Commission. Q is not a regulated investment company within the meaning of section 851. Q's payments to its outside counsel are amounts paid to facilitate the issuance of stock. Accordingly, Q must capitalize its \$20,000 payment under paragraph (a)(8) of this section (whether incurred before or after the issuance of the stock and whether or not the registration is productive of equity capital).

Example 2. Costs to facilitate. Q corporation seeks to acquire all of the outstanding stock of Y corporation. To finance the acquisition, Q must issue new debt. Q pays an investment banker \$25,000 to market the debt to the public and pays its outside counsel \$10,000 to prepare the offering documents for the debt.

Q's payment of \$35,000 facilitates a borrowing and must be capitalized under paragraph (a)(9) of this section. As provided in paragraph (c)(1) of this section, Q's payment does not facilitate the acquisition of Y, notwithstanding the fact that Q incurred the new debt to finance its acquisition of Y. See § 1.446-5 for the treatment of Q's capitalized payment.

Example 3. Costs to facilitate. (i) Z agrees to pay investment banker B \$1,000,000 for B's services in evaluating four alternative transactions (\$250,000 for each alternative): An initial public offering; a borrowing of funds; an acquisition by Z of a competitor; and an acquisition of Z by a competitor. Z eventually decides to pursue a borrowing and abandons the other options.

(ii) The \$250,000 payment to evaluate the possibility of a borrowing is an amount paid in the process of investigating or otherwise pursuing a transaction described in paragraph (a)(9) of this section. Accordingly Z must capitalize that \$250,000 payment to B. See § 1.446-5 for the treatment of Z's capitalized payment.

(iii) The \$250,000 payment to evaluate the possibility of an initial public offering is an amount paid in the process of investigating or otherwise pursuing a transaction described in paragraph (a)(8) of this section. Accordingly, Z must capitalize that \$250,000 payment to B under this section. Because the borrowing and the initial public offering are not mutually exclusive transactions, the \$250,000 is not treated as an amount paid to facilitate the borrowing. When Z abandons the initial public offering, Z may recover under section 165 the \$250,000 paid to facilitate the initial public offering.

(iv) The \$500,000 paid by Z to evaluate the possibilities of an acquisition of Z by a competitor and an acquisition of a competitor by Z are amounts paid in the process of investigating or otherwise pursuing transactions described in paragraphs (a) and (e)(3) of this section. Accordingly, Z is only required to capitalize under this section the portion of the \$500,000 payment that relates to inherently facilitative activities under paragraph (e)(2) of this section or to activities performed on or after the date determined under paragraph (e)(1) of this section. Because the borrowing and the possible acquisitions are not mutually exclusive transactions, no portion of the \$500,000 is treated as an amount paid to facilitate the borrowing. When Z abandons the acquisition transactions, Z may recover under section 165 any portion of the \$500,000 that was paid to facilitate the acquisitions.

Example 4. Corporate acquisition. (i) On February 1, 2005, R corporation decides to investigate the acquisition of three potential targets: T corporation, U corporation, and V corporation. R's consideration of T, U, and V represents the consideration of three distinct

transactions, any or all of which R might consummate and has the financial ability to consummate. On March 1, 2005, R enters into an exclusivity agreement with T and stops pursuing U and V. On July 1, 2005, R acquires all of the stock of T in a transaction described in section 368. R pays \$1,000,000 to an investment banker and \$50,000 to its outside counsel to conduct due diligence on T, U, and V; determine the value of T, U, and V; negotiate and structure the transaction with T; draft the merger agreement; secure shareholder approval; prepare SEC filings; and obtain the necessary regulatory approvals.

(ii) Under paragraph (e)(1) of this section, the amounts paid to conduct due diligence on T, U and V prior to March 1, 2005 (the date of the exclusivity agreement) are not amounts paid to facilitate the acquisition of the stock of T, U or V and are not required to be capitalized under this section. However, the amounts paid to conduct due diligence on T on and after March 1, 2005, are amounts paid to facilitate the acquisition of the stock of T and must be capitalized under paragraph (a)(2) of this section.

(iii) Under paragraph (e)(2) of this section, the amounts paid to determine the value of T, negotiate and structure the transaction with T, draft the merger agreement, secure shareholder approval, prepare SEC filings, and obtain necessary regulatory approvals are inherently facilitative amounts paid to facilitate the acquisition of the stock of T and must be capitalized, regardless of whether those activities occur prior to, on, or after March 1, 2005.

(iv) Under paragraph (e)(2) of this section, the amounts paid to determine the value of U and V are inherently facilitative amounts paid to facilitate the acquisition of U or V and must be capitalized. Because the acquisition of U, V, and T are not mutually exclusive transactions, the costs that facilitate the acquisition of U and V do not facilitate the acquisition of T. Accordingly, the amounts paid to determine the value of U and V may be recovered under section 165 in the taxable year that R abandons the planned mergers with U and V.

Example 5. Corporate acquisition; employee bonus. Assume the same facts as in *Example 4*, except R pays a bonus of \$10,000 to one of its corporate officers who negotiated the acquisition of T. As provided by paragraph (d)(1) of this section, Y is not required to capitalize any portion of the bonus paid to the corporate officer.

Example 6. Corporate acquisition; integration costs. Assume the same facts as in *Example 4*, except that, before and after the acquisition is consummated, R incurs costs to relocate personnel and equipment, provide severance benefits to terminated employees, integrate records and information systems, prepare new financial statements for the combined entity, and reduce redundancies in the com-

bined business operations. Under paragraph (c)(6) of this section, these costs do not facilitate the acquisition of T. Accordingly, R is not required to capitalize any of these costs under this section.

Example 7. Corporate acquisition; compensation to target's employees. Assume the same facts as in *Example 4*, except that, prior to the acquisition, certain employees of T held unexercised options issued pursuant to T's stock option plan. These options granted the employees the right to purchase T stock at a fixed option price. The options did not have a readily ascertainable value (within the meaning of §1.83-7(b)), and thus no amount was included in the employees' income when the options were granted. As a condition of the acquisition, T is required to terminate its stock option plan. T therefore agrees to pay its employees who hold unexercised stock options the difference between the option price and the current value of T's stock in consideration of their agreement to cancel their unexercised options. Under paragraph (d)(1) of this section, T is not required to capitalize the amounts paid to its employees. See section 83 for the treatment of amounts received in cancellation of stock options.

Example 8. Asset acquisition; employee compensation. N corporation owns tangible and intangible assets that constitute a trade or business. M corporation purchases all the assets of N in a taxable transaction. Under paragraph (a)(1) of this section, M must capitalize amounts paid to facilitate the acquisition of the assets of N. Under paragraph (d)(1) of this section, no portion of the salaries of M's employees who work on the acquisition are treated as facilitating the transaction.

Example 9. Corporate acquisition; retainer. Y corporation's outside counsel charges Y \$60,000 for services rendered in facilitating the friendly acquisition of the stock of Y corporation by X corporation. Y has an agreement with its outside counsel under which Y pays an annual retainer of \$50,000. Y's outside counsel has the right to offset amounts billed for any legal services rendered against the annual retainer. Pursuant to this agreement, Y's outside counsel offsets \$50,000 of the legal fees from the acquisition against the retainer and bills Y for the balance of \$10,000. The \$60,000 legal fee is an amount paid to facilitate the acquisition of an ownership interest in Y as described in paragraph (a)(3) of this section. Y must capitalize the full amount of the \$60,000 legal fee.

Example 10. Corporate acquisition; antitrust defense costs. On March 1, 2005, V corporation enters into an agreement with X corporation to acquire all of the outstanding stock of X. On April 1, 2005, federal and state regulators file suit against V to prevent the acquisition of X on the ground that the acquisition violates antitrust laws. V enters into a consent

agreement with regulators on May 1, 2005, that allows the acquisition to proceed, but requires V to hold separate the business operations of X pending the outcome of the antitrust suit and subjects V to possible divestiture. V acquires title to all of the outstanding stock of X on June 1, 2005. After June 1, 2005, the regulators pursue antitrust litigation against V seeking rescission of the acquisition. V pays \$50,000 to its outside counsel for services rendered after June 1, 2005, to defend against the antitrust litigation. V ultimately prevails in the antitrust litigation. V's costs to defend the antitrust litigation are costs to facilitate its acquisition of the stock of X under paragraph (a)(2) of this section and must be capitalized. Although title to the shares of X passed to V prior to the date V incurred costs to defend the antitrust litigation, the amounts paid by V are paid in the process of pursuing the acquisition of the stock of X because the acquisition was not complete until the antitrust litigation was ultimately resolved. V must capitalize the \$50,000 in legal fees.

Example 11. Corporate acquisition; defensive measures. (i) On January 15, 2005, Y corporation, a publicly traded corporation, becomes the target of a hostile takeover attempt by Z corporation. In an effort to defend against the takeover, Y pays legal fees to seek an injunction against the takeover and investment banking fees to locate a potential "white knight" acquirer. Y also pays amounts to complete a defensive recapitalization, and pays \$50,000 to an investment banker for a fairness opinion regarding Z's initial offer. Y's efforts to enjoin the takeover and locate a white knight acquirer are unsuccessful, and on March 15, 2005, Y's board of directors decides to abandon its defense against the takeover and negotiate with Z in an effort to obtain the highest possible price for its shareholders. After Y abandons its defense against the takeover, Y pays an investment banker \$1,000,000 for a second fairness opinion and for services rendered in negotiating with Z.

(ii) The legal fees paid by Y to seek an injunction against the takeover are not amounts paid in the process of investigating or otherwise pursuing the transaction with Z. Accordingly, these legal fees are not required to be capitalized under this section.

(iii) The investment banking fees paid to search for a white knight acquirer do not facilitate an acquisition of Y by a white knight because none of Y's costs with respect to a white knight were inherently facilitative amounts and because Y did not reach the date described in paragraph (e)(1) of this section with respect to a white knight. Accordingly, these amounts are not required to be capitalized under this section.

(iv) The amounts paid by Y to investigate and complete the recapitalization must be

capitalized under paragraph (a)(4) of this section.

(v) The \$50,000 paid to the investment bankers for a fairness opinion during Y's defense against the takeover and the \$1,000,000 paid to the investment bankers after Y abandons its defense against the takeover are inherently facilitative amounts with respect to the transaction with Z and must be capitalized under paragraph (a)(3) of this section.

Example 12. Corporate acquisition; acquisition by white knight. (i) Assume the same facts as in *Example 11*, except that Y's investment bankers identify three potential white knight acquirers: U corporation, V corporation, and W corporation. Y pays its investment bankers to conduct due diligence on the three potential white knight acquirers. On March 15, 2005, Y's board of directors approves a tentative acquisition agreement under which W agrees to acquire all of the stock of Y, and the investment bankers stop due diligence on U and V. On June 15, 2005, W acquires all of the stock of Y.

(ii) Under paragraph (e)(1) of this section, the amounts paid to conduct due diligence on U, V, and W prior to March 15, 2005 (the date of board of directors' approval) are not amounts paid to facilitate the acquisition of the stock of Y and are not required to be capitalized under this section. However, the amounts paid to conduct due diligence on W on and after March 15, 2005, facilitate the acquisition of the stock of Y and are required to be capitalized.

Example 13. Corporate acquisition; mutually exclusive costs. (i) Assume the same facts as in *Example 11*, except that Y's investment banker finds W, a white knight. Y and W execute a letter of intent on March 10, 2005. Under the terms of the letter of intent, Y must pay W a \$10,000,000 break-up fee if the merger with W does not occur. On April 1, 2005, Z significantly increases the amount of its offer, and Y decides to accept Z's offer instead of merging with W. Y pays its investment banker \$500,000 for inherently facilitative costs with respect to the potential merger with W. Y also pays its investment banker \$2,000,000 for due diligence costs with respect to the potential merger with W, \$1,000,000 of which relates to services performed on or after March 10, 2005.

(ii) Y's \$500,000 payment for inherently facilitative costs and Y's \$1,000,000 payment for due diligence activities performed on or after March 10, 2005 (the date the letter of intent with W is entered into) facilitate the potential merger with W. Because Y could not merge with both W and Z, under paragraph (c)(8) of this section the \$500,000 and \$1,000,000 payments also facilitate the transaction between Y and Z. Accordingly, Y must capitalize the \$500,000 and \$1,000,000 payments as amounts that facilitate the transaction with Z.

(iii) Similarly, because Y could not merge with both W and Z, under paragraph (c)(8) of this section the \$10,000,000 termination payment facilitates the transaction between Y and Z. Accordingly, Y must capitalize the \$10,000,000 termination payment as an amount that facilitates the transaction with Z.

Example 14. Break-up fee; transactions not mutually exclusive. N corporation and U corporation enter into an agreement under which U would acquire all the stock or all the assets of N in exchange for U stock. Under the terms of the agreement, if either party terminates the agreement, the terminating party must pay the other party \$10,000,000. U decides to terminate the agreement and pays N \$10,000,000. Shortly thereafter, U acquires all the stock of V corporation, a competitor of N. U had the financial resources to have acquired both N and V. U's \$10,000,000 payment does not facilitate U's acquisition of V. Accordingly, U is not required to capitalize the \$10,000,000 payment under this section.

Example 15. Corporate reorganization; initial public offering. Y corporation is a closely held corporation. Y's board of directors authorizes an initial public offering of Y's stock to fund future growth. Y pays \$5,000,000 in professional fees for investment banking services related to the determination of the offering price and legal services related to the development of the offering prospectus and the registration and issuance of stock. The investment banking and legal services are performed both before and after board authorization. Under paragraph (a)(8) of this section, the \$5,000,000 is an amount paid to facilitate a stock issuance.

Example 16. Auction. (i) N corporation seeks to dispose of all of the stock of its wholly owned subsidiary, P corporation, through an auction process and requests that each bidder submit a non-binding purchase offer in the form of a draft agreement. Q corporation hires an investment banker to assist in the preparation of Q's bid to acquire P and to conduct a due diligence investigation of P. On July 1, 2005, Q submits its draft agreement. On August 1, 2005, N informs Q that it has accepted Q's offer, and presents Q with a signed letter of intent to sell all of the stock of P to Q. On August 5, 2005, Q's board of directors approves the terms of the transaction and authorizes Q to execute the letter of intent. Q executes a binding letter of intent with N on August 6, 2005.

(ii) Under paragraph (e)(1) of this section, the amounts paid by Q to its investment banker that are not inherently facilitative and that are paid for activities performed prior to August 5, 2005 (the date Q's board of directors approves the transaction) are not amounts paid to facilitate the acquisition of P. Amounts paid by Q to its investment banker for activities performed on or after

August 5, 2005, and amounts paid by Q to its investment banker that are inherently facilitative amounts within the meaning of paragraph (e)(2) of this section are required to be capitalized under this section.

Example 17. Stock distribution. Z corporation distributes natural gas throughout state Y. The federal government brings an antitrust action against Z seeking divestiture of certain of Z's natural gas distribution assets. As a result of a court ordered divestiture, Z and the federal government agree to a plan of divestiture that requires Z to organize a subsidiary to receive the divested assets and to distribute the stock of the subsidiary to its shareholders. During 2005, Z pays \$300,000 to various independent contractors for the following services: studying customer demand in the area to be served by the divested assets, identifying assets to be transferred to the subsidiary, organizing the subsidiary, structuring the transfer of assets to the subsidiary to qualify as a tax-free transaction to Z, and distributing the stock of the subsidiary to the stockholders. Under paragraph (c)(3) of this section, Z is not required to capitalize any portion of the \$300,000 payments.

Example 18. Bankruptcy reorganization. (i) X corporation is the defendant in numerous lawsuits alleging tort liability based on X's role in manufacturing certain defective products. X files a petition for reorganization under Chapter 11 of the Bankruptcy Code in an effort to manage all of the lawsuits in a single proceeding. X pays its outside counsel to prepare the petition and plan of reorganization, to analyze adequate protection under the plan, to attend hearings before the Bankruptcy Court concerning the plan, and to defend against motions by creditors and tort claimants to strike the taxpayer's plan.

(ii) X's reorganization under Chapter 11 of the Bankruptcy Code is a reorganization within the meaning of paragraph (a)(4) of this section. Under paragraph (c)(4) of this section, amounts paid by X to its outside counsel to prepare, analyze or obtain approval of the portion of X's plan of reorganization that resolves X's tort liability do not facilitate the reorganization and are not required to be capitalized, provided that such amounts would have been treated as ordinary and necessary business expenses under section 162 had the bankruptcy proceeding not been instituted. All other amounts paid by X to its outside counsel for the services described above (including all amounts paid to prepare the bankruptcy petition) facilitate the reorganization and must be capitalized.

(m) *Effective date.* This section applies to amounts paid or incurred on or after December 31, 2003.

(n) *Accounting method changes—(1) In general.* A taxpayer seeking to change a method of accounting to comply with

this section must secure the consent of the Commissioner in accordance with the requirements of § 1.446-1(e). For the taxpayer's first taxable year ending on or after December 31, 2003, the taxpayer is granted the consent of the Commissioner to change its method of accounting to comply with this section, provided the taxpayer follows the administrative procedures issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in accounting method (for further guidance, for example, see Rev. Proc. 2002-9 (2002-1 C.B. 327) and § 601.601(d)(2)(ii)(b) of this chapter).

(2) *Scope limitations.* Any limitations on obtaining the automatic consent of the Commissioner do not apply to a taxpayer seeking to change to a method of accounting to comply with this section for its first taxable year ending on or after December 31, 2003.

(3) *Section 481(a) adjustment.* The section 481(a) adjustment for a change in method of accounting to comply with this section for a taxpayer's first taxable year ending on or after December 31, 2003 is determined by taking into account only amounts paid or incurred in taxable years ending on or after January 24, 2002.

[T.D. 9107, 69 FR 446, Jan. 5, 2004]

§ 1.263(a)-6 Election to deduct or capitalize certain expenditures.

(a) *In general.* Under certain provisions of the Internal Revenue Code (Code), taxpayers may elect to treat capital expenditures as deductible expenses or as deferred expenses, or to treat deductible expenses as capital expenditures.

(b) *Election provisions.* The sections referred to in paragraph (a) of this section include:

(1) Section 173 (circulation expenditures);

(2) Section 174 (research and experimental expenditures);

(3) Section 175 (soil and water conservation expenditures; endangered species recovery expenditures);

(4) Section 179 (election to expense certain depreciable business assets);

(5) Section 179A (deduction for clean-fuel vehicles and certain refueling property);

(6) Section 179B (deduction for capital costs incurred in complying with environmental protection agency sulfur regulations);

(7) Section 179C (election to expense certain refineries);

(8) Section 179D (energy efficient commercial buildings deduction);

(9) Section 179E (election to expense advanced mine safety equipment);

(10) Section 180 (expenditures by farmers for fertilizer);

(11) Section 181 (treatment of certain qualified film and television productions);

(12) Section 190 (expenditures to remove architectural and transportation barriers to the handicapped and elderly);

(13) Section 193 (tertiary injectants);

(14) Section 194 (treatment of reforestation expenditures);

(15) Section 195 (start-up expenditures);

(16) Section 198 (expensing of environmental remediation costs);

(17) Section 198A (expensing of qualified disaster expenses);

(18) Section 248 (organization expenditures of a corporation);

(19) Section 266 (carrying charges);

(20) Section 616 (development expenditures); and

(21) Section 709 (organization and syndication fees of a partnership).

(c) *Effective/applicability date*—(1) *In general.* This section applies to taxable years beginning on or after January 1, 2014. Except as provided in paragraphs (c)(2) and (c)(3) of this section, § 1.263(a)-3 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014. For the effective dates of the enumerated election provisions, see those Code sections and the regulations under those sections.

(2) *Early application of this section.* A taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012.

(3) *Optional application of TD 9564.* A taxpayer may choose to apply § 1.263(a)-6T as contained in TD 9564 (76 FR 81060) December 27, 2011, to taxable years beginning on or after January 1, 2012, and before January 1, 2014.

[T.D. 9636, 78 FR 57745, Sept. 19, 2013]

§ 1.263(b)-1

26 CFR Ch. I (4-1-17 Edition)

§ 1.263(b)-1 Expenditures for advertising or promotion of good will.

See § 1.162-14 for the rules applicable to a corporation which has elected to capitalize expenditures for advertising or the promotion of good will under the provisions of section 733 or section 451 of the Internal Revenue Code of 1939, in computing its excess profits tax credit under Subchapter E, Chapter 2, or Subchapter D, Chapter 1, of the Internal Revenue Code of 1939.

§ 1.263(c)-1 Intangible drilling and development costs in the case of oil and gas wells.

For rules relating to the option to deduct as expenses intangible drilling and development costs in the case of oil and gas wells, see § 1.612-4.

§ 1.263(e)-1 Expenditures in connection with certain railroad rolling stock.

(a) *Allowance of deduction*—(1) *Election*. Under section 263(e), for any taxable year beginning after December 31, 1969, a taxpayer may elect to treat certain expenditures paid or incurred during such taxable year as deductible repairs under section 162 or 212. This election applies only to expenditures described in paragraph (c) of this section in connection with the rehabilitation of a unit of railroad rolling stock (as defined in paragraph (b)(2) of this section) used by a domestic common carrier by railroad (as defined in paragraph (b) (3) and (4) of this section). However, an election under section 263(e) may not be made with respect to expenditures in connection with any unit of railroad rolling stock for which an election under section 263(f) and the regulations thereunder is in effect. An election made under section 263(e) is an annual election which may be made with respect to one or more of the units of railroad rolling stock owned by the taxpayer.

(2) *Special 20 percent rule*. Section 263(e) shall not apply if, under paragraph (d) of this section, expenditures paid or incurred during any period of 12 calendar months in connection with the rehabilitation of a unit exceed 20 percent of the basis (as defined in paragraph (b)(1) of this section) of such unit in the hands of the taxpayer. However,

section 263(e) does not constitute a limit on the deduction of expenditures for repairs which are deductible without regard to such section. Accordingly, amounts otherwise deductible as repairs will continue to be deductible even though such amounts exceed 20 percent of the basis of the unit of railroad rolling stock in the hands of the taxpayer.

(3) *Time and manner of making election*.

(i) An election by a taxpayer under section 263(e) shall be made by a statement to that effect attached to its income tax return or amended income tax return for the taxable year for which the election is made if such return or amended return is filed no later than the time prescribed by law (including extensions thereof) for filing the return for the taxable year of election. An election under section 263(e) may be made with respect to one or more of the units of railroad rolling stock owned by the taxpayer. If an election is not made within the time and in the manner prescribed in this subparagraph, no election may be made (by the filing of an amended return or in any other manner) with respect to the taxable year.

(ii) If the taxpayer has filed a return on or before March 14, 1973, and has claimed a deduction under section 162 or 212 by reason of section 263(e), and if the taxpayer does not desire to make an election under section 263(e) for the taxable year with respect to which such return was filed, the taxpayer shall file an amended return for such taxable year on or before May 14, 1973, and shall pay any additional tax due for such year. The taxpayer shall also file an amended return for each taxable year which is affected by the filing of an amended return under the preceding sentence and shall pay any additional tax due for such year. Nothing in this subdivision shall be construed as extending the time specified in section 6511 within which a claim for credit or refund may be filed.

(iii) If an election under section 263(e) was not made at the time the return for a taxable year was filed, and it is subsequently determined that an expenditure was erroneously treated as

an expenditure which was not in connection with rehabilitation (as determined under paragraph (c) of this section), an election under section 263(e) may be made with respect to the unit of railroad rolling stock for which such expenditure was made for such taxable year, notwithstanding any provision in this subparagraph (3) to the contrary. Nothing in this subdivision shall be construed as extending the time specified in section 6511 within which a claim for credit or refund may be filed.

(iv) The statement required by subdivision (i) of this subparagraph shall include the following information:

(a) The total number of units of railroad rolling stock with respect to which an election is being made under section 263(e).

(b) The aggregate basis (as defined in paragraph (b) (1) of this section) of the units described in (a) of this subdivision (iv), and

(c) The total deduction being claimed under section 263(e) for the taxable year.

(b) *Definitions*—(1) *Basis*. (i) In general, for purposes of section 263(e) the basis of a unit of railroad rolling stock shall be the adjusted basis of such unit determined without regard to the adjustments provided in paragraphs (1), (2), and (3) of section 1016(a) and section 1017. Thus, the basis of property would generally be its cost without regard to adjustments to basis such as for depreciation or for capital improvements. If the basis of a unit in the hands of a transferee is determined in whole or in part by reference to its basis in the hands of the transferor, for example, by reason of the application of section 362 (relating to basis to corporations), 374 (relating to gain or loss not recognized in certain railroad reorganizations), or 723 (relating to the basis of property contributed to a partnership), then the basis of such unit in the hands of the transferor for purposes of section 263(e) shall be its basis for purposes of section 263(e) in the hands of the transferee. Similarly, when the basis of a unit of railroad rolling stock in the hands of the taxpayer is determined in whole or in part by reference to the basis of another unit, for example, by reason of the application of the first sentence of section 1033(c) (relat-

ing to involuntary conversions), then the basis of the latter unit for purposes of section 263(e) shall be the basis for purposes of section 263(e) of the former unit. The question whether a capital expenditure in connection with a unit of railroad rolling stock results in the retirement of such unit and the creation of another unit of railroad rolling stock shall be determined without regard to rules under the uniform system of accounts prescribed by the Interstate Commerce Commission.

(ii) For example, if a unit of railroad rolling stock has a cost to M of \$10,000 and because of depreciation adjustments of \$4,000 and capital expenditures of \$3,000, such unit has an adjusted basis in the hands of M of \$9,000, the basis for purposes of section 263(e) of such unit in the hands of M is \$10,000. Further, if M transfers such unit to N in a transaction in which no gain or loss is recognized such as, for example, a transaction to which section 351(a) (relating to a transfer to a corporation controlled by the transferor) applies, the basis of such unit for purposes of section 263(e) is \$10,000 in the hands of N.

(2) *Railroad rolling stock*. For purposes of this section, the term *unit* or *unit of railroad rolling stock* means a unit of transportation equipment the expenditures for which are of a type chargeable (or in the case of property leased to a domestic common carrier by railroad, would be chargeable) to the equipment investment accounts in the uniform system of accounts for railroad companies prescribed by the Interstate Commerce Commission (49 CFR Part 1201), but only if (i) such unit exclusively moves on, moves under, or is guided by rail, and (ii) such unit is not a locomotive. Thus, for example, a unit of railroad rolling stock includes a box car, a gondola car, a passenger car, a car designed to carry truck trailers and containerized freight, a wreck crane, and a bunk car. However, such term does not include equipment which does not exclusively move on, move under, or is not exclusively guided by rail such as, for example, a barge, a tugboat, a container which is used on cars designed to carry containerized freight, a truck trailer, or an automobile. A locomotive is self-propelled

§ 1.263(e)-1

26 CFR Ch. I (4-1-17 Edition)

equipment, the sole function of which is to push or pull railroad rolling stock. Thus, a self-propelled passenger or freight car is not a locomotive.

(3) *Domestic common carrier by railroad.* The term *domestic common carrier by railroad* means a railroad subject to regulation under Part I of the Interstate Commerce Act (49 U.S.C. 1 *et seq.*) or a railroad which would be subject to regulation under Part I of the Interstate Commerce Act if it were engaged in interstate commerce.

(4) *Use.* For purposes of this section, a unit of railroad rolling stock is not used by a domestic common carrier by railroad if it is owned by a person other than a domestic common carrier by railroad and (i) is exclusively used for transportation by the owner or (ii) is exclusively used for transportation by another person which is not a domestic common carrier by railroad. Thus, for example, a unit of railroad rolling stock which is owned by a person which is not a domestic common carrier by railroad and is leased to a manufacturing company by the owner is not a unit of railroad rolling stock used by a domestic common carrier by railroad.

(c) *Expenditures considered in connection with rehabilitation.* For purposes of section 263(e) and this section all expenditures which would be properly chargeable to capital account but for the application of section 263 (e) or (f) shall be considered to be expenditures in connection with the rehabilitation of a unit of railroad rolling stock. Expenditures which are paid or incurred in connection with incidental repairs or maintenance of a unit of railroad rolling stock and which are deductible without regard to section 263 (e) or (f) shall not be included in any determination or computation under section 263(e) and shall not be treated as paid or incurred in connection with the rehabilitation of a unit of railroad rolling stock for purposes of section 263(e). The determination of whether an item would be, but for section 263 (e) or (f), properly chargeable to capital account shall be made in a manner consistent with the principles for classification of expenditures as between capital and expenses under the Internal Revenue Code. See, for example, §§1.162-4,

1.263(a)-1, 1.263(a)-2, and paragraph (a)(4) (ii) and (iii) of §1.446-1. An expenditure shall be classified as capital or as expense without regard to its classification under the uniform system of accounts prescribed by the Interstate Commerce Commission.

(d) *20-percent limitation*—(1) *In general.* No expenditures in connection with the rehabilitation of a unit of railroad rolling stock shall be treated as a deductible repair by reason of an election under section 263(e) if, during any period of 12 calendar months in which the month the expenditure is included falls, all such expenditures exceed an amount equal to 20 percent of the basis (as defined in paragraph (b)(1) of this section) of such unit in the hands of the taxpayer. All such expenditures shall be included in the computation of the 20-percent limitation even if such expenditures were deducted under section 263(f) in either the preceding or succeeding taxable year. Solely for purposes of the 20-percent limitation in this paragraph, such expenditures shall be deemed to be included in the month in which a rehabilitation of the unit of railroad rolling stock is completed. For the requirement that expenditures treated as repairs solely by reason of an election under section 263(e) be deducted in the taxable year paid or incurred, see paragraph (a) of this section.

(2) *12-month period.* For purposes of this section, any period of 12 calendar months shall consist of any 12 consecutive calendar months except that calendar months prior to the calendar month of January 1970 shall not be included in determining such period.

(3) *Period for certain corporate acquisitions.* If a unit of railroad rolling stock to which section 263(e) applies is sold, exchanged, or otherwise disposed of in a transaction in which its basis in the hands of the transferee is determined in whole or in part by reference to its basis in the hands of the transferor (see paragraph (b)(1) of this section), calendar months during which such unit is in the hands of the transferor and in the hands of such transferee shall both be included in the calendar months

used by the transferor and the transferee to determine any period of 12 calendar months for purposes of section 263(e).

(4) *Deduction allowed in year paid or incurred.* If, based on the information available when the income tax return for a taxable year is filed, an expenditure paid or incurred in such taxable year would be deductible by reason of the application of section 263(e) but for the fact that it cannot be established whether the 20-percent limitation in subparagraph (1) of this paragraph will be exceeded, the expenditure shall be deducted for such taxable year. If by reason of the application of such 20-percent limitation it is subsequently determined that such expenditure is not deductible as a repair, an amended return shall be filed for the year in which such deduction was treated as a deductible repair and additional tax, if any, for such year shall be paid. Appropriate adjustment with respect to the taxpayer's tax liability for any other affected year shall be made. Nothing in this subparagraph shall be construed as extending the time specified in section 6511 within which a claim for credit or refund may be filed.

(e) *Recordkeeping requirements*—(1) *In general.* Such records as will enable the accurate determination of the expenditures which may be subject to the treatment provided in section 263(e) shall be maintained. No deduction shall be allowed under section 162 or 212 by reason of section 263(e) with respect to a unit unless the taxpayer substantiates by adequate records that expenditures in connection with such unit of railroad rolling stock meet the requirements and limitations of this section.

(2) *Separate records.* A separate section 263(e) record shall be maintained for each unit with respect to which an election under section 263(e) is made. Such record shall:

- (i) Identify the unit,
- (ii) State the basis (as defined in paragraph (b)(1) of this section) and the date of acquisition of the unit,
- (iii) Enumerate for each unit the amount of all expenditures incurred in connection with rehabilitation of such unit which would, but for section 263(e) or (f), be properly chargeable to capital account (including expenditures

incurred by the taxpayer in connection with rehabilitation of such unit undertaken by a person other than the taxpayer) regardless of whether such expenditures during any 12-month period exceed 20 percent of the basis of such unit,

(iv) Describe the nature of the work in connection with each expenditure, and

(v) Specify the calendar month in which the rehabilitation is completed and the taxable year in which each expenditure is paid or incurred.

A section 263(e) record need only be prepared for a unit of railroad rolling stock for the period beginning on the first day of the eleventh calendar month immediately preceding the month in which the rehabilitation of such unit is completed and ending on the last day of the eleventh calendar month immediately succeeding such month. No section 263(e) record need be prepared for calendar months before January 1970.

(3) *Records for certain expenditures:* Expenditures determined to be incidental repairs and maintenance (referred to in paragraph (c) of this section) shall not be entered in the section 263(e) record. However, each taxpayer shall maintain records to reflect that such expenditures are properly deductible.

(4) *Convenience rule.* In general, expenditures and information maintained in compliance with subparagraphs (1) and (2) of this paragraph shall be recorded in the section 263(e) record of the specific unit with respect to which such expenditures are incurred. However, when a group of units of the same type are rehabilitated in a single project and the expenditure for each unit in the project will approximate the average expenditure per unit for the project, expenditures for the project may be aggregated without regard to the unit in the project with respect to which each expenditure is connected, and an amount equal to the aggregate expenditures for the project divided by the number of units in the project may be entered in the section 263(e) account of each unit in the project.

§ 1.263(f)-1

(f) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. M Corporation, a domestic common carrier by railroad, uses the calendar year as its taxable year. M owns and uses several gondola cars to which an election under section 263(e) applies for its taxable years 1970-1972. Gondola car No.1 has a basis (defined in paragraph (b)(1) of this section) of \$10,000. No expenditures properly chargeable to the section 263(e) record are made on gondola car No. 1 in 1970 and 1971, except in January 1971. In January 1971, M at a cost of \$1,500 performed rehabilitation work on gondola car No. 1. Such amount was properly entered in the section 263(e) record for gondola car No.1. Since the expenditures in such record do not exceed an amount equal to 20 percent of the basis of gondola car No. 1 (\$2,000) during any period of 12 calendar months in which January 1971 falls, the expenditures during January 1971 shall be treated as a deductible expense regardless of what the treatment would have been if section 263(e) had not been enacted.

Example 2. Assume the same facts as in *Example 1.* Assume further that for 1970, 1971, and 1972, only the following expenditures in connection with rehabilitation which would, but for section 263(e), be properly chargeable to capital account were deemed included for gondola car No. 2:

(a) December 1970	\$1,500
(b) November 1971	600
(c) December 1971	400
(d) January 1972	1,050

Assume further that gondola car No. 2 has a basis (as defined in paragraph (b) (1) of this section) equal to \$10,000, that M files its tax return by September 15 following each taxable year, and that each rehabilitation was completed in the month in which expenditures in connection with it were incurred. Any expenditures in connection with each gondola car (No. 1 or No. 2) have no effect on the treatment of expenditures in connection with the other gondola car. With respect to gondola car No. 2, the expenditures of December 1970 are treated as deductible repairs at the time M's income tax return for 1970 is filed because, based on the information available when the income tax return for 1970 is filed, such expenditure would be deductible by reason of application of section 263(e) but for the fact that it cannot be established whether the 20-percent limitation in paragraph (d)(1) of this section will be exceeded. Nevertheless, because such expenditures during the period of 12 calendar months including calendar months December 1970 and November 1971 exceed \$2,000, the December 1970 rehabilitation expenditures are not subject to the provisions of section 263(e). Because such rehabilitation expendi-

26 CFR Ch. I (4-1-17 Edition)

tures during the period of 12 calendar months including calendar months February 1971 and January 1972 exceed \$2,000, rehabilitation expenditures in 1971 are not subject to the provisions of section 263(e). Similarly, the 1972 rehabilitation expenditures are not subject to the provisions of section 263(e).

[T.D. 7257, 38 FR 4255, Feb. 12, 1973]

§ 1.263(f)-1 Reasonable repair allowance.

(a) For rules regarding the election of the repair allowance authorized by section 263(f), the definition of repair allowance property, and the conditions under which an election may be made, see paragraphs (d) (2) and (f) of § 1.167(a)-11. An election may be made under this section for a taxable year only if the taxpayer makes an election under § 1.167(a)-11 for such taxable year.

(Sec. 263(f), 85 Stat. 509 (26 U.S.C. 263))

[T.D. 7272, 38 FR 9986, Apr. 23, 1973; 38 FR 12919, May 17, 1973, as amended by T.D. 7593, 44 FR 5421, Jan. 26, 1979]

§ 1.263A-0 Outline of regulations under section 263A.

This section lists the paragraphs in §§ 1.263A-1 through 1.263A-4 and §§ 1.263A-7 through 1.263A-15 as follows:

§ 1.263A-1 Uniform Capitalization of Costs.

- (a) Introduction.
 - (1) In general.
 - (2) Effective dates.
 - (3) General scope.
 - (i) Property to which section 263A applies.
 - (ii) Property produced.
 - (iii) Property acquired for resale.
 - (iv) Inventories valued at market.
 - (v) Property produced in a farming business.
 - (vi) Creative property.
 - (vii) Property produced or property acquired for resale by foreign persons.
 - (b) Exceptions.
 - (1) Small resellers.
 - (2) Long-term contracts.
 - (3) Costs incurred in certain farming businesses.
 - (4) Costs incurred in raising, harvesting, or growing timber.
 - (5) Qualified creative expenses.
 - (6) Certain not-for-profit activities.
 - (7) Intangible drilling and development costs.
 - (8) Natural gas acquired for resale.
 - (i) Cushion gas.
 - (ii) Emergency gas.
 - (9) Research and experimental expenditures.

Internal Revenue Service, Treasury

§ 1.263A-0

(10) Certain property that is substantially constructed.

(11) Certain property provided incident to services.

(i) In general.

(ii) Definition of services.

(iii) De minimis property provided incident to services.

(12) De minimis rule for certain producers with total indirect costs of \$200,000 or less.

(13) Exception for the origination of loans.

(c) General operation of section 263A.

(1) Allocations.

(2) Otherwise deductible.

(3) Capitalize.

(4) Recovery of capitalized costs.

(5) Costs allocable only to property sold.

(d) Definitions.

(1) Self-constructed assets.

(2) Section 471 costs.

(i) In general.

(ii) New taxpayers.

(iii) Method changes.

(3) Additional section 263A costs.

(4) Section 263A costs.

(e) Types of costs subject to capitalization.

(1) In general.

(2) Direct costs.

(i) Producers.

(A) Direct material costs.

(B) Direct labor costs.

(ii) Resellers.

(3) Indirect costs.

(i) In general.

(ii) Examples of indirect costs required to be capitalized.

(A) Indirect labor costs.

(B) Officers' compensation.

(C) Pension and other related costs.

(D) Employee benefit expenses.

(E) Indirect material costs.

(F) Purchasing costs.

(G) Handling costs.

(A) In general.

(B) Development of burden rates.

(C) Operation of the burden rate method.

(ii) Standard cost method.

(A) In general.

(B) Treatment of variances.

(4) Reasonable allocation methods.

(g) Allocating categories of costs.

(1) Direct materials.

(2) Direct labor.

(3) Indirect costs.

(4) Service costs.

(i) In general.

(ii) De minimis rule.

(iii) Methods for allocating mixed service costs.

(A) Direct reallocation method.

(B) Step-allocation method.

(C) Examples.

(iv) Illustrations of mixed service cost allocations using reasonable factors or relationships.

(A) Security services.

(B) Legal services.

(C) Centralized payroll services.

(D) Centralized data processing services.

(E) Engineering and design services.

(F) Safety engineering services.

(v) Accounting method change.

(h) Simplified service cost method.

(1) Introduction.

(2) Eligible property.

(i) In general.

(A) Inventory property.

(B) Non-inventory property held for sale.

(C) Certain self-constructed assets.

(D) Self-constructed assets produced on a repetitive basis.

(ii) Election to exclude self-constructed assets.

(3) General allocation formula.

(4) Labor-based allocation ratio.

(5) Production cost allocation ratio.

§ 1.263A-0

26 CFR Ch. I (4-1-17 Edition)

[T.D. 8482, 58 FR 42207, Aug. 9, 1993, as amended by T.D. 8584, 59 FR 67196, Dec. 29, 1994; 60 FR 16574, Mar. 31, 1995; T.D. 8728, 62 FR 42054, Aug. 5, 1997; T.D. 8897, 65 FR 50643, Aug. 21, 2000; T.D. 9636, 78 FR 57745, Sept. 19, 2013; T.D. 9652, 79 FR 2096, Jan. 13, 2014]

§ 1.263A-1 Uniform capitalization of costs.

(a) *Introduction*—(1) *In general*. The regulations under §§ 1.263A-1 through 1.263A-6 provide guidance to taxpayers that are required to capitalize certain costs under section 263A. These regulations generally apply to all costs required to be capitalized under section 263A except for interest that must be capitalized under section 263A(f) and the regulations thereunder. Statutory or regulatory exceptions may provide that section 263A does not apply to certain activities or costs; however, those activities or costs may nevertheless be subject to capitalization requirements under other provisions of the Internal Revenue Code and regulations.

(2) *Effective dates*. (i) In general, this section and §§ 1.263A-2 and 1.263A-3 apply to costs incurred in taxable years beginning after December 31, 1993. In the case of property that is inventory

in the hands of the taxpayer, however, these sections are effective for taxable years beginning after December 31, 1993. Changes in methods of accounting necessary as a result of the rules in this section and §§ 1.263A-2 and 1.263A-3 must be made under terms and conditions prescribed by the Commissioner. Under these terms and conditions, the principles of § 1.263A-7 must be applied in revaluing inventory property.

(ii) For taxable years beginning before January 1, 1994, taxpayers must take reasonable positions on their federal income tax returns when applying section 263A. For purposes of this paragraph (a)(2)(iii), a reasonable position is a position consistent with the temporary regulations, revenue rulings, revenue procedures, notices, and announcements concerning section 263A applicable in taxable years beginning before January 1, 1994. See § 601.601(d)(2)(ii)(b) of this chapter.

(3) *General scope*—(i) *Property to which section 263A applies*. Taxpayers subject to section 263A must capitalize all direct costs and certain indirect costs properly allocable to—

(A) Real property and tangible personal property produced by the taxpayer; and

(B) Real property and personal property described in section 1221(1), which is acquired by the taxpayer for resale.

(ii) *Property produced*. Taxpayers that produce real property and tangible personal property (producers) must capitalize all the direct costs of producing the property and the property's properly allocable share of indirect costs (described in paragraphs (e)(2)(i) and (3) of this section), regardless of whether the property is sold or used in the taxpayer's trade or business. See § 1.263A-2 for rules relating to producers.

(iii) *Property acquired for resale*. Retailers, wholesalers, and other taxpayers that acquire property described in section 1221(1) for resale (resellers) must capitalize the direct costs of acquiring the property and the property's properly allocable share of indirect costs (described in paragraphs (e)(2)(ii) and (3) of this section). See § 1.263A-3 for rules relating to resellers. See also section 263A(b)(2)(B), which excepts from section 263A personal property acquired for resale by a small reseller.

(iv) *Inventories valued at market.* Section 263A does not apply to inventories valued at market under either the market method or the lower of cost or market method if the market valuation used by the taxpayer generally equals the property's fair market value. For purposes of this paragraph (a)(3)(iv), the term fair market value means the price at which the taxpayer sells its inventory to its customers (e.g., as in the market value definition provided in § 1.471-4(b)) less, if applicable, the direct cost of disposing of the inventory. However, section 263A does apply in determining the market value of any inventory for which market is determined with reference to replacement cost or reproduction cost. See §§ 1.471-4 and 1.471-5.

(v) *Property produced in a farming business.* Section 263A generally requires taxpayers engaged in a farming business to capitalize certain costs. See sections 263A(d) and 263A(e) and § 1.263A-4 for rules relating to taxpayers engaged in a farming business.

(vi) *Creative property.* Section 263A generally requires taxpayers engaged in the production and resale of creative property to capitalize certain costs.

(vii) *Property produced or property acquired for resale by foreign persons.* Section 263A generally applies to foreign persons.

(b) *Exceptions*—(1) *Small resellers.* See section 263A(b)(2)(B) for the \$10,000,000 gross receipts exception for small resellers of personal property. See § 1.263A-3(b) for rules relating to this exception. See also the exception for small resellers with de minimis production activities in § 1.263A-3(a)(2)(ii) and the exception for small resellers that have property produced under contract in § 1.263A-3(a)(3).

(2) *Long-term contracts.* Except for certain home construction contracts described in section 460(e)(1), section 263A does not apply to any property produced by the taxpayer pursuant to a long-term contract as defined in section 460(f), regardless of whether the taxpayer uses an inventory method to account for such production.

(3) *Costs incurred in certain farming businesses.* See section 263A(d) for an exception for costs paid or incurred in certain farming businesses. See

§ 1.263A-4 for specific rules relating to taxpayers engaged in the trade or business of farming.

(4) *Costs incurred in raising, harvesting, or growing timber.* See section 263A(c)(5) for an exception for costs paid or incurred in raising, harvesting, or growing timber and certain ornamental trees. See § 1.263A-4, however, for rules relating to taxpayers producing certain trees to which section 263A applies.

(5) *Qualified creative expenses.* See section 263A(h) for an exception for qualified creative expenses paid or incurred by certain free-lance authors, photographers, and artists.

(6) *Certain not-for-profit activities.* See section 263A(c)(1) for an exception for property produced by a taxpayer for use by the taxpayer other than in a trade or business or an activity conducted for profit. This exception does not apply, however, to property produced by an exempt organization in connection with its unrelated trade or business activities.

(7) *Intangible drilling and development costs.* See section 263A(c)(3) for an exception for intangible drilling and development costs. Additionally, section 263A does not apply to any amount allowable as a deduction under section 59(e) with respect to qualified expenditures under sections 263(c), 616(a), or 617(a).

(8) *Natural gas acquired for resale.* Under this paragraph (b)(8), section 263A does not apply to any costs incurred by a taxpayer relating to natural gas acquired for resale to the extent such costs would otherwise be allocable to cushion gas.

(i) *Cushion gas.* Cushion gas is the portion of gas stored in an underground storage facility or reservoir that is required to maintain the level of pressure necessary for operation of the facility. However, section 263A applies to costs incurred by a taxpayer relating to natural gas acquired for resale to the extent such costs are properly allocable to emergency gas.

(ii) *Emergency gas.* Emergency gas is natural gas stored in an underground storage facility or reservoir for use during periods of unusually heavy customer demand.

(9) *Research and experimental expenditures.* See section 263A(c)(2) for an exception for any research and experimental expenditure allowable as a deduction under section 174 or the regulations thereunder. Additionally, section 263A does not apply to any amount allowable as a deduction under section 59(e) with respect to qualified expenditures under section 174.

(10) *Certain property that is substantially constructed.* Section 263A does not apply to any property produced by a taxpayer for use in its trade or business if substantial construction occurred before March 1, 1986.

(i) For purposes of this section, substantial construction is deemed to have occurred if the lesser of—

(A) 10 percent of the total estimated costs of construction; or

(B) The greater of \$10 million or 2 percent of the total estimated costs of construction, was incurred before March 1, 1986.

(ii) For purposes of the provision in paragraph (b)(10)(i) of this section, the total estimated costs of construction shall be determined by reference to a reasonable estimate, on or before March 1, 1986, of such amount. Assume, for example, that on March 1, 1986, the estimated costs of constructing a facility were \$150 million. Assume that before March 1, 1986, \$12 million of construction costs had been incurred. Based on the above facts, substantial construction would be deemed to have occurred before March 1, 1986, because \$12 million (the costs of construction incurred before such date) is greater than \$10 million (the lesser of \$15 million; or the greater of \$10 million or \$3 million). For purposes of this provision, construction costs are defined as those costs incurred after construction has commenced at the site of the property being constructed (unless the property will not be located on land and, therefore, the initial construction of the property must begin at a location other than the intended site). For example, in the case of a building, construction commences when work begins on the building, such as the excavation of the site, the pouring of pads for the building, or the driving of foundation pilings into the ground. Preliminary activities such as project engi-

neering and architectural design do not constitute the commencement of construction, nor are such costs considered construction costs, for purposes of this paragraph (b)(10).

(11) *Certain property provided incident to services—(i) In general.* Under this paragraph (b)(11), section 263A does not apply to property that is provided to a client (or customer) incident to the provision of services by the taxpayer if the property provided to the client is—

(A) De minimis in amount; and

(B) Not inventory in the hands of the service provider.

(ii) *Definition of services.* For purposes of this paragraph (b)(11), services is defined with reference to its ordinary and accepted meaning under federal income tax principles. In determining whether a taxpayer is a bona-fide service provider under this paragraph (b)(11), the nature of the taxpayer's trade or business and the facts and circumstances surrounding the taxpayer's trade or business activities must be considered. Examples of taxpayers qualifying as service providers under this paragraph include taxpayers performing services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting.

(iii) *De minimis property provided incident to services.* In determining whether property provided to a client by a service provider is de minimis in amount, all facts and circumstances, such as the nature of the taxpayer's trade or business and the volume of its service activities in the trade or business, must be considered. A significant factor in making this determination is the relationship between the acquisition or direct materials costs of the property that is provided to clients and the price that the taxpayer charges its clients for its services and the property. For purposes of this paragraph (b)(11), if the acquisition or direct materials cost of the property provided to a client incident to the services is less than or equal to five percent of the price charged to the client for the services and property, the property is de minimis. If the acquisition or direct materials cost of the property exceeds five percent of the price charged for the services and property, the property

may be de minimis if additional facts and circumstances so indicate.

(12) *De minimis rule for certain producers with total indirect costs of \$200,000 or less.* See § 1.263A-2(b)(3)(iv) for a de minimis rule that treats producers with total indirect costs of \$200,000 or less as having no additional section 263A costs (as defined in paragraph (d)(3) of this section) for purposes of the simplified production method.

(13) *Exception for the origination of loans.* For purposes of section 263A(b)(2)(A), the origination of loans is not considered the acquisition of intangible property for resale. (But section 263A(b)(2)(A) does include the acquisition by a taxpayer of pre-existing loans from other persons for resale.)

(c) *General operation of section 263A—*
(1) *Allocations.* Under section 263A, taxpayers must capitalize their direct costs and a properly allocable share of their indirect costs to property produced or property acquired for resale. In order to determine these capitalizable costs, taxpayers must allocate or apportion costs to various activities, including production or resale activities. After section 263A costs are allocated to the appropriate production or resale activities, these costs are generally allocated to the items of property produced or property acquired for resale during the taxable year and capitalized to the items that remain on hand at the end of the taxable year. See however, the simplified production method and the simplified resale method in §§ 1.263A-2(b) and 1.263A-3(d).

(2) *Otherwise deductible.* (i) Any cost which (but for section 263A and the regulations thereunder) may not be taken into account in computing taxable income for any taxable year is not treated as a cost properly allocable to property produced or acquired for resale under section 263A and the regulations thereunder. Thus, for example, if a business meal deduction is limited by section 274(n) to 80 percent of the cost of the meal, the amount properly allocable to property produced or acquired for resale under section 263A is also limited to 80 percent of the cost of the meal.

(ii) The amount of any cost required to be capitalized under section 263A may not be included in inventory or

charged to capital accounts or basis any earlier than the taxable year during which the amount is incurred within the meaning of § 1.446-1(c)(1)(ii).

(3) *Capitalize.* Capitalize means, in the case of property that is inventory in the hands of a taxpayer, to include in inventory costs and, in the case of other property, to charge to a capital account or basis.

(4) *Recovery of capitalized costs.* Costs that are capitalized under section 263A are recovered through depreciation, amortization, cost of goods sold, or by an adjustment to basis at the time the property is used, sold, placed in service, or otherwise disposed of by the taxpayer. Cost recovery is determined by the applicable Internal Revenue Code and regulation provisions relating to use, sale, or disposition of property.

(5) *Costs allocable to property sold.* A cost that is allocated under this section, § 1.263A-2, or § 1.263A-3 entirely to property sold must be included in cost of goods sold and may not be included in determining the cost of goods on hand at the end of the taxable year.

(d) *Definitions—*(1) *Self-constructed assets.* Self-constructed assets are assets produced by a taxpayer for use by the taxpayer in its trade or business. Self-constructed assets are subject to section 263A.

(2) *Section 471 costs—*(i) *In general.* Except as otherwise provided in paragraphs (d)(2)(ii) and (iii) of this section, for purposes of the regulations under section 263A, a taxpayer's section 471 costs are the costs, other than interest, capitalized under its method of accounting immediately prior to the effective date of section 263A. Thus, although section 471 applies only to inventories, section 471 costs include any non-inventory costs, other than interest, capitalized or included in acquisition or production costs under the taxpayer's method of accounting immediately prior to the effective date of section 263A.

(ii) *New taxpayers.* In the case of a new taxpayer, section 471 costs are those acquisition or production costs, other than interest, that would have been required to be capitalized by the taxpayer if the taxpayer had been in existence immediately prior to the effective date of section 263A.

(iii) *Method changes.* If a taxpayer included a cost described in § 1.471-11(c)(2)(iii) in its inventoriable costs immediately prior to the effective date of section 263A, that cost is included in the taxpayer's section 471 costs under paragraph (d)(2)(i) of this section. Except as provided in the following sentence, a change in the financial reporting practices of a taxpayer for costs described in § 1.471-11(c)(2)(iii) subsequent to the effective date of section 263A does not affect the classification of these costs as section 471 costs. A taxpayer may change its established methods of accounting used in determining section 471 costs only with the consent of the Commissioner as required under section 446(e) and the regulations thereunder.

(3) *Additional section 263A costs.* Additional section 263A costs are defined as the costs, other than interest, that were not capitalized under the taxpayer's method of accounting immediately prior to the effective date of section 263A (adjusted as appropriate for any changes in methods of accounting for section 471 costs under paragraph (d)(2)(iii) of this section), but that are required to be capitalized under section 263A. For new taxpayers, additional section 263A costs are defined as the costs, other than interest, that the taxpayer must capitalize under section 263A, but which the taxpayer would not have been required to capitalize if the taxpayer had been in existence prior to the effective date of section 263A.

(4) *Section 263A costs.* Section 263A costs are defined as the costs that a taxpayer must capitalize under section 263A. Thus, section 263A costs are the sum of a taxpayer's section 471 costs, its additional section 263A costs, and interest capitalizable under section 263A(f).

(e) *Types of costs subject to capitalization—(1) In general.* Taxpayers subject to section 263A must capitalize all direct costs and certain indirect costs properly allocable to property produced or property acquired for resale. This paragraph (e) describes the types of costs subject to section 263A.

(2) *Direct costs—(i) Producers.* Producers must capitalize direct material costs and direct labor costs.

(A) *Direct material costs.* *Direct materials costs* include the cost of those materials that become an integral part of specific property produced and those materials that are consumed in the ordinary course of production and that can be identified or associated with particular units or groups of units of property produced. For example, a cost described in § 1.162-3, relating to the cost of a material or supply, may be a direct material cost.

(B) *Direct labor costs* include the costs of labor that can be identified or associated with particular units or groups of units of specific property produced. For this purpose, labor encompasses full-time and part-time employees, as well as contract employees and independent contractors. Direct labor costs include all elements of compensation other than employee benefit costs described in paragraph (e)(3)(ii)(D) of this section. Elements of direct labor costs include basic compensation, overtime pay, vacation pay, holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983), shift differential, payroll taxes, and payments to a supplemental unemployment benefit plan.

(ii) *Resellers.* Resellers must capitalize the acquisition costs of property acquired for resale. In the case of inventory, the acquisition cost is the cost described in § 1.471-3(b).

(3) *Indirect costs—(i) In general.* (A) Indirect costs are defined as all costs other than direct material costs and direct labor costs (in the case of property produced) or acquisition costs (in the case of property acquired for resale). Taxpayers subject to section 263A must capitalize all indirect costs properly allocable to property produced or property acquired for resale. Indirect costs are properly allocable to property produced or property acquired for resale when the costs directly benefit or are incurred by reason of the performance of production or resale activities. Indirect costs may directly benefit or be incurred by reason of the performance of production or resale activities even if the costs are calculated as a percentage of revenue or gross profit from the sale of inventory, are determined by reference to the number of units of

property sold, or are incurred only upon the sale of inventory. Indirect costs may be allocable to both production and resale activities, as well as to other activities that are not subject to section 263A. Taxpayers must make a reasonable allocation of indirect costs between production, resale, and other activities.

(B) *Example.* The following example illustrates the provisions of this paragraph (e)(3)(i):

Example. (i) Taxpayer A manufactures tablecloths and other linens. A enters into a licensing agreement with Company L under which A may label its tablecloths with L's trademark if the tablecloths meet certain specified quality standards. In exchange for its right to use L's trademark, the licensing agreement requires A to pay L a royalty of \$X for each tablecloth carrying L's trademark that A sells. The licensing agreement does not require A to pay L any minimum or lump-sum royalties.

(ii) The licensing agreement provides A with the right to use L's intellectual property, a trademark. The licensing agreement also requires A to conduct its production activities according to certain standards as a condition of exercising that right. Thus, A's right to use L's trademark under the licensing agreement is directly related to A's production of tablecloths. The royalties the licensing agreement requires A to pay for using L's trademark are the costs A incurs in exchange for these rights. Therefore, although A incurs royalty costs only when A sells a tablecloth carrying L's trademark, the royalty costs directly benefit production activities and are incurred by reason of production activities within the meaning of paragraph (e)(3)(i)(A) of this section.

(ii) *Examples of indirect costs required to be capitalized.* The following are examples of indirect costs that must be capitalized to the extent they are properly allocable to property produced or property acquired for resale:

(A) *Indirect labor costs.* Indirect labor costs include all labor costs (including the elements of labor costs set forth in paragraph (e)(2)(i) of this section) that cannot be directly identified or associated with particular units or groups of units of specific property produced or property acquired for resale (e.g., factory labor that is not direct labor). As in the case of direct labor, indirect labor encompasses full-time and part-time employees, as well as contract employees and independent contractors.

(B) *Officers' compensation.* Officers' compensation includes compensation paid to officers of the taxpayer.

(C) *Pension and other related costs.* Pension and other related costs include contributions paid to or made under any stock bonus, pension, profit-sharing or annuity plan, or other plan deferring the receipt of compensation, whether or not the plan qualifies under section 401(a). Contributions to employee plans representing past services must be capitalized in the same manner (and in the same proportion to property currently being acquired or produced) as amounts contributed for current service.

(D) *Employee benefit expenses.* Employee benefit expenses include all other employee benefit expenses (not described in paragraph (e)(3)(ii)(C) of this section) to the extent such expenses are otherwise allowable as deductions under chapter 1 of the Internal Revenue Code. These other employee benefit expenses include: worker's compensation; amounts otherwise deductible or allowable in reducing earnings and profits under section 404A; payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983; amounts includible in the gross income of employees under a method or arrangement of employer contributions or compensation that has the effect of a stock bonus, pension, profit-sharing or annuity plan, or other plan deferring receipt of compensation or providing deferred benefits; premiums on life and health insurance; and miscellaneous benefits provided for employees such as safety, medical treatment, recreational and eating facilities, membership dues, etc. Employee benefit expenses do not, however, include direct labor costs described in paragraph (e)(2)(i) of this section.

(E) *Indirect material costs.* Indirect material costs include the cost of materials that are not an integral part of specific property produced and the cost of materials that are consumed in the ordinary course of performing production or resale activities that cannot be identified or associated with particular units of property. Thus, for example, a cost described in § 1.162-3, relating to

the cost of a material or supply, may be an indirect cost.

(F) *Purchasing costs.* Purchasing costs include costs attributable to purchasing activities. See § 1.263A-3(c)(3) for a further discussion of purchasing costs.

(G) *Handling costs.* Handling costs include costs attributable to processing, assembling, repackaging and transporting goods, and other similar activities. See § 1.263A-3(c)(4) for a further discussion of handling costs.

(H) *Storage costs.* Storage costs include the costs of carrying, storing, or warehousing property. See § 1.263A-3(c)(5) for a further discussion of storage costs.

(I) *Cost recovery.* Cost recovery includes depreciation, amortization, and cost recovery allowances on equipment and facilities (including depreciation or amortization of self-constructed assets or other previously produced or acquired property to which section 263A or section 263 applies).

(J) *Depletion.* Depletion includes allowances for depletion, whether or not in excess of cost. Depletion is, however, only properly allocable to property that has been sold (i.e., for purposes of determining gain or loss on the sale of the property).

(K) *Rent.* Rent includes the cost of renting or leasing equipment, facilities, or land.

(L) *Taxes.* Taxes include those taxes (other than taxes described in paragraph (e)(3)(iii)(F) of this section) that are otherwise allowable as a deduction to the extent such taxes are attributable to labor, materials, supplies, equipment, land, or facilities used in production or resale activities.

(M) *Insurance.* Insurance includes the cost of insurance on plant or facility, machinery, equipment, materials, property produced, or property acquired for resale.

(N) *Utilities.* Utilities include the cost of electricity, gas, and water.

(O) *Repairs and maintenance.* Repairs and maintenance include the cost of repairing and maintaining equipment or facilities.

(P) *Engineering and design costs.* Engineering and design costs include pre-production costs, such as costs attributable to research, experimental, engi-

neering, and design activities (to the extent that such amounts are not research and experimental expenditures as described in section 174 and the regulations thereunder).

(Q) *Spoilage.* Spoilage includes the costs of rework labor, scrap, and spoilage.

(R) *Tools and equipment.* Tools and equipment include the costs of tools and equipment which are not otherwise capitalized.

(S) *Quality control.* Quality control includes the costs of quality control and inspection.

(T) *Bidding costs.* Bidding costs are costs incurred in the solicitation of contracts (including contracts pertaining to property acquired for resale) ultimately awarded to the taxpayer. The taxpayer must defer all bidding costs paid or incurred in the solicitation of a particular contract until the contract is awarded. If the contract is awarded to the taxpayer, the bidding costs become part of the indirect costs allocated to the subject matter of the contract. If the contract is not awarded to the taxpayer, bidding costs are deductible in the taxable year that the contract is awarded to another party, or in the taxable year that the taxpayer is notified in writing that no contract will be awarded and that the contract (or a similar or related contract) will not be rebid, or in the taxable year that the taxpayer abandons its bid or proposal, whichever occurs first. Abandoning a bid does not include modifying, supplementing, or changing the original bid or proposal. If the taxpayer is awarded only part of the bid (for example, the taxpayer submitted one bid to build each of two different types of products, and the taxpayer was awarded a contract to build only one of the two types of products), the taxpayer shall deduct the portion of the bidding costs related to the portion of the bid not awarded to the taxpayer. In the case of a bid or proposal for a multi-unit contract, all bidding costs must be included in the costs allocated to the subject matter of the contract awarded to the taxpayer to produce or acquire for resale any of such units. For example, where the taxpayer submits one bid to produce three similar turbines and the taxpayer

is awarded a contract to produce only two of the three turbines, all bidding costs must be included in the cost of the two turbines. For purposes of this paragraph (e)(3)(ii)(T), a contract means—

(1) In the case of a specific unit of property, any agreement under which the taxpayer would produce or sell property to another party if the agreement is entered into before the taxpayer produces or acquires the specific unit of property to be delivered to the party under the agreement; and

(2) In the case of fungible property, any agreement to the extent that, at the time the agreement is entered into, the taxpayer has on hand an insufficient quantity of completed fungible items of such property that may be used to satisfy the agreement (plus any other production or sales agreements of the taxpayer).

(U) *Licensing and franchise costs.* (1) Licensing and franchise costs include fees incurred in securing the contractual right to use a trademark, corporate plan, manufacturing procedure, special recipe, or other similar right associated with property produced or property acquired for resale. These costs include the otherwise deductible portion (such as amortization) of the initial fees incurred to obtain the license or franchise and any minimum annual payments and any royalties that are incurred by a licensee or a franchisee. These costs also include fees, payments, and royalties otherwise described in this paragraph (e)(3)(ii)(U) that a taxpayer incurs (within the meaning of section 461) only upon the sale of property produced or acquired for resale.

(2) If a taxpayer incurs (within the meaning of section 461) a fee, payment, or royalty described in this paragraph (e)(3)(ii)(U) only upon the sale of property produced or acquired for resale and the cost is required to be capitalized under this paragraph (e)(3), the taxpayer may properly allocate the cost entirely to property produced or acquired for resale by the taxpayer that has been sold.

(V) *Interest.* Interest includes interest on debt incurred or continued during the production period to finance the production of real property or tangible

personal property to which section 263A(f) applies.

(W) *Capitalizable service costs.* Service costs that are required to be capitalized include capitalizable service costs and capitalizable mixed service costs as defined in paragraph (e)(4) of this section.

(iii) *Indirect costs not capitalized.* The following indirect costs are not required to be capitalized under section 263A:

(A) *Selling and distribution costs.* These costs are marketing, selling, advertising, and distribution costs.

(B) *Research and experimental expenditures.* Research and experimental expenditures are expenditures described in section 174 and the regulations thereunder.

(C) *Section 179 costs.* Section 179 costs are expenses for certain depreciable assets deductible at the election of the taxpayer under section 179 and the regulations thereunder.

(D) *Section 165 losses.* Section 165 losses are losses under section 165 and the regulations thereunder.

(E) *Cost recovery allowances on temporarily idle equipment and facilities—(1) In general.* Cost recovery allowances on temporarily idle equipment and facilities include only depreciation, amortization, and cost recovery allowances on equipment and facilities that have been placed in service but are temporarily idle. Equipment and facilities are temporarily idle when a taxpayer takes them out of service for a finite period. However, equipment and facilities are not considered temporarily idle—

(i) During worker breaks, non-working hours, or on regularly scheduled non-working days (such as holidays or weekends);

(ii) During normal interruptions in the operation of the equipment or facilities;

(iii) When equipment is enroute to or located at a job site; or

(iv) When under normal operating conditions, the equipment is used or operated only during certain shifts.

(2) *Examples.* The provisions of this paragraph (e)(3)(iii)(E) are illustrated by the following examples:

Example 1. Equipment operated only during certain shifts. Taxpayer A manufactures

widgets. Although A's manufacturing facility operates 24 hours each day in three shifts, A only operates its stamping machine during one shift each day. Because A only operates its stamping machine during certain shifts, A's stamping machine is not considered temporarily idle during the two shifts that it is not operated.

Example 2. Facility shut down for retooling. Taxpayer B owns and operates a manufacturing facility. B closes its manufacturing facility for two weeks to retool its assembly line. B's manufacturing facility is considered temporarily idle during this two-week period.

(F) *Taxes assessed on the basis of income.* Taxes assessed on the basis of income include only state, local, and foreign income taxes, and franchise taxes that are assessed on the taxpayer based on income.

(G) *Strike expenses.* Strike expenses include only costs associated with hiring employees to replace striking personnel (but not wages of replacement personnel), costs of security, and legal fees associated with settling strikes.

(H) *Warranty and product liability costs.* Warranty costs and product liability costs are costs incurred in fulfilling product warranty obligations for products that have been sold and costs incurred for product liability insurance.

(I) *On-site storage costs.* On-site storage costs are storage and warehousing costs incurred by a taxpayer at an on-site storage facility, as defined in § 1.263A-3(c)(5)(ii)(A), with respect to property produced or property acquired for resale.

(J) *Unsuccessful bidding expenses.* Unsuccessful bidding costs are bidding expenses incurred in the solicitation of contracts not awarded to the taxpayer.

(K) *Deductible service costs.* Service costs that are not required to be capitalized include deductible service costs and deductible mixed service costs as defined in paragraph (e)(4) of this section.

(4) *Service costs*—(i) *Introduction.* This paragraph (e)(4) provides definitions and categories of service costs. Paragraph (g)(4) of this section provides specific rules for determining the amount of service costs allocable to property produced or property acquired for resale. In addition, paragraph (h) of this section provides a simplified meth-

od for determining the amount of service costs that must be capitalized.

(A) *Definition of service costs.* Service costs are defined as a type of indirect costs (e.g., general and administrative costs) that can be identified specifically with a service department or function or that directly benefit or are incurred by reason of a service department or function.

(B) *Definition of service departments.* Service departments are defined as administrative, service, or support departments that incur service costs. The facts and circumstances of the taxpayer's activities and business organization control whether a department is a service department. For example, service departments include personnel, accounting, data processing, security, legal, and other similar departments.

(ii) *Various service cost categories*—(A) *Capitalizable service costs.* Capitalizable service costs are defined as service costs that directly benefit or are incurred by reason of the performance of the production or resale activities of the taxpayer. Therefore, these service costs are required to be capitalized under section 263A. Examples of service departments or functions that incur capitalizable service costs are provided in paragraph (e)(4)(iii) of this section.

(B) *Deductible service costs.* Deductible service costs are defined as service costs that do not directly benefit or are not incurred by reason of the performance of the production or resale activities of the taxpayer, and therefore, are not required to be capitalized under section 263A. Deductible service costs generally include costs incurred by reason of the taxpayer's overall management or policy guidance functions. In addition, deductible service costs include costs incurred by reason of the marketing, selling, advertising, and distribution activities of the taxpayer. Examples of service departments or functions that incur deductible service costs are provided in paragraph (e)(4)(iv) of this section.

(C) *Mixed service costs.* Mixed service costs are defined as service costs that are partially allocable to production or resale activities (capitalizable mixed service costs) and partially allocable to non-production or non-resale activities (deductible mixed service costs). For

example, a personnel department may incur costs to recruit factory workers, the costs of which are allocable to production activities, and it may incur costs to develop wage, salary, and benefit policies, the costs of which are allocable to non-production activities.

(iii) *Examples of capitalizable service costs.* Costs incurred in the following departments or functions are generally allocated among production or resale activities:

(A) The administration and coordination of production or resale activities (wherever performed in the business or organization of the taxpayer).

(B) Personnel operations, including the cost of recruiting, hiring, relocating, assigning, and maintaining personnel records or employees.

(C) Purchasing operations, including purchasing materials and equipment, scheduling and coordinating delivery of materials and equipment to or from factories or job sites, and expediting and follow-up.

(D) Materials handling and warehousing and storage operations.

(E) Accounting and data services operations, including, for example, cost accounting, accounts payable, disbursements, and payroll functions (but excluding accounts receivable and customer billing functions).

(F) Data processing.

(G) Security services.

(H) Legal services.

(iv) *Examples of deductible service costs.* Costs incurred in the following departments or functions are not generally allocated to production or resale activities:

(A) Departments or functions responsible for overall management of the taxpayer or for setting overall policy for all of the taxpayer's activities or trades or businesses, such as the board of directors (including their immediate staff), and the chief executive, financial, accounting, and legal officers (including their immediate staff) of the taxpayer, provided that no substantial part of the cost of such departments or functions benefits a particular production or resale activity.

(B) Strategic business planning.

(C) General financial accounting.

(D) General financial planning (including general budgeting) and finan-

cial management (including bank relations and cash management).

(E) Personnel policy (such as establishing and managing personnel policy in general; developing wage, salary, and benefit policies; developing employee training programs unrelated to particular production or resale activities; negotiating with labor unions; and maintaining relations with retired workers).

(F) Quality control policy.

(G) Safety engineering policy.

(H) Insurance or risk management policy (but not including bid or performance bonds or insurance related to activities associated with property produced or property acquired for resale).

(I) Environmental management policy (except to the extent that the costs of any system or procedure benefits a particular production or resale activity).

(J) General economic analysis and forecasting.

(K) Internal audit.

(L) Shareholder, public, and industrial relations.

(M) Tax services.

(N) Marketing, selling, or advertising.

(f) *Cost allocation methods*—(1) *Introduction.* This paragraph (f) sets forth various detailed or specific (facts-and-circumstances) cost allocation methods that taxpayers may use to allocate direct and indirect costs to property produced and property acquired for resale. Paragraph (g) of this section provides general rules for applying these allocation methods to various categories of costs (i.e., direct materials, direct labor, and indirect costs, including service costs). In addition, in lieu of a facts-and-circumstances allocation method, taxpayers may use the simplified methods provided in §§1.263A-2(b) and 1.263A-3(d) to allocate direct and indirect costs to eligible property produced or eligible property acquired for resale; see those sections for definitions of eligible property. Paragraph (h) of this section provides a simplified method for determining the amount of mixed service costs required to be capitalized to eligible property. The methodology set forth in paragraph (h) of this section for mixed service costs may be used in conjunction with either

a facts-and-circumstances or a simplified method of allocating costs to eligible property produced or eligible property acquired for resale.

(2) *Specific identification method.* A specific identification method traces costs to a cost objective, such as a function, department, activity, or product, on the basis of a cause and effect or other reasonable relationship between the costs and the cost objective.

(3) *Burden rate and standard cost methods*—(i) *Burden rate method*—(A) *In general.* A burden rate method allocates an appropriate amount of indirect costs to property produced or property acquired for resale during a taxable year using predetermined rates that approximate the actual amount of indirect costs incurred by the taxpayer during the taxable year. Burden rates (such as ratios based on direct costs, hours, or similar items) may be developed by the taxpayer in accordance with acceptable accounting principles and applied in a reasonable manner. A taxpayer may allocate different indirect costs on the basis of different burden rates. Thus, for example, the taxpayer may use one burden rate for allocating the cost of rent and another burden rate for allocating the cost of utilities. Any periodic adjustment to a burden rate that merely reflects current operating conditions, such as increases in automation or changes in operation or prices, is not a change in method of accounting under section 446(e). A change, however, in the concept or base upon which such rates are developed, such as a change from basing the rates on direct labor hours to basing them on direct machine hours, is a change in method of accounting to which section 446(e) applies.

(B) *Development of burden rates.* The following factors, among others, may be used in developing burden rates:

(1) The selection of an appropriate level of activity and a period of time upon which to base the calculation of rates reflecting operating conditions for purposes of the unit costs being determined.

(2) The selection of an appropriate statistical base, such as direct labor hours, direct labor dollars, machine

hours, or a combination thereof, upon which to apply the overhead rate.

(3) The appropriate budgeting, classification, and analysis of expenses (for example, the analysis of fixed versus variable costs).

(C) *Operation of the burden rate method.* The purpose of the burden rate method is to allocate an appropriate amount of indirect costs to production or resale activities through the use of predetermined rates intended to approximate the actual amount of indirect costs incurred. Accordingly, the proper use of the burden rate method under this section requires that any net negative or net positive difference between the total predetermined amount of costs allocated to property and the total amount of indirect costs actually incurred and required to be allocated to such property (i.e., the under or over-applied burden) must be treated as an adjustment to the taxpayer's ending inventory or capital account (as the case may be) in the taxable year in which such difference arises. However, if such adjustment is not significant in amount in relation to the taxpayer's total indirect costs incurred with respect to production or resale activities for the year, such adjustment need not be allocated to the property produced or property acquired for resale unless such allocation is made in the taxpayer's financial reports. The taxpayer must treat both positive and negative adjustments consistently.

(ii) *Standard cost method*—(A) *In general.* A standard cost method allocates an appropriate amount of direct and indirect costs to property produced by the taxpayer through the use of preestablished standard allowances, without reference to costs actually incurred during the taxable year. A taxpayer may use a standard cost method to allocate costs, provided variances are treated in accordance with the procedures prescribed in paragraph (f)(3)(ii)(B) of this section. Any periodic adjustment to standard costs that merely reflects current operating conditions, such as increases in automation or changes in operation or prices, is not a change in method of accounting under section 446(e). A change, however, in the concept or base upon

which standard costs are developed is a change in method of accounting to which section 446(e) applies.

(B) *Treatment of variances.* For purposes of this section, net positive overhead variance means the excess of total standard indirect costs over total actual indirect costs and net negative overhead variance means the excess of total actual indirect costs over total standard indirect costs. The proper use of a standard cost method requires that a taxpayer must reallocate to property a pro rata portion of any net negative or net positive overhead variances and any net negative or net positive direct cost variances. The taxpayer must apportion such variances to or among the property to which the costs are allocable. However, if such variances are not significant in amount relative to the taxpayer's total indirect costs incurred with respect to production and resale activities for the year, such variances need not be allocated to property produced or property acquired for resale unless such allocation is made in the taxpayer's financial reports. A taxpayer must treat both positive and negative variances consistently.

(4) *Reasonable allocation methods.* A taxpayer may use the methods described in paragraph (f) (2) or (3) of this section if they are reasonable allocation methods within the meaning of this paragraph (f)(4). In addition, a taxpayer may use any other reasonable method to properly allocate direct and indirect costs among units of property produced or property acquired for resale during the taxable year. An allocation method is reasonable if, with respect to the taxpayer's production or resale activities taken as a whole—

(i) The total costs actually capitalized during the taxable year do not differ significantly from the aggregate costs that would be properly capitalized using another permissible method described in this section or in §§ 1.263A-2 and 1.263A-3, with appropriate consideration given to the volume and value of the taxpayer's production or resale activities, the availability of costing information, the time and cost of using various allocation methods, and the accuracy of the allocation method chosen

as compared with other allocation methods;

(ii) The allocation method is applied consistently by the taxpayer; and

(iii) The allocation method is not used to circumvent the requirements of the simplified methods in this section or in § 1.263A-2, § 1.263A-3, or the principles of section 263A.

(g) *Allocating categories of costs—*(1) *Direct materials.* Direct material costs (as defined in paragraph (e)(2) of this section) incurred during the taxable year must be allocated to the property produced or property acquired for resale by the taxpayer using the taxpayer's method of accounting for materials (e.g., specific identification; first-in, first-out (FIFO); or last-in, first-out (LIFO)), or any other reasonable allocation method (as defined under the principles of paragraph (f)(4) of this section).

(2) *Direct labor.* Direct labor costs (as defined in paragraph (e)(2) of this section) incurred during the taxable year are generally allocated to property produced or property acquired for resale using a specific identification method, standard cost method, or any other reasonable allocation method (as defined under the principles of paragraph (f)(4) of this section). All elements of compensation, other than basic compensation, may be grouped together and then allocated in proportion to the charge for basic compensation. Further, a taxpayer is not treated as using an erroneous method of accounting if direct labor costs are treated as indirect costs under the taxpayer's allocation method, provided such costs are capitalized to the extent required by paragraph (g)(3) of this section.

(3) *Indirect costs.* Indirect costs (as defined in paragraph (e)(3) of this section) are generally allocated to intermediate cost objectives such as departments or activities prior to the allocation of such costs to property produced or property acquired for resale. Indirect costs are allocated using either a specific identification method, a standard cost method, a burden rate method, or any other reasonable allocation method (as defined under the principles of paragraph (f)(4) of this section).

(4) *Service costs—*(i) *In general.* Service costs are a type of indirect costs that

may be allocated using the same allocation methods available for allocating other indirect costs described in paragraph (g)(3) of this section. Generally, taxpayers that use a specific identification method or another reasonable allocation method must allocate service costs to particular departments or activities based on a factor or relationship that reasonably relates the service costs to the benefits received from the service departments or activities. For example, a reasonable factor for allocating legal services to particular departments or activities is the number of hours of legal services attributable to each department or activity. See paragraph (g)(4)(iv) of this section for other illustrations. Using reasonable factors or relationships, a taxpayer must allocate mixed service costs under a direct reallocation method described in paragraph (g)(4)(iii)(A) of this section, a step-allocation method described in paragraph (g)(4)(iii)(B) of this section, or any other reasonable allocation method (as defined under the principles of paragraph (f)(4) of this section).

(ii) *De minimis rule.* For purposes of administrative convenience, if 90 percent or more of a mixed service department's costs are deductible service costs, a taxpayer may elect not to allocate any portion of the service department's costs to property produced or property acquired for resale. For example, if 90 percent of the costs of an electing taxpayer's industrial relations department benefit the taxpayer's overall policy-making activities, the taxpayer is not required to allocate any portion of these costs to a production activity. Under this election, however, if 90 percent or more of a mixed service department's costs are capitalizable service costs, a taxpayer must allocate 100 percent of the department's costs to the production or resale activity benefitted. For example, if 90 percent of the costs of an electing taxpayer's accounting department benefit the taxpayer's manufacturing activity, the taxpayer must allocate 100 percent of the costs of the accounting department to the manufacturing activity. An election under this paragraph (g)(4)(ii) applies to all of a taxpayer's mixed service departments and

constitutes the adoption of a (or a change in) method of accounting under section 446 of the Internal Revenue Code.

(iii) *Methods for allocating mixed service costs—*(A) *Direct reallocation method.* Under the direct reallocation method, the total costs (direct and indirect) of all mixed service departments are allocated only to departments or cost centers engaged in production or resale activities and then from those departments to particular activities. This direct reallocation method ignores benefits provided by one mixed service department to other mixed service departments, and also excludes other mixed service departments from the base used to make the allocation.

(B) *Step-allocation method.* (1) Under a step-allocation method, a sequence of allocations is made by the taxpayer. First, the total costs of the mixed service departments that benefit the greatest number of other departments are allocated to—

- (i) Other mixed service departments;
- (ii) Departments that incur only deductible service costs; and
- (iii) Departments that exclusively engage in production or resale activities.

(2) A taxpayer continues allocating mixed service costs in the manner described in paragraph (g)(4)(iii)(B)(1) of this section (i.e., from the service departments benefitting the greatest number of departments to the service departments benefitting the least number of departments) until all mixed service costs are allocated to the types of departments listed in this paragraph (g)(4)(iii). Thus, a step-allocation method recognizes the benefits provided by one mixed service department to another mixed service department and also includes mixed service departments that have not yet been allocated in the base used to make the allocation.

(C) *Examples.* The provisions of this paragraph (g)(4)(iii) are illustrated by the following examples:

Example 1. Direct reallocation method. (i) Taxpayer E has the following five departments: the Assembling Department, the Painting Department, and the Finishing Department (production departments), and the

§ 1.263A-1

26 CFR Ch. I (4-1-17 Edition)

Personnel Department and the Data Processing Department (mixed service departments). E allocates the Personnel Department's costs on the basis of total payroll costs and the Data Processing Department's costs on the basis of data processing hours.

(ii) Under a direct reallocation method, E allocates the Personnel Department's costs directly to its Assembling, Painting, and Finishing Department, and not to its Data Processing department.

| Department | Total dept. costs | Amount of payroll costs | Allocation ratio | Amount allocated |
|-------------------|-------------------|-------------------------|------------------|------------------|
| Personnel | \$500,000 | \$50,000 | | <\$500,000> |
| Data Proc'g | 250,000 | 15,000 | | |
| Assembling | 250,000 | 15,000 | 15,000/285,000 | 26,315 |
| Painting | 1,000,000 | 90,000 | 90,000/285,000 | 157,895 |
| Finishing | 2,000,000 | 180,000 | 180,000/285,000 | 315,790 |
| Total | \$4,000,000 | \$350,000 | | |

(iii) After E allocates the Personnel Department's costs, E then allocates the costs of its Data Processing Department in the same manner.

| Department | Total dept. cost after initial allocation | Total data proc. hours | Allocation ratio | Amount allocated | Total dept. cost after final allocation |
|-------------------|---|------------------------|------------------|------------------|---|
| Personnel | 0 | 2,000 | | | 0 |
| Data Proc'g | \$250,000 | | | <\$250,000> | |
| Assembling | 276,315 | 2,000 | 2,000/10,000 | 50,000 | \$326,315 |
| Painting | 1,157,895 | 0 | 0/10,000 | 0 | 1,157,895 |
| Finishing | 2,315,790 | 8,000 | 8,000/10,000 | 200,000 | 2,515,790 |
| Total | \$4,000,000 | 12,000 | | | \$4,000,000 |

Example 2. Step-allocation method. (i) Taxpayer F has the following five departments: the Manufacturing Department (a production department), the Marketing Department and the Finance Department (departments that incur only deductible service costs), the Personnel Department and the Data Processing Department (mixed service departments). F uses a step-allocation method and allocates the Personnel Department's costs on the basis of total payroll costs and

the Data Processing Department's costs on the basis of data processing hours. F's Personnel Department benefits all four of F's other departments, while its Data Processing Department benefits only three departments. Because F's Personnel Department benefits the greatest number of other departments, F first allocates its Personnel Department's costs to its Manufacturing, Marketing, Finance and Data Processing departments, as follows:

| Department | Total cost of dept. | Total payroll costs | Allocation ratio | Amount allocated |
|-------------------|---------------------|---------------------|------------------|------------------|
| Personnel | \$500,000 | \$50,000 | | <\$500,000> |
| Data Proc'g | 250,000 | 15,000 | 15,000/300,000 | 25,000 |
| Finance | 250,000 | 15,000 | 15,000/300,000 | 25,000 |
| Marketing | 1,000,000 | 90,000 | 90,000/300,000 | 150,000 |
| Manufac'g | 2,000,000 | 180,000 | 180,000/300,000 | 300,000 |
| Total | 4,000,000 | 350,000 | | |

(ii) Under a step-allocation method, the denominator of F's allocation ratio includes the payroll costs of its Manufacturing, Marketing, Finance, and Data Processing departments.

by F's Personnel Department have already been allocated, no allocation is made to the Personnel Department.

(iii) Next, F allocates the costs of its Data Processing Department on the basis of data processing hours. Because the costs incurred

Internal Revenue Service, Treasury

§ 1.263A-1

| Department | Total dept.
cost after ini-
tial allocation | Total data
proc. hours | Allocation |
|-------------------|---|---------------------------|--------------------------------|
| ratio. | | | |
| Personnel | \$0 | 2,000 | \$0 |
| Data Proc'g | 275,000 | | <\$275,000> 0 |
| Finance | 275,000 | 2,000 | 2,000/10,000 55,000 330,000 |
| Marketing | 1,150,000 | 0 | 0/10,000 0 1,150,000 |
| Manufac'g | 2,300,000 | 8,000 | 8,000/10,000 220,000 2,520,000 |
| | 4,000,000 | 12,000 | 4,000,000 |

(iv) Under the second step of F's step-allocation method, the denominator of F's allocation ratio includes the data processing hours of its Manufacturing, Marketing, and Finance Departments, but does not include the data processing hours of its Personnel Department (the other mixed service department) because the costs of that department have previously been allocated.

(iv) *Illustrations of mixed service cost allocations using reasonable factors or relationships.* This paragraph (g)(4)(iv) illustrates various reasonable factors and relationships that may be used in allocating different types of mixed service costs. Taxpayers, however, are permitted to use other reasonable factors and relationships to allocate mixed service costs. In addition, the factors or relationships illustrated in this paragraph (g)(4)(iv) may be used to allocate other types of service costs not illustrated in this paragraph (g)(4)(iv).

(A) *Security services.* The costs of security or protection services must be allocated to each physical area that receives the services using any reasonable method applied consistently (e.g., the size of the physical area, the number of employees in the area, or the relative fair market value of assets located in the area).

(B) *Legal services.* The costs of legal services are generally allocable to a particular production or resale activity on the basis of the approximate number of hours of legal service performed in connection with the activity, including research, bidding, negotiating, drafting, reviewing a contract, obtaining necessary licenses and permits, and resolving disputes. Different hourly rates may be appropriate for different services. In determining the number of hours allocable to any activity, estimates are appropriate, detailed time records are not required to be kept, and

insubstantial amounts of services provided to an activity by senior legal staff (such as administrators or reviewers) may be ignored. Legal costs may also be allocated to a particular production or resale activity based on the ratio of the total direct costs incurred for the activity to the total direct costs incurred with respect to all production or resale activities. The taxpayer must also allocate directly to an activity the cost incurred for any outside legal services. Legal costs relating to general corporate functions are not required to be allocated to a particular production or resale activity.

(C) *Centralized payroll services.* The costs of a centralized payroll department or activity are generally allocated to the departments or activities benefitted on the basis of the gross dollar amount of payroll processed.

(D) *Centralized data processing services.* The costs of a centralized data processing department are generally allocated to all departments or activities benefitted using any reasonable basis, such as total direct data processing costs or the number of data processing hours supplied. The costs of data processing systems or applications developed for a particular activity are directly allocated to that activity.

(E) *Engineering and design services.* The costs of an engineering or a design department are generally directly allocable to the departments or activities benefitted based on the ratio of the approximate number of hours of work performed with respect to the particular activity to the total number of hours of engineering or design work performed for all activities. Different services may be allocated at different hourly rates.

(F) *Safety engineering services.* The costs of a safety engineering department or activities generally benefit all of the taxpayer's activities and, thus, should be allocated using a reasonable basis, such as: the approximate number of safety inspections made in connection with a particular activity as a fraction of total inspections, the number of employees assigned to an activity as a fraction of total employees, or the total labor hours worked in connection with an activity as a fraction of total hours. However, in determining the allocable costs of a safety engineering department, costs attributable to providing a safety program relating only to a particular activity must be directly assigned to such activity. Additionally, the cost of a safety engineering department only responsible for setting safety policy and establishing safety procedures to be used in all of the taxpayer's activities is not required to be allocated.

(v) *Accounting method change.* A change in the method or base used to allocate service costs (such as changing from an allocation base using direct labor costs to a base using direct labor hours), or a change in the taxpayer's determination of what functions or departments of the taxpayer are to be allocated, is a change in method of accounting to which section 446(e) and the regulations thereunder apply.

(h) *Simplified service cost method*—(1) *Introduction.* This paragraph (h) provides a simplified method for determining capitalizable mixed service costs incurred during the taxable year with respect to eligible property (i.e., the aggregate portion of mixed service costs that are properly allocable to the taxpayer's production or resale activities).

(2) *Eligible property*—(i) *In general.* Except as otherwise provided in paragraph (h)(2)(ii) of this section, the simplified service cost method, if elected for any trade or business of the taxpayer, must be used for all production and resale activities of the trade or business associated with any of the following categories of property that are subject to section 263A:

(A) *Inventory property.* Stock in trade or other property properly includible in the inventory of the taxpayer.

(B) *Non-inventory property held for sale.* Non-inventory property held by a taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(C) *Certain self-constructed assets.* Self-constructed assets substantially identical in nature to, and produced in the same manner as, inventory property produced by the taxpayer or other property produced by the taxpayer and held primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(D) *Self-constructed tangible personal property produced on a routine and repetitive basis*—(1) *In general.* Self-constructed tangible personal property produced by the taxpayer on a routine and repetitive basis in the ordinary course of the taxpayer's trade or business. Self-constructed tangible personal property is produced by the taxpayer on a routine and repetitive basis in the ordinary course of the taxpayer's trade or business when units of tangible personal property (as defined in §1.263A-10(c)) are mass-produced, that is, numerous substantially identical assets are manufactured within a taxable year using standardized designs and assembly line techniques, and either the applicable recovery period of the property determined under section 168(c) is not longer than 3 years or the property is a material or supply that will be used and consumed within 3 years of being produced. For purposes of this paragraph (h)(2)(i)(D), the applicable recovery period of the assets will be determined at the end of the taxable year in which the assets are placed in service for purposes of §1.46-3(d). Subsequent changes to the applicable recovery period after the assets are placed in service will not affect the determination of whether the assets are produced on a routine and repetitive basis for purposes of this paragraph (h)(2)(i)(D).

(2) *Examples.* The following examples illustrate this paragraph (h)(2)(i)(D):

Example 1. Y is a manufacturer of automobiles. During the taxable year Y produces numerous substantially identical dies and

molds using standardized designs and assembly line techniques. The dies and molds have a 3-year applicable recovery period for purposes of section 168(c). Y uses the dies and molds to produce or process particular automobile components and does not hold them for sale. The dies and molds are produced on a routine and repetitive basis in the ordinary course of Y's business for purposes of this paragraph because the dies and molds are both mass-produced and have a recovery period of not longer than 3 years.

Example 2. Z is an electric utility that regularly manufactures and installs identical poles that are used in transmitting and distributing electricity. The poles have a 20-year applicable recovery period for purposes of section 168(c). The poles are not produced on a routine and repetitive basis in the ordinary course of Z's business for purposes of this paragraph because the poles have an applicable recovery period that is longer than 3 years.

(ii) *Election to exclude self-constructed assets.* At the taxpayer's election, the simplified service cost method may be applied within a trade or business to only the categories of inventory property and non-inventory property held for sale described in paragraphs (h)(2)(i)(A) and (B) of this section. Taxpayers electing to exclude the self-constructed assets described in paragraphs (h)(2)(i)(C) and (D) of this section from application of the simplified service cost method must, however, allocate service costs to such property in accordance with paragraph (g)(4) of this section.

(3) *General allocation formula.* (i) Under the simplified service cost method, a taxpayer computes its capitalizable mixed service costs using the following formula:

$$\text{Allocation ratio} \times \text{total mixed service costs}$$

(ii) A producer may elect one of two allocation ratios, the labor-based allocation ratio or the production cost allocation ratio. A reseller that satisfies the requirements for using the simplified resale method of §1.263A-3(d) (whether or not that method is elected) may elect the simplified service cost method, but must use a labor-based allocation ratio. (See §1.263A-3(d) for labor-based allocation ratios to be used in conjunction with the simplified resale method.) The allocation ratio used by a trade or business of a taxpayer is a method of accounting which must be applied consistently within the trade or business.

(4) *Labor-based allocation ratio.* (i) The labor-based allocation ratio is computed as follows:

Section 263A labor costs

Total labor costs

(ii) Section 263A labor costs are defined as the total labor costs (excluding labor costs included in mixed service costs) allocable to property produced and property acquired for resale under section 263A that are incurred in the taxpayer's trade or business during the taxable year. Total labor costs are de-

fined as the total labor costs (excluding labor costs included in mixed service costs) incurred in the taxpayer's trade or business during the taxable year. Total labor costs include labor costs incurred in all parts of the trade or business (i.e., if the taxpayer has both property produced and property acquired for resale, the taxpayer must include labor costs from resale activities as well as production activities). For example, taxpayer G incurs \$1,000 of total mixed service costs during the taxable year. G's section 263A labor costs are \$5,000 and its total labor costs are \$10,000. Under the labor-based allocation ratio, G's capitalizable mixed service costs are \$500 (i.e., \$1,000 × (\$5,000 divided by \$10,000)).

(5) *Production cost allocation ratio.* (i) Producers may use the production cost allocation ratio, computed as follows:

Section 263A production costs

Total costs

(ii) Section 263A production costs are defined as the total costs (excluding mixed service costs and interest) allocable to property produced (and property acquired for resale if the producer is also engaged in resale activities)

under section 263A that are incurred in the taxpayer's trade or business during the taxable year. Total costs are defined as all costs (excluding mixed service costs and interest) incurred in the taxpayer's trade or business during the taxable year. Total costs include all direct and indirect costs allocable to property produced (and property acquired for resale if the producer is also engaged in resale activities) as well as all other costs of the taxpayer's trade or business, including, but not limited to: salaries and other labor costs of all personnel; all depreciation taken for federal income tax purposes; research and experimental expenditures; and selling, marketing, and distribution costs. Such costs do not include, however, taxes described in paragraph (e)(3)(iii)(F) of this section. For example, taxpayer H, a producer, incurs \$1,000 of total mixed service costs in the taxable year. H's section 263A production costs are \$10,000 and its total costs are \$20,000. Under the production cost allocation ratio, H's capitalizable mixed service costs are \$500 (i.e., \$1,000 \times (\$10,000 divided by \$20,000)).

(6) *Definition of total mixed service costs.* Total mixed service costs are defined as the total costs incurred during the taxable year in all departments or functions of the taxpayer's trade or business that perform mixed service activities. See paragraph (e)(4)(ii)(C) of this section which defines mixed service costs. In determining the total mixed service costs of a trade or business, the taxpayer must include all costs incurred in its mixed service departments and cannot exclude any otherwise deductible service costs. For example, if the accounting department within a trade or business is a mixed service department, then in determining the total mixed service costs of the trade or business, the taxpayer cannot exclude the costs of personnel in the accounting department that perform services relating to non-production activities (e.g., accounts receivable or customer billing activities). Instead, the entire cost of the accounting department must be included in the total mixed service costs.

(7) *Costs allocable to more than one business.* To the extent mixed service costs, labor costs, or other costs are in-

curred in more than one trade or business, the taxpayer must determine the amounts allocable to the particular trade or business for which the simplified service cost method is being applied by using any reasonable allocation method consistent with the principles of paragraph (f)(4) of this section.

(8) *De minimis rule.* If the taxpayer elects to apply the de minimis rule of paragraph (g)(4)(ii) of this section to any mixed service department, the department is not considered a mixed service department for purposes of the simplified service cost method. Instead, the costs of such department are allocated exclusively to the particular activity satisfying the 90-percent test.

(9) *Separate election.* A taxpayer may elect the simplified service cost method in conjunction with any other allocation method used at the trade or business level, including the simplified methods described in §§1.263A-2(b) and 1.263A-3(d). However, the election of the simplified service cost method must be made independently of the election to use those other simplified methods.

(i) [Reserved]

(j) *Special rules—(1) Costs provided by a related person—(i) In general.* A taxpayer subject to section 263A must capitalize an arm's-length charge for any section 263A costs (e.g., costs of materials, labor, or services) incurred by a related person that are properly allocable to the property produced or property acquired for resale by the taxpayer. Both the taxpayer and the related person must account for the transaction as if an arm's-length charge had been incurred by the taxpayer with respect to its property produced or property acquired for resale. For purposes of this paragraph (j)(1)(i), a taxpayer is considered related to another person if the taxpayer and such person are described in section 482. Further, for purposes of this paragraph (j)(1)(i), arm's-length charge means the arm's-length charge (or other appropriate charge where permitted and applicable) under the principles of section 482. Any correlative adjustments necessary because of the arm's-length charge requirement of this paragraph

(j)(1)(i) shall be determined under the principles of section 482.

(ii) *Exceptions.* The provisions of paragraph (j)(1)(i) of this section do not apply if, and to the extent that—

(A) It would be inappropriate under the principles of section 482 for the Commissioner to adjust the income of the taxpayer or the related person with respect to the transaction at issue; or

(B) A transaction is accounted for under an alternative Internal Revenue Code section resulting in the capitalization (or deferral of the deduction) of the costs of the items provided by the related party and the related party does not deduct such costs earlier than the costs would have been deducted by the taxpayer if the costs were capitalized under section 263A. See § 1.1502-13.

(2) *Optional capitalization of period costs—(i) In general.* Taxpayers are not required to capitalize indirect costs that do not directly benefit or are not incurred by reason of the production of property or acquisition of property for resale (i.e., period costs). A taxpayer may, however, elect to capitalize certain period costs if: The method is consistently applied; is used in computing beginning inventories, ending inventories, and cost of goods sold; and does not result in a material distortion of the taxpayer's income. A material distortion relates to the source, character, amount, or timing of the cost capitalized or any other item affected by the capitalization of the cost. Thus, for example, a taxpayer may not capitalize a period cost under section 263A if capitalization would result in a material change in the computation of the foreign tax credit limitation under section 904. An election to capitalize a period cost is the adoption of (or a change in) a method of accounting under section 446 of the Internal Revenue Code.

(ii) *Period costs eligible for capitalization.* The types of period costs eligible for capitalization under this paragraph (j)(2) include only the types of period costs (e.g., under paragraph (e)(3)(iii) of this section) for which some portion of the costs incurred is properly allocable to property produced or property acquired for resale in the year of the election. Thus, for example, marketing or advertising costs, no portion of which

are properly allocable to property produced or property acquired for resale, do not qualify for elective capitalization under this paragraph (j)(2).

(3) *Trade or business application.* Notwithstanding the references generally to taxpayer throughout this section and §§ 1.263A-2 and 1.263A-3, the methods of accounting provided under section 263A are to be elected and applied independently for each separate and distinct trade or business of the taxpayer in accordance with the provisions of section 446(d) and the regulations thereunder.

(4) *Transfers with a principal purpose of tax avoidance.* The District Director may require appropriate adjustments to valuations of inventory and other property subject to section 263A if a transfer of property is made to another person for a principal purpose of avoiding the application of section 263A. Thus, for example, the District Director may require a taxpayer using the simplified production method of § 1.263A-2(b) to apply that method to transferred inventories immediately prior to a transfer under section 351 if a principal purpose of the transfer is to avoid the application of section 263A.

(k) *Change in method of accounting—(1) In general.* A change in a taxpayer's treatment of mixed service costs to comply with paragraph (h)(2)(i)(D) of this section is a change in method of accounting to which the provisions of sections 446 and 481 and the regulations under those sections apply. See § 1.263A-7. For a taxpayer's first taxable year ending on or after August 2, 2005, the taxpayer is granted the consent of the Commissioner to change its method of accounting to comply with paragraph (h)(2)(i)(D) of this section, provided the taxpayer follows the administrative procedures, as modified by paragraphs (k)(2) through (4) of this section, issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in accounting method (for further guidance, for example, see Rev. Proc. 2002-9 (2002-1 CB 327), as modified and clarified by Announcement 2002-17 (2002-1 CB 561), modified and amplified by Rev. Proc. 2002-19 (2002-1 CB 696), and amplified, clarified, and modified by Rev. Proc. 2002-54 (2002-2 CB 432), and

§ 601.601(d)(2)(ii)(b) of this chapter). For purposes of Form 3115, “Application for Change in Accounting Method,” the designated number for the automatic accounting method change authorized by this paragraph (k) is “95.” If Form 3115 is revised or renumbered, any reference in this section to that form is treated as a reference to the revised or renumbered form. Alternatively, notwithstanding the provisions of any administrative procedures that preclude a taxpayer from requesting the advance consent of the Commissioner to change a method of accounting that is required to be made pursuant to a published automatic change procedure, for its first taxable year ending on or after August 2, 2005, a taxpayer may request the advance consent of the Commissioner to change its method of accounting to comply with paragraph (h)(2)(i)(D) of this section, provided the taxpayer follows the administrative procedures, as modified by paragraphs (k)(2) through (5) of this section, for obtaining the advance consent of the Commissioner (for further guidance, for example, see Rev. Proc. 97-27 (1997-1 CB 680), as modified and amplified by Rev. Proc. 2002-19 (2002-1 CB 696), as amplified and clarified by Rev. Proc. 2002-54 (2002-2 CB 432), and § 601.601(d)(2)(ii)(b) of this chapter). For the taxpayer’s second and subsequent taxable years ending on or after August 2, 2005, requests to secure the consent of the Commissioner must be made under the administrative procedures, as modified by paragraphs (k)(3) and (4) of this section, for obtaining the Commissioner’s advance consent to a change in accounting method.

(2) *Scope limitations.* Any limitations on obtaining the automatic consent or advance consent of the Commissioner do not apply to a taxpayer seeking to change its method of accounting to comply with paragraph (h)(2)(i)(D) of this section for its first taxable year ending on or after August 2, 2005.

(3) *Audit protection.* A taxpayer that changes its method of accounting in accordance with this paragraph (k) to comply with paragraph (h)(2)(i)(D) of this section does not receive audit protection if its method of accounting for mixed service costs is an issue under

consideration at the time the application is filed with the national office.

(4) *Section 481(a) adjustment.* A change in method of accounting to conform to paragraph (h)(2)(i)(D) of this section requires a section 481(a) adjustment. The section 481(a) adjustment period is two taxable years for a net positive adjustment for an accounting method change that is made to conform to paragraph (h)(2)(i)(D) of this section.

(5) *Time for requesting change.* Notwithstanding the provisions of § 1.446-1(e)(3)(i) and any contrary administrative procedure, a taxpayer may submit a request for advance consent to change its method of accounting to comply with paragraph (h)(2)(i)(D) of this section for its first taxable year ending on or after August 2, 2005, on or before the date that is 30 days after the end of the taxable year for which the change is requested.

(1) *Effective/applicability date—(1) In general.* Except as provided in (1)(2), (1)(3), and (1)(4) of this section, the effective dates for this section are provided in paragraph (a)(2) of this section.

(2) *Mixed service costs; self-constructed tangible personal property produced on a routine and repetitive basis.* Paragraphs (h)(2)(i)(D), (k), and (1)(2) of this section apply for taxable years ending on or after August 2, 2005.

(3) *Costs allocable to property sold; indirect costs; licensing and franchise costs.* Paragraphs (c)(5), (e)(3)(i), and (e)(3)(ii)(U) of this section apply for taxable years ending on or after January 13, 2014.

(4) *Materials and supplies—(i) In general.* The last sentence of paragraphs (e)(2)(i)(A) and (e)(3)(ii)(E) of this section, and paragraph (1)(4) of this section apply to amounts paid (to acquire or produce property) in taxable years beginning on or after January 1, 2014.

(ii) *Early application of this section.* A taxpayer may choose to apply the last sentence of paragraphs (e)(2)(i)(A) and (e)(3)(ii)(E) of this section, and paragraph (1)(4) of this section to amounts paid (to acquire or produce property) in taxable years beginning on or after January 1, 2012.

(iii) *Optional application of TD 9564.* A taxpayer may choose to apply § 1.263A-1T(b)(14), the introductory phrase of

§ 1.263A-1T(c)(4), the last sentence of § 1.263A-1T(e)(2)(i)(A), the last sentence of § 1.263A-1T(e)(3)(ii)(E), § 1.263A-1T(l), and § 1.263A-1T(m)(2), as these provisions are contained in TD 9564 (76 FR 81060) December 27, 2011, to amounts paid (to acquire or produce property) in taxable years beginning on or after January 1, 2012, and before January 1, 2014.

[T.D. 8482, 58 FR 42209, Aug. 9, 1993]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.263A-1, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

§ 1.263A-2 Rules relating to property produced by the taxpayer.

(a) *In general.* Section 263A applies to real property and tangible personal property produced by a taxpayer for use in its trade or business or for sale to its customers. In addition, section 263A applies to property produced for a taxpayer under a contract with another party. The principal terms related to the scope of section 263A with respect to producers are provided in this paragraph (a). See § 1.263A-1(b)(11) for an exception in the case of certain de minimis property provided to customers incident to the provision of services.

(1) *Produce*—(i) *In general.* For purposes of section 263A, produce includes the following: construct, build, install, manufacture, develop, improve, create, raise, or grow.

(ii) *Ownership*—(A) *General rule.* Except as provided in paragraphs (a)(1)(ii)(B) and (C) of this section, a taxpayer is not considered to be producing property unless the taxpayer is considered an owner of the property produced under federal income tax principles. The determination as to whether a taxpayer is an owner is based on all of the facts and circumstances, including the various benefits and burdens of ownership vested with the taxpayer. A taxpayer may be considered an owner of property produced, even though the taxpayer does not have legal title to the property.

(B) *Property produced for the taxpayer under a contract*—(1) *In general.* Property produced for the taxpayer under a contract with another party is treated

as property produced by the taxpayer to the extent the taxpayer makes payments or otherwise incurs costs with respect to the property. A taxpayer has made payment under this section if the transaction would be considered payment by a taxpayer using the cash receipts and disbursements method of accounting.

(2) *Definition of a contract*—(i) *General rule.* Except as provided under paragraph (a)(1)(ii)(B)(2)(ii) of this section, a contract is any agreement providing for the production of property if the agreement is entered into before the production of the property to be delivered under the contract is completed. Whether an agreement exists depends on all the facts and circumstances. Facts and circumstances indicating an agreement include, for example, the making of a prepayment, or an arrangement to make a prepayment, for property prior to the date of the completion of production of the property, or the incurring of significant expenditures for property of specialized design or specialized application that is not intended for self-use.

(ii) *Routine purchase order exception.* A routine purchase order for fungible property is not treated as a contract for purposes of this section. An agreement will not be treated as a routine purchase order for fungible property, however, if the contractor is required to make more than de minimis modifications to the property to tailor it to the customer's specific needs, or if at the time the agreement is entered into, the customer knows or has reason to know that the contractor cannot satisfy the agreement within 30 days out of existing stocks and normal production of finished goods.

(C) *Home construction contracts.* Section 460(e)(1) provides that section 263A applies to a home construction contract unless that contract will be completed within two years of the contract commencement date and the taxpayer's average annual gross receipts for the three preceding taxable years do not exceed \$10,000,000. Section 263A applies to such a contract even if the contractor is not considered the owner of the property produced under the contract under federal income tax principles.

(2) *Tangible personal property*—(i) *General rule.* In general, section 263A applies to the costs of producing tangible personal property, and not to the costs of producing intangible property. For example, section 263A applies to the costs manufacturers incur to produce goods, but does not apply to the costs financial institutions incur to originate loans.

(ii) *Intellectual or creative property.* For purposes of determining whether a taxpayer producing intellectual or creative property is producing tangible personal property or intangible property, the term tangible personal property includes films, sound recordings, video tapes, books, and other similar property embodying words, ideas, concepts, images, or sounds by the creator thereof. Other similar property for this purpose generally means intellectual or creative property for which, as costs are incurred in producing the property, it is intended (or is reasonably likely) that any tangible medium in which the property is embodied will be mass distributed by the creator or any one or more third parties in a form that is not substantially altered. However, any intellectual or creative property that is embodied in a tangible medium that is mass distributed merely incident to the distribution of a principal product or good of the creator is not other similar property for these purposes.

(A) *Intellectual or creative property that is tangible personal property.* Section 263A applies to tangible personal property defined in this paragraph (a)(2) without regard to whether such property is treated as tangible or intangible property under other sections of the Internal Revenue Code. Thus, for example, section 263A applies to the costs of producing a motion picture or researching and writing a book even though these assets may be considered intangible for other purposes of the Internal Revenue Code. Tangible personal property includes, for example, the following:

(1) *Books.* The costs of producing and developing books (including teaching aids and other literary works) required to be capitalized under this section include costs incurred by an author in researching, preparing, and writing the book. (However, see section 263A(h),

which provides an exemption from the capitalization requirements of section 263A in the case of certain free-lance authors.) In addition, the costs of producing and developing books include prepublication expenditures incurred by publishers, including payments made to authors (other than commissions for sales of books that have already taken place), as well as costs incurred by publishers in writing, editing, compiling, illustrating, designing, and developing the books. The costs of producing a book also include the costs of producing the underlying manuscript, copyright, or license. (These costs are distinguished from the separately capitalizable costs of printing and binding the tangible medium embodying the book (e.g., paper and ink).) See § 1.174-2(a)(1), which provides that the term research or experimental expenditures does not include expenditures incurred for research in connection with literary, historical, or similar projects.

(2) *Sound recordings.* A sound recording is a work that results from the fixation of a series of musical, spoken, or other sounds, regardless of the nature of the material objects, such as discs, tapes, or other phonorecordings, in which such sounds are embodied.

(B) *Intellectual or creative property that is not tangible personal property.* Items that are not considered tangible personal property within the meaning of section 263A(b) and paragraph (a)(2)(ii) of this section include:

(1) *Evidences of value.* Tangible personal property does not include property that is representative or evidence of value, such as stock, securities, debt instruments, mortgages, or loans.

(2) *Property provided incident to services.* Tangible personal property does not include de minimis property provided to a client or customer incident to the provision of services, such as wills prepared by attorneys, or blueprints prepared by architects. See § 1.263A-1(b)(11).

(3) *Costs required to be capitalized by producers*—(i) *In general.* Except as specifically provided in section 263A(f)

with respect to interest costs, producers must capitalize direct and indirect costs properly allocable to property produced under section 263A, without regard to whether those costs are incurred before, during, or after the production period (as defined in section 263A(f)(4)(B)).

(ii) *Pre-production costs.* If property is held for future production, taxpayers must capitalize direct and indirect costs allocable to such property (e.g., purchasing, storage, handling, and other costs), even though production has not begun. If property is not held for production, indirect costs incurred prior to the beginning of the production period must be allocated to the property and capitalized if, at the time the costs are incurred, it is reasonably likely that production will occur at some future date. Thus, for example, a manufacturer must capitalize the costs of storing and handling raw materials before the raw materials are committed to production. In addition, a real estate developer must capitalize property taxes incurred with respect to property if, at the time the taxes are incurred, it is reasonably likely that the property will be subsequently developed.

(iii) *Post-production costs.* Generally, producers must capitalize all indirect costs incurred subsequent to completion of production that are properly allocable to the property produced. Thus, for example, storage and handling costs incurred while holding the property produced for sale after production must be capitalized to the property to the extent properly allocable to the property. However, see § 1.263A-3(c) for exceptions.

(4) *Practical capacity concept.* Notwithstanding any provision to the contrary, the use, directly or indirectly, of the practical capacity concept is not permitted under section 263A. For purposes of section 263A, the term practical capacity concept means any concept, method, procedure, or formula (such as the practical capacity concept described in § 1.471-11(d)(4)) whereunder fixed costs are not capitalized because of the relationship between the actual production at the taxpayer's production facility and the practical capacity of the facility. For purposes of this sec-

tion, the practical capacity of a facility includes either the practical capacity or theoretical capacity of the facility, as defined in § 1.471-11(d)(4), or any similar determination of productive or operating capacity. The practical capacity concept may not be used with respect to any activity to which section 263A applies (i.e., production or resale activities). A taxpayer shall not be considered to be using the practical capacity concept solely because the taxpayer properly does not capitalize costs described in § 1.263A-1(e)(3)(iii)(E), relating to certain costs attributable to temporarily idle equipment.

(5) *Taxpayers required to capitalize costs under this section.* This section generally applies to taxpayers that produce property. If a taxpayer is engaged in both production activities and resale activities, the taxpayer applies the principles of this section as if it read production or resale activities, and by applying appropriate principles from § 1.263A-3. If a taxpayer is engaged in both production and resale activities, the taxpayer may elect the simplified production method provided in this section, but generally may not elect the simplified resale method discussed in § 1.263A-3(d). If elected, the simplified production method must be applied to all eligible property produced and all eligible property acquired for resale by the taxpayer.

(b) *Simplified production method—(1) Introduction.* This paragraph (b) provides a simplified method for determining the additional section 263A costs properly allocable to ending inventories of property produced and other eligible property on hand at the end of the taxable year.

(2) *Eligible property—(i) In general.* Except as otherwise provided in paragraph (b)(2)(ii) of this section, the simplified production method, if elected for any trade or business of a producer, must be used for all production and resale activities associated with any of the following categories of property to which section 263A applies:

(A) *Inventory property.* Stock in trade or other property properly includible in the inventory of the taxpayer.

(B) *Non-inventory property held for sale.* Non-inventory property held by a

§ 1.263A-2

26 CFR Ch. I (4-1-17 Edition)

taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(C) *Certain self-constructed assets.* Self-constructed assets substantially identical in nature to, and produced in the same manner as, inventory property produced by the taxpayer or other property produced by the taxpayer and held primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(D) *Self-constructed tangible personal property produced on a routine and repetitive basis—(1) In general.* Self-constructed tangible personal property produced by the taxpayer on a routine and repetitive basis in the ordinary course of the taxpayer's trade or business. Self-constructed tangible personal property is produced by the taxpayer on a routine and repetitive basis in the ordinary course of the taxpayer's trade or business when units of tangible personal property (as defined in § 1.263A-10(c)) are mass-produced, that is, numerous substantially identical assets are manufactured within a taxable year using standardized designs and assembly line techniques, and either the applicable recovery period of the property determined under section 168(c) is not longer than 3 years or the property is a material or supply that will be used and consumed within 3 years of being produced. For purposes of this paragraph (b)(2)(i)(D), the applicable recovery period of the assets will be determined at the end of the taxable year in which the assets are placed in service for purposes of § 1.46-3(d). Subsequent changes to the applicable recovery period after the assets are placed in service will not affect the determination of whether the assets are produced on a routine and repetitive basis for purposes of this paragraph (b)(2)(i)(D).

(2) *Examples.* The following examples illustrate this paragraph (b)(2)(i)(D):

Example 1. Y is a manufacturer of automobiles. During the taxable year Y produces numerous substantially identical dies and molds using standardized designs and assembly line techniques. The dies and molds have a 3-year applicable recovery period for purposes of section 168(c). Y uses the dies and molds to produce or process particular automobile components and does not hold them for sale. The dies and molds are produced on a routine and repetitive basis in the ordinary course of Y's business for purposes of this paragraph because the dies and molds are both mass-produced and have a recovery period of not longer than 3 years.

Example 2. Z is an electric utility that regularly manufactures and installs identical poles that are used in transmitting and distributing electricity. The poles have a 20-year applicable recovery period for purposes of section 168(c). The poles are not produced on a routine and repetitive basis in the ordinary course of Z's business for purposes of this paragraph because the poles have an applicable recovery period that is longer than 3 years.

(ii) *Election to exclude self-constructed assets.* At the taxpayer's election, the simplified production method may be applied within a trade or business to only the categories of inventory property and non-inventory property held for sale described in paragraphs (b)(2)(i)(A) and (B) of this section. Taxpayers electing to exclude the self-constructed assets, defined in paragraphs (b)(2)(i)(C) and (D) of this section, from application of the simplified production method must, however, allocate additional section 263A costs to such property in accordance with § 1.263A-1(f).

(3) *Simplified production method without historic absorption ratio election—(i) General allocation formula—(A) In general.* Except as otherwise provided in paragraph (b)(3)(iv) of this section, the additional section 263A costs allocable to eligible property remaining on hand at the close of the taxable year under the simplified production method are computed as follows:

$$\text{Absorption ratio} \times \text{section 471 costs remaining on hand at year end}$$

(B) *Effect of allocation.* The absorption ratio generally is multiplied by the section 471 costs remaining in ending

inventory or otherwise on hand at the end of each taxable year in which the

simplified production method is applied. The resulting product is the additional section 263A costs that are added to the taxpayer's ending section 471 costs to determine the section 263A costs that are capitalized. See, however, paragraph (b)(3)(iii) of this section for special rules applicable to LIFO taxpayers. Except as otherwise provided in this section or in § 1.263A-1 or 1.263A-3, additional section 263A

costs that are allocated to inventories on hand at the close of the taxable year under the simplified production method of this paragraph (b) are treated as inventory costs for all purposes of the Internal Revenue Code.

(ii) *Definitions*—(A) *Absorption ratio*. Under the simplified production method, the absorption ratio is determined as follows:

Additional section 263A costs incurred during the taxable year

Section 471 costs incurred during the taxable year

(1) *Additional section 263A costs incurred during the taxable year*. Additional section 263A costs incurred during the taxable year are defined as the additional section 263A costs described in § 1.263A-1(d)(3) that a taxpayer incurs during its current taxable year.

(2) *Section 471 costs incurred during the taxable year*. Section 471 costs incurred during the taxable year are defined as the section 471 costs described in § 1.263A-1(d)(2) that a taxpayer incurs during its current taxable year.

(B) *Section 471 costs remaining on hand at year end*. Section 471 costs remaining on hand at year end means the section 471 costs, as defined in § 1.263A-1(d)(2), that a taxpayer incurs during its current taxable year which remain in its ending inventory or are otherwise on hand at year end. For LIFO inventories of a taxpayer, the section 471 costs remaining on hand at year end means the increment, if any, for the current year stated in terms of section 471 costs. See paragraph (b)(3)(iii) of this section.

(C) *Costs allocated to property sold*. Additional section 263A costs incurred during the taxable year, as defined in paragraph (b)(3)(ii)(A)(1) of this section, section 471 costs incurred during the taxable year, as defined in paragraph (b)(3)(ii)(A)(2) of this section, and section 471 costs remaining on hand at year end, as defined in paragraph (b)(3)(ii)(B) of this section, do not include costs described in § 1.263A-1(e)(3)(ii) or cost reductions described in § 1.471-3(e) that a taxpayer properly allocates entirely to property that has been sold.

(iii) *LIFO taxpayers electing the simplified production method*—(A) *In general*. Under the simplified production method, a taxpayer using a LIFO method must calculate a particular year's index (e.g., under § 1.472-8(e)) without regard to its additional section 263A costs. Similarly, a taxpayer that adjusts current-year costs by applicable indexes to determine whether there has been an inventory increment or decrement in the current year for a particular LIFO pool must disregard the additional section 263A costs in making that determination.

(B) *LIFO increment*. If the taxpayer determines there has been an inventory increment, the taxpayer must state the amount of the increment in current-year dollars (stated in terms of section 471 costs). The taxpayer then multiplies this amount by the absorption ratio. The resulting product is the additional section 263A costs that must be added to the taxpayer's increment for the year stated in terms of section 471 costs.

(C) *LIFO decrement*. If the taxpayer determines there has been an inventory decrement, the taxpayer must state the amount of the decrement in dollars applicable to the particular year for which the LIFO layer has been invaded. The additional section 263A costs incurred in prior years that are applicable to the decrement are charged to cost of goods sold. The additional section 263A costs that are applicable to the decrement are determined by multiplying the additional section 263A costs allocated to the layer of the pool

§ 1.263A-2

26 CFR Ch. I (4-1-17 Edition)

in which the decrement occurred by the ratio of the decrement (excluding additional section 263A costs) to the section 471 costs in the layer of that pool.

(iv) *De minimis rule for producers with total indirect costs of \$200,000 or less—(A) In general.* If a producer using the simplified production method incurs \$200,000 or less of total indirect costs in a taxable year, the additional section 263A costs allocable to eligible property remaining on hand at the close of the taxable year are deemed to be zero. Solely for purposes of this paragraph (b)(3)(iv), taxpayers are permitted to exclude any category of indirect costs (listed in § 1.263A-1(e)(3)(iii)) that is not required to be capitalized (e.g., selling and distribution costs) in determining total indirect costs.

(B) *Related party and aggregation rules.* In determining whether the producer incurs \$200,000 or less of total in-

direct costs in a taxable year, the related party and aggregation rules of § 1.263A-3(b)(3) are applied by substituting total indirect costs for gross receipts wherever gross receipts appears.

(v) *Examples.* The provisions of this paragraph (b) are illustrated by the following examples.

Example 1. FIFO inventory method. (i) Taxpayer J uses the FIFO method of accounting for inventories. J's beginning inventory for 1994 (all of which is sold during 1994) is \$2,500,000 (consisting of \$2,000,000 of section 471 costs and \$500,000 of additional section 263A costs). During 1994, J incurs \$10,000,000 of section 471 costs and \$1,000,000 of additional section 263A costs. J's additional section 263A costs include capitalizable mixed service costs computed under the simplified service cost method as well as other allocable costs. J's section 471 costs remaining in ending inventory at the end of 1994 are \$3,000,000. J computes its absorption ratio for 1994, as follows:

$$\frac{\text{Additional section 263A costs incurred during 1994}}{\text{Section 471 costs incurred during 1994}} = \frac{\$1,000,000}{\$10,000,000} = 10\%$$

(ii) Under the simplified production method, J determines the additional section 263A costs allocable to its ending inventory by

multiplying the absorption ratio by the section 471 costs remaining in its ending inventory:

$$\text{Additional section 263A costs} = 10\% \times \$3,000,000 = \$300,000$$

(iii) J adds this \$300,000 to the \$3,000,000 of section 471 costs remaining in its ending inventory to calculate its total ending inventory of \$3,300,000. The balance of J's additional section 263A costs incurred during 1994, \$700,000, (\$1,000,000 less \$300,000) is taken into account in 1994 as part of J's cost of goods sold.

Example 2. LIFO inventory method. (i) Taxpayer K uses a dollar-value LIFO inventory method. K's beginning inventory for 1994 is \$2,500,000 (consisting of \$2,000,000 of section 471 costs and \$500,000 of additional section 263A costs). During 1994, K incurs \$10,000,000 of section 471 costs and \$1,000,000 of additional section 263A costs. K's 1994 LIFO increment is \$1,000,000 (\$3,000,000 of section 471 costs in ending inventory less \$2,000,000 of section 471 costs in beginning inventory).

(ii) To determine the additional section 263A costs allocable to its ending inventory,

K multiplies the 10% absorption ratio (\$1,000,000 of additional section 263A costs divided by \$10,000,000 of section 471 costs) by the \$1,000,000 LIFO increment. Thus, K's additional section 263A costs allocable to its ending inventory are \$100,000 (\$1,000,000 multiplied by 10%). This \$100,000 is added to the \$1,000,000 to determine a total 1994 LIFO increment of \$1,100,000. K's ending inventory is \$3,600,000 (its beginning inventory of \$2,500,000 plus the \$1,100,000 increment). The balance of K's additional section 263A costs incurred during 1994, \$900,000 (\$1,000,000 less \$100,000), is taken into account in 1994 as part of K's cost of goods sold.

(iii) In 1995, K sells one-half of the inventory in its 1994 LIFO increment. K must include in its cost of goods sold for 1995 the amount of additional section 263A costs relating to this inventory, \$50,000 (one-half of

Internal Revenue Service, Treasury

§ 1.263A-2

the tional section 263A costs capitalized in 1994 ending inventory, or \$100,000).

Example 3. LIFO pools. (i) Taxpayer U begins its business in 1994 and adopts the LIFO inventory method. During 1994, L incurs \$10,000 of section 471 costs and \$1,000 of additional section 263A costs. At the end of 1994,

L's ending inventory includes \$3,000 of section 471 costs contained in three LIFO pools (X, Y, and Z) as shown below. Under the simplified production method, L computes its absorption ratio and inventory for 1994 as follows:

$$\frac{\text{Additional section 263A costs incurred during 1994}}{\text{Section 471 costs incurred during 1994}} = \frac{\$1,000}{\$10,000} = 10\%$$

| | Total | X | Y | Z |
|---|---------|---------|-------|-------|
| 1994: | | | | |
| Ending section 471 costs | \$3,000 | \$1,600 | \$600 | \$800 |
| Additional section 263A costs (10%) | 300 | 160 | 60 | 80 |
| 1994 ending inventory | \$3,300 | \$1,760 | \$660 | \$880 |

(ii) During 1995, L incurs \$2,000 of section 471 costs as shown below and \$400 of additional section 263A costs. Moreover, L sells

goods from pools X, Y, and Z having a total cost of \$1,000. L computes its absorption ratio and inventory for 1995:

$$\frac{\text{Additional section 263A costs incurred during 1995}}{\text{Section 471 costs incurred during 1995}} = \frac{\$400}{\$2,000} = 20\%$$

| | Total | X | Y | Z |
|--------------------------------------|---------|---------|-------|-------|
| 1995: | | | | |
| Beginning section 471 costs | \$3,000 | \$1,600 | \$600 | \$800 |
| 1995 section 471 costs | 2,000 | 1,500 | 300 | 200 |
| Section 471 cost of goods sold | (1,000) | (300) | (300) | (400) |
| 1995 ending section 471 costs | \$4,000 | \$2,800 | \$600 | \$600 |
| Consisting of: | | | | |
| 1994 layer | \$2,800 | \$1,600 | \$600 | \$600 |
| 1995 layer | 1,200 | 1,200 | | |
| | \$4,000 | \$2,800 | \$600 | \$600 |
| Additional section 263A costs: | | | | |
| 1994 (10%) | \$280 | \$160 | \$60 | \$60 |
| 1995 (20%) | 240 | 240 | | |
| | \$520 | \$400 | \$60 | \$60 |
| 1995 ending inventory | \$4,520 | \$3,200 | \$660 | \$660 |

(iii) In 1995, L experiences a \$200 decrement in pool Z. Thus, L must charge the additional section 263A costs incurred in prior years applicable to the decrement to 1995's cost of goods sold. To do so, L determines a ratio by dividing the decrement by the section 471 costs in the 1994 layer (\$200 divided by \$800, or 25%). L then multiplies this ratio (25%) by the additional section 263A costs in the 1994 layer (\$80) to determine the additional section 263A costs applicable to the

decrement (\$20). Therefore, \$20 is taken into account by L in 1995 as part of its cost of goods sold (\$80 multiplied by 25%).

(4) *Simplified production method with historic absorption ratio election*—(i) *In general.* This paragraph (b)(4) generally permits producers using the simplified production method to elect a historic

absorption ratio in determining additional section 263A costs allocable to eligible property remaining on hand at the close of their taxable years. Except as provided in paragraph (b)(4)(v) of this section, a taxpayer may only make a historic absorption ratio election if it has used the simplified production method for three or more consecutive taxable years immediately prior to the year of election and has capitalized additional section 263A costs using an actual absorption ratio (as defined under

paragraph (b)(3)(ii) of this section) for its three most recent consecutive taxable years. This method is not avail-

able to a taxpayer that is deemed to have zero additional section 263A costs under paragraph (b)(3)(iv) of this section. The historic absorption ratio is used in lieu of an actual absorption ratio computed under paragraph (b)(3)(ii) of this section and is based on costs capitalized by a taxpayer during its test period. If elected, the historic absorption ratio must be used for each taxable year within the qualifying period described in paragraph (b)(4)(ii)(C) of this section.

(ii) *Operating rules and definitions—*
(A) *Historic absorption ratio.* (1) The historic absorption ratio is equal to the following ratio:

$$\frac{\text{Additional section 263A costs incurred during the test period}}{\text{Section 471 costs incurred during the test period}}$$

(2) Additional section 263A costs incurred during the test period are defined as the additional section 263A costs described in § 1.263A-1(d)(3) that the taxpayer incurs during the test period described in paragraph (b)(4)(ii)(B) of this section.

(3) Section 471 costs incurred during the test period mean the section 471 costs described in § 1.263A-1(d)(2) that the taxpayer incurs during the test period described in paragraph (b)(4)(ii)(B) of this section.

(4) Additional section 263A costs incurred during the test period, as defined in paragraph (b)(4)(ii)(A)(2) of this section, and section 471 costs incurred during the test period, as defined in paragraph (b)(4)(ii)(A)(3) of this section, do not include costs specifically described in § 1.263A-1(e)(3)(ii) or cost reductions described in § 1.471-3(e) that a taxpayer properly allocates entirely to property that has been sold.

(B) *Test period—(1) In general.* The test period is generally the three taxable-year period immediately prior to the taxable year that the historic absorption ratio is elected.

(2) *Updated test period.* The test period begins again with the beginning of the first taxable year after the close of a qualifying period. This new test period, the updated test period, is the three

taxable-year period beginning with the first taxable year after the close of the qualifying period as defined in paragraph (b)(4)(ii)(C) of this section.

(C) *Qualifying period—(1) In general.* A qualifying period includes each of the first five taxable years beginning with the first taxable year after a test period (or an updated test period).

(2) *Extension of qualifying period.* In the first taxable year following the close of each qualifying period, (e.g., the sixth taxable year following the test period), the taxpayer must compute the actual absorption ratio under the simplified production method. If the actual absorption ratio computed for this taxable year (the recomputation year) is within one-half of one percentage point (plus or minus) of the historic absorption ratio used in determining capitalizable costs for the qualifying period (i.e., the previous five taxable years), the qualifying period is extended to include the recomputation year and the following five taxable years, and the taxpayer must continue to use the historic absorption ratio throughout the extended qualifying period. If, however, the actual absorption ratio computed for the recomputation year is not within one-half of one percentage point (plus or minus) of the historic absorption ratio, the taxpayer

must use actual absorption ratios beginning with the recomputation year under the simplified production method and throughout the updated test period. The taxpayer must resume using the historic absorption ratio (determined with reference to the updated test period) in the third taxable year following the recomputation year.

(iii) *Method of accounting*—(A) *Adoption and use*. The election to use the historic absorption ratio is a method of accounting. A taxpayer using the simplified production method may elect the historic absorption ratio in any taxable year if permitted under this paragraph (b)(4), provided the taxpayer has not obtained the Commissioner's consent to revoke the historic absorption ratio election within its prior six taxable years. The election is to be effected on a cut-off basis, and thus, no adjustment under section 481(a) is required or permitted. The use of a historic absorption ratio has no effect on other methods of accounting adopted by the taxpayer and used in conjunction with the simplified production method in determining its section 263A costs. Accordingly, in computing its actual absorption ratios, the taxpayer must use the same methods of accounting used in computing its historic absorption ratio during its most recent test period unless the taxpayer obtains the consent of the Commissioner. Finally, for purposes of this paragraph (b)(4)(iii), the recomputation of the historic absorption ratio during an updated test period and the change from a historic absorption ratio to an actual absorption ratio by reason of the requirements of this paragraph (b)(4) are not considered changes in methods of accounting under section 446(e) and, thus, do not require the consent of the Commissioner or any adjustments under section 481(a).

(B) *Revocation of election*. A taxpayer may only revoke its election to use the historic absorption ratio with the consent of the Commissioner in a manner prescribed under section 446(e) and the regulations thereunder. Consent to the change for any taxable year that is included in the qualifying period (or an extended qualifying period) will be granted only upon a showing of unusual circumstances.

(iv) *Reporting and recordkeeping requirements*—(A) *Reporting*. A taxpayer making an election under this paragraph (b)(4) must attach a statement to its federal income tax return for the taxable year in which the election is made showing the actual absorption ratios determined under the simplified production method during its first test period. This statement must disclose the historic absorption ratio to be used by the taxpayer during its qualifying period. A similar statement must be attached to the federal income tax return for the first taxable year within any subsequent qualifying period (i.e., after an updated test period).

(B) *Recordkeeping*. A taxpayer must maintain all appropriate records and details supporting the historic absorption ratio until the expiration of the statute of limitations for the last year for which the taxpayer applied the particular historic absorption ratio in determining additional section 263A costs capitalized to eligible property.

(v) *Transition rules*. Taxpayers will be permitted to elect a historic absorption ratio in their first, second, or third taxable year beginning after December 31, 1993, under such terms and conditions as may be prescribed by the Commissioner. Taxpayers are eligible to make an election under these transition rules whether or not they previously used the simplified production method. A taxpayer making such an election must recompute (or compute) its additional section 263A costs, and thus, its historic absorption ratio for its first test period as if the rules prescribed in this section and §§ 1.263A-1 and 1.263A-3 had applied throughout the test period.

(vi) *Example*. The provisions of this paragraph (b)(4) are illustrated by the following example:

Example. (i) Taxpayer M uses the FIFO method of accounting for inventories and for 1994 elects to use the historic absorption ratio with the simplified production method. After recomputing its additional section 263A costs in accordance with the transition rules of paragraph (b)(4)(v) of this section, M identifies the following costs incurred during the test period:

1991:
Add'l section 263A costs—\$100
Section 471 costs—\$3,000
1992:

§ 1.263A-2

26 CFR Ch. I (4-1-17 Edition)

Add'l section 263A costs—\$200
 Section 471 costs—\$4,000
 1993:
 Add'l section 263A costs—\$300

Section 471 costs—\$5,000
 (ii) Therefore, M computes a 5% historic absorption ratio determined as follows:

$$\text{Historic absorption ratio} = \frac{\$100 + 200 + 300}{\$3,000 + 4,000 + 5,000} = \frac{\$600}{\$12,000} = 5\%$$

(iii) In 1994, M incurs \$10,000 of section 471 costs of which \$3,000 remain in inventory at the end of the year. Under the simplified production method using a historic absorption ratio, M determines the additional section

263A costs allocable to its ending inventory by multiplying its historic absorption ratio (5%) by the section 471 costs remaining in its ending inventory as follows:

$$\text{Additional section 263A costs} = 5\% \times \$3,000 = \$150$$

(iv) To determine its ending inventory under section 263A, M adds the additional section 263A costs allocable to ending inventory to its section 471 costs remaining in ending inventory (\$3,150 = \$150 + \$3,000). The balance of M's additional section 263A costs incurred during 1994 is taken into account in 1994 as part of M's cost of goods sold.

(v) M's qualifying period ends with the close of its 1998 taxable year. Therefore, 1999 is a recomputation year in which M must compute its actual absorption ratio. M determines its actual absorption ratio for 1999 to be 5.25% and compares that ratio to its historic absorption ratio (5.0%). Therefore, M must continue to use its historic absorption ratio of 5.0% throughout an extended qualifying period, 1999 through 2004 (the recomputation year and the following five taxable years).

(vi) If, instead, M's actual absorption ratio for 1999 were not between 4.5% and 5.5%, M's qualifying period would end and M would be required to compute a new historic absorption ratio with reference to an updated test period of 1999, 2000, and 2001. Once M's historic absorption ratio is determined for the updated test period, it would be used for a new qualifying period beginning in 2002.

(c) *Additional simplified methods for producers.* The Commissioner may prescribe additional elective simplified methods by revenue ruling or revenue procedure.

(d) *Cross reference.* See § 1.6001-1(a) regarding the duty of taxpayers to keep such records as are sufficient to establish the amount of gross income, deductions, etc.

(e) *Change in method of accounting—*

(1) *In general.* A change in a taxpayer's treatment of additional section 263A costs to comply with paragraph (b)(2)(i)(D) of this section is a change in method of accounting to which the provisions of sections 446 and 481 and the regulations under those sections apply. See § 1.263A-7. For a taxpayer's first taxable year ending on or after August 2, 2005, the taxpayer is granted the consent of the Commissioner to change its method of accounting to comply with paragraph (b)(2)(i)(D) of this section, provided the taxpayer follows the administrative procedures, as modified by paragraphs (e)(2) through (4) of this section, issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in accounting method (for further guidance, for example, see Rev. Proc. 2002-9 (2002-1 CB 327), as modified and clarified by Announcement 2002-17 (2002-1 CB 561), modified and amplified by Rev. Proc. 2002-19 (2002-1 CB 696), and amplified, clarified, and modified by Rev. Proc. 2002-54 (2002-2 CB 432), and § 601.601(d)(2)(ii)(b) of this chapter). For purposes of Form 3115, "Application for Change in Accounting Method," the designated number for the automatic accounting method change authorized by this paragraph (e) is "95." If Form 3115 is revised or renumbered, any reference in this section to that form is treated as a reference to the revised or

renumbered form. Alternatively, notwithstanding the provisions of any administrative procedures that preclude a taxpayer from requesting the advance consent of the Commissioner to change a method of accounting that is required to be made pursuant to a published automatic change procedure, for its first taxable year ending on or after August 2, 2005, a taxpayer may request the advance consent of the Commissioner to change its method of accounting to comply with paragraph (b)(2)(i)(D) of this section, provided the taxpayer follows the administrative procedures, as modified by paragraphs (e)(2) through (5) of this section, for obtaining the advance consent of the Commissioner (for further guidance, for example, see Rev. Proc. 97-27 (1997-1 CB 680), as modified and amplified by Rev. Proc. 2002-19 (2002-1 CB 696), as amplified and clarified by Rev. Proc. 2002-54 (2002-2 CB 432), and § 601.601(d)(2)(ii)(b) of this chapter). For the taxpayer's second and subsequent taxable years ending on or after August 2, 2005, requests to secure the consent of the Commissioner must be made under the administrative procedures, as modified by paragraphs (e)(3) and (4) of this section, for obtaining the Commissioner's advance consent to a change in accounting method.

(2) *Scope limitations.* Any limitations on obtaining the automatic consent or advance consent of the Commissioner do not apply to a taxpayer seeking to change its method of accounting to comply with paragraph (b)(2)(i)(D) of this section for its first taxable year ending on or after August 2, 2005.

(3) *Audit protection.* A taxpayer that changes its method of accounting in accordance with this paragraph (e) to comply with paragraph (b)(2)(i)(D) of this section does not receive audit protection if its method of accounting for additional section 263A costs is an issue under consideration at the time the application is filed with the national office.

(4) *Section 481(a) adjustment.* A change in method of accounting to conform to paragraph (b)(2)(i)(D) of this section requires a section 481(a) adjustment. The section 481(a) adjustment period is two taxable years for a net positive adjustment for an accounting method change

that is made to conform to paragraph (b)(2)(i)(D) of this section.

(5) *Time for requesting change.* Notwithstanding the provisions of § 1.446-1(e)(3)(i) and any contrary administrative procedure, a taxpayer may submit a request for advance consent to change its method of accounting to comply with paragraph (b)(2)(i)(D) of this section for its first taxable year ending on or after August 2, 2005, on or before the date that is 30 days after the end of the taxable year for which the change is requested.

(f) *Effective/applicability date.* (1) Paragraphs (b)(2)(i)(D), (e), and (f) of this section apply for taxable years ending on or after August 2, 2005.

(2) Paragraphs (b)(3)(ii)(C) and (b)(4)(ii)(A)(4) of this section apply for taxable years ending on or after January 13, 2014.

[T.D. 8482, 58 FR 42219, Aug. 9, 1993, as amended by 59 FR 3318, 3319, Jan. 21, 1994; T.D. 8584, 59 FR 67197, Dec. 29, 1994; T.D. 9217, 70 FR 44469, Aug. 3, 2005; T.D. 9318, 72 FR 14677, Mar. 29, 2007; T.D. 9652, 79 FR 2097, Jan. 13, 2014]

§ 1.263A-3 Rules relating to property acquired for resale.

(a) *Capitalization rules for property acquired for resale—(1) In general.* Section 263A applies to real property and personal property described in section 1221(1) acquired for resale by a retailer, wholesaler, or other taxpayer (reseller). However, section 263A does not apply to personal property described in section 1221(1) acquired for resale by a reseller whose average annual gross receipts for the three previous taxable years do not exceed \$10,000,000 (small reseller). For this purpose, personal property includes both tangible and intangible property. Property acquired for resale includes stock in trade of the taxpayer or other property which is includible in the taxpayer's inventory if on hand at the close of the taxable year, and property held by the taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business. See, however, § 1.263A-1(b)(11) for an exception for certain de minimis property provided to customers incident to the provision of services.

(2) *Resellers with production activities—(i) In general.* Generally, a taxpayer

§ 1.263A-3

26 CFR Ch. I (4-1-17 Edition)

must capitalize all direct costs and certain indirect costs associated with real property and tangible personal property it produces. See § 1.263A-2(a). Thus, except as provided in paragraphs (a)(2)(ii) and (3) of this section, a reseller, including a small reseller, that also produces property must capitalize the additional section 263A costs associated with any property it produces.

(ii) *Exception for small resellers.* Under this paragraph (a)(2)(ii), a small reseller is not required to capitalize additional section 263A costs associated with any personal property that is produced incident to its resale activities, provided the production activities are de minimis (within the meaning of paragraph (a)(2)(iii) of this section).

(iii) *De minimis production activities—*
(A) *In general.* (1) In determining whether a taxpayer's production activities are de minimis, all facts and circumstances must be considered. For example, the taxpayer must consider the volume of the production activities in its trade or business. Production activities are presumed de minimis if—

(i) The gross receipts from the sale of the property produced by the reseller are less than 10 percent of the total gross receipts of the trade or business; and

(ii) The labor costs allocable to the trade or business' production activities are less than 10 percent of the reseller's total labor costs allocable to its trade or business.

(2) For purposes of this de minimis presumption, gross receipts has the same definition as provided in paragraph (b) of this section except that gross receipts are measured at the trade-or-business level rather than at the single-employer level.

(B) *Example.* The application of this paragraph (a)(2) may be illustrated by the following example:

Example—Small reseller with de minimis production activities. Taxpayer N is a small reseller in the retail grocery business whose average annual gross receipts for the three previous taxable years are less than \$10,000,000. N's grocery stores typically contain bakeries where customers may purchase baked goods produced by N. N's gross receipts from its bakeries are 5% of the entire grocery business. N's labor costs from its bakeries are 3% of its total labor costs allocable to the entire grocery business. Because

both ratios are less than 10%, N's production activities are de minimis. Further, because N's production activities are incident to its resale activities, N is not required to capitalize any additional section 263A costs associated with its produced property.

(3) *Resellers with property produced under contract.* Generally, property produced for a taxpayer under a contract (within the meaning of § 1.263A-2(a)(1)(ii)(B)(2)) is treated as property produced by the taxpayer. See § 1.263A-2(a)(1)(ii)(B). However, a small reseller is not required to capitalize additional section 263A costs to personal property produced for it under contract with an unrelated person if the contract is entered into incident to the resale activities of the small reseller and the property is sold to its customers. For purposes of this paragraph, persons are related if they are described in section 267(b) or 707(b).

(4) *Use of the simplified resale method—*

(i) *In general.* Except as provided in paragraphs (a)(4)(ii) and (iii) of this section, a taxpayer may elect the simplified production method (as described in § 1.263A-2(b)) but may not elect the simplified resale method (as described in paragraph (d) of this section) if the taxpayer is engaged in both production and resale activities with respect to the items of eligible property listed in § 1.263A-2(b)(2).

(ii) *Resellers with de minimis production activities.* A reseller otherwise permitted to use the simplified resale method in paragraph (d) of this section may use the simplified resale method if its production activities with respect to the items of eligible property listed in § 1.263A-2(b)(2) are de minimis (within the meaning of paragraph (a)(2)(iii) of this section) and incident to its resale of personal property described in section 1221(1).

(iii) *Resellers with property produced under a contract.* A reseller otherwise permitted to use the simplified resale method in paragraph (d) of this section may use the simplified resale method even though it has personal property produced for it (e.g., private label goods) under a contract with an unrelated person if the contract is entered into incident to its resale activities and the property is sold to its customers. For purposes of this paragraph

(a)(4)(iii), persons are related if they are described in section 267(b) or 707(b).

(iv) *Application of simplified resale method.* A taxpayer that uses the simplified resale method and has de minimis production activities incident to its resale activities or property produced under contract must capitalize all costs allocable to eligible property produced using the simplified resale method.

(b) *Gross receipts exception for small resellers*—(1) *In general.* Section 263A does not apply to any personal property acquired for resale during any taxable year if the taxpayer's (or its predecessors') average annual gross receipts for the three previous taxable years (test period) do not exceed \$10,000,000. However, taxpayers that acquire real property for resale are subject to section 263A with respect to real property regardless of their gross receipts. See section 263A(b)(2)(B).

(i) *Test period for new taxpayers.* For purposes of applying this exception, if a taxpayer has been in existence for less than three taxable years, the taxpayer determines its average annual gross receipts for the number of taxable years (including short taxable years) that the taxpayer (or its predecessor) has been in existence.

(ii) *Treatment of short taxable year.* In the case of a short taxable year, the taxpayer's gross receipts are annualized by—

(A) Multiplying the gross receipts of the short taxable year by 12; and

(B) Dividing the product determined in paragraph (b)(1)(ii)(A) of this section by the number of months in the short taxable year.

(2) *Definition of gross receipts*—(i) *In general.* Gross receipts are the total amount, as determined under the taxpayer's method of accounting, derived from all of the taxpayer's trades or businesses (e.g., revenues derived from the sale of inventory before reduction for cost of goods sold).

(ii) *Amounts excluded.* For purposes of this paragraph (b), gross receipts do not include amounts representing—

(A) Returns or allowances;

(B) Interest, dividends, rents, royalties, or annuities, not derived in the ordinary course of a trade or business;

(C) Receipts from the sale or exchange of capital assets, as defined in section 1221;

(D) Repayments of loans or similar instruments (e.g., a repayment of the principal amount of a loan held by a commercial lender);

(E) Receipts from a sale or exchange not in the ordinary course of business, such as the sale of an entire trade or business or the sale of property used in a trade or business as defined under section 1221(2); and

(F) Receipts from any activity other than a trade or business or an activity engaged in for profit.

(3) *Aggregation of gross receipts*—(i) *In general.* In determining gross receipts, all persons treated as a single employer under section 52(a) or (b), section 414(m), or any regulation prescribed under section 414 (or persons that would be treated as a single employer under any of these provisions if they had employees) shall be treated as one taxpayer. The gross receipts of a single employer (or the group) are determined by aggregating the gross receipts of all persons (or the members) of the group, excluding any gross receipts attributable to transactions occurring between group members.

(ii) *Single employer defined.* A controlled group, which is treated as a single employer under section 52(a), includes members of a controlled group within the meaning of section 1563(a), regardless of whether such members would be treated as component members of such group under section 1563(b). (See § 1.52-1(c).) Thus, for example, the gross receipts of a franchised corporation that is treated as an excluded member for purposes of section 1563(b) are included in the single employer's gross receipts under this aggregation rule, if such corporation and the taxpayer were members of the same controlled group under section 1563(a).

(iii) *Gross receipts of a single employer.* The gross receipts of a single employer for the test period include the gross receipts of all group members (or their predecessors) that are members of the group as of the first day of the taxable year in issue, regardless of whether such persons were members of the group for any of the three preceding

taxable years. The gross receipts of the single employer for the test period do not, however, include the gross receipts of any member that was a group member (including any predecessor) for any or all of the three preceding taxable years, and is no longer a group member as of the first day of the taxable year in issue. Any group member that has a taxable year of less than 12 months must annualize its gross receipts in accordance with paragraph (b)(1)(ii) of this section.

(iv) *Examples.* The provisions of this paragraph (b)(3) are illustrated by the following examples:

Example 1. Subsidiary acquired during the taxable year. A parent corporation, (P), has owned 100% of the stock of another corporation, (S1), continually since 1989. P and S1 are calendar year taxpayers. S1 acquires property for resale. On January 1, 1994, P acquires 100% of the stock of another calendar year corporation (S2). In determining whether S1's resale activities are subject to the provisions of section 263A for 1994, the gross receipts of P, S1, and S2 for 1991, 1992, and 1993 are aggregated, excluding the gross receipts, if any, attributable to transactions occurring between the three corporations.

Example 2. Subsidiary sold during the taxable year. Since 1989, a parent corporation, (P), has continually owned 100% of the stock of two other corporations, (S1) and (S2). The three corporations are calendar year taxpayers. S1 acquires property for resale. On December 31, 1993, P sells all of its stock in S2. In determining whether S1's resale activities are subject to the provisions of section 263A for 1994, only the gross receipts of P and S1 for 1991, 1992, and 1993 must be aggregated, excluding the gross receipts, if any, attributable to transactions occurring between the two corporations.

(c) *Purchasing, handling, and storage costs—(1) In general.* Generally, § 1.263A-1(e) describes the types of costs that must be capitalized by taxpayers. Resellers must capitalize the acquisition cost of property acquired for resale, as well as indirect costs described in § 1.263A-1(e)(3), which are properly allocable to property acquired for resale. The indirect costs most often incurred by resellers are purchasing, handling, and storage costs. This paragraph (c) provides additional guidance regarding each of these categories of costs. As provided in § 1.263A-1(e), this paragraph (c) also applies to producers incurring

purchasing, handling, and storage costs.

(2) *Costs attributable to purchasing, handling, and storage.* The costs attributable to purchasing, handling, and storage activities generally consist of direct and indirect labor costs (including the costs of pension plans and other fringe benefits); occupancy expenses including rent, depreciation, insurance, security, taxes, utilities and maintenance; materials and supplies; rent, maintenance, depreciation, and insurance of vehicles and equipment; tools; telephone; travel; and the general and administrative costs that directly benefit or are incurred by reason of the taxpayer's activities.

(3) *Purchasing costs—(i) In general.* Purchasing costs are costs associated with operating a purchasing department or office within a trade or business, including personnel costs (e.g., of buyers, assistant buyers, and clerical workers), relating to—

- (A) The selection of merchandise;
- (B) The maintenance of stock assortment and volume;
- (C) The placement of purchase orders;
- (D) The establishment and maintenance of vendor contacts; and
- (E) The comparison and testing of merchandise.

(ii) *Determination of whether personnel are engaged in purchasing activities.* The determination of whether a person is engaged in purchasing activities is based upon the activities performed by that person and not upon the person's title or job classification. Thus, for example, although an employee's job function may be described in such a way as to indicate activities outside the area of purchasing (e.g., a marketing representative), such activities must be analyzed on the basis of the activities performed by that employee. If a person performs both purchasing and non-purchasing activities, the taxpayer must reasonably allocate the person's labor costs between these activities. For example, a reasonable allocation is one based on the amount of time the person spends on each activity.

(A) *1/3-2/3 rule for allocating labor costs.* A taxpayer may elect the 1/3-2/3 rule for

allocating labor costs of persons performing both purchasing and non-purchasing activities. If elected, the taxpayer must allocate the labor costs of all such persons using the $\frac{1}{3}$ - $\frac{2}{3}$ rule. Under this rule—

(1) If less than one-third of a person's activities are related to purchasing, none of that person's labor costs are allocated to purchasing;

(2) If more than two-thirds of a person's activities are related to purchasing, all of that person's labor costs are allocated to purchasing; and

(3) In all other cases, the taxpayer must reasonably allocate labor costs between purchasing and non-purchasing activities.

(B) *Example.* The application of paragraph (c)(3)(ii)(A) of this section may be illustrated by the following example:

Example. Taxpayer O is a reseller that employs three persons, A, B, and C, who perform both purchasing and non-purchasing activities. These persons spend the following time performing purchasing activities: A-25%; B-70%; and C-50%. Under the $\frac{1}{3}$ - $\frac{2}{3}$ rule, Taxpayer O treats none of A's labor costs as purchasing costs, all of B's labor costs as purchasing costs, and Taxpayer O allocates 50% of C's labor costs as purchasing costs.

(4) *Handling costs*—(i) *In general.* Handling costs include costs attributable to processing, assembling, repackaging, transporting, and other similar activities with respect to property acquired for resale, provided the activities do not come within the meaning of the term produce as defined in § 1.263A-2(a)(1). Handling costs are generally required to be capitalized under section 263A. Under this paragraph (c)(4)(i), however, handling costs incurred at a retail sales facility (as defined in paragraph (c)(5)(ii)(B) of this section) with respect to property sold to retail customers at the facility are not required to be capitalized. Thus, for example, handling costs incurred at a retail sales facility to unload, unpack, mark, and tag goods sold to retail customers at the facility are not required to be capitalized. In addition, handling costs incurred at a dual-function storage facility (as defined in paragraph (c)(5)(ii)(G) of this section) with respect to property sold to customers from the facility are not required to be capital-

ized to the extent that the costs are incurred with respect to property sold in on-site sales. Handling costs attributable to property sold to customers from a dual-function storage facility in on-site sales are determined by applying the ratio in paragraph (c)(5)(iii)(B) of this section.

(ii) *Processing costs.* Processing costs are the costs a reseller incurs in making minor changes or alterations to the nature or form of a product acquired for resale. Minor changes to a product include, for example, monogramming a sweater, altering a pair of pants, and other similar activities.

(iii) *Assembling costs.* Generally, assembling costs are costs associated with incidental activities that are necessary in readying property for resale (e.g., attaching wheels and handlebars to a bicycle acquired for resale).

(iv) *Repackaging costs.* Repackaging costs are the costs a taxpayer incurs to package property for sale to its customers.

(v) *Transportation costs.* Generally, transportation costs are the costs a taxpayer incurs moving or shipping property acquired for resale. These costs include the cost of dispatching trucks; loading and unloading shipments; and sorting, tagging, and marking property. Transportation costs may consist of depreciation on trucks and equipment and the costs of fuel, insurance, labor, and similar costs. Generally, transportation costs required to be capitalized include costs incurred in transporting property—

(A) From the vendor to the taxpayer;

(B) From one of the taxpayer's storage facilities to another of its storage facilities;

(C) From the taxpayer's storage facility to its retail sales facility;

(D) From the taxpayer's retail sales facility to its storage facility; and

(E) From one of the taxpayer's retail sales facilities to another of its retail sales facilities.

(vi) *Costs not required to be capitalized as handling costs*—(A) *Distribution costs*—(1) *In general.* Distribution costs are not required to be capitalized. Distribution costs are any transportation costs incurred outside a storage facility in delivering goods to a customer. For this purpose, any costs incurred on

a loading dock are treated as incurred outside a storage facility.

(2) *Costs incurred in transporting goods to a related person.* Distribution costs do not include costs incurred by a taxpayer in delivering goods to a related person. Thus, for example, when a taxpayer sells goods to a related person, the costs of transporting the goods are included in determining the basis of the goods that are sold, and hence in determining the resulting gain or loss from the sale, for all purposes of the Internal Revenue Code and the regulations thereunder. See, e.g., sections 267, 707, and 1502. For purposes of this provision, persons are related if they are described in section 267(b) or section 707(b).

(B) *Delivery of custom-ordered items.* Generally, costs incurred in transporting goods from a taxpayer's storage facility to its retail sales facility must be capitalized. However, costs incurred outside a storage facility in delivering custom-ordered items to a retail sales facility are not required to be capitalized. For this purpose, any costs incurred on a loading dock are treated as incurred outside a storage facility. Delivery of custom-ordered items occurs when a taxpayer can demonstrate that a delivery to the taxpayer's retail sales facility is made to fill an identifiable order of a particular customer (placed by the customer before the delivery of the goods occurs) for the particular goods in question. Factors that may demonstrate the existence of a specific, identifiable delivery include the following—

- (1) The customer has paid for the item in advance of the delivery;
- (2) The customer has submitted a written order for the item;
- (3) The item is not normally available at the retail sales facility for on-site customer purchases; and
- (4) The item will be returned to the storage facility (and not held for sale at the retail sales facility) if the customer cancels an order.

(C) *Pick and pack costs—(1) In general.* Generally, handling costs incurred inside a storage or warehousing facility must be capitalized. However, costs attributable to pick and pack activities inside a storage or warehousing facility are not required to be capitalized. Pick

and pack activities are activities undertaken in preparation for imminent shipment to a particular customer after the customer has ordered the specific goods in question. Examples of pick and pack activities include:

- (i) Moving specific goods from a storage location in preparation for shipment to the customer;
- (ii) Packing or repacking those goods for shipment to the customer; and
- (iii) Staging those goods for shipment to the customer.

(2) *Activities that are not pick and pack activities.* Pick and pack activities do not include:

- (i) Unloading goods that are received for storage;
- (ii) Checking the quantity and quality of goods received;
- (iii) Comparing the quantity of goods received to the amounts ordered and preparing the receiving documents;
- (iv) Moving the goods to their storage location, e.g., bins, racks, containers, etc.; and
- (v) Storing the goods.

(3) *Costs not attributable to pick and pack activities.* Occupancy costs, such as rent, depreciation, insurance, security, taxes, utilities, and maintenance costs properly allocable to the storage or warehousing facility, are not costs attributable to pick and pack activities.

(5) *Storage costs—(i) In general.* Generally, storage costs are capitalized under section 263A to the extent they are attributable to the operation of an off-site storage or warehousing facility (an off-site storage facility). However, storage costs attributable to the operation of an on-site storage facility (as defined in paragraph (c)(5)(ii)(A) of this section) are not required to be capitalized under section 263A. Storage costs attributable to a dual-function storage facility (as defined in paragraph (c)(5)(ii)(G) of this section) must be capitalized to the extent that the facility's costs are allocable to off-site storage.

(ii) *Definitions—(A) On-site storage facility.* An on-site storage facility is defined as a storage or warehousing facility that is physically attached to, and an integral part of, a retail sales facility.

(B) *Retail sales facility.* (1) A retail sales facility is defined as a facility

where a taxpayer sells merchandise exclusively to retail customers in on-site sales. For this purpose, a retail sales facility includes those portions of any specific retail site—

(i) Which are customarily associated with and are an integral part of the operations of that retail site;

(ii) Which are generally open each business day exclusively to retail customers;

(iii) On or in which retail customers normally and routinely shop to select specific items of merchandise; and

(iv) Which are adjacent to or in immediate proximity to other portions of the specific retail site.

(2) Thus, for example, two lots of an automobile dealership physically separated by an alley or an access road would generally be considered one retail sales facility, provided customers routinely shop on both of the lots to select the specific automobiles that they wish to acquire.

(C) *An integral part of a retail sales facility.* A storage facility is considered an integral part of a retail sales facility when the storage facility is an essential and indispensable part of the retail sales facility. For example, if the storage facility is used exclusively for filling orders or completing sales at the retail sales facility, the storage facility is an integral part of the retail sales facility.

(D) *On-site sales.* On-site sales are defined as sales made to retail customers physically present at a facility. For example, mail order and catalog sales are made to customers not physically present at the facility, and thus, are not on-site sales.

(E) *Retail customer—(1) In general.* A retail customer is defined as the final purchaser of the merchandise. A retail customer does not include a person who resells the merchandise to others, such as a contractor or manufacturer that incorporates the merchandise into another product for sale to customers.

(2) *Certain non-retail customers treated as retail customers.* For purposes of this section, a non-retail customer is treated as a retail customer with respect to a particular facility if the following requirements are satisfied—

(i) The non-retail customer purchases goods under the same terms and condi-

tions as are available to retail customers (e.g., no special discounts);

(ii) The non-retail customer purchases goods in the same manner as a retail customer (e.g., the non-retail customer may not place orders in advance and must come to the facility to examine and select goods);

(iii) Retail customers shop at the facility on a routine basis (i.e., on most business days), and no special days or hours are reserved for non-retail customers; and

(iv) More than 50 percent of the gross sales of the facility are made to retail customers.

(F) *Off-site storage facility.* An off-site storage facility is defined as a storage facility that is not an on-site storage facility.

(G) *Dual-function storage facility.* A dual-function storage facility is defined as a storage facility that serves as both an off-site storage facility and an on-site storage facility. For example, a dual-function storage facility would include a regional warehouse that serves the taxpayer's separate retail sales outlets and also contains a sales outlet therein. A dual-function storage facility also includes any facility where sales are made to retail customers in on-site sales and to—

(1) Retail customers in sales that are not on-site sales; or

(2) Other customers.

(iii) *Treatment of storage costs incurred at a dual-function storage facility—(A) In general.* Storage costs associated with a dual-function storage facility must be allocated between the off-site storage function and the on-site storage function. To the extent that the dual-function storage facility's storage costs are allocable to the off-site storage function, they must be capitalized. To the extent that the dual-function storage facility's storage costs are allocable to the on-site storage function, they are not required to be capitalized.

(B) *Dual-function storage facility allocation ratio—(1) In general.* Storage costs associated with a dual-function storage facility must be allocated between the off-site storage function and the on-site storage function using the ratio of—

(i) Gross on-site sales of the facility (i.e., gross sales of the facility made to

retail customers visiting the premises in person and purchasing merchandise stored therein); to

(ii) Total gross sales of the facility. For this purpose, the total gross sales of the facility include the value of items shipped to other facilities of the taxpayer.

(2) *Illustration of ratio allocation.* For example, if a dual-function storage facility's on-site sales are 40 percent of the total gross sales of the facility, then 40 percent of the facility's storage costs are allocable to the on-site storage function and are not required to be capitalized under section 263A.

(3) *Appropriate adjustments for other uses of a dual-function storage facility.* Prior to computing the allocation ratio in paragraph (c)(5)(iii)(B) of this section, a taxpayer must apply the principles of paragraph (c)(5)(iv) of this section in determining the portion of the facility that is a dual-function storage facility (and the costs attributable to such portion).

(C) *De minimis 90-10 rule for dual-function storage facilities.* If 90 percent or more of the costs of a facility are attributable to the on-site storage function, the entire storage facility is deemed to be an on-site storage facility. In contrast, if 10 percent or less of the costs of a storage facility are attributable to the on-site storage function, the entire storage facility is deemed to be an off-site storage facility.

(iv) *Costs not attributable to an off-site storage facility.* To the extent that costs incurred at an off-site storage facility are not properly allocable to the taxpayer's storage function, the costs are not accounted for as off-site storage costs. For example, if a taxpayer has an office attached to its off-site storage facility where work unrelated to the storage function is performed, such as a sales office, costs associated with this office are not off-site storage costs. However, if a taxpayer uses a portion of an off-site storage facility in a manner related to the storage function, for example, to store equipment or supplies that are not offered for sale to customers, costs associated with this portion of the facility are off-site storage costs.

(v) *Examples.* The provisions of this paragraph (c)(5) are illustrated by the following examples:

Example 1. Catalog or mail order center. Taxpayer P operates a mail order catalog business. As part of its business, P stores merchandise for shipment to customers who purchase the merchandise through orders placed by telephone or mail. P's storage facility is not an on-site storage facility because no on-site sales are made at the facility.

Example 2. Pooled-stock facility. Taxpayer Q maintains a pooled-stock facility, which functions as a back-up regional storage facility for Q's retail sales outlets in the nearby area. Q's pooled stock facility is an off-site storage facility because it is neither physically attached to nor an integral part of a retail sales facility.

Example 3. Wholesale warehouse. Taxpayer R operates a wholesale warehouse where wholesale sales are made to customers physically present at the facility. R's customers resell the goods they purchase from R to final retail customers. Because no retail sales are conducted at the facility, all storage costs attributable to R's wholesale warehouse must be capitalized.

(d) *Simplified resale method—(1) Introduction.* This paragraph (d) provides a simplified method for determining the additional section 263A costs properly allocable to property acquired for resale and other eligible property on hand at the end of the taxable year.

(2) *Eligible property.* Generally, the simplified resale method is only available to a trade or business exclusively engaged in resale activities. However, certain resellers with property produced as a result of de minimis production activities or property produced under contract may elect the simplified resale method, as described in paragraph (a)(4) of this section. Eligible property for purposes of the simplified resale method, therefore, includes any real or personal property described in section 1221(1) that is acquired for resale and any eligible property (within the meaning of § 1.263A-2(b)(2)) that is described in paragraph (a)(4) of this section.

(3) *Simplified resale method without historic absorption ratio election—(i) General allocation formula—(A) In general.* Under the simplified resale method, the additional section 263A costs allocable to eligible property remaining on hand at the close of the taxable year are computed as follows:

Combined absorption ratio \times section 471 costs remaining on hand at year end

(B) *Effect of allocation.* The resulting product under the general allocation formula is the additional section 263A costs that are added to the taxpayer's ending section 471 costs to determine the section 263A costs that are capitalized.

(C) *Definitions—(1) Combined absorption ratio.* The combined absorption ratio is defined as the sum of the storage and handling costs absorption ratio as defined in paragraph (d)(3)(i)(D) of this section and the purchasing costs absorption ratio as defined in paragraph (d)(3)(i)(E) of this section.

(2) *Section 471 costs remaining on hand at year end.* Section 471 costs remaining on hand at year end mean the section 471 costs, as defined in § 1.263A-1(d)(2), that the taxpayer incurs during its current taxable year, which remain in its ending inventory or are otherwise on hand at year end. For LIFO inventories of a taxpayer, the section 471 costs remaining on hand at year end means the increment, if any, for the current year

stated in terms of section 471 costs. See paragraph (d)(3)(ii) of this section for special rules applicable to LIFO taxpayers. Except as otherwise provided in this section or in § 1.263A-1 or 1.263A-2, additional section 263A costs that are allocated to inventories on hand at the close of the taxable year under the simplified resale method of this paragraph (d) are treated as inventory costs for all purposes of the Internal Revenue Code.

(3) *Costs allocable to property sold.* Section 471 costs remaining on hand at year end, as defined in paragraph (d)(3)(i)(C)(2) of this section, do not include costs that are specifically described in § 1.263A-1(e)(3)(ii) or cost reductions described in § 1.471-3(e) that a taxpayer properly allocates entirely to property that has been sold.

(D) *Storage and handling costs absorption ratio.* (1) Under the simplified resale method, the storage and handling costs absorption ratio is determined as follows:

$$\frac{\text{Current year's storage and handling costs}}{\text{Beginning inventory plus current year's purchases}}$$

(2) Current year's storage and handling costs are defined as the total storage costs plus the total handling costs incurred during the taxable year that relate to the taxpayer's property acquired for resale and other eligible property. See paragraph (c) of this section, which discusses storage and handling costs. Storage and handling costs must include the amount of allocable mixed service costs as described in paragraph (d)(3)(i)(F) of this section. Beginning inventory in the denominator of the storage and handling costs absorption ratio refers to the section 471 costs of any property acquired for resale or other eligible property held by the taxpayer as of the beginning of the taxable year. Current year's purchases generally mean the taxpayer's section 471 costs incurred with respect

to purchases of property acquired for resale during the current taxable year. In computing the denominator of the storage and handling costs absorption ratio, a taxpayer using a dollar-value LIFO method of accounting, must state beginning inventory amounts using the LIFO carrying value of the inventory and not current-year dollars.

(3) Current year's storage and handling costs, beginning inventory, and current year's purchases, as defined in paragraph (d)(3)(i)(D)(2) of this section, do not include costs that are specifically described in § 1.263A-1(e)(3)(ii) or cost reductions described in § 1.471-3(e) that a taxpayer properly allocates entirely to property that has been sold.

(E) *Purchasing costs absorption ratio.* (1) Under the simplified resale method,

the purchasing costs absorption ratio is determined as follows:

$$\frac{\text{Current year's purchasing costs}}{\text{Current year's purchases}}$$

(2) Current year's purchasing costs are defined as the total purchasing costs incurred during the taxable year that relate to the taxpayer's property acquired for resale and eligible property. See paragraph (c)(3) of this section, which discusses purchasing costs. Purchasing costs must include the amount of allocable mixed service costs determined in paragraph (d)(3)(i)(F) of this section. Current year's purchases generally mean the taxpayer's section 471 costs incurred with respect to purchases of property acquired for resale during the current taxable year.

(3) Current year's purchasing costs and current year's purchases, as defined in paragraph (d)(3)(i)(E)(2) of this section, do not include costs that are

specifically described in § 1.263A-1(e)(3)(ii) or cost reductions described in § 1.471-3(e) that a taxpayer properly allocates entirely to property that has been sold.

(F) *Allocable mixed service costs.* (1) If a taxpayer allocates its mixed service costs to purchasing costs, storage costs, and handling costs using a method described in § 1.263A-1(g)(4), the taxpayer is not required to determine its allocable mixed service costs under this paragraph (d)(3)(i)(F). However, if the taxpayer uses the simplified service cost method, the amount of mixed service costs allocated to and included in purchasing costs, storage costs, and handling costs in the absorption ratios in paragraphs (d)(3)(i) (D) and (E) of this section is determined as follows:

$$\frac{\text{Labor costs allocable to activity}}{\text{Total labor costs}} \times \text{Total mixed service costs}$$

(2) Labor costs allocable to activity are defined as the total labor costs allocable to each particular activity (i.e., purchasing, handling, and storage), excluding labor costs included in mixed service costs. Total labor costs are defined as the total labor costs (excluding labor costs included in mixed service costs) that are incurred in the taxpayer's trade or business during the taxable year. See § 1.263A-1(h)(6) for the definition of total mixed service costs.

(ii) *LIFO taxpayers electing simplified resale method*—(A) *In general.* Under the simplified resale method, a taxpayer using a LIFO method must calculate a particular year's index (e.g., under § 1.472-8(e)) without regard its additional section 263A costs. Similarly, a taxpayer that adjusts current-year costs by applicable indexes to determine whether there has been an inven-

tory increment or decrement in the current year for a particular LIFO pool must disregard the additional section 263A costs in making that determination.

(B) *LIFO increment.* If the taxpayer determines there has been an inventory increment, the taxpayer must state the amount of the increment in current-year dollars (stated in terms of section 471 costs). The taxpayer then multiplies this amount by the combined absorption ratio. The resulting product is the additional section 263A costs that must be added to the taxpayer's increment for the year stated in terms of section 471 costs.

(C) *LIFO decrement.* If the taxpayer determines there has been an inventory decrement, the taxpayer must state the amount of the decrement in dollars applicable to the particular year for

which the LIFO layer has been invaded. The additional section 263A costs incurred in prior years that are applicable to the decrement are charged to cost of goods sold. The additional section 263A costs that are applicable to the decrement are determined by multiplying the additional section 263A costs allocated to the layer of the pool in which the decrement occurred by the ratio of the decrement (excluding additional section 263A costs) to the section 471 costs in the layer of that pool.

(iii) *Permissible variations of the simplified resale method.* The following variations of the simplified resale method are permitted:

(A) The exclusion of beginning inventories from the denominator in the storage and handling costs absorption ratio formula in paragraph (d)(3)(i)(D) of this section; or

(B) Multiplication of the storage and handling costs absorption ratio in paragraph (d)(3)(i)(D) of this section by the total of section 471 costs included in a LIFO taxpayer's ending inventory (rather than just the increment, if any, experienced by the LIFO taxpayer during the taxable year) for purposes of determining capitalizable storage and handling costs.

(iv) *Examples.* The provisions of this paragraph (d)(3) are illustrated by the following examples:

Example 1. FIFO inventory method. (i) Taxpayer S uses the FIFO method of accounting for inventories. S's beginning inventory for 1994 (all of which was sold during 1994) was \$2,100,000 (consisting of \$2,000,000 of section 471 costs and \$100,000 of additional section 263A costs). During 1994, S makes purchases of \$10,000,000. In addition, S incurs purchasing costs of \$460,000, storage costs of \$110,000, and handling costs of \$90,000. S's purchases (section 471 costs) remaining in ending inventory at the end of 1994 are \$3,000,000.

(ii) In 1994, S incurs \$400,000 of total mixed service costs and \$1,000,000 of total labor costs (excluding labor costs included in mixed service costs). In addition, S incurs the following labor costs (excluding labor costs included in mixed service costs): purchasing—\$100,000, storage—\$200,000, and handling—\$200,000. Accordingly, the following mixed service costs must be included in purchasing costs, storage costs, and handling costs as capitalizable mixed service costs: purchasing—\$40,000 ([\$100,000 divided by \$1,000,000] multiplied by \$400,000); storage—\$80,000 ([\$200,000 divided by \$1,000,000] multiplied by \$400,000); and handling—\$80,000 ([\$200,000 divided by \$1,000,000] multiplied by \$400,000).

(iii) S computes its purchasing costs absorption ratio for 1994 as follows:

$$\begin{aligned} \frac{1994 \text{ purchasing costs}}{1994 \text{ purchases}} &= \frac{\$460,000 + \$40,000}{\$10,000,000} \\ &= \frac{\$500,000}{\$10,000,000} \\ &= 5.0\% \end{aligned}$$

(iv) S computes its storage and handling costs absorption ratio for 1994 as follows:

$$\begin{aligned}
 \frac{\text{Storage and handling costs}}{\text{Beginning inventory plus 1994 purchases}} &= \frac{(\$110,000 + \$80,000) + (\$90,000 + \$80,000)}{\$2,000,000 + \$10,000,000} \\
 &= \frac{\$190,000 + \$170,000}{\$12,000,000} \\
 &= \frac{\$360,000}{\$12,000,000} \\
 &= 3.0\%
 \end{aligned}$$

(v) S's combined absorption ratio is 8.0 %, or the sum of the purchasing costs absorption ratio (5.0 %) and the storage and handling costs absorption ratio (3.0 %). Under the simplified resale method, S determines

the additional section 263A costs allocable to its ending inventory by multiplying the combined absorption ratio by its section 471 costs with respect to current year's purchases remaining in ending inventory:

$$\text{Additional section 263A costs} = 8.0\% \times \$3,000,000 = \$240,000$$

(vi) S adds this \$240,000 to the \$3,000,000 of purchases remaining in its ending inventory to determine its total ending FIFO inventory of \$3,240,000.

Example 2. LIFO inventory method. (i) Taxpayer T uses a dollar-value LIFO inventory method. T's beginning inventory for 1994 is \$2,100,000 (consisting of \$2,000,000 of section 471 costs and \$100,000 of additional section 263A costs). During 1994, T makes purchases of \$10,000,000. In addition, T incurs purchasing costs of \$460,000, storage costs of \$110,000, and handling costs of \$90,000. T's 1994 LIFO increment is \$1,000,000 (\$3,000,000 of section 471 costs in ending inventory less \$2,000,000 of section 471 costs in beginning inventory).

(ii) In 1994, T incurs \$400,000 of total mixed service costs and \$1,000,000 of total labor costs (excluding labor costs included in mixed service costs). In addition, T incurs the following labor costs (excluding labor costs included in mixed service costs): purchasing—\$100,000, storage—\$200,000, and handling—\$200,000. Accordingly, the following mixed service costs must be included in purchasing costs, storage costs, and handling costs as capitalizable mixed service costs: purchasing—\$40,000 ([\$100,000 divided by \$1,000,000] multiplied by \$400,000); storage—\$80,000 ([\$200,000 divided by \$1,000,000] multiplied by \$400,000); and handling—\$80,000 ([\$200,000 divided by \$1,000,000] multiplied by \$400,000).

(iii) Based on these facts, T determines that it has a combined absorption ratio of 8.0

%. To determine the additional section 263A costs allocable to its ending inventory, T multiplies its combined absorption ratio (8.0 %) by the \$1,000,000 LIFO increment. Thus, T's additional section 263A costs allocable to its ending inventory are \$80,000 (\$1,000,000 multiplied by 8.0 %). This \$80,000 is added to the \$1,000,000 to determine a total 1994 LIFO increment of \$1,080,000. T's ending inventory is \$3,180,000 (its beginning inventory of \$2,100,000 plus the \$1,080,000 increment).

(iv) In 1995, T sells one-half of the inventory in its 1994 LIFO increment. T must include in its cost of goods sold for 1995 the amount of additional section 263A costs relating to this inventory, i.e., one-half of the \$80,000 additional section 263A costs capitalized in 1994 ending inventory, or \$40,000.

Example 3. LIFO Pools. (i) Taxpayer U begins its business in 1994, and adopts the LIFO inventory method. During 1994, U makes purchases of \$10,000, and incurs \$400 of purchasing costs, \$350 of storage costs and \$250 of handling costs. U's purchasing costs, storage costs, and handling costs include their proper allocable share of mixed service costs.

(ii) U computes its purchasing costs absorption ratio for 1994, as follows:

$$\begin{aligned}
 \frac{\text{1994 purchasing costs}}{\text{1994 purchases}} &= \frac{\$400}{\$10,000} \\
 &= 4.0\%
 \end{aligned}$$

(iii) U computes its storage and handling costs absorption ratio for 1994, as follows:

$$\begin{aligned}
 \frac{1994 \text{ storage and handling costs}}{\text{Beginning inventory plus 1994 purchases}} &= \frac{\$350 + \$250}{\$0 + \$10,000} \\
 &= \frac{\$600}{\$10,000} \\
 &= 6.0\%
 \end{aligned}$$

(iv) U's combined absorption ratio is 10%, or the sum of the purchasing costs absorption ratio (4.0%) and the storage and handling costs absorption ratio (6.0%). At the end of 1994, U's ending inventory included

\$3,000 of current year purchases, contained in three LIFO pools (X, Y, and Z) as shown below. Under the simplified resale method, U computes its ending inventory for 1994 as follows:

| 1994 | Total | X | Y | Z |
|---|---------|---------|-------|-------|
| Ending section 471 costs | \$3,000 | \$1,600 | \$600 | \$800 |
| Additional section 263A costs (10%) | 300 | 160 | 60 | 80 |
| 1994 ending inventory | 3,300 | 1,760 | 660 | 880 |

(v) During 1995, U makes purchases of \$2,000 as shown below, and incurs \$200 of purchasing costs, \$325 of storage costs and \$175 of handling costs. U's purchasing costs, storage costs, and handling costs include their proper share of mixed service costs. Moreover, U sold goods from pools X, Y, and Z having a total cost of \$1,000. U computes its ending inventory for 1995 as follows.

(vi) U computes its purchasing costs absorption ratio for 1995:

$$\begin{aligned}
 \frac{1995 \text{ purchasing costs}}{1995 \text{ purchases}} &= \frac{\$200}{\$2,000} \\
 &= 10.0\%
 \end{aligned}$$

(vii) U computes its storage and handling costs absorption ratio for 1995:

$$\begin{aligned}
 \frac{1995 \text{ storage and handling costs}}{\text{Beginning inventory plus 1995 purchases}} &= \frac{\$325 + \$175}{\$3,000 + \$2,000} \\
 &= \frac{\$500}{\$5,000} \\
 &= 10.0\%
 \end{aligned}$$

(viii) U's combined absorption ratio is 20.0%, or the sum of the purchasing costs ab-

sorption ratio (10.0%) and the storage and handling costs absorption ratio (10.0%).

| 1995 | Total | X | Y | Z |
|--------------------------------------|---------|---------|-------|-------|
| Beginning section 471 costs | \$3,000 | \$1,600 | \$600 | \$800 |
| 1995 section 471 costs | 2,000 | 1,500 | 300 | 200 |
| Section 471 cost of goods sold | (1,000) | (300) | (300) | (400) |
| 1995 ending section 471 costs | 4,000 | 2,800 | 600 | 600 |
| Consisting of: | | | | |
| 1994 layer | 2,800 | 1,600 | 600 | 600 |
| 1995 layer | 1,200 | 1,200 | | |
| | 4,000 | 2,800 | 600 | 600 |

| 1995 | Total | X | Y | Z |
|--------------------------------|-------|-------|-------|-------|
| Additional section 263A costs: | | | | |
| 1994 (10%) | 280 | 160 | 60 | 60 |
| 1995 (20%) | 240 | 240 | | |
| | 520 | 400 | 60 | 60 |
| 1995 ending inventory | 4,520 | 3,200 | 660 | 660 |

(ix) In 1995, U experiences a \$200 decrement in Pool Z. Thus, U must charge the additional section 263A costs incurred in prior years applicable to the decrement to 1995's cost of goods sold. To do so, U determines a ratio by dividing the decrement by the section 471 costs in the 1994 layer (\$200 divided by \$800, or 25%). U then multiplies this ratio (25%) by the additional section 263A costs in the 1994 layer (\$80) to determine the additional section 263A costs applicable to the decrement (\$20). Therefore, \$20 is taken into account by U in 1995 as part of its cost of goods sold (\$80 multiplied by 25%).

(4) *Simplified resale method with historic absorption ratio election*—(i) *In general*. This paragraph (d)(4) permits resellers using the simplified resale method to elect a historic absorption ratio in determining additional section 263A costs allocable to eligible property remaining on hand at the close of

their taxable years. Except as provided in paragraph (d)(4)(v) of this section, a taxpayer may only make a historic absorption ratio election if it has used the simplified resale method for three or more consecutive taxable years immediately prior to the year of election. The historic absorption ratio is used in lieu of an actual combined absorption ratio computed under paragraph (d)(3)(i)(C)(I) of this section and is based on costs capitalized by a taxpayer during its test period. If elected, the historic absorption ratio must be used for the qualifying period described in paragraph (d)(4)(ii)(C) of this section.

(ii) *Operating rules and definitions*—(A) *Historic absorption ratio*. (1) The historic absorption ratio is equal to the following ratio:

Additional section 263A costs incurred during the test period

Section 471 costs incurred during the test period

(2) Additional section 263A costs incurred during the test period are defined as the sum of the products of the combined absorption ratios (defined in paragraph (d)(3)(i)(C)(I) of this section) multiplied by a taxpayer's section 471 costs incurred with respect to purchases, for each taxable year of the test period.

(3) Section 471 costs incurred during the test period mean the section 471 costs described in § 1.263A-1(d)(2) that a taxpayer incurs generally with respect to its purchases during the test period described in paragraph (d)(4)(ii)(B) of this section.

(B) *Test period*—(1) *In general*. The test period is generally the three taxable-year period immediately prior to the taxable year that the historic absorption ratio is elected.

(2) *Updated test period*. The test period begins again with the beginning of the first taxable year after the close of a qualifying period (as defined in paragraph (d)(4)(ii)(C) of this section). This new test period, the updated test period, is the three taxable-year period beginning with the first taxable year after the close of the qualifying period.

(C) *Qualifying period*—(1) *In general*. A qualifying period includes each of the first five taxable years beginning with the first taxable year after a test period (or updated test period).

(2) *Extension of qualifying period*. In the first taxable year following the close of each qualifying period (e.g., the sixth taxable year following the test period), the taxpayer must compute the actual combined absorption

ratio under the simplified resale method. If the actual combined absorption ratio computed for this taxable year (the recomputation year) is within one-half of one percentage point (plus or minus) of the historic absorption ratio used in determining capitalizable costs for the qualifying period (i.e., the previous five taxable years), the qualifying period must be extended to include the recomputation year and the following five taxable years, and the taxpayer must continue to use the historic absorption ratio throughout the extended qualifying period. If, however, the actual combined absorption ratio computed for the recomputation year is not within one-half of one percentage point (plus or minus) of the historic absorption ratio, the taxpayer must use actual combined absorption ratios beginning with the recomputation year under the simplified resale method and throughout the updated test period. The taxpayer must resume using the historic absorption ratio (determined with reference to the updated test period) in the third taxable year following the recomputation year.

(iii) *Method of accounting*—(A) *Adoption and use*. The election to use the historic absorption ratio is a method of accounting. A taxpayer using the simplified resale method may elect the historic absorption ratio in any taxable year if permitted under this paragraph (d)(4), provided the taxpayer has not obtained the Commissioner's consent to revoke the historic absorption ratio election within its prior six taxable years. The election is to be effected on a cut-off basis, and thus, no adjustment under section 481(a) is required or permitted. The use of a historic absorption ratio has no effect on other methods of accounting adopted by the taxpayer and used in conjunction with the simplified resale method in determining its section 263A costs. Accordingly, in computing its actual combined absorption ratios, the taxpayer must use the same methods of accounting used in computing its historic absorption ratio during its most recent test period unless the taxpayer obtains the consent of the Commissioner. Finally, for purposes of this paragraph (d)(4)(iii)(A), the recomputation of the historic absorption ratio during an up-

dated test period and the change from a historic absorption ratio to an actual combined absorption ratio during an updated test period by reason of the requirements of this paragraph (d)(4) are not considered changes in methods of accounting under section 446(e) and, thus, do not require the consent of the Commissioner or any adjustments under section 481(a).

(B) *Revocation of election*. A taxpayer may only revoke its election to use the historic absorption ratio with the consent of the Commissioner in a manner prescribed under section 446(e) and the regulations thereunder. Consent to the change for any taxable year that is included in the qualifying period (or an extended qualifying period) will be granted only upon a showing of unusual circumstances.

(iv) *Reporting and recordkeeping requirements*—(A) *Reporting*. A taxpayer making an election under this paragraph (d)(4) must attach a statement to its federal income tax return for the taxable year in which the election is made showing the actual combined absorption ratios determined under the simplified resale method during its first test period. This statement must disclose the historic absorption ratio to be used by the taxpayer during its qualifying period. A similar statement must be attached to the federal income tax return for the first taxable year within any subsequent qualifying period (i.e., after an updated test period).

(B) *Recordkeeping*. A taxpayer must maintain all appropriate records and details supporting the historic absorption ratio until the expiration of the statute of limitations for the last year for which the taxpayer applied the particular historic absorption ratio in determining additional section 263A costs capitalized to eligible property.

(v) *Transition rules*. Taxpayers will be permitted to elect a historic absorption ratio in their first, second, or third taxable year beginning after December 31, 1993, under such terms and conditions as may be prescribed by the Commissioner. Taxpayers are eligible to make an election under these transition rules whether or not they previously used the simplified resale method. A taxpayer making such an election must recompute (or compute)

§ 1.263A-4

26 CFR Ch. I (4-1-17 Edition)

its additional section 263A costs, and thus, its historic absorption ratio for its first test period as if the rules prescribed in this section and §§1.263A-1 and 1.263A-2 had applied throughout the test period.

(vi) *Example.* The provisions of this paragraph (d)(4) are illustrated by the following example:

Example. (i) Taxpayer V uses the FIFO method of accounting for inventories and in 1994 elects to use the historic absorption ratio with the simplified resale method. After recomputing its additional section

263A costs in accordance with the transition rules of paragraph (d)(4)(v) of this section, V identifies the following costs incurred during the test period:

1991:
Add'l section 263A costs—\$100
Section 471 costs—\$3,000
1992:
Add'l section 263A costs—\$200
Section 471 costs—\$4,000
1993:
Add'l section 263A costs—\$300
Section 471 costs—\$5,000
(ii) Therefore, V computes a 5% historic absorption ratio determined as follows:

$$\text{Historic absorption ratio} = \frac{\$100 + 200 + 300}{\$3,000 + 4,000 + 5,000} = \frac{\$600}{\$12,000} = 5\%$$

(iii) In 1994, V incurs \$10,000 of section 471 costs of which \$3,000 remain in inventory at the end of the year. Under the simplified resale method using a historic absorption ratio, V determines the additional section

263A costs allocable to its ending inventory by multiplying its historic ratio (5%) by the section 471 costs remaining in its ending inventory:

$$\text{Additional section 263A costs} = 5\% \times \$3,000 = \$150$$

(iv) To determine its ending inventory under section 263A, V adds the additional section 263A costs allocable to ending inventory to its section 471 costs remaining in ending inventory (\$3,150 = \$150 + \$3,000). The balance of V's additional section 263A costs incurred during 1994 is taken into account in 1994 as part of V's cost of goods sold.

(v) V's qualifying period ends as of the close of its 1998 taxable year. Therefore, 1999 is a recomputation year in which V must compute its actual combined absorption ratio. V determines its actual absorption ratio for 1999 to be 5.25% and compares that ratio to its historic absorption ratio (5.0%). Therefore, V must continue to use its historic absorption ratio of 5.0% throughout an extended qualifying period, 1999 through 2004 (the recomputation year and the following five taxable years).

(vi) If, instead, V's actual combined absorption ratio for 1999 were not between 4.5% and 5.5%, V's qualifying period would end and V would be required to compute a new historic absorption ratio with reference to an updated test period of 1999, 2000, and 2001. Once V's historic absorption ratio is determined for the updated test period, it would be used for a new qualifying period beginning in 2002.

(5) *Additional simplified methods for resellers.* The Commissioner may prescribe additional elective simplified methods by revenue ruling or revenue procedure.

(e) *Cross reference.* See § 1.6001-1(a) regarding the duty of taxpayers to keep such records as are sufficient to establish the amount of gross income, deductions, etc.

(f) *Effective/applicability date.* Paragraphs (d)(3)(i)(C)(3), (d)(3)(i)(D)(3), and (d)(3)(i)(E)(3) of this section apply for taxable years ending on or after January 13, 2014.

[T.D. 8482, 58 FR 42224, Aug. 9, 1993; 58 FR 47784, Sept. 10, 1993; 59 FR 3319, Jan. 21, 1994, as amended by T.D. 8559, 59 FR 39962, Aug. 5, 1994, T.D. 9652, 79 FR 2097, Jan. 13, 2014]

§ 1.263A-4 Rules for property produced in a farming business.

(a) *Introduction*—(1) *In general.* This section provides guidance with respect to the application of section 263A to property produced in a farming business as defined in paragraph (a)(4) of

this section. Except as otherwise provided by the rules of this section, the general rules of §§1.263A-1 through 1.263A-3 and §§1.263A-7 through 1.263A-15 apply to property produced in a farming business. A taxpayer that engages in the raising or growing of any agricultural or horticultural commodity, including both plants and animals, is engaged in the production of property. Section 263A generally requires the capitalization of the direct costs and an allocable portion of the indirect costs that directly benefit or are incurred by reason of the production of this property. The direct and indirect costs of producing plants or animals generally include preparatory costs allocable to the plant or animal and preproductive period costs of the plant or animal. Except as provided in paragraphs (a)(2) and (e) of this section, taxpayers must capitalize the costs of producing all plants and animals unless the election described in paragraph (d) of this section is made.

(2) *Exception*—(i) *In general.* Section 263A does not apply to the costs of producing plants with a preproductive period of 2 years or less or the costs of producing animals in a farming business, if the taxpayer is not—

(A) A corporation or partnership required to use an accrual method of accounting (accrual method) under section 447 in computing its taxable income from farming; or

(B) A tax shelter prohibited from using the cash receipts and disbursements method of accounting (cash method) under section 448(a)(3).

(ii) *Tax shelter*—(A) *In general.* A farming business is considered a tax shelter, and thus a taxpayer prohibited from using the cash method under section 448(a)(3), if the farming business is—

(1) A farming syndicate as defined in section 464(c); or

(2) A tax shelter, within the meaning of section 6662(d)(2)(C)(iii).

(B) *Presumption.* Marketed arrangements in which persons carry on farming activities using the services of a common managerial or administrative service will be presumed to have the principal purpose of tax avoidance, within the meaning of section 6662(d)(2)(C)(iii), if such persons prepay

a substantial portion of their farming expenses with borrowed funds.

(iii) *Examples.* The following examples illustrate the provisions of this paragraph (a)(2):

Example 1. Farmer A grows trees that have a preproductive period in excess of 2 years, and that produce an annual crop. Farmer A is not required by section 447 to use an accrual method or prohibited by section 448(a)(3) from using the cash method. Accordingly, Farmer A qualifies for the exception described in this paragraph (a)(2). Since the trees have a preproductive period in excess of 2 years, Farmer A must capitalize the direct costs and an allocable portion of the indirect costs that directly benefit or are incurred by reason of the production of the trees. Since the annual crop has a preproductive period of 2 years or less, Farmer A is not required to capitalize the costs of producing the crops.

Example 2. Assume the same facts as *Example 1*, except that Farmer A is required by section 447 to use an accrual method or prohibited by 448(a)(3) from using the cash method. Farmer A does not qualify for the exception described in this paragraph (a)(2). Farmer A is required to capitalize the direct costs and an allocable portion of the indirect costs that directly benefit or are incurred by reason of the production of the trees and crops.

(3) *Costs required to be capitalized or inventoried under another provision.* The exceptions from capitalization provided in paragraphs (a)(2), (d) and (e) of this section do not apply to any cost that is required to be capitalized or inventoried under another Internal Revenue Code or regulatory provision, such as section 263 or 471.

(4) *Farming business*—(i) *In general.* A farming business means a trade or business involving the cultivation of land or the raising or harvesting of any agricultural or horticultural commodity. Examples include the trade or business of operating a nursery or sod farm; the raising or harvesting of trees bearing fruit, nuts, or other crops; the raising of ornamental trees (other than evergreen trees that are more than 6 years old at the time they are severed from their roots); and the raising, shearing, feeding, caring for, training, and management of animals. For purposes of this section, the term harvesting does not include contract harvesting of an agricultural or horticultural commodity grown or raised by

another. Similarly, merely buying and reselling plants or animals grown or raised entirely by another is not raising an agricultural or horticultural commodity. A taxpayer is engaged in raising a plant or animal, rather than the mere resale of a plant or animal, if the plant or animal is held for further cultivation and development prior to sale. In determining whether a plant or animal is held for further cultivation and development prior to sale, consideration will be given to all of the facts and circumstances, including: the value added by the taxpayer to the plant or animal through agricultural or horticultural processes; the length of time between the taxpayer's acquisition of the plant or animal and the time that the taxpayer makes the plant or animal available for sale; and in the case of a plant, whether the plant is kept in the container in which purchased, replanted in the ground, or replanted in a series of larger containers as it is grown to a larger size.

(A) *Plant*. A plant produced in a farming business includes, but is not limited to, a fruit, nut, or other crop bearing tree, an ornamental tree, a vine, a bush, sod, and the crop or yield of a plant that will have more than one crop or yield raised by the taxpayer. Sea plants are produced in a farming business if they are tended and cultivated as opposed to merely harvested.

(B) *Animal*. An animal produced in a farming business includes, but is not limited to, any stock, poultry or other bird, and fish or other sea life raised by the taxpayer. Thus, for example, the term animal may include a cow, chicken, emu, or salmon raised by the taxpayer. Fish and other sea life are produced in a farming business if they are raised on a fish farm. A fish farm is an area where fish or other sea life are grown or raised as opposed to merely caught or harvested.

(ii) *Incidental activities*—(A) *In general*. A farming business includes processing activities that are normally incident to the growing, raising, or harvesting of agricultural or horticultural products. For example, a taxpayer in the trade or business of growing fruits and vegetables may harvest, wash, inspect, and package the fruits and vegetables for sale. Such activities are nor-

mally incident to the raising of these crops by farmers. The taxpayer will be considered to be in the trade or business of farming with respect to the growing of fruits and vegetables and the processing activities incident to their harvest.

(B) *Activities that are not incidental*. Farming business does not include the processing of commodities or products beyond those activities that are normally incident to the growing, raising, or harvesting of such products.

(iii) *Examples*. The following examples illustrate the provisions of this paragraph (a)(4):

Example 1. Individual A operates a retail nursery. Individual A has three categories of plants. The first category is comprised of plants that Individual A grows from seeds or cuttings. The second category is comprised of plants that Individual A purchases in containers and grows for a period of from several months to several years. Individual A replants some of these plants in the ground. The others are replanted in a series of larger containers as they grow. The third category is comprised of plants that are purchased by Individual A in containers. Individual A does not grow these plants to a larger size before making them available for resale. Instead, Individual A makes these plants available for resale, in the container in which purchased, shortly after receiving them. Thus, no value is added to these plants by Individual A through horticultural processes. Individual A also sells soil, mulch, chemicals, and yard tools. Individual A is producing property in the farming business with respect to the first two categories of plants because these plants are held for further cultivation and development prior to sale. The plants in the third category are not held for further cultivation and development prior to sale and, therefore, are not regarded as property produced in a farming business for purposes of section 263A. Accordingly, Individual A must account for the third category of plants, along with the soil, mulch, chemicals, and yard tools, as property acquired for resale. If Individual A's average annual gross receipts are less than \$10 million, Individual A will not be required to capitalize costs with respect to its resale activities under section 263A.

Example 2. Individual B is in the business of growing and harvesting wheat and other grains. Individual B also processes grain that Individual B has harvested in order to produce breads, cereals, and other similar food products, which Individual B then sells to customers in the course of its business.

Although Individual B is in the farming business with respect to the growing and harvesting of grain, Individual B is not in the farming business with respect to the processing of such grain to produce the food products.

Example 3. Individual C is in the business of raising poultry and other livestock. Individual C also operates a meat processing operation in which the poultry and other livestock are slaughtered, processed, and packaged or canned. The packaged or canned meat is sold to Individual C's customers. Although Individual C is in the farming business with respect to the raising of poultry and other livestock, Individual C is not in the farming business with respect to the slaughtering, processing, packaging, and canning of such animals to produce the food products.

(b) *Application of section 263A to property produced in a farming business—(1) In general.* Unless otherwise provided in this section, section 263A requires the capitalization of the direct costs and an allocable portion of the indirect costs that directly benefit or are incurred by reason of the production of any property in a farming business (including animals and plants without regard to the length of their preproductive period). Section 1.263A-1(e) describes the types of direct and indirect costs that generally must be capitalized by taxpayers under section 263A and paragraphs (b)(1)(i) and (ii) of this section provide specific examples of the types of costs typically incurred in the trade or business of farming. For purposes of this section, soil and water conservation expenditures that a taxpayer has elected to deduct under section 175 and fertilizer that a taxpayer has elected to deduct under section 180 are not subject to capitalization under section 263A, except to the extent these costs are required to be capitalized as a preproductive period cost of a plant or animal.

(i) *Plants.* The costs of producing a plant typically required to be capitalized under section 263A include the costs incurred so that the plant's growing process may begin (preparatory costs), such as the acquisition costs of the seed, seedling, or plant, and the costs of planting, cultivating, maintaining, or developing the plant during the preproductive period (preproductive period costs). Preproductive period costs include, but

are not limited to, management, irrigation, pruning, soil and water conservation (including costs that the taxpayer has elected to deduct under section 175), fertilizing (including costs that the taxpayer has elected to deduct under section 180), frost protection, spraying, harvesting, storage and handling, upkeep, electricity, tax depreciation and repairs on buildings and equipment used in raising the plants, farm overhead, taxes (except state and Federal income taxes), and interest required to be capitalized under section 263A(f).

(ii) *Animals.* The costs of producing an animal typically required to be capitalized under section 263A include the costs incurred so that the animal's raising process may begin (preparatory costs), such as the acquisition costs of the animal, and the costs of raising or caring for such animal during the preproductive period (preproductive period costs). Preproductive period costs include, but are not limited to, management, feed (such as grain, silage, concentrates, supplements, haylage, hay, pasture and other forages), maintaining pasture or pen areas (including costs that the taxpayer has elected to deduct under sections 175 or 180), breeding, artificial insemination, veterinary services and medicine, livestock hauling, bedding, fuel, electricity, hired labor, tax depreciation and repairs on buildings and equipment used in raising the animals (for example, barns, trucks, and trailers), farm overhead, taxes (except state and Federal income taxes), and interest required to be capitalized under section 263A(f).

(2) *Preproductive period—(i) Plant—(A) In general.* The preproductive period of property produced in a farming business means—

(1) In the case of a plant that will have more than one crop or yield (for example, an orange tree), the period before the first marketable crop or yield from such plant;

(2) In the case of the crop or yield of a plant that will have more than one crop or yield (for example, the orange), the period before such crop or yield is disposed of; or

(3) In the case of any other plant, the period before such plant is disposed of.

(B) *Applicability of section 263A.* For purposes of determining whether a plant has a preproductive period in excess of 2 years, the preproductive period of plants grown in commercial quantities in the United States is based on the nationwide weighted average preproductive period for such plant. The Commissioner will publish a non-inclusive list of plants with a nationwide weighted average preproductive period in excess of 2 years. In the case of other plants grown in commercial quantities in the United States, the nationwide weighted average preproductive period must be determined based on available statistical data. For all other plants, the taxpayer is required, at or before the time the seed or plant is acquired or planted, to reasonably estimate the preproductive period of the plant. If the taxpayer estimates a preproductive period in excess of 2 years, the taxpayer must capitalize the costs of producing the plant. If the estimate is reasonable, based on the facts in existence at the time it is made, the determination of whether section 263A applies is not modified at a later time even if the actual length of the preproductive period differs from the estimate. The actual length of the preproductive period will, however, be considered in evaluating the reasonableness of the taxpayer's future estimates. The nationwide weighted average preproductive period or the estimated preproductive period is only used for purposes of determining whether the preproductive period of a plant is greater than 2 years.

(C) *Actual preproductive period.* The plant's actual preproductive period is used for purposes of determining the period during which a taxpayer must capitalize preproductive period costs with respect to a particular plant.

(1) *Beginning of the preproductive period.* The actual preproductive period of a plant begins when the taxpayer first incurs costs that directly benefit or are incurred by reason of the plant. Generally, this occurs when the taxpayer plants the seed or plant. In the case of a taxpayer that acquires plants that have already been permanently planted, or plants that are tended by the taxpayer or another prior to permanent planting, the actual preproductive

period of the plant begins upon acquisition of the plant by the taxpayer. In the case of the crop or yield of a plant that will have more than one crop or yield, the actual preproductive period begins when the plant has become productive in marketable quantities and the crop or yield first appears, for example, in the form of a sprout, bloom, blossom, or bud.

(2) *End of the preproductive period—(i) In general.* In the case of a plant that will have more than one crop or yield, the actual preproductive period ends when the plant first becomes productive in marketable quantities. In the case of any other plant (including the crop or yield of a plant that will have more than one crop or yield), the actual preproductive period ends when the plant, crop, or yield is sold or otherwise disposed of. Field costs, such as irrigating, fertilizing, spraying and pruning, that are incurred after the harvest of a crop or yield but before the crop or yield is sold or otherwise disposed of are not required to be included in the preproductive period costs of the harvested crop or yield because they do not benefit and are unrelated to the harvested crop or yield.

(ii) *Marketable quantities.* A plant that will have more than one crop or yield becomes productive in marketable quantities once a crop or yield is produced in sufficient quantities to be harvested and marketed in the ordinary course of the taxpayer's business. Factors that are relevant to determining whether a crop or yield is produced in sufficient quantities to be harvested and marketed in the ordinary course include: whether the crop or yield is harvested that is more than *de minimis*, although it may be less than expected at the maximum bearing stage, based on a comparison of the quantities per acre harvested in the year in question to the quantities per acre expected to be harvested when the plant reaches full maturity; and whether the sales proceeds exceed the costs of harvest and make a reasonable contribution to an allocable share of farm expenses.

(D) *Examples.* The following examples illustrate the provisions of this paragraph (b)(2):

Example 1. (i) Farmer A, a taxpayer that qualifies for the exception in paragraph (a)(2)

of this section, grows plants that will have more than one crop or yield. The plants are grown in commercial quantities in the United States. Farmer A acquires 1 year-old plants by purchasing them from an unrelated party, Corporation B, and plants them immediately. The nationwide weighted average preproductive period of the plant is 4 years. The particular plants grown by Farmer A do not begin to produce in marketable quantities until 3 years and 6 months after they are planted by Farmer A.

(ii) Since the plants are deemed to have a preproductive period in excess of 2 years, Farmer A is required to capitalize the costs of producing the plants. See paragraphs (a)(2) and (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(I) of this section, Farmer A must begin to capitalize the preproductive period costs when the plants are planted. In accordance with paragraph (b)(2)(i)(C)(2) of this section, Farmer A must continue to capitalize preproductive period costs to the plants until the plants begin to produce in marketable quantities. Thus, Farmer A must capitalize the preproductive period costs for a period of 3 years and 6 months (that is, until the plants are 4 years and 6 months old), notwithstanding the fact that the plants, in general, have a nationwide weighted average preproductive period of 4 years.

Example 2. (i) Farmer B, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section, grows plants that will have more than one crop or yield. The plants are grown in commercial quantities in the United States. The nationwide weighted average preproductive period of the plant is 2 years and 5 months. Farmer B acquires 1 month-old plants by purchasing them from an unrelated party, Corporation B. Farmer B enters into a contract with Corporation B under which Corporation B will retain and tend the plants for 7 months following the sale. At the end of 7 months, Farmer B takes possession of the plants and plants them in the permanent orchard. The plants become productive in marketable quantities 1 year and 11 months after they are planted by Farmer B.

(ii) Since the plants are deemed to have a preproductive period in excess of 2 years, Farmer B is required to capitalize the costs of producing the plants. See paragraphs (a)(2) and (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(I) of this section, Farmer B must begin to capitalize the preproductive period costs when the purchase occurs. In accordance with paragraph (b)(2)(i)(C)(2) of this section, Farmer B must continue to capitalize the preproductive period costs to the plants until the plants begin to produce in marketable quantities. Thus, Farmer B must capitalize the preproductive period costs of the plants for a period of 2 years and 6 months (the 7 months

the plants are tended by Corporation B and the 1 year and 11 months after the plants are planted by Farmer B), that is, until the plants are 2 years and 7 months old, notwithstanding the fact that the plants, in general, have a nationwide weighted average preproductive period of 2 years and 5 months.

Example 3. (i) Assume the same facts as in *Example 2*, except that Farmer B acquires the plants by purchasing them from Corporation B when the plants are 8 months old and that the plants are planted by Farmer B upon acquisition.

(ii) Since the plants are deemed to have a preproductive period in excess of 2 years, Farmer B is required to capitalize the costs of producing the plants. See paragraphs (a)(2) and (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(I) of this section, Farmer B must begin to capitalize the preproductive period costs when the plants are planted. In accordance with paragraph (b)(2)(i)(C)(2) of this section, Farmer B must continue to capitalize the preproductive period costs to the plants until the plants begin to produce in marketable quantities. Thus, Farmer B must capitalize the preproductive period costs of the plants for a period of 1 year and 11 months.

Example 4. (i) Farmer C, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section, grows plants that will have more than one crop or yield. The plants are grown in commercial quantities in the United States. Farmer C acquires 1 month-old plants from an unrelated party and plants them immediately. The nationwide weighted average preproductive period of the plant is 2 years and 3 months. The particular plants grown by Farmer C begin to produce in marketable quantities 1 year and 10 months after they are planted by Farmer C.

(ii) Since the plants are deemed to have a nationwide weighted average preproductive period in excess of 2 years, Farmer C is required to capitalize the costs of producing the plants, notwithstanding the fact that the particular plants grown by Farmer C become productive in less than 2 years. See paragraph (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(I) of this section, Farmer C must begin to capitalize the preproductive period costs when it plants the plants. In accordance with paragraph (b)(2)(i)(C)(2) of this section, Farmer C properly ceases capitalization of preproductive period costs when the plants become productive in marketable quantities (that is, 1 year and 10 months after they are planted, which is when they are 1 year and 11 months old).

Example 5. (i) Farmer D, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section, grows plants that will have more than one crop or yield. The plants are not grown in commercial quantities in the United States. Farmer D acquires and plants

the plants when they are 1 year old and estimates that they will become productive in marketable quantities 3 years after planting. Thus, at the time the plants are acquired and planted Farmer D reasonably estimates that the plants will have a preproductive period of 4 years. The actual plants grown by Farmer D do not begin to produce in marketable quantities until 3 years and 6 months after they are planted by Farmer D.

(ii) Since the plants have an estimated preproductive period in excess of 2 years, Farmer D is required to capitalize the costs of producing the plants. See paragraph (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(1) of this section, Farmer D must begin to capitalize the preproductive period costs when it acquires and plants the plants. In accordance with paragraph (b)(2)(i)(C)(2) of this section, Farmer D must continue to capitalize the preproductive period costs until the plants begin to produce in marketable quantities. Thus, Farmer D must capitalize the preproductive period costs of the plants for a period of 3 years and 6 months (that is, until the plants are 4 years and 6 months old), notwithstanding the fact that Farmer D estimated that the plants would become productive after 4 years.

Example 6. (i) Farmer E, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section grows plants from seed. The plants are not grown in commercial quantities in the United States. The plants do not have more than 1 crop or yield. At the time the seeds are planted Farmer E reasonably estimates that the plants will have a preproductive period of 1 year and 10 months. The actual plants grown by Farmer E are not ready for harvesting and disposal until 2 years and 2 months after the seeds are planted by Farmer E.

(ii) Because Farmer E's estimate of the preproductive period (which was 2 years or less) was reasonable at the time made based on the facts, Farmer E will not be required to capitalize the costs of producing the plants under section 263A, notwithstanding the fact that the actual preproductive period of the plants exceeded 2 years. See paragraph (b)(2)(i)(B) of this section. However, Farmer E must take the actual preproductive period of the plants into consideration when making future estimates of the preproductive period of such plants.

Example 7. (i) Farmer F, a calendar year taxpayer that does not qualify for the exception in paragraph (a)(2) of this section, grows trees that will have more than one crop. Farmer F acquires and plants the trees in April, Year 1. On October 1, Year 6, the trees become productive in marketable quantities.

(ii) The costs of producing the plant, including the preproductive period costs incurred by Farmer F on or before October 1, Year 6, are capitalized to the trees.

Preproductive period costs incurred after October 1, Year 6, are capitalized to a crop when incurred during the preproductive period of the crop and deducted as a cost of maintaining the tree when incurred between the disposal of one crop and the appearance of the next crop. See paragraphs (b)(2)(i)(A), (b)(2)(i)(C)(1) and (b)(2)(i)(C)(2) of this section.

Example 8. (i) Farmer G, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section, produces fig trees on 10 acres of land. The fig trees are grown in commercial quantities in the United States and have a nationwide weighted average preproductive period in excess of 2 years. Farmer G acquires and plants the fig trees in their permanent grove during Year 1. When the fig trees are mature, Farmer G expects to harvest 10x tons of figs per acre. At the end of Year 4, Farmer G harvests .5x tons of figs per acre that it sells for \$100x. During Year 4, Farmer G incurs expenses related to the fig operation of: \$50x to harvest the figs and transport them to market and other direct and indirect costs related to the fig operation in the amount of \$1000x.

(ii) Since the fig trees have a preproductive period in excess of 2 years, Farmer G is required to capitalize the costs of producing the fig trees. See paragraphs (a)(2) and (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(2) of this section, Farmer G must continue to capitalize preproductive period costs to the trees until they become productive in marketable quantities. The following factors weigh in favor of a determination that the fig trees did not become productive in Year 4: the quantity of harvested figs is *de minimis* based on the fact that the yield is only 5 percent of the expected yield at maturity and the proceeds from the sale of the figs are sufficient, after covering the costs of harvesting and transporting the figs, to cover only a negligible portion of the allocable farm expenses. Based on these facts and circumstances, the fig trees did not become productive in marketable quantities in Year 4.

(ii) *Animal.* An animal's actual preproductive period is used to determine the period that the taxpayer must capitalize preproductive period costs with respect to a particular animal.

(A) *Beginning of the preproductive period.* The preproductive period of an animal begins at the time of acquisition, breeding, or embryo implantation.

(B) *End of the preproductive period.* In the case of an animal that will be used in the trade or business of farming (for example, a dairy cow), the

preproductive period generally ends when the animal is (or would be considered) placed in service for purposes of section 168 (without regard to the applicable convention). However, in the case of an animal that will have more than one yield (for example, a breeding cow), the preproductive period ends when the animal produces (for example, gives birth to) its first yield. In the case of any other animal, the preproductive period ends when the animal is sold or otherwise disposed of.

(C) *Allocation of costs between animal and yields.* In the case of an animal that will have more than one yield, the costs incurred after the beginning of the preproductive period of the first yield but before the end of the preproductive period of the animal must be allocated between the animal and the yield using any reasonable method. Any depreciation allowance on the animal may be allocated entirely to the yield. Costs incurred after the beginning of the preproductive period of the second yield, but before the first yield is weaned from the animal must be allocated between the first and second yield using any reasonable method. However, a taxpayer may elect to allocate these costs entirely to the second yield. An allocation method used by a taxpayer is a method of accounting that must be used consistently and is subject to the rules of section 446 and the regulations thereunder.

(c) *Inventory methods*—(1) *In general.* Except as otherwise provided, the costs required to be allocated to any plant or animal under this section may be determined using reasonable inventory valuation methods such as the farm-price method or the unit-livestock-price method. See § 1.471-6. Under the unit-livestock-price method, unit prices must include all costs required to be capitalized under section 263A. A taxpayer using the unit-livestock-price method may elect to use the cost allocation methods in § 1.263A-1(f) or 1.263A-2(b) to allocate its direct and indirect costs to the property produced in the business of farming. In such a situation, section 471 costs are the costs taken into account by the taxpayer under the unit-livestock-price method using the taxpayer's standard unit price as modified by this para-

graph (c)(1). Tax shelters, as defined in paragraph (a)(2)(ii) of this section, that use the unit-livestock-price method for inventories must include in inventory the annual standard unit price for all animals that are acquired during the taxable year, regardless of whether the purchases are made during the last 6 months of the taxable year. Taxpayers required by section 447 to use an accrual method or prohibited by section 448(a)(3) from using the cash method that use the unit-livestock-price method must modify the annual standard price in order to reasonably reflect the particular period in the taxable year in which purchases of livestock are made, if such modification is necessary in order to avoid significant distortions in income that would otherwise occur through operation of the unit-livestock-price method.

(2) *Available for property used in a trade or business.* The farm-price method or the unit-livestock-price method may be used by any taxpayer to allocate costs to any plant or animal under this section, regardless of whether the plant or animal is held or treated as inventory property by the taxpayer. Thus, for example, a taxpayer may use the unit-livestock-price method to account for the costs of raising livestock that will be used in the trade or business of farming (for example, a breeding animal or a dairy cow) even though the property in question is not inventory property.

(3) *Exclusion of property to which section 263A does not apply.* Notwithstanding a taxpayer's use of the farm-price method with respect to farm property to which the provisions of section 263A apply, that taxpayer is not required, solely by such use, to use the farm-price method with respect to farm property to which the provisions of section 263A do not apply. Thus, for example, assume Farmer A raises fruit trees that have a preproductive period in excess of 2 years and to which the provisions of section 263A, therefore, apply. Assume also that Farmer A raises cattle and is not required to use an accrual method by section 447 or prohibited from using the cash method by section 448(a)(3). Because Farmer A qualifies for the exception in paragraph (a)(2) of this section, Farmer A is not

required to capitalize the costs of raising the cattle. Although Farmer A may use the farm-price method with respect to the fruit trees, Farmer A is not required to use the farm-price method with respect to the cattle. Instead, Farmer A's accounting for the cattle is determined under other provisions of the Code and regulations.

(d) *Election not to have section 263A apply*—(1) *Introduction.* This paragraph (d) permits certain taxpayers to make an election not to have the rules of this section apply to any plant produced in a farming business conducted by the electing taxpayer. The election is a method of accounting under section 446, and once an election is made, it is revocable only with the consent of the Commissioner.

(2) *Availability of the election.* The election described in this paragraph (d) is available to any taxpayer that produces plants in a farming business, except that no election may be made by a corporation, partnership, or tax shelter required to use an accrual method under section 447 or prohibited from using the cash method by section 448(a)(3). Moreover, the election does not apply to the costs of planting, cultivation, maintenance, or development of a citrus or almond grove (or any part thereof) incurred prior to the close of the fourth taxable year beginning with the taxable year in which the trees were planted in the permanent grove (including costs incurred prior to the permanent planting). If a citrus or almond grove is planted in more than one taxable year, the portion of the grove planted in any one taxable year is treated as a separate grove for purposes of determining the year of planting.

(3) *Time and manner of making the election*—(i) *Automatic election.* A taxpayer makes the election under this paragraph (d) by not applying the rules of section 263A to determine the capitalized costs of plants produced in a farming business and by applying the special rules in paragraph (d)(4) of this section on its original return for the first taxable year in which the taxpayer is otherwise required to capitalize section 263A costs. Thus, in order to be treated as having made the election under this paragraph (d), it is

necessary to report both income and expenses in accordance with the rules of this paragraph (d) (for example, it is necessary to use the alternative depreciation system as provided in paragraph (d)(4)(ii) of this section). For example, a farmer who deducts costs that are otherwise required to be capitalized under section 263A but fails to use the alternative depreciation system under section 168(g)(2) for applicable property placed in service has not made an election under this paragraph (d) and is not in compliance with the provisions of section 263A. In the case of a partnership or S corporation, the election must be made by the partner, shareholder, or member.

(ii) *Nonautomatic election.* A taxpayer that does not make the election under this paragraph (d) as provided in paragraph (d)(3)(i) must obtain the consent of the Commissioner to make the election by filing a Form 3115, Application for Change in Method of Accounting, in accordance with § 1.446-1(e)(3).

(4) *Special rules.* If the election under this paragraph (d) is made, the taxpayer is subject to the special rules in this paragraph (d)(4).

(i) *Section 1245 treatment.* The plant produced by the taxpayer is treated as section 1245 property and any gain resulting from any disposition of the plant is recaptured (that is, treated as ordinary income) to the extent of the total amount of the deductions that, but for the election, would have been required to be capitalized with respect to the plant. In calculating the amount of gain that is recaptured under this paragraph (d)(4)(i), a taxpayer may use the farm-price method or another simplified method permitted under these regulations in determining the deductions that otherwise would have been capitalized with respect to the plant.

(ii) *Required use of alternative depreciation system.* If the taxpayer or a related person makes an election under this paragraph (d), the alternative depreciation system (as defined in section 168(g)(2)) must be applied to all property used predominantly in any farming business of the taxpayer or related person and placed in service in any taxable year during which the election is in effect. The requirement to

use the alternative depreciation system by reason of an election under this paragraph (d) will not prevent a taxpayer from making an election under section 179 to deduct certain depreciable business assets.

(iii) *Related person*—(A) *In general.* For purposes of this paragraph (d)(4), related person means—

(1) The taxpayer and members of the taxpayer's family;

(2) Any corporation (including an S corporation) if 50 percent or more of the stock (in value) is owned directly or indirectly (through the application of section 318) by the taxpayer or members of the taxpayer's family;

(3) A corporation and any other corporation that is a member of the same controlled group (within the meaning of section 1563(a)(1)); and

(4) Any partnership if 50 percent or more (in value) of the interests in such partnership is owned directly or indirectly by the taxpayer or members of the taxpayer's family.

(B) *Members of family.* For purposes of this paragraph (d)(4)(iii), the terms "members of the taxpayer's family", and "members of family" (for purposes of applying section 318(a)(1)), means the spouse of the taxpayer (other than a spouse who is legally separated from the individual under a decree of divorce or separate maintenance) and any of the taxpayer's children (including legally adopted children) who have not reached the age of 18 as of the last day of the taxable year in question.

(5) *Examples.* The following examples illustrate the provisions of this paragraph (d):

Example 1. (i) Farmer A, an individual, is engaged in the trade or business of farming. Farmer A grows apple trees that have a preproductive period greater than 2 years. In addition, Farmer A grows and harvests wheat and other grains. Farmer A elects under this paragraph (d) not to have the rules of section 263A apply to the costs of growing the apple trees.

(ii) In accordance with paragraph (d)(4) of this section, Farmer A is required to use the alternative depreciation system described in section 168(g)(2) with respect to all property used predominantly in any farming business in which Farmer A engages (including the growing and harvesting of wheat) if such property is placed in service during a year for which the election is in effect. Thus, for example, all assets and equipment (including

trees and any equipment used to grow and harvest wheat) placed in service during a year for which the election is in effect must be depreciated as provided in section 168(g)(2).

Example 2. Assume the same facts as in *Example 1*, except that Farmer A and members of Farmer A's family (as defined in paragraph (d)(4)(iii)(B) of this section) also own 51 percent (in value) of the interests in Partnership P, which is engaged in the trade or business of growing and harvesting corn. Partnership P is a related person to Farmer A under the provisions of paragraph (d)(4)(iii) of this section. Thus, the requirements to use the alternative depreciation system under section 168(g)(2) also apply to any property used predominantly in a trade or business of farming which Partnership P places in service during a year for which an election made by Farmer A is in effect.

(e) *Exception for certain costs resulting from casualty losses*—(1) *In general.* Section 263A does not require the capitalization of costs that are attributable to the replanting, cultivating, maintaining, and developing of any plants bearing an edible crop for human consumption (including, but not limited to, plants that constitute a grove, orchard, or vineyard) that were lost or damaged while owned by the taxpayer by reason of freezing temperatures, disease, drought, pests, or other casualty (replanting costs). Such replanting costs may be incurred with respect to property other than the property on which the damage or loss occurred to the extent the acreage of the property with respect to which the replanting costs are incurred is not in excess of the acreage of the property on which the damage or loss occurred. This paragraph (e) applies only to the replanting of plants of the same type as those lost or damaged. This paragraph (e) applies to plants replanted on the property on which the damage or loss occurred or property of the same or lesser acreage in the United States irrespective of differences in density between the lost or damaged and replanted plants. Plants bearing crops for human consumption are those crops normally eaten or drunk by humans. Thus, for example, costs incurred with respect to replanting plants bearing jojoba beans do not qualify for the exception provided in this paragraph (e) because that crop is not normally eaten or drunk by humans.

(2) *Ownership.* Replanting costs described in paragraph (e)(1) of this section generally must be incurred by the taxpayer that owned the property at the time the plants were lost or damaged. Paragraph (e)(1) of this section will apply, however, to costs incurred by a person other than the taxpayer that owned the plants at the time of damage or loss if—

(i) The taxpayer that owned the plants at the time the damage or loss occurred owns an equity interest of more than 50 percent in such plants at all times during the taxable year in which the replanting costs are paid or incurred; and

(ii) Such other person owns any portion of the remaining equity interest and materially participates in the replanting, cultivating, maintaining, or developing of such plants during the taxable year in which the replanting costs are paid or incurred. A person will be treated as materially participating for purposes of this provision if such person would otherwise meet the requirements with respect to material participation within the meaning of section 2032A(e)(6).

(3) *Examples.* The following examples illustrate the provisions of this paragraph (e):

Example 1. (i) Farmer A grows cherry trees that have a preproductive period in excess of 2 years and produce an annual crop. These cherries are normally eaten by humans. Farmer A grows the trees on a 100 acre parcel of land (parcel 1) and the groves of trees cover the entire acreage of parcel 1. Farmer A also owns a 150 acre parcel of land (parcel 2) that Farmer A holds for future use. Both parcels are in the United States. In 2000, the trees and the irrigation and drainage systems that service the trees are destroyed in a casualty (within the meaning of paragraph (e)(1) of this section). Farmer A installs new irrigation and drainage systems on parcel 1, purchases young trees (seedlings), and plants the seedlings on parcel 1.

(ii) The costs of the irrigation and drainage systems and the seedlings must be capitalized. In accordance with paragraph (e)(1) of this section, the costs of planting, cultivating, developing, and maintaining the seedlings during their preproductive period are not required to be capitalized by section 263A.

Example 2. (i) Assume the same facts as in *Example 1* except that Farmer A decides to replant the seedlings on parcel 2 rather than on parcel 1. Accordingly, Farmer A installs

the new irrigation and drainage systems on 100 acres of parcel 2 and plants seedlings on those 100 acres.

(ii) The costs of the irrigation and drainage systems and the seedlings must be capitalized. Because the acreage of the related portion of parcel 2 does not exceed the acreage of the destroyed orchard on parcel 1, the costs of planting, cultivating, developing, and maintaining the seedlings during their preproductive period are not required to be capitalized by section 263A. See paragraph (e)(1) of this section.

Example 3. (i) Assume the same facts as in *Example 1* except that Farmer A replants the seedlings on parcel 2 rather than on parcel 1, and Farmer A additionally decides to expand its operations by growing 125 rather than 100 acres of trees. Accordingly, Farmer A installs new irrigation and drainage systems on 125 acres of parcel 2 and plants seedlings on those 125 acres.

(ii) The costs of the irrigation and drainage systems and the seedlings must be capitalized. The costs of planting, cultivating, developing, and maintaining 100 acres of the trees during their preproductive period are not required to be capitalized by section 263A. The costs of planting, cultivating, maintaining, and developing the additional 25 acres are, however, subject to capitalization under section 263A. See paragraph (e)(1) of this section.

(4) *Special rule for citrus and almond groves—*(i) *In general.* The exception in this paragraph (e) is available with respect to replanting costs of a citrus or almond grove incurred prior to the close of the fourth taxable year after replanting, notwithstanding the taxpayer's election to have section 263A not apply (described in paragraph (d) of this section).

(ii) *Example.* The following example illustrates the provisions of this paragraph (e)(4):

Example. (i) Farmer A, an individual, is engaged in the trade or business of farming. Farmer A grows citrus trees that have a preproductive period of 5 years. Farmer A elects, under paragraph (d) of this section, not to have section 263A apply. This election, however, is unavailable with respect to the costs of producing a citrus grove incurred within the first 4 years beginning with the year the trees were planted. See paragraph (d)(2) of this section. In year 10, after the citrus grove has become productive in marketable quantities, the citrus grove is destroyed by a casualty within the meaning of paragraph (e)(1) of this section. In year 10, Farmer A acquires and plants young citrus trees in the same grove to replace those destroyed by the casualty.

(ii) Farmer A must capitalize the costs of producing the citrus grove incurred before the close of the fourth taxable year beginning with the year in which the trees were permanently planted. As a result of the election not to have section 263A apply, Farmer A may deduct the preproductive period costs incurred in the fifth year. In year 10, Farmer A must capitalize the acquisition cost of the young trees. However, the costs of planting, cultivating, developing, and maintaining the young trees that replace those destroyed by the casualty are exempted from capitalization under this paragraph (e).

(f) *Effective date and change in method of accounting*—(1) *Effective date*. In the case of property that is not inventory in the hands of the taxpayer, this section is applicable to costs incurred after August 21, 2000 in taxable years ending after August 21, 2000. In the case of inventory property, this section is applicable to taxable years beginning after August 21, 2000.

(2) *Change in method of accounting*. Any change in a taxpayer's method of accounting necessary to comply with this section is a change in method of accounting to which the provisions of sections 446 and 481 and the regulations thereunder apply. For property that is not inventory in the hands of the taxpayer, a taxpayer is granted the consent of the Commissioner to change its method of accounting to comply with the provisions of this section for costs incurred after August 21, 2000, provided the change is made for the first taxable year ending after August 21, 2000. For inventory property, a taxpayer is granted the consent of the Commissioner to change its method of accounting to comply with the provisions of this section for the first taxable year beginning after August 21, 2000. A taxpayer changing its method of accounting under this paragraph (f)(2) must file a Form 3115, "Application for Change in Accounting Method," in accordance with the automatic consent procedures in Rev. Proc. 99-49 (1999-2 I.R.B. 725) (see § 601.601(d)(2) of this chapter). However, the scope limitations in section 4.02 of Rev. Proc. 99-49 do not apply, provided the taxpayer's method of accounting for property produced in a farming business is not an issue under consideration within the meaning of section 3.09 of Rev. Proc. 99-49. If the taxpayer is under examination, before

an appeals office, or before a federal court at the time that a copy of the Form 3115 is filed with the national office, the taxpayer must provide a duplicate copy of the Form 3115 to the examining agent, appeals officer, or counsel for the government, as appropriate, at the time the copy of the Form 3115 is filed. The Form 3115 must contain the name(s) and telephone number(s) of the examining agent, appeals officer, or counsel for the government, as appropriate. Further, in the case of property that is not inventory in the hands of the taxpayer, a change under this paragraph (f)(2) is made on a cutoff basis as described in section 2.06 of Rev. Proc. 99-49 and without the audit protection provided in section 7 of Rev. Proc. 99-49. However, a taxpayer may receive such audit protection for non-inventory property by taking into account any section 481(a) adjustment that results from the change in method of accounting to comply with this section. A taxpayer that opts to determine a section 481(a) adjustment (and, thus, obtain audit protection) for non-inventory property must take into account only additional section 263A costs incurred after December 31, 1986, in taxable years ending after December 31, 1986. Any change in method of accounting that is not made for the taxpayer's first taxable year ending or beginning after August 21, 2000, whichever is applicable, must be made in accord with the procedures in Rev. Proc. 97-27 (1997-1 C.B. 680) (see § 601.601(d)(2) of this chapter).

[T.D. 8897, 65 FR 50644, Aug. 21, 2000; 65 FR 61092, Oct. 16, 2000]

§ 1.263A-5 Exception for qualified creative expenses incurred by certain free-lance authors, photographers, and artists. [Reserved]

§ 1.263A-6 Rules for foreign persons. [Reserved]

§ 1.263A-7 Changing a method of accounting under section 263A.

(a) *Introduction*—(1) *Purpose*. These regulations provide guidance to taxpayers changing their methods of accounting for costs subject to section 263A. The principal purpose of these regulations is to provide guidance regarding how taxpayers are to revalue

property on hand at the beginning of the taxable year in which they change their method of accounting for costs subject to section 263A. Paragraph (c) of this section provides guidance regarding how items or costs included in beginning inventory in the year of change must be revalued. Paragraph (d) of this section provides guidance regarding how non-inventory property should be revalued in the year of change.

(2) *Taxpayers that adopt a method of accounting under section 263A.* Taxpayers may adopt a method of accounting for costs subject to section 263A in the first taxable year in which they engage in resale or production activities. For purposes of this section, the adoption of a method of accounting has the same meaning as provided in § 1.446-1(e)(1). Taxpayers are not subject to the provisions of these regulations to the extent they adopt, as opposed to change, a method of accounting.

(3) *Taxpayers that change a method of accounting under section 263A.* Taxpayers changing their method of accounting for costs subject to section 263A are subject to the revaluation and other provisions of this section. Taxpayers subject to these regulations include, but are not limited to—

(i) Resellers of personal property whose average annual gross receipts for the immediately preceding 3-year period (or lesser period if the taxpayer was not in existence for the three preceding taxable years) exceed \$10,000,000 where the taxpayer was not subject to section 263A in the prior taxable year;

(ii) Resellers of real or personal property that are using a method that fails to comply with section 263A and desire to change to a method of accounting that complies with section 263A;

(iii) Producers of real or tangible personal property that are using a method that fails to comply with section 263A and desire to change to a method of accounting that complies with section 263A; and

(iv) Resellers and producers that desire to change from one permissible method of accounting for costs subject to section 263A to another permissible method.

(4) *Effective date.* The provisions of this section are effective for taxable

years beginning on or after August 5, 1997. For taxable years beginning before August 5, 1997, the rules of § 1.263A-7T contained in the 26 CFR part 1 edition revised as of April 1, 1997, as modified by other administrative guidance, will apply.

(5) *Definition of change in method of accounting.* For purposes of this section, a change in method of accounting has the same meaning as provided in § 1.446-1(e)(2)(ii). Changes in method of accounting for costs subject to section 263A include changes to methods required or permitted by section 263A and the regulations thereunder. Changes in method of accounting may be described in the preceding sentence irrespective of whether the taxpayer's previous method of accounting resulted in the capitalization of more (or fewer) costs than the costs required to be capitalized under section 263A and the regulations thereunder, and irrespective of whether the taxpayer's previous method of accounting was a permissible method under the law in effect when the method was being used. However, changes in method of accounting for costs subject to section 263A do not include changes relating to factors other than those described therein. For example, a change in method of accounting for costs subject to section 263A does not include a change from one inventory identification method to another inventory identification method, such as a change from the last-in, first-out (LIFO) method to the first-in, first-out (FIFO) method, or vice versa, or a change from one inventory valuation method to another inventory valuation method under section 471, such as a change from valuing inventory at cost to valuing the inventory at cost or market, whichever is lower, or vice versa. In addition, a change in method of accounting for costs subject to section 263A does not include a change within the LIFO inventory method, such as a change from the double extension method to the link-chain method, or a change in the method used for determining the number of pools. Further, a change from the modified resale method set forth in Notice 89-67 (1989-1 C.B. 723), see § 601.601(d)(2) of this chapter, to the simplified resale method set forth in § 1.263A-3(d) is not a

change in method of accounting within the meaning of § 1.446-1(e)(2)(ii) and is therefore not subject to the provisions of this section. However, a change from the simplified resale method set forth in former § 1.263A-1T(d)(4) to the simplified resale method set forth in § 1.263A-3(d) is a change in method of accounting within the meaning of § 1.446-1(e)(2)(ii) and is subject to the provisions of this section.

(b) *Rules applicable to a change in method of accounting*—(1) *General rules.* All changes in method of accounting for costs subject to section 263A are subject to the rules and procedures provided by the Code, regulations, and administrative procedures applicable to such changes. The Internal Revenue Service has issued specific revenue procedures that govern certain accounting method changes for costs subject to section 263A. Where a specific revenue procedure is not applicable, changes in method of accounting for costs subject to section 263A are subject to the same rules and procedures that govern other accounting method changes. See Rev. Proc. 97-27 (1997-21 I.R.B. 10) and § 601.601(d)(2) of this chapter.

(2) *Special rules*—(i) *Ordering rules when multiple changes in method of accounting occur in the year of change*—(A) *In general.* A change in method of accounting for costs subject to section 263A is generally deemed to occur (including the computation of the adjustment under section 481(a)) before any other change in method of accounting is deemed to occur for that same taxable year.

(B) *Exceptions to the general ordering rule*—(1) *Change from the LIFO inventory method.* In the case of a taxpayer that is discontinuing its use of the LIFO inventory method in the same taxable year it is changing its method of accounting for costs subject to section 263A, the change from the LIFO method may be made before the change in method of accounting (and the computation of the corresponding adjustment under section 481(a)) under section 263A is made.

(2) *Change from the specific goods LIFO inventory method.* In the case of a taxpayer that is changing from the specific goods LIFO inventory method to the dollar-value LIFO inventory meth-

od in the same taxable year it is changing its method of accounting for costs subject to section 263A, the change from the specific goods LIFO inventory method may be made before the change in method of accounting under section 263A is made.

(3) *Change in overall method of accounting.* In the case of a taxpayer that is changing its overall method of accounting from the cash receipts and disbursements method to an accrual method in the same taxable year it is changing its method of accounting for costs subject to section 263A, the taxpayer must change to an accrual method for capitalizable costs (see § 1.263A-1(c)(2)(ii)) before the change in method of accounting (and the computation of the corresponding adjustment under section 481(a)) under section 263A is made.

(4) *Change in method of accounting for depreciation.* In the case of a taxpayer that is changing its method of accounting for depreciation in the same taxable year it is changing its method of accounting for costs subject to section 263A and any portion of the depreciation is subject to section 263A, the change in method of accounting for depreciation must be made before the change in method of accounting (and the computation of the corresponding adjustment under section 481(a)) under section 263A is made.

(ii) *Adjustment required by section 481(a).* In the case of any taxpayer required or permitted to change its method of accounting for any taxable year under section 263A and the regulations thereunder, the change will be treated as initiated by the taxpayer for purposes of the adjustment required by section 481(a). The taxpayer must take the net section 481(a) adjustment into account over the section 481(a) adjustment period as determined under the applicable administrative procedures issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner's consent to a change in accounting method (for example, see Rev. Proc. 2002-9 (2002-1 C.B. 327) and Rev. Proc. 97-27 (1997-1 C.B. 680) (also see § 601.601(d)(2) of this chapter)). This paragraph applies to taxable years ending on or after June 16, 2004.

(iii) *Base year*—(A) *Need for a new base year.* Certain dollar-value LIFO taxpayers (whether using double extension or link-chain) must establish a new base year when they revalue their inventories under section 263A.

(1) *Facts and circumstances revaluation method used.* A dollar-value LIFO taxpayer that uses the facts and circumstances revaluation method is permitted, but not required, to establish a new base year.

(2) *3-year average method used*—(i) *Simplified method not used.* A dollar-value LIFO taxpayer using the 3-year average method but not the simplified production method or the simplified resale method to revalue its inventory is required to establish a new base year.

(ii) *Simplified method used.* A dollar-value LIFO taxpayer using the 3-year average method and either the simplified production method or the simplified resale method to revalue its inventory is permitted, but not required, to establish a new base year.

(B) *Computing a new base year.* For purposes of determining future indexes, the year of change becomes the new base year (that is, the index at the beginning of the year of change generally must be 1.00) and all costs are restated in new base year costs for purposes of extending such costs in future years. However, when a new base year is established, costs associated with old layers retain their separate identity within the base year, with such layers being restated in terms of the new base year index. For example, for purposes of determining whether a particular layer has been invaded, each layer must retain its separate identity. Thus, if a decrement in an inventory pool occurs, layers accumulated in more recent years must be viewed as invaded first, in order of priority.

(c) *Inventory*—(1) *Need for adjustments.* When a taxpayer changes its method of accounting for costs subject to section 263A, the taxpayer generally must, in computing its taxable income for the year of change, take into account the adjustments required by section 481(a). The adjustments required by section 481(a) relate to revaluations of inventory property, whether the taxpayer produces the inventory or acquires it for resale. See paragraph (d) of this sec-

tion in regard to the adjustments required by section 481(a) that relate to non-inventory property.

(2) *Revaluing beginning inventory*—(i) *In general.* If a taxpayer changes its method of accounting for costs subject to section 263A, the taxpayer must revalue the items or costs included in its beginning inventory in the year of change as if the new method (that is, the method to which the taxpayer is changing) had been in effect during all prior years. In revaluing inventory costs under this procedure, all of the capitalization provisions of section 263A and the regulations thereunder apply to all inventory costs accumulated in prior years. The necessity to revalue beginning inventory as if these capitalization rules had been in effect for all prior years includes, for example, the revaluation of costs or layers incurred in taxable years preceding the transition period to the full absorption method of inventory costing as described in §1.471-11(e), regardless of whether a taxpayer employed a cut-off method under those regulations. The difference between the inventory as originally valued using the former method (that is, the method from which the taxpayer is changing) and the inventory as revalued using the new method is equal to the amount of the adjustment required under section 481(a).

(ii) *Methods to revalue inventory.* There are three methods available to revalue inventory. The first method, the facts and circumstances revaluation method, may be used by all taxpayers. Under this method, a taxpayer determines the direct and indirect costs that must be assigned to each item of inventory based on all the facts and circumstances. This method is described in paragraph (c)(2)(iii) of this section. The second method, the weighted average method, is available only in certain situations to taxpayers using the FIFO inventory method or the specific goods LIFO inventory method. This method is described in paragraph (c)(2)(iv) of this section. The third method, the 3-year average method, is available to all taxpayers using the dollar-value LIFO inventory method of accounting. This method is described in paragraph (c)(2)(v) of this

section. The weighted average method and the 3-year average method revalue inventory through processes of estimation and extrapolation, rather than based on the facts and circumstances of a particular year's data. All three methods are available regardless of whether the taxpayer elects to use a simplified method to capitalize costs under section 263A.

(iii) *Facts and circumstances revaluation method*—(A) *In general.* Under the facts and circumstances revaluation method, a taxpayer generally is required to revalue inventories by applying the capitalization rules of section 263A and the regulations thereunder to the production and resale activities of the taxpayer, with the same degree of specificity as required of inventory manufacturers under the law immediately prior to the effective date of the Tax Reform Act of 1986 (Pub. L. 99-514, 100 Stat. 2085, 1986-3 C.B. (Vol. 1)). Thus, for example, with respect to any prior year that is relevant in determining the total amount of the revalued balance as of the beginning of the year of change, the taxpayer must analyze the production and resale data for that particular year and apply the rules and principles of section 263A and the regulations thereunder to determine the appropriate revalued inventory costs. However, under the facts and circumstances revaluation method, a taxpayer may utilize reasonable estimates and procedures in valuing inventory costs if—

(1) The taxpayer lacks, and is not able to reconstruct from its books and records, actual financial and accounting data which is required to apply the capitalization rules of section 263A and the regulations thereunder to the relevant facts and circumstances surrounding a particular item of inventory or cost; and

(2) The total amounts of costs for which reasonable estimates and procedures are employed are not significant in comparison to the total restated value (including costs previously capitalized under the taxpayer's former method) of the items or costs for the period in question.

(B) *Exception.* A taxpayer that is not able to comply with the requirement of paragraph (c)(2)(iii)(A)(2) of this sec-

tion because of the existence of a significant amount of costs that would require the use of estimates and procedures must revalue its inventories under the procedures provided in paragraph (c)(2)(iv) or (v) of this section.

(C) *Estimates and procedures allowed.* The estimates and procedures of this paragraph (c)(2)(iii) include—

(1) The use of available information from more recent years to estimate the amount and nature of inventory costs applicable to earlier years; and

(2) The use of available information with respect to comparable items of inventory produced or acquired during the same year in order to estimate the costs associated with other items of inventory.

(D) *Use by dollar-value LIFO taxpayers.* Generally, a dollar-value LIFO taxpayer must recompute its LIFO inventory for each taxable year that the LIFO inventory method was used.

(E) *Examples.* The provisions of this paragraph (c)(2)(iii) are illustrated by the following three examples. The principles set forth in these examples are applicable both to production and resale activities and the year of change in all three examples is 1997. The examples read as follows:

Example 1. Taxpayer X lacks information for the years 1993 and earlier, regarding the amount of costs incurred in transporting finished goods from X's factory to X's warehouse and in storing those goods at the warehouse until their sale to customers. X determines that, for 1994 and subsequent years, these transportation and storage costs constitute 4 percent of the total costs of comparable goods under X's method of accounting for such years. Under this paragraph (c)(2)(iii), X may assume that transportation and storage costs for the years 1993 and earlier constitute 4 percent of the total costs of such goods.

Example 2. Assume the same facts as in *Example 1*, except that for the year 1993 and earlier, X used a different method of accounting for inventory costs whereunder significantly fewer costs were capitalized than amounts capitalized in later years. Thus, the application of transportation and storage based on a percentage of costs for 1994 and later years would not constitute a reasonable estimate for use in earlier years. X may use the information from 1994 and later years, if appropriate adjustments are made to reflect the differences in inventory costs for the applicable years, including, for example—

(i) Increasing the percentage of costs that are intended to represent transportation and storage costs to reflect the aggregate differences in capitalized amounts under the two methods of accounting; or

(ii) Taking the absolute dollar amount of transportation and storage costs for comparable goods in inventory and applying that amount (adjusted for changes in general price levels, where appropriate) to goods associated with 1993 and prior periods.

Example 3. Taxpayer Z lacks information for certain years with respect to factory administrative costs, subject to capitalization under section 263A and the regulations thereunder, incurred in the production of inventory in factory A. Z does have sufficient information to determine factory administrative costs with respect to production of inventory in factory B, wherein inventory items were produced during the same years as factory A. Z may use the information from factory B to determine the appropriate amount of factory administrative costs to capitalize as inventory costs for comparable items produced in factory A during the same years.

(iv) *Weighted average method—(A) In general.* A taxpayer using the FIFO method or the specific goods LIFO method of accounting for inventories may use the weighted average method as provided in this paragraph (c)(2)(iv) to estimate the change in the amount of costs that must be allocated to inventories for prior years. The weighted average method under this paragraph (c)(2)(iv) is only available to a taxpayer that lacks sufficient data to revalue its inventory costs under the facts and circumstances revaluation method provided for in paragraph (c)(2)(iii) of this section. Moreover, a taxpayer that qualifies for the use of the weighted average method under this paragraph (c)(2)(iv) must utilize such method only with respect to items or costs for which it lacks sufficient information to revalue under the facts and circumstances revaluation method. Particular items or costs must be revalued under the facts and circumstances revaluation method if sufficient information exists to make such a revaluation. If a taxpayer lacks sufficient information to otherwise apply the weighted average method under this paragraph (c)(2)(iv) (for example, the taxpayer is unable to revalue the costs of any of its items in inventory due to a lack of information), then the taxpayer must use reasonable estimates and procedures,

as described in the facts and circumstances revaluation method, to whatever extent is necessary to allow the taxpayer to apply the weighted average method.

(B) *Weighted average method for FIFO taxpayers—(1) In general.* This paragraph (c)(2)(iv)(B) sets forth the mechanics of the weighted average method as applicable to FIFO taxpayers. Under the weighted average method, an item in ending inventory for which sufficient data is not available for revaluation under section 263A and the regulations thereunder must be revalued by using the weighted average percentage increase or decrease with respect to such item for the earliest subsequent taxable year for which sufficient data is available. With respect to an item for which no subsequent data exists, such item must be revalued by using the weighted average percentage increase or decrease with respect to all reasonably comparable items in the taxpayer's inventory for the same year or the earliest subsequent taxable year for which sufficient data is available.

(2) *Example.* The provisions of this paragraph (c)(2)(iv)(B) are illustrated by the following example. The principles set forth in this example are applicable both to production and resale activities and the year of change in the example is 1997. The example reads as follows:

Example. Taxpayer A manufactures bolts and uses the FIFO method to identify inventories. Under A's former method, A did not capitalize all of the costs required to be capitalized under section 263A. A maintains inventories of bolts, two types of which it no longer produces. Bolt A was last produced in 1994. The revaluation of the costs of Bolt A under this section for bolts produced in 1994 results in a 20 percent increase of the costs of Bolt A. A portion of the inventory of Bolt A, however, is attributable to 1993. A does not have sufficient data for revaluation of the 1993 cost for Bolt A. With respect to Bolt A, A may apply the 20 percent increase determined for 1994 to the 1993 production as an acceptable estimate. Bolt B was last produced in 1992 and no data exists that would allow revaluation of the inventory cost of Bolt B. The inventories of all other bolts for which information is available are attributable to 1994 and 1995. Revaluation of the costs of these other bolts using available data results in an average increase in inventory costs of 15 percent for 1994 production. With respect to Bolt B, the overall 15 percent

Internal Revenue Service, Treasury

§ 1.263A-7

increase for A's inventory for 1994 may be used in revaluing the cost of Bolt B.

(C) *Weighted average method for specific goods LIFO taxpayers*—(1) *In general.* This paragraph (c)(2)(iv)(C) sets forth the mechanics of the weighted average method as applicable to LIFO taxpayers using the specific goods method of valuing inventories. Under the weighted average method, the inventory layers with respect to an item for which data is available are revalued under this section and the increase or decrease in amount for each layer is expressed as a percentage of change from the cost in the layer as originally valued. A weighted average of the percentage of change for all layers for each type of good is computed and applied to all earlier layers for each type of good that lack sufficient data to allow for revaluation. In the case of earlier layers for which sufficient data exists, such layers are to be revalued using actual data. In cases where sufficient data is not available to make a weighted average estimate with respect to a particular item of inventory, a weighted average increase or decrease is to be determined using all other inventory items revalued by the taxpayer in the same specific goods grouping. This percentage increase or decrease is then used to revalue the cost of the item for which data is lacking. If the

taxpayer lacks sufficient data to revalue any of the inventory items contained in a specific goods grouping, then the weighted average increase or decrease of substantially similar items (as determined by principles similar to the rules applicable to dollar-value LIFO taxpayers in § 1.472-8(b)(3)) must be applied in the revaluation of the items in such grouping. If insufficient data exists with respect to all the items in a specific goods grouping and to all items that are substantially similar (or such items do not exist), then the weighted average for all revalued items in the taxpayer's inventory must be applied in revaluing items for which data is lacking.

(2) *Example.* The provisions of this paragraph (c)(2)(iv)(C) are illustrated by the following example. The principles set forth in this example are applicable both to production and resale activities and the year of change in the example is 1997. The example reads as follows:

Example. (i) Taxpayer M is a manufacturer that produces two different parts. Under M's former method, M did not capitalize all of the costs required to be capitalized under section 263A. Work-in-process inventory is recorded in terms of equivalent units of finished goods. M's records show the following at the end of 1996 under the specific goods LIFO inventory method:

| LIFO Product and layer | Number | Cost | Carrying values |
|--|--------|--------|-----------------|
| Product #1: | | | |
| 1993 | 150 | \$5.00 | \$750 |
| 1994 | 100 | 6.00 | 600 |
| 1995 | 100 | 6.50 | 650 |
| 1996 | 50 | 7.00 | 350 |
| | | | \$2,350 |
| Product #2: | | | |
| 1993 | 200 | \$4.00 | \$800 |
| 1994 | 200 | 4.50 | 900 |
| 1995 | 100 | 5.00 | 500 |
| 1996 | 100 | 6.00 | 600 |
| | | | 2,800 |
| Total carrying value of Products #1 and #2 under M's former method | | | 5,150 |

(ii) M has sufficient data to revalue the unit costs of Product #1 using its new method for 1994, 1995 and 1996. These costs are: \$7.00 in 1994, \$7.75 in 1995, and \$9.00 in 1996. This data for Product #1 results in a weighted average percentage change of 20.31 percent

$((100 \times (\$7.00 - \$6.00)) + (100 \times (\$7.75 - \$6.50)) + (50 \times (\$9.00 - \$7.00)))$ divided by $(100 \times \$6.00) + (100 \times \$6.50) + (50 \times \$7.00)$. M has sufficient data to revalue the unit costs of Product #2 only in 1995 and 1996. These costs are: \$6.00 in 1995 and \$7.00 in 1996. This data for Product

§ 1.263A-7

26 CFR Ch. I (4-1-17 Edition)

#2 results in a weighted average percentage change of 18.18 percent $[(100 \times (\$6.00 - \$5.00)) + (100 \times (\$7.00 - \$6.00)) \text{ divided by } (100 \times \$5.00) + (100 \times \$6.00)]$.

(iii) M can estimate its revalued costs for Product #1 for 1993 by applying the weighted average increase computed for Product #1 (20.31 percent) to the unit costs originally carried on M's records for 1993 under M's former method. The estimated revalued unit cost of Product #1 would be \$6.02 $(\$5.00 \times$

1.2031). M estimates its revalued costs for Product #2 for 1993 and 1994 in a similar fashion. M applies the weighted average increase determined for Product #2 (18.18 percent) to the unit costs of \$4.00 and \$4.50 for 1993 and 1994 respectively. The revalued unit costs of Product #2 are \$4.73 for 1993 $(\$4.00 \times 1.1818)$ and \$5.32 for 1994 $(\$4.50 \times 1.1818)$.

(iv) M's inventory would be revalued as follows:

| LIFO product and layer | Number | Cost | Carrying values |
|--|--------|--------|-----------------|
| Product #1: | | | |
| 1993 | 150 | \$6.02 | \$903 |
| 1994 | 100 | 7.00 | 700 |
| 1995 | 100 | 7.75 | 775 |
| 1996 | 50 | 9.00 | 450 |
| | | | \$2,828 |
| Product #2: | | | |
| 1993 | 200 | 4.73 | 946 |
| 1994 | 200 | 5.32 | 1,064 |
| 1995 | 100 | 6.00 | 600 |
| 1996 | 100 | 7.00 | 700 |
| | | | 3,310 |
| Total value of Products #1 and #2 as revalued under M's new method | | | 6,138 |
| Total amount of adjustment required under section 481(a) $[\$6,138 - \$5,150]$ | | | 988 |

(D) *Adjustments to inventory costs from prior years.* For special rules applicable when a revaluation using the weighted average method includes costs not incurred in prior years, see paragraph (c)(2)(v)(E) of this section.

(v) *3-year average method*—(A) *In general.* A taxpayer using the dollar-value LIFO method of accounting for inventories may revalue all existing LIFO layers of a trade or business based on the 3-year average method as provided in this paragraph (c)(2)(v). The 3-year average method is based on the average percentage change (the 3-year revaluation factor) in the current costs of inventory for each LIFO pool based on the three most recent taxable years for which the taxpayer has sufficient information (typically, the three most recent taxable years of such trade or business). The 3-year revaluation factor is applied to all layers for each pool in beginning inventory in the year of change. The 3-year average method is available to any dollar-value taxpayer that complies with the requirements of this paragraph (c)(2)(v) regardless of whether such taxpayer lacks sufficient

data to revalue its inventory costs under the facts and circumstances revaluation method prescribed in paragraph (c)(2)(iii) of this section. The 3-year average method must be applied with respect to all inventory in a taxpayer's trade or business. A taxpayer is not permitted to apply the method for the revaluation of some, but not all, inventory costs on the basis of pools, business units, or other measures of inventory amounts that do not constitute a separate trade or business. Generally, a taxpayer revaluing its inventory using the 3-year average method must establish a new base year. See, paragraph (b)(2)(iii)(A)(2)(i) of this section. However, a dollar-value LIFO taxpayer using the 3-year average method and either the simplified production method or the simplified resale method to revalue its inventory is permitted, but not required, to establish a new base year. See, paragraph (b)(2)(iii)(A)(2)(ii) of this section. If a taxpayer lacks sufficient information to otherwise apply the 3-year average method under this paragraph (c)(2)(v) (for example, the taxpayer is unable to

revalue the costs of any of its LIFO pools for three years due to a lack of information), then the taxpayer must use reasonable estimates and procedures, as described in the facts and circumstances revaluation method under paragraph (c)(2)(iii) of this section, to whatever extent is necessary to allow the taxpayer to apply the 3-year average method.

(B) *Consecutive year requirement.* Under the 3-year average method, if sufficient data is available to calculate the revaluation factor for more than three years, the taxpayer may use data from such additional years in determining the average percentage increase or decrease only if the additional years are consecutive to and prior to the year of change. The requirement under the preceding sentence to use consecutive years is applicable under this method regardless of whether any inventory costs in beginning inventory as of the year of change are viewed as incurred in, or attributable to, those consecutive years under the LIFO inventory method. Thus, the requirement to use data from consecutive years may result in using information from a year in which no LIFO increment occurred. For example, if a taxpayer is changing its method of accounting in 1997 and has sufficient data to revalue its inventory for

the years 1991 through 1996, the taxpayer may calculate the revaluation factor using all six years. If, however, the taxpayer has sufficient data to revalue its inventory for the years 1990 through 1992, and 1994 through 1996, only the three years consecutive to the year of change, that is, 1994 through 1996, may be used in determining the revaluation factor. Similarly, for example, a taxpayer with LIFO increments in 1995, 1993, and 1992 may not calculate the revaluation factor based on the data from those years alone, but instead must use the data from consecutive years for which the taxpayer has information.

(C) *Example.* The provisions of this paragraph (c)(2)(v) are illustrated by the following example. The principles set forth in this example are applicable both to production and resale activities and the year of change in the example is 1997. The example reads as follows:

Example. (i) Taxpayer G, a calendar year taxpayer, is a reseller that is required to change its method of accounting under section 263A. G will not use either the simplified production method or the simplified resale method. G adopted the dollar-value LIFO inventory method in 1991, using a single pool and the double extension method. G's beginning LIFO inventory as of January 1, 1997, computed using its former method, for the year of change is as follows:

| | Base year costs | Index | LIFO carrying value |
|------------------|-----------------|-------|---------------------|
| Base layer | \$14,000 | 1.00 | \$14,000 |
| 1991 layer | 4,000 | 1.20 | 4,800 |
| 1992 layer | 5,000 | 1.30 | 6,500 |
| 1993 layer | 2,000 | 1.35 | 2,700 |
| 1994 layer | 0 | 1.40 | 0 |
| 1995 layer | 4,000 | 1.50 | 6,000 |
| 1996 layer | 5,000 | 1.60 | 8,000 |
| Total | 34,000 | | 42,000 |

(ii) G is able to recompute total inventoriable costs incurred under its new

method for the three preceding taxable years as follows:

| | Current cost as recorded (former method) | Current cost as adjusted (new method) | Percentage change |
|-------------|--|---------------------------------------|-------------------|
| 1994 | \$35,000 | \$45,150 | .29 |
| 1995 | 43,500 | 54,375 | .25 |
| 1996 | 54,400 | 70,720 | .30 |
| Total | 132,900 | 170,245 | .28 |

§ 1.263A-7

26 CFR Ch. I (4-1-17 Edition)

(iii) Applying the average revaluation factor of .28 to each layer, G's inventory is restated as follows:

| | Restated base year costs | Index | Restated LIFO carrying value |
|------------------|--------------------------|-------|------------------------------|
| Base layer | \$17,920 | 1.00 | \$17,920 |
| 1991 layer | 5,120 | 1.20 | 6,144 |
| 1992 layer | 6,400 | 1.30 | 8,320 |
| 1993 layer | 2,560 | 1.35 | 3,456 |
| 1994 layer | 0 | 1.40 | 0 |
| 1995 layer | 5,120 | 1.50 | 7,680 |
| 1996 layer | 6,400 | 1.60 | 10,240 |
| Total | 43,520 | | 53,760 |

(iv) The adjustment required by section 481(a) is \$11,760. This amount may be computed by multiplying the average percentage of .28 by the LIFO carrying value of G's inventory valued using its former method (\$42,000). Alternatively, the adjustment required by section 481(a) may be computed by the difference between—

(A) The revalued costs of the taxpayer's inventory under its new method (\$53,760), and

(B) The costs of the taxpayer's inventory using its former method (\$42,000).

(v) In addition, the inventory as of the first day of the year of change (January 1, 1997) becomes the new base year cost for purposes of determining the LIFO index in future years. See, paragraphs (b)(2)(iii)(A)(2)(i) and (b)(2)(iii)(B) of this section. This requires that layers in years prior to the base year be restated in terms of the new base year index. The current year cost of G's inventory, as adjusted, is \$70,720. Such cost must be apportioned to each layer in proportion to the restated base year cost of that layer to total restated base year costs (\$43,520), as follows:

| | Restated base year costs | Restated index | Restated LIFO carrying value |
|----------------------|--------------------------|----------------|------------------------------|
| Old base layer | \$29,120 | .615 | \$17,920 |
| 1991 layer | 8,320 | .738 | 6,144 |
| 1992 layer | 10,400 | .80 | 8,320 |
| 1993 layer | 4,160 | .831 | 3,456 |
| 1994 layer | 0 | | 0 |
| 1995 layer | 8,320 | .923 | 7,680 |
| 1996 layer | 10,400 | .985 | 10,240 |
| Total | 70,720 | | 53,760 |

(D) *Short taxable years.* A short taxable year is treated as a full 12 months.

(E) *Adjustments to inventory costs from prior years—(1) General rule.* (i) The use of the revaluation factor, based on current costs, to estimate the revaluation of prior inventory layers under the 3-year average method, as described in paragraph (c)(2)(v) of this section, may result in an allocation of costs that include amounts attributable to costs not incurred during the year in which the layer arose. To the extent a taxpayer can demonstrate that costs that contributed to the determination of the revaluation factor could not have affected a prior year, the revaluation factor as applied to that year may be adjusted under the restatement adjustment procedure, as described in para-

graph (c)(2)(v)(F) of this section. The determination that a cost could not have affected a prior year must be made by a taxpayer only upon showing that the type of cost incurred during the years used to calculate the revaluation factor (revaluation years) was not present during such prior year. An item of cost will not be eligible for the restatement adjustment procedure simply because the cost varies in amount from year to year or the same type of cost is described or referred to by a different name from year to year. Thus, the restatement adjustment procedure allowed under paragraph (c)(2)(v)(F) of this section is not available in a prior year with respect to a particular cost if the same type of cost was incurred both in the revaluation

years and in such prior year, although the amount of such cost and the name or description thereof may vary.

(ii) The provisions of this paragraph (c)(2)(v)(E) are also applicable to taxpayers using the weighted average method in revaluing inventories under paragraph (c)(2)(iv) of this section. Thus, to the extent a taxpayer can demonstrate that costs that contributed to the determination of the restatement of a particular year or item could not have affected a prior year or item, the taxpayer may adjust the revaluation of that prior year or item accordingly under the weighted average method. All the requirements and definitions, however, applicable to the restatement adjustment procedure under this paragraph (c)(2)(v)(E) fully apply to a taxpayer using the weighted average method to revalue inventories.

(2) *Examples of costs eligible for restatement adjustment procedure.* The provisions of this paragraph (c)(2)(v)(E) are illustrated by the following four examples. The principles set forth in these examples are applicable both to production and resale activities and the year of change in the four examples is 1997. The examples read as follows:

Example 1. Taxpayer A is a reseller that introduced a defined benefit pension plan in 1994, and made the plan available to personnel whose labor costs were (directly or indirectly) properly allocable to resale activities. A determines the revaluation factor based on data available for the years 1994 through 1996, for which the pension plan was in existence. Based on these facts, the costs of the pension plan in the revaluation years are eligible for the restatement adjustment procedure for years prior to 1994.

Example 2. Assume the same facts as in *Example 1*, except that a defined contribution plan was available, during prior years, to personnel whose labor costs were properly allocable to resale activities. The defined contribution plan was terminated before the introduction of the defined benefit plan in 1994. Based on these facts, the costs of the defined benefit pension plan in the revaluation years are not eligible for the restatement adjustment procedure with respect to years for which the defined contribution plan existed.

Example 3. Taxpayer C is a manufacturer that established a security department in 1995 to patrol and safeguard its production and warehouse areas used in C's trade or business. Prior to 1995, C had not been required to utilize security personnel in its trade or business; C established the security

department in 1995 in response to increasing vandalism and theft at its plant locations. Based on these facts, the costs of the security department are eligible for the restatement adjustment procedure for years prior to 1995.

Example 4. Taxpayer D is a reseller that established a payroll department in 1995 to process the company's weekly payroll. In the years 1991 through 1994, D engaged the services of an outside vendor to process the company's payroll. Prior to 1991, D's payroll processing was done by D's accounting department, which was responsible for payroll processing as well as for other accounting functions. Based on these facts, the costs of the payroll department are not eligible for the restatement adjustment procedure. D was incurring the same type of costs in earlier years as D was incurring in the payroll department in 1995 and subsequent years, although these costs were designated by a different name or description.

(F) *Restatement adjustment procedure—*
(1) *In general.* (i) This paragraph (c)(2)(v)(F) provides a restatement adjustment procedure whereunder a taxpayer may adjust the restatement of inventory costs in prior taxable years in order to produce a different restated value than the value that would otherwise occur through application of the revaluation factor to such prior taxable years.

(ii) Under the restatement adjustment procedure as applied to a particular prior year, a taxpayer must determine the particular items of cost that are eligible for the restatement adjustment with respect to such prior year. The taxpayer must then recompute, using reasonable estimates and procedures, the total inventoriable costs that would have been incurred for each revaluation year under the taxpayer's former method and the taxpayer's new method by making appropriate adjustments in the data for such revaluation year to reflect the particular costs eligible for adjustment.

(iii) The taxpayer must then compute the total percentage change with respect to each revaluation year, using the revised estimates of total inventoriable costs for such year as described in paragraph (c)(2)(v)(F)(1)(ii) of this section. The percentage change must be determined by calculating the ratio of the revised total of the inventoriable costs for such revaluation year under the taxpayer's new

§ 1.263A-7

26 CFR Ch. I (4-1-17 Edition)

method to the revised total of the inventoriable costs for such revaluation year under the taxpayer's former method.

(iv) An average of the resulting percentage change for all revaluation years is then calculated, and the resulting average is applied to the prior year in issue.

(2) *Examples of restatement adjustment procedure.* The provisions of this paragraph (c)(2)(v)(F) are illustrated by the following two examples. The principles set forth in these examples are applicable both to production and resale activities and the year of change in the two examples is 1997. The examples read as follows:

Example 1. Taxpayer A is a reseller that is eligible to make a restatement adjustment by reason of the costs of a defined benefit pension plan that was introduced in 1994, during the revaluation period. The revaluation factor, before adjustment of data to reflect the pension costs, is as provided in the example in paragraph (c)(2)(v)(C) of this section. Thus, for example, with respect to the year 1994, the total inventoriable costs under A's former method is \$35,000, the total inventoriable costs under A's new method is \$45,150, and the percentage change is .29. Under the method of accounting used by A during 1994 (the former method), none of the pension costs were included as inventoriable costs. Thus, under the restatement adjustment procedure, the total inventoriable cost under A's former method would remain at \$35,000 if the pension plan had not been in existence. Similarly, A determines that the total inventoriable costs for 1994 under A's new method, if the pension plan had not been in existence, would have been \$42,000. The restatement adjustment for 1994 determined under this paragraph (c)(2)(v)(F) would then be equal to .20 $(\$42,000 - \$35,000) / \$35,000$. A would make similar calculations with respect to 1995 and 1996. The average of such amounts for each of the three years in the revaluation period would then be determined as in the example in paragraph (c)(2)(v)(C) of this section. Such average would be used to revalue cost layers for years for which the pension plan was not in existence. Such revalued layers would then be viewed as restated in compliance with the requirements of this paragraph. With respect to cost layers incurred during years for which the pension plan was in existence, no adjustment of the revaluation factor would occur.

Example 2. Assume the same facts as in *Example 1*, except that a portion of the pension costs were included as inventoriable costs under the method used by A during 1994 (the former method). Under the restatement ad-

justment procedure, A determines that the total inventoriable costs for 1994 under the former method, if the pension plan had not been in existence, would have been \$34,000. Similarly, A determines that the total inventoriable costs for 1994 under A's new method, if the pension plan had not been in existence, would have been \$42,000. The restatement adjustment for 1994 determined under this paragraph (c)(2)(v)(F) would then be equal to .24 $(\$42,000 - \$34,000) / \$34,000$. A would make similar calculations with respect to 1995 and 1996. The average of such amounts for each of the three years in the revaluation period would then be determined as in the example in paragraph (c)(2)(v)(C) of this section. Such average would be used to revalue cost layers for years for which the pension plan was not in existence.

(3) *Intercompany items—(i) Revaluing intercompany transactions.* Pursuant to any change in method of accounting for costs subject to section 263A, taxpayers are required to revalue the amount of any intercompany item resulting from the sale or exchange of inventory property in an intercompany transaction to an amount equal to the intercompany item that would have resulted, had the cost of goods sold for that inventory property been determined under the taxpayer's new method. The requirement of the preceding sentence applies with respect to both inventory produced by a taxpayer and inventory acquired by the taxpayer for resale. In addition, the requirements of this paragraph (c)(3) apply only to any intercompany item of the taxpayer as of the beginning of the year of change in method of accounting. See § 1.1502-13(b)(2)(ii). A taxpayer must revalue the amount of any intercompany item only if the inventory property sold in the intercompany transaction is held as inventory by a buying member as of the date the taxpayer changes its method of accounting under section 263A. Corresponding changes to the adjustment required under section 481(a) must be made with respect to any adjustment of the intercompany item required under this paragraph (c)(3). Moreover, the requirements of this paragraph (c)(3) apply regardless of whether the taxpayer has any items in beginning inventory as of the year of change in method of accounting. See § 1.1502-13 for the definition of intercompany transaction.

(ii) *Example.* The provisions of this paragraph (c)(3) are illustrated by the following example. The principles set forth in this example are applicable both to production and resale activities and the year of change in the example is 1997. The example reads as follows:

Example. (i) Assume that S, a member of a consolidated group filing its federal income tax return on a calendar year, manufactures and sells inventory property to B, a member of the same consolidated group, in 1996. The sale between S and B is an intercompany transaction as defined under § 1.1502-13(b)(1). The gain from the intercompany transaction is an intercompany item to S under § 1.1502-13(b)(2). As of the beginning of the year of change in method of accounting (January 1, 1997), the inventory property is still held by B based on the particular inventory method of accounting used by B for federal income tax purposes (for example, the LIFO or FIFO inventory method). The property was sold by S to B in 1996 for \$150; the cost of goods sold with respect to the property under the method in effect at the time the inventory was produced was \$100, resulting in an intercompany item of \$50 to S under § 1.1502-13. As of January 1, 1997, S still has an intercompany item of \$50.

(ii) S is required to revalue the amount of its intercompany item to an amount equal to what the intercompany item would have been had the cost of goods sold for that inventory property been determined under S's new method. Assume that the cost of the inventory under this method would have been \$110, had the method applied to S's manufacture of the property in 1996. Thus, S is required to revalue the amount of its intercompany item to \$40 (that is, \$150 less \$110), necessitating a negative adjustment to the intercompany item of \$10. Moreover, S is required to increase its adjustment under section 481(a) by \$10 in order to prevent the omission of such amount by virtue of the decrease in the intercompany item.

(iii) *Availability of revaluation methods.* In revaluing the amount of any intercompany item resulting from the sale or exchange of inventory property in an intercompany transaction to an amount equal to the intercompany item that would have resulted had the cost of goods sold for that inventory property been determined under the taxpayer's new method, a taxpayer may use the other methods and procedures otherwise properly available to that particular taxpayer in revaluing inventory under section 263A and the regulations thereunder, including, if appropriate, the various simplified

methods provided in section 263A and the regulations thereunder and the various procedures described in this paragraph (c).

(4) *Anti-abuse rule*—(i) *In general.* Section 263A(i)(1) provides that the Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of section 263A, including regulations to prevent the use of related parties, pass-thru entities, or intermediaries to avoid the application of section 263A and the regulations thereunder. One way in which the application of section 263A and the regulations thereunder would be otherwise avoided is through the use of entities described in the preceding sentence in such a manner as to effectively avoid the necessity to restate beginning inventory balances under the change in method of accounting required or permitted under section 263A and the regulations thereunder.

(ii) *Deemed avoidance of this section*—(A) *Scope.* For purposes of this paragraph (c), the avoidance of the application of section 263A and the regulations thereunder will be deemed to occur if a taxpayer using the LIFO method of accounting for inventories, transfers inventory property to a related corporation in a transaction described in section 351, and such transfer occurs:

(1) On or before the beginning of the transferor's taxable year beginning in 1987; and

(2) After September 18, 1986.

(B) *General rule.* Any transaction described in paragraph (c)(4)(ii)(A) of this section will be treated in the following manner:

(1) Notwithstanding any provision to the contrary (for example, section 381), the transferee corporation is required to revalue the inventories acquired from the transferor under the provisions of this paragraph (c) relating to the change in method of accounting and the adjustment required by section 481(a), as if the inventories had never been transferred and were still in the hands of the transferor; and

(2) Absent an election as described in paragraph (c)(4)(iii) of this section, the transferee must account for the inventories acquired from the transferor by treating such inventories as if they

§ 1.263A-8

26 CFR Ch. I (4-1-17 Edition)

were contained in the transferee's LIFO layer(s).

(iii) *Election to use transferor's LIFO layers.* If a transferee described in paragraph (c)(4)(ii) of this section so elects, the transferee may account for the inventories acquired from the transferor by allocating such inventories to LIFO layers corresponding to the layers to which such properties were properly allocated by the transferor, prior to their transfer. The transferee must account for such inventories for all subsequent periods with reference to such layers to which the LIFO costs were allocated. Any such election is to be made on a statement attached to the timely filed federal income tax return of the transferee for the first taxable year for which section 263A and the regulations thereunder applies to the transferee.

(iv) *Tax avoidance intent not required.* The provisions of paragraph (c)(4)(ii) of this section will apply to any transaction described therein, without regard to whether such transaction was consummated with an intention to avoid federal income taxes.

(v) *Related corporation.* For purposes of this paragraph (c)(4), a taxpayer is related to a corporation if—

(A) the relationship between such persons is described in section 267(b)(1), or

(B) such persons are engaged in trades or businesses under common control (within the meaning of paragraphs (a) and (b) of section 52).

(d) *Non-inventory property*—(1) *Need for adjustments.* A taxpayer that changes its method of accounting for costs subject to section 263A with respect to non-inventory property must revalue the non-inventory property on hand at the beginning of the year of change as set forth in paragraph (d)(2) of this section, and compute an adjustment under section 481(a). The adjustment under section 481(a) will equal the difference between the adjusted basis of the property as revalued using the taxpayer's new method and the adjusted basis of the property as originally valued using the taxpayer's former method.

(2) *Revaluing property.* A taxpayer must revalue its non-inventory property as of the beginning of the year of change in method of accounting. The

facts and circumstances revaluation method of paragraph (c)(2)(iii) of this section must be used to revalue this property. In revaluing non-inventory property, however, the only additional section 263A costs that must be taken into account are those additional section 263A costs incurred after the later of December 31, 1986, or the date the taxpayer first becomes subject to section 263A, in taxable years ending after that date. See § 1.263A-1(d)(3) for the definition of additional section 263A costs.

[T.D. 8728, 62 FR 42054, Aug. 5, 1997, as amended by T.D. 9131, 69 FR 33572, June 16, 2004]

§ 1.263A-8 Requirement to capitalize interest.

(a) *In general*—(1) *General rule.* Capitalization of interest under the avoided cost method described in § 1.263A-9 is required with respect to the production of designated property described in paragraph (b) of this section.

(2) *Treatment of interest required to be capitalized.* In general, interest that is capitalized under this section is treated as a cost of the designated property and is recovered in accordance with § 1.263A-1(c)(4). Interest capitalized by reason of assets used to produce designated property (within the meaning of § 1.263A-11(d)) is added to the basis of the designated property rather than the bases of the assets used to produce the designated property. Interest capitalized with respect to designated property that includes both components subject to an allowance for depreciation or depletion and components not subject to an allowance for depreciation or depletion is ratably allocated among, and is treated as a cost of, components that are subject to an allowance for depreciation or depletion.

(3) *Methods of accounting under section 263A(f).* Except as otherwise provided, methods of accounting and other computations under §§ 1.263A-8 through 1.263A-15 are applied on a taxpayer, as opposed to a separate and distinct trade or business, basis.

(4) *Special definitions*—(i) *Related person.* Except as otherwise provided, for purposes of §§ 1.263A-8 through 1.263A-15, a person is related to a taxpayer if

their relationship is described in section 267(b) or 707(b).

(ii) *Placed in service.* For purposes of §§ 1.263A-8 through 1.263A-15, *placed in service* has the same meaning as set forth in § 1.46-3(d).

(b) *Designated property*—(1) *In general.* Except as provided in paragraphs (b)(3) and (b)(4) of this section, *designated property* means any property that is produced and that is either:

(i) Real property; or

(ii) Tangible personal property (as defined in § 1.263A-2(a)(2)) which meets any of the following criteria:

(A) Property with a class life of 20 years or more under section 168 (long-lived property), but only if the property is not property described in section 1221(1) in the hands of the taxpayer or a related person,

(B) Property with an estimated production period (as defined in § 1.263A-12) exceeding 2 years (2-year property), or

(C) Property with an estimated production period exceeding 1 year and an estimated cost of production exceeding \$1,000,000 (1-year property).

(2) *Special rules*—(i) *Application of thresholds.* The thresholds described in paragraphs (b)(1)(ii)(A), (B), and (C) of this section are applied separately for each unit of property (as defined in § 1.263A-10).

(ii) *Relevant activities and costs.* For purposes of determining whether property is designated property, all activities and costs are taken into account if they are performed or incurred by, or for, the taxpayer or any related persons and they directly benefit or are incurred by reason of the production of the property.

(iii) *Production period and cost of production.* For purposes of applying the classification thresholds under paragraphs (b)(1)(ii) (B) and (C) of this section to a unit of property, the taxpayer is required, at the beginning of the production period, to reasonably estimate the production period and the total cost of production for the unit of property. The taxpayer must maintain contemporaneous written records supporting the estimates and classification. If the estimates are reasonable based on the facts in existence at the beginning of the production period, the

taxpayer's classification of the property is not modified in subsequent periods, even if the actual length of the production period or the actual cost of production differs from the estimates. To be considered reasonable, estimates of the production period and the total cost of production must include anticipated expense and time for delay, rework, change orders, and technological, design or other problems. To the extent that several distinct activities related to the production of the property are expected to occur simultaneously, the period during which these distinct activities occur is not counted more than once. The bases of assets used to produce a unit of property (within the meaning of § 1.263A-11(d)) and any interest that would be required to be capitalized if a unit of property were designated property are disregarded in making estimates of the total cost of production for purposes of this paragraph (b)(2)(iii).

(3) *Excluded property.* Designated property does not include:

(i) Timber and evergreen trees that are more than 6 years old when severed from the roots, or

(ii) Property produced by the taxpayer for use by the taxpayer other than in a trade or business or an activity conducted for profit.

(4) *De minimis rule*—(i) *In general.* Designated property does not include property for which—

(A) The production period does not exceed 90 days; and

(B) The total production expenditures do not exceed \$1,000,000 divided by the number of days in the production period.

(ii) *Determination of total production expenditures.* For purposes of determining whether the condition of paragraph (b)(4)(i)(B) of this section is met with respect to property, the cost of land, the adjusted basis of property used to produce property, and interest that would be capitalized with respect to property if it were designated property are excluded from total production expenditures.

(c) *Definition of real property*—(1) *In general.* Real property includes land, unsevered natural products of land, buildings, and inherently permanent

structures. Any interest in real property of a type described in this paragraph (c), including fee ownership, co-ownership, a leasehold, an option, or a similar interest is real property under this section. Real property includes the structural components of both buildings and inherently permanent structures, such as walls, partitions, doors, wiring, plumbing, central air conditioning and heating systems, pipes and ducts, elevators and escalators, and other similar property. Tenant improvements to a building that are inherently permanent or otherwise classified as real property within the meaning of this paragraph (c)(1) are real property under this section. However, property produced for sale that is not real property in the hands of the taxpayer or a related person, but that may be incorporated into real property by an unrelated buyer, is not treated as real property by the producing taxpayer (e.g., bricks, nails, paint, and windowpanes).

(2) *Unsevered natural products of land.* Unsevered natural products of land include growing crops and plants, mines, wells, and other natural deposits. Growing crops and plants, however, are real property only if the preproductive period of the crop or plant exceeds 2 years.

(3) *Inherently permanent structures.* Inherently permanent structures include property that is affixed to real property and that will ordinarily remain affixed for an indefinite period of time, such as swimming pools, roads, bridges, tunnels, paved parking areas and other pavements, special foundations, wharves and docks, fences, inherently permanent advertising displays, inherently permanent outdoor lighting facilities, railroad tracks and signals, telephone poles, power generation and transmission facilities, permanently installed telecommunications cables, broadcasting towers, oil and gas pipelines, derricks and storage equipment, grain storage bins and silos. For purposes of this section, affixation to real property may be accomplished by weight alone. Property may constitute an inherently permanent structure even though it is not classified as a building for purposes of former section 48(a)(1)(B) and § 1.48-1. Any property

not otherwise described in this paragraph (c)(3) that constitutes other tangible property under the principles of former section 48(a)(1)(B) and § 1.48-1(d) is treated for the purposes of this section as an inherently permanent structure.

(4) *Machinery*—(i) *Treatment.* A structure that is property in the nature of machinery or is essentially an item of machinery or equipment is not an inherently permanent structure and is not real property. In the case, however, of a building or inherently permanent structure that includes property in the nature of machinery as a structural component, the property in the nature of machinery is real property.

(ii) *Certain factors not determinative.* A structure may be an inherently permanent structure, and not property in the nature of machinery or essentially an item of machinery, even if the structure is necessary to operate or use, supports, or is otherwise associated with, machinery.

(d) *Production*—(1) *Definition of produce.* *Produce* is defined as provided in section 263A(g) and § 1.263A-2(a)(1)(i).

(2) *Property produced under a contract*—(i) *Customer.* A taxpayer is treated as producing any property that is produced for the taxpayer (the customer) by another party (the contractor) under a contract with the taxpayer or an intermediary. Property produced under a contract is designated property to the customer if it is real property or tangible personal property that satisfies the classification thresholds described in paragraph (b)(1)(ii) of this section. If property produced under a contract will become part of a unit of designated property produced by the customer in the customer's hands, the property produced under the contract is designated property to the customer.

(ii) *Contractor.* Property produced under a contract is designated property to the contractor if it is real property, 2-year property, or 1-year property and the property produced under the contract is not excluded by reason of paragraph (d)(2)(v) of this section.

(iii) *Definition of a contract.* For purposes of this paragraph (d)(2), *contract* has the same meaning as under § 1.263A-2(a)(1)(ii)(B)(2).

(iv) *Determination of whether thresholds are satisfied.* In the case of tangible personal property produced under a contract, the customer and the contractor each determine under this paragraph (d)(2), whether the property satisfies the classification thresholds described in paragraph (b)(1)(ii) of this section. Thus, tangible personal property may be designated property with respect to either, or both, the customer and the contractor. The provisions of paragraph (b)(2)(iii) of this section are modified as set forth in this paragraph (d)(2)(iv) for purposes of determining whether tangible personal property produced under a contract is 2-year property or 1-year property.

(A) *Customer.* In determining a customer's estimated cost of production, the customer takes into account costs and payments that are reasonably expected to be incurred by the customer, but does not take into account costs incurred (or to be incurred) by an unrelated contractor. In determining the customer's estimated length of the production period, the production period is treated as beginning on the earlier of the date the contract is executed or the date that the customer's accumulated production expenditures for the unit are at least 5 percent of the customer's total estimated production expenditures for the unit. The customer, however, may elect to treat the production period as beginning on the date the sum of the accumulated production expenditures of the contractor (or contractors if more than one contractor is producing components for the unit of property) and of the customer are at least 5 percent of the customer's estimated production expenditures for the unit.

(B) *Contractor.* In determining a contractor's estimated cost of production, the contractor takes into account only the costs that are reasonably expected to be incurred by the contractor, without any reduction for payments from the customer. In determining the contractor's estimated length of the production period, the production period is treated as beginning on the date the contractor's accumulated production expenditures (without any reduction for payments from the customer) are at least 5 percent of the contractor's total

estimated accumulated production expenditures.

(v) *Exclusion for property subject to long-term contract rules.* Property described in paragraph (b) of this section is designated property with respect to a contractor only if—

(A) The contract is not a long-term contract (within the meaning of section 460(f)); or

(B) The contract is a home construction contract (within the meaning of section 460(e)(6)(A)) with respect to which the requirements of section 460(e)(1)(B) (i) and (ii) are not met.

(3) *Improvements to existing property—*

(i) *In general.* Any improvement to property described in § 1.263(a)-1(b) constitutes the production of property. Generally, any improvement to designated property constitutes the production of designated property. An improvement is not treated as the production of designated property, however, if the de minimis exception described in paragraph (b)(4) of this section applies to the improvement. In addition, paragraph (d)(3)(iii) of this section provides an exception for certain improvements to tangible personal property. Incidental maintenance and repairs are not treated as improvements under this paragraph (d)(3). See § 1.162-4.

(ii) *Real property.* The rehabilitation or preservation of a standing building, the clearing of raw land prior to sale, and the drilling of an oil well are activities constituting improvements to real property and, therefore, the production of designated property. Similarly, the demolition of a standing building generally constitutes an activity that is an improvement to real property and, therefore, the production of designated property. See the exceptions, however, in paragraphs (b)(3) and (b)(4) of this section.

(iii) *Tangible personal property.* If the taxpayer has treated a unit of tangible personal property as designated property under this section, an improvement to such property constitutes the production of designated property regardless of the remaining useful life of the improved property (or the improvement) and, except as provided in paragraph (b)(4) of this section, regardless of the estimated length of the production period or the estimated cost of the

improvement. If the taxpayer has not treated a unit of tangible personal property as designated property under this section, an improvement to such property constitutes the production of designated property only if the improvement independently meets the classification thresholds described in paragraph (b)(1)(ii) of this section.

[T.D. 8584, 59 FR 67198, Dec. 29, 1994; 60 FR 16574, Mar. 31, 1995]

§ 1.263A-9 The avoided cost method.

(a) *In general*—(1) *Description*. The avoided cost method described in this section must be used to calculate the amount of interest required to be capitalized under section 263A(f). Generally, any interest that the taxpayer theoretically would have avoided if accumulated production expenditures (as defined in § 1.263A-11) had been used to repay or reduce the taxpayer's outstanding debt must be capitalized under the avoided cost method. The application of the avoided cost method does not depend on whether the taxpayer actually would have used the amounts expended for production to repay or reduce debt. Instead, the avoided cost method is based on the assumption that debt of the taxpayer would have been repaid or reduced without regard to the taxpayer's subjective intentions or to restrictions (including legal, regulatory, contractual, or other restrictions) against repayment or use of the debt proceeds.

(2) *Overview*—(i) *In general*. For each unit of designated property (within the meaning of § 1.263A-8(b)), the avoided cost method requires the capitalization of—

(A) The traced debt amount under paragraph (b) of this section, and

(B) The excess expenditure amount under paragraph (c) of this section.

(ii) *Rules that apply in determining amounts*. The traced debt and excess expenditure amounts are determined for each taxable year or shorter computation period that includes the production period (as defined in § 1.263A-12) of a unit of designated property. Paragraph (d) of this section provides an election not to trace debt to specific units of designated property. Paragraph (f) of this section provides rules for selecting the computation period,

for calculating averages, and for determining measurement dates within the computation period. Special rules are in paragraph (g) of this section.

(3) *Definitions of interest and incurred*. Except as provided in the case of certain expenses that are treated as a substitute for interest under paragraphs (c)(2)(iii) and (g)(2)(iv) of this section, *interest* refers to all amounts that are characterized as interest expense under any provision of the Code, including, for example, sections 482, 483, 1272, 1274, and 7872. *Incurred* refers to the amount of interest that is properly accruable during the period of time in question determined by taking into account the loan agreement and any applicable provisions of the Internal Revenue laws and regulations such as section 163, § 1.446-2, and sections 1271 through 1275.

(4) *Definition of eligible debt*. Except as provided in this paragraph (a)(4), *eligible debt* includes all outstanding debt (as evidenced by a contract, bond, debenture, note, certificate, or other evidence of indebtedness). Eligible debt does not include—

(i) Debt (or the portion thereof) bearing interest that is disallowed under a provision described in § 1.163-8T(m)(7)(ii);

(ii) Debt, such as accounts payable and other accrued items, that bears no interest, except to the extent that such debt is traced debt (as defined in paragraph (b)(2) of this section);

(iii) Debt that is borrowed directly or indirectly from a person related to the taxpayer and that bears a rate of interest that is less than the applicable Federal rate in effect under section 1274(d) on the date of issuance;

(iv) Debt (or the portion thereof) bearing personal interest within the meaning of section 163(h)(2);

(v) Debt (or the portion thereof) bearing qualified residence interest within the meaning of section 163(h)(3);

(vi) Debt incurred by an organization that is exempt from Federal income tax under section 501(a), except to the extent interest on such debt is directly attributable to an unrelated trade or business of the organization within the meaning of section 512;

(vii) Reserves, deferred tax liabilities, and similar items that are not treated as debt for Federal income tax

purposes, regardless of the extent to which the taxpayer's applicable financial accounting or other regulatory reporting principles require or support treating these items as debt;

(viii) Federal, State, and local income tax liabilities, deferred tax liabilities under section 453A, and hypothetical tax liabilities under the look-back method of section 460(b) or similar provisions; and

(ix) A purchase money obligation given by the lessor to the lessee (or a party that is related to the lessee) in a sale and leaseback transaction involving an agreement qualifying as a lease under § 5c.168(f)(8)-1 through § 5c.168(f)(8)-11 of this chapter. See § 5c.168(f)(8)-1(e) *Example* (2) of this chapter.

(b) *Traced debt amount*—(1) *General rule.* Interest must be capitalized with respect to a unit of designated property in an amount (the traced debt amount) equal to the total interest incurred on the traced debt during each measurement period (as defined in paragraph (f)(2)(ii) of this section) that ends on a measurement date described in paragraph (f)(2)(iii) of this section. See the example in paragraph (b)(3) of this section. If any interest incurred on the traced debt is not taken into account for the taxable year that includes the measurement period because of a deferral provision, see paragraph (g)(2) of this section for the time and manner for capitalizing and recovering that amount. This paragraph (b)(1) does not apply if the taxpayer elects under paragraph (d) of this section not to trace debt.

(2) *Identification and definition of traced debt.* On each measurement date described in paragraph (f)(2)(iii) of this section, the taxpayer must identify debt that is traced debt with respect to a unit of designated property. On each such date, traced debt with respect to a unit of designated property is the outstanding eligible debt (as defined in paragraph (a)(4) of this section) that is allocated, on that date, to accumulated production expenditures with respect to the unit of designated property under the rules of § 1.163-8T. Traced debt also includes unpaid interest that has been capitalized with respect to such unit under paragraph (b)(1) of this

section and that is included in accumulated production expenditures on the measurement date.

(3) *Example.* The provisions of paragraphs (b)(1) and (b)(2) of this section are illustrated by the following example.

Example. Corporation X, a calendar year taxpayer, is engaged in the production of a single unit of designated property during 1995 (unit A). Corporation X adopts a taxable year computation period and quarterly measurement dates. Production of unit A starts on January 14, 1995, and ends on June 16, 1995. On March 31, 1995 and on June 30, 1995, Corporation X has outstanding a \$1,000,000 loan that is allocated under the rules of § 1.163-8T to production expenditures with respect to unit A. During the period January 1, 1995, through June 30, 1995, Corporation X incurs \$50,000 of interest related to the loan. Under paragraph (b)(1) of this section, the \$50,000 of interest Corporation X incurs on the loan during the period January 1, 1995, through June 30, 1995, must be capitalized with respect to unit A.

(c) *Excess expenditure amount*—(1) *General rule.* If there are accumulated production expenditures in excess of traced debt with respect to a unit of designated property on any measurement date described in paragraph (f)(2)(iii) of this section, the taxpayer must, for the computation period that includes the measurement date, capitalize with respect to this unit the excess expenditure amount calculated under this paragraph (c)(1). However, if the sum of the excess expenditure amounts for all units of designated property of a taxpayer exceeds the total interest described in paragraph (c)(2) of this section, only a prorata amount (as determined under paragraph (c)(7) of this section) of such interest must be capitalized with respect to each unit. For each unit of designated property, the excess expenditure amount for a computation period equals the product of—

(i) The average excess expenditures (as determined under paragraph (c)(5)(ii) of this section) for the unit of designated property for that period, and

(ii) The weighted average interest rate (as determined under paragraph (c)(5)(iii) of this section) for that period.

(2) *Interest required to be capitalized.* With respect to an excess expenditure amount, interest incurred during the computation period is capitalized from the following sources and in the following sequence but not in excess of the excess expenditure amount for all units of designated property:

(i) Interest incurred on nontraced debt (as defined in paragraph (c)(5)(i) of this section);

(ii) Interest incurred on borrowings described in paragraph (a)(4)(iii) of this section (relating to certain borrowings from related persons); and

(iii) In the case of a partnership, guaranteed payments for the use of capital (within the meaning of section 707(c)) that would be deductible by the partnership if section 263A(f) did not apply.

(3) *Example.* The provisions of paragraph (c)(1) and (2) of this section are illustrated by the following example.

Example. (i) P, a partnership owned equally by Corporation A and Individual B, is engaged in the construction of an office building during 1995. Average excess expenditures for the office building for 1995 are \$2,000,000. When P was formed, A and B agreed that A would be entitled to an annual guaranteed payment of \$70,000 in exchange for A's capital contribution. The only borrowing of P, A, and B for 1995 is a loan to P from an unrelated lender of \$1,000,000 (loan #1). The loan is nontraced debt and bears interest at an annual rate of 10 percent. Thus, P's weighted average interest rate (determined under paragraph (c)(5)(iii) of this section) is 10 percent and interest incurred during 1995 is \$100,000.

(ii) In accordance with paragraph (c)(1) of this section, the excess expenditure amount is \$200,000 (\$2,000,000 × 10%). The interest capitalized under paragraph (c)(2) of this section is \$170,000 (\$100,000 of interest plus \$70,000 of guaranteed payments).

(4) *Treatment of interest subject to a deferral provision.* If any interest described in paragraph (c)(2) of this section is not taken into account for the taxable year that includes the computation period because of a deferral provision described in paragraph (g)(1)(ii) of this section, paragraph (c)(2) of this section is first applied without regard to the amount of the deferred interest. After applying paragraph (c)(2) without regard to the deferred interest, if the amount of interest capitalized with respect to all units

of designated property for the computation period is less than the amount that would have been capitalized if a deferral provision did not apply, see paragraph (g)(2) of this section for the time and manner for capitalizing and recovering the difference (the shortfall amount).

(5) *Definitions—(i) Nontraced debt—(A) Defined.* *Nontraced debt* means all eligible debt on a measurement date other than any debt that is treated as traced debt with respect to any unit of designated property on that measurement date. For example, nontraced debt includes eligible debt that is allocated to expenditures that are not capitalized under section 263A(a) (e.g., expenditures deductible under section 174(a) or 263(c)). Similarly, even if eligible debt is allocated to a production expenditure for a unit of designated property, the debt is included in nontraced debt on measurement dates before the first or after the last measurement date for that unit of designated property. Thus, nontraced debt may include debt that was previously treated as traced debt or that will be treated as traced debt on a future measurement date.

(B) *Example.* The provisions of paragraph (c)(5)(i)(A) of this section are illustrated by the following example.

Example. In 1995, Corporation X begins, but does not complete, the construction of two office buildings that are separate units of designated property as defined in § 1.263A-10 (Property D and Property E). At the beginning of 1995, X borrows \$2,500,000 (the \$2,500,000 loan), which will be used exclusively to finance production expenditures for Property D. Although interest is paid currently, the entire principal amount of the loan remains outstanding at the end of 1995. Corporation X also has outstanding during all of 1995 a long-term loan with a principal amount of \$2,000,000 (the \$2,000,000 loan). The proceeds of the \$2,000,000 loan were used exclusively to finance the production of Property C, a unit of designated property that was completed in 1994. Under the rules of paragraph (b)(2) of this section, the portion of the \$2,500,000 loan allocated to accumulated production expenditures for property D at each measurement date during 1995 is treated as traced debt for that measurement date. The excess, if any, of \$2,500,000 over the amount treated as traced debt at each measurement date during 1995 is treated as nontraced debt for that measurement date, even though it is expected that the entire \$2,500,000 will be treated as traced debt with

respect to Property D on subsequent measurement dates as more of the proceeds of the loan are used to finance additional production expenditures. In addition, the entire principal amount of the \$2,000,000 loan is treated as nontraced debt for 1995, even though it was treated as traced debt with respect to Property C in a previous period.

(ii) *Average excess expenditures*—(A) *General rule.* The average excess expenditures for a unit of designated property for a computation period are computed by—

(1) Determining the amount (if any) by which accumulated production expenditures exceed traced debt at each measurement date during the computation period; and

(2) Dividing the sum of these amounts by the number of measurement dates during the computation period.

(B) *Example.* The provisions of paragraph (c)(5)(ii)(A) of this section are illustrated by the following example.

Example. Corporation X, a calendar year taxpayer, is engaged in the production of a single unit of designated property during 1995 (unit A). Corporation X adopts the taxable year as the computation period and quarterly measurement dates. The production period for unit A begins on January 14, 1995, and ends on June 16, 1995. On March 31, 1995, and on June 30, 1995, Corporation X has outstanding \$1,000,000 of traced debt with respect to unit A. Accumulated production expenditures for unit A on March 31, 1995, are \$1,400,000 and on June 30, 1995, are \$1,600,000. Accumulated production expenditures in excess of traced debt for unit A on March 31, 1995, are \$400,000 and on June 30, 1995, are \$600,000. Average excess expenditures for unit A during 1995 are therefore \$250,000 $(\$400,000 + \$600,000 + \$0 + \$0) \div 4$.

(iii) *Weighted average interest rate*—(A) *Determination of rate.* The weighted average interest rate for a computation period is determined by dividing interest incurred on nontraced debt during the period by average nontraced debt for the period.

(B) *Interest incurred on nontraced debt.* Interest incurred on nontraced debt during the computation period is equal to the total amount of interest incurred during the computation period on all eligible debt minus the amount of interest incurred during the computation period on traced debt. Thus, all interest incurred on nontraced debt during the computation period is in-

cluded in the numerator of the weighted average interest rate, even if the underlying nontraced debt is repaid before the end of a measurement period and excluded from nontraced debt outstanding for measurement dates after repayment, in determining the denominator of the weighted average interest rate. However, see paragraph (g)(7) of this section for an election to treat eligible debt that is repaid within the 15-day period immediately preceding a quarterly measurement date as outstanding on that measurement date. See paragraph (a)(3) of this section for the definitions of interest and incurred.

(C) *Average nontraced debt.* The average nontraced debt for a computation period is computed by—

(1) Determining the amount of nontraced debt outstanding on each measurement date during the computation period; and

(2) Dividing the sum of these amounts by the number of measurement dates during the computation period.

(D) *Special rules if taxpayer has no nontraced debt or rate is contingent.* If the taxpayer does not have nontraced debt outstanding during the computation period, the weighted average interest rate for purposes of applying paragraphs (c)(1) and (c)(2) of this section is the highest applicable Federal rate in effect under section 1274(d) during the computation period. If interest is incurred at a rate that is contingent at the time the return for the year that includes the computation period is filed, the amount of interest is determined using the higher of the fixed rate of interest (if any) on the underlying debt or the applicable Federal rate in effect under section 1274(d) on the date of issuance.

(6) *Examples.* The following examples illustrate the principles of this paragraph (c):

Example 1. (i) W, a calendar year taxpayer, is engaged in the production of a unit of designated property during 1995. For purposes of applying the avoided cost method of this section, W uses the taxable year as the computation period. During 1995, W's only debt is a \$1,000,000 loan bearing interest at a rate of 7 percent from Y, a person that is related to W. Assuming the applicable Federal rate in effect under section 1274(d) on the date of issuance of the loan is 10 percent, the loan is

not eligible debt under paragraph (a)(4) of this section. However, even though W has no eligible debt, W incurs \$70,000 ($\$1,000,000 \times 7\%$) of interest during the computation period. This interest is described in paragraph (c)(2) of this section and must be capitalized under paragraph (c)(1) of this section to the extent it does not exceed W's excess expenditure amount for the unit of property.

(ii) W determines, under paragraph (c)(5)(ii) of this section, that average excess expenditures for the unit of property are \$600,000. Assuming the highest applicable Federal rate in effect under section 1274(d) during the computation period is 10 percent, W uses 10 percent as the weighted average interest rate for purposes of determining the excess expenditure amount. See paragraph (c)(5)(iii)(D) of this section. In accordance with paragraph (c)(1) of this section, the excess expenditure amount is therefore \$60,000. Because this amount does not exceed the total amount of interest described in paragraph (c)(2) of this section (\$70,000), W is required to capitalize \$60,000 of interest with respect to the unit of designated property for the 1995 computation period.

Example 2. (i) Corporation X, a calendar year taxpayer, is engaged in the production of a single unit of designated property during 1955 (unit A). Corporation X adopts the taxable year as the computation period and quarterly measurement dates. Production of unit A begins in 1994 and ends on June 30, 1995. On March 31, 1995, and on June 30, 1995, Corporation X has outstanding \$1,000,000 of eligible debt (loan #1) that is allocated under the rules of § 1.163-8T to production expenditures for unit A. During each of the first two quarters of 1995, \$30,000 of interest is incurred on loan #1. The loan is repaid on July 1, 1995. Throughout 1995, Corporation X also has outstanding \$2,000,000 of eligible debt (loan #2) which is not allocated under the rules of § 1.163-8T to the production of unit A. During 1995, \$200,000 of interest is incurred on this nontraced debt. Accumulated production expenditures on March 31, 1995, are \$1,400,000 and on June 30, 1995, are \$1,600,000. Accumulated production expenditures in excess of traced debt on March 31, 1995, are \$400,000 and on June 30, 1995, are \$600,000.

(ii) Under paragraph (b)(1) of this section, the amount of interest capitalized with respect to traced debt is \$60,000 (\$30,000 for the measurement period ending March 31, 1995, and \$30,000 for the measurement period ending June 30, 1995). Under paragraph (c)(5)(ii) of this section, average excess expenditures for unit A are \$250,000 ($[(\$1,400,000 - \$1,000,000) + (\$1,600,000 - \$1,000,000) + \$0 + \$0] \div 4$). Under paragraph (c)(5)(iii)(C) of this section, average nontraced debt is \$2,000,000 ($[\$2,000,000 + \$2,000,000 + \$2,000,000 + \$2,000,000] \div 4$). Under paragraph (c)(5)(iii)(B) of this section, interest incurred on nontraced debt is \$200,000 (\$260,000 of interest incurred on all eligible

debt less \$60,000 of interest incurred on traced debt). Under paragraph (c)(5)(iii)(A) of this section, the weighted average interest rate is 10 percent ($\$200,000 \div \$2,000,000$). Under paragraph (c)(1) of this section, Corporation X capitalizes the excess expenditure amount of \$25,000 ($\$250,000 \times 10\%$), because it does not exceed the total amount of interest subject to capitalization under paragraph (c)(2) of this section (\$200,000). Thus, the total interest capitalized with respect to unit A during 1995 is \$85,000 (\$60,000 + \$25,000).

(7) *Special rules where the excess expenditure amount exceeds incurred interest—*(i) *Allocation of total incurred interest to units.* For a computation period in which the sum of the excess expenditure amounts under paragraph (c)(1) of this section for all units of designated property exceeds the total amount of interest (including deferred interest) available for capitalization, as determined under paragraph (c)(2) of this section, the amount of interest that is allocated to a unit of designated property is equal to the product of—

(A) The total amount of interest (including deferred interest) available for capitalization, as determined under paragraph (c)(2) of this section; and

(B) A fraction, the numerator of which is the average excess expenditures for the unit of designated property and the denominator of which is the sum of the average excess expenditures for all units of designated property.

(ii) *Application of related person rules to average excess expenditure.* Certain excess expenditures must be taken into account by the persons (if any) required to capitalize interest with respect to production expenditures of the taxpayer under applicable related person rules. For each computation period, the amount of average excess expenditures that must be taken into account by such persons for each unit of the taxpayer's property is computed by—

(A) Determining, for the computation period, the amount (if any) by which the excess expenditure amount for the unit exceeds the amount of interest allocated to the unit under paragraph (c)(7)(i) of this section; and

(B) Dividing the excess by the weighted average interest rate for the period.

(iii) *Special rule for corporations.* If a corporation is related to another person for the purposes of the applicable related party rules, the District Director upon examination may require that the corporation apply this paragraph (c)(7) and other provisions of the regulations by excluding deferred interest from the total interest available for capitalization.

(d) *Election not to trace debt*—(1) *General rule.* Taxpayers may elect not to trace debt. If the election is made, the average excess expenditures and weighted average interest rate under paragraph (c)(5) of this section are determined by treating all eligible debt as nontraced debt. For this purpose, debt specified in paragraph (a)(4)(ii) of this section (e.g., accounts payable) may be included in eligible debt, provided it would be treated as traced debt but for an election under this paragraph (d). The election not to trace debt is a method of accounting that applies to the determination of capitalized interest for all designated property of the taxpayer. The making or revocation of the election is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and § 1.446-1(e).

(2) *Example.* The provisions of paragraph (d)(1) of this section are illustrated by the following example.

Example. (i) Corporation X, a calendar year taxpayer, is engaged in the production of a single unit of designated property during 1995 (unit A). Corporation X adopts the taxable year as the computation period and quarterly measurement dates. At each measurement date (March 31, June 30, September 30, and December 31) Corporation X has the following outstanding indebtedness:

| | |
|--|-----------|
| Noninterest-bearing accounts payable traced to unit A | \$100,000 |
| Noninterest-bearing accounts payable that are not traced to unit A | \$300,000 |
| Interest-bearing loans that are eligible debt within the meaning of paragraph (a)(4) of this section | \$900,000 |

(ii) Corporation X elects under this paragraph (d) not to trace debt. Eligible debt at each measurement date for purposes of calculating the weighted average interest rate under paragraph (c)(5)(iii) of this section is \$1,000,000 (\$100,000 + \$900,000).

(e) *Election to use external rate*—(1) *In general.* An eligible taxpayer may elect to use the highest applicable Federal rate (AFR) under section 1274(d) in effect during the computation period

plus 3 percentage points (AFR plus 3) as a substitute for the weighted average interest rate determined under paragraph (c)(5)(iii) of this section. A taxpayer that makes this election may not trace debt. The use of the AFR plus 3 as provided under this paragraph (e)(1) constitutes a method of accounting. A taxpayer makes the election to use the AFR plus 3 method by using the AFR plus 3 as the taxpayer's weighted average interest rate, and any change to the AFR plus 3 method by a taxpayer that has never previously used the method does not require the consent of the Commissioner. Any other change to or from the use of the AFR plus 3 method under this paragraph (e)(1) (other than by reason of a taxpayer ceasing to be an eligible taxpayer) is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and § 1.446-1(e). All changes to or from the AFR plus 3 method are effected on a cut-off basis.

(2) *Eligible taxpayer.* A taxpayer is an eligible taxpayer for a taxable year for purposes of this paragraph (e) if the average annual gross receipts of the taxpayer for the three previous taxable years do not exceed \$10,000,000 (the \$10,000,000 gross receipts test) and the taxpayer has met the \$10,000 gross receipts for all prior taxable years beginning after December 31, 1994. For purposes of this paragraph (e)(2), the principles of section 263A(b)(2)(B) and (C) and § 1.263A-3(b) apply in determining whether a taxpayer is an eligible taxpayer for a taxable year.

(f) *Selection of computation period and measurement dates and application of averaging conventions*—(1) *Computation period*—(i) *In general.* A taxpayer may (but is not required to) make the avoided cost calculation on the basis of a full taxable year. If the taxpayer uses the taxable year as the computation period, a single avoided cost calculation is made for each unit of designated property for the entire taxable year. If the taxpayer uses a computation period that is shorter than the full taxable year, an avoided cost calculation is

made for each unit of designated property for each shorter computation period within the taxable year. If the taxpayer uses a shorter computation period, the computation period may not include portions of more than one taxable year and, except as provided in the case of short taxable years, each computation period within a taxable year must be the same length. In the case of a short taxable year, a taxpayer may treat a period shorter than the taxpayer's regular computation period as the first or last computation period, or as the only computation period for the year if the year is shorter than the taxpayer's regular computation period. A taxpayer must use the same computation periods for all designated property produced during a single taxable year.

(ii) *Method of accounting.* The choice of a computation period is a method of accounting. Any change in the computation period is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and § 1.446-1(e).

(iii) *Production period beginning or ending during the computation period.* The avoided cost method applies to the production of a unit of designated property on the basis of a full computation period, regardless of whether the production period for the unit of designated property begins or ends during the computation period.

(2) *Measurement dates*—(i) *In general.* If a taxpayer uses the taxable year as the computation period, measurement dates must occur at quarterly or more frequent regular intervals. If the taxpayer uses computation periods that are shorter than the taxable year, measurement dates must occur at least twice during each computation period and at least four times during the taxable year (or consecutive 12-month period in the case of a short taxable year). The taxpayer must use the same measurement dates for all designated property produced during a computation period. Except in the case of a computation period that differs from the taxpayer's regular computation period by reason of a short taxable year (see paragraph (f)(1)(i) of this section), measurement dates must occur at equal intervals during each computation period that falls within a single

taxable year. For any computation period that differs from the taxpayer's regular computation period by reason of a short taxable year, the measurement dates used by the taxpayer during that period must be consistent with the principles and purposes of section 263A(f). A taxpayer is permitted to modify the frequency of measurement dates from year to year.

(ii) *Measurement period.* For purposes of this section, *measurement period* means the period that begins on the first day following the preceding measurement date and that ends on the measurement date.

(iii) *Measurement dates on which accumulated production expenditures must be taken into account.* The first measurement date on which accumulated production expenditures must be taken into account with respect to a unit of designated property is the first measurement date following the beginning of the production period for the unit of designated property. The final measurement date on which accumulated production expenditures with respect to a unit of designated property must be taken into account is the first measurement date following the end of the production period for the unit of designated property. Accumulated production expenditures with respect to a unit of designated property must also be taken into account on all intervening measurement dates. See § 1.263A-12 to determine when the production period begins and ends.

(iv) *More frequent measurement dates.* When in the opinion of the District Director more frequent measurement dates are necessary to determine capitalized interest consistent with the principles and purposes of section 263A(f) for a particular computation period, the District Director may require the use of more frequent measurement dates. If a significant segment of the taxpayer's production activities (the first segment) requires more frequent measurement dates than another significant segment of the taxpayer's production activities, the taxpayer may request a ruling from the Internal Revenue Service permitting, for a taxable year and all subsequent taxable years, a segregation of the two segments and, notwithstanding paragraph (f)(2)(i) of

this section, the use of the more frequent measurement dates for only the first segment. The request for a ruling must be made in accordance with any applicable rules relating to submissions of ruling requests. The request must be filed on or before the due date (including extensions) of the original Federal income tax return for the first taxable year to which it will apply.

(3) *Examples.* The following examples illustrate the principles of this paragraph (f):

Example 1. Corporation X, a calendar year taxpayer, is engaged in the production of designated property during 1995. Corporation X adopts the taxable year as the computation period and quarterly measurement dates. Corporation X must identify traced debt, accumulated production expenditures, and nontraced debt at each quarterly measurement date (March 31, June 30, September 30, and December 31). Under paragraph (c)(5)(ii) of this section, Corporation X must calculate average excess expenditures for each unit of designated property by determining the amount by which accumulated production expenditures exceed traced debt for each unit at the end of each quarter and dividing the sum of these amounts by four. Under paragraph (c)(5)(iii)(C) of this section, Corporation X must calculate average nontraced debt by determining the amount of nontraced debt outstanding at the end of each quarter and dividing the sum of these amounts by four.

Example 2. Corporation X, a calendar year taxpayer, is engaged in the production of

designated property during 1995. Corporation X adopts a 6-month computation period with two measurement dates within each computation period. Corporation X must identify traced debt, accumulated production expenditures, and nontraced debt at each measurement date (March 31 and June 30 for the first computation period and September 30 and December 31 for the second computation period). Under paragraph (c)(5)(ii) of this section, Corporation X must, for each computation period, calculate average excess expenditures for each unit of designated property by determining the amount by which accumulated production expenditures exceed traced debt for each unit at each measurement date during the period and dividing the sum of these amounts by two. Under paragraph (c)(5)(iii)(C) of this section, Corporation X must calculate average nontraced debt for each computation period by determining the amount of nontraced debt outstanding at each measurement date during the period and dividing the sum of these amounts by two.

Example 3. (i) Corporation X, a calendar year taxpayer, is engaged in the production of two units of designated property during 1995. Production of Unit A starts in 1994 and ends on June 20, 1995. Production of Unit B starts on April 15, 1995, but does not end until 1996. Corporation X adopts the taxable year as its computation period and does not elect under paragraph (d) of this section not to trace debt. Corporation X uses quarterly measurement dates and pays all interest on eligible debt in the quarter in which the interest is incurred. During 1995, Corporation X has two items of eligible debt. The debt and the manner in which it is used are as follows:

| No. | Principal | Annual rate (percent) | Period outstanding | Use of proceeds |
|---------|-------------|-----------------------|--------------------|-----------------|
| 1 | \$1,000,000 | 9 | 1/01-9/01 | Unit A. |
| 2 | 2,000,000 | 11 | 6/01-12/31 | Nontraced. |

(ii) Based on the annual 9 percent rate of interest, Corporation X incurs \$7,500 of interest during each month that Loan #1 is outstanding.

(iii) Accumulated production expenditures at the end of each quarter during 1995 are as follows:

| Measurement date | Unit A | Unit B |
|------------------|-------------|-----------|
| March 31 | \$1,200,000 | \$0 |
| June 30 | 1,800,000 | 500,000 |
| Sept. 30 | 0 | 1,000,000 |
| Dec. 31 | 0 | 1,600,000 |

(iv) Corporation X must first determine the amount of interest incurred on traced debt and capitalize the interest incurred on

this debt (the traced debt amount). Loan #1 is allocated to Unit A on the March 31 and June 30 measurement dates. Accordingly, Loan #1 is treated as traced debt with respect to unit A for the measurement periods beginning January 1 and ending June 30. The interest incurred on Loan #1 during the period that Loan #1 is treated as traced debt must be capitalized with respect to Unit A. Thus, \$45,000 (\$7,500 per month for 6 months) is capitalized with respect to Unit A.

(v) Second, Corporation X must determine average excess expenditures for Unit A and Unit B. For Unit A, this amount is \$250,000 $(\$200,000 + \$800,000 + \$0 + \$0) \div 4$. For Unit B, this amount is \$775,000 $(\$0 + \$500,000 + \$1,000,000 + \$1,600,000) \div 4$.

(vi) Third, Corporation X must determine the weighted average interest rate and apply that rate to the average excess expenditures for Units A and B. The rate is equal to the total amount of interest incurred on non-traced debt (i.e., interest incurred on all eligible debt reduced by interest incurred on traced debt) divided by the average non-traced debt. The interest incurred on non-traced debt equals \$143,333 $(\$1,000,000 \times 9\% \times \frac{1}{12} + \$2,000,000 \times 11\% \times \frac{7}{12} - \$45,000)$. The average nontraced debt equals \$1,500,000 $(\$0 + \$2,000,000 + \$2,000,000 + \$2,000,000) \div 4$. The weighted average interest rate of 9.56 percent $(\$143,333 \div \$1,500,000)$, is then applied to average excess expenditures for Units A and B. Accordingly, Corporation X capitalizes an additional \$23,900 $(\$250,000 \times 9.56\%)$ with respect to Unit A and \$74,090 $(\$775,000 \times 9.56\%)$ with respect to Unit B (the excess expenditure amounts).

(g) *Special rules*—(1) *Ordering rules*—(i) *Provisions preempted by section 263A(f)*. Interest must be capitalized under section 263A(f) before the application of section 163(d) (regarding the investment interest limitation), section 163(j) (regarding the limitation on interest paid to a tax-exempt related person), section 266 (regarding the election to capitalize carrying charges), section 469 (regarding the limitation on passive losses), and section 861 (regarding the allocation of interest to United States sources). Any interest that is capitalized under section 263A(f) is not taken into account as interest under those sections. However, in applying section 263A(f) with respect to the excess expenditure amount, the taxpayer must capitalize all interest that is neither investment interest under section 163(d), exempt related person interest under section 163(j), nor passive interest under section 469 before capitalizing any interest that is either investment interest, exempt related person interest, or passive interest. Any interest that is not required to be capitalized after the application of section 263A(f) is then taken into account as interest subject to sections 163(d), 163(j), 266, 469, and 861. If, after the application of section 263A(f), interest is deferred under sections 163(d), 163(j), 266, or 469, that interest is not subject to capitalization under section 263A(f) in any subsequent taxable year.

(ii) *Deferral provisions applied before this section*. Interest (including contingent interest) that is subject to a deferral

provision described in this paragraph (g)(1)(ii) is subject to capitalization under section 263A(f) only in the taxable year in which it would be deducted if section 263A(f) did not apply. Deferral provisions include sections 163(e)(3), 267, 446, and 461, and all other deferral or limitation provisions that are not described in paragraph (g)(1)(i) of this section. In contrast to the provisions of paragraph (g)(1)(i) of this section, deferral provisions are applied before the application of section 263A(f).

(2) *Application of section 263A(f) to deferred interest*—(i) *In general*. This paragraph (g)(2) describes the time and manner of capitalizing and recovering the deferral amount. The deferral amount for any computation period equals the sum of—

(A) The amount of interest that is incurred on traced debt that is deferred during the computation period and is not deductible for the taxable year that includes the computation period because of a deferral provision described in paragraph (g)(1)(ii) of this section, and

(B) The shortfall amount described in paragraph (c)(4) of this section.

(ii) *Capitalization of deferral amount*. The rules described in paragraph (g)(2)(iii) of this section apply to the deferral amount unless the taxpayer elects under paragraph (g)(2)(iv) of this section to capitalize substitute costs.

(iii) *Deferred capitalization*. If the taxpayer does not elect under paragraph (g)(2)(iv) of this section to capitalize substitute costs, deferred interest to which the deferral amount is attributable (determined under any reasonable method) is capitalized in the year or years in which the deferred interest would have been deductible but for the application of section 263A(f) (the capitalization year). For this purpose, any interest that is deferred from a prior computation period is taken into account in subsequent capitalization years in the same order in which the interest was deferred. If a unit of designated property to which previously deferred interest relates is sold before

the capitalization year, the deferred interest applicable to that unit of property is taken into account in the capitalization year and treated as if recovered from the sale of the property. If the taxpayer continues to hold, throughout the capitalization year, a unit of depreciable property to which previously deferred interest relates, the adjusted basis and applicable recovery percentages for the unit of property are redetermined for the capitalization year and subsequent years so that the increase in basis is accounted for over the remaining recovery periods beginning with the capitalization year. See *Example 2* of paragraph (g)(2)(v) of this section.

(iv) *Substitute capitalization*—(A) *General rule.* In lieu of deferred capitalization under paragraph (g)(2)(iii) of this section, the taxpayer may elect the substitute capitalization method described in this paragraph (g)(2)(iv). Under this method, the taxpayer capitalizes for the computation period in which interest is incurred and deferred (the deferral period) costs that would be deducted but for this paragraph (g)(2)(iv) (substitute costs). The taxpayer must capitalize an amount of substitute costs equal to the deferral amount for each unit of designated property, or if less, a prorata amount (determined in accordance with the principles of paragraph (c)(7)(i) of this section) of the total substitute costs that would be deducted but for this paragraph (g)(2)(iv) during the deferral period. If the entire deferral amount is capitalized pursuant to this paragraph (g)(2)(iv) in the deferral period, any interest incurred and deferred in the deferral period is neither capitalized nor deducted during the deferral period and, unless subsequently capitalized as a substitute cost under this paragraph (g)(2)(iv), is deductible in the appropriate subsequent period without regard to section 263A(f).

(B) *Capitalization of amount carried forward.* If the taxpayer has an insufficient amount of substitute costs in the deferral period, the amount by which substitute costs are insufficient with respect to each unit of designated property is a deferral amount carryforward to succeeding computation periods beginning with the next computation pe-

riod. In any carryforward year, the taxpayer must capitalize an amount of substitute costs equal to the deferral amount carryforward or, if less, a prorata amount (determined in accordance with the principles of paragraph (c)(7)(i) of this section) of the total substitute costs that would be deducted during the carryforward year or years (the carryforward capitalization year) but for this paragraph (g)(2)(iv) (after applying the substitute cost method of this paragraph (g)(2)(iv) to the production of designated property in the carryforward period). If a unit of designated property to which the deferral amount carryforward relates is sold prior to the carryforward capitalization year, substitute costs applicable to that unit of property are taken into account in the carryforward capitalization year and treated as if recovered from the sale of the property. If the taxpayer continues to hold, throughout the capitalization year, a unit of depreciable property to which a deferral amount carryforward relates, the adjusted basis and applicable recovery percentages for the unit of property are redetermined for the carryforward capitalization year and subsequent years so that the increase in basis is accounted for over the remaining recovery periods beginning with the carryforward capitalization year. See *Example 2* of paragraph (g)(2)(v) of this section.

(C) *Method of accounting.* The substitute capitalization method under this paragraph (g)(2)(iv) is a method of accounting that applies to all designated property of the taxpayer. A change to or from the substitute capitalization method is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and § 1.446-1(e).

(v) *Examples.* The following examples illustrate the application of the avoided cost method when interest is subject to a deferral provision:

Example 1. (i) Corporation X is a calendar year taxpayer and uses the taxable year as its computation period. During 1995, X is engaged in the construction of a warehouse which X will use in its storage business. The warehouse is completed and placed in service in December 1995. X's average excess expenditures for 1995 equal \$1,000,000. Throughout 1995, X's only outstanding debt is nontraced

debt of \$900,000 and \$1,200,000, bearing interest at 15 percent and 9 percent, respectively, per year. Of the \$243,000 interest incurred during the year $(\$900,000 \times 15\%) + [\$1,200,000 \times 9\%] = \$135,000 + \$108,000$, \$75,000 is deferred under section 267(a)(2).

(ii) X must first determine the amount of interest required to be capitalized under paragraph (c)(1) of this section for 1995 (the deferral period) without applying section 267(a)(2). The weighted average interest rate is 11.6 percent $(\$135,000 + \$108,000) \div \$2,100,000$, and the excess expenditure amount under paragraph (c)(1) of this section is \$116,000 $(\$1,000,000 \times 11.6\%)$. Under paragraph (c)(4) of this section, X must then determine the amount of interest that would be capitalized by applying paragraph (c)(2) of this section without regard to the amount of deferred interest. Disregarding deferred interest, the amount of interest available for capitalization is \$168,000 $(\$900,000 \times 15\%) + [\$1,200,000 \times 9\%] - \$75,000$. Thus, the full excess expenditure amount (\$116,000) is capitalized from interest that is not deferred under section 267(a)(2) and there is no shortfall amount.

Example 2. (i) The facts are the same as in *Example 1*, except that \$140,000 of interest is deferred under section 267(a)(2) in 1995. The taxpayer does not elect to use the substitute capitalization method. This interest is also deferred in 1996 but would be deducted in 1997 if section 263A(f) did not apply. As in *Example 1*, the excess expenditure amount is \$116,000. However, the amount of interest available for capitalization after excluding the amount of deferred interest is \$103,000 $(\$900,000 \times 15\%) + [\$1,200,000 \times 9\%] - \$140,000$. Thus, only \$103,000 of interest is capitalized with respect to the warehouse in 1995. Since \$116,000 of interest would be capitalized if section 267(a)(2) did not apply, the deferral amount determined under paragraphs (c)(2) and (g)(2)(i) of this section is \$13,000 $(\$116,000 - \$103,000)$, and \$13,000 of deferred interest must be capitalized in the year in which it would be deducted if section 263A(f) did not apply.

(ii) The \$140,000 of interest deferred under section 267(a)(2) in 1995 would be deducted in 1997 if section 263A(f) did not apply. X is therefore required to capitalize an additional \$13,000 of interest with respect to the warehouse in 1997 and must redetermine its basis and recovery percentage.

(3) *Simplified inventory method*—(i) *In general.* This paragraph (g)(3) provides a simplified method of capitalizing interest expense with respect to designated property that is inventory. Under this method, the taxpayer determines beginning and ending inventory and cost of goods sold applying all other capitalization provisions, includ-

ing, for example, the simplified production method of § 1.263A-2(b), but without regard to the capitalization of interest with respect to inventory. The taxpayer must establish a separate capital asset, however, in an amount equal to the aggregate interest capitalization amount (as defined in paragraph (g)(3)(iii)(C) of this section). Under the simplified inventory method, increases in the aggregate interest capitalization amount from one year to the next generally are treated as reductions in interest expense, and decreases in the aggregate interest capitalization amount from one year to the next are treated as increases to cost of goods sold.

(ii) *Segmentation of inventory*—(A) *General rule.* Under the simplified inventory method, the taxpayer first separates its total ending inventory value into segments that are equal to the total ending inventory value divided by the inverse inventory turnover rate. Each inventory segment is then assigned an age starting with one year and increasing by one year for each additional segment. The inverse inventory turnover rate is determined by finding the average of beginning and ending inventory, dividing the average by the cost of goods sold for the year, and rounding the result to the nearest whole number. Beginning and ending inventory amounts are determined using total current cost of inventory for the year (rather than carrying value). Cost of goods sold, however, may be determined using either total current cost or the taxpayer's inventory method. In addition, for purposes of this paragraph (g)(3)(ii), current costs for a year (and, if applicable, the cost of goods sold for the year under the taxpayer's inventory method) are determined without regard to the capitalization of interest with respect to inventory.

(B) *Example.* The provisions of paragraph (g)(3)(ii)(A) of this section are illustrated by the following example.

Example. X, a taxpayer using the FIFO inventory method, determines that total cost of goods sold for 1995 equals \$900, and the cost of both beginning and ending inventory equals \$3,000. Thus, X's inverse inventory turnover rate equals 3 (3.33 rounded to the nearest whole number). Total ending inventory of \$3,000 is divided into three segments

of \$1,000 each. One segment is treated as 3-year-old inventory, one segment is treated as 2-year-old inventory, and one segment is treated as 1-year-old inventory.

(iii) *Aggregate interest capitalization amount*—(A) *Computation period and weighted average interest rate.* If a taxpayer elects the simplified inventory method, the taxpayer must use the taxable year as its computation period and use the weighted average interest rate determined under this paragraph (g)(3)(iii)(A) in determining the aggregate interest capitalization amount defined in paragraph (g)(3)(iii)(C) of this section and in determining the amount of interest capitalized with respect to any designated property that is not inventory. Under the simplified inventory method, the taxpayer determines the weighted average interest rate in accordance with paragraph (c)(5)(iii) of this section, treating all eligible debt (other than debt traced to noninventory property in the case of a taxpayer tracing debt) as nontraced debt (i.e., without tracing debt to inventory). A taxpayer that has elected under paragraph (e) of this section to use an external rate as a substitute for the weighted average interest rate determined under paragraph (c)(5)(iii) of this section uses the rate described in paragraph (e)(1) as the weighted average interest rate.

(B) *Computation of the tentative aggregate interest capitalization amount.* The weighted average interest rate is compounded annually by the number of years assigned to a particular inventory segment to produce an interest factor (applicable interest factor) for that segment. The amounts determined by multiplying the value of each inventory segment by its applicable interest factor are then combined to produce a tentative aggregate interest capitalization amount.

(C) *Coordination with other interest capitalization computations*—(1) *In general.* If the tentative aggregate interest capitalization amount for a year exceeds the aggregate interest capitalization amount (defined in paragraph (g)(3)(iii)(D) of this section) as of the close of the preceding year, then, for purposes of applying the rules of paragraph (c)(7) of this section, the excess is treated as an excess expenditure

amount and the inventory to which the simplified inventory method of this paragraph (g)(3) applies is treated as a single unit of designated property. If, after these modifications, no paragraph (c)(7) interest allocation is necessary (i.e., the excess expenditure amounts for all units of designated property do not exceed the total amount of interest (including deferred interest) available for capitalization), the aggregate interest capitalization amount generally equals the tentative aggregate interest capitalization amount. If, on the other hand, a paragraph (c)(7) allocation is necessary, the tentative aggregate interest capitalization amount is generally adjusted to reflect the results of that allocation (i.e., the increase in the aggregate interest capitalization amount is limited to the amount of interest allocated to inventory, reduced, however, by any substitute costs that are capitalized with respect to inventory under applicable related party rules).

(2) *Deferred interest.* In determining the aggregate interest capitalization amount, the tentative aggregate interest capitalization amount is adjusted (after the application of paragraph (c)(7) of this section) as appropriate to reflect the deferred interest rules of paragraph (g)(2) of this section. The tentative aggregate interest capitalization amount would be reduced, for example, by the amount of a taxpayer's deferred interest for a taxable year unless the taxpayer has elected the substitute capitalization method under paragraph (g)(2)(iv).

(3) *Other coordinating provisions.* The Commissioner may prescribe, by revenue ruling or revenue procedure, additional provisions to coordinate the election and use of the simplified inventory method with other interest capitalization requirements and methods. See § 601.601(d)(2)(ii)(b) of this chapter.

(D) *Treatment of increases or decreases in the aggregate interest capitalization amount.* Except as otherwise provided in this paragraph (g)(3)(iii)(D), increases in the aggregate interest capitalization amount from one year to the next are treated as reductions in interest expense, and decreases in the aggregate interest capitalization

amount from one year to the next are treated as increases to cost of goods sold. To the extent a taxpayer capitalizes substitute costs under either applicable related party rules or the deferred interest rules in paragraph (g)(2) of this section, increases in the aggregate interest capitalization amount are treated as reductions in applicable substitute costs, rather than interest expense.

(E) *Example.* The provisions of this paragraph (g)(3)(iii) are illustrated by the following example.

Example. The facts are the same as in the example in paragraph (g)(3)(ii)(B) of this section, and, in addition, X determines that its weighted average interest rate for 1995 is 10 percent. Additionally, assume that X has no deferred interest in 1995 or 1996 and no deferral amount carryforward to either 1995 or 1996. (See paragraph (g)(2) of this section.) Also assume that no allocation is necessary under paragraph (c)(7) of this section in either 1995 or 1996. Under the rules of paragraph (g)(3)(ii) of this section, X divides ending inventory into segments of \$1,000 each. One segment is 1-year old inventory, one segment is 2-year old inventory, and one segment is 3-year old inventory. Under paragraph (g)(3)(iii)(B) of this section, X must compute the applicable interest factor for each segment. The applicable interest factor for the 1-year old inventory is not compounded. The applicable interest factor for the 2-year old inventory is compounded for 1 year. The applicable interest factor for the 3-year old inventory is compounded for 2 years. The interest factor applied to the 1-year old inventory segment is .1. The interest factor applied to the 2-year old inventory segment is .21 $[(1.1 \times 1.1) - 1]$. The interest factor applied to the 3-year old inventory is .331 $[(1.1 \times 1.1 \times 1.1) - 1]$. Thus, the tentative aggregate interest capitalization amount for 1995 is \$641 $(1,000 \times [.1 + .21 + .331])$. Because X has no deferred interest in 1995, no deferral amount carryforward to 1995, and no required allocation under paragraph (c)(7) of this section in 1995, X's aggregate interest capitalization amount equals its \$641 tentative aggregate interest capitalization amount. If, in 1996, X computes an aggregate interest capitalization amount of \$750, the \$109 increase in the amount from 1995 to 1996 would be treated as a reduction in interest expense for 1996.

(iv) *Method of accounting.* The simplified inventory method is a method of accounting that must be elected for and applied to all inventory within a single trade or business of the taxpayer (within the meaning of section 446(d)

and § 1.446-1(d)). This method may be elected only if the inventory in that trade or business consists only of designated property and only if the taxpayer's inverse inventory turnover rate for that trade or business (as defined in paragraph (g)(3)(ii)(A) of this section) is greater than or equal to one. A change from or to the simplified inventory method is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and § 1.446-1(e).

(4) *Financial accounting method disregarded.* The avoided cost method is applied under this section without regard to any financial or regulatory accounting principles for the capitalization of interest. For example, this section determines the amount of interest that must be capitalized without regard to Financial Accounting Standards Board (FASB) Statement Nos. 34, 71, and 90, issued by the Financial Accounting Standards Board, Norwalk, CT 06856-5116. Similarly, taxpayers are not permitted to net interest income and interest expense in determining the amount of interest that must be capitalized under this section with respect to certain restricted tax-exempt borrowings even though netting is permitted under FASB Statement No. 62.

(5) *Treatment of intercompany transactions—(i) General rule.* If interest capitalized under section 263A(f) by a member of a consolidated group (within the meaning of § 1.1502-1(h)) with respect to a unit of designated property is attributable to a loan from another member of the group (the lending member), the intercompany transaction provisions of the consolidated return regulations do not apply to the lending member's interest income with respect to that loan, except as provided in paragraph (g)(5)(ii) of this section. For this purpose, the capitalized interest expense that is attributable to a loan from another member is determined under any method that reasonably reflects the principles of the avoided cost method, including the traced and nontraced concepts. For purposes of this paragraph (g)(5)(i) and paragraph (g)(5)(ii) of this section, in order for a method to be considered reasonable it must be consistently applied.

(ii) *Special rule for consolidated group with limited outside borrowing.* If, for any year, the aggregate amount of interest income described in paragraph (g)(5)(i) of this section for all members of the group with respect to all units of designated property exceeds the total amount of interest that is deductible for that year by all members of the group with respect to debt of a member owed to nonmembers (group deductible interest) after applying section 263A(f), the intercompany transaction provisions of the consolidated return regulations are applied to the excess, and the amount of interest income that must be taken into account by the group under paragraph (g)(5)(i) of this section is limited to the amount of the group deductible interest. The amount to which the intercompany transaction provisions of the consolidated return regulations apply by reason of this paragraph (g)(5)(ii) is allocated among the lending members under any method that reasonably reflects each member's share of interest income described in paragraph (g)(5)(i) of this section. If a lending member has interest income that is attributable to more than one unit of designated property, the amount to which the intercompany transaction provisions of the consolidated return regulations apply by reason of this paragraph (g)(5)(ii) with respect to the member is allocated among the units in accordance with the principles of paragraph (c)(7)(i) of this section.

(iii) *Example.* The provisions of paragraph (g)(5)(ii) of this section are illustrated by the following example.

Example. (i) P and S1 are the members of a consolidated group. In 1995, S1 begins and completes the construction of a shopping center and is required to capitalize interest with respect to the construction. S1's average excess expenditures for 1995 are \$5,000,000. Throughout 1995, S1's only borrowings include a \$6,000,000 loan from P bearing interest at an annual rate of 10 percent (\$600,000 per year). Under the avoided cost method, S1 is required to capitalize interest in the amount of \$500,000 ($[\$600,000 \div \$6,000,000 \times 5,000,000]$).

(ii) P's only borrowing from unrelated lenders is a \$2,000,000 loan bearing interest at an annual rate of 10 percent (\$200,000 per year). Under the principles of paragraph (g)(5)(ii) of this section, because the aggregate amount of interest described in para-

graph (g)(5)(i) of this section (\$500,000) exceeds the aggregate amount of currently deductible interest of the group (\$200,000), the intercompany transaction provisions of the consolidated return regulations apply to the excess of \$300,000 and the amount of P's interest income that is subject to current inclusion by reason of paragraph (g)(5)(i) of this section is limited to \$200,000.

(6) *Notional principal contracts and other derivatives.* [Reserved]

(7) *15-day repayment rule.* A taxpayer may elect to treat any eligible debt that is repaid within the 15-day period immediately preceding a quarterly measurement date as outstanding as of that measurement date for purposes of determining traced debt, average non-traced debt, and the weighted average interest rate. This election may be made or discontinued for any computation period and is not a method of accounting.

[T.D. 8584, 59 FR 67200, Dec. 29, 1994; 60 FR 16574, Mar. 31, 1995, as amended by T.D. 8584, 60 FR 47053, Sept. 11, 1995; T.D. 9129, 69 FR 29067, May 20, 2004; T.D. 9179, 70 FR 8730, Feb. 23, 2005]

§ 1.263A-10 Unit of property.

(a) *In general.* The unit of property as defined in this section is used as the basis to determine accumulated production expenditures under § 1.263A-11 and the beginning and end of the production period under § 1.263A-12. Whether property is 1-year or 2-year property under § 1.263A-8(b)(1)(ii) is also determined separately with respect to each unit of property as defined in this section.

(b) *Units of real property—(1) In general.* A unit of real property includes any components of real property owned by the taxpayer or a related person that are functionally interdependent and an allocable share of any common feature owned by the taxpayer or a related person that is real property even though the common feature does not meet the functional interdependence test. When the production period begins with respect to any functionally interdependent component or any common feature of the unit of real property, the production period has begun for the entire unit of real property. See, however, paragraph (b)(5) of this section for rules under which the costs of a common feature or benefitted

property are excluded from accumulated production expenditures for one or more measurement dates. The portion of land included in a unit of real property includes land on which real property (including a common feature) included in the unit is situated, land subject to setback restrictions with respect to such property, and any other contiguous portion of the tract of land other than land that the taxpayer holds for a purpose unrelated to the unit being produced (e.g., investment purposes, personal use purposes, or specified future development as a separate unit of real property).

(2) *Functional interdependence.* Components of real property produced by, or for, the taxpayer, for use by the taxpayer or a related person are functionally interdependent if the placing in service of one component is dependent on the placing in service of the other component by the taxpayer or a related person. In the case of property produced for sale, components of real property are functionally interdependent if they are customarily sold as a single unit. For example, the real property components of a single-family house (e.g., the land, foundation, and walls) are functionally interdependent. In contrast, components of real property that are expected to be separately placed in service or held for resale are not functionally interdependent. Thus, dwelling units within a multi-unit building that are separately placed in service or sold (within the meaning of § 1.263A-12(d)(1)) are treated as functionally independent of any other units, even though the units are located in the same building.

(3) *Common features.* For purposes of this section, a common feature generally includes any real property (as defined in § 1.263A-8(c)) that benefits real property produced by, or for, the taxpayer or a related person, and that is not separately held for the production of income. A common feature need not be physically contiguous to the real property that it benefits. Examples of common features include streets, sidewalks, playgrounds, clubhouses, tennis courts, sewer lines, and cables that are not held for the production of income separately from the

units of real property that they benefit.

(4) *Allocation of costs to unit.* Except as provided in paragraph (b)(5) of this section, the accumulated production expenditures for a unit of real property include, in all cases, the costs that directly benefit, or are incurred by reason of the production of, the unit of real property. Accumulated production expenditures also include the adjusted basis of property used to produce the unit of real property. The accumulated costs of a common feature or land that benefits more than one unit of real property, or that benefits designated property and property other than designated property, is apportioned among the units of designated property, or among the designated property and property other than designated property, in determining accumulated production expenditures. The apportionment of the accumulated costs of the common feature (allocable share) or land (attributable land costs) generally may be made using any method that is applied on a consistent basis and that reasonably reflects the benefits provided. For example, an apportionment based on relative costs to be incurred, relative space to be occupied, or relative fair market values may be reasonable.

(5) *Treatment of costs when a common feature is included in a unit of real property—*(i) *General rule.* Except as provided in this paragraph (b)(5), the accumulated production expenditures of a unit of real property include the costs of functionally interdependent components (benefitted property) and an allocable share of the cost of common features throughout the entire production period of the unit. See § 1.263A-12, relating to the production period of a unit of property.

(ii) *Production activity not undertaken on benefitted property—*(A) *Direct production activity not undertaken—*(1) *In general.* The costs of land attributable to a benefitted property may be treated as not included in accumulated production expenditures for a unit of real property for measurement dates prior to the first date a production activity (direct production activity), including the clearing and grading of land, has been undertaken with respect to the

land attributable to the benefitted property. Thus, the costs of land attributable to a benefitted property (as opposed to land attributable to the common features) with respect to which no direct production activities have been undertaken may be treated as not included in the accumulated production expenditures of a unit of real property even though a production activity has begun on a common feature allocable to the unit.

(2) *Land attributable to a benefitted property.* For purposes of this paragraph (b)(5)(ii), land attributable to a benefitted property includes all land in the unit of real property that includes the benefitted property other than land for a common feature. (Thus, land attributable to a benefitted property does not include land attributable to a common feature.)

(B) *Suspension of direct production activity after clearing and grading undertaken—(1) General rule.* This paragraph (b)(5)(ii)(B) may be used to determine the accumulated production expenditures for a unit of real property, if the only production activity with respect to a benefitted property has been clearing and grading and no further direct production activity is undertaken with respect to the benefitted property for at least 120 consecutive days (i.e., direct production activity has ceased). Under this paragraph (b)(5)(ii)(B), the accumulated production expenditures attributable to a benefitted property qualifying under this paragraph (b)(5)(ii)(B) may be excluded from the accumulated production expenditures of the unit of real property even though production continues on a common feature allocable to the unit. For purposes of this paragraph (b)(5)(ii)(B), production activity is considered to occur during any time which would not qualify as a cessation of production activities under the suspension period rules of § 1.263A-12(g).

(2) *Accumulated production expenditures.* If this paragraph (b)(5)(ii)(B) applies, accumulated production expenditures attributable to the benefitted property of the unit of real property may be treated as not included in the accumulated production expenditures for the unit starting with the first measurement period beginning after

the first day of the 120 consecutive day period, but must be included in the accumulated production expenditures for the unit beginning in the measurement period in which direct production activity has resumed on the benefitted property. Accumulated production expenditures with respect to common features allocable to the unit of real property may not be excluded under this paragraph (b)(5)(ii)(B).

(iii) *Common feature placed in service before the end of production of a benefitted property.* To the extent that a common feature with respect to which all production activities to be undertaken by, or for, a taxpayer or a related person are completed is placed in service before the end of the production period of a unit that includes an allocable share of the costs of the common feature, the costs of the common feature are not treated as included in accumulated production expenditures of the unit for measurement periods beginning after the date the common feature is placed in service.

(iv) *Benefitted property sold before production completed on common feature.* If a unit of real property is sold before common features included in the unit are completed, the production period of the unit ends on the date of sale. Thus, common feature costs actually incurred and properly allocable to the unit as of the date of sale are excluded from accumulated production expenditures for measurement periods beginning after the date of sale. Common feature costs properly allocable to the unit and actually incurred after the sale are not taken into account in determining accumulated production expenditures.

(v) *Benefitted property placed in service before production completed on common feature.* Where production activities remain to be undertaken on a common feature allocable to a unit of real property that includes benefitted property, the costs of the benefitted property are not treated as included in the accumulated production expenditures for the unit for measurement periods beginning after the date the benefitted property is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer

or a related person with respect to the benefitted property are completed.

(6) *Examples.* The principles of paragraph (b) of this section are illustrated by the following examples:

Example 1. B, an individual, is in the trade or business of constructing custom-built houses for sale. B owns a 10-acre tract upon which B intends to build four houses on 2-acre lots. In addition, on the remaining 2 acres B plans to construct a perimeter road that benefits the four houses and is not held for the production of income separately from the sale of the houses. In 1995, B begins constructing the perimeter road and clears the land for one house. Under the principles of paragraph (b)(1) of this section, each planned house (including attributable land) is part of a separate unit of real property (house unit). Under the principles of paragraph (b)(3) of this section, the perimeter road (including attributable land) constitutes a common feature with respect to each planned house (i.e., benefitted property). In accordance with paragraph (b)(1), the production period for all four house units begins when production commences on the perimeter road in 1995. In addition, under the principles of paragraph (b)(4) of this section, the accumulated production expenditures for the four house units include the allocable costs of the road. In addition, for the house with respect to which B has cleared the land, the accumulated production expenditures for the house unit include the land costs attributable to the house. See paragraph (b)(5)(i) of this section. However, the accumulated production expenditures for each of the three house units that include a house for which B has not yet undertaken a direct production activity do not include the land costs attributable to the house. See paragraph (b)(5)(ii) of this section.

Example 2. Assume the same facts as *Example 1*, except that B undertakes no further direct production activity with respect to the house for which the land was cleared for a period of at least 120 days but continues constructing the perimeter road during this period. In accordance with paragraph (b)(5)(ii)(B) of this section, B may exclude the accumulated production expenditures attributable to the benefitted property from the accumulated production expenditures of the house unit starting with the first measurement period that begins after the first day of the 120 consecutive day period. B must include the accumulated production expenditures attributable to the benefitted property in the accumulated production expenditures for the house unit beginning with the measurement period in which direct production resumes on the benefitted property. The house unit will continue to include the accumulated production expenditures attrib-

utable to the perimeter road during the period in which direct production activity was suspended on the benefitted property.

Example 3. (i) D, a corporation, is in the trade or business of developing commercial real property. D owns a 20-acre tract upon which D intends to build a shopping center with 150 stores. D intends to lease the stores. D will also provide on the 20 acres a 1500-car parking lot, which is not held by D for the production of income separately from the stores in the shopping center. Additionally, D will not produce any other common features as part of the project. D intends to complete the shopping center in phases and expects that each store will be placed in service independently of any other store.

(ii) Under paragraphs (b)(1) and (b)(2) of this section, each store (including attributable land) is part of a separate unit of real property (store unit). The 1500-car parking lot is a common feature benefitting each store, and D must include an allocable share of the parking lots in each store unit. See paragraphs (b)(1) and (b)(3). In accordance with paragraph (b)(5)(i), D includes in the accumulated production expenditures for each store unit during each store unit's production period: the costs capitalized with respect to the store (including attributable land costs in accordance with paragraph (b)(5) of this section) and an allocable share of the parking lot costs (including attributable land costs in accordance with paragraph (b)(5) of this section). Under paragraph (b)(4), the portion of the parking lot costs that is included in the accumulated production expenditures of a store unit is determined using a reasonable method of allocation.

Example 4. X, a real estate developer, begins a project to construct a condominium building and a convenience store for the benefit of the condominium. X intends to separately lease the convenience store. Because the convenience store is held for the production of income separately from the condominium units that it benefits, the convenience store is not a common feature with respect to the condominium building. Instead, the convenience store is a separate unit of property with a separate production period and for which a separate determination of accumulated production expenditures must be made.

Example 5. (i) In 1995, X, a real estate developer, begins a project consisting of a condominium building and a common swimming pool that is not held for the production of income separately from the condominium sales. The condominium building consists of 10 stories, and each story is occupied by a single condominium. Production of the swimming pool begins in January. No direct production activity is undertaken on any condominium until September, when direct

production activity commences on each condominium. On December 31, 1995, 1 condominium that was completed in December has been sold, 3 condominiums that were completed in December have not been sold, and 6 condominiums are only partially complete; additionally, the swimming pool is completed. X is a calendar year taxpayer that uses a full taxable year as the computation period, and quarterly measurement dates.

(ii) Under paragraphs (b)(1) and (b)(2) of this section, each condominium (including attributable land) is part of a separate unit of real property. Under the principles of paragraph (b)(3) of this section, the swimming pool is a common feature with respect to each condominium and under paragraph (b)(4) of this section the cost of the swimming pool is allocated equally among the condominiums.

(iii) Under paragraph (b)(1) of this section, the production period of each of the 10 condominium units begins in January when production of the swimming pool begins. On X's March 31, 1995, and June 30, 1995, measurement dates, the accumulated production expenditures for each condominium unit include the allocable costs of the swimming pool, but not the land costs attributable to the condominium because no direct production activity has been undertaken on the condominium. See paragraph (b)(5)(ii)(A) of this section. On X's September 30, 1995, and December 31, 1995, measurement dates, the accumulated production expenditures for each unit include the allocable costs of the swimming pool, and the costs of the condominium (including attributable land costs) because a direct production activity has commenced on the condominium. See paragraph (b)(5)(i) of this section.

(iv) The production period for the condominium unit that includes the condominium that is sold as of the end of 1995 ends on the date the condominium is sold. See paragraph (b)(5)(iv) of this section. The production period of each unit that is ready to be held for sale ends when all production activities have been completed on the unit, in this case on December 31, 1995, the date that the swimming pool included in the unit is completed. See § 1.263A-12(d). Accordingly, interest capitalization ceases for each such unit that is sold or ready to be held for sale as of the end of 1995 (including each unit's allocable share of the completed swimming pool).

(v) The production periods for the condominium units that include the condominiums that are only partially complete at the end of 1995 continue after 1995. The accumulated production expenditures for each partially completed condominium unit continue to include the costs of the condominium (including attributable land costs) in addition to the costs of an allocable share of the completed swimming pool (including attributable land costs).

Example 6. Assume the same facts as in *Example 5*, except that the swimming pool is only partially complete as of the end of 1995. Under these facts, X capitalizes no interest during 1996 for the 1 unit that includes the condominium sold during 1995 (including the costs of the allocable share of the swimming pool). See paragraph (b)(5)(iv) of this section. However, with respect to the 6 condominiums that are partially complete and the 3 condominiums that are completed but unsold, interest capitalization continues after the end of 1995. The accumulated production expenditures for each of these 9 units include the costs of an allocable share of the swimming pool. See paragraph (b)(5)(i) of this section. In determining the costs of an allocable share of the swimming pool included in the accumulated production expenditures for each of the 9 units, X includes all costs of the swimming pool properly allocable to each unit, including those cost incurred as of the date of the sale of unit 1 that may have been used under applicable administrative procedures (e.g., Rev. Proc. 92-29, 1992-1 C.B. 748) in determining the basis of unit 1 solely for purposes of computing gain or loss on the sale of unit 1. See § 601.601(d)(2)(ii)(b) of this chapter.

Example 7. (i) Assume the same facts as in *Example 5*, except that X intends to lease rather than sell the condominiums and the completed swimming pool is placed in service for depreciation purposes on December 31, 1995. Additionally, assume that all 10 condominiums are partially completed at the end of 1995.

(ii) Under these facts, because the swimming pool is a common feature that is placed in service separately from the condominiums that it benefits, under paragraph (b)(5)(iii) of this section, the accumulated production expenditures of each of the condominium units do not include the costs of the allocable share of the swimming pool after 1995.

(c) *Units of tangible personal property.* Components of tangible personal property are a single unit of property if the components are functionally interdependent. Components of tangible personal property that are produced by, or for, the taxpayer, for use by the taxpayer or a related person, are functionally interdependent if the placing in service of one component is dependent on the placing in service of the other component by the taxpayer or a related person. In the case of tangible personal property produced for sale, components of tangible personal property are functionally interdependent if they are customarily sold as a single unit. For example, if an aircraft manufacturer customarily sells completely assembled

aircraft, the unit of property includes all components of a completely assembled aircraft. If the manufacturer also customarily sells aircraft engines separately, any engines that are reasonably expected to be sold separately are treated as single units of property.

(d) *Treatment of installations.* If the taxpayer produces or is treated as producing any property that is installed on or in other property, the production activity and installation activity relating to each unit of property generally are not aggregated for purposes of this section. However, if the taxpayer is treated as producing and installing any property for use by the taxpayer or a related person or if the taxpayer enters into a contract requiring the taxpayer to install property for use by a customer, the production activity and installation activity are aggregated for purposes of this section.

[T.D. 8584, 59 FR 67207, Dec. 29, 1994; 60 FR 16574, 16575, Mar. 31, 1995]

§ 1.263A-11 Accumulated production expenditures.

(a) *General rule.* *Accumulated production expenditures* generally means the cumulative amount of direct and indirect costs described in section 263A(a) that are required to be capitalized with respect to the unit of property (as defined in § 1.263A-10), including interest capitalized in prior computation periods, plus the adjusted bases of any assets described in paragraph (d) of this section that are used to produce the unit of property during the period of their use. Accumulated production expenditures may also include the basis of any property received by the taxpayer in a nontaxable transaction.

(b) *When costs are first taken into account—(1) In general.* Except as provided in paragraph (c)(1) of this section, costs are taken into account in the computation of accumulated production expenditures at the time and to the extent they would otherwise be taken into account under the taxpayer's method of accounting (e.g., after applying the requirements of section 461, including the economic performance requirement of section 461(h)). Costs that have been incurred and capitalized with respect to a unit of property prior to the beginning of

the production period are taken into account as accumulated production expenditures beginning on the date on which the production period of the property begins (as defined in § 1.263A-12(c)). Thus, for example, the cost of raw land acquired for development, the cost of a leasehold in mineral properties acquired for development, and the capitalized cost of planning and design activities are taken into account as accumulated production expenditures beginning on the first day of the production period. For purposes of determining accumulated production expenditures on any measurement date during a computation period, the interest required to be capitalized for the computation period is deemed to be capitalized on the day immediately following the end of the computation period. For any subsequent measurement dates and computation periods, that interest is included in accumulated production expenditures. If the cost of land or common features is allocated among planned units of property that are completed in phases, any portion of the cost properly allocated to completed units is not reallocated to any incomplete units of property.

(2) *Dedication rule for materials and supplies.* The costs of raw materials, supplies, or similar items are taken into account as accumulated production expenditures when they are incurred and dedicated to production of a unit of property. *Dedicated* means the first date on which the raw materials, supplies, or similar items are specifically associated with the production of any unit of property, including by record, assignment to the specific job site, or physical incorporation. In contrast, in the case of a component or subassembly that is reasonably expected to become a part of (e.g., be incorporated into) any unit of property, costs incurred (including dedicated raw materials) for the component or subassembly are taken into account as accumulated production expenditures during the production of any portion of the component or subassembly and prior to its connection with (e.g., incorporation into) any specific unit of property. For purposes of the preceding

sentence, components and subassemblies must be aggregated at each measurement date in a reasonable manner that is consistent with the purposes of section 263A(f).

(c) *Property produced under a contract*—(1) *Customer*. If a unit of property produced under a contract is designated property under § 1.263A-8(d)(2)(i) with respect to the customer, the customer's accumulated production expenditures include any payments under the contract that represent part of the purchase price of the unit of designated property or, to the extent costs are incurred earlier than payments are made (determined on a cumulative basis for each unit of designated property), any part of such price for which the requirements of section 461 have been satisfied. The customer has made a payment under this section if the transaction would be considered a payment by a taxpayer using the cash receipts and disbursements method of accounting. The customer's accumulated production expenditures also include any other costs incurred by the customer, such as interest, or any other direct or indirect costs that are required to be capitalized under section 263A(a) and the regulations thereunder with respect to the production of the unit of designated property.

(2) *Contractor*. If a unit of property produced under a contract is designated property under § 1.263A-8(d)(2)(ii) with respect to the contractor, the contractor must treat the cumulative amount of payments made by the customer under the contract attributable to the unit of property as a reduction in the contractor's accumulated production expenditures. The customer has made a payment under this section if the transaction would be considered a payment by a taxpayer using the cash receipts and disbursements method of accounting.

(d) *Property used to produce designated property*—(1) *In general*. Accumulated production expenditures include the adjusted bases (or portion thereof) of any equipment, facilities, or other similar assets, used in a reasonably proximate manner for the production of a unit of designated property during any measurement period in which the asset is so used. Examples of assets

used in a reasonably proximate manner include machinery and equipment used directly or indirectly in the production process, such as assembly-line structures, cranes, bulldozers, and buildings. A taxpayer apports the adjusted basis of an asset used in the production of more than one unit of designated property in a measurement period among such units of designated property using reasonable criteria corresponding to the use of the asset, such as machine hours, mileage, or units of production. If an asset used in a reasonably proximate manner for the production of a unit of designated property is temporarily idle (within the meaning of § 1.263A-1(e)(3)(iii)(E)) for an entire measurement period, the adjusted basis of the asset is excluded from the accumulated production expenditures for the unit during that measurement period. Notwithstanding this paragraph (d)(1), the portion of the depreciation allowance for equipment, facilities, or any other asset that is capitalized with respect to a unit of designated property in accordance with § 1.263A-1(e)(3)(ii)(I) is included in accumulated production expenditures without regard to the extent of use under this paragraph (d)(1) (i.e., without regard to whether the asset is used in a reasonably proximate manner for the production of the unit of designated property).

(2) *Example*. The following example illustrates how the basis of an asset is allocated on the basis of time:

Example. In 1995, X uses a bulldozer exclusively to clear the land on several adjacent real estate development projects, A, B, and C. A, B, and C are treated as separate units of property under the principles of § 1.263A-10. X decides to allocate the basis of the bulldozer among the three projects on the basis of time. At the end of the first quarter of 1995, the production period has commenced for all three projects. The bulldozer was operated for 30 hours on project A, 80 hours on project B, and 10 hours on project C, for a total of 120 hours for the entire period. For purposes of determining accumulated production expenditures as of the end of the first quarter, $\frac{1}{4}$ of the adjusted basis of the bulldozer is allocated to project A, $\frac{2}{3}$ to project B, and $\frac{1}{12}$ to project C. Nonworking hours, regularly scheduled nonworking days, or other periods in which the bulldozer is temporarily idle (within the meaning of

§ 1.263A-12

26 CFR Ch. I (4-1-17 Edition)

§ 1.263A-1(e)(3)(iii)(E)) during the measurement period are not taken into account in allocating the basis of the bulldozer.

(3) *Excluded equipment and facilities.* The adjusted bases of equipment, facilities, or other assets that are not used in a reasonably proximate manner to produce a unit of property are not included in the computation of accumulated production expenditures. For example, the adjusted bases of equipment and facilities, including buildings and other structures, used in service departments performing administrative, purchasing, personnel, legal, accounting, or similar functions, are excluded from the computation of accumulated production expenditures under this paragraph (d)(3).

(e) *Improvements*—(1) *General rule.* If an improvement constitutes the production of designated property under § 1.263A-8(d)(3), accumulated production expenditures with respect to the improvement consist of—

(i) All direct and indirect costs required to be capitalized with respect to the improvement,

(ii) In the case of an improvement to a unit of real property—

(A) An allocable portion of the cost of land, and

(B) For any measurement period, the adjusted basis of any existing structure, common feature, or other property that is not placed in service or must be temporarily withdrawn from service to complete the improvement (associated property) during any part of the measurement period if the associated property directly benefits the property being improved, the associated property directly benefits from the improvement, or the improvement was incurred by reason of the associated property. See, however, the de minimis rule under paragraph (e)(2) of this section that applies in the case of associated property.

(iii) In the case of an improvement to a unit of tangible personal property, the adjusted basis of the asset being improved if that asset either is not placed in service or must be temporarily withdrawn from service to complete the improvement.

(2) *De minimis rule.* For purposes of paragraph (e)(1)(ii) of this section, the total costs of all associated property

for an improvement unit (associated property costs) are excluded from the accumulated production expenditures for the improvement unit during its production period if, on the date the production period of the unit begins, the taxpayer reasonably expects that at no time during the production period of the unit will the accumulated production expenditures for the unit, determined without regard to the associated property costs, exceed 5 percent of the associated property costs.

(f) *Mid-production purchases.* If a taxpayer purchases a unit of property for further production, the taxpayer's accumulated production expenditures include the full purchase price of the property plus, in accordance with the principles of paragraph (e) of this section, additional direct and indirect costs incurred by the taxpayer.

(g) *Related person costs.* The activities of a related person are taken into account in applying the classification thresholds under § 1.263A-8(b)(1)(ii)(B) and (C), and in determining the production period of a unit of designated property under § 1.263A-12. However, only those costs incurred by the taxpayer are taken into account in the taxpayer's accumulated production expenditures under this section because the related person includes its own capitalized costs in the related person's accumulated production expenditures with respect to any unit of designated property upon which the parties engage in mutual production activities. For purposes of the preceding sentence, the accumulated production expenditures of any property transferred to a taxpayer in a nontaxable transaction are treated as accumulated production expenditures incurred by the taxpayer.

(h) *Installation.* If the taxpayer installs property that is purchased by the taxpayer, accumulated production expenditures include the cost of the property that is installed in addition to the direct and indirect costs of installation.

[T.D. 8584, 59 FR 67210, Dec. 29, 1994; 60 FR 16575, Mar. 31, 1995]

§ 1.263A-12 Production period.

(a) *In general.* Capitalization of interest is required under § 1.263A-9 for computation periods (within the meaning

of § 1.263A-9(f)(1)) that include the production period of a unit of designated property. In contrast, section 263A(a) requires the capitalization of all other direct or indirect costs, such as insurance, taxes, and storage, that directly benefit or are incurred by reason of the production of property without regard to whether they are incurred during a period in which production activity occurs.

(b) *Related person activities.* Activities performed and costs incurred by a person related to the taxpayer that directly benefit or are incurred by reason of the taxpayer's production of designated property are taken into account in determining the taxpayer's production period (regardless of whether the related person is performing only a service or is producing a sub-assembly or component that the related person is required to treat as an item of designated property). These activities and the related person's costs are also taken into account in determining whether tangible personal property produced by the taxpayer is 1-year or 2-year property under § 1.263A-8(b)(1)(ii) (B) and (C).

(c) *Beginning of production period—(1) In general.* A separate production period is determined for each unit of property defined in § 1.263A-10. The production period begins on the date that production of the unit of property begins.

(2) *Real property.* The production period of a unit of real property begins on the first date that any physical production activity (as defined in paragraph (e) of this section) is performed with respect to a unit of real property. See § 1.263A-10(b)(1). The production period of a unit of real property produced under a contract begins for the contractor on the date the contractor begins physical production activity on the property. The production period of a unit of real property produced under a contract begins for the customer on the date either the customer or the contractor begins physical production activity on the property.

(3) *Tangible personal property.* The production period of a unit of tangible personal property begins on the first date by which the taxpayer's accumulated production expenditures, includ-

ing planning and design expenditures, are at least 5 percent of the taxpayer's total estimated accumulated production expenditures for the property unit. Thus, the beginning of the production period is determined without regard to whether physical production activity has commenced. The production period of a unit of tangible personal property produced under a contract begins for the contractor when the contractor's accumulated production expenditures, without any reduction for payments from the customer, are at least 5 percent of the contractor's total estimated accumulated production expenditures. The production period for a unit of tangible personal property produced under a contract begins for the customer when the customer's accumulated production expenditures are at least 5 percent of the customer's total estimated accumulated production expenditures.

(d) *End of production period—(1) In general.* The production period for a unit of property produced for self use ends on the date that the unit is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed. The production period for a unit of property produced for sale ends on the date that the unit is ready to be held for sale and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed. See, however, § 1.263A-10(b)(5)(iv) providing an exception for common features in the case of a benefited property that is sold. In the case of a unit of property produced under a contract, the production period for the customer ends when the property is placed in service by the customer and all production activities reasonably expected to be undertaken are complete (i.e., generally, no earlier than when the customer takes delivery). In the case of property that is customarily aged (such as tobacco, wine, or whiskey) before it is sold, the production period includes the aging period.

(2) *Special rules.* The production period does not end for a unit of property prior to the completion of physical production activities by the taxpayer even though the property is held for sale or

lease, since all production activities reasonably expected to be undertaken by the taxpayer with respect to such property have not in fact been completed. See, however, § 1.263A-10(b)(5) regarding separation of certain common features.

(3) *Sequential production or delivery.* The production period ends with respect to each unit of property (as defined in § 1.263A-10) and its associated accumulated production expenditures as the unit of property is completed within the meaning of paragraph (d)(1) of this section, without regard to the production activities or costs of any other units of property. Thus, for example, in the case of separate apartments in a multi-unit building, each of which is a separate unit of property within the meaning of § 1.263A-10, the production period ends for each separate apartment when it is ready to be held for sale or placed in service within the meaning of paragraph (d)(1) of this section. In the case of a single unit of property that merely undergoes separate and distinct stages of production, the production period ends at the same time (i.e., when all separate stages of production are completed with respect to the entire amount of accumulated production expenditures for the property).

(4) *Examples.* The provisions of paragraph (d) of this section are illustrated by the following examples:

Example 1. E is engaged in the original construction of a high-rise office building with two wings. At the end of 1995, Wing #1, but not Wing #2, is placed in service. Moreover, at the end of 1995, all production activities reasonably expected to be undertaken on Wing #1 are completed. In accordance with § 1.263A-10(b)(1), Wing #1 and Wing #2 are separate units of designated property. E may stop capitalizing interest on Wing #1 but not on Wing #2.

Example 2. F is in the business of constructing finished houses. F generally paints and finishes the interior of the house, although this does not occur until a potential buyer is located. Because F reasonably expects to undertake production activity (painting and finishing), the production period of each house does not end until these activities are completed.

(e) *Physical production activities—(1) In general.* The term *physical production activities* includes any physical activity

that constitutes production within the meaning of § 1.263A-8(d)(1). The production period begins and interest must be capitalized with respect to real property if any physical production activities are undertaken, whether alone or in preparation for the construction of buildings or other structures, or with respect to the improvement of existing structures. For example, the clearing of raw land constitutes the production of designated property, even if only cleared prior to resale.

(2) *Illustrations.* The following is a partial list of activities any one of which constitutes a physical production activity with respect to the production of real property:

(i) Clearing, grading, or excavating of raw land;

(ii) Demolishing a building or gutting a standing building;

(iii) Engaging in the construction of infrastructure, such as roads, sewers, sidewalks, cables, and wiring;

(iv) Undertaking structural, mechanical, or electrical activities with respect to a building or other structure; or

(v) Engaging in landscaping activities.

(f) *Activities not considered physical production.* The activities described in paragraphs (f)(1) and (f)(2) of this section are not considered physical production activities:

(1) *Planning and design.* Soil testing, preparing architectural blueprints or models, or obtaining building permits.

(2) *Incidental repairs.* Physical activities of an incidental nature that may be treated as repairs under § 1.162-4.

(g) *Suspension of production period—(1) In general.* If production activities related to the production of a unit of designated property cease for at least 120 consecutive days (cessation period), a taxpayer may suspend the capitalization of interest with respect to the unit of designated property starting with the first measurement period that begins after the first day in which production ceases. The taxpayer must resume the capitalization of interest with respect to a unit beginning with the measurement period during which

production activities resume. In addition, production activities are not considered to have ceased if they cease because of circumstances inherent in the production process, such as normal adverse weather conditions, scheduled plant shutdowns, or delays due to design or construction flaws, the obtaining of a permit or license, or the settlement of groundfill to construct property. Interest incurred on debt that is traced debt with respect to a unit of designated property during the suspension period is subject to capitalization with respect to the production of other units of designated property as interest on nontraced debt. See § 1.263A-9(c)(5)(i) of this section. For applications of the avoided cost method after the end of the suspension period, the accumulated production expenditures for the unit include the balance of accumulated production expenditures as of the beginning of the suspension period, plus any additional capitalized costs incurred during the suspension period. No further suspension of interest capitalization may occur unless the requirements for a new suspension period are satisfied.

(2) *Special rule.* If a cessation period spans more than one taxable year, the taxpayer may suspend the capitalization of interest with respect to a unit beginning with the first measurement period of the taxable year in which the 120-day period is satisfied.

(3) *Method of accounting.* An election to suspend interest capitalization under paragraph (g)(1) of this section is a method of accounting that must be consistently applied to all units that satisfy the requirements of paragraph (g)(1) of this section. However, the special rule in paragraph (g)(2) of this section is applied on an annual basis to all units of an electing taxpayer that satisfy the requirements of paragraph (g)(2) of this section.

(4) *Example.* The provisions of paragraph (g)(1) of this section are illustrated by the following example.

Example. (i) D, a calendar-year taxpayer, began production of a residential housing development on January 1, 1995. D, in applying the avoided cost method, chose a taxable year computation period and quarterly measurement dates. On April 10, 1995, all production activities ceased with respect to the units in the development until December 1,

1996. The cessation, which occurred for a period of at least 120 consecutive days, was not attributable to circumstances inherent in the production process. With respect to the units in the development, D incurred production expenditures of \$2,000,000 from January 1, 1995 through April 10, 1995. D incurred interest of \$100,000 on traced debt with respect to the units for the period beginning January 1, 1995, and ending June 30, 1995. D did not incur any production expenditures for the more than 20-month cessation beginning April 10, 1995, and ending December 1, 1996, but incurred \$200,000 of production expenditures from December 1, 1996, through December 31, 1996.

(ii) D is required to capitalize the \$100,000 interest on traced debt incurred during the two measurement periods beginning January 1, 1995, and ending June 30, 1995. Because D satisfied the 120-day rule under this paragraph (g), D is not required to capitalize interest with respect to the accumulated production expenditures for the units for the measurement period beginning July 1, 1995, and ending September 30, 1995, which is the first measurement period that begins after the date production activities cease. D is required to resume interest capitalization with respect to the \$2,300,000 (2,000,000 + 100,000 + 200,000) of accumulated production expenditures for the units for the measurement period beginning October 1, 1996, and ending December 31, 1996 (the measurement period during which production activities resume). Accordingly, D may suspend the capitalization of interest with respect to the units from July 1, 1995, through September 30, 1996.

[T.D. 8584, 59 FR 67212, Dec. 29, 1994; 60 FR 16575, Mar. 31, 1995]

§ 1.263A-13 Oil and gas activities.

(a) *In general.* This section provides rules that are to be applied in tandem with §§ 1.263A-8 through 1.263A-12, 1.263A-14, and 1.263A-15 in capitalizing interest with respect to the development (within the meaning of section 263A(g)) of oil or gas property. For this purpose, oil or gas property consists of each separate operating mineral interest in oil or gas as defined in section 614(a), or, if a taxpayer makes an election under section 614(b), the aggregate of two or more separate operating mineral interests in oil or gas as described in section 614(b) (section 614 property). Thus, an oil or gas property is designated property unless the de minimis rule applies. A taxpayer must apply the rules in paragraph (c) of this section if the taxpayer cannot establish, at the

beginning of the production period of the first well drilled on the property, a definite plan that identifies the number and location of other wells planned with respect to the property. If a taxpayer can establish such a plan at the beginning of the production period of the first well drilled on the property, the taxpayer may either apply the rules of paragraph (c) of this section or treat each of the planned wells as a separate unit and partition the leasehold acquisition costs and costs of common features based on the number of planned well units.

(b) *Generally applicable rules*—(1) *Beginning of production period*—(i) *Onshore activities*. In the case of onshore oil or gas development activities, the production period for a unit begins on the first date physical site preparation activities (such as building an access road, leveling a site for a drilling rig, or excavating a mud pit) are undertaken with respect to the unit.

(ii) *Offshore activities*. In the case of offshore development activities, the production period for a unit begins on the first date physical site preparation activities, other than activities undertaken with respect to expendable wells, are undertaken with respect to the unit. For purposes of the preceding sentence, the first physical site preparation activity undertaken with respect to a section 614 property is generally the first activity undertaken with respect to the anchoring of a platform (e.g., drilling to drive the piles). For purposes of this section, an expendable well is a well drilled solely to determine the location and delineation of offshore hydrocarbon deposits.

(2) *End of production period*. The production period ends for a productive well unit on the date the well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed. See § 1.263A-12(d).

(3) *Accumulated production expenditures*—(i) *Costs included*. Accumulated production expenditures for a well unit include the following costs (to the extent they are not intangible drilling and development costs allowable as a deduction under section 263(c), 263(i), or 291(b)(2)): the costs of acquiring the

section 614 leasehold and the costs of taxes and similar items that are required to be capitalized under section 263A(a) with respect to the section 614 leasehold; the cost of real property associated with developing the section 614 property (e.g., casing); the basis of real property that constitutes a common feature within the meaning of § 1.263A-10(b)(3); and the adjusted basis of property used to produce property (such as a mobile rig, drilling ship, or an offshore drilling platform).

(ii) *Improvement unit*. To the extent section 614 costs are allocated to a well unit, the undepleted portion of those section 614 costs must also be included in the accumulated production expenditures for any improvement unit (within the meaning of § 1.263A-8(d)(3)) with respect to that well unit.

(c) *Special rules when definite plan not established*—(1) *In general*. The special rules of this paragraph (c) must be applied by a taxpayer that cannot establish, at the beginning of the production period of the first well drilled on the property, a definite plan that identifies the number and location of the wells planned with respect to the property. A taxpayer that can establish such a plan is permitted, but not required, to apply the rules of this paragraph (c), provided the rules of this paragraph (c) are consistently applied for all the taxpayer's oil or gas properties for which a definite plan can be established.

(2) *Oil and gas units*—(i) *First productive well unit*. Until the first productive well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed, a first productive well unit includes the section 614 property and all real property associated with the development of the section 614 property. Thus, for example, a first productive well unit includes the section 614 property and real property associated with any non-productive well drilled on the section 614 property on or before the date the first productive well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed. For purposes of this section, a productive well is a well that produces in commercial quantities. See

paragraph (c)(5) of this section, which provides a special rule whereby the costs of a section 614 property and common feature costs for a section 614 property generally are included only in the accumulated production expenditures for the first productive well unit.

(ii) *Subsequent units.* Generally, real property associated with each productive or nonproductive well with respect to which production activities begin after the date the first productive well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed, constitutes a unit of real property. Additionally, a productive or nonproductive well that is included in a first productive well unit and for which development continues after the date the first productive well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed, generally is treated as a separate unit of property after that date. See, however, paragraph (c)(5) of this section, which provides rules for the treatment of costs included in the accumulated production expenditures of a first productive well unit.

(3) *Beginning of production period—(i) First productive well unit.* The beginning of the production period of the first productive well unit is determined as provided in paragraph (b) of this section.

(ii) *Subsequent wells.* In applying paragraph (b) of this section to subsequent well units (as described in paragraph (c)(2)(ii) of this section), any activities occurring prior to the date the production period ends for the first productive well unit are not taken into account in determining the beginning of the production period for the subsequent well units.

(4) *End of production period.* The end of the production period for both the first productive well unit and subsequent productive well units is determined as provided in paragraph (b)(2) of this section. See § 1.263A-12(d). Nonproductive wells included in the first productive well unit need not be plugged and abandoned for the production period to end for a first productive well unit.

(5) *Accumulated production expenditures—(i) First productive well unit.* The accumulated production expenditures for a first productive well unit include all costs incurred with respect to the section 614 property and associated real property at any time through the end of the production period for the first productive well unit. Thus, the costs of acquiring the section 614 property, the costs of taxes and similar items that are required to be capitalized under section 263A(a) with respect to the section 614 property, and the costs of common features, that are incurred at any time through the end of the production period of the first productive well unit (section 614 costs) are included in the accumulated production expenditures for the first productive well unit.

(ii) *Subsequent well unit.* The accumulated production expenditures for a subsequent well do not include any costs included in the accumulated production expenditures for a first productive well unit. In the event that section 614 costs or common feature costs with respect to a section 614 property are incurred subsequent to the end of the production period of the first productive well unit, those common feature costs and undepleted section 614 costs are allocated among the accumulated production expenditures of wells being drilled as of the date such costs are incurred.

(6) *Allocation of interest capitalized with respect to first productive well unit.* Interest attributable to any productive or nonproductive well included in the first productive well unit (within the meaning of paragraph (c)(2)(ii) of this section) is allocated among and capitalized to the basis of the property associated with the first productive well unit. See § 1.263A-8(a)(2).

(7) *Example.* The provisions of this paragraph (c) are illustrated by the following example.

Example. (i) Corporation Z, an oil company, acquired a section 614 property in an onshore tract, Tract B, for development. In 1995, Corporation Z began site preparation activities on Tract B and also commenced drilling Well 1 on Tract B. Corporation Z was unable to establish, as provided in paragraph (a) of this section, a definite plan identifying the number and location of other wells planned on Tract B. In 1996, Corporation Z began drilling Well 2. On May 1, 1997, Well 2, a productive

§ 1.263A-14

26 CFR Ch. I (4-1-17 Edition)

well, was placed in service and all production activities reasonably expected to be undertaken with respect to Well 2 were completed. By that date, also, Well 1 was abandoned.

(ii) Well 2 is a first productive well (within the meaning of paragraph (c)(2)(i) of this section). Well 1 is a nonproductive well drilled prior to a first productive well. Under paragraph (c) of this section, Corporation Z must treat both Well 1 and Well 2 as part of the first productive well unit on the section 614 property. In accordance with paragraphs (c)(3) and (c)(4) of this section, the production period of the first productive well unit begins on the date physical site preparation activities are undertaken with respect to Well 1 in 1995 and ends on May 1, 1997, the date that Well 2 is placed in service and all production activities reasonably expected to be undertaken are completed. In accordance with paragraph (c)(5) of this section, the accumulated production expenditures for the first productive well unit include, among other capitalized costs, the entire section 614 property costs capitalized with respect to Tract B and all common feature costs incurred with respect to the section 614 property through May 1, 1997.

(iii) Any well that Corporation Z begins after May 1, 1997, is a separate unit of property. See paragraph (c)(2)(ii) of this section. Under paragraph (c)(3)(ii) of this section, the production period for any such well unit begins on the first day after May 1, 1997, on which Corporation Z undertakes physical site preparation activities with respect to the well unit. Moreover, Corporation Z does not include any of the section 614 property costs in the accumulated production expenditures for any well unit begun after May 1, 1997.

[T.D. 8584, 59 FR 67213, Dec. 29, 1994; 60 FR 16575, Mar. 31, 1995]

§ 1.263A-14 Rules for related persons.

Taxpayers must account for average excess expenditures allocated to related persons under applicable administrative pronouncements interpreting section 263A(f). See § 601.601(d)(2)(ii)(b) of this chapter.

[T.D. 8584, 59 FR 67215, Dec. 29, 1994]

§ 1.263A-15 Effective dates, transitional rules, and anti-abuse rule.

(a) *Effective dates*—(1) Sections 1.263A-8 through 1.263A-15 generally apply to interest incurred in taxable years beginning on or after January 1, 1995. In the case of property that is inventory in the hands of the taxpayer, however, these sections are effective for taxable years beginning on or after

January 1, 1995. Changes in methods of accounting necessary as a result of the rules in §§ 1.263A-8 through 1.263A-15 must be made under the terms and conditions prescribed by the Commissioner. Under these terms and conditions, the principles of § 1.263A-7 must be applied in revaluing inventory property.

(2) For taxable years beginning before January 1, 1995, taxpayers must take reasonable positions on their federal income tax returns when applying section 263A(f). For purposes of this paragraph (a)(2), a reasonable position is a position consistent with the temporary regulations, revenue rulings, revenue procedures, notices, and announcements concerning section 263A applicable in taxable years beginning before January 1, 1995. See § 601.601(d)(2)(ii)(b) of this chapter. For this purpose, Notice 88-99, 1988-2 C.B. 422, applies to taxable years beginning after August 17, 1988, in the case of inventory, and to interest incurred in taxable years beginning after August 17, 1988, in all other cases. Finally, under administrative procedures issued by the Commissioner, taxpayers may elect early application of §§ 1.263A-8 through 1.263A-15 to taxable years beginning on or after January 1, 1994, in the case of inventory property, and to interest incurred in taxable years beginning on or after January 1, 1994, in the case of property that is not inventory in the hands of the taxpayer.

(3) Section 1.263A-9(a)(4)(ix) generally applies to interest incurred in taxable years beginning on or after May 20, 2004. In the case of property that is inventory in the hands of the taxpayer, § 1.263A-9(a)(4)(ix) applies to taxable years beginning on or after May 20, 2004. Taxpayers may elect to apply § 1.263A-9(a)(4)(ix) to interest incurred in taxable years beginning on or after January 1, 1995, or, in the case of property that is inventory in the hands of the taxpayer, to taxable years beginning on or after January 1, 1995. A change in a taxpayer's treatment of interest to a method consistent with § 1.263A-9(a)(4)(ix) is a change in method of accounting to which sections 446 and 481 apply.

(b) *Transitional rule for accumulated production expenditures*—(1) *In general.*

Except as provided in paragraph (b)(2) of this section, costs incurred before the effective date of section 263A are included in accumulated production expenditures (within the meaning of § 1.263A-11) with respect to noninventory property only to the extent those costs were required to be capitalized under section 263 when incurred and would have been taken into account in determining the amount of interest required to be capitalized under former section 189 (relating to the capitalization of real property interest and taxes) or pursuant to an election that was in effect under section 266 (relating to the election to capitalize certain carrying charges).

(2) *Property used to produce designated property.* The basis of property acquired prior to 1987 and used to produce designated noninventory property after December 31, 1986, is included in accumulated production expenditures in accordance with § 1.263A-11(d) without regard to whether the basis would have been taken into account under former section 189 or section 266.

(c) *Anti-abuse rule.* The interest capitalization rules contained in §§ 1.263A-8 through 1.263A-15 must be applied by the taxpayer in a manner that is consistent with and reasonably carries out the purposes of section 263A(f). For example, in applying § 1.263A-10, regarding the definition of a unit of property, taxpayers may not divide a single unit of property to avoid property classifying the property as designated property. Similarly, taxpayers may not use loans in lieu of advance payments, tax-exempt parties, loan restructurings at measurement dates, or obligations bearing an unreasonably low rate of interest (even if such rate equals or exceeds the applicable Federal rate under section 1274(d)) to avoid the purposes of section 263A(f). For purposes of this paragraph (c), the presence of back-to-back loans with different rates of interest, and other uses of related parties to facilitate an avoidance of interest capitalization, evidences abuse. In such cases, the District Director may, based upon all the facts and circumstances, determine the amount of interest that must be capitalized in a manner that is

consistent with and reasonably carries out the purposes of section 263A(f).

[T.D. 8584, 59 FR 67215, Dec. 29, 1994, as amended by T.D. 8728, 62 FR 42062, Aug. 5, 1997; T.D. 9179, 70 FR 8730, Feb. 23, 2005]

§ 1.264-1 Premiums on life insurance taken out in a trade or business.

(a) *When premiums are not deductible.* Premiums paid by a taxpayer on a life insurance policy are not deductible from the taxpayer's gross income, even though they would otherwise be deductible as trade or business expenses, if they are paid on a life insurance policy covering the life of any officer or employee of the taxpayer, or any person (including the taxpayer) who is financially interested in any trade or business carried on by the taxpayer, when the taxpayer is directly or indirectly a beneficiary of the policy. For additional provisions relating to the nondeductibility of premiums paid on life insurance policies (whether under section 162 or any other section of the Code), see section 262, relating to personal, living, and family expenses, and section 265, relating to expenses allocable to tax-exempt income.

(b) *When taxpayer is a beneficiary.* If a taxpayer takes out a policy for the purpose of protecting himself from loss in the event of the death of the insured, the taxpayer is considered a beneficiary directly or indirectly under the policy. However, if the taxpayer is not a beneficiary under the policy, the premiums so paid will not be disallowed as deductions merely because the taxpayer may derive a benefit from the increased efficiency of the officer or employee insured. See section 162 and the regulations thereunder. A taxpayer is considered a beneficiary under a policy where, for example, he, as a principal member of a partnership, takes out an insurance policy on his own life irrevocably designating his partner as the sole beneficiary in order to induce his partner to retain his investment in the partnership. Whether or not the taxpayer is a beneficiary under a policy, the proceeds of the policy paid by reason of the death of the insured may be excluded from gross income whether the beneficiary is an individual or a corporation, except in the case of (1)

§ 1.264-2

26 CFR Ch. I (4-1-17 Edition)

certain transferees, as provided in section 101(a)(2); (2) portions of amounts of life insurance proceeds received at a date later than death under the provisions of section 101(d); and (3) life insurance policy proceeds which are includible in the gross income of a husband or wife under section 71 (relating to alimony) or section 682 (relating to income of an estate or trust in case of divorce, etc.). (See section 101(e).) For further reference, see, generally, section 101 and the regulations thereunder.

§ 1.264-2 Single premium life insurance, endowment, or annuity contracts.

Amounts paid or accrued on indebtedness incurred or continued, directly or indirectly, to purchase or to continue in effect a single premium life insurance or endowment contract, or to purchase or to continue in effect a single premium annuity contract purchased (whether from the insurer, annuitant, or any other person) after March 1, 1954, are not deductible under section 163 or any other provision of chapter 1 of the Code. This prohibition applies even though the insurance is not on the life of the taxpayer and regardless of whether or not the taxpayer is the annuitant or payee of such annuity contract. A contract is considered a single premium life insurance, endowment, or annuity contract, for the purposes of this section, if substantially all the premiums on the contract are paid within four years from the date on which the contract was purchased, or if an amount is deposited after March 1, 1954, with the insurer for payment of a substantial number of future premiums on the contract.

§ 1.264-3 Effective date; taxable years ending after March 1, 1954, subject to the Internal Revenue Code of 1939.

Pursuant to section 7851(a)(1)(C), the regulations prescribed in § 1.264-2, to the extent that they relate to amounts paid or accrued on indebtedness incurred or continued to purchase or carry a single premium annuity contract purchased after March 1, 1954, and to the extent they consider a contract a single premium life insurance, endowment, or annuity contract if an

amount is deposited after March 1, 1954, with the insurer for payment of a substantial number of future premiums on the contract, shall also apply to taxable years beginning before January 1, 1954, and ending after March 1, 1954, and to taxable years beginning after December 31, 1953, and ending after March 1, 1954, but before August 17, 1954, although such years are subject to the Internal Revenue Code of 1939.

§ 1.264-4 Other life insurance, endowment, or annuity contracts.

(a) *General rule.* Except as otherwise provided in paragraphs (d) and (e) of this section, no deduction shall be allowed under section 163 or any other provision of chapter 1 of the Code for any amount (determined under paragraph (b) of this section) paid or accrued during the taxable year on indebtedness incurred or continued to purchase or continue in effect a life insurance, endowment, or annuity contract (other than a single premium contract or a contract treated as a single premium contract) if such indebtedness is incurred pursuant to a plan of purchase which contemplates the systematic direct or indirect borrowing of part or all of the increases in the cash value of such contract (either from the insurer or otherwise). For the purposes of the preceding sentence, the term of *purchase* includes the payment of part or all of the premiums on a contract, and not merely payment of the premium due upon initial issuance of the contract. The rule of this paragraph applies whether or not the taxpayer is the insured, payee, or annuitant under the contract. the rule of this paragraph does not apply to contracts purchased by the taxpayer on or before August 6, 1963, even though there is a substantial increase in premiums after such date. The rule of this paragraph does not apply to any amount paid or accrued on indebtedness incurred or continued to purchase or carry a single premium life insurance, endowment, or annuity contract (including a contract treated as a single premium contract); the treatment of such amounts is governed by § 1.264-2.

(b) *Determination of amount not allowed.* The amount not allowed as a deduction under paragraph (a) of this section is determined with reference to the entire amount of borrowing to purchase or carry the contract, and is not limited with reference to the amount of borrowing of increases in the cash value. The rule of this paragraph may be illustrated by the following example:

Example. A, a calendar year taxpayer using the cash receipts and disbursements method of accounting, on January 1, 1964, purchases from a life insurance company a policy in the amount of \$100,000 with an annual gross premium of \$2,200. For the first policy year, A pays the annual premium by means other than by borrowing. For the second, third, fourth, and fifth policy years, A continues the policy in effect by incurring indebtedness pursuant to a plan referred to in paragraph (a) of this section. The years and amounts applicable to the policy are as follows:

| Years | Cumulative cash value of contract | Total loan outstanding | Interest paid at 4.8 percent |
|------------|-----------------------------------|------------------------|------------------------------|
| 1964 | \$370 | 0 | 0 |
| 1965 | 2,175 | \$2,200 | \$105.60 |
| 1966 | 4,000 | 4,400 | 211.20 |
| 1967 | 5,865 | 6,600 | 316.80 |
| 1968 | 7,745 | 8,800 | 422.40 |

On these facts (assuming that none of the exceptions contained in paragraph (d) of this section are applicable), no deduction is allowed for the interest paid during the year 1968. Moreover, the interest deduction will be disallowed for the taxable years 1965 through 1967 if such taxable years are not closed by reason of the statute of limitations or other rule of law.

(c) *Special rules.* For purposes of this section:

(1) *Determination of existence of a plan which contemplates systematic borrowing—(i) In general.* The determination of whether indebtedness is incurred or continued pursuant to a plan referred to in paragraph (a) of this section shall be made on the basis of all the facts and circumstances in each case. Unless the taxpayer shows otherwise, in the case of borrowing in connection with premiums for more than three years, the existence of a plan referred to in paragraph (a) of this section will be presumed. The mere fact that a taxpayer does not borrow to pay a premium in a particular year does

not in and of itself preclude the existence of a plan referred to in paragraph (a) of this section. A plan referred to in paragraph (a) of this section need not exist at the time the contract is entered into, but may come into existence at any time during the 7-year period following the taxpayer's purchase of the contract or following a substantial increase (referred to in paragraph (d)(1) of this section) in premiums on the contract.

(ii) *Premium attributable to more than one year.* For purposes of subdivision (i) of this subparagraph, if the stated annual premiums due on a contract vary in amount, borrowing in connection with any premium, the amount of which exceeds the amount of any other premium, on such contract may be considered borrowing to pay premiums for more than one year. The preceding sentence shall not apply where the borrowing is in connection with a substantially increased premium within the meaning of paragraph (d)(1) of this section.

(2) *Direct or indirect.* A plan referred to in paragraph (a) of this section may contemplate direct or indirect borrowing of increases in cash value of the contract directly or indirectly to pay premiums and may contemplate borrowing either from an insurance carrier, from a bank, or from any other person. Thus, for example, if a taxpayer borrows \$100,000 from a bank and uses the funds to purchase securities, later borrows \$100,000 from a second bank and uses the funds to repay the first bank, later sells the securities and uses the funds as a part of a plan referred to in paragraph (a) of this section to pay premiums on a contract of cash value life insurance, the deduction for interest paid in continuing the loan from the second bank shall not be allowed (assuming that none of the exceptions contained in paragraph (d) of this section are applicable). Moreover, a plan referred to in paragraph (a) of this section need not involve a pledge of the contract, but may contemplate unsecured borrowing or the use of other property.

(d) *Exceptions.* No deduction shall be denied under paragraph (a) of this section with respect to any amount paid

or accrued during a taxable year on indebtedness incurred or continued as part of a plan referred to in paragraph (a) of this section if any of the following exceptions apply.

(1) *The 7-year exception*—(i) *In general.* No part of 4 of the annual premiums due during the 7-year period (beginning with the date the first premium on the contract to which such plan relates was paid) is paid under such plan by means of indebtedness. For purposes of this exception, in the event of a substantial increase in any annual premium on a contract, a new 7-year period begins on the date such increased premium is paid. If premiums on a contract are payable other than on an annual basis (for example, monthly), the annual premium is the aggregate of premiums due for the year. See paragraph (c)(1)(ii) of this section for cases where one premium on a contract paid by means of indebtedness may be considered as more than one annual premium.

(ii) *Application of borrowings.* For purposes of subdivision (i) of this subparagraph, if during a 7-year period referred to in such subdivision the taxpayer, directly or indirectly, borrows with respect to more than one annual premium on a contract, such borrowing shall be considered first attributable to the premium for the current policy year (within the meaning of subdivision (iii) of this subparagraph) and then attributable to premiums for prior policy years beginning with the most recent prior policy year (but not including any prior policy year to the extent that such taxpayer has indebtedness outstanding with respect to the premium for such prior policy year). If such borrowing exceeds the premiums paid for the current policy year and for prior policy years and the taxpayer has, with respect to the current policy year, deposited premiums in advance of the due date of such premiums, such excess borrowing shall be considered indebtedness incurred to carry the contract which is attributable to the premiums deposited for succeeding policy years beginning with the premium for the next succeeding policy year. The preceding sentence shall not apply to a single premium contract referred to in § 1.264-2.

(iii) *Current policy year.* For purposes of subdivision (ii) of this subparagraph, the term *current policy year* refers to the policy year which begins with or within the taxable year of the taxpayer.

(iv) *Illustrations.* The provisions of subdivision (ii) of this subparagraph may be illustrated by the following examples:

Example 1. A, a calendar year taxpayer using the cash receipts and disbursements method of accounting, on January 1, 1964, purchases from a life insurance company a policy in the amount of \$100,000 with an annual gross premium of \$2,200. For the first four policy years, A initially pays the annual premium by means other than borrowing. On January 1, 1968, pursuant to a plan referred to in paragraph (a) of this section, A borrows \$10,000 with respect to the policy. Such borrowing is considered first attributable to paying the premium for the year 1968 and then attributable to paying the premiums for the years 1967, 1966, 1965, and 1964 (in part). No deduction is allowed for the interest paid by A on the \$10,000 indebtedness during the year 1968.

Example 2. The facts are the same as in *Example 1*, except that on January 1, 1964, A pays the first annual premium and deposits an amount equal to the second and third annual premiums, all such amounts initially being paid or deposited by means other than borrowing. On January 1, 1965, A deposits an amount equal to the fourth, fifth, and sixth annual premiums, and borrows \$4,400 pursuant to a plan referred to in paragraph (a) of this section. Such borrowing is considered attributable to the premiums paid for the policy years 1965 and 1964. On January 1, 1966, A deposits an amount equal to the seventh, eighth, and ninth annual premiums, and borrows \$6,600 pursuant to such plan. Such borrowing is considered attributable to the premium paid for the policy year 1966 and deposited for the policy years 1967 and 1968. No deduction is allowed for interest paid by A on the \$11,000 indebtedness during 1966. Moreover, the interest deduction will be disallowed for the taxable year 1965. However, if this contract is treated as a single premium contract under § 1.264-2 (by reason of deposit with the insurer of an amount for payment of a substantial number of future premiums), the deduction for interest on indebtedness incurred or continued to purchase or carry the contract would be denied without reference to this section.

(2) *The \$100 exception.* The total amount paid or accrued during the taxable year by the taxpayer who has entered one or more plans referred to in paragraph (a) of this section for which

(without regard to this subparagraph) no deduction would be allowable under paragraph (a) of this section does not exceed \$100. Where the amount so paid or accrued during the taxable year exceeds \$100, the entire amount shall be subject to the general rule of paragraph (a) of this section.

(3) *The unforeseen events exception.* The amount is paid or accrued by the taxpayer on indebtedness incurred because of an unforeseen substantial loss of such taxpayer's income or an unforeseen substantial increase in such taxpayer's financial obligations. A loss of income or increase in financial obligations is not unforeseen, within the meaning of this subparagraph, if at the time of the purchase of the contract such event was or could have been foreseen. College education expenses are foreseeable; however, if college expenses substantially increase, then to the extent that such increases are unforeseen, this exception will apply. This exception applies only if the plan referred to in paragraph (a) of this section arises because of the unforeseen event. Thus, for example, if a taxpayer or his family incur substantial unexpected medical expenses or the taxpayer is laid off from his job, and for that reason systematically borrows against the cash value of a previously purchased contract, the deduction for the interest paid on the loan will not be denied, whether or not the loan is used to pay a premium on the contract.

(4) *The trade or business exception.* The indebtedness is incurred by the taxpayer in connection with his trade or business. To be within this exception, the indebtedness must be incurred to finance business obligations rather than to finance cash value life insurance. Thus, if a taxpayer pledges a life insurance, endowment, or annuity contract as part of the collateral for a loan to finance the expansion of inventory or capital improvements for his business, no part of the deduction for interest on such loan will be denied under paragraph (a) of this section. Borrowing by a business taxpayer to finance business life insurance such as under so-called keyman, split dollar, or stock retirement plans is not considered to be incurred in connection with the taxpayer's trade or business within

the meaning of this subparagraph. The determination of whether the indebtedness is incurred in connection with the taxpayer's trade or business, within the meaning of this exception, rather than to finance cash value life insurance shall be made on the basis of all the facts and circumstances. The provisions of this subparagraph may be illustrated by the following examples:

Example 1. Corporation M each year borrows substantial sums to carry on its business. Corporation M agrees to provide a retirement plan for its employees and purchases level premium life insurance to fund its obligation under the plan. The mere fact that M Corporation purchases a cash value life insurance policy will not cause its deduction for interest paid on its normal indebtedness to be denied even though the policy is later used as part of the collateral for its normal indebtedness.

Example 2. Corporation R has \$200,000 of bonds outstanding and purchases cash value life insurance policies on several of its key employees. Such purchase by R Corporation will not, of itself, cause its deduction for interest on its bonded indebtedness to be denied. If, however, the premiums on the life insurance policies are \$10,000 each year, the cash value increases by \$8,000 each year, and R Corporation increases its indebtedness by \$10,000 each year, its deduction for interest on such indebtedness will not be allowed under the rule of paragraph (a) of this section. On the other hand, the absence of such a directly parallel increase will not of itself establish that the deduction for interest is allowable.

(e) *Applicability of section.* The rules of this section apply with respect to taxable years beginning after December 31, 1963, but only with respect to contracts purchased after August 6, 1963. With respect to contracts entered into on or before August 6, 1963, but purchased or acquired whether from the insurer, insured, or any other person (other than by gift, bequest, or inheritance, or in a transaction to which section 381(a) of the Code applies) after such date, the rules of this section apply after such purchase or acquisition.

[T.D. 6773, 29 FR 15751, Nov. 24, 1964]

§ 1.265-1 Expenses relating to tax-exempt income.

(a) *Nondeductibility of expenses allocable to exempt income.* (1) No amount shall be allowed as a deduction under

any provision of the Code for any expense or amount which is otherwise allowable as a deduction and which is allocable to a class or classes of exempt income other than a class or classes of exempt interest income.

(2) No amount shall be allowed as a deduction under section 212 (relating to expenses for production of income) for any expense or amount which is otherwise allowable as a deduction and which is allocable to a class or classes of exempt interest income.

(b) *Exempt income and nonexempt income.* (1) As used in this section, the term *class of exempt income* means any class of income (whether or not any amount of income of such class is received or accrued) wholly exempt from the taxes imposed by Subtitle A of the Code. For purposes of this section, a class of income which is considered as wholly exempt from the taxes imposed by subtitle A includes any class of income which is:

(i) Wholly excluded from gross income under any provision of Subtitle A, or

(ii) Wholly exempt from the taxes imposed by Subtitle A under the provisions of any other law.

(2) As used in this section the term *nonexempt income* means any income which is required to be included in gross income.

(c) *Allocation of expenses to a class or classes of exempt income.* Expenses and amounts otherwise allowable which are directly allocable to any class or classes of exempt income shall be allocated thereto; and expenses and amounts directly allocable to any class or classes of nonexempt income shall be allocated thereto. If an expense or amount otherwise allowable is indirectly allocable to both a class of nonexempt income and a class of exempt income, a reasonable proportion thereof determined in the light of all the facts and circumstances in each case shall be allocated to each.

(d) *Statement of classes of exempt income; records.* (1) A taxpayer receiving any class of exempt income or holding any property or engaging in any activity the income from which is exempt shall submit with his return as a part thereof an itemized statement, in detail, showing (i) the amount of each

class of exempt income, and (ii) the amount of expenses and amounts otherwise allowable allocated to each such class (the amount allocated by apportionment being shown separately) as required by paragraph (c) of this section. If an item is apportioned between a class of exempt income and a class of nonexempt income, the statement shall show the basis of the apportionment. Such statement shall also recite that each deduction claimed in the return is not in any way attributable to a class of exempt income.

(2) The taxpayer shall keep such records as will enable him to make the allocations required by this section. See section 6001 and the regulations thereunder.

§ 1.265-2 Interest relating to tax exempt income.

(a) *In general.* No amount shall be allowed as a deduction for interest on any indebtedness incurred or continued to purchase or carry obligations, the interest on which is wholly exempt from tax under subtitle A of the Code, such as municipal bonds, Panama Canal loan 3-percent bonds, or obligations of the United States, the interest on which is wholly exempt from tax under Subtitle A, and which were issued after September 24, 1917, and not originally subscribed for by the taxpayer. Interest paid or accrued within the taxable year on indebtedness incurred or continued to purchase or carry (1) obligations of the United States issued after September 24, 1917, the interest on which is not wholly exempt from the taxes imposed under Subtitle A of the Code, or (2) obligations of the United States issued after September 24, 1917, and originally subscribed for by the taxpayer, the interest on which is wholly exempt from the taxes imposed by Subtitle A of the Code, is deductible. For rules as to the inclusion in gross income of interest on certain governmental obligations, see section 103 and the regulations thereunder.

(b) *Special rule for certain financial institutions.* (1) No deduction shall be disallowed, for taxable years ending after February 26, 1964, under section 265(2) for interest paid or accrued by a financial institution which is a face-amount

certificate company registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 and following) and which is subject to the banking laws of the State in which it is incorporated, on face-amount certificates (as defined in section 2(a)(15) of the Investment Company Act of 1940) issued by such institution and on amounts received for the purchase of such certificates to be issued by the institution, if the average amount of obligations, the interest on which is wholly exempt from the taxes imposed by Subtitle A of the Code, held by such institution during the taxable year, does not exceed 15 percent of the average amount of the total assets of such institution during such year. See subparagraph (3) of this paragraph for treatment of interest paid or accrued on face-amount certificates where the figure is in excess of 15 percent. Interest expense other than that paid or accrued on face-amount certificates or on amounts received for the purchase of such certificates does not come within the rules of this paragraph.

(2) This subparagraph is prescribed under the authority granted the Secretary or his delegate under section 265(2) to prescribe regulations governing the determination of the average amount of tax-exempt obligations and of the total assets held during an institution's taxable year. The average amount of tax-exempt obligations held during an institution's taxable year shall be the average of the amounts of tax-exempt obligations held at the end of each month ending within such taxable year. The average amount of total assets for a taxable year shall be the average of the total assets determined at the beginning and end of the institution's taxable year. If the Commissioner, however, determines that any such amount is not fairly representative of the average amount of tax-exempt obligations or total assets, as the case may be, held by such institution during such taxable year, then the Commissioner shall determine the amount which is fairly representative of the average amount of tax-exempt obligations or total assets, as the case may be. The percentage which the average amount of tax-exempt obligations is of the average amount of total assets is determined by dividing the av-

erage amount of tax-exempt obligations by the average amount of total assets, and multiplying by 100. The amount of tax-exempt obligations means that portion of the total assets of the institution which consists of obligations the interest on which is wholly exempt from tax under Subtitle A of the Code, and valued at their adjusted basis, appropriately adjusted for amortization of premium or discount. Total assets means the sum of the money, plus the aggregate of the adjusted basis of the property other than money held by the taxpayer in good faith for the purpose of the business. Such adjusted basis for any asset is its adjusted basis for determining gain upon sale or exchange for Federal income tax purposes.

(3) If the percentage computation required by subparagraph (2) of this paragraph results in a figure in excess of 15 percent for the taxable year, there is interest that does not come within the special rule for certain financial institutions contained in section 265(2). The amount of such interest is obtained by multiplying the total interest paid or accrued for the taxable year on face-amount certificates and on amounts received for the purchase of such certificates by the percentage figure equal to the excess of the percentage figure computed under subparagraph (2) of this paragraph over 15 percent. See paragraph (a) for the disallowance of interest on indebtedness incurred or continued to purchase or carry obligations the interest on which is wholly exempt from tax under Subtitle A of the Code.

(4) Every financial institution claiming the benefits of the special rule for certain financial institutions contained in section 265(2) shall file with its return for the taxable year:

(i) A statement showing that it is a face-amount certificate company registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 and following) and that it is subject to the banking laws of the State in which it is incorporated.

(ii) A detailed schedule showing the computation of the average amount of tax-exempt obligations, the average amount of total assets of such institutions, and the total amount of interest

§ 1.265-3

26 CFR Ch. I (4-1-17 Edition)

paid or accrued on face-amount certificates and on amounts received for the purchase of such certificates for the taxable year.

[T.D. 6927, 32 FR 13221, Sept. 19, 1967]

§ 1.265-3 Nondeductibility of interest relating to exempt-interest dividends.

(a) *In general.* No deduction is allowed to a shareholder of a regulated investment company for interest on indebtedness that relates to exempt-interest dividends distributed by the company to the shareholder during the shareholder's taxable year.

(b) *Interest relating to exempt-interest dividends.* (1) All or a portion of the interest on an indebtedness relates to exempt-interest dividends if the indebtedness is either incurred or continued to purchase or carry shares of stock of a regulated investment company that distributes exempt-interest dividends (as defined in section 852(b)(5) of the Code) to the holder of the shares during the shareholder's taxable year.

(2) To determine the amount of interest that relates to the exempt-interest dividends the total amount of interest paid or accrued on the indebtedness is multiplied by a fraction. The numerator of the fraction is the amount of exempt-interest dividends received by the shareholder. The denominator of the fraction is the sum of the exempt-interest dividends and taxable dividends received by the shareholder (excluding capital gain dividends received by the shareholder and capital gains required to be included in the shareholder's computation of long-term capital gains under section 852(b)(3)(D)).

[T.D. 7601, 44 FR 16013, Mar. 16, 1979]

§ 1.266-1 Taxes and carrying charges chargeable to capital account and treated as capital items.

(a)(1) *In general.* In accordance with section 266, items enumerated in paragraph (b)(1) of this section may be capitalized at the election of the taxpayer. Thus, taxes and carrying charges with respect to property of the type described in this section are chargeable to capital account at the election of the taxpayer, notwithstanding that they are otherwise expressly deductible under provisions of Subtitle A of the

Code. No deduction is allowable for any items so treated.

(2) See §§ 1.263A-8 through 1.263A-15 for rules regarding the requirement to capitalize interest, that apply prior to the application of this section. After applying §§ 1.263A-8 through 1.263A-15, a taxpayer may elect to capitalize interest under section 266 with respect to designated property within the meaning of § 1.263A-8(b), provided a computation under any provision of the Internal Revenue Code is not thereby materially distorted, including computations relating to the source of deductions.

(b) *Taxes and carrying charges.* (1) The taxpayer may elect, as provided in paragraph (c) of this section, to treat the items enumerated in this subparagraph which are otherwise expressly deductible under the provisions of Subtitle A of the Code as chargeable to capital account either as a component of original cost or other basis, for the purposes of section 1012, or as an adjustment to basis, for the purposes of section 1016(a)(1). The items thus chargeable to capital account are:

(i) In the case of unimproved and unproductive real property: Annual taxes, interest on a mortgage, and other carrying charges.

(ii) In the case of real property, whether improved or unimproved and whether productive or unproductive:

(a) Interest on a loan (but not theoretical interest of a taxpayer using his own funds),

(b) Taxes of the owner of such real property measured by compensation paid to his employees,

(c) Taxes of such owner imposed on the purchase of materials, or on the storage, use, or other consumption of materials, and

(d) Other necessary expenditures, paid or incurred for the development of the real property or for the construction of an improvement or additional improvement to such real property, up to the time the development or construction work has been completed. The development or construction work with respect to which such items are incurred may relate to unimproved and unproductive real estate whether the construction work will make the property productive of income subject to

tax (as in the case of a factory) or not (as in the case of a personal residence), or may relate to property already improved or productive (as in the case of a plant addition or improvement, such as the construction of another floor on a factory or the installation of insulation therein).

(iii) In the case of personal property:

(a) Taxes of an employer measured by compensation for services rendered in transporting machinery or other fixed assets to the plant or installing them therein,

(b) Interest on a loan to purchase such property or to pay for transporting or installing the same, and

(c) Taxes of the owner thereof imposed on the purchase of such property or on the storage, use, or other consumption of such property,

paid or incurred up to the date of installation or the date when such property is first put into use by the taxpayer, whichever date is later.

(iv) Any other taxes and carrying charges with respect to property, otherwise deductible, which in the opinion of the Commissioner are, under sound accounting principles, chargeable to capital account.

(2) The sole effect of section 266 is to permit the items enumerated in subparagraph (1) of this paragraph to be chargeable to capital account notwithstanding that such items are otherwise expressly deductible under the provisions of Subtitle A of the Code. An item not otherwise deductible may not be capitalized under section 266.

(3) In the absence of a provision in this section for treating a given item as a capital item, this section has no effect on the treatment otherwise accorded such item. Thus, items which are otherwise deductible are deductible notwithstanding the provisions of this section, and items which are otherwise treated as capital items are to be so treated. Similarly, an item not otherwise deductible is not made deductible by this section. Nor is the absence of a provision in this section for treating a given item as a capital item to be construed as withdrawing or modifying the right now given to the taxpayer under any other provisions of subtitle A of the Code, or of the regulations there-

under, to elect to capitalize or to deduct a given item.

(c) *Election to charge taxes and carrying charges to capital account.* (1) If for any taxable year there are two or more items of the type described in paragraph (b)(1) of this section, which relate to the same project to which the election is applicable, the taxpayer may elect to capitalize any one or more of such items even though he does not elect to capitalize the remaining items or to capitalize items of the same type relating to other projects. However, if expenditures for several items of the same type are incurred with respect to a single project, the election to capitalize must, if exercised, be exercised as to all items of that type. For purposes of this section, a *project* means, in the case of items described in paragraph (b)(1)(ii) of this section, a particular development of, or construction of an improvement to, real property, and in the case of items described in paragraph (b)(1)(iii) of this section, the transportation and installation of machinery or other fixed assets.

(2)(i) An election with respect to an item described in paragraph (b)(1)(i) of this section is effective only for the year for which it is made.

(ii) An election with respect to an item described in:

(a) Paragraph (b)(1)(ii) of this section is effective until the development or construction work described in that subdivision has been completed;

(b) Paragraph (b)(1)(iii) of this section is effective until the later of either the date of installation of the property described in that subdivision, or the date when such property is first put into use by the taxpayer;

(c) Paragraph (b)(1)(iv) of this section is effective as determined by the Commissioner.

Thus, an item chargeable to capital account under this section must continue to be capitalized for the entire period described in this subdivision applicable to such election although such period may consist of more than one taxable year.

(3) If the taxpayer elects to capitalize an item or items under this section, such election shall be exercised by filing with the original return for the

§ 1.267(a)-1

26 CFR Ch. I (4-1-17 Edition)

year for which the election is made a statement indicating the item or items (whether with respect to the same project or to different projects) which the taxpayer elects to treat as chargeable to capital account. Elections filed for taxable years beginning before January 1, 1954, and for taxable years ending before August 17, 1954, under section 24(a)(7) of the Internal Revenue Code of 1939, and the regulations thereunder, shall have the same effect as if they were filed under this section. See section 7807(b)(2).

(d) The following examples are illustrative of the application of the provisions of this section:

Example 1. In 1956 and 1957 A pays annual taxes and interest on a mortgage on a piece of real property. During 1956, the property is vacant and unproductive, but throughout 1957 A operates the property as a parking lot. A may capitalize the taxes and mortgage interest paid in 1956, but not the taxes and mortgage interest paid in 1957.

Example 2. In February 1957, B began the erection of an office building for himself. B in 1957, in connection with the erection of the building, paid \$6,000 social security taxes, which in his 1957 return he elected to capitalize. B must continue to capitalize the social security taxes paid in connection with the erection of the building until its completion.

Example 3. Assume the same facts as in *Example 2* except that in November 1957, B also begins to build a hotel. In 1957 B pays \$3,000 social security taxes in connection with the erection of the hotel. B's election to capitalize the social security taxes paid in erecting the office building started in February 1957 does not bind him to capitalize the social security taxes paid in erecting the hotel; he may deduct the \$3,000 social security taxes paid in erecting the hotel.

Example 4. In 1957, M Corporation began the erection of a building for itself, which will take three years to complete. M Corporation in 1957 paid \$4,000 social security taxes and \$8,000 interest on a building loan in connection with this building. M Corporation may elect to capitalize the social security taxes although it deducts the interest charges.

Example 5. C purchases machinery in 1957 for use in his factory. He pays social security taxes on the labor for transportation and installation of the machinery, as well as interest on a loan to obtain funds to pay for the machinery and for transportation and installation costs. C may capitalize either the social security taxes or the interest, or both, up to the date of installation or until the machinery is first put into use by him, whichever date is later.

(e) *Allocation.* If any tax or carrying charge with respect to property is in part a type of item described in paragraph (b) of this section and in part a type of item or items with respect to which no election to treat as a capital item is given, a reasonable proportion of such tax or carrying charge, determined in the light of all the facts and circumstances in each case, shall be allocated to each item. The rule of this paragraph may be illustrated by the following example:

Example. N Corporation, the owner of a factory in New York on which a new addition is under construction, in 1957 pays its general manager, B, a salary of \$10,000 and also pays a New York State unemployment insurance tax of \$81 on B's salary. B spends nine-tenths of his time in the general business of the firm and the remaining one-tenth in supervising the construction work. N Corporation treats as expenses \$9,000 of B's salary, and charges the remaining \$1,000 to capital account. N Corporation may elect to capitalize \$8.10 of the \$81 New York State unemployment insurance tax paid in 1957 since such tax is deductible under section 164.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 8584, 59 FR 67215, Dec. 29, 1994]

§ 1.267(a)-1 Deductions disallowed.

(a) *Losses.* Except in cases of distributions in corporate liquidations, no deduction shall be allowed for losses arising from direct or indirect sales or exchanges of property between persons who, on the date of the sale or exchange, are within any one of the relationships specified in section 267(b). See § 1.267(b)-1.

(b) *Unpaid expenses and interest.* (1) No deduction shall be allowed a taxpayer for trade or business expenses otherwise deductible under section 162, for expenses for production of income otherwise deductible under section 212, or for interest otherwise deductible under section 163:

(i) If, at the close of the taxpayer's taxable year within which such items are accrued by the taxpayer or at any time within 2½ months thereafter, both the taxpayer and the payee are persons within any one of the relationships specified in section 267(b) (see § 1.267(b)-1); and

(ii) If the payee is on the cash receipts and disbursements method of accounting with respect to such items of gross income for his taxable year in which or with which the taxable year of accrual by the debtor-taxpayer ends; and

(iii) If, within the taxpayer's taxable year within which such items are accrued by the taxpayer and 2½ months after the close thereof, the amount of such items is not paid and the amount of such items is not otherwise (under the rules of constructive receipt) includible in the gross income of the payee.

(2) The provisions of section 267(a)(2) and this paragraph do not otherwise affect the general rules governing the allowance of deductions under an accrual method of accounting. For example, if the accrued expenses or interest are paid after the deduction has become disallowed under section 267(a)(2), no deduction would be allowable for the taxable year in which payment is made, since an accrual item is deductible only in the taxable year in which it is properly accruable.

(3) The expenses and interest specified in section 267(a)(2) and this paragraph shall be considered as paid for purposes of that section to the extent of the fair market value on the date of issue of notes or other instruments of similar effect received in payment of such expenses or interest if such notes or other instruments were issued in such payment by the taxpayer within his taxable year or within 2½ months after the close thereof. The fair market value on the date of issue of such notes or other instruments of similar effect is includible in the gross income of the payee for the taxable year in which he receives the notes or other instruments.

(4) The provisions of this paragraph may be illustrated by the following example:

Example. A, an individual, is the holder and owner of an interest-bearing note of the M Corporation, all the stock of which was owned by him on December 31, 1956. A and the M Corporation make their income tax returns for a calendar year. The M Corporation uses an accrual method of accounting. A uses a combination of accounting methods permitted under section 446(c)(4) in which he uses the cash receipts and disbursements

method in respect of items of gross income. The M Corporation does not pay any interest on the note to A during the calendar year 1956 or within 2½ months after the close of that year, nor does it credit any interest to A's account in such a manner that it is subject to his unqualified demand and thus is constructively received by him. M Corporation claims a deduction for the year 1956 for the interest accruing on the note in that year. Since A is on the cash receipts and disbursements method in respect of items of gross income, the interest is not includible in his return for the year 1956. Under the provisions of section 267(a)(2) and this paragraph, no deduction for such interest is allowable in computing the taxable income of the M Corporation for the taxable year 1956 or for any other taxable year. However, if the interest had actually been paid to A on or before March 15, 1957, or if it had been made available to A before that time (and thus had been constructively received by him), the M Corporation would be allowed to deduct the amount of the payment in computing its taxable income for 1956.

(c) *Scope of section.* Section 267(a) requires that deductions for losses or unpaid expenses or interest described therein be disallowed even though the transaction in which such losses, expenses, or interest were incurred was a bona fide transaction. However, section 267 is not exclusive. No deduction for losses or unpaid expenses or interest arising in a transaction which is not bona fide will be allowed even though section 267 does not apply to the transaction.

§ 1.267(a)-2T Temporary regulations; questions and answers arising under the Tax Reform Act of 1984 (temporary).

(a) *Introduction*—(1) *Scope.* This section prescribes temporary question and answer regulations under section 267(a) and related provisions as amended by section 174 of the Tax Reform Act of 1984, Pub. L. No. 98-369.

(2) *Effective date.* Except as otherwise provided by *Answer 2* or *Answer 3* in paragraph (c) of this section, the effective date set forth in section 174(c) of the Tax Reform Act of 1984 applies to this section.

(b) *Questions applying section 267(a)(2) and (b) generally.* The following questions and answers deal with the application of section 267(a)(2) and (b) generally:

Question 1: Does section 267(a)(2) ever apply to defer the deduction of an otherwise deductible amount if the person to whom the payment is to be made properly uses the completed contract method of accounting with respect to such amount?

Answer 1: No. Section 267(a)(2) applies only if an otherwise deductible amount is owed to a related person under whose method of accounting such amount is not includible in income unless paid to such person. Regardless of when payment is made, an amount owed to a contractor using the completed contract method of accounting is includible in the income of the contractor in accordance with § 1.451-3(d) in the year in which the contract is completed or in which certain disputes are resolved.

Question 2: Does section 267(a)(2) ever apply to defer the deduction of otherwise deductible original issue discount as defined in sections 163(e) and 1271 through 1275 (“the OID rules”)?

Answer 2: No. Regardless of when payment is made, an amount owed to a lender that constitutes original issue discount is included in the income of the lender periodically in accordance with the OID rules. Similarly, section 267(a)(2) does not apply to defer an otherwise deductible amount to the extent section 467 or section 7872 requires periodic inclusion of such amount in the income of the person to whom payment is to be made, even though payment has not been made.

Question 3: Does section 267(a)(2) ever apply to defer the deduction of otherwise deductible unstated interest determined to exist under section 483?

Answer 3: Yes. If section 483 recharacterizes any amount as unstated interest and the other requirements of section 267(a)(2) are met, a deduction for such unstated interest will be deferred under section 267.

Question 4: Does section 267(a)(2) ever apply to defer the deduction of otherwise deductible cost recovery, depreciation, or amortization?

Answer 4: Yes, in certain cases. In general, section 267(a)(2) does not apply to defer the deduction of otherwise deductible cost recovery, depreciation, or amortization. Notwithstanding this general rule, if the other requirements of section 267(a)(2) are met, section

267(a)(2) does apply to defer deductions for cost recovery, depreciation, or amortization of an amount owed to a related person for interest or rent or for the performance or nonperformance of services, which amount the taxpayer payor capitalized or treated as a deferred expense (unless the taxpayer payor elected to capitalize or defer the amount and section 267(a)(2) would not have deferred the deduction of such amount if the taxpayer payor had not so elected). Amounts owed for services that may be subject to this provision include, for example, amounts owed for acquisition, development, or organizational services or for covenants not to compete. In applying this rule, payments made between persons described in any of the paragraphs of section 267(b) (as modified by section 267(e)) will be closely scrutinized to determine whether they are made in respect of capitalized costs (or costs treated as deferred expenses) that are subject to deferral under section 267(a)(2), or in respect of other capitalized costs not so subject.

Question 5: If a deduction in respect of an otherwise deductible amount is deferred by section 267(a)(2) and, prior to the time the amount is includible in the gross income of the person to whom payment is to be made, such person and the payor taxpayer cease to be persons specified in any of the paragraphs of section 267(b) (as modified by section 267(e)), is the deduction allowable as of the day on which the relationship ceases?

Answer 5: No. The deduction is not allowable until the day as of which the amount is includible in the gross income of the person to whom payment of the amount is made, even though the relationship ceases to exist at an earlier time.

Question 6: Do references in other sections to persons described in section 267(b) incorporate changes made to section 267(b) by section 174 of the Tax Reform Act of 1984?

Answer 6: Yes. References in other sections to persons described in section 267(b) take into account changes made to section 267(b) by section 174 of the Tax Reform Act of 1984 (without modification by section 267(e)(1)). For example, a transfer after December 31, 1983

(the effective date of the new section 267(b)(3) relationship added by the Tax Reform Act of 1984) of section 1245 class property placed in service before January 1, 1981, from one corporation to another corporation, 11 percent of the stock of which is owned by the first corporation, will not constitute recovery property (as defined in section 168) in the hands of the second corporation by reason of section 168(e)(4) (A)(i) and (D).

(c) *Questions applying section 267(a) to partnerships.* The following questions and answers deal with the application of section 267(a) to partnerships:

Question 1: Does section 267(a) disallow losses and defer otherwise deductible amounts at the partnership (entity) level?

Answer 1: Yes. If a loss realized by a partnership from a sale or exchange of property is disallowed under section 267(a)(1), that loss shall not enter into the computation of the partnership's taxable income. If an amount that otherwise would be deductible by a partnership is deferred by section 267(a)(2), that amount shall not enter into the computation of the partnership's taxable income until the taxable year of the partnership in which falls the day on which the amount is includible in the gross income of the person to whom payment of the amount is made.

Question 2: Does section 267(a)(1) ever apply to disallow a loss if the sale or exchange giving rise to the loss is between two partnerships even though the two partnerships are not persons specified in any of the paragraphs of section 267(b)?

Answer 2: Yes. If the other requirements of section 267(a)(1) are met, section 267(a)(1) applies to such losses arising as a result of transactions entered into after December 31, 1984 between partnerships not described in any of the paragraphs of section 267(b) as follows, and § 1.267(b)-1(b) does not apply. If the two partnerships have one or more common partners (*i.e.*, if any person owns directly, indirectly, or constructively any capital or profits interest in each of such partnerships), or if any partner in either partnership and one or more partners in the other partnership are persons specified in any of the paragraphs of section 267(b)

(without modification by section 267(e)), a portion of the selling partnership's loss will be disallowed under section 267(a)(1). The amount disallowed under this rule is the greater of: (1) The amount that would be disallowed if the transaction giving rise to the loss had occurred between the selling partnership and the separate partners of the purchasing partnership (in proportion to their respective interests in the purchasing partnership); or (2) the amount that would be disallowed if such transaction had occurred between the separate partners of the selling partnership (in proportion to their respective interests in the selling partnership) and the purchasing partnership. Notwithstanding the general rule of this paragraph (c) *Answer 2*, no disallowance shall occur if the amount that would be disallowed pursuant to the immediately preceding sentence is less than 5 percent of the loss arising from the sale or exchange.

Question 3: Does section 267(a)(2) ever apply to defer an otherwise deductible amount if the taxpayer payor is a partnership and the person to whom payment of such amount is to be made is a partnership even though the two partnerships are not persons specified in any of the paragraphs of section 267(b) (as modified by section 267(e))?

Answer 3: Yes. If the other requirements of section 267(a)(2) are met, section 267(a)(2) applies to such amounts arising as a result of transactions entered into after December 31, 1984 between partnerships not described in any of the paragraphs of section 267(b) (as modified by section 267(e)) as follows, and § 1.267(b)-1(b) does not apply. If the two partnerships have one or more common partners (*i.e.*, if any person owns directly, indirectly, or constructively any capital or profits interest in each of such partnerships), or if any partner in either partnership and one or more partners in the other partnership are persons specified in any of the paragraphs of section 267(b) (without modification by section 267(e)), a portion of the payor partnership's otherwise allowable deduction will be deferred under section 267(a)(2). The amount deferred under this rule is the greater of: (1) The amount that would be deferred if the transaction giving

rise to the otherwise allowable deduction had occurred between the payor partnership and the separate partners of the payee partnership (in proportion to their respective interests in the payee partnership); or (2) the amount that would be deferred if such transaction had occurred between the separate partners of the payor partnership (in proportion to their respective interests in the payor partnership) and the payee partnership. Notwithstanding the general rule of this paragraph (c) *Answer 3*, no deferral shall occur if the amount that would be deferred pursuant to the immediately preceding sentence is less than 5 percent of the otherwise allowable deduction.

Example. On May 1, 1985, partnership AB enters into a transaction whereby it accrues an otherwise deductible amount to partnership AC. AC is on the cash receipts and disbursements method of accounting. A holds a 5 percent capital and profits interest in AB and a 49 percent capital and profits interest in AC, and A's interest in each item of the income, gain, loss, deduction, and credit of each partnership is 5 percent and 49 percent, respectively. B and C are not related. Notwithstanding that AB and AC are not persons specified in section 267(b), 49 percent of the deduction in respect of such amount will be deferred under section 267(a)(2). The result would be the same if A held a 49 percent interest in AB and a 5 percent interest in AC. However, if A held more than 50 percent of the capital or profits interest of either AB or AC, the entire deduction in respect of such amount would be deferred under section 267(a)(2).

Question 4: What does the phrase *incurred at an annual rate not in excess of 12 percent* mean as used in section 267(e)(5)(C)(ii)?

Answer 4: The phrase refers to interest that accrues but is not includible in the income of the person to whom payment is to be made during the taxable year of the payor. Thus, in determining whether the requirements of section 267(e)(5) (providing an exception to certain provisions of section 267 for certain expenses and interest of partnerships owning low income housing) are met with respect to a transaction, the requirement of section 267(e)(5)(C)(ii) will be satisfied, even though the total interest (both stated and unstated) paid or accrued in any taxable year of the payor taxpayer exceeds 12 percent, if the interest in excess of 12 percent

per annum, compounded semi-annually, on the outstanding loan balance (principal and accrued but unpaid interest) is includible in the income of the person to whom payment is to be made no later than the last day of such taxable year of the payor taxpayer.

(98 Stat. 704, 26 U.S.C. 267; 98 Stat. 589, 26 U.S.C. 706; 68A Stat. 367, 26 U.S.C. 1502; 68A Stat. 917, 26 U.S.C. 7805)

[T.D. 7991, 49 FR 46995, Nov. 30, 1984]

§ 1.267(a)-3 Deduction of amounts owed to related foreign persons.

(a) *Purpose and scope.* This section provides rules under section 267(a) (2) and (3) governing when an amount owed to a related foreign person that is otherwise deductible under Chapter 1 may be deducted. Paragraph (b) of this section provides the general rules, and paragraph (c) of this section provides exceptions and special rules.

(b) *Deduction of amount owed to related foreign person—(1) In general.* Except as provided in paragraph (c) of this section, section 267(a)(3) requires a taxpayer to use the cash method of accounting with respect to the deduction of amounts owed to a related foreign person. An amount that is owed to a related foreign person and that is otherwise deductible under Chapter 1 thus may not be deducted by the taxpayer until such amount is paid to the related foreign person. For purposes of this section, a related foreign person is any person that is not a United States person within the meaning of section 7701(a)(30), and that is related (within the meaning of section 267(b)) to the taxpayer at the close of the taxable year in which the amount incurred by the taxpayer would otherwise be deductible. Section 267(f) defines *controlled group* for purposes of section 267(b) without regard to the limitations of section 1563(b). An amount is treated as paid for purposes of this section if the amount is considered paid for purposes of section 1441 or section 1442 (including an amount taken into account pursuant to section 884(f)).

(2) *Amounts covered.* This section applies to otherwise deductible amounts that are of a type described in section 871(a)(1) (A), (B) or (D), or in section 881(a) (1), (2) or (4). The rules of this section also apply to interest that is

from sources outside the United States. Amounts other than interest that are from sources outside the United States, and that are not income of a related foreign person effectively connected with the conduct by such related foreign person of a trade or business within the United States, are not subject to the rules of section 267(a) (2) or (3) or this section. See paragraph (c) of this section for rules governing the treatment of amounts that are income of a related foreign person effectively connected with the conduct of a trade or business within the United States by such related foreign person.

(3) *Change in method of accounting.* A taxpayer that uses a method of accounting other than that required by the rules of this section must change its method of accounting to conform its method to the rules of this section. The taxpayer's change in method must be made pursuant to the rules of section 446(e), the regulations thereunder, and any applicable administrative procedures prescribed by the Commissioner. Because the rules of this section prescribe a method of accounting, these rules apply in the determination of taxpayer's earnings and profits pursuant to § 1.1312-6(a).

(4) *Examples.* The provisions of this paragraph (b) may be illustrated by the following examples:

Example 1. (i) FC, a corporation incorporated in Country X, owns 100 percent of the stock of C, a domestic corporation. C uses the accrual method of accounting in computing its income and deductions, and is a calendar year taxpayer. In Year 1, C accrues an amount owed to FC for interest. C makes an actual payment of the amount owed to FC in Year 2.

(ii) Regardless of its source, the interest owed to FC is an amount to which this section applies. Pursuant to the rules of this paragraph (b), the amount owed to FC by C will not be allowable as a deduction in Year 1. Section 267 does not preclude the deduction of this amount in Year 2.

Example 2. (i) RS, a domestic corporation, is the sole shareholder of FSC, a foreign sales corporation. Both RS and FSC use the accrual method of accounting. In Year 1, RS accrues \$z owed to FSC for commissions earned by FSC in Year 1. Pursuant to the foreign sales company provisions, sections 921 through 927, a portion of this amount, \$x, is treated as effectively connected income of FSC from sources outside the United States. Accordingly, the rules of section 267(a)(3) and

paragraph (b) of this section do not apply. See paragraph (c) of this section for the rules governing the treatment of amounts that are effectively connected income of FSC.

(ii) The remaining amount of the commission, \$y, is classified as exempt foreign trade income under section 923(a)(3) and is treated as income of FSC from sources outside the United States that is not effectively connected income. This amount is one to which the provisions of this section do not apply, since it is an amount other than interest from sources outside the United States and is not effectively connected income. Therefore, a deduction for \$y is allowable to RS as of the day on which it accrues the otherwise deductible amount, without regard to section 267 (a)(2) and (a)(3) and the regulations thereunder.

(c) *Exceptions and special rules*—(1) *Effectively connected income subject to United States tax.* The provisions of section 267(a)(2) and the regulations thereunder, and not the provisions of paragraph (b) of this section, apply to an amount that is income of the related foreign person that is effectively connected with the conduct of a United States trade or business of such related foreign person. An amount described in this paragraph (c)(1) thus is allowable as a deduction as of the day on which the amount is includible in the gross income of the related foreign person as effectively connected income under sections 872(a)(2) or 882(b) (or, if later, as of the day on which the deduction would be so allowable but for section 267(a)(2)). However, this paragraph (c)(1) does not apply if the related foreign person is exempt from United States income tax on the amount owed, or is subject to a reduced rate of tax, pursuant to a treaty obligation of the United States (such as under an article relating to the taxation of business profits).

(2) *Items exempt from tax by treaty.* Except with respect to interest, neither paragraph (b) of this section nor section 267 (a)(2) or (a)(3) applies to any amount that is income of a related foreign person with respect to which the related foreign person is exempt from United States taxation on the amount owed pursuant to a treaty obligation of the United States (such as under an article relating to the taxation of business profits). Interest that is effectively connected income of the related foreign person under sections 872(a)(2)

or 882(b) is an amount covered by paragraph (c)(1) of this section. Interest that is not effectively connected income of the related foreign person is an amount covered by paragraph (b) of this section, regardless of whether the related foreign person is exempt from United States taxation on the amount owed pursuant to a treaty obligation of the United States.

(3) *Items subject to reduced rate of tax by treaty.* Paragraph (b) of this section applies to amounts that are income of a related foreign person with respect to which the related foreign person claims a reduced rate of United States income tax on the amount owed pursuant to a treaty obligation of the United States (such as under an article relating to the taxation of royalties).

(4) *Amounts owed to a foreign personal holding company, controlled foreign corporation, or passive foreign investment company—*(i) *Foreign personal holding companies.* If an amount to which paragraph (b) of this section otherwise applies is owed to a related foreign person that is a foreign personal holding company within the meaning of section 552, then the amount is allowable as a deduction as of the day on which the amount is includible in the income of the foreign personal holding company. The day on which the amount is includible in income is determined with reference to the method of accounting under which the foreign personal holding company computes its taxable income and earnings and profits for purposes of sections 551 through 558. See section 551(c) and the regulations thereunder for the reporting requirements of the foreign personal holding company provisions (sections 551 through 558).

(ii) *Controlled foreign corporations.* If an amount to which paragraph (b) of this section otherwise applies is owed to a related foreign person that is a controlled foreign corporation within the meaning of section 957, then the amount is allowable as a deduction as of the day on which the amount is includible in the income of the controlled foreign corporation. The day on which the amount is includible in income is determined with reference to the method of accounting under which the controlled foreign corporation computes

its taxable income and earnings and profits for purposes of sections 951 through 964. See section 6038 and the regulations thereunder for the reporting requirements of the controlled foreign corporation provisions (sections 951 through 964).

(iii) *Passive foreign investment companies.* If an amount to which paragraph (b) of this section otherwise applies is owed to a related foreign person that is a passive foreign investment company within the meaning of section 1296, then the amount is allowable as a deduction as of the day on which amount is includible in the income of the passive foreign investment company. The day on which the amount is includible in income is determined with reference to the method of accounting under which the earnings and profits of the passive foreign investment company are computed for purposes of sections 1291 through 1297. See sections 1291 through 1297 and the regulations thereunder for the reporting requirements of the passive foreign investment company provisions. This exception shall apply, however, only if the person that owes the amount at issue has made and has in effect an election pursuant to section 1295 with respect to the passive foreign investment company to which the amount at issue is owed.

(iv) *Examples.* The rules of this paragraph (c)(4) may be illustrated by the following examples. Application of the provisions of sections 951 through 964 are provided for illustration only, and do not provide substantive rules concerning the operation of those provisions. The principles of these examples apply equally to the provisions of paragraphs (c)(4) (i) through (iii) of this section.

Example 1. P, a domestic corporation, owns 100 percent of the total combined voting power and value of the stock of both FC1 and FC2. P is a calendar year taxpayer that uses the accrual method of accounting in computing its income and deductions. FC1 is incorporated in Country X, and FC2 is incorporated in Country Y. FC1 and FC2 are controlled foreign corporations within the meaning of section 957, and are both calendar year taxpayers. FC1 computes its taxable income and earnings and profits, for purposes of sections 951 through 964, using the accrual method of accounting, while FC2 uses the cash method. In Year 1 FC1 has gross income

of \$10,000 that is described in section 952 (a) ("subpart F income"), and which includes interest owed to FC1 by P that is described in paragraph (b) of this section and that is otherwise allowable as a deduction to P under chapter 1. The interest owed to FC1 is allowable as a deduction to P in Year 1.

Example 2. The facts are the same as in *Example 1*, except that in Year 1 FC1 reports no subpart F income because of the application of section 954 (b)(3)(A) (the subpart F de minimis rule). Because the amount owed to FC1 by P is includible in FC1's gross income in Year 1, the interest owed to FC1 is allowable as a deduction to P in Year 1.

Example 3. The facts are the same as in *Example 1*. In Year 1, FC1 accrues interest owed to FC2 that would be allowable as a deduction by FC1 under chapter 1 if FC1 were a domestic corporation. The interest owed to FC2 by FC1 is paid by FC1 in Year 2. Because FC2 uses the cash method of accounting in computing its taxable income for purposes of subpart F, the interest owed by FC1 is allowable as a deduction by FC1 in Year 2, and not in Year 1.

(d) *Effective date.* The rules of this section are effective with respect to interest that is allowable as a deduction under chapter 1 (without regard to the rules of this section) in taxable years beginning after December 31, 1983, but are not effective with respect to interest that is incurred with respect to indebtedness incurred on or before September 29, 1983, or incurred after that date pursuant to a contract that was binding on that date and at all times thereafter (unless the indebtedness or the contract was renegotiated, extended, renewed, or revised after that date). The regulations in this section issued under section 267 apply to all other deductible amounts that are incurred after July 31, 1989, but do not apply to amounts that are incurred pursuant to a contract that was binding on September 29, 1983, and at all times thereafter (unless the contract was renegotiated, extended, renewed, or revised after that date).

[T.D. 8465, 58 FR 237, Jan. 5, 1993]

§ 1.267(b)-1 Relationships.

(a) *In general.* (1) The persons referred to in section 267(a) and § 1.267 (a)-1 are specified in section 267(b).

(2) Under section 267(b)(3), it is not necessary that either of the two corporations be a personal holding company or a foreign personal holding

company for the taxable year in which the sale or exchange occurs or in which the expenses or interest are properly accruable, but either one of them must be such a company for the taxable year next preceding the taxable year in which the sale or exchange occurs or in which the expenses or interest are accrued.

(3) Under section 267(b)(9), the control of certain educational and charitable organizations exempt from tax under section 501 includes any kind of control, direct or indirect, by means of which a person in fact controls such an organization, whether or not the control is legally enforceable and regardless of the method by which the control is exercised or exercisable. In the case of an individual, control possessed by the individual's family, as defined in section 267(c)(4) and paragraph (a)(4) of § 1.267 (c)-1, shall be taken into account.

(b) *Partnerships.* (1) Since section 267 does not include members of a partnership and the partnership as related persons, transactions between partners and partnerships do not come within the scope of section 267. Such transactions are governed by section 707 for the purposes of which the partnership is considered to be an entity separate from the partners. See section 707 and § 1.707-1. Any transaction described in section 267(a) between a partnership and a person other than a partner shall be considered as occurring between the other person and the members of the partnership separately. Therefore, if the other person and a partner are within any one of the relationships specified in section 267(b), no deductions with respect to such transactions between the other person and the partnership shall be allowed:

(i) To the related partner to the extent of his distributive share of partnership deductions for losses or unpaid expenses or interest resulting from such transactions, and

(ii) To the other person to the extent the related partner acquires an interest in any property sold to or exchanged with the partnership by such other person at a loss, or to the extent of the related partner's distributive share of the unpaid expenses or interest payable to

§ 1.267(c)-1

26 CFR Ch. I (4-1-17 Edition)

the partnership by the other person as a result of such transaction.

(2) The provisions of this paragraph may be illustrated by the following examples:

Example 1. A, an equal partner in the ABC partnership, personally owns all the stock of M Corporation. B and C are not related to A. The partnership and all the partners use an accrual method of accounting, and are on a calendar year. M Corporation uses the cash receipts and disbursements method of accounting and is also on a calendar year. During 1956 the partnership borrowed money from M Corporation and also sold property to M Corporation, sustaining a loss on the sale. On December 31, 1956, the partnership accrued its interest liability to the M Corporation and on April 1, 1957 (more than 2½ months after the close of its taxable year), it paid the M Corporation the amount of such accrued interest. Applying the rules of this paragraph, the transactions are considered as occurring between M Corporation and the partners separately. The sale and interest transactions considered as occurring between A and the M Corporation fall within the scope of section 267 (a) and (b), but the transactions considered as occurring between partners B and C and the M Corporation do not. The latter two partners may, therefore, deduct their distributive shares of partnership deductions for the loss and the accrued interest. However, no deduction shall be allowed to A for his distributive shares of these partnership deductions. Furthermore, A's adjusted basis for his partnership interest must be decreased by the amount of his distributive share of such deductions. See section 705(a)(2).

Example 2. Assume the same facts as in *Example 1* of this subparagraph except that the partnership and all the partners use the cash receipts and disbursements method of accounting, and that M Corporation uses an accrual method. Assume further, that during 1956 M Corporation borrowed money from the partnership and that on a sale of property to the partnership during that year M Corporation sustained a loss. On December 31, 1956, the M Corporation accrued its interest liability on the borrowed money and on April 1, 1957 (more than 2½ months after the close of its taxable year) it paid the accrued interest to the partnership. The corporation's deduction for the accrued interest is not allowed to the extent of A's distributive share (one-third) of such interest income. M Corporation's deduction for the loss on the sale of the property to the partnership is not allowed to the extent of A's one-third interest in the purchased property.

§ 1.267(c)-1 Constructive ownership of stock.

(a) *In general.* (1) The determination of stock ownership for purposes of section 267(b) shall be in accordance with the rules in section 267(c).

(2) For an individual to be considered under section 267(c)(2) as constructively owning the stock of a corporation which is owned, directly or indirectly, by or for members of his family it is not necessary that he own stock in the corporation either directly or indirectly. On the other hand, for an individual to be considered under section 267(c)(3) as owning the stock of a corporation owned either actually, or constructively under section 267(c)(1), by or for his partner, such individual must himself actually own, or constructively own under section 267(c)(1), stock of such corporation.

(3) An individual's constructive ownership, under section 267(c) (2) or (3), of stock owned directly or indirectly by or for a member of his family, or by or for his partner, is not to be considered as actual ownership of such stock, and the individual's constructive ownership of the stock is not to be attributed to another member of his family or to another partner. However, an individual's constructive ownership, under section 267(c)(1), of stock owned directly or indirectly by or for a corporation, partnership, estate, or trust shall be considered as actual ownership of the stock, and the individual's ownership may be attributed to a member of his family or to his partner.

(4) The family of an individual shall include only his brothers and sisters, spouse, ancestors, and lineal descendants. In determining whether any of these relationships exist, full effect shall be given to a legal adoption. The term *ancestors* includes parents and grandparents, and the term *lineal descendants* includes children and grandchildren.

(b) *Examples.* The application of section 267(c) may be illustrated by the following examples:

Example 1. On July 1, 1957, A owned 75 percent, and AW, his wife, owned 25 percent, of the outstanding stock of the M Corporation. The M Corporation in turn owned 80 percent of the outstanding stock of the O Corporation. Under section 267(c)(1), A and AW are

Internal Revenue Service, Treasury

§ 1.267(c)-1

each considered as owning an amount of the O Corporation stock actually owned by M Corporation in proportion to their respective ownership of M Corporation stock. Therefore, A constructively owns 60 percent (75 percent of 80 percent) of the O Corporation stock and AW constructively owns 20 percent (25 percent of 80 percent) of such stock. Under the family ownership rule of section 267(c)(2), an individual is considered as constructively owning the stock actually owned by his spouse. A and AW, therefore, are each considered as constructively owning the M Corporation stock actually owned by the other. For the purpose of applying this family ownership rule, A's and AW's constructive ownership of O Corporation stock is considered as actual ownership under section 267(c)(5). Thus, A constructively owns the 20 percent of the O Corporation stock constructively owned by AW, and AW constructively

owns the 60 percent of the O Corporation stock constructively owned by A. In addition, the family ownership rule may be applied to make AWF, AW's father, the constructive owner of the 25 percent of the M Corporation stock actually owned by AW. As noted above, AW's constructive ownership of 20 percent of the O Corporation stock is considered as actual ownership for purposes of applying the family ownership rule, and AWF is thereby considered the constructive owner of this stock also. However, AW's constructive ownership of the stock constructively and actually owned by A may not be considered as actual ownership for the purpose of again applying the family ownership rule to make AWF the constructive owner of these shares. The ownership of the stock in the M and O Corporations may be tabulated as follows:

| Person | Stock ownership in M Corporation | | Total under Section 267 (Percent) | Stock ownership in O Corporation | | Total under Section 267 (Percent) |
|---------------------------|----------------------------------|------------------------|-----------------------------------|----------------------------------|------------------------|-----------------------------------|
| | Actual (Percent) | Constructive (Percent) | | Actual (Percent) | Constructive (Percent) | |
| A | 75 | 25 | 100 | None | 60 | 80 |
| A W (A's wife) | 25 | 75 | 100 | None | 20 | 80 |
| A W F (AW's father) | None | 25 | 25 | None | 60 | 20 |
| M Corporation | None | None | None | 80 | 20 | 80 |
| O Corporation | None | None | None | None | None | None |

Assuming that the M Corporation and the O Corporation make their income tax returns for calendar years, and that there was no distribution in liquidation of the M or O Corporation, and further assuming that other corporation was a personal holding company under section 542 for the calendar year 1956, no deduction is allowable with respect to losses from sales or exchanges of property made on July 1, 1957, between the two corporations. Moreover, whether or not either corporation was a personal holding company, no loss would be allowable on a sale or exchange between A or AW and either corporation. A deduction would be allowed, however, for a loss sustained in an arm's length sale or exchange between A and AWF, and between AWF and the M or O Corporation.

Example 2. On June 15, 1957, all of the stock of the N Corporation was owned in equal proportions by A and his partner, AP. Except in the case of distributions in liquidation by the N Corporation, no deduction is allowable with respect to losses from sales or exchanges of property made on June 15, 1957, between A and the N Corporation or AP and the N Corporation since each partner is considered as owning the stock owned by the

other; therefore, each is considered as owning more than 50 percent in value of the outstanding stock of the N Corporation.

Example 3. On June 7, 1957, A owned no stock in X Corporation, but his wife, AW, owned 20 percent in value of the outstanding stock of X, and A's partner, AP, owned 60 percent in value of the outstanding stock of X. The partnership firm of A and AP owned no stock in X Corporation. The ownership of AW's stock is attributed to A, but not that of AP since A does not own any X Corporation stock either actually, or constructively under section 267(c)(1). A's constructive ownership of AW's stock is not the ownership required for the attribution of AP's stock. Therefore, deductions for losses from sales or exchanges of property made on June 7, 1957, between X Corporation and A or AW are allowable since neither person owned more than 50 percent in value of the outstanding stock of X, but deductions for losses from sales or exchanges between X Corporation and AP would not be allowable by section 267(a) (except for distributions in liquidation of X Corporation).

§ 1.267(d)-1

26 CFR Ch. I (4-1-17 Edition)

§ 1.267(d)-1 Amount of gain where loss previously disallowed.

(a) *General rule.* (1) If a taxpayer acquires property by purchase or exchange from a transferor who, on the transaction, sustained a loss not allowable as a deduction by reason of section 267(a)(1) (or by reason of section 24(b) of the Internal Revenue Code of 1939), then any gain realized by the taxpayer on a sale or other disposition of the property after December 31, 1953, shall be recognized only to the extent that the gain exceeds the amount of such loss as is properly allocable to the property sold or otherwise disposed of by the taxpayer.

(2) The general rule is also applicable to a sale or other disposition of property by a taxpayer when the basis of such property in the taxpayer's hands is determined directly or indirectly by reference to other property acquired by the taxpayer from a transferor through a sale or exchange in which a loss sustained by the transferor was not allowable. Therefore, section 267(d) applies to a sale or other disposition of property after a series of transactions if the basis of the property acquired in each transaction is determined by reference to the basis of the property transferred, and if the original property was acquired in a transaction in which a loss to a transferor was not allowable by reason of section 267(a)(1) (or by reason of section 24(b) of the Internal Revenue Code of 1939).

(3) The benefit of the general rule is available only to the original transferee but does not apply to any original transferee (for example, a donee or a person acquiring property from a decedent where the basis of property is determined under section 1014 or 1022) who acquired the property in any manner other than by purchase or exchange.

(4) The application of the provisions of this paragraph may be illustrated by the following examples:

Example 1. H sells to his wife, W, for \$500, certain corporate stock with an adjusted basis for determining loss to him of \$800. The loss of \$300 is not allowable to H by reason of section 267(a)(1) and paragraph (a) of § 1.267(a)-1. W later sells this stock for \$1,000. Although W's realized gain is \$500 (\$1,000 minus \$500, her basis), her recognized gain under

section 267(d) is only \$200, the excess of the realized gain of \$500 over the loss of \$300 not allowable to H. In determining capital gain or loss W's holding period commences on the date of the sale from H to W.

Example 2. Assume the same facts as in *Example 1* except that W later sells her stock for \$300 instead of \$1,000. Her recognized loss is \$200 and not \$500 since section 267(d) applies only to the nonrecognition of gain and does not affect basis.

Example 3. Assume the same facts as in *Example 1* except that W transfers her stock as a gift to X. The basis of the stock in the hands of X for the purpose of determining gain, under the provisions of section 1015, is the same as W's, or \$500. If X later sells the stock for \$1,000 the entire \$500 gain is taxed to him.

Example 4. H sells to his wife, W, for \$5,500, farmland, with an adjusted basis for determining loss to him of \$8,000. The loss of \$2,500 is not allowable to H by reason of section 267(a)(1) and paragraph (a) of § 1.267(a)-1. W exchanges the farmland, held for investment purposes, with S, an unrelated individual, for two city lots, also held for investment purposes. The basis of the city lots in the hands of W (\$5,500) is a substituted basis determined under section 1031(d) by reference to the basis of the farmland. Later W sells the city lots for \$10,000. Although W's realized gain is \$4,500 (10,000 minus \$5,500), her recognized gain under section 267(d) is only \$2,000, the excess of the realized gain of \$4,500 over the loss of \$2,500 not allowable to H.

(b) *Determination of basis and gain with respect to divisible property—(1) Taxpayer's basis.* When the taxpayer acquires divisible property or property that consists of several items or classes of items by a purchase or exchange on which loss is not allowable to the transferor, the basis in the taxpayer's hands of a particular part, item, or class of such property shall be determined (if the taxpayer's basis for that part is not known) by allocating to the particular part, item, or class a portion of the taxpayer's basis for the entire property in the proportion that the fair market value of the particular part, item, or class bears to the fair market value of the entire property at the time of the taxpayer's acquisition of the property.

(2) *Taxpayer's recognized gain.* Gain realized by the taxpayer on sales or other dispositions after December 31, 1953, of a part, item, or class of the property shall be recognized only to the extent that such gain exceeds the amount of loss attributable to such

part, item, or class of property not allowable to the taxpayer's transferor on the latter's sale or exchange of such property to the taxpayer.

(3) *Transferor's loss not allowable.* (i) The transferor's loss on the sale or exchange of a part, item, or class of the property to the taxpayer shall be the excess of the transferor's adjusted basis for determining loss on the part, item, or class of the property over the amount realized by the transferor on the sale or exchange of the part, item, or class. The amount realized by the transferor on the part, item, or class shall be determined (if such amount is not known) in the same manner that the taxpayer's basis for such part, item, or class is determined. See subparagraph (1) of this paragraph.

(ii) If the transferor's basis for determining loss on the part, item, or class cannot be determined, the transferor's loss on the particular part, item, or class transferred to the taxpayer shall be determined by allocating to the part, item, or class a portion of his loss on the entire property in the proportion that the fair market value of such part, item, or class bears to the fair market value of the entire property on the date of the taxpayer's acquisition of the entire property.

(4) *Examples.* The application of the provisions of this paragraph may be illustrated by the following examples:

Example 1. During 1953, H sold class A stock which had cost him \$1,100, and common stock which had cost him \$2,000, to his wife W for a lump sum of \$1,500. Under section 24(b)(1)(A) of the 1939 Code, the loss of \$1,600 on the transaction was not allowable to H. At the time the stocks were purchased by W, the fair market value of class A stock was \$900 and the fair market value of common stock was \$600. In 1954, W sold the class A stock for \$2,500. W's recognized gain is determined as follows:

| | |
|---|---------|
| Amount realized by W on sale of class A stock | 2,500 |
| Less: Basis allocated to class A stock— $\$900/\$1,500 \times \$1,500$ | 900 |
| Realized gain on transaction | 1,600 |
| Less: Loss sustained by H on sale of class A stock to W not allowable as a deduction: | |
| Basis to H of class A stock | \$1,100 |
| Amount realized by H on class A stock— $\$900/\$1,500 \times \$1,500$ | 900 |
| Unallowable loss to H on sale of class A stock | 200 |

| | |
|---|-------|
| Recognized gain on sale of class A stock by W | 1,400 |
|---|-------|

Example 2. Assume the same facts as those stated in *Example 1* of this subparagraph except that H originally purchased both classes of stock for a lump sum of \$3,100. The unallowable loss to H on the sale of all the stock to W is \$1,600 (\$3,100 minus \$1,500). An exact determination of the unallowable loss sustained by H on sale to W of class A stock cannot be made because H's basis for class A stock cannot be determined. Therefore, a determination of the unallowable loss is made by allocating to class A stock a portion of H's loss on the entire property transferred to W in the proportion that the fair market value of class A stock at the time acquired by W (\$900) bears to the fair market value of both classes of stock at that time (\$1,500). The allocated portion is $\$900/\$1,500 \times \$1,600$, or \$960. W's recognized gain is, therefore, \$640 (W's realized gain of \$1,600 minus \$960).

(c) *Special rules.* (1) Section 267(d) does not affect the basis of property for determining gain. Depreciation and other items which depend on such basis are also not affected.

(2) The provisions of section 267(d) shall not apply if the loss sustained by the transferor is not allowable to the transferor as a deduction by reason of section 1091, or section 118 of the Internal Revenue Code of 1939, which relate to losses from wash sales of stock or securities.

(3) In determining the holding period in the hands of the transferee of property received in an exchange with a transferor with respect to whom a loss on the exchange is not allowable by reason of section 267, section 1223(2) does not apply to include the period during which the property was held by the transferor. In determining such holding period, however, section 1223(1) may apply to include the period during which the transferee held the property which he exchanged where, for example, he exchanged a capital asset in a transaction which, as to him, was non-taxable under section 1031 and the property received in the exchange has the same basis as the property exchanged.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 9811, 82 FR 6237, Jan. 19, 2017]

§ 1.267(d)-2

26 CFR Ch. I (4-1-17 Edition)

§ 1.267(d)-2 Effective/applicability dates.

Pursuant to section 7851(a)(1)(C), the regulations prescribed in § 1.267(d)-1, to the extent that they relate to determination of gain resulting from the sale or other disposition of property after December 31, 1953, with respect to which property a loss was not allowable to the transferor by reason of section 267(a)(1) (or by reason of section 24(b) of the Internal Revenue Code of 1939), shall also apply to taxable years beginning before January 1, 1954, and ending after December 31, 1953, and taxable years beginning after December 31, 1953, and ending before August 17, 1954, which years are subject to the Internal Revenue Code of 1939. The provisions of § 1.267(d)-1(a)(3) relating to section 1022 are effective on and after January 19, 2017.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 9811, 82 FR 6237, Jan. 19, 2017]

§ 1.267(f)-1 Controlled groups.

(a) *In general*—(1) *Purpose*. This section provides rules under section 267(f) to defer losses and deductions from certain transactions between members of a controlled group (intercompany sales). The purpose of this section is to prevent members of a controlled group from taking into account a loss or deduction solely as the result of a transfer of property between a selling member (S) and a buying member (B).

(2) *Application of consolidated return principles*. Under this section, S's loss or deduction from an intercompany sale is taken into account under the *timing* principles of § 1.1502-13 (intercompany transactions between members of a consolidated group), treating the intercompany sale as an intercompany transaction. For this purpose:

(i) The matching and acceleration rules of § 1.1502-13 (c) and (d), the definitions and operating rules of § 1.1502-13 (b) and (j), and the simplifying rules of § 1.1502-13(e)(1) apply with the adjustments in paragraphs (b) and (c) of this section to reflect that this section—

(A) Applies on a controlled group basis rather than consolidated group basis; and

(B) Generally affects only the *timing* of a loss or deduction, and not *it's at-*

tributes (e.g., its source and character) or the holding period of property.

(ii) The special rules under § 1.1502-13(f) (stock of members) and (g) (obligations of members) apply under this section only to the extent the transaction is also an intercompany transaction to which § 1.1502-13 applies.

(iii) Any election under § 1.1502-13 to take items into account on a separate entity basis does not apply under this section. See § 1.1502-13(e)(3).

(3) *Other law*. The rules of this section apply in addition to other applicable law (including nonstatutory authorities). For example, to the extent a loss or deduction deferred under this section is from a transaction that is also an intercompany transaction under § 1.1502-13(b)(1), attributes of the loss or deduction are also subject to re-characterization under § 1.1502-13. See also, sections 269 (acquisitions to evade or avoid income tax) and 482 (allocations among commonly controlled taxpayers). Any loss or deduction taken into account under this section can be deferred, disallowed, or eliminated under other applicable law. See, for example, section 1091 (loss eliminated on wash sale).

(b) *Definitions and operating rules*. The definitions in § 1.1502-13(b) and the operating rules of § 1.1502-13(j) apply under this section with appropriate adjustments, including the following:

(1) *Intercompany sale*. An intercompany sale is a sale, exchange, or other transfer of property between members of a controlled group, if it would be an intercompany transaction under the principles of § 1.1502-13, determined by treating the references to a consolidated group as references to a controlled group and by disregarding whether any of the members join in filing consolidated returns.

(2) *S's losses or deductions*. Except to the extent the intercompany sale is also an intercompany transaction to which § 1.1502-13 applies, S's losses or deductions subject to this section are determined on a separate entity basis. For example, the principles of § 1.1502-13(b)(2)(iii) (treating certain amounts not yet recognized as items to be taken into account) do not apply. A loss or deduction is from an intercompany sale

whether it is directly or indirectly from the intercompany sale.

(3) *Controlled group; member.* For purposes of this section, a controlled group is defined in section 267(f). Thus, a controlled group includes a FSC (as defined in section 922) and excluded members under section 1563(b)(2), but does not include a DISC (as defined in section 992). Corporations remain members of a controlled group as long as they remain in a controlled group relationship with each other. For example, corporations become nonmembers with respect to each other when they cease to be in a controlled group relationship with each other, rather than by having a separate return year (described in § 1.1502-13(j)(7)). Further, the principles of § 1.1502-13(j)(6) (former common parent treated as continuation of group) apply to any corporation if, immediately before it becomes a nonmember, it is both the selling member and the owner of property with respect to which a loss or deduction is deferred (whether or not it becomes a member of a different controlled group filing consolidated or separate returns). Thus, for example, if S and B merge together in a transaction described in section 368(a)(1)(A), the surviving corporation is treated as the successor to the other corporation, and the controlled group relationship is treated as continuing.

(4) *Consolidated taxable income.* References to consolidated taxable income (and consolidated tax liability) include references to the combined taxable income of the members (and their combined tax liability). For corporations filing separate returns, it ordinarily will not be necessary to actually combine their taxable incomes (and tax liabilities) because the taxable income (and tax liability) of one corporation does not affect the taxable income (or tax liability) of another corporation.

(c) *Matching and acceleration principles of § 1.1502-13—(1) Adjustments to the timing rules.* Under this section, S's losses and deductions are deferred until they are taken into account under the timing principles of the matching and acceleration rules of § 1.1502-13(c) and (d) with appropriate adjustments. For example, if S sells depreciable property to B at a loss, S's loss is deferred and

taken into account under the principles of the matching rule of § 1.1502-13(c) to reflect the difference between B's depreciation taken into account with respect to the property and the depreciation that B would take into account if S and B were divisions of a single corporation; if S and B subsequently cease to be in a controlled group relationship with each other, S's remaining loss is taken into account under the principles of the acceleration rule of § 1.1502-13(d). For purposes of this section, the adjustments to § 1.1502-13 (c) and (d) include the following:

(i) *Application on controlled group basis.* The matching and acceleration rules apply on a controlled group basis, rather than a consolidated group basis. Thus if S and B are wholly-owned members of a consolidated group and 21% of the stock of S is sold to an unrelated person, S's loss continues to be deferred under this section because S and B continue to be members of a controlled group even though S is no longer a member of the consolidated group. Similarly, S's loss would continue to be deferred if S and B remain in a controlled group relationship after both corporations become nonmembers of their former consolidated group.

(ii) *Different taxable years.* If S and B have different taxable years, the taxable years that include a December 31 are treated as the same taxable years. If S or B has a short taxable year that does not include a December 31, the short year is treated as part of the succeeding taxable year that does include a December 31.

(iii) *Transfer to a section 267(b) or 707(b) related person.* To the extent S's loss or deduction from an intercompany sale of property is taken into account under this section as a result of B's transfer of the property to a nonmember that is a person related to any member, immediately after the transfer, under sections 267(b) or 707(b), or as a result of S or B becoming a nonmember that is related to any member under section 267(b), the loss or deduction is taken into account but allowed only to the extent of any income or gain taken into account as a result of the transfer. The balance not allowed

is treated as a loss referred to in section 267(d) if it is from a sale or exchange by B (rather than from a distribution).

(iv) *B's item is excluded from gross income or noncapital and nondeductible.* To the extent S's loss would be redetermined to be a noncapital, nondeductible amount under the principles of § 1.1502-13, but is not redetermined under paragraph (c)(2) of this section (which generally renders the attribute redetermination rule inapplicable to sales between members of a controlled group), S's loss continues to be deferred. For purposes of this paragraph, stock held by S, stock held by B, stock held by all members of S's consolidated group, stock held by any member of a controlled group of which S is a member that was acquired from a member of S's consolidated group, and stock issued by T to a member of the controlled group must be taken into account in determining whether a loss would be redetermined to be a noncapital, nondeductible amount under the principles of § 1.1502-13. If the loss remains deferred, it is taken into account when S and B (including their successors) are no longer in a controlled group relationship. (If, however, the property is transferred to certain related persons, paragraph (c)(1)(iii) of this section will cause the loss to be permanently disallowed.) For example, if S sells all of the T stock to B at a loss (in a transaction that is treated as a sale or exchange for Federal income tax purposes), and T subsequently liquidates in an unrelated transaction that qualifies under section 332, S's loss is deferred until S and B are no longer in a controlled group relationship. Similarly, if S owns all of the T stock and sells 30 percent of T's stock to B at a loss (in a transaction that is treated as a sale or exchange for Federal income tax purposes), and T subsequently liquidates, S's loss on the sale is deferred until S and B (including their successors) are no longer in a controlled group relationship.

(v) *Circularity of references.* References to deferral or elimination under the Internal Revenue Code or regulations do not include references to section 267(f) or this section. See,

e.g., § 1.1502-13(a)(4) (applicability of other law).

(2) *Attributes generally not affected.* The matching and acceleration rules are not applied under this section to affect the attributes of S's intercompany item, or cause it to be taken into account before it is taken into account under S's separate entity method of accounting. However, the attributes of S's intercompany item may be redetermined, or an item may be taken into account earlier than under S's separate entity method of accounting, to the extent the transaction is also an intercompany transaction to which § 1.1502-13 applies. Similarly, except to the extent the transaction is also an intercompany transaction to which § 1.1502-13 applies, the matching and acceleration rules do not apply to affect the timing or attributes of B's corresponding items.

(d) *Intercompany sales of inventory involving foreign persons—*(1) *General rule.* Section 267(a)(1) and this section do not apply to an intercompany sale of property that is inventory (within the meaning of section 1221(1)) in the hands of both S and B, if—

(i) The intercompany sale is in the ordinary course of S's trade or business;

(ii) S or B is a foreign corporation; and

(iii) Any income or loss realized on the intercompany sale by S or B is not income or loss that is recognized as effectively connected with the conduct of a trade or business within the United States within the meaning of section 864 (unless the income is exempt from taxation pursuant to a treaty obligation of the United States).

(2) *Intercompany sales involving related partnerships.* For purposes of paragraph (d)(1) of this section, a partnership and a foreign corporation described in section 267(b)(10) are treated as members, provided that the income or loss of the foreign corporation is described in paragraph (d)(1)(iii) of this section.

(3) *Intercompany sales in ordinary course.* For purposes of this paragraph (d), whether an intercompany sale is in the ordinary course of business is determined under all the facts and circumstances.

(e) *Treatment of a creditor with respect to a loan in nonfunctional currency.* Sections 267(a)(1) and this section do not apply to an exchange loss realized with respect to a loan of nonfunctional currency if—

(1) The loss is realized by a member with respect to nonfunctional currency loaned to another member;

(2) The loan is described in § 1.988-1(a)(2)(i);

(3) The loan is not in a hyperinflationary currency as defined in § 1.988-1(f); and

(4) The transaction does not have as a significant purpose the avoidance of Federal income tax.

(f) *Receivables.* If S acquires a receivable from the sale of goods or services to a nonmember at a gain, and S sells the receivable at fair market value to B, any loss or deduction of S from its sale to B is not deferred under this section to the extent it does not exceed S's income or gain from the sale to the nonmember that has been taken into account at the time the receivable is sold to B.

(g) *Earnings and profits.* A loss or deduction deferred under this section is not reflected in S's earnings and profits before it is taken into account under this section. See, e.g., §§ 1.312-6(a), 1.312-7, and 1.1502-33(c)(2).

(h) *Anti-avoidance rule.* If a transaction is engaged in or structured with a principal purpose to avoid the purposes of this section (including, for example, by avoiding treatment as an intercompany sale or by distorting the timing of losses or deductions), adjustments must be made to carry out the purposes of this section.

(i) [Reserved]

(j) *Examples.* For purposes of the examples in this paragraph (j), unless otherwise stated, corporation P owns 75% of the only class of stock of subsidiaries S and B, X is a person unrelated to any member of the P controlled group, the taxable year of all persons is the calendar year, all persons use the accrual method of accounting, tax liabilities are disregarded, the facts set forth the only activity, and no member has a special status. If a member acts as both a selling member and a buying member (e.g., with respect to different aspects of a

single transaction, or with respect to related transactions), the member is referred to as M (rather than as S or B). This section is illustrated by the following examples.

Example 1. Matching and acceleration rules.

(a) *Facts.* S holds land for investment with a basis of \$130. On January 1 of Year 1, S sells the land to B for \$100. On a separate entity basis, S's loss is long-term capital loss. B holds the land for sale to customers in the ordinary course of business. On July 1 of Year 3, B sells the land to X for \$110.

(b) *Matching rule.* Under paragraph (b)(1) of this section, S's sale of land to B is an intercompany sale. Under paragraph (c)(1) of this section, S's \$30 loss is taken into account under the timing principles of the matching rule of § 1.1502-13(c) to reflect the difference for the year between B's corresponding items taken into account and the recomputed corresponding items. If S and B were divisions of a single corporation and the intercompany sale were a transfer between the divisions, B would succeed to S's \$130 basis in the land and would have a \$20 loss from the sale to X in Year 3. Consequently, S takes no loss into account in Years 1 and 2, and takes the entire \$30 loss into account in Year 3 to reflect the \$30 difference in that year between the \$10 gain B takes into account and its \$20 recomputed loss. The attributes of S's intercompany items and B's corresponding items are determined on a separate entity basis. Thus, S's \$30 loss is long-term capital loss and B's \$10 gain is ordinary income.

(c) *Acceleration resulting from sale of B stock.* The facts are the same as in paragraph (a) of this Example 1, except that on July 1 of Year 3 P sells all of its B stock to X (rather than B's selling the land to X). Under paragraph (c)(1) of this section, S's \$30 loss is taken into account under the timing principles of the acceleration rule of § 1.1502-13(d) immediately before the effect of treating S and B as divisions of a single corporation cannot be produced. Because the effect cannot be produced once B becomes a nonmember, S takes its \$30 loss into account in Year 3 immediately before B becomes a nonmember. S's loss is long-term capital loss.

(d) *Subgroup principles applicable to sale of S and B stock.* The facts are the same as in paragraph (a) of this Example 1, except that on July 1 of Year 3 P sells all of its S and B stock to X (rather than B's selling the land to X). Under paragraph (b)(3) of this section, S and B are considered to remain members of a controlled group as long as they remain in a controlled group relationship with each other (whether or not in the original controlled group). P's sale of their stock does not affect the controlled group relationship of S and B with each other. Thus, S's loss is not taken into account as a result of P's sale

of the stock. Instead, S's loss is taken into account based on subsequent events (e.g., B's sale of the land to a nonmember).

Example 2. Distribution of loss property. (a) *Facts.* S holds land with a basis of \$130 and value of \$100. On January 1 of Year 1, S distributes the land to P in a transaction to which section 311 applies. On July 1 of Year 3, P sells the land to X for \$110.

(b) *No loss taken into account.* Under paragraph (b)(2) of this section, because P and S are not members of a consolidated group, § 1.1502-13(f)(2)(iii) does not apply to cause S to recognize a \$30 loss under the principles of section 311(b). Thus, S has no loss to be taken into account under this section. (If P and S were members of a consolidated group, § 1.1502-13(f)(2)(iii) would apply to S's loss in addition to the rules of this section, and the loss would be taken into account in Year 3 as a result of P's sale to X.)

Example 3. Loss not yet taken into account under separate entity accounting method. (a) *Facts.* S holds land with a basis of \$130. On January 1 of Year 1, S sells the land to B at a \$30 loss but does not take into account the loss under its separate entity method of accounting until Year 4. On July 1 of Year 3, B sells the land to X for \$110.

(b) *Timing.* Under paragraph (b)(2) of this section, S's loss is determined on a separate entity basis. Under paragraph (c)(1) of this section, S's loss is not taken into account before it is taken into account under S's separate entity method of accounting. Thus, although B takes its corresponding gain into account in Year 3, S has no loss to take into account until Year 4. Once S's loss is taken into account in Year 4, it is not deferred under this section because B's corresponding gain has already been taken into account. (If S and B were members of a consolidated group, S would be treated under § 1.1502-13(b)(2)(iii) as taking the loss into account in Year 3.)

Example 4. Consolidated groups. (a) *Facts.* P owns all of the stock of S and B, and the P group is a consolidated group. S holds land for investment with a basis of \$130. On January 1 of Year 1, S sells the land to B for \$100. B holds the land for sale to customers in the ordinary course of business. On July 1 of Year 3, P sells 25% of B's stock to X. As a result of P's sale, B becomes a nonmember of the P consolidated group but S and B remain in a controlled group relationship with each other for purposes of section 267(f). Assume that if S and B were divisions of a single corporation, the items of S and B from the land would be ordinary by reason of B's activities.

(b) *Timing and attributes.* Under paragraph (a)(3) of this section, S's sale to B is subject to both § 1.1502-13 and this section. Under § 1.1502-13, S's loss is redetermined to be an ordinary loss by reason of B's activities. Under paragraph (b)(3) of this section, because S and B remain in a controlled group

relationship with each other, the loss is not taken into account under the acceleration rule of § 1.1502-13(d) as modified by paragraph (c) of this section. See § 1.1502-13(a)(4). Nevertheless, S's loss is redetermined by § 1.1502-13 to be an ordinary loss, and the character of the loss is not further redetermined under this section. Thus, the loss continues to be deferred under this section, and will be taken into account as ordinary loss based on subsequent events (e.g., B's sale of the land to a nonmember).

(c) *Resale to controlled group member.* The facts are the same as in paragraph (a) of this *Example 4*, except that P owns 75% of X's stock, and B resells the land to X (rather than P's selling any B stock). The results for S's loss are the same as in paragraph (b) of this *Example 4*. Under paragraph (b) of this section, X is also in a controlled group relationship, and B's sale to X is a second intercompany sale. Thus, S's loss continues to be deferred and is taken into account under this section as ordinary loss based on subsequent events (e.g., X's sale of the land to a nonmember).

Example 5. Intercompany sale followed by installment sale. (a) *Facts.* S holds land for investment with a basis of \$130x. On January 1 of Year 1, S sells the land to B for \$100x. B holds the land for investment. On July 1 of Year 3, B sells the land to X in exchange for X's \$110x note. The note bears a market rate of interest in excess of the applicable Federal rate, and provides for principal payments of \$55x in Year 4 and \$55x in Year 5. Section 453A applies to X's note.

(b) *Timing and attributes.* Under paragraph (c) of this section, S's \$30x loss is taken into account under the timing principles of the matching rule of § 1.1502-13(c) to reflect the difference in each year between B's gain taken into account and its recomputed loss. Under section 453, B takes into account \$5x of gain in Year 4 and in Year 5. Therefore, S takes \$20x of its loss into account in Year 3 to reflect the \$20x difference in that year between B's \$0 loss taken into account and its \$20x recomputed loss. In addition, S takes \$5x of its loss into account in Year 4 and in Year 5 to reflect the \$5x difference in each year between B's \$5x gain taken into account and its \$0 recomputed gain. Although S takes into account a loss and B takes into account a gain, the attributes of B's \$10x gain are determined on a separate entity basis, and therefore the interest charge under section 453A(c) applies to B's \$10x gain on the installment sale beginning in Year 3.

Example 6. Section 721 transfer to a related nonmember. (a) *Facts.* S owns land with a basis of \$130. On January 1 of Year 1, S sells the land to B for \$100. On July 1 of Year 3, B

transfers the land to a partnership in exchange for a 40% interest in capital and profits in a transaction to which section 721 applies. P also owns a 25% interest in the capital and profits of the partnership.

(b) *Timing.* Under paragraph (c)(1)(iii) of this section, because the partnership is a nonmember that is a related person under sections 267(b) and 707(b), S's \$30 loss is taken into account in Year 3, but only to the extent of any income or gain taken into account as a result of the transfer. Under section 721, no gain or loss is taken into account as a result of the transfer to the partnership, and thus none of S's loss is taken into account. Any subsequent gain recognized by the partnership with respect to the property is limited under section 267(d). (The results would be the same if the P group were a consolidated group, and S's sale to B were also subject to § 1.1502-13.)

Example 7. Receivables. (a) *Controlled group.* S owns goods with a \$60 basis. In Year 1, S sells the goods to X for X's \$100 note. The note bears a market rate of interest in excess of the applicable Federal rate, and provides for payment of principal in Year 5. S takes into account \$40 of income in Year 1 under its method of accounting. In Year 2, the fair market value of X's note falls to \$90 due to an increase in prevailing market interest rates, and S sells the note to B for its \$90 fair market value.

(b) *Loss not deferred.* Under paragraph (f) of this section, S takes its \$10 loss into account in Year 2. (If the sale were not at fair market value, paragraph (f) of this section would not apply and none of S's \$10 loss would be taken into account in Year 2.)

(c) *Consolidated group.* Assume instead that P owns all of the stock of S and B, and the P group is a consolidated group. In Year 1, S sells to X goods having a basis of \$90 for X's \$100 note (bearing a market rate of interest in excess of the applicable Federal rate, and providing for payment of principal in Year 5), and S takes into account \$10 of income in Year 1. In Year 2, S sells the receivable to B for its \$85 fair market value. In Year 3, P sells 25% of B's stock to X. Although paragraph (f) of this section provides that \$10 of S's loss (i.e., the extent to which S's \$15 loss does not exceed its \$10 of income) is not deferred under this section, S's entire \$15 loss is subject to § 1.1502-13 and none of the loss is taken into account in Year 2 under the matching rule of § 1.1502-13(c). See paragraph (a)(3) of this section (continued deferral under § 1.1502-13). P's sale of B stock results in B becoming a nonmember of the P consolidated group in Year 3. Thus, S's \$15 loss is taken into account in Year 3 under the acceleration rule of § 1.1502-13(d). Nevertheless, B remains in a controlled group relationship with S and paragraph (f) of this section permits only \$10 of S's loss to be taken into account in Year 3. See § 1.1502-13(a)(4) (contin-

ued deferral under section 267). The remaining \$5 of S's loss continues to be deferred under this section and taken into account under this section based on subsequent events (e.g., B's collection of the note or P's sale of the remaining B stock to a nonmember).

Example 8. Selling member ceases to be a member. (a) *Facts.* P owns all of the stock of S and B, and the P group is a consolidated group. S has several historic assets, including land with a basis of \$130 and value of \$100. The land is not essential to the operation of S's business. On January 1 of Year 1, S sells the land to B for \$100. On July 1 of Year 3, P transfers all of S's stock to newly formed X in exchange for a 20% interest in X stock as part of a transaction to which section 351 applies. Although X holds many other assets, a principal purpose for P's transfer is to accelerate taking S's \$30 loss into account. P has no plan or intention to dispose of the X stock.

(b) *Timing.* Under paragraph (c) of this section, S's \$30 loss ordinarily is taken into account immediately before P's transfer of the S stock, under the timing principles of the acceleration rule of § 1.1502-13(d). Although taking S's loss into account results in a \$30 negative stock basis adjustment under § 1.1502-32, because P has no plan or intention to dispose of its X stock, the negative adjustment will not immediately affect taxable income. P's transfer accelerates a loss that otherwise would be deferred, and an adjustment under paragraph (h) of this section is required. Thus, S's loss is never taken into account, and S's stock basis and earnings and profits are reduced by \$30 under §§ 1.1502-32 and 1.1502-33 immediately before P's transfer of the S stock.

(c) *Nonhistoric assets.* Assume instead that, with a principal purpose to accelerate taking into account any further loss that may accrue in the value of the land without disposing of the land outside of the controlled group, P forms M with a \$100 contribution on January 1 of Year 1 and S sells the land to M for \$100. On December 1 of Year 1, when the value of the land has decreased to \$90, M sells the land to B for \$90. On July 1 of Year 3, while B still owns the land, P sells all of M's stock to X and M becomes a nonmember. Under paragraph (c) of this section, M's \$10 loss ordinarily is taken into account under the timing principles of the acceleration rule of § 1.1502-13(d) immediately before M becomes a nonmember. (S's \$30 loss is not taken into account under the timing principles of § 1.1502-13(c) or § 1.1502-13(d) as a result of M becoming a nonmember, but is taken into account based on subsequent events such as B's sale of the land to a nonmember or P's sale of the stock of S or B to a nonmember.) The land is not an historic asset of M and, although taking M's loss into account reduces P's basis in the M stock

under § 1.1502-32, the negative adjustment only eliminates the \$10 duplicate stock loss. Under paragraph (h) of this section, M's loss is never taken into account. M's stock basis, and the earnings and profits of M and P, are reduced by \$10 under §§ 1.1502-32 and 1.1502-33 immediately before P's sale of the M stock.

Example 9. Sale of stock by consolidated group member to controlled group member. (a) *Facts.* P1, a domestic corporation, owns 75% of the outstanding stock of P, the common parent of a consolidated group. P owns all of the outstanding stock of subsidiaries M and S, which are members of P's consolidated group. M and S each own 50% of the only class of stock of L, a nonmember life insurance company. On January 1 of Year 1, S sells 25% of L's stock to P1 for \$50 cash. At the time of the sale, S's aggregate basis in the L shares transferred to P1 was \$80, and S recognizes a \$30 loss. On February 18 of Year 3, at a time when the L shares held by P1 are worth \$60, L liquidates. As a result of the liquidation, P1 recognizes a \$10 gain.

(b) *Timing.* Under paragraph (a)(2) of this section, S's loss on the sale of the L stock to P1 is deferred. Under paragraph (c)(1)(iv) of this section, upon the liquidation of L, to the extent S's loss would be redetermined to be a noncapital, nondeductible amount under the principles of § 1.1502-13, S's loss continues to be deferred. Under the principles of § 1.1502-13, S's loss is not redetermined to be a noncapital, nondeductible amount to the extent of P1's \$10 of gain recognized. Accordingly, S takes into account \$10 of loss as a result of the liquidation. In determining whether the remainder of S's \$20 loss would be redetermined to be a noncapital, nondeductible amount, under paragraph (c)(1)(iv) of this section, stock held by P1, stock held by M, and stock held by S is taken into account. Accordingly, under the principles of § 1.1502-13, the liquidation of L would be treated as a liquidation qualifying under section 332, and the remainder of S's loss would be redetermined to be a noncapital, nondeductible amount. Thus, under paragraph (c)(1)(iv), S's remaining \$20 loss continues to be deferred until S and P1 are no longer in a controlled group relationship.

Example 10. Issuance of stock to controlled group member. (a) *Facts.* FP is a foreign corporation that owns all the stock of FS, a foreign corporation, and all the stock of P, a domestic corporation. P owns all of the single class of outstanding common stock of T. In Year 1, FS contributes cash to T in exchange for newly issued stock of T that constitutes 40 percent of T's outstanding stock. In Year 2, when the value of the T stock owned by P is less than its basis in P's hands, P sells all of its T stock to FP. In Year 3, in a transaction unrelated to the issuance of the T stock in Year 1, T converts under state law to a limited liability com-

pany that is treated as a partnership for Federal income tax purposes.

(b) *Timing.* Under paragraph (a)(2) of this section, P's loss on the sale of its T stock is deferred. Under paragraph (c)(1)(iv) of this section, upon the conversion of T, to the extent P's loss would be redetermined to be a noncapital, nondeductible amount under the principles of § 1.1502-13, P's loss continues to be deferred. In determining whether the loss would be redetermined to be a noncapital, nondeductible amount, stock held by FS (which was acquired from T) and stock held by FP (the buyer of the T stock from P and a member of P's controlled group) is taken into account. Accordingly, under the principles of § 1.1502-13 the deemed liquidation of T resulting from the conversion of T would be treated as a liquidation qualifying under section 332, and P's loss would be redetermined to be a noncapital, nondeductible amount. Thus, under paragraph (c)(1)(iv), P's loss continues to be deferred until P and FP are no longer in a controlled group relationship.

(k) *Cross-reference.* For additional rules applicable to the disposition, deconsolidation, or transfer of the stock of members of consolidated groups, see §§ 1.337(d)-2, 1.1502-13(f)(6), 1.1502-35, and 1.1502-36.

(l) *Effective dates—(1) In general.* This section applies with respect to transactions occurring in S's years beginning on or after July 12, 1995. If both this section and prior law apply to a transaction, or neither applies, with the result that items are duplicated, omitted, or eliminated in determining taxable income (or tax liability), or items are treated inconsistently, prior law (and not this section) applies to the transaction.

(2) *Avoidance transactions.* This paragraph (1)(2) applies if a transaction is engaged in or structured on or after April 8, 1994, with a principal purpose to avoid the rules of this section (and instead to apply prior law). If this paragraph (1)(2) applies, appropriate adjustments must be made in years beginning on or after July 12, 1995, to prevent the avoidance, duplication, omission, or elimination of any item (or tax liability), or any other inconsistency with the rules of this section.

(3) *Effective/applicability date.* Paragraph (c)(1)(iv) of this section applies to a loss that continues to be deferred pursuant to that paragraph if the event that would cause the loss to be redetermined as a noncapital nondeductible

amount under the principles of § 1.1502-13 occurs on or after April 16, 2012.

(4) *Prior law.* For transactions occurring in S's years beginning before July 12, 1995 see the applicable regulations issued under sections 267 and 1502. See, e.g., §§ 1.267(f)-1, 1.267(f)-1T, 1.267(f)-2T, 1.267(f)-3, 1.1502-13, 1.1502-13T, 1.1502-14, 1.1502-14T, and 1.1502-31 (as contained in the 26 CFR part 1 edition revised as of April 1, 1995).

[T.D. 8597, 60 FR 36680, July 18, 1995, as amended by T.D. 8660, 61 FR 10499, Mar. 14, 1996; 62 FR 12097, Mar. 14, 1997; T.D. 9048, 68 FR 12290, Mar. 14, 2003; T.D. 9187, 70 FR 10327, Mar. 3, 2005; T.D. 9254, 71 FR 13018, Mar. 14, 2006; T.D. 9424, 73 FR 53986, Sept. 17, 2008; T.D. 9583, 77 FR 22482, Apr. 16, 2012]

§ 1.268-1 Items attributable to an unharvested crop sold with the land.

In computing taxable income no deduction shall be allowed in respect of items attributable to the production of an unharvested crop which is sold, exchanged, or involuntarily converted with the land and which is considered as property used in the trade or business under section 1231(b)(4). Such items shall be so treated whether or not the taxable year involved is that of the sale, exchange, or conversion of such crop and whether they are for expenses, depreciation, or otherwise. If the taxable year involved is not that of the sale, exchange, or conversion of such crop, a recomputation of the tax liability for such year shall be made; such recomputation should be in the form of an "amended return" if necessary. For the adjustments to basis as a result of such disallowance, see section 1016(a)(11) and the regulations thereunder.

§ 1.269-1 Meaning and use of terms.

As used in section 269 and §§ 1.269-2 through 1.269-7:

(a) *Allowance.* The term *allowance* refers to anything in the internal revenue laws which has the effect of diminishing tax liability. The term includes, among other things, a deduction, a credit, an adjustment, an exemption, or an exclusion.

(b) *Evasion or avoidance.* The phrase *evasion or avoidance* is not limited to

cases involving criminal penalties, or civil penalties for fraud.

(c) *Control.* The term *control* means the ownership of stock possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote, or at least 50 percent of the total value of shares of all classes of stock of the corporation. For control to be "acquired on or after October 8, 1940", it is not necessary that all of such stock be acquired on or after October 8, 1940. Thus, if A, on October 7, 1940, and at all times thereafter, owns 40 percent of the stock of X Corporation and acquires on October 8, 1940, an additional 10 percent of such stock, an acquisition within the meaning of such phrase is made by A on October 8, 1940. Similarly, if B, on October 7, 1940, owns certain assets and transfers on October 8, 1940, such assets to a newly organized Y Corporation in exchange for all the stock of Y Corporation, an acquisition within the meaning of such phrase is made by B on October 8, 1940. If, under the facts stated in the preceding sentence, B is a corporation, all of whose stock is owned by Z Corporation, then an acquisition within the meaning of such phrase is also made by Z Corporation on October 8, 1940, as well as by the shareholders of Z Corporation taken as a group on such date, and by any of such shareholders if such shareholders as a group own 50 percent of the stock of Z on such date.

(d) *Person.* The term *person* includes an individual, a trust, an estate, a partnership, an association, a company or a corporation.

[T.D. 6595, 27 FR 3596, Apr. 14, 1962, as amended by T.D. 8388, 57 FR 345, Jan. 6, 1992]

§ 1.269-2 Purpose and scope of section 269.

(a) *General.* Section 269 is designed to prevent in the instances specified therein the use of the sections of the Internal Revenue Code providing deductions, credits, or allowances in evading or avoiding Federal income tax. See § 1.269-3.

(b) *Disallowance of deduction, credit, or other allowance.* Under the Code, an amount otherwise constituting a deduction, credit, or other allowance becomes unavailable as such under certain circumstances. Characteristic of

such circumstances are those in which the effect of the deduction, credit, or other allowance would be to distort the liability of the particular taxpayer when the essential nature of the transaction or situation is examined in the light of the basic purpose or plan which the deduction, credit, or other allowance was designed by the Congress to effectuate. The distortion may be evidenced, for example, by the fact that the transaction was not undertaken for reasons germane to the conduct of the business of the taxpayer, by the unreal nature of the transaction such as its sham character, or by the unreal or unreasonable relation which the deduction, credit, or other allowance bears to the transaction. The principle of law making an amount unavailable as a deduction, credit, or other allowance in cases in which the effect of making an amount so available would be to distort the liability of the taxpayer, has been judicially recognized and applied in several cases. Included in these cases are *Gregory v. Helvering* (1935) (293 U.S. 465; Ct. D. 911, C.B. XIV-1, 193); *Griffiths v. Helvering* (1939) (308 U.S. 355; Ct. D. 1431, C.B. 1940-1, 136); *Higgins v. Smith* (1940) (308 U.S. 473; Ct. D. 1434, C.B. 1940-1, 127); and *J. D. & A. B. Spreckles Co. v. Commissioner* (1940) (41 B.T.A. 370). In order to give effect to such principle, but not in limitation thereof, several provisions of the Code, for example, section 267 and section 270, specify with some particularity instances in which disallowance of the deduction, credit, or other allowance is required. Section 269 is also included in such provisions of the Code. The principle of law and the particular sections of the Code are not mutually exclusive and in appropriate circumstances they may operate together or they may operate separately. See, for example, § 1.269-6.

[T.D. 6595, 27 FR 3596, Apr. 14, 1962]

§ 1.269-3 Instances in which section 269(a) disallows a deduction, credit, or other allowance.

(a) *Instances of disallowance.* Section 269 specifies two instances in which a deduction, credit, or other allowance is to be disallowed. These instances, described in paragraphs (1) and (2) of section 269(a), are those in which:

(1) Any person or persons acquire, or acquired on or after October 8, 1940, directly or indirectly, control of a corporation, or

(2) Any corporation acquires, or acquired on or after October 8, 1940, directly or indirectly, property of another corporation (not controlled, directly or indirectly, immediately before such acquisition by such acquiring corporation or its stockholders), the basis of which property in the hands of the acquiring corporation is determined by reference to the basis in the hands of the transferor corporation.

In either instance the principal purpose for which the acquisition was made must have been the evasion or avoidance of Federal income tax by securing the benefit of a deduction, credit, or other allowance which such person, or persons, or corporation, would not otherwise enjoy. If this requirement is satisfied, it is immaterial by what method or by what conjunction of events the benefit was sought. Thus, an acquiring person or corporation can secure the benefit of a deduction, credit, or other allowance within the meaning of section 269 even though it is the acquired corporation that is entitled to such deduction, credit, or other allowance in the determination of its tax. If the purpose to evade or avoid Federal income tax exceeds in importance any other purpose, it is the principal purpose. This does not mean that only those acquisitions fall within the provisions of section 269 which would not have been made if the evasion or avoidance purpose was not present. The determination of the purpose for which an acquisition was made requires a scrutiny of the entire circumstances in which the transaction or course of conduct occurred, in connection with the tax result claimed to arise therefrom.

(b) *Acquisition of control; transactions indicative of purpose to evade or avoid tax.* If the requisite acquisition of control within the meaning of paragraph (1) of section 269(a) exists, the transactions set forth in the following subparagraphs are among those which, in the absence of additional evidence to the contrary, ordinarily are indicative that the principal purpose for acquiring control was evasion or avoidance of Federal income tax:

(1) A corporation or other business enterprise (or the interest controlling such corporation or enterprise) with large profits acquires control of a corporation with current, past, or prospective credits, deductions, net operating losses, or other allowances and the acquisition is followed by such transfers or other action as is necessary to bring the deduction, credit, or other allowance into conjunction with the income (see further § 1.269-6). This subparagraph may be illustrated by the following example:

Example. Individual A acquires all of the stock of L Corporation which has been engaged in the business of operating retail drug stores. At the time of the acquisition, L Corporation has net operating loss carryovers aggregating \$100,000 and its net worth is \$100,000. After the acquisition, L Corporation continues to engage in the business of operating retail drug stores but the profits attributable to such business after the acquisition are not sufficient to absorb any substantial portion of the net operating loss carryovers. Shortly after the acquisition, individual A causes to be transferred to L Corporation the assets of a hardware business previously controlled by A which business produces profits sufficient to absorb a substantial portion of L Corporation's net operating loss carryovers. The transfer of the profitable business, which has the effect of using net operating loss carryovers to offset gains of a business unrelated to that which produced the losses, indicates that the principal purpose for which the acquisition of control was made is evasion or avoidance of Federal income tax.

(2) A person or persons organize two or more corporations instead of a single corporation in order to secure the benefit of multiple surtax exemptions (see section 11(c)) or multiple minimum accumulated earnings credits (see section 535(c)(2) and (3)).

(3) A person or persons with high earning assets transfer them to a newly organized controlled corporation retaining assets producing net operating losses which are utilized in an attempt to secure refunds.

(c) *Acquisition of property; transactions indicative of purpose to evade or avoid tax.* If the requisite acquisition of property within the meaning of paragraph (2) of section 269(a) exists, the transactions set forth in the following subparagraphs are among those which, in the absence of additional evidence to

the contrary, ordinarily are indicative that the principal purpose for acquiring such property was evasion or avoidance of Federal income tax:

(1) A corporation acquires property having in its hands an aggregate carryover basis which is materially greater than its aggregate fair market value at the time of such acquisition and utilizes the property to create tax-reducing losses or deductions.

(2) A subsidiary corporation, which has sustained large net operating losses in the operation of business X and which has filed separate returns for the taxable years in which the losses were sustained, acquires high earning assets, comprising business Y, from its parent corporation. The acquisition occurs at a time when the parent would not succeed to the net operating loss carryovers of the subsidiary if the subsidiary were liquidated, and the profits of business Y are sufficient to offset a substantial portion of the net operating loss carryovers attributable to business X (see further *Example 3* of § 1.269-6).

(d) *Ownership changes to which section 382(l)(5) applies; transactions indicative of purpose to evade or avoid tax*—(1) *In general.* Absent strong evidence to the contrary, a requisite acquisition of control or property in connection with an ownership change to which section 382(l)(5) applies is considered to be made for the principal purpose of evasion or avoidance of Federal income tax unless the corporation carries on more than an insignificant amount of an active trade or business during and subsequent to the title 11 or similar case (as defined in section 382(l)(5)(G)). The determination of whether the corporation carries on more than an insignificant amount of an active trade or business is made without regard to the continuity of business enterprise set forth in § 1.368-1(d). The determination is based on all the facts and circumstances, including, for example, the amount of business assets that continue to be used, or the number of employees in the work force who continue employment, in an active trade or business (although not necessarily the historic trade or business). Where the corporation continues to

§ 1.269-4

26 CFR Ch. I (4-1-17 Edition)

utilize a significant amount of its business assets or work force, the requirement of carrying on more than an insignificant amount of an active trade or business may be met even though all trade or business activities temporarily cease for a period of time in order to address business exigencies.

(2) *Effective date.* The presumption under paragraph (d) of this section applies to acquisitions of control or property effected pursuant to a plan of reorganization confirmed by a court in a title 11 or similar case (within the meaning of section 368(a)(3)(A)) after August 14, 1990.

(e) *Relationship of section 269 to 11 U.S.C. 1129(d).* In determining for purposes of section 269 of the Internal Revenue Code whether an acquisition pursuant to a plan of reorganization in a case under title 11 of the United States Code was made for the principal purpose of evasion or avoidance of Federal income tax, the fact that a governmental unit did not seek a determination under 11 U.S.C. 1129(d) is not taken into account and any determination by a court under 11 U.S.C. 1129(d) that the principal purpose of the plan is not avoidance of taxes is not controlling.

[T.D. 6595, 27 FR 3596, Apr. 14, 1962, as amended by T.D. 8388, 57 FR 345, Jan. 6, 1992]

§ 1.269-4 Power of district director to allocate deduction, credit, or allowance in part.

The district director is authorized by section 269(b) to allow a part of the amount disallowed by section 269(a), but he may allow such part only if and to the extent that he determines that the amount allowed will not result in the evasion or avoidance of Federal income tax for which the acquisition was made. The district director is also authorized to use other methods to give effect to part of the amount disallowed under section 269(a), but only to such extent as he determines will not result in the evasion or avoidance of Federal income tax for which the acquisition was made. Whenever appropriate to give proper effect to the deduction, credit, or other allowance, or such part of it which may be allowed, this authority includes the distribution, apportionment, or allocation of both the gross income and the deductions, cred-

its, or other allowances the benefit of which was sought, between or among the corporations, or properties, or parts thereof, involved, and includes the disallowance of any such deduction, credit, or other allowance to any of the taxpayers involved.

[T.D. 6595, 27 FR 3597, Apr. 14, 1962]

§ 1.269-5 Time of acquisition of control.

(a) *In general.* For purposes of section 269, an acquisition of control occurs when one or more persons acquire beneficial ownership of stock possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote or at least 50 percent of the total value of share of all classes of stock of the corporation.

(b) *Application of general rule to certain creditor acquisitions.* (1) For purposes of section 269, creditors of an insolvent or bankrupt corporation (by themselves or in conjunction with other persons) acquire control of the corporation when they acquire beneficial ownership of the requisite amount of stock. Although insolvency or bankruptcy may cause the interests of creditors to predominate as a practical matter, creditor interests do not constitute beneficial ownership of the corporation's stock. Solely for purposes of section 269, creditors of a bankrupt corporation are treated as acquiring beneficial ownership of stock of the corporation no earlier than the time a bankruptcy court confirms a plan of reorganization.

(2) The provisions of this section are illustrated by the following example.

Example. Corporation *L* files a petition under chapter 11 of the Bankruptcy Code on January 5, 1987. A creditors' committee is formed. On February 22, 1987, and upon the request of the creditors, the bankruptcy court removes the debtor-in-possession from business management and operations and appoints a trustee. The trustee consults regularly with the creditors' committee in formulating both short-term and long-term management decisions. After three years, the creditors approve a plan of reorganization in which the outstanding stock of Corporation *L* is canceled and its creditors receive shares of stock constituting all of the outstanding shares. The bankruptcy court confirms the plan of reorganization on March 23, 1990, and the plan is put into effect

Internal Revenue Service, Treasury

§ 1.269B-1

on May 25, 1990. For purposes of section 269, the creditors acquired control of Corporation *L* than March 23, 1990. Similarly, the determination of whether the creditors acquired control of Corporation *L* no earlier with the principal purpose of evasion or avoidance of Federal income tax is made by reference to the creditors' purposes as of no earlier than March 23, 1990.

[T.D. 8388, 57 FR 346, Jan. 6, 1992]

§ 1.269-6 Relationship of section 269 to section 382 before the Tax Reform Act of 1986.

Section 269 and §§1.269-1 through 1.269-5 may be applied to disallow a net operating loss carryover even though such carryover is not disallowed (in whole or in part) under section 382 and the regulations thereunder. This section may be illustrated by the following examples:

Example 1. L Corporation has computed its taxable income on a calendar year basis and has sustained heavy net operating losses for a number of years. Assume that A purchases all of the stock of L Corporation on December 31, 1955, for the principal purpose of utilizing its net operating loss carryovers by changing its business to a profitable new business. Assume further that A makes no attempt to revitalize the business of L Corporation during the calendar year 1956 and that during January 1957 the business is changed to an entirely new and profitable business. The carryovers will be disallowed under the provisions of section 269(a) without regard to the application of section 382.

Example 2. L Corporation has sustained heavy net operating losses for a number of years. In a merger under State law, P Corporation acquires all of the assets of L Corporation for the principal purpose of utilizing the net operating loss carryovers of L Corporation against the profits of P Corporation's business. As a result of the merger, the former stockholders of L Corporation own, immediately after the merger, 12 percent of the fair market value of the outstanding stock of P Corporation. If the merger qualifies as a reorganization to which section 381(a) applies, the entire net operating loss carryovers will be disallowed under the provisions of section 269(a) without regard to the application of section 382.

Example 3. L Corporation has been sustaining net operating losses for a number of years. P Corporation, a profitable corporation, on December 31, 1955, acquires all the stock of L Corporation for the purpose of continuing and improving the operation of L Corporation's business. Under the provisions of sections 334(b)(2) and 381(a)(1), P Corporation would not succeed to L Corporation's

net operating loss carryovers if L Corporation were liquidated pursuant to a plan of liquidation adopted within two years after the date of the acquisition. During 1956, P Corporation transfers a profitable business to L Corporation for the principal purpose of using the profits of such business to absorb the net operating loss carryovers of L Corporation. The transfer is such as to cause the basis of the transferred assets in the hands of L Corporation to be determined by reference to their basis in the hands of P Corporation. L Corporation's net operating loss carryovers will be disallowed under the provisions of section 269(a) without regard to the application of section 382.

[T.D. 6595, 27 FR 3597, Apr. 14, 1962, as amended by T.D. 8388, 57 FR 346, Jan. 6, 1992]

§ 1.269-7 Relationship of section 269 to sections 382 and 383 after the Tax Reform Act of 1986.

Section 269 and §§1.269-1 through 1.269-5 may be applied to disallow a deduction, credit, or other allowance notwithstanding that the utilization or amount of a deduction, credit, or other allowance is limited or reduced under section 382 or 383 and the regulations thereunder. However, the fact that the amount of taxable income or tax that may be offset by a deduction, credit, or other allowance is limited under section 382(a) or 383 and the regulations thereunder is relevant to the determination of whether the principal purpose of an acquisition is the evasion or avoidance of Federal income tax.

[T.D. 8388, 57 FR 346, Jan. 6, 1992]

§ 1.269B-1 Stapled foreign corporations.

(a) *Treatment as a domestic corporation*—(1) *General rule.* Except as otherwise provided, if a foreign corporation is a stapled foreign corporation within the meaning of paragraph (b)(1) of this section, such foreign corporation will be treated as a domestic corporation for U.S. Federal income tax purposes. Accordingly, for example, the worldwide income of such corporation will be subject to the tax imposed by section 11. For application of the branch profits tax under section 884, and application of sections 871(a), 881, 1441, and 1442 to dividends and interest paid by a stapled foreign corporation, see §§1.884-1(h) and 1.884-4(d).

(2) *Foreign owned exception.* Paragraph (a)(1) of this section will not apply if a foreign corporation and a domestic corporation are stapled entities (as provided in paragraph (b) of this section) and such foreign and domestic corporations are foreign owned within the meaning of this paragraph (a)(2). A corporation will be treated as foreign owned if it is established to the satisfaction of the Commissioner that United States persons hold directly (or indirectly applying section 958(a)(2) and (3) and section 318(a)(4)) less than 50 percent of the total combined voting power of all classes of stock entitled to vote and less than 50 percent of the total value of the stock of such corporation. For the consequences of a stapled foreign corporation becoming or ceasing to be foreign owned, therefore converting its status as either a foreign or domestic corporation within the meaning of this paragraph (a)(2), see paragraph (c) of this section.

(b) *Definition of a stapled foreign corporation*—(1) *General rule.* A foreign corporation is a stapled foreign corporation if such foreign corporation and a domestic corporation are stapled entities. A foreign corporation and a domestic corporation are stapled entities if more than 50 percent of the aggregate value of each corporation's beneficial ownership consists of interests that are stapled. In the case of corporations with more than one class of stock, it is not necessary for a class of stock representing more than 50 percent of the beneficial ownership of the foreign corporation to be stapled to a class of stock representing more than 50 percent of the beneficial ownership of the domestic corporation, provided that more than 50 percent of the aggregate value of each corporation's beneficial ownership (taking into account all classes of stock) are in fact stapled. Interests are stapled if a transferor of one or more interests in one entity is required, by form of ownership, restrictions on transfer, or other terms or conditions, to transfer interests in the other entity. The determination of whether interests are stapled for this purpose is based on the relevant facts and circumstances, including, but not limited to, the corporations' by-laws, articles of incorporation or associa-

tion, and stock certificates, shareholder agreements, agreements between the corporations, and voting trusts with respect to the corporations. For the consequences of a foreign corporation becoming or ceasing to be a stapled foreign corporation (*e.g.*, a corporation that is no longer foreign owned) under this paragraph (b)(1), see paragraph (c) of this section.

(2) *Related party ownership rule.* For purposes of determining whether a foreign corporation is a stapled foreign corporation, the Commissioner may, at his discretion, treat interests that otherwise would be stapled interests as not being stapled if the same person or related persons (within the meaning of section 267(b) or 707(b)) hold stapled interests constituting more than 50 percent of the beneficial ownership of both corporations, and a principal purpose of the stapling of those interests is the avoidance of U.S. income tax. A stapling of interests may have a principal purpose of tax avoidance even though the tax avoidance purpose is outweighed by other purposes when taken together.

(3) *Example.* The principles of paragraph (b)(1) of this section are illustrated by the following example:

Example. USCo, a domestic corporation, and FCo, a foreign corporation, are publicly traded companies, each having two classes of stock outstanding. USCo's class A shares, which constitute 75% of the value of all beneficial ownership in USCo, are stapled to FCo's class B shares, which constitute 25% of the value of all beneficial ownership in FCo. USCo's class B shares, which constitute 25% of the value of all beneficial ownership in USCo, are stapled to FCo class A shares, which constitute 75% of the value of all beneficial ownership in FCo. Because more than 50% of the aggregate value of the stock of each corporation is stapled to the stock of the other corporation, USCo and FCo are stapled entities within the meaning of section 269B(c)(2).

(c) *Changes in domestic or foreign status.* The deemed conversion of a foreign corporation to a domestic corporation under section 269B is treated as a reorganization under section 368(a)(1)(F). Similarly, the deemed conversion of a corporation that is treated as a domestic corporation under section 269B to a foreign corporation is treated as a reorganization under section 368(a)(1)(F).

For the consequences of a deemed conversion, including the closing of a corporation's taxable year, see §§1.367(a)-1(e), (f) and 1.367(b)-2(f).

(d) *Includible corporation*—(1) Except as provided in paragraph (d)(2) of this section, a stapled foreign corporation treated as a domestic corporation under section 269B nonetheless is treated as a foreign corporation in determining whether it is an includible corporation within the meaning of section 1504(b). Thus, for example, a stapled foreign corporation is not eligible to join in the filing of a consolidated return under section 1501, and a dividend paid by such corporation is not a qualifying dividend under section 243(b), unless a valid section 1504(d) election is made with respect to such corporation.

(2) A stapled foreign corporation is treated as a domestic corporation in determining whether it is an includible corporation under section 1504(b) for purposes of applying §§1.904(i)-1 and 1.861-11T(d)(6).

(e) *U.S. treaties*—(1) A stapled foreign corporation that is treated as a domestic corporation under section 269B may not claim an exemption from U.S. income tax or a reduction in U.S. tax rates by reason of any treaty entered into by the United States.

(2) The principles of this paragraph (e) are illustrated by the following example:

Example. FCo, a Country X corporation, is a stapled foreign corporation that is treated as a domestic corporation under section 269B. FCo qualifies as a resident of Country X pursuant to the income tax treaty between the United States and Country X. Under such treaty, the United States is permitted to tax business profits of a Country X resident only to the extent that the business profits are attributable to a permanent establishment of the Country X resident in the United States. While FCo earns income from sources within and without the United States, it does not have a permanent establishment in the United States within the meaning of the relevant treaty. Under paragraph (e)(1) of this section, however, FCo is subject to U.S. Federal income tax on its income as a domestic corporation without regard to the provisions of the U.S.-Country X treaty and therefore without regard to the fact that FCo has no permanent establishment in the United States.

(f) *Tax assessment and collection procedures*—(1) *In general.* (i) Any income tax

imposed on a stapled foreign corporation by reason of its treatment as a domestic corporation under section 269B (whether such income tax is shown on the stapled foreign corporation's U.S. Federal income tax return or determined as a deficiency in income tax) shall be assessed as the income tax liability of such stapled foreign corporation.

(ii) Any income tax assessed as a liability of a stapled foreign corporation under paragraph (f)(1)(i) of this section shall be considered as having been properly assessed as an income tax liability of the stapled domestic corporation (as defined in paragraph (f)(4)(i) of this section) and all 10-percent shareholders of the stapled foreign corporation (as defined in paragraph (f)(4)(ii) of this section). The date of such deemed assessment shall be the date the income tax liability of the stapled foreign corporation was properly assessed. The Commissioner may collect such income tax from the stapled domestic corporation under the circumstances set forth in paragraph (f)(2) of this section and may collect such income tax from any 10-percent shareholders of the stapled foreign corporation under the circumstances set forth in paragraph (f)(3) of this section.

(2) *Collection from domestic stapled corporation.* If the stapled foreign corporation does not pay its income tax liability that was properly assessed, the unpaid balance of such income tax or any portion thereof may be collected from the stapled domestic corporation, provided that the following conditions are satisfied—

(i) The Commissioner has issued a notice and demand for payment of such income tax to the stapled foreign corporation in accordance with §301.6303-1 of this Chapter;

(ii) The stapled foreign corporation has failed to pay the income tax by the date specified in such notice and demand;

(iii) The Commissioner has issued a notice and demand for payment of the unpaid portion of such income tax to the stapled domestic corporation in accordance with §301.6303-1 of this Chapter.

(3) *Collection from 10-percent shareholders of the stapled foreign corporation.*

The unpaid balance of the stapled foreign corporation's income tax liability may be collected from a 10-percent shareholder of the stapled foreign corporation, limited to each such shareholder's income tax liability as determined under paragraph (f)(4)(iv) of this section, provided the following conditions are satisfied—

(i) The Commissioner has issued a notice and demand to the stapled domestic corporation for the unpaid portion of the stapled foreign corporation's income tax liability, as provided in paragraph (f)(2)(iii) of this section;

(ii) The stapled domestic corporation has failed to pay the income tax by the date specified in such notice and demand;

(iii) The Commissioner has issued a notice and demand for payment of the unpaid portion of such income tax to such 10-percent shareholder of the stapled foreign corporation in accordance with § 301.6303-1 of this Chapter.

(4) *Special rules and definitions.* For purposes of this paragraph (f), the following rules and definitions apply:

(i) *Stapled domestic corporation.* A domestic corporation is a *stapled domestic corporation* with respect to a stapled foreign corporation if such domestic corporation and the stapled foreign corporation are stapled entities as described in paragraph (b)(1) of this section.

(ii) *10-percent shareholder.* A *10-percent shareholder* of a stapled foreign corporation is any person that owned directly 10 percent or more of the total value or total combined voting power of all classes of stock in the stapled foreign corporation for any day of the stapled foreign corporation's taxable year with respect to which the income tax liability relates.

(iii) *10-percent shareholder in the case of indirect ownership of stapled foreign corporation stock.* [Reserved]

(iv) *Determination of a 10-percent shareholder's income tax liability.* The income tax liability of a 10-percent shareholder of a stapled foreign corporation, for the income tax of the stapled foreign corporation under section 269B and this section, is determined by assigning an equal portion of the total income tax liability of the stapled foreign corporation for the taxable year

to each day in such corporation's taxable year, and then dividing that portion ratably among the shares outstanding for that day on the basis of the relative values of such shares. The liability of any 10-percent shareholder for this purpose is the sum of the income tax liability allocated to the shares held by such shareholder for each day in the taxable year.

(v) *Income tax.* The term *income tax* means any income tax liability imposed on a domestic corporation under title 26 of the United States Code, including additions to tax, additional amounts, penalties, and interest related to such income tax liability.

(g) *Effective dates.*—(1) Except as provided in this paragraph (g), the provisions of this section are applicable for taxable years that begin after July 29, 2005.

(2) Paragraphs (d)(1) and (f) of this section (except as applied to the collection of tax from any 10-percent shareholder of a stapled foreign corporation that is a foreign person) are applicable beginning on—

(i) July 18, 1984, for any foreign corporation that became stapled to a domestic corporation after June 30, 1983; and

(ii) January 1, 1987, for any foreign corporation that was stapled to a domestic corporation as of June 30, 1983.

(3) Paragraph (d)(2) of this section is applicable for taxable years beginning after July 22, 2003, except that in the case of a foreign corporation that becomes stapled to a domestic corporation on or after July 22, 2003, paragraph (d)(2) of this section applies for taxable years ending on or after July 22, 2003.

(4) Paragraph (e) of this section is applicable beginning on July 18, 1984, except as provided in paragraph (g)(5) of this section.

(5) In the case of a foreign corporation that was stapled to a domestic corporation as of June 30, 1983, which was entitled to claim benefits under an income tax treaty as of that date, and which remains eligible for such treaty benefits, paragraph (e) of this section will not apply to such foreign corporation and for all purposes of the Internal Revenue Code such corporation will continue to be treated as a foreign entity. The prior sentence will continue

to apply even if such treaty is subsequently modified by protocol, or superseded by a new treaty, so long as the stapled foreign corporation continues to be eligible to claim such treaty benefits. If the treaty benefits to which the stapled foreign corporation was entitled as of June 30, 1983, are terminated, then a deemed conversion of the foreign corporation to a domestic corporation shall occur pursuant to paragraph (c) of this section as of the date of such termination.

[T.D. 9216, 70 FR 43758, July 29, 2005, as amended by T.D. 9739, 80 FR 56912, Sept. 21, 2015]

§ 1.270-1 Limitation on deductions allowable to individuals in certain cases.

(a) *Recomputation of taxable income.*

(1) Under certain circumstances, section 270 limits the deductions (other than certain deductions described in subsection (b) thereof) attributable to a trade or business carried on by an individual which are otherwise allowable to such individual under the provisions of chapter 1 of the Code or the corresponding provisions of prior revenue laws. If, in each of five consecutive taxable years (including at least one taxable year beginning after December 31, 1953, and ending after August 16, 1954), the deductions attributable to a trade or business carried on by an individual (other than the specially treated deductions described in paragraph (b) of this section) exceed the gross income derived from such trade or business by more than \$50,000, the taxable income computed under section 63 (or the net income computed under the corresponding provisions of prior revenue laws) of such individual shall be recomputed for each of such taxable years.

(2) In recomputing the taxable income (or the net income, in the case of taxable years which are otherwise subject to the Internal Revenue Code of 1939) for each of the five taxable years, the deductions (other than the specially treated deductions described in paragraph (b) of this section with the exception of the net operating loss deduction) attributable to the trade or business carried on by the individual shall be allowed only to the extent of (i) the gross income derived from such

trade or business, plus (ii) \$50,000. The specially treated deductions described in paragraph (b) of this section (other than the net operating loss deduction) shall each be allowed in full. The net operating loss deduction, to the extent attributable to such trade or business, shall be disallowed in its entirety. Thus, a carryover or a carryback of a net operating loss so attributable, either from a year within the period of five consecutive taxable years or from a taxable year outside of such period, shall be ignored in making the recomputation of taxable income or net income, as the case may be.

(3) The limitations on deductions provided by section 270 are also applicable in determining under section 172, or the corresponding provisions of prior revenue laws, the amount of any net operating loss carryover or carryback from any year which falls within the provisions of section 270 to any year which does not fall within such provisions. Also, in determining under section 172, or the corresponding provisions of prior revenue laws, the amount of any net operating loss carryover from a year which falls within the provisions of section 270 to a year which does not fall within such provisions, the amount of net operating loss is to be reduced by the taxable income or net income, as the case may be (computed as provided in § 1.172-5, or 26 CFR (1939) 39.122-4(c) (Regulations 118), as the case may be and, in the case of any taxable year which falls within the provisions of section 270, determined after the application of section 270), of any taxable year preceding or succeeding the taxable year of the net operating loss to which such loss must first be carried back or carried over under the provisions of section 172(b), or the corresponding provisions of prior revenue laws, even though the net operating loss deduction is not an allowable deduction for such preceding or succeeding taxable year.

(4) If an individual carries on several trades or businesses, the deductions attributable to such trades or businesses and the gross income derived therefrom shall not be aggregated in determining whether the deductions (other than the specially treated deductions) exceed the gross income derived from such

trades or businesses by more than \$50,000 in any taxable year. For the purposes of section 270, each trade or business shall be considered separately. However, where a particular business of an individual is conducted in one or more forms such as a partnership, joint venture, or individual proprietorship, the individual's share of the profits and losses from each business unit must be aggregated to determine the applicability of section 270. See paragraphs (a)(8)(ii) and (b) of § 1.702-1, relating to applicability of section 270 to a partner. Where it is established that for tax purposes a husband and wife are partners in the same trade or business or that each is participating independently of the other in the same trade or business with his and her own money, the husband's gross income and deductions from that trade or business shall be considered separately from the wife's gross income and deductions from that trade or business even though they file a joint return. Where a taxpayer is engaged in a trade or business in a community property State under circumstances such that the income therefrom is considered to be community income, the taxpayer and his spouse are treated for purposes of section 270 as two individuals engaged separately in the same trade or business and the gross income and deductions attributable to the trade or business are allocated one-half to the taxpayer and one-half to the spouse. Where several business activities emanate from a single commodity, such as oil or gas or a tract of land, it does not necessarily follow that such activities are one business for the purposes of section 270. However, in order to be treated separately, it must be established that such business activities are actually conducted separately and are not closely interrelated with each other. For the purposes of section 270, the trade or business carried on by an individual must be the same in each of the five consecutive years in which the deductions (other than the specially treated deductions) exceed the gross income derived from such trade or business by more than \$50,000.

(5) For the purposes of section 270, a taxable year may be part of two or more periods of five consecutive tax-

able years. Thus, if the deductions (other than the specially treated deductions) attributable to a trade or business carried on by an individual exceed the gross income therefrom by more than \$50,000 for each of six consecutive taxable years, the fifth year of such six consecutive taxable years shall be considered to be a part both of a five-year period beginning with the first and ending with the fifth taxable year and of a five-year period beginning with the second and ending with the sixth taxable year.

(6) For the purposes of section 270, a short taxable year required to effect a change in accounting period constitutes a taxable year. In determining the applicability of section 270 in the case of a short taxable year, items of income and deduction are not annualized.

(b) *Specially treated deductions.* (1) For the purposes of section 270 and paragraph (a) of this section, the specially treated deductions are:

- (i) Taxes,
- (ii) Interest,
- (iii) Casualty and abandonment losses connected with a trade or business deductible under section 165(c)(1) or the corresponding provisions of prior revenue laws,
- (iv) Losses and expenses of the trade or business of farming which are directly attributable to drought,
- (v) The net operating loss deduction allowed by section 172, or the corresponding provisions of prior revenue laws, and
- (vi) Expenditures as to which a taxpayer is given the option, under law or regulations, either (a) to deduct as expenses when incurred, or (b) to defer or capitalize.

(2) For the purpose of subparagraph (1)(iv) of this paragraph, an individual is engaged in the "trade or business of farming" if he cultivates, operates, or manages a farm for gain or profit, either as owner or tenant. An individual who receives a rental (either in cash or in kind) which is based upon farm production is engaged in the trade or business of farming. However, an individual who receives a fixed rental (without reference to production) is engaged in the trade or business of farming only if he participates to a material extent in

the operation or management of the farm. An individual engaged in forestry or the growing of timber is not thereby engaged in the trade or business of farming. An individual cultivating or operating a farm for recreation or pleasure rather than a profit is not engaged in the trade or business of farming. The term *farm* is used in its ordinarily accepted sense and includes stock, dairy, poultry, fruit, crop, and truck farms, and also plantations, ranches, ranges, and orchards. An individual is engaged in the trade or business of farming if he is a member of a partnership engaged in the trade or business of farming.

(3) In order for losses and expenses of the trade or business of farming to qualify as specially treated deductions under subparagraph (1)(iv) of this paragraph such losses and expenses must be directly attributable to drought conditions and not to other causes such as faulty management or unfavorable market conditions. In general, the following are the types of losses and expenses which, if otherwise deductible, may qualify as specially treated deductions under subparagraph (1)(iv) of this paragraph:

(i) Losses for damages to or destruction of property as a result of drought conditions, if such property is used in the trade or business of farming or is purchased for resale in the trade or business of farming;

(ii) Expenses directly related to raising crops or livestock which are destroyed or damaged by drought. Included in this category are, for example, payments for labor, fertilizer, and feed used in raising such crops or livestock. If such crops or livestock to which the expenditures relate are only partially destroyed or damaged by drought then only a proportionate part of the expenditures is regarded as specially treated deductions; and

(iii) Expenses which would not have been incurred in the absence of drought conditions, such as expenses for procuring pasture or additional supplies of water or feed.

(4) The expenditures referred to in subparagraph (1)(vi) of this paragraph include, but are not limited to, intangible drilling and development costs in the case of oil and gas wells as provided

in section 263(c) and the regulations thereunder, and expenditures for the development of a mine or other natural deposit (other than an oil or gas well) as provided in section 616 and the regulations thereunder.

(5) The provisions of section 270(b) do not operate to make an expenditure a deductible item if it is not otherwise deductible under the law applicable to the particular year in which it was incurred. Thus, for example, if it is necessary, pursuant to the provisions of section 270, to recompute the taxable or net income of an individual for the taxable years 1950 through 1954, the individual in making the recomputation may not deduct expenditures paid or incurred in the years 1950 through 1953 which must be capitalized under the law applicable to those years, even though the expenditures are deductible under the Code.

(c) *Applicability to taxable years otherwise subject to the Internal Revenue Code of 1939.* The net income of a taxable year otherwise subject to the Internal Revenue Code of 1939 shall be recomputed pursuant to section 270 if (i) such taxable year is included in a period of five consecutive taxable years which includes at least one taxable year beginning after December 31, 1953, and ending after August 16, 1954, and (ii) the deductions (other than the specially treated deductions specified in section 270(b)) for each taxable year in such five-year period exceed the \$50,000 limitation specified in section 270. As described in paragraph (a)(5) of this section, a taxable year may be part of two or more periods of five consecutive taxable years, one meeting the requirements for recomputation pursuant to section 130 of the Internal Revenue Code of 1939 and the other meeting the requirements for recomputation pursuant to section 270 of the Internal Revenue Code of 1954, then the recomputation for such taxable year shall be made pursuant to section 270. For example, if a calendar year taxpayer sustains a loss from a trade or business for each of the years 1949 through 1954, the years 1950, 1951, 1952, and 1953 may be a part of two such periods of five consecutive taxable years. If, however, a taxable year is part of a period of five consecutive taxable years which meets

the requirements for recomputation pursuant to section 130 of the Internal Revenue Code of 1939, but is not part of a period which meets the requirements for recomputation, pursuant to section 270, then a recomputation of net income for such taxable year must be made pursuant to section 130.

(d) *Redetermination of tax.* The tax imposed by Chapter 1 of the Code, or by the corresponding provisions of prior revenue laws, for each of the five consecutive taxable years specified in paragraph (a) of this section shall be redetermined upon the basis of the taxable income or net income of the individual, as the case may be, recomputed in the manner described in paragraph (a) of this section. If the assessment of a deficiency is prevented (except for the provisions of Part II (section 1311 and following), Subchapter Q, Chapter 1 of the Code, relating to the effect of limitations and other provisions in income tax cases) by the operation of any provision of law (e.g., sections 6501 and 6502, or the corresponding provisions of prior revenue laws, relating to the period of limitations upon assessment and collection) except section 7122, or the corresponding provisions of prior revenue laws, relating to compromises, or by any rule of law (e.g., *res judicata*), then the excess of the tax for such year as recomputed over the tax previously determined for such year shall be considered a deficiency for the purposes of section 270. The term *tax previously determined* shall have the same meaning as that assigned to such term by section 1314(a). See § 1.1314 (a)-1.

(e) *Assessment of tax.* Any amount determined as a deficiency in the manner described in paragraph (d) of this section in respect of any taxable year of the five consecutive taxable years specified in paragraph (a) of this section may be assessed and collected as if on the date of the expiration of the period of limitation for the assessment of a deficiency for the fifth taxable year of such five consecutive taxable years, one year remained before the expiration of the period of limitation upon assessment for the taxable year in respect of which the deficiency is determined. If the taxable year is one in respect of which an assessment could be

made without regard to section 270, the amount of the actual deficiency as defined in section 6211(a) (whether it is greater than, equal to, or less than the deficiency determined under section 270(c)) shall be assessed and collected. However, if the assessment of a deficiency for such taxable year would be prevented by any provision of law (e.g., the period of limitation upon the assessment of tax) except section 7122, or the corresponding provision of prior revenue laws, relating to compromises, or by the operation of any rule of law (e.g., *res judicata*), then the excess of the tax recomputed as described in paragraph (d) of this section over the tax previously determined may be assessed and collected even though in fact there is no actual deficiency, as defined in section 6211(a), in respect of the given taxable year.

(f) *Effective date; cross reference.* The provisions of section 270 and this section apply to taxable years beginning before January 1, 1970. Thus, for instance, if the taxpayer had a profit of \$2,000 attributable to a trade or business in 1965, section 270 and this section would not apply to the taxable years 1966 through 1970, even though he had losses of more than \$50,000 in each of the 5 years ending with 1970. For provisions relating to activities not engaged in for profit applicable to taxable years beginning after December 31, 1969, see section 183 and the regulations thereunder.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7198, 37 FR 13685, July 13, 1972]

§ 1.271-1 Debts owed by political parties.

(a) *General rule.* In the case of a taxpayer other than a bank (as defined in section 581 and the regulations thereunder), no deduction shall be allowed under section 166 (relating to bad debts) or section 165(g) (relating to worthlessness of securities) by reason of the worthlessness of any debt, regardless of how it arose, owed by a political party. For example, it is immaterial that the debt may have arisen as a result of services rendered or goods sold or that the taxpayer included the amount of the debt in income. In the case of a bank, no deduction shall be

allowed unless, under the facts and circumstances, it appears that the bad debt was incurred to or purchased by, or the worthless security was acquired by, the taxpayer in accordance with its usual commercial practices. Thus, if a bank makes a loan to a political party not in accordance with its usual commercial practices but solely because the president of the bank has been active in the party no bad debt deduction will be allowed with respect to the loan.

(b) *Definitions*—(1) *Political party*. For purposes of this section and § 1.276-1, the term *political party* means a political party (as commonly understood), a National, State, or local committee thereof, or any committee, association, or organization, whether incorporated or not, which accepts contributions (as defined in subparagraph (2) of this paragraph) or makes expenditures (as defined in subparagraph (3) of this paragraph) for the purpose of influencing or attempting to influence the election of presidential or vice-presidential electors, or the selection, nomination, or election of any individual to any Federal, State, or local elective public office, whether or not such individual or electors are selected, nominated, or elected. Accordingly, a political party includes a committee or other group which accepts contributions or makes expenditures for the purpose of promoting the nomination of an individual for an elective public office in a primary election, or in any convention, meeting, or caucus of a political party. It is immaterial whether the contributions or expenditures are accepted or made directly or indirectly. Thus, for example, a committee or other group, is considered to be a political party, if, although it does not expend any funds, it turns funds over to another organization, which does expend funds for the purpose of attempting to influence the nomination of an individual for an elective public office. An organization which engages in activities which are truly nonpartisan in nature will not be considered a political party merely because it conducts activities with respect to an election campaign if, under all the facts and circumstances, it is clear that its efforts are not directed to the election of the

candidates of any particular party or parties or to the selection, nomination or election of any particular candidate. For example, a committee or group will not be treated as a political party if it is organized merely to inform the electorate as to the identity and experience of all candidates involved, to present on a nonpreferential basis the issues or views of the parties or candidates as described by the parties or candidates, or to provide a forum in which the candidates are freely invited on a nonpreferential basis to discuss or debate the issues.

(2) *Contributions*. For purposes of this section and § 1.276-1, the term *contributions* includes a gift, subscription, loan, advance, or deposit, of money or anything of value, and includes a contract, promise, or agreement to make a contribution, whether or not legally enforceable.

(3) *Expenditures*. For purposes of this section and § 1.276-1, the term *expenditures* includes a payment, distribution, loan, advance, deposit, or gift, of money or anything of value, and includes a contract, promise, or agreement to make an expenditure, whether or not legally enforceable.

[T.D. 6996, 34 FR 832, Jan. 18, 1969]

§ 1.272-1 Expenditures relating to disposal of coal or domestic iron ore.

(a) *Introduction*. Section 272 provides special treatment for certain expenditures paid or incurred by a taxpayer in connection with a contract (hereafter sometimes referred to as a “coal royalty contract” or “iron ore royalty contract”) for the disposal of coal or iron ore the gain or loss from which is treated under section 631(c) as a section 1231 gain or loss on the sale of coal or iron ore. See paragraph (e) of § 1.631-3 for special rules relating to iron ore. The expenditures covered by section 272 are those which are attributable to the making and administering of such a contract or to the preservation of the economic interest retained under the contract. For examples of such expenditures, see paragraph (d) of this section. For a taxable year in which gross royalty income is realized under the contract of disposal, such expenditures

shall not be allowed as a deduction. Instead, they are to be added to the adjusted depletion basis of the coal or iron ore disposed of in the taxable year in computing gain or loss under section 631(c). However, where no gross royalty income is realized under the contract of disposal in a particular taxable year, such expenditure shall be treated without regard to section 272.

(b) *In general.* (1) Where the disposal of coal or iron ore is covered by section 631(c), the provisions of section 272 and this section shall be applicable for a taxable year in which there is income under the contract of disposal. (For purposes of section 272 and this section, the term *income* means gross amounts received or accrued which are royalties or bonuses in connection with a contract to which section 631(c) applies.) All expenditures paid or incurred by the taxpayer during the taxable year which are attributable to the making and administering of the contract disposing of the coal or iron ore and all expenditures paid or incurred during the taxable year in order to preserve the owner's economic interest retained under the contract shall be disallowed as deductions in computing taxable income for the taxable year. The sum of such expenditures and the adjusted depletion basis of the coal or iron ore disposed of in the taxable year shall be used in determining the amount of gain or loss with respect to the disposal. See § 1.631-3. For special rule in case of loss, see paragraph (c) of this section. Section 272 and this section do not apply to capital expenditures, and such expenditures are not taken into account in computing gain or loss under section 631(c) except to the extent they are properly part of the depletable basis of the coal or iron ore.

(2) The expenditures covered under section 272 and this section are disallowed as a deduction only with respect to a taxable year in which income is realized under the coal royalty contract (or iron ore royalty contract) to which such expenditures are attributable. Where no income is realized under the contract in a taxable year, these expenditures shall be deducted as expenses for the production of income, or as a business expense, or they may be treated under section 266 (relating

to taxes and carrying charges) if applicable.

(3) The provisions of section 272 and this section apply to a taxable year in which income from the disposal by the owner of coal or iron ore held by him for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) is subject to the provisions of section 631(c) even though the actual mining of coal or iron ore under the coal royalty contract (or iron ore royalty contract) does not take place during the taxable year. Where the right under the contract to mine coal or iron ore for which advance payment has been made expires, terminates, or is abandoned before the coal or iron ore is mined, and paragraph (c) of § 1.631-3 requires the owner to recompute his tax with respect to such payment, the recomputation must be made without applying the provisions of section 272 and this section.

(c) *Losses.* If, in any taxable year, the expenditures referred to in section 272 and this section plus the adjusted depletion basis (as defined in paragraph (b)(2) of § 1.631-3) of the coal or iron ore disposed of during the taxable year exceed the amount realized under the contract which is subject to section 631(c) during the taxable year, such excess shall be considered under section 1231 as a loss from the sale of property used in the trade or business and, to the extent not availed of as a reduction of gain under that section, shall be a loss deductible under section 165(a) (relating to the deduction of losses generally).

(d) *Examples of expenditures.* (1) The expenditures referred to in section 272 include, but are not limited to, the following items, if such items are attributable to the making or administering of the contract or preserving the economic interest therein: Ad valorem taxes imposed by State or local authorities, costs of fire protection, costs of insurance (other than liability insurance), costs incurred in administering the contract (including costs of bookkeeping and technical supervision), interest on loans, expenses of flood control, legal and technical expenses, and expenses of measuring and checking quantities of coal or iron ore disposed

of under the contract. Whether the interest on loans is attributable to the making or administering of the contract or preserving the economic interest therein will depend upon the use to which the borrowed monies are put.

(2) Any expenditure referred to in this section which is applicable to more than one coal royalty contract or iron ore royalty contract shall be reasonably apportioned to each of such contracts. Furthermore, if an expenditure applies only in part to the making or administering of the contract or the preservation of the economic interest, then only such part shall be treated under section 272. The apportionment of the expenditure shall be made on a reasonable basis. For example, where a taxpayer has other income (such as income from oil or gas royalties, rentals, right of way fees, interest, or dividends) as well as income under section 631(c), and where the salaries of some of its employees or other expenses relate to both classes of income, such expenses shall be allocated reasonably between the income subject to section 631(c) and the other income. Where a taxpayer has more than one coal royalty contract or iron ore royalty contract, expenditures under this section relating to a contract from which no income has been received in the taxable year may not be allocated to income from another contract from which income has been received in the taxable year.

(3) The taxpayer may have expenses which are not attributable even partly to making and administering a coal royalty contract or iron ore royalty contract or to the preservation of the economic interest retained under the contract and, accordingly, are not included in the expenditures described in section 272. These include such items as ad valorem taxes imposed by State or local authorities on property not covered by the contract, salaries, wages, or other expenses entirely incident to the ownership and protection of such property and depreciation of improvements thereon, fire insurance on such property, charitable contributions, and similar expenses unrelated to the making or to the administering of coal royalty contracts or iron ore royalty contracts or preserving the

taxpayer's economic interest retained therein.

(e) *Nonapplication of section.* For purposes of section 543, the provisions of section 272 shall have no application. For example, the taxpayer may, for the purposes of section 543(a)(3)(C) or the corresponding provisions of prior income tax laws, include in the sum of the deductions which are allowable under section 162 an amount paid to an attorney as compensation for legal services rendered in connection with the making of a coal royalty contract or iron ore royalty contract (assuming the expenditure otherwise qualifies under section 162 as an ordinary and necessary expense incurred in the taxpayer's trade or business), even though such expenditure is disallowed as a deduction under section 272.

[T.D. 6841, 30 FR 9304, July 27, 1965, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.273-1 Life or terminable interests.

(a) *In general.* Amounts paid as income to the holder of a life or a terminable interest acquired by gift, bequest, or inheritance shall not be subject to any deduction for shrinkage (whether called by depreciation or any other name) in the value of such interest due to the lapse of time. In other words, the holder of such an interest so acquired may not set up the value of the expected future payments as corpus or principal and claim deduction for shrinkage or exhaustion thereof due to the passage of time. For the treatment generally of distributions to beneficiaries of an estate or trust, see Subparts A, B, C, and D (section 641 and following), Subchapter J, Chapter 1 of the Code, and the regulations thereunder. For basis of property acquired from a decedent and by gifts and transfers in trust, see sections 1014, 1015, and 1022, and the regulations thereunder.

(b) *Effective/applicability date.* The provisions in this section are applicable for taxable years beginning on or after September 16, 1958. The provisions of this section relating to section 1022 are effective on and after January 19, 2017.

[T.D. 9811, 82 FR 6237, Jan. 19, 2017]

§ 1.274-1 Disallowance of certain entertainment, gift and travel expenses.

Section 274 disallows in whole, or in part, certain expenditures for entertainment, gifts and travel which would otherwise be allowable under Chapter 1 of the Code. The requirements imposed by section 274 are in addition to the requirements for deductibility imposed by other provisions of the Code. If a deduction is claimed for an expenditure for entertainment, gifts, or travel, the taxpayer must first establish that it is otherwise allowable as a deduction under Chapter 1 of the Code before the provisions of section 274 become applicable. An expenditure for entertainment, to the extent it is lavish or extravagant, shall not be allowable as a deduction. The taxpayer should then substantiate such an expenditure in accordance with the rules under section 274(d). See § 1.274-5. Section 274 is a disallowance provision exclusively, and does not make deductible any expense which is disallowed under any other provision of the Code. Similarly, section 274 does not affect the includability of an item in, or the excludability of an item from, the gross income of any taxpayer. For specific provisions with respect to the deductibility of expenditures: for an activity of a type generally considered to constitute entertainment, amusement, or recreation, and for a facility used in connection with such an activity, as well as certain travel expenses of a spouse, etc., see § 1.274-2; for expenses for gifts, see § 1.274-3; for expenses for foreign travel, see § 1.274-4; for expenditures deductible without regard to business activity, see § 1.274-6; and for treatment of personal portion of entertainment facility, see § 1.274-7.

[T.D. 6659, 28 FR 6499, June 25, 1963, as amended by T.D. 8666, 61 FR 27006, May 30, 1996]

§ 1.274-2 Disallowance of deductions for certain expenses for entertainment, amusement, recreation, or travel.

(a) *General rules*—(1) *Entertainment activity*. Except as provided in this section, no deduction otherwise allowable under Chapter 1 of the Code shall be allowed for any expenditure with respect

to entertainment unless the taxpayer establishes:

(i) That the expenditure was directly related to the active conduct of the taxpayer's trade or business, or

(ii) In the case of an expenditure directly preceding or following a substantial and bona fide business discussion (including business meetings at a convention or otherwise), that the expenditure was associated with the active conduct of the taxpayer's trade or business.

Such deduction shall not exceed the portion of the expenditure directly related to (or in the case of an expenditure described in subdivision (ii) of this subparagraph, the portion of the expenditure associated with) the active conduct of the taxpayer's trade or business.

(2) *Entertainment facilities*—(i) *Expenditures paid or incurred after December 31, 1978, and not with respect to a club*. Except as provided in this section with respect to a club, no deduction otherwise allowable under chapter 1 of the Code shall be allowed for any expenditure paid or incurred after December 31, 1978, with respect to a facility used in connection with entertainment.

(ii) *Expenditures paid or incurred before January 1, 1979, with respect to entertainment facilities, or paid or incurred before January 1, 1994, with respect to clubs*—(a) *Requirements for deduction*. Except as provided in this section, no deduction otherwise allowable under chapter 1 of the Internal Revenue Code shall be allowed for any expenditure paid or incurred before January 1, 1979, with respect to a facility used in connection with entertainment, or for any expenditure paid or incurred before January 1, 1994, with respect to a club used in connection with entertainment, unless the taxpayer establishes—

(1) That the facility or club was used primarily for the furtherance of the taxpayer's trade or business; and

(2) That the expenditure was directly related to the active conduct of that trade or business.

(b) *Amount of deduction*. The deduction allowable under paragraph (a)(2)(ii)(a) of this section shall not exceed the portion of the expenditure directly related to the active conduct of the taxpayer's trade or business.

(iii) *Expenditures paid or incurred after December 31, 1993, with respect to a club—*

(a) *In general.* No deduction otherwise allowable under chapter 1 of the Internal Revenue Code shall be allowed for amounts paid or incurred after December 31, 1993, for membership in any club organized for business, pleasure, recreation, or other social purpose. The purposes and activities of a club, and not its name, determine whether it is organized for business, pleasure, recreation, or other social purpose. Clubs organized for business, pleasure, recreation, or other social purpose include any membership organization if a principal purpose of the organization is to conduct entertainment activities for members of the organization or their guests or to provide members or their guests with access to entertainment facilities within the meaning of paragraph (e)(2) of this section. Clubs organized for business, pleasure, recreation, or other social purpose include, but are not limited to, country clubs, golf and athletic clubs, airline clubs, hotel clubs, and clubs operated to provide meals under circumstances generally considered to be conducive to business discussion.

(b) *Exceptions.* Unless a principal purpose of the organization is to conduct entertainment activities for members or their guests or to provide members or their guests with access to entertainment facilities, business leagues, trade associations, chambers of commerce, boards of trade, real estate boards, professional organizations (such as bar associations and medical associations), and civic or public service organizations will not be treated as clubs organized for business, pleasure, recreation, or other social purpose.

(3) *Cross references.* For definition of the term *entertainment*, see paragraph (b)(1) of this section. For the disallowance of deductions for the cost of admission to a dinner or program any part of the proceeds of which inures to the use of a political party or political candidate, and cost of admission to an inaugural event or similar event identified with any political party or political candidate, see § 1.276-1. For rules and definitions with respect to:

(i) “Directly related entertainment”, see paragraph (c) of this section,

(ii) “Associated entertainment”, see paragraph (d) of this section,

(iii) “Expenditures paid or incurred before January 1, 1979, with respect to entertainment facilities or before January 1, 1994, with respect to clubs”, see paragraph (e) of this section, and

(iv) “Specific exceptions” to the disallowance rules of this section, see paragraph (f) of this section.

(b) *Definitions—*(1) *Entertainment defined—*(i) *In general.* For purposes of this section, the term *entertainment* means any activity which is of a type generally considered to constitute entertainment, amusement, or recreation, such as entertaining at night clubs, cocktail lounges, theaters, country clubs, golf and athletic clubs, sporting events, and on hunting, fishing, vacation and similar trips, including such activity relating solely to the taxpayer or the taxpayer’s family. The term *entertainment* may include an activity, the cost of which is claimed as a business expense by the taxpayer, which satisfies the personal, living, or family needs of any individual, such as providing food and beverages, a hotel suite, or an automobile to a business customer or his family. The term *entertainment* does not include activities which, although satisfying personal, living, or family needs of an individual, are clearly not regarded as constituting entertainment, such as (a) supper money provided by an employer to his employee working overtime, (b) a hotel room maintained by an employer for lodging of his employees while in business travel status, or (c) an automobile used in the active conduct of trade or business even though used for routine personal purposes such as commuting to and from work. On the other hand, the providing of a hotel room or an automobile by an employer to his employee who is on vacation would constitute entertainment of the employee.

(ii) *Objective test.* An objective test shall be used to determine whether an activity is of a type generally considered to constitute entertainment. Thus, if an activity is generally considered to be entertainment, it will constitute entertainment for purposes of this section and section 274(a) regardless of whether the expenditure can

also be described otherwise, and even though the expenditure relates to the taxpayer alone. This objective test precludes arguments such as that *entertainment* means only entertainment of others or that an expenditure for entertainment should be characterized as an expenditure for advertising or public relations. However, in applying this test the taxpayer's trade or business shall be considered. Thus, although attending a theatrical performance would generally be considered entertainment, it would not be so considered in the case of a professional theater critic, attending in his professional capacity. Similarly, if a manufacturer of dresses conducts a fashion show to introduce his products to a group of store buyers, the show would not be generally considered to constitute entertainment. However, if an appliance distributor conducts a fashion show for the wives of his retailers, the fashion show would be generally considered to constitute entertainment.

(iii) *Special definitional rules*—(a) *In general*. Except as otherwise provided in (b) or (c) of this subdivision, any expenditure which might generally be considered either for a gift or entertainment, or considered either for travel or entertainment, shall be considered an expenditure for entertainment rather than for a gift or travel.

(b) *Expenditures deemed gifts*. An expenditure described in (a) of this subdivision shall be deemed for a gift to which this section does not apply if it is:

(1) An expenditure for packaged food or beverages transferred directly or indirectly to another person intended for consumption at a later time.

(2) An expenditure for tickets of admission to a place of entertainment transferred to another person if the taxpayer does not accompany the recipient to the entertainment unless the taxpayer treats the expenditure as entertainment. The taxpayer may change his treatment of such an expenditure as either a gift or entertainment at any time within the period prescribed for assessment of tax as provided in section 6501 of the Code and the regulations thereunder.

(3) Such other specific classes of expenditure generally considered to be

for a gift as the Commissioner, in his discretion, may prescribe.

(c) *Expenditures deemed travel*. An expenditure described in (a) of this subdivision shall be deemed for travel to which this section does not apply if it is:

(1) With respect to a transportation type facility (such as an automobile or an airplane), even though used on other occasions in connection with an activity of a type generally considered to constitute entertainment, to the extent the facility is used in pursuit of a trade or business for purposes of transportation not in connection with entertainment. See also paragraph (e)(3)(iii)(b) of this section for provisions covering nonentertainment expenditures with respect to such facilities.

(2) Such other specific classes of expenditure generally considered to be for travel as the Commissioner, in his discretion, may prescribe.

(2) *Other definitions*—(i) *Expenditure*. The term *expenditure* as used in this section shall include expenses paid or incurred for goods, services, facilities, and items (including items such as losses and depreciation).

(ii) *Expenses for production of income*. For purposes of this section, any reference to *trade or business* shall include any activity described in section 212.

(iii) *Business associate*. The term *business associate* as used in this section means a person with whom the taxpayer could reasonably expect to engage or deal in the active conduct of the taxpayer's trade or business such as the taxpayer's customer, client, supplier, employee, agent, partner, or professional adviser, whether established or prospective.

(c) *Directly related entertainment*—(1) *In general*. Except as otherwise provided in paragraph (d) of this section (relating to associated entertainment) or under paragraph (f) of this section (relating to business meals and other specific exceptions), no deduction shall be allowed for any expenditure for entertainment unless the taxpayer establishes that the expenditure was directly related to the active conduct of his trade or business within the meaning of this paragraph.

(2) *Directly related entertainment defined.* Any expenditure for entertainment, if it is otherwise allowable as a deduction under chapter 1 of the Code, shall be considered directly related to the active conduct of the taxpayer's trade or business if it meets the requirements of any one of subparagraphs (3), (4), (5), or (6) of this paragraph.

(3) *Directly related in general.* Except as provided in subparagraph (7) of this paragraph, an expenditure for entertainment shall be considered directly related to the active conduct of the taxpayer's trade or business if it is established that it meets all of the requirements of subdivisions (i), (ii), (iii) and (iv) of this subparagraph.

(i) At the time the taxpayer made the entertainment expenditure (or committed himself to make the expenditure), the taxpayer had more than a general expectation of deriving some income or other specific trade or business benefit (other than the goodwill of the person or persons entertained) at some indefinite future time from the making of the expenditure. A taxpayer, however, shall not be required to show that income or other business benefit actually resulted from each and every expenditure for which a deduction is claimed.

(ii) During the entertainment period to which the expenditure related, the taxpayer actively engaged in a business meeting, negotiation, discussion, or other bona fide business transaction, other than entertainment, for the purpose of obtaining such income or other specific trade or business benefit (or, at the time the taxpayer made the expenditure or committed himself to the expenditure, it was reasonable for the taxpayer to expect that he would have done so, although such was not the case solely for reasons beyond the taxpayer's control).

(iii) In light of all the facts and circumstances of the case, the principal character or aspect of the combined business and entertainment to which the expenditure related was the active conduct of the taxpayer's trade or business (or at the time the taxpayer made the expenditure or committed himself to the expenditure, it was reasonable for the taxpayer to expect that the ac-

tive conduct of trade or business would have been the principal character or aspect of the entertainment, although such was not the case solely for reasons beyond the taxpayer's control). It is not necessary that more time be devoted to business than to entertainment to meet this requirement. The active conduct of trade or business is considered not to be the principal character or aspect of combined business and entertainment activity on hunting or fishing trips or on yachts and other pleasure boats unless the taxpayer clearly establishes to the contrary.

(iv) The expenditure was allocable to the taxpayer and a person or persons with whom the taxpayer engaged in the active conduct of trade or business during the entertainment or with whom the taxpayer establishes he would have engaged in such active conduct of trade or business if it were not for circumstances beyond the taxpayer's control. For expenditures closely connected with directly related entertainment, see paragraph (d)(4) of this section.

(4) *Expenditures in clear business setting.* An expenditure for entertainment shall be considered directly related to the active conduct of the taxpayer's trade or business if it is established that the expenditure was for entertainment occurring in a clear business setting directly in furtherance of the taxpayer's trade or business. Generally, entertainment shall not be considered to have occurred in a clear business setting unless the taxpayer clearly establishes that any recipient of the entertainment would have reasonably known that the taxpayer had no significant motive, in incurring the expenditure, other than directly furthering his trade or business. Objective rather than subjective standards will be determinative. Thus, entertainment which occurred under any circumstances described in subparagraph (7)(ii) of this paragraph ordinarily will not be considered as occurring in a clear business setting. Such entertainment will generally be considered to be socially rather than commercially motivated. Expenditures made for the furtherance of a taxpayer's trade or business in providing a "hospitality room" at a convention (described in paragraph

(d)(3)(i)(b) of this section) at which goodwill is created through display or discussion of the taxpayer's products, will, however, be treated as directly related. In addition, entertainment of a clear business nature which occurred under circumstances where there was no meaningful personal or social relationship between the taxpayer and the recipients of the entertainment may be considered to have occurred in a clear business setting. For example, entertainment of business representatives and civic leaders at the opening of a new hotel or theatrical production, where the clear purpose of the taxpayer is to obtain business publicity rather than to create or maintain the goodwill of the recipients of the entertainment, would generally be considered to be in a clear business setting. Also, entertainment which has the principal effect of a price rebate in connection with the sale of the taxpayer's products generally will be considered to have occurred in a clear business setting. Such would be the case, for example, if a taxpayer owning a hotel were to provide occasional free dinners at the hotel for a customer who patronized the hotel.

(5) *Expenditures for services performed.* An expenditure shall be considered directly related to the active conduct of the taxpayer's trade or business if it is established that the expenditure was made directly or indirectly by the taxpayer for the benefit of an individual (other than an employee), and if such expenditure was in the nature of compensation for services rendered or was paid as a prize or award which is required to be included in gross income under section 74 and the regulations thereunder. For example, if a manufacturer of products provides a vacation trip for retailers of his products who exceed sales quotas as a prize or award which is includible in gross income, the expenditure will be considered directly related to the active conduct of the taxpayer's trade or business.

(6) *Club dues, etc., allocable to business meals.* An expenditure shall be considered directly related to the active conduct of the taxpayer's trade or business if it is established that the expenditure was with respect to a facility (as described in paragraph (e) of this section)

used by the taxpayer for the furnishing of food or beverages under circumstances described in paragraph (f)(2)(i) of this section (relating to business meals and similar expenditures), to the extent allocable to the furnishing of such food or beverages. This paragraph (c)(6) applies to club dues paid or incurred before January 1, 1987.

(7) *Expenditures generally considered not directly related.* Expenditures for entertainment, even if connected with the taxpayer's trade or business, will generally be considered not directly related to the active conduct of the taxpayer's trade or business, if the entertainment occurred under circumstances where there was little or no possibility of engaging in the active conduct of trade or business. The following circumstances will generally be considered circumstances where there was little or no possibility of engaging in the active conduct of a trade or business:

- (i) The taxpayer was not present;
- (ii) The distractions were substantial, such as:
 - (a) A meeting or discussion at night clubs, theaters, and sporting events, or during essentially social gatherings such as cocktail parties, or
 - (b) A meeting or discussion, if the taxpayer meets with a group which includes persons other than business associates, at places such as cocktail lounges, country clubs, golf and athletic clubs, or at vacation resorts.

An expenditure for entertainment in any such case is considered not to be directly related to the active conduct of the taxpayer's trade or business unless the taxpayer clearly establishes to the contrary.

(d) *Associated entertainment—(1) In general.* Except as provided in paragraph (f) of this section (relating to business meals and other specific exceptions) and subparagraph (4) of this paragraph (relating to expenditures closely connected with directly related entertainment), any expenditure for entertainment which is not directly related to the active conduct of the taxpayer's trade or business will not be allowable as a deduction unless:

- (i) It was associated with the active conduct of trade or business as defined

in subparagraph (2) of this paragraph, and

(ii) The entertainment directly preceded or followed a substantial and bona fide business discussion as defined in subparagraph (3) of this paragraph.

(2) *Associated entertainment defined.* Generally, any expenditure for entertainment, if it is otherwise allowable under Chapter 1 of the Code, shall be considered associated with the active conduct of the taxpayer's trade or business if the taxpayer establishes that he had a clear business purpose in making the expenditure, such as to obtain new business or to encourage the continuation of an existing business relationship. However, any portion of an expenditure allocable to a person who was not closely connected with a person who engaged in the substantial and bona fide business discussion (as defined in subparagraph (3)(i) of this paragraph) shall not be considered associated with the active conduct of the taxpayer's trade or business. The portion of an expenditure allocable to the spouse of a person who engaged in the discussion will, if it is otherwise allowable under chapter 1 of the Code, be considered associated with the active conduct of the taxpayer's trade or business.

(3) *Directly preceding or following a substantial and bona fide business discussion defined—*(i) *Substantial and bona fide business discussion—*(a) *In general.* Whether any meeting, negotiation or discussion constitutes a "substantial and bona fide business discussion" within the meaning of this section depends upon the facts and circumstances of each case. It must be established, however, that the taxpayer actively engaged in a business meeting, negotiation, discussion, or other bona fide business transaction, other than entertainment, for the purpose of obtaining income or other specific trade or business benefit. In addition, it must be established that such a business meeting, negotiation, discussion, or transaction was substantial in relation to the entertainment. This requirement will be satisfied if the principal character or aspect of the combined entertainment and business activity was the active conduct of business. However, it is not necessary that more time be devoted to

business than to entertainment to meet this requirement.

(b) *Meetings at conventions, etc.* Any meeting officially scheduled in connection with a program at a convention or similar general assembly, or at a bona fide trade or business meeting sponsored and conducted by business or professional organizations, shall be considered to constitute a substantial and bona fide business discussion within the meaning of this section provided:

(1) *Expenses necessary to taxpayer's attendance.* The expenses necessary to the attendance of the taxpayer at the convention, general assembly, or trade or business meeting, were ordinary and necessary within the meaning of section 162 or 212;

(2) *Convention program.* The organization which sponsored the convention, or trade or business meeting had scheduled a program of business activities (including committee meetings or presentation of lectures, panel discussions, display of products, or other similar activities), and that such program was the principal activity of the convention, general assembly, or trade or business meeting.

(ii) *Directly preceding or following.* Entertainment which occurs on the same day as a substantial and bona fide business discussion (as defined in subdivision (i) of this subparagraph) will be considered to directly precede or follow such discussion. If the entertainment and the business discussion do not occur on the same day, the facts and circumstances of each case are to be considered, including the place, date and duration of the business discussion, whether the taxpayer or his business associates are from out of town, and, if so, the date of arrival and departure, and the reasons the entertainment did not take place on the day of the business discussion. For example, if a group of business associates comes from out of town to the taxpayer's place of business to hold a substantial business discussion, the entertainment of such business guests and their wives on the evening prior to, or on the evening of the day following, the business discussion would generally be regarded as directly preceding or following such discussion.

(4) *Expenses closely connected with directly related entertainment.* If any portion of an expenditure meets the requirements of paragraph (c)(3) of this section (relating to directly related entertainment in general), the remaining portion of the expenditure, if it is otherwise allowable under Chapter 1 of the Code, shall be considered associated with the active conduct of the taxpayer's trade or business to the extent allocable to a person or persons closely connected with a person referred to in paragraph (c)(3)(iv) of this section. The spouse of a person referred to in paragraph (c)(3)(iv) of this section will be considered closely connected to such a person for purposes of this subparagraph. Thus, if a taxpayer and his wife entertain a business customer and the customer's wife under circumstances where the entertainment of the customer is considered directly related to the active conduct of the taxpayer's trade or business (within the meaning of paragraph (c)(3) of this section) the portion of the expenditure allocable to both wives will be considered associated with the active conduct of the taxpayer's trade or business under this subparagraph.

(e) *Expenditures paid or incurred before January 1, 1979, with respect to entertainment facilities or before January 1, 1994, with respect to clubs—(1) In general.* Any expenditure paid or incurred before January 1, 1979, with respect to a facility, or paid or incurred before January 1, 1994, with respect to a club, used in connection with entertainment shall not be allowed as a deduction except to the extent it meets the requirements of paragraph (a)(2)(ii) of this section.

(2) *Facilities used in connection with entertainment—(i) In general.* Any item of personal or real property owned, rented, or used by a taxpayer shall (unless otherwise provided under the rules of subdivision (ii) of this subparagraph) be considered to constitute a facility used in connection with entertainment if it is used during the taxable year for, or in connection with, entertainment (as defined in paragraph (b)(1) of this section). Examples of facilities which might be used for, or in connection with, entertainment include yachts, hunting lodges, fishing camps, swimming pools, tennis courts, bowling

alleys, automobiles, airplanes, apartments, hotel suites, and homes in vacation resorts.

(ii) *Facilities used incidentally for entertainment.* A facility used only incidentally during a taxable year in connection with entertainment, if such use is insubstantial, will not be considered a "facility used in connection with entertainment" for purposes of this section or for purposes of the record-keeping requirements of section 274(d). See § 1.274-5(c)(6)(iii).

(3) *Expenditures with respect to a facility used in connection with entertainment—(i) In general.* The phrase *expenditures with respect to a facility used in connection with entertainment* includes depreciation and operating costs, such as rent and utility charges (for example, water or electricity), expenses for the maintenance, preservation or protection of a facility (for example, repairs, painting, insurance charges), and salaries or expenses for subsistence paid to caretakers or watchmen. In addition, the phrase includes losses realized on the sale or other disposition of a facility.

(ii) *Club dues—(a) Club dues paid or incurred before January 1, 1994.* Dues or fees paid before January 1, 1994, to any social, athletic, or sporting club or organization are considered expenditures with respect to a facility used in connection with entertainment. The purposes and activities of a club or organization, and not its name, determine its character. Generally, the phrase *social, athletic, or sporting club or organization* has the same meaning for purposes of this section as that phrase had in section 4241 and the regulations thereunder, relating to the excise tax on club dues, prior to the repeal of section 4241 by section 301 of Public Law 89-44. However, for purposes of this section only, clubs operated solely to provide lunches under circumstances of a type generally considered to be conducive to business discussion, within the meaning of paragraph (f)(2)(i) of this section, will not be considered social clubs.

(b) *Club dues paid or incurred after December 31, 1993.* See paragraph (a)(2)(iii) of this section with reference to the disallowance of deductions for club dues paid or incurred after December 31, 1993.

(iii) *Expenditures not with respect to a facility.* The following expenditures shall not be considered to constitute expenditures with respect to a facility used in connection with entertainment:

(a) *Out of pocket expenditures.* Expenses (exclusive of operating costs and other expenses referred to in subdivision (i) of this subparagraph) incurred at the time of an entertainment activity, even though in connection with the use of facility for entertainment purposes, such as expenses for food and beverages, or expenses for catering, or expenses for gasoline and fishing bait consumed on a fishing trip;

(b) *Non-entertainment expenditures.* Expenses or items attributable to the use of a facility for other than entertainment purposes such as expenses for an automobile when not used for entertainment; and

(c) *Expenditures otherwise deductible.* Expenses allowable as a deduction without regard to their connection with a taxpayer's trade or business such as taxes, interest, and casualty losses. The provisions of this subdivision shall be applied in the case of a taxpayer which is not an individual as if it were an individual. See also § 1.274-6.

(iv) *Cross reference.* For other rules with respect to treatment of certain expenditures for entertainment-type facilities, see § 1.274-7.

(4) *Determination of primary use*—(i) *In general.* A facility used in connection with entertainment shall be considered as used primarily for the furtherance of the taxpayer's trade or business only if it is established that the primary use of the facility during the taxable year was for purposes considered ordinary and necessary within the meaning of sections 162 and 212 and the regulations thereunder. All of the facts and circumstances of each case shall be considered in determining the primary use of a facility. Generally, it is the actual use of the facility which establishes the deductibility of expenditures with respect to the facility; not its availability for use and not the taxpayer's principal purpose in acquiring the facility. Objective rather than subjective standards will be determinative. If membership entitles the member's entire family to use of a facility, such as

a country club, their use will be considered in determining whether business use of the facility exceeds personal use. The factors to be considered include the nature of each use, the frequency and duration of use for business purposes as compared with other purposes, and the amount of expenditures incurred during use for business compared with amount of expenditures incurred during use for other purposes. No single standard of comparison, or quantitative measurement, as to the significance of any such factor, however, is necessarily appropriate for all classes or types of facilities. For example, an appropriate standard for determining the primary use of a country club during a taxable year will not necessarily be appropriate for determining the primary use of an airplane. However, a taxpayer shall be deemed to have established that a facility was used primarily for the furtherance of his trade or business if he establishes such primary use in accordance with subdivision (ii) or (iii) of this subparagraph. Subdivisions (ii) and (iii) of this subparagraph shall not preclude a taxpayer from otherwise establishing the primary use of a facility under the general provisions of this subdivision.

(ii) *Certain transportation facilities.* A taxpayer shall be deemed to have established that a facility of a type described in this subdivision was used primarily for the furtherance of his trade or business if:

(a) *Automobiles.* In the case of an automobile, the taxpayer establishes that more than 50 percent of mileage driven during the taxable year was in connection with travel considered to be ordinary and necessary within the meaning of section 162 or 212 and the regulations thereunder.

(b) *Airplanes.* In the case of an airplane, the taxpayer establishes that more than 50 percent of hours flown during the taxable year was in connection with travel considered to be ordinary and necessary within the meaning of section 162 or 212 and the regulations thereunder.

(iii) *Entertainment facilities in general.* A taxpayer shall be deemed to have established that:

(a) A facility used in connection with entertainment, such as a yacht or

other pleasure boat, hunting lodge, fishing camp, summer home or vacation cottage, hotel suite, country club, golf club or similar social, athletic, or sporting club or organization, bowling alley, tennis court, or swimming pool, or,

(b) A facility for employees not falling within the scope of section 274(e) (2) or (5) was used primarily for the furtherance of his trade or business if he establishes that more than 50 percent of the total calendar days of use of the facility by, or under authority of, the taxpayer during the taxable year were days of business use. Any use of a facility (of a type described in this subdivision) during one calendar day shall be considered to constitute a “day of business use” if the primary use of the facility on such day was ordinary and necessary within the meaning of section 162 or 212 and the regulations thereunder. For the purposes of this subdivision, a facility shall be deemed to have been primarily used for such purposes on any one calendar day if the facility was used for the conduct of a substantial and bona fide business discussion (as defined in paragraph (d)(3)(i) of this section) notwithstanding that the facility may also have been used on the same day for personal or family use by the taxpayer or any member of the taxpayer’s family not involving entertainment of others by, or under the authority of, the taxpayer.

(f) *Specific exceptions to application of this section*—(1) *In general.* The provisions of paragraphs (a) through (e) of this section (imposing limitations on deductions for entertainment expenses) are not applicable in the case of expenditures set forth in subparagraph (2) of this paragraph. Such expenditures are deductible to the extent allowable under chapter 1 of the Code. This paragraph shall not be construed to affect the allowability or nonallowability of a deduction under section 162 or 212 and the regulations thereunder. The fact that an expenditure is not covered by a specific exception provided for in this paragraph shall not be determinative of the allowability or nonallowability of the expenditure under paragraphs (a) through (e) of this section. Expenditures described in subparagraph (2) of

this paragraph are subject to the substantiation requirements of section 274(d) to the extent provided in § 1.274-5.

(2) *Exceptions.* The expenditures referred to in subparagraph (1) of this paragraph are set forth in subdivisions (i) through (ix) of this subparagraph.

(i) *Business meals and similar expenditures paid or incurred before January 1, 1987*—(a) *In general.* Any expenditure for food or beverages furnished to an individual under circumstances of a type generally considered conducive to business discussion (taking into account the surroundings in which furnished, the taxpayer’s trade, business, or income-producing activity, and the relationship to such trade, business or activity of the persons to whom the food or beverages are furnished) is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section. There is no requirement that business actually be discussed for this exception to apply.

(b) *Surroundings.* The surroundings in which the food or beverages are furnished must be such as would provide an atmosphere where there are no substantial distractions to discussion. This exception applies primarily to expenditures for meals and beverages served during the course of a breakfast, lunch or dinner meeting of the taxpayer and his business associates at a restaurant, hotel dining room, eating club or similar place not involving distracting influences such as a floor show. This exception also applies to expenditures for beverages served apart from meals if the expenditure is incurred in surroundings similarly conducive to business discussion, such as an expenditure for beverages served during the meeting of the taxpayer and his business associates at a cocktail lounge or hotel bar not involving distracting influences such as a floor show. This exception may also apply to expenditures for meals or beverages served in the taxpayer’s residence on a clear showing that the expenditure was commercially rather than socially motivated. However, this exception, generally, is not applicable to any expenditure for meals or beverages furnished in circumstances where there are

major distractions not conducive to business discussion, such as at night clubs, sporting events, large cocktail parties, sizeable social gatherings, or other major distracting influences.

(c) *Taxpayer's trade or business and relationship of persons entertained.* The taxpayer's trade, business, or income-producing activity and the relationship of the persons to whom the food or beverages are served to such trade, business or activity must be such as will reasonably indicate that the food or beverages were furnished for the primary purpose of furthering the taxpayer's trade or business and did not primarily serve a social or personal purpose. Such a business purpose would be indicated, for example, if a salesman employed by a manufacturing supply company meets for lunch during a normal business day with a purchasing agent for a manufacturer which is a prospective customer. Such a purpose would also be indicated if a life insurance agent meets for lunch during a normal business day with a client.

(d) *Business programs.* Expenditures for business luncheons or dinners which are part of a business program, or banquets officially sponsored by business or professional associations, will be regarded as expenditures to which the exception of this subdivision (i) applies. In the case of such a business luncheon or dinner it is not always necessary that the taxpayer attend the luncheon or dinner himself. For example, if a dental equipment supplier purchased a table at a dental association banquet for dentists who are actual or prospective customers for his equipment, the cost of the table would not be disallowed under this section. See also paragraph (c)(4) of this section relating to expenditures made in a clear business setting.

(ii) *Food and beverages for employees.* Any expenditure by a taxpayer for food and beverages (or for use of a facility in connection therewith) furnished on the taxpayer's business premises primarily for his employees is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section. This exception applies not only to expenditures for food or beverages furnished in a typical company cafeteria or an execu-

utive dining room, but also to expenditures with respect to the operation of such facilities. This exception applies even though guests are occasionally served in the cafeteria or dining room.

(iii) *Certain entertainment and travel expenses treated as compensation—*(A) *In general.* Any expenditure by a taxpayer for entertainment (or for use of a facility in connection therewith) or for travel described in section 274(m)(3), if an employee is the recipient of the entertainment or travel, is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section to the extent that the expenditure is treated by the taxpayer—

(1) On the taxpayer's income tax return as originally filed, as compensation paid to the employee; and

(2) As wages to the employee for purposes of withholding under chapter 24 (relating to collection of income tax at source on wages).

(B) *Expenses includible in income of persons who are not employees.* Any expenditure by a taxpayer for entertainment (or for use of a facility in connection therewith), or for travel described in section 274(m)(3), is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section to the extent the expenditure is includible in gross income as compensation for services rendered, or as a prize or award under section 74, by a recipient of the expenditure who is not an employee of the taxpayer. The preceding sentence shall not apply to any amount paid or incurred by the taxpayer if such amount is required to be included (or would be so required except that the amount is less than \$600) in any information return filed by such taxpayer under part III of subchapter A of chapter 61 and is not so included. See section 274(e)(9).

(C) *Example.* The following example illustrates the provisions this paragraph (f):

Example. If an employer rewards the employee (and the employee's spouse) with an expense paid vacation trip, the expense is deductible by the employer (if otherwise allowable under section 162 and the regulations thereunder) to the extent the employer treats the expenses as compensation and as wages. On the other hand, if a taxpayer owns

a yacht which the taxpayer uses for the entertainment of business customers, the portion of salary paid to employee members of the crew which is allocable to use of the yacht for entertainment purposes (even though treated on the taxpayer's tax return as compensation and treated as wages for withholding tax purposes) would not come within this exception since the members of the crew were not recipients of the entertainment. If an expenditure of a type described in this subdivision properly constitutes a dividend paid to a shareholder or if it constitutes unreasonable compensation paid to an employee, nothing in this exception prevents disallowance of the expenditure to the taxpayer under other provisions of the Internal Revenue Code.

(iv) *Reimbursed entertainment, food, or beverage expenses*—(A) *Introduction*. In the case of any expenditure for entertainment, amusement, recreation, food, or beverages made by one person in performing services for another person (whether or not the other person is an employer) under a reimbursement or other expense allowance arrangement, the limitations on deductions in paragraphs (a) through (e) of this section and section 274(n)(1) apply either to the person who makes the expenditure or to the person who actually bears the expense, but not to both. If an expenditure of a type described in this paragraph (f)(2)(iv) properly constitutes a dividend paid to a shareholder, unreasonable compensation paid to an employee, a personal expense, or other nondeductible expense, nothing in this exception prevents disallowance of the expenditure to the taxpayer under other provisions of the Code.

(B) *Reimbursement arrangements involving employees*. In the case of an employee's expenditure for entertainment, amusement, recreation, food, or beverages in performing services as an employee under a reimbursement or other expense allowance arrangement with a payor (the employer, its agent, or a third party), the limitations on deductions in paragraphs (a) through (e) of this section and section 274(n)(1) apply—

(1) To the employee to the extent the employer treats the reimbursement or other payment of the expense on the employer's income tax return as originally filed as compensation paid to the employee and as wages to the employee

for purposes of withholding under chapter 24 (relating to collection of income tax at source on wages); or

(2) To the payor to the extent the reimbursement or other payment of the expense is not treated as compensation and wages paid to the employee in the manner provided in paragraph (f)(2)(iv)(B)(1) of this section (however, see paragraph (f)(2)(iv)(C) of this section if the payor receives a payment from a third party that may be treated as a reimbursement arrangement under that paragraph).

(C) *Reimbursement arrangements involving persons that are not employees*. In the case of an expense for entertainment, amusement, recreation, food, or beverages of a person who is not an employee (referred to as an independent contractor) in performing services for another person (a client or customer) under a reimbursement or other expense allowance arrangement with the person, the limitations on deductions in paragraphs (a) through (e) of this section and section 274(n)(1) apply to the party expressly identified in an agreement between the parties as subject to the limitations. If an agreement between the parties does not expressly identify the party subject to the limitations, the limitations apply—

(1) To the independent contractor (which may be a payor described in paragraph (f)(2)(iv)(B) of this section) to the extent the independent contractor does not account to the client or customer within the meaning of section 274(d) and the associated regulations; or

(2) To the client or customer if the independent contractor accounts to the client or customer within the meaning of section 274(d) and the associated regulations. See also § 1.274-5.

(D) *Reimbursement or other expense allowance arrangement*. The term *reimbursement or other expense allowance arrangement* means—

(1) For purposes of paragraph (f)(2)(iv)(B) of this section, an arrangement under which an employee receives an advance, allowance, or reimbursement from a payor (the employer, its agent, or a third party) for expenses the employee pays or incurs; and

(2) For purposes of paragraph (f)(2)(iv)(C) of this section, an arrangement under which an independent contractor receives an advance, allowance, or reimbursement from a client or customer for expenses the independent contractor pays or incurs if either—

(a) A written agreement between the parties expressly states that the client or customer will reimburse the independent contractor for expenses that are subject to the limitations on deductions in paragraphs (a) through (e) of this section and section 274(n)(1); or

(b) A written agreement between the parties expressly identifies the party subject to the limitations.

(E) *Examples.* The following examples illustrate the application of this paragraph (f)(2)(iv).

Example 1. (i) Y, an employee, performs services under an arrangement in which L, an employee leasing company, pays Y a per diem allowance of \$10x for each day that Y performs services for L's client, C, while traveling away from home. The per diem allowance is a reimbursement of travel expenses for food and beverages that Y pays in performing services as an employee. L enters into a written agreement with C under which C agrees to reimburse L for any substantiated reimbursements for travel expenses, including meals, that L pays to Y. The agreement does not expressly identify the party that is subject to the deduction limitations. Y performs services for C while traveling away from home for 10 days and provides L with substantiation that satisfies the requirements of section 274(d) of \$100x of meal expenses incurred by Y while traveling away from home. L pays Y \$100x to reimburse those expenses pursuant to their arrangement. L delivers a copy of Y's substantiation to C. C pays L \$300x, which includes \$200x compensation for services and \$100x as reimbursement of L's payment of Y's travel expenses for meals. Neither L nor C treats the \$100x paid to Y as compensation or wages.

(ii) Under paragraph (f)(2)(iv)(D)(1) of this section, Y and L have established a reimbursement or other expense allowance arrangement for purposes of paragraph (f)(2)(iv)(B) of this section. Because the reimbursement payment is not treated as compensation and wages paid to Y, under section 274(e)(3)(A) and paragraph (f)(2)(iv)(B)(1) of this section, Y is not subject to the section 274 deduction limitations. Instead, under paragraph (f)(2)(iv)(B)(2) of this section, L, the payor, is subject to the section 274 deduction limitations unless L can meet the requirements of section 274(e)(3)(B) and paragraph (f)(2)(iv)(C) of this section.

(iii) Because the agreement between L and C expressly states that C will reimburse L for substantiated reimbursements for travel expenses that L pays to Y, under paragraph (f)(2)(iv)(D)(2)(a) of this section, L and C have established a reimbursement or other expense allowance arrangement for purposes of paragraph (f)(2)(iv)(C) of this section. L accounts to C for C's reimbursement in the manner required by section 274(d) by delivering to C a copy of the substantiation L received from Y. Therefore, under section 274(e)(3)(B) and paragraph (f)(2)(iv)(C)(2) of this section, C and not L is subject to the section 274 deduction limitations.

Example 2. (i) The facts are the same as in *Example 1* except that, under the arrangements between Y and L and between L and C, Y provides the substantiation of the expenses directly to C, and C pays the per diem directly to Y.

(ii) Under paragraph (f)(2)(iv)(D)(1) of this section, Y and C have established a reimbursement or other expense allowance arrangement for purposes of paragraph (f)(2)(iv)(C) of this section. Because Y substantiates directly to C and the reimbursement payment was not treated as compensation and wages paid to Y, under section 274(e)(3)(A) and paragraph (f)(2)(iv)(C)(1) of this section Y is not subject to the section 274 deduction limitations. Under paragraph (f)(2)(iv)(C)(2) of this section, C, the payor, is subject to the section 274 deduction limitations.

Example 3. (i) The facts are the same as in *Example 1*, except that the written agreement between L and C expressly provides that the limitations of this section will apply to C.

(ii) Under paragraph (f)(2)(iv)(D)(2)(b) of this section, L and C have established a reimbursement or other expense allowance arrangement for purposes of paragraph (f)(2)(iv)(C) of this section. Because the agreement provides that the 274 deduction limitations apply to C, under section 274(e)(3)(B) and paragraph (f)(2)(iv)(C) of this section, C and not L is subject to the section 274 deduction limitations.

Example 4. (i) The facts are the same as in *Example 1*, except that the agreement between L and C does not provide that C will reimburse L for travel expenses.

(ii) The arrangement between L and C is not a reimbursement or other expense allowance arrangement within the meaning of section 274(e)(3)(B) and paragraph (f)(2)(iv)(D)(2) of this section. Therefore, even though L accounts to C for the expenses, L is subject to the section 274 deduction limitations.

(F) *Effective/applicability date.* This paragraph (f)(2)(iv) applies to expenses paid or incurred in taxable years beginning after August 1, 2013.

(v) *Recreational expenses for employees generally.* Any expenditure by a taxpayer for a recreational, social, or similar activity (or for use of a facility in connection therewith), primarily for the benefit of his employees generally, is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section. This exception applies only to expenditures made primarily for the benefit of employees of the taxpayer other than employees who are officers, shareholders on other owners who own a 10-percent or greater interest in the business, or other highly compensated employees. For purposes of the preceding sentence, an employee shall be treated as owning any interest owned by a member of his family (within the meaning of section 267(c)(4) and the regulations thereunder). Ordinarily, this exception applies to usual employee benefit programs such as expenses of a taxpayer (a) in holding Christmas parties, annual picnics, or summer outings, for his employees generally, or (b) of maintaining a swimming pool, baseball diamond, bowling alley, or golf course available to his employees generally. Any expenditure for an activity which is made under circumstances which discriminate in favor of employees who are officers, shareholders or other owners, or highly compensated employees shall not be considered made primarily for the benefit of employees generally. On the other hand, an expenditure for an activity will not be considered outside of this exception merely because, due to the large number of employees involved, the activity is intended to benefit only a limited number of such employees at one time, provided the activity does not discriminate in favor of officers, shareholders, other owners, or highly compensated employees.

(vi) *Employee, stockholder, etc., business meetings.* Any expenditure by a taxpayer for entertainment which is directly related to bona fide business meetings of the taxpayer's employees, stockholders, agents, or directors held principally for discussion of trade or business is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e)

of this section. For purposes of this exception, a partnership is to be considered a taxpayer and a member of a partnership is to be considered an agent. For example, an expenditure by a taxpayer to furnish refreshments to his employees at a bona fide meeting, sponsored by the taxpayer for the principal purpose of instructing them with respect to a new procedure for conducting his business, would be within the provisions of this exception. A similar expenditure made at a bona fide meeting of stockholders of the taxpayer for the election of directors and discussion of corporate affairs would also be within the provisions of this exception. While this exception will apply to bona fide business meetings even though some social activities are provided, it will not apply to meetings which are primarily for social or non-business purposes rather than for the transaction of the taxpayer's business. A meeting under circumstances where there was little or no possibility of engaging in the active conduct of trade or business (as described in paragraph (c)(7) of this section) generally will not be considered a business meeting for purposes of this subdivision. This exception will not apply to a meeting or convention of employees or agents, or similar meeting for directors, partners or others for the principal purpose of rewarding them for their services to the taxpayer. However, such a meeting or convention of employees might come within the scope of subdivisions (iii) or (v) of this subparagraph.

(vii) *Meetings of business leagues, etc.* Any expenditure for entertainment directly related and necessary to attendance at bona fide business meetings or conventions of organizations exempt from taxation under section 501(c)(6) of the Code, such as business leagues, chambers of commerce, real estate boards, boards of trade, and certain professional associations, is not subject to the limitations on allowability of deductions provided in paragraphs (a) through (e) of this section.

(viii) *Items available to the public.* Any expenditure by a taxpayer for entertainment (or for a facility in connection therewith) to the extent the entertainment is made available to the general public is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section. Expenditures for entertainment of the general public by means of television, radio, newspapers and the like, will come within this exception, as will expenditures for distributing samples to the general public. Similarly, expenditures for maintaining private parks, golf courses and similar facilities, to the extent that they are available for public use, will come within this exception. For example, if a corporation maintains a swimming pool which it makes available for a period of time each week to children participating in a local public recreational program, the portion of the expense relating to such public use of the pool will come within this exception.

(ix) *Entertainment sold to customers.* Any expenditure by a taxpayer for entertainment (or for use of a facility in connection therewith) to the extent the entertainment is sold to customers in a bona fide transaction for an adequate and full consideration in money or money's worth is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section. Thus, the cost of producing night club entertainment (such as salaries paid to employees of night clubs and amounts paid to performers) for sale to customers or the cost of operating a pleasure cruise ship as a business will come within this exception.

(g) *Additional provisions of section 274—travel of spouse, dependent or others.* Section 274(m)(3) provides that no deduction shall be allowed under this chapter (except section 217) for travel expenses paid or incurred with respect to a spouse, dependent, or other individual accompanying the taxpayer (or an officer or employee of the taxpayer) on business travel, unless certain conditions are met. As provided in section 274(m)(3), the term *other individual* does not include a business associate (as defined in paragraph (b)(2)(iii) of this sec-

tion) who otherwise meets the requirements of sections 274(m)(3)(B) and (C).

[T.D. 6659, 28 FR 6499, June 25, 1963, as amended by T.D. 6996, 34 FR 835, Jan. 18, 1969; T.D. 8051, 50 FR 36576, Sept. 9, 1985; T.D. 8601, 60 FR 36994, July 19, 1995; T.D. 8666, 61 FR 27006, May 30, 1996; T.D. 9625, 78 FR 46503, Aug. 1, 2013]

§ 1.274-3 Disallowance of deduction for gifts.

(a) *In general.* No deduction shall be allowed under section 162 or 212 for any expense for a gift made directly or indirectly by a taxpayer to any individual to the extent that such expense, when added to prior expenses of the taxpayer for gifts made to such individual during the taxpayer's taxable year, exceeds \$25.

(b) *Gift defined*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph the term *gift*, for purposes of this section, means any item excludable from the gross income of the recipient under section 102 which is not excludable from his gross income under any other provision of chapter 1 of the Code. Thus, a payment by an employer to a deceased employee's widow is not a gift, for purposes of this section, to the extent the payment constitutes an employee's death benefit excludable by the recipient under section 101(b). Similarly, a scholarship which is excludable from a recipient's gross income under section 117, and a prize or award which is excludable from a recipient's gross income under section 74(b), are not subject to the provisions of this section.

(2) *Items not treated as gifts.* The term *gift*, for purposes of this section, does not include the following:

(i) An item having a cost to the taxpayer not in excess of \$4.00 on which the name of the taxpayer is clearly and permanently imprinted and which is one of a number of identical items distributed generally by such a taxpayer.

(ii) A sign, display rack, or other promotional material to be used on the business premises of the recipient, or

(iii) In the case of a taxable year of a taxpayer ending on or after August 13, 1981, an item of tangible personal property which is awarded before January 1, 1987, to an employee of the taxpayer by reason of the employee's length of

service (including an award upon retirement), productivity, or safety achievement, but only to the extent that—

(A) The cost of the item to the taxpayer does not exceed \$400; or

(B) The item is a qualified plan award (as defined in paragraph (d) of this section); or

(iv) In the case of a taxable year of a taxpayer ending before August 13, 1981, an item of tangible personal property having a cost to the taxpayer not in excess of \$100 which is awarded to an employee of the taxpayer by reason of the employee's length of service (including an award upon retirement) or safety achievement.

For purposes of paragraphs (b)(2) (iii) and (iv) of this section, the term *tangible personal property* does not include cash or any gift certificate other than a nonnegotiable gift certificate conferring only the right to receive tangible personal property. Thus, for example, if a nonnegotiable gift certificate entitles an employee to choose between selecting an item of merchandise or receiving cash or reducing the balance due on his account with the issuer of the gift certificate, the gift certificate is not tangible personal property for purposes of this section. To the extent that an item is not treated as a gift for purposes of this section, the deductibility of the expense of the item is not governed by this section, and the taxpayer need not take such item into account in determining whether the \$25 limitation on gifts to any individual has been exceeded. For example, if an employee receives by reason of his length of service a gift of an item of tangible personal property that costs the employer \$450, the deductibility of only \$50 (\$450 minus \$400) is governed by this section, and the employer takes the \$50 into account for purposes of the \$25 limitation on gifts to that employee. The fact that an item is wholly or partially excepted from the applicability of this section has no effect in determining whether the value of the item is includible in the gross income of the recipient. For rules relating to the taxability to the recipient of any item described in this subparagraph, see sections 61, 74, and 102 and the regulations thereunder. For rules relating to the deduct-

ibility of employee achievement awards awarded after December 31, 1986, see section 274 (j).

(c) *Expense for a gift.* For purposes of this section, the term *expense for a gift* means the cost of the gift to the taxpayer, other than incidental costs such as for customary engraving on jewelry, or for packaging, insurance, and mailing or other delivery. A related cost will be considered "incidental" only if it does not add substantial value to the gift. Although the cost of customary gift wrapping will be considered an incidental cost, the purchase of an ornamental basket for packaging fruit will not be considered an incidental cost of packaging if the basket has a value which is substantial in relation to the value of the fruit.

(d) *Qualified plan award*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph the term *qualified plan award*, for purposes of this section, means an item of tangible personal property that is awarded to an employee by reason of the employee's length of service (including retirement), productivity, or safety achievement, and that is awarded pursuant to a permanent, written award plan or program of the taxpayer that does not discriminate as to eligibility or benefits in favor of employees who are officers, shareholders, or highly compensated employees. The "permanency" of an award plan shall be determined from all the facts and circumstances of the particular case, including the taxpayer's ability to continue to make the awards as required by the award plan. Although the taxpayer may reserve the right to change or to terminate an award plan, the actual termination of the award plan for any reason other than business necessity within a few years after it has taken effect may be evidence that the award plan from its inception was not a "permanent" award plan. Whether or not an award plan is discriminatory shall be determined from all the facts and circumstances of the particular case. An award plan may fail to qualify because it is discriminatory in its actual operation even though the written provisions of the award plan are not discriminatory.

(2) *Items not treated as qualified plan awards.* The term *qualified plan award*, for purposes of this section, does not include an item qualifying under paragraph (d)(1) of this section to the extent that the cost of the item exceeds \$1,600. In addition, that term does not include any items qualifying under paragraph (d)(1) of this section if the average cost of all items (whether or not tangible personal property) awarded during the taxable year by the taxpayer under any plan described in paragraph (d)(1) of this section exceeds \$400. The average cost of those items shall be computed by dividing (i) the sum of the costs for those items (including amounts in excess of the \$1,600 limitation) by (ii) the total number of those items.

(e) *Gifts made indirectly to an individual—(1) Gift to spouse or member of family.* If a taxpayer makes a gift to the wife of a man who has a business connection with the taxpayer, the gift generally will be considered as made indirectly to the husband. However, if the wife has a bona fide business connection with the taxpayer independently of her relationship to her husband, a gift to her generally will not be considered as made indirectly to her husband unless the gift is intended for his eventual use or benefit. Thus, if a taxpayer makes a gift to a wife who is engaged with her husband in the active conduct of a partnership business, the gift to the wife will not be considered an indirect gift to her husband unless it is intended for his eventual use or benefit. The same rules apply to gifts to any other member of the family of an individual who has a business connection with the taxpayer.

(2) *Gift to corporation or other business entity.* If a taxpayer makes a gift to a corporation or other business entity intended for the eventual personal use or benefit of an individual who is an employee, stockholder, or other owner of the corporation or business entity, the gift generally will be considered as made indirectly to such individual. Thus, if a taxpayer provides theater tickets to a closely held corporation for eventual use by any one of the stockholders of the corporation, and if such tickets are gifts, the gifts will be considered as made indirectly to the

individual who eventually uses such ticket. On the other hand, a gift to a business organization of property to be used in connection with the business of the organization (for example, a technical manual) will not be considered as a gift to an individual, even though, in practice, the book will be used principally by a readily identifiable individual employee. A gift for the eventual personal use or benefit of some undesignated member of a large group of individuals generally will not be considered as made indirectly to the individual who eventually uses, or benefits from, such gifts unless, under the circumstances of the case, it is reasonably practicable for the taxpayer to ascertain the ultimate recipient of the gift. Thus, if a taxpayer provides several baseball tickets to a corporation for the eventual use by any one of a large number of employees or customers of the corporation, and if such tickets are gifts, the gifts generally will not be treated as made indirectly to the individuals who use such tickets.

(f) *Special rules—(1) Partnership.* In the case of a gift by a partnership, the \$25 annual limitation contained in paragraph (a) of this section shall apply to the partnership as well as to each member of the partnership. Thus, in the case of a gift made by a partner with respect to the business of the partnership, the \$25 limitation will be applied at the partnership level as well as at the level of the individual partner. Consequently, deductions for gifts made with respect to partnership business will not exceed \$25 annually for each recipient, regardless of the number of partners.

(2) *Husband and wife.* For purposes of applying the \$25 annual limitation contained in paragraph (a) of this section, a husband and wife shall be treated as one taxpayer. Thus, in the case of gifts to an individual by a husband and wife, the spouses will be treated as one donor; and they are limited to a deduction of \$25 annually for each recipient. This rule applies regardless of whether the husband and wife file a joint return or whether the husband and wife make separate gifts to an individual with respect to separate businesses. Since the term *taxpayer* in paragraph (a) of this section refers only to the donor of a

§ 1.274-4

26 CFR Ch. I (4-1-17 Edition)

gift, this special rule does not apply to treat a husband and wife as one individual where each is a recipient of a gift. See paragraph (e)(1) of this section.

(g) *Cross reference.* For rules with respect to whether this section or § 1.274-2 applies, see § 1.274-2(b)(1) (iii).

[T.D. 6659, 28 FR 6505, June 25, 1963, as amended by T.D. 8230, 53 FR 36451, Sept. 20, 1988]

§ 1.274-4 Disallowance of certain foreign travel expenses.

(a) *Introductory.* Section 274(c) and this section impose certain restrictions on the deductibility of travel expenses incurred in the case of an individual who, while traveling outside the United States away from home in the pursuit of trade or business (hereinafter termed “business activity”), engages in substantial personal activity not attributable to such trade or business (hereinafter termed “nonbusiness activity”). Section 274(c) and this section are limited in their application to individuals (whether or not an employee or other person traveling under a reimbursement or other expense allowance arrangement) who engage in nonbusiness activity while traveling outside the United States away from home, and do not impose restrictions on the deductibility of travel expenses incurred by an employer or client under an advance, reimbursement, or other arrangement with the individual who engages in nonbusiness activity. For purposes of this section, the term *United States* includes only the States and the District of Columbia, and any reference to “trade or business” or “business activity” includes any activity described in section 212. For rules governing the determination of travel outside the United States away from home, see paragraph (e) of this section. For rules governing the disallowance of travel expense to which this section applies, see paragraph (f) of this section.

(b) *Limitations on application of section.* The restrictions on deductibility of travel expenses contained in paragraph (f) of this section are applicable only if:

(1) The travel expense is otherwise deductible under section 162 or 212 and the regulations thereunder,

(2) The travel expense is for travel outside the United States away from home which exceeds 1 week (as determined under paragraph (c) of this section), and

(3) The time outside the United States away from home attributable to nonbusiness activity (as determined under paragraph (d) of this section) constitutes 25 percent or more of the total time on such travel.

(c) *Travel in excess of 1 week.* This section does not apply to an expense of travel unless the expense is for travel outside the United States away from home which exceeds 1 week. For purposes of this section, 1 week means 7 consecutive days. The day in which travel outside the United States away from home begins shall not be considered, but the day in which such travel ends shall be considered, in determining whether a taxpayer is outside the United States away from home for more than 7 consecutive days. For example, if a taxpayer departs on travel outside the United States away from home on a Wednesday morning and ends such travel the following Wednesday evening, he shall be considered as being outside the United States away from home only 7 consecutive days. In such a case, this section would not apply because the taxpayer was not outside the United States away from home for more than 7 consecutive days. However, if the taxpayer travels outside the United States away from home for more than 7 consecutive days, both the day such travel begins and the day such travel ends shall be considered a “business day” or a “nonbusiness day”, as the case may be, for purposes of determining whether nonbusiness activity constituted 25 percent or more of travel time under paragraph (d) of this section and for purposes of allocating expenses under paragraph (f) of this section. For purposes of determining whether travel is outside the United States away from home, see paragraph (e) of this section.

(d) *Nonbusiness activity constituting 25 percent or more of travel time—(1) In general.* This section does not apply to any expense of travel outside the United States away from home unless the portion of time outside the United States

away from home attributable to non-business activity constitutes 25 percent or more of the total time on such travel.

(2) *Allocation on per day basis.* The total time traveling outside the United States away from home will be allocated on a day-by-day basis to (i) days of business activity or (ii) days of non-business activity (hereinafter termed “business days” or “nonbusiness days” respectively) unless the taxpayer establishes that a different method of allocation more clearly reflects the portion of time outside the United States away from home which is attributable to nonbusiness activity. For purposes of this section, a day spent outside the United States away from home shall be deemed entirely a business day even though spent only in part on business activity if the taxpayer establishes:

(i) *Transportation days.* That on such day the taxpayer was traveling to or returning from a destination outside the United States away from home in the pursuit of trade or business. However, if for purposes of engaging in non-business activity, the taxpayer while traveling outside the United States away from home does not travel by a reasonably direct route, only that number of days shall be considered business days as would be required for the taxpayer, using the same mode of transportation, to travel to or return from the same destination by a reasonably direct route. Also, if, while so traveling, the taxpayer interrupts the normal course of travel by engaging in substantial diversions for nonbusiness reasons of his own choosing, only that number of days shall be considered business days as equals the number of days required for the taxpayer, using the same mode of transportation, to travel to or return from the same destination without engaging in such diversion. For example, if a taxpayer residing in New York departs on an evening on a direct flight to Quebec for a business meeting to be held in Quebec the next morning, for purposes of determining whether nonbusiness activity constituted 25 percent or more of his travel time, the entire day of his departure shall be considered a business day. On the other hand, if a taxpayer travels by automobile from New

York to Quebec to attend a business meeting and while en route spends 2 days in Ottawa and 1 day in Montreal on nonbusiness activities of his personal choice, only that number of days outside the United States shall be considered business days as would have been required for the taxpayer to drive by a reasonably direct route to Quebec, taking into account normal periods for rest and meals.

(ii) *Presence required.* That on such day his presence outside the United States away from home was required at a particular place for a specific and bona fide business purpose. For example, if a taxpayer is instructed by his employer to attend a specific business meeting, the day of the meeting shall be considered a business day even though, because of the scheduled length of the meeting, the taxpayer spends more time during normal working hours of the day on nonbusiness activity than on business activity.

(iii) *Days primarily business.* That during hours normally considered to be appropriate for business activity, his principal activity on such day was the pursuit of trade or business.

(iv) *Circumstances beyond control.* That on such day he was prevented from engaging in the conduct of trade or business as his principal activity due to circumstances beyond his control.

(v) *Weekends, holidays, etc.* That such day was a Saturday, Sunday, legal holiday, or other reasonably necessary standby day which intervened during that course of the taxpayer's trade or business while outside the United States away from home which the taxpayer endeavored to conduct with reasonable dispatch. For example, if a taxpayer travels from New York to London to take part in business negotiations beginning on a Wednesday and concluding on the following Tuesday, the intervening Saturday and Sunday shall be considered business days whether or not business is conducted on either of such days. Similarly, if in the above case the meetings which concluded on Tuesday evening were followed by business meetings with another business group in London on the immediately succeeding Thursday and Friday, the intervening Wednesday will

be deemed a business day. However, if at the conclusion of the business meetings on Friday, the taxpayer stays in London for an additional week for personal purposes, the Saturday and Sunday following the conclusion of the business meeting will not be considered business days.

(e) *Domestic travel excluded*—(1) *In general.* For purposes of this section, travel outside the United States away from home does not include any travel from one point in the United States to another point in the United States. However, travel which is not from one point in the United States to another point in the United States shall be considered travel outside the United States. If a taxpayer travels from a place within the United States to a place outside the United States, the portion, if any, of such travel which is from one point in the United States to another point in the United States is to be disregarded for purposes of determining:

(i) Whether the taxpayer's travel outside the United States away from home exceeds 1 week (see paragraph (c) of this section),

(ii) Whether the time outside the United States away from home attributable to nonbusiness activity constitutes 25 percent or more of the total time on such travel (see paragraph (d) of this section), or

(iii) The amount of travel expense subject to the allocation rules of this section (see paragraph (f) of this section).

(2) *Determination of travel from one point in the United States to another point in the United States.* In the case of the following means of transportation, travel from one point in the United States to another point in the United States shall be determined as follows:

(i) *Travel by public transportation.* In the case of travel by public transportation, any place in the United States at which the vehicle makes a scheduled stop for the purpose of adding or discharging passengers shall be considered a point in the United States.

(ii) *Travel by private automobile.* In the case of travel by private automobile, any such travel which is within the United States shall be considered trav-

el from one point in the United States to another point in the United States.

(iii) *Travel by private airplane.* In the case of travel by private airplane, any flight, whether or not constituting the entire trip, where both the takeoff and the landing are within the United States shall be considered travel from one point in the United States to another point in the United States.

(3) *Examples.* The provisions of subparagraph (2) may be illustrated by the following examples:

Example 1. Taxpayer A flies from Los Angeles to Puerto Rico with a brief scheduled stopover in Miami for the purpose of adding and discharging passengers and A returns by airplane nonstop to Los Angeles. The travel from Los Angeles to Miami is considered travel from one point in the United States to another point in the United States. The travel from Miami to Puerto Rico and from Puerto Rico to Los Angeles is not considered travel from one point in the United States to another point in the United States and, thus, is considered to be travel outside the United States away from home.

Example 2. Taxpayer B travels by train from New York to Montreal. The travel from New York to the last place in the United States where the train is stopped for the purpose of adding or discharging passengers is considered to be travel from one point in the United States to another point in the United States.

Example 3. Taxpayer C travels by automobile from Tulsa to Mexico City and back. All travel in the United States is considered to be travel from one point in the United States to another point in the United States.

Example 4. Taxpayer D flies nonstop from Seattle to Juneau. Although the flight passes over Canada, the trip is considered to be travel from one point in the United States to another point in the United States.

Example 5. If in *Example 4* above, the airplane makes a scheduled landing in Vancouver, the time spent in traveling from Seattle to Juneau is considered to be travel outside the United States away from home. However, the time spent in Juneau is not considered to be travel outside the United States away from home.

(f) *Application of disallowance rules*—(1) *In general.* In the case of expense for travel outside the United States away from home by an individual to which this section applies, except as otherwise provided in subparagraph (4) or (5) of this paragraph, no deduction shall be allowed for that amount of travel expense specified in subparagraph (2) or

(3) of this paragraph (whichever is applicable) which is obtained by multiplying the total of such travel expense by a fraction:

(i) The numerator of which is the number of nonbusiness days during such travel, and

(ii) The denominator of which is the total number of business days and nonbusiness days during such travel.

For determination of “business days” and “nonbusiness days”, see paragraph (d)(2) of this section.

(2) *Nonbusiness activity at, near, or beyond business destination.* If the place at which the individual engages in nonbusiness activity (hereinafter termed “nonbusiness destination”) is at, near, or beyond the place to which he travels in the pursuit of a trade or business (hereinafter termed “business destination”), the amount of travel expense referred to in subparagraph (1) of this paragraph shall be the amount of travel expense, otherwise allowable as a deduction under section 162 or section 212, which would have been incurred in traveling from the place where travel outside the United States away from home begins to the business destination, and returning. Thus, if the individual travels from New York to London on business, and then takes a vacation in Paris before returning to New York, the amount of the travel expense subject to allocation is the expense which would have been incurred in traveling from New York to London and returning.

(3) *Nonbusiness activity on the route to or from business destination.* If the nonbusiness destination is on the route to or from the business destination, the amount of the travel expense referred to in subparagraph (1) of this paragraph shall be the amount of travel expense, otherwise allowable as a deduction under section 162 or 212, which would have been incurred in traveling from the place where travel outside the United States away from home begins to the nonbusiness destination and returning. Thus, if the individual travels on business from Chicago to Rio de Janeiro, Brazil with a scheduled stop in New York for the purpose of adding and discharging passengers, and while en route stops in Caracas, Venezuela for a vacation and returns to Chicago from

Rio de Janeiro with another scheduled stop in New York for the purpose of adding and discharging passengers, the amount of travel expense subject to allocation is the expense which would have been incurred in traveling from New York to Caracas and returning.

(4) *Other allocation method.* If a taxpayer establishes that a method other than allocation on a day-by-day basis (as determined under paragraph (d)(2) of this section) more clearly reflects the portion of time outside the United States away from home which is attributable to nonbusiness activity, the amount of travel expense for which no deduction shall be allowed shall be determined by such other method.

(5) *Travel expense deemed entirely allocable to business activity.* Expenses of travel shall be considered allocable in full to business activity, and no portion of such expense shall be subject to disallowance under this section, if incurred under circumstances provided for in subdivision (i) or (ii) of this subparagraph.

(i) *Lack of control over travel.* Expenses of travel otherwise deductible under section 162 or 212 shall be considered fully allocable to business activity if, considering all the facts and circumstances, the individual incurring such expenses did not have substantial control over the arranging of the business trip. A person who is required to travel to a business destination will not be considered to have substantial control over the arranging of the business trip merely because he has control over the timing of the trip. Any individual who travels on behalf of his employer under a reimbursement or other expense allowance arrangement shall be considered not to have had substantial control over the arranging of his business trip, provided the employee is not:

(a) A managing executive of the employer for whom he is traveling (and for this purpose the term *managing executive* includes only an employee who, by reason of his authority and responsibility, is authorized, without effective veto procedures, to decide upon the necessity for his business trip), or

(b) Related to his employer within the meaning of section 267(b) but for

this purpose the percentage referred to in section 267(b)(2) shall be 10 percent.

(ii) *Lack of major consideration to obtain a vacation.* Any expense of travel, which qualifies for deduction under section 162 or 212, shall be considered fully allocable to business activity if the individual incurring such expenses can establish that, considering all the facts and circumstances, he did not have a major consideration, in determining to make the trip, of obtaining a personal vacation or holiday. If such a major consideration were present, the provisions of subparagraphs (1) through (4) of this paragraph shall apply. However, if the trip were primarily personal in nature, the traveling expenses to and from the destination are not deductible even though the taxpayer engages in business activities while at such destination. See paragraph (b) of § 1.162-2.

(g) *Examples.* The application of this section may be illustrated by the following examples:

Example 1. Individual A flew from New York to Paris where he conducted business for 1 day. He spent the next 2 days sightseeing in Paris and then flew back to New York. The entire trip, including 2 days for travel en route, took 5 days. Since the time outside the United States away from home during the trip did not exceed 1 week, the disallowance rules of this section do not apply.

Example 2. Individual B flew from Tampa to Honolulu (from one point in the United States to another point in the United States) for a business meeting which lasted 3 days and for personal matters which took 10 days. He then flew to Melbourne, Australia where he conducted business for 2 days and went sightseeing for 1 day. Immediately thereafter he flew back to Tampa, with a scheduled landing in Honolulu for the purpose of adding and discharging passengers. Although the trip exceeded 1 week, the time spent outside the United States away from home, including 2 days for traveling from Honolulu to Melbourne and return, was 5 days. Since the time outside the United States away from home during the trip did not exceed 1 week, the disallowance rules of this section do not apply.

Example 3. Individual C flew from Los Angeles to New York where he spent 5 days. He then flew to Brussels where he spent 14 days on business and 5 days on personal matters. He then flew back to Los Angeles by way of New York. The entire trip, including 4 days for travel en route, took 28 days. However, the 2 days spent traveling from Los Angeles

to New York and return, and the 5 days spent in New York are not considered travel outside the United States away from home and, thus, are disregarded for purposes of this section. Although the time spent outside the United States away from home exceeded 1 week, the time outside the United States away from home attributable to nonbusiness activities (5 days out of 21) was less than 25 percent of the total time outside the United States away from home during the trip. Therefore, the disallowance rules of this section do not apply.

Example 4. D, an employee of Y Company, who is neither a managing executive of, nor related to, Y Company within the meaning of paragraph (f)(5)(i) of this section, traveled outside the United States away from home on behalf of his employer and was reimbursed by Y for his traveling expense to and from the business destination. The trip took more than a week and D took advantage of the opportunity to enjoy a personal vacation which exceeded 25 percent of the total time on the trip. Since D, traveling under a reimbursement arrangement, is not a managing executive of, or related to, Y Company, he is not considered to have substantial control over the arranging of the business trip, and the travel expenses shall be considered fully allocable to business activity.

Example 5. E, a managing executive and principal shareholder of X Company, travels from New York to Stockholm, Sweden, to attend a series of business meetings. At the conclusion of the series of meetings, which last 1 week, E spends 1 week on a personal vacation in Stockholm. If E establishes either that he did not have substantial control over the arranging of the trip or that a major consideration in his determining to make the trip was not to provide an opportunity for taking a personal vacation, the entire travel expense to and from Stockholm shall be considered fully allocable to business activity.

Example 6. F, a self-employed professional man, flew from New York to Copenhagen, Denmark, to attend a convention sponsored by a professional society. The trip lasted 3 weeks, of which 2 weeks were spent on vacation in Europe. F generally would be regarded as having substantial control over arranging this business trip. Unless F can establish that obtaining a vacation was not a major consideration in determining to make the trip, the disallowance rules of this section apply.

Example 7. Taxpayer G flew from Chicago to New York where he spent 6 days on business. He then flew to London where he conducted business for 2 days. G then flew to Paris for a 5 day vacation after which he flew back to Chicago, with a scheduled landing in New York for the purpose of adding and discharging passengers. G would not have made the trip except for the business he had to

conduct in London. The travel outside the United States away from home, including 2 days for travel en route, exceeded a week and the time devoted to nonbusiness activities was not less than 25 percent of the total time on such travel. The 2 days spent traveling from Chicago to New York and return, and the 6 days spent in New York are disregarded for purposes of determining whether the travel outside the United States away from home exceeded a week and whether the time devoted to nonbusiness activities was less than 25 percent of the total time outside the United States away from home. If G is unable to establish either that he did not have substantial control over the arranging of the business trip or that an opportunity for taking a personal vacation was not a major consideration in his determining to make the trip, 5/9ths (5 days devoted to nonbusiness activities out of a total 9 days outside the United States away from home on the trip) of the expenses attributable to transportation and food from New York to London and from London to New York will be disallowed (unless G establishes that a different method of allocation more clearly reflects the portion of time outside the United States away from home which is attributable to nonbusiness activity).

(h) *Cross reference.* For rules with respect to whether an expense is travel or entertainment, see paragraph (b)(1)(iii) of § 1.274-2.

[T.D. 6758, 29 FR 12768, Sept. 10, 1964]

§ 1.274-5 Substantiation requirements.

(a)-(b) [Reserved]. For further guidance, see § 1.274-5T(a) and (b).

(c) *Rules of substantiation*—(1) [Reserved]. For further guidance, see § 1.274-5T(c)(1).

(2) *Substantiation by adequate records*—(i) and (ii) [Reserved]. For further guidance, see § 1.274-5T(c)(2)(i) and (ii).

(iii) *Documentary evidence*—(A) Except as provided in paragraph (c)(2)(iii)(B), documentary evidence, such as receipts, paid bills, or similar evidence sufficient to support an expenditure, is required for—

(1) Any expenditure for lodging while traveling away from home, and

(2) Any other expenditure of \$75 or more except, for transportation charges, documentary evidence will not be required if not readily available.

(B) The Commissioner, in his or her discretion, may prescribe rules waiving the documentary evidence requirements in circumstances where it is im-

practicable for such documentary evidence to be required. Ordinarily, documentary evidence will be considered adequate to support an expenditure if it includes sufficient information to establish the amount, date, place, and the essential character of the expenditure. For example, a hotel receipt is sufficient to support expenditures for business travel if it contains the following: name, location, date, and separate amounts for charges such as for lodging, meals, and telephone. Similarly, a restaurant receipt is sufficient to support an expenditure for a business meal if it contains the following: name and location of the restaurant, the date and amount of the expenditure, the number of people served, and, if a charge is made for an item other than meals and beverages, an indication that such is the case. A document may be indicative of only one (or part of one) element of an expenditure. Thus, a cancelled check, together with a bill from the payee, ordinarily would establish the element of cost. In contrast, a cancelled check drawn payable to a named payee would not by itself support a business expenditure without other evidence showing that the check was used for a certain business purpose.

(iv)-(v) [Reserved]. For further guidance, see § 1.274-5T(c)(2)(iv) and (v).

(3)-(7) [Reserved]. For further guidance, see § 1.274-5T(c)(3) through (7).

(d)-(e) [Reserved]. For further guidance, see § 1.274-5T(d) and (e).

(f) *Reporting and substantiation of expenses of certain employees for travel, entertainment, gifts, and with respect to listed property*—(1) through (3) [Reserved]. For further guidance, see § 1.274-5T(f)(1) through (3).

(4) *Definition of an adequate accounting to the employer*—(i) *In general.* For purposes of this paragraph (f) an *adequate accounting* means the submission to the employer of an account book, diary, log, statement of expense, trip sheet, or similar record maintained by the employee in which the information as to each element of an expenditure or use (described in paragraph (b) of this section) is recorded at or near the time of the expenditure or use, together with supporting documentary evidence, in a manner that conforms to all the

adequate records requirements of paragraph (c)(2) of this section. An adequate accounting requires that the employee account for all amounts received from the employer during the taxable year as advances, reimbursements, or allowances (including those charged directly or indirectly to the employer through credit cards or otherwise) for travel, entertainment, gifts, and the use of listed property. The methods of substantiation allowed under paragraph (c)(4) or (c)(5) of this section also will be considered to be an adequate accounting if the employer accepts an employee's substantiation and establishes that such substantiation meets the requirements of paragraph (c)(4) or (c)(5). For purposes of an adequate accounting, the method of substantiation allowed under paragraph (c)(3) of this section will not be permitted.

(ii) *Procedures for adequate accounting without documentary evidence.* The Commissioner may, in his or her discretion, prescribe rules under which an employee may make an adequate accounting to an employer by submitting an account book, log, diary, etc., alone, without submitting documentary evidence.

(iii) *Employer.* For purposes of this section, the term *employer* includes an agent of the employer or a third party payor who pays amounts to an employee under a reimbursement or other expense allowance arrangement.

(5) [Reserved]. For further guidance, see § 1.274-5T(f)(5).

(g) *Substantiation by reimbursement arrangements or per diem, mileage, and other traveling allowances—(1) In general.* The Commissioner may, in his or her discretion, prescribe rules in pronouncements of general applicability under which allowances for expenses described in paragraph (g)(2) of this section will, if in accordance with reasonable business practice, be regarded as equivalent to substantiation by adequate records or other sufficient evidence, for purposes of paragraph (c) of this section, of the amount of the expenses and as satisfying, with respect to the amount of the expenses, the requirements of an adequate accounting to the employer for purposes of paragraph (f)(4) of this section. If the total

allowance received exceeds the deductible expenses paid or incurred by the employee, such excess must be reported as income on the employee's return. See paragraph (j)(1) of this section relating to the substantiation of meal expenses while traveling away from home, and paragraph (j)(2) of this section relating to the substantiation of expenses for the business use of a vehicle.

(2) *Allowances for expenses described.* An allowance for expenses is described in this paragraph (g)(2) if it is a—

(i) Reimbursement arrangement covering ordinary and necessary expenses of traveling away from home (exclusive of transportation expenses to and from destination);

(ii) Per diem allowance providing for ordinary and necessary expenses of traveling away from home (exclusive of transportation costs to and from destination); or

(iii) Mileage allowance providing for ordinary and necessary expenses of local transportation and transportation to, from, and at the destination while traveling away from home.

(h) [Reserved]. For further guidance, see § 1.274-5T(h).

(i) [Reserved]

(j) *Authority for optional methods of computing certain expenses—(1) Meal expenses while traveling away from home.* The Commissioner may establish a method under which a taxpayer may use a specified amount or amounts for meals while traveling away from home in lieu of substantiating the actual cost of meals. The taxpayer will not be relieved of the requirement to substantiate the actual cost of other travel expenses as well as the time, place, and business purpose of the travel. See paragraphs (b)(2) and (c) of this section.

(2) *Use of mileage rates for vehicle expenses.* The Commissioner may establish a method under which a taxpayer may use mileage rates to determine the amount of the ordinary and necessary expenses of using a vehicle for local transportation and transportation to, from, and at the destination while traveling away from home in lieu of substantiating the actual costs. The method may include appropriate limitations and conditions in order to reflect more accurately vehicle expenses

over the entire period of usage. The taxpayer will not be relieved of the requirement to substantiate the amount of each business use (i.e., the business mileage), or the time and business purpose of each use. See paragraphs (b)(2) and (c) of this section.

(3) *Incidental expenses while traveling away from home.* The Commissioner may establish a method under which a taxpayer may use a specified amount or amounts for incidental expenses paid or incurred while traveling away from home in lieu of substantiating the actual cost of incidental expenses. The taxpayer will not be relieved of the requirement to substantiate the actual cost of other travel expenses as well as the time, place, and business purpose of the travel.

(k) *Exceptions for qualified nonpersonal use vehicles—(1) In general.* The substantiation requirements of section 274(d) and this section do not apply to any qualified nonpersonal use vehicle (as defined in paragraph (k)(2) of this section).

(2) *Qualified nonpersonal use vehicle—(i) In general.* For purposes of section 274(d) and this section, the term *qualified nonpersonal use vehicle* means any vehicle which, by reason of its nature (that is, design), is not likely to be used more than a de minimis amount for personal purposes.

(ii) *List of vehicles.* Vehicles which are qualified nonpersonal use vehicles include the following:

(A) Clearly marked police, fire, and public safety officer vehicles (as defined and to the extent provided in paragraph (k)(3) of this section).

(B) Ambulances used as such or hearses used as such.

(C) Any vehicle designed to carry cargo with a loaded gross vehicle weight over 14,000 pounds.

(D) Bucket trucks (cherry pickers).

(E) Cement mixers.

(F) Combines.

(G) Cranes and derricks.

(H) Delivery trucks with seating only for the driver, or only for the driver plus a folding jump seat.

(I) Dump trucks (including garbage trucks).

(J) Flatbed trucks.

(K) Forklifts.

(L) Passenger buses used as such with a capacity of at least 20 passengers.

(M) Qualified moving vans (as defined in paragraph (k)(4) of this section).

(N) Qualified specialized utility repair trucks (as defined in paragraph (k)(5) of this section).

(O) Refrigerated trucks.

(P) School buses (as defined in section 4221(d)(7)(c)).

(Q) Tractors and other special purpose farm vehicles.

(R) Unmarked vehicles used by law enforcement officers (as defined in paragraph (k)(6) of this section) if the use is officially authorized.

(S) Such other vehicles as the Commissioner may designate.

(3) *Clearly marked police, fire, or public safety officer vehicles.* A police, fire, or public safety officer vehicle is a vehicle, owned or leased by a governmental unit, or any agency or instrumentality thereof, that is required to be used for commuting by a police officer, fire fighter, or public safety officer (as defined in section 402(1)(4)(C) of this chapter) who, when not on a regular shift, is on call at all times, provided that any personal use (other than commuting) of the vehicle outside the limit of the police officer's arrest powers or the fire fighter's or public safety officer's obligation to respond to an emergency is prohibited by such governmental unit. A police, fire, or public safety officer vehicle is clearly marked if, through painted insignia or words, it is readily apparent that the vehicle is a police, fire, or public safety officer vehicle. A marking on a license plate is not a clear marking for purposes of this paragraph (k).

(4) *Qualified moving van.* The term *qualified moving van* means any truck or van used by a professional moving company in the trade or business of moving household or business goods if—

(i) No personal use of the van is allowed other than for travel to and from a move site (or for de minimis personal use, such as a stop for lunch on the way between two move sites);

(ii) Personal use for travel to and from a move site is an irregular practice (that is, not more than five times a month on average); and

(iii) Personal use is limited to situations in which it is more convenient to the employer, because of the location of the employee's residence in relation to the location of the move site, for the van not to be returned to the employer's business location.

(5) *Qualified specialized utility repair truck.* The term *qualified specialized utility repair truck* means any truck (not including a van or pickup truck) specifically designed and used to carry heavy tools, testing equipment, or parts if—

(i) The shelves, racks, or other permanent interior construction which has been installed to carry and store such heavy items is such that it is unlikely that the truck will be used more than a de minimis amount for personal purposes; and

(ii) The employer requires the employee to drive the truck home in order to be able to respond in emergency situations for purposes of restoring or maintaining electricity, gas, telephone, water, sewer, or steam utility services.

(6) *Unmarked law enforcement vehicles*—(i) *In general.* The substantiation requirements of section 274(d) and this section do not apply to officially authorized uses of an unmarked vehicle by a “law enforcement officer”. To qualify for this exception, any personal use must be authorized by the Federal, State, county, or local governmental agency or department that owns or leases the vehicle and employs the officer, and must be incident to law-enforcement functions, such as being able to report directly from home to a stakeout or surveillance site, or to an emergency situation. Use of an unmarked vehicle for vacation or recreation trips cannot qualify as an authorized use.

(ii) *Law enforcement officer.* The term *law enforcement officer* means an individual who is employed on a full-time basis by a governmental unit that is responsible for the prevention or investigation of crime involving injury to persons or property (including apprehension or detention of persons for such crimes), who is authorized by law to carry firearms, execute search warrants, and to make arrests (other than merely a citizen's arrest), and who reg-

ularly carries firearms (except when it is not possible to do so because of the requirements of undercover work). The term “law enforcement officer” may include an arson investigator if the investigator otherwise meets the requirements of this paragraph (k)(6)(ii), but does not include Internal Revenue Service special agents.

(7) *Trucks and vans.* The substantiation requirements of section 274(d) and this section apply generally to any pickup truck or van, unless the truck or van has been specially modified with the result that it is not likely to be used more than a de minimis amount for personal purposes. For example, a van that has only a front bench for seating, in which permanent shelving that fills most of the cargo area has been installed, that constantly carries merchandise or equipment, and that has been specially painted with advertising or the company's name, is a vehicle not likely to be used more than a de minimis amount for personal purposes.

(8) *Examples.* The following examples illustrate the provisions of paragraph (k)(3) and (6) of this section:

Example 1. Detective C, who is a “law enforcement officer” employed by a state police department, headquartered in City M, is provided with an unmarked vehicle (equipped with radio communication) for use during off-duty hours because C must be able to communicate with headquarters and be available for duty at any time (for example, to report to a surveillance or crime site). The police department generally has officially authorized personal use of the vehicle by C but has prohibited use of the vehicle for recreational purposes or for personal purposes outside the state. Thus, C's use of the vehicle for commuting between headquarters or a surveillance site and home and for personal errands is authorized personal use as described in paragraph (k)(6)(i) of this section. With respect to these authorized uses the vehicle is not subject to the substantiation requirements of section 274(d) and the value of these uses is not included in C's gross income.

Example 2. Detective T is a “law enforcement officer” employed by City M. T is authorized to make arrests only within M's city limits. T, along with all other officers of the force, is ordinarily on duty for eight hours each work day and on call during the other sixteen hours. T is provided with the use of a clearly marked police vehicle in which T is required to commute to his home

in City M. The police department's official policy regarding marked police vehicles prohibits its personal use (other than commuting) of the vehicles outside the city limits. When not using the vehicle on the job, T uses the vehicle only for commuting, personal errands on the way between work and home, and personal errands within City M. All use of the vehicle by T conforms to the requirements of paragraph (k)(3) of this section. Therefore, the value of that use is excluded from T's gross income as a working condition fringe and the vehicle is not subject to the substantiation requirements of section 274(d).

Example 3. Director C is employed by City M as the director of the City's rescue squad and is provided with a vehicle for use in responding to emergencies. Director C is trained in rescue activity and has the legal authority and legal responsibility to engage in rescue activity. The city's rescue squad is not a part of City M's police or fire departments. The director's vehicle is a sedan which is painted with insignia and words identifying the vehicle as being owned by the City's rescue squad. C, when not on a regular shift, is on call at all times. The City's official policy regarding clearly marked public safety officer vehicles prohibits personal use (other than for commuting) of the vehicle outside of the limits of the public safety officer's obligation to respond to an emergency. When not using the vehicle to respond to emergencies, City M authorizes C to use the vehicle only for commuting, personal errands on the way between work and home, and personal errands within the limits of C's obligation to respond to emergencies. With respect to these authorized uses, the vehicle is not subject to the substantiation requirements of section 274(d) and the value of these uses is not includable in C's gross income.

Example 4. Coroner D is employed by County N to investigate and determine the cause, time, and manner of certain deaths occurring in the County. Coroner D also safeguards the property of the deceased, notifies the next of kin, conducts inquests, and arranges for the burial of indigent persons. D is provided with a vehicle for use by County N. The vehicle is to be used in County N business and for commuting. Personal use other than for commuting purposes is forbidden. D is trained in rescue activity but has no legal authority or legal responsibility to engage in rescue activity. D's vehicle is a sedan which is painted with insignia and words identifying it as a County N vehicle. D, when not on a regular shift, is on call at all times. D does not satisfy the criteria of a public safety officer under 28 CFR 32.3 (2008). Thus, D's vehicle cannot qualify as a clearly marked public safety officer vehicle. Accordingly, business use of the vehicle is subject to the substantiation requirements of section 274(d), and the value of any personal use of

the vehicle, such as commuting, is includable in D's gross income.

(1) **Definitions.** For purposes of section 274(d) and this section, the terms *automobile* and *vehicle* have the same meanings as prescribed in § 1.61-21(d)(1)(ii) and (e)(2), respectively. Also, for purposes of section 274(d) and this section, the terms *employer*, *employee* and *personal use* have the same meanings as prescribed in § 1.274-6T(e).

(m) **Effective date.** This section applies to expenses paid or incurred after December 31, 1997. However, paragraph (j)(3) of this section applies to expenses paid or incurred after September 30, 2002, and paragraph (k) applies to clearly marked public safety officer vehicles, as defined in § 1.274-5(k)(3), only with respect to uses occurring after May 19, 2010.

[T.D. 8864, 65 FR 4122, Jan. 26, 2000; 65 FR 15547, Mar. 23, 2000, as amended by T.D. 9020, 67 FR 68513, Nov. 12, 2002; T.D. 9064, 68 FR 39011, July 1, 2003; T.D. 9483, 75 FR 27936, May 19, 2010]

§ 1.274-5T Substantiation requirements (temporary).

(a) **In general.** For taxable years beginning on or after January 1, 1986, no deduction or credit shall be allowed with respect to—

(1) Traveling away from home (including meals and lodging),

(2) Any activity which is of a type generally considered to constitute entertainment, amusement, or recreation, or with respect to a facility used in connection with such an activity, including the items specified in section 274(e),

(3) Gifts defined in section 274(b), or

(4) Any listed property (as defined in section 280F(d)(4) and § 1.280F-6T(b)), unless the taxpayer substantiates each element of the expenditure or use (as described in paragraph (b) of this section) in the manner provided in paragraph (c) of this section. This limitation supersedes the doctrine found in *Cohan v. Commissioner*, 39 F. 2d 540 (2d Cir. 1930). The decision held that, where the evidence indicated a taxpayer incurred deductible travel or entertainment expenses but the exact amount could not be determined, the court should make a close approximation and not disallow the deduction entirely.

Section 274(d) contemplates that no deduction or credit shall be allowed a taxpayer on the basis of such approximations or unsupported testimony of the taxpayer. For purposes of this section, the term *entertainment* means entertainment, amusement, or recreation, and use of a facility therefor; and the term *expenditure* includes expenses and items (including items such as losses and depreciation).

(b) *Elements of an expenditure or use—*

(1) *In general.* Section 274(d) and this section contemplate that no deduction or credit shall be allowed for travel, entertainment, a gift, or with respect to listed property unless the taxpayer substantiates the requisite elements of each expenditure or use as set forth in this paragraph (b).

(2) *Travel away from home.* The elements to be provided with respect to an expenditure for travel away from home are—

(i) *Amount.* Amount of each separate expenditure for traveling away from home, such as cost of transportation or lodging, except that the daily cost of the traveler's own breakfast, lunch, and dinner and of expenditures incidental to such travel may be aggregated, if set forth in reasonable categories, such as for meals, for gasoline and oil, and for taxi fares;

(ii) *Time.* Dates of departure and return for each trip away from home, and number of days away from home spent on business;

(iii) *Place.* Destinations or locality of travel, described by name of city or town or other similar designation; and

(iv) *Business purpose.* Business reason for travel or nature of the business benefit derived or expected to be derived as a result of travel.

(3) *Entertainment in general.* The elements to be proved with respect to an expenditure for entertainment are—

(i) *Amount.* Amount of each separate expenditure for entertainment, except that such incidental items as taxi fares or telephone calls may be aggregated on a daily basis;

(ii) *Time.* Date of entertainment;

(iii) *Place.* Name, if any, address or location, and destination of type of entertainment, such as dinner or theater, if such information is not apparent from the designation of the place;

(iv) *Business purpose.* Business reason for the entertainment or nature of business benefit derived or expected to be derived as a result of the entertainment and, except in the case of business meals described in section 274(e)(1), the nature of any business discussion or activity;

(v) *Business relationship.* Occupation or other information relating to the person or persons entertained, including name, title, or other designation, sufficient to establish business relationship to the taxpayer.

(4) *Entertainment directly preceding or following a substantial and bona fide business discussion.* If a taxpayer claims a deduction for entertainment directly preceding or following a substantial and bona fide business discussion on the ground that such entertainment was associated with the active conduct of the taxpayer's trade or business, the elements to be proved with respect to such expenditure, in addition to those enumerated in paragraph (b)(3) (i), (ii), (iii), and (v) of this section are—

(i) *Time.* Date and duration of business discussion;

(ii) *Place.* Place of business discussion;

(iii) *Business purpose.* Nature of business discussion, and business reason for the entertainment or nature of business benefit derived or expected to be derived as the result of the entertainment.

(iv) *Business relationship.* Identification of those persons entertained who participated in the business discussion.

(5) *Gifts.* The elements to be proved with respect to an expenditure for a gift are—

(i) *Amount.* Cost of the gift to the taxpayer;

(ii) *Time.* Date of the gift;

(iii) *Description.* Description of the gift;

(iv) *Business purpose.* Business reason for the gift or nature of business benefit derived or expected to be derived as a result of the gift; and

(v) *Business relationship.* Occupation or other information relating to the recipient of the gift, including name, title, or other designation, sufficient to establish business relationship to the taxpayer.

(6) *Listed property.* The elements to be proved with respect to any listed property are—

(i) *Amount—(A) Expenditures.* The amount of each separate expenditure with respect to an item of listed property, such as the cost of acquisition, the cost of capital improvements, lease payments, the cost of maintenance and repairs, or other expenditures, and

(B) *Uses.* The amount of each business/investment use (as defined in § 1.280F-6T (d)(3) and (e)), based on the appropriate measure (i.e., mileage for automobiles and other means of transportation and time for other listed property, unless the Commissioner approves an alternative method), and the total use of the listed property for the taxable period.

(ii) *Time.* Date of the expenditure or use with respect to listed property, and

(iii) *Business or investment purpose.* The business purpose for an expenditure or use with respect to any listed property (see § 1.274-5T(c)(6)(i) (B) and (C) for special rules for the aggregation of expenditures and business use and § 1.280F-6T(d)(2) for the distinction between qualified business use and business/investment use).

See also § 1.274-5T(e) relating to the substantiation of business use of employer-provided listed property and § 1.274-6T for special rules for substantiating the business/investment use of certain types of listed property.

(c) *Rules of substantiation—(1) In general.* Except as otherwise provided in this section and § 1.274-6T, a taxpayer must substantiate each element of an expenditure or use (described in paragraph (b) of this section) by adequate records or by sufficient evidence corroborating his own statement. Section 274(d) contemplates that a taxpayer will maintain and produce such substantiation as will constitute proof of each expenditure or use referred to in section 274. Written evidence has considerably more probative value than oral evidence alone. In addition, the probative value of written evidence is greater the closer in time it relates to the expenditure or use. A contemporaneous log is not required, but a record of the elements of an expenditure or of a business use of listed property made at or near the time of the expenditure

or use, supported by sufficient documentary evidence, has a high degree of credibility not present with respect to a statement prepared subsequent thereto when generally there is a lack of accurate recall. Thus, the corroborative evidence required to support a statement not made at or near the time of the expenditure or use must have a high degree of probative value to elevate such statement and evidence to the level of credibility reflected by a record made at or near the time of the expenditure or use supported by sufficient documentary evidence. The substantiation requirements of section 274(d) are designed to encourage taxpayers to maintain the records, together with documentary evidence, as provided in paragraph (c)(2) of this section.

(2) *Substantiation by adequate records—(i) In general.* To meet the “adequate records” requirements of section 274(d), a taxpayer shall maintain an account book, diary, log, statement of expense, trip sheets, or similar record (as provided in paragraph (c)(2)(ii) of this section), and documentary evidence (as provided in paragraph (c)(2)(iii) of this section) which, in combination, are sufficient to establish each element of an expenditure or use specified in paragraph (b) of this section. It is not necessary to record information in an account book, diary, log, statement of expense, trip sheet, or similar record which duplicates information reflected on a receipt so long as the account book, etc. and receipt complement each other in an orderly manner.

(ii) *Account book, diary, etc.* An account book, diary, log, statement of expense, trip sheet, or similar record must be prepared or maintained in such manner that each recording of an element of an expenditure or use is made at or near the time of the expenditure or use.

(A) *Made at or near the time of the expenditure or use.* For purposes of this section, the phrase *made at or near the time of the expenditure or use* means the element of an expenditure or use are recorded at a time when, in relation to the use or making of an expenditure,

the taxpayer has full present knowledge of each element of the expenditure or use, such as the amount, time, place, and business purpose of the expenditure and business relationship. An expense account statement which is a transcription of an account book, diary, log, or similar record prepared or maintained in accordance with the provisions of this paragraph (c)(2)(ii) shall be considered a record prepared or maintained in the manner prescribed in the preceding sentence if such expense account statement is submitted by an employee to his employer or by an independent contractor to his client or customer in the regular course of good business practice. For example, a log maintained on a weekly basis, which accounts for use during the week, shall be considered a record made at or near the time of such use.

(B) *Substantiation of business purpose.* In order to constitute an adequate record of business purpose within the meaning of section 274(d) and this paragraph (c)(2), a written statement of business purpose generally is required. However, the degree of substantiation necessary to establish business purpose will vary depending upon the facts and circumstances of each case. Where the business purpose is evident from the surrounding facts and circumstances, a written explanation of such business purpose will not be required. For example, in the case of a salesman calling on customers on an established sales route, a written explanation of the business purpose of such travel ordinarily will not be required. Similarly, in the case of a business meal described in section 274(e)(1), if the business purpose of such meal is evident from the business relationship to the taxpayer of the persons entertained and other surrounding circumstances, a written explanation of such business purpose will not be required.

(C) *Substantiation of business use of listed property—(1) Degree of substantiation.* In order to constitute an adequate record (within the meaning of section 274(d) and this paragraph (c)(2)(ii)), which substantiates business/investment use of listed property (as defined in § 1.280F-6T(d)(3)), the record must contain sufficient information as to each element of every business/in-

vestment use. However, the level of detail required in an adequate record to substantiate business/investment use may vary depending upon the facts and circumstances. For example, a taxpayer who uses a truck for both business and personal purposes and whose only business use of a truck is to make deliveries to customers on an established route may satisfy the adequate record requirement by recording the total number miles driven during the taxable year, the length of the delivery route once, and the date of each trip at or near the time of the trips. Alternatively, the taxpayer may establish the date of each trip with a receipt, record of delivery, or other documentary evidence.

(2) *Written record.* Generally, an adequate record must be written. However, a record of the business use of listed property, such as a computer or automobile, prepared in a computer memory device with the aid of a logging program will constitute an adequate record.

(D) *Confidential information.* If any information relating to the elements of an expenditure or use, such as place, business purpose, or business relationship, is of a confidential nature, such information need not be set forth in the account book, diary, log, statement of expense, trip sheet, or similar record, provided such information is recorded at or near the time of the expenditure or use and is elsewhere available to the district director to substantiate such element of the expenditure or use.

(iii) [Reserved]. For further guidance, see § 1.274-5(c)(2)(iii).

(iv) *Retention of written evidence.* The Commissioner may, in his discretion, prescribe rules under which an employer may dispose of the adequate records and documentary evidence submitted to him by employees who are required to, and do, make an adequate accounting to the employer (within the meaning of paragraph (f)(4) of this section) if the employer maintains adequate accounting procedures with respect to such employees (within the meaning of paragraph (f)(5) of this section).

(v) *Substantial compliance.* If a taxpayer has not fully substantiated a

particular element of an expenditure or use, but the taxpayer establishes to the satisfaction of the district director that he has substantially complied with the “adequate records” requirements of this paragraph (c)(2) with respect to the expenditure or use, the taxpayer may be permitted to establish such element by evidence which the district director shall deem adequate.

(3) *Substantiation by other sufficient evidence*—(i) *In general.* If a taxpayer fails to establish to the satisfaction of the district director that he has substantially complied with the “adequate records” requirements of paragraph (c)(2) of this section with respect to an element of an expenditure or use, then, except as otherwise provided in this paragraph, the taxpayer must establish such element—

(A) By his own statement, whether written or oral, containing specific information in detail as to such element; and

(B) By other corroborative evidence sufficient to establish such element.

If such element is the description of a gift, or the cost or amount, time, place, or date of an expenditure or use, the corroborative evidence shall be direct evidence, such as a statement in writing or the oral testimony of persons entertained or other witnesses setting forth detailed information about such element, or the documentary evidence described in paragraph (c)(2) of this section. If such element is either the business relationship to the taxpayer of persons entertained, or the business purpose of an expenditure, the corroborative evidence may be circumstantial evidence.

(ii) *Sampling*—(A) *In general.* Except as provided in paragraph (c)(3)(ii)(B) of this section, a taxpayer may maintain an adequate record for portions of a taxable year and use that record to substantiate the business/investment use of listed property for all or a portion of the taxable year if the taxpayer can demonstrate by other evidence that the periods for which an adequate record is maintained are representative of the use for the taxable year or a portion thereof.

(B) *Exception for pooled vehicles.* The sampling method of paragraph (c)(3)(ii)(A) of this section may not be

used to substantiate the business/investment use of an automobile or other vehicle of an employer that is made available for use by more than one employee for all or a portion of a taxable year.

(C) *Examples.* The following examples illustrate this paragraph (c)(3)(ii).

Example 1. A, a sole proprietor and calendar year taxpayer, operates an interior decorating business out of her home. A uses an automobile for local business travel to visit the homes or offices of clients, to meet with suppliers and other subcontractors, and to pick up and deliver certain items to clients when feasible. There is no other business use of the automobile but A and other members of her family also use the automobile for personal purposes. A maintains adequate records for the first three months of 1986 that indicate that 75 percent of the use of the automobile was in A's business. Invoices from subcontractors and paid bills indicate that A's business continued at approximately the same rate for the remainder of 1986. If other circumstances do not change (e.g., A does not obtain a second car for exclusive use in her business), the determination that the business/investment use of the automobile for the taxable year is 75 percent is based on sufficient corroborative evidence.

Example 2. The facts are the same as in *Example 1*, except that A maintains adequate records during the first week of every month, which indicate that 75 percent of the use of the automobile is in A's business. The invoices from A's business indicate that A's business continued at the same rate during the subsequent weeks of each month so that A's weekly records are representative of each month's business use of the automobile. Thus, the determination that the business/investment use of the automobile for the taxable year is 75 percent is based on sufficient corroborative evidence.

Example 3. B, a sole proprietor and calendar year taxpayer, is a salesman in a large metropolitan area for a company that manufactures household products. For the first three weeks of each month, B uses his own automobile occasionally to travel within the metropolitan area on business. During these three weeks, B's use of the automobile for business purposes does not follow a consistent pattern from day to day or week to week. During the fourth week of each month, B delivers to his customers all the orders taken during the previous month. B's use of his automobile for business purposes, as substantiated by adequate records, is 70 percent of the total use during that fourth week. In this example, a determination based on the records maintained during that fourth week that the business/investment use of the automobile for the taxable year is 70 percent is

not based on sufficient corroborative evidence because use during this week is not representative of use during other periods.

(iii) *Special rules.* See § 1.274-6T for special rules for substantiation by sufficient corroborating evidence with respect to certain listed property.

(4) *Substantiation in exceptional circumstances.* If a taxpayer establishes that, by reason of the inherent nature of the situation—

(i) He was unable to obtain evidence with respect to an element of the expenditure or use which conforms fully to the “adequate records” requirements of paragraph (c)(2) of this section,

(ii) He is unable to obtain evidence with respect to such element which conforms fully to the “other sufficient evidence” requirements of paragraph (c)(3) of this section, and

(iii) He has presented other evidence, with respect to such element, which possesses the highest degree of probative value possible under the circumstances, such other evidence shall be considered to satisfy the substantiation requirements of section 274(d) and this paragraph.

(5) *Loss of records due to circumstances beyond control of the taxpayer.* Where the taxpayer establishes that the failure to produce adequate records is due to the loss of such records through circumstances beyond the taxpayer’s control, such as destruction by fire, flood, earthquake, or other casualty, the taxpayer shall have a right to substantiate a deduction by reasonable reconstruction of his expenditures or use.

(6) *Special rules—(i) Separate expenditure or use—(A) In general.* For the purposes of this section, each separate payment or use by the taxpayer shall ordinarily be considered to constitute a separate expenditure. However, concurrent or repetitious expenses or uses may be substantiated as a single item. To illustrate the above rules, where a taxpayer entertains a business guest at dinner and thereafter at the theater, the payment for dinner shall be considered to constitute one expenditure and the payment for the tickets for the theater shall be considered to constitute a separate expenditure. Similarly, if during a day of business travel a taxpayer makes separate payments

for breakfast, lunch, and dinner, he shall be considered to have made three separate expenditures. However, if during entertainment at a cocktail lounge the taxpayer pays separately for each serving of refreshments, the total amount expended for the refreshments will be treated as a single expenditure. A tip may be treated as a separate expenditure.

(B) *Aggregation of expenditures.* Except as otherwise provided in this section, the account book, diary, log, statement of expense, trip sheet, or similar record required by paragraph (c)(2)(ii) of this section shall be maintained with respect to each separate expenditure and not with respect to aggregate amounts for two or more expenditures. Thus, each expenditure for such items as lodging and air or rail travel shall be recorded as a separate item and not aggregated. However, at the option of the taxpayer, amounts expended for breakfast, lunch, or dinner, may be aggregated. A tip or gratuity which is related to an underlying expense may be aggregated with such expense. In addition, amounts expended in connection with the use of listed property during a taxable year, such as for gasoline or repairs for an automobile, may be aggregated. If these expenses are aggregated, the taxpayer must establish the date and amount, but need not prove the business purpose of each expenditure. Instead, the taxpayer may prorate the expenses based on the total business use of the listed property. For other provisions permitting recording of aggregate amounts in an account book, diary, log, statement of expense, trip sheet, or similar record, see paragraphs (b)(2)(i) and (b)(3) of this section (relating to incidental costs of travel and entertainment).

(C) *Aggregation of business use.* Uses which may be considered part of a single use, for example, a round trip or uninterrupted business use, may be accounted for by a single record. For example, use of a truck to make deliveries at several different locations which begins and ends at the business premises and which may include a stop at the business premises in between two deliveries may be accounted for by

a single record of miles driven. In addition, use of a passenger automobile by a salesman for a business trip away from home over a period of time may be accounted for by a single record of miles traveled. De minimis personal use (such as a stop for lunch on the way between two business stops) is not an interruption of business use.

(ii) *Allocation of expenditure.* For purposes of this section, if a taxpayer has established the amount of an expenditure, but is unable to establish the portion of such amount which is attributable to each person participating in the event giving rise to the expenditure, such amount shall ordinarily be allocated to each participant on a pro rata basis, if such determination is material. Accordingly, the total number of persons for whom a travel or entertainment expenditure is incurred must be established in order to compute the portion of the expenditure allocable to such person.

(iii) *Primary use of a facility.* Section 274(a) (1)(B) and (2)(C) deny a deduction for any expenditure paid or incurred before January 1, 1979, with respect to a facility, or paid or incurred before January 1, 1994, with respect to a club, used in connection with an entertainment activity unless the taxpayer establishes that the facility (including a club) was used primarily for the furtherance of the taxpayer's trade or business. A determination whether a facility before January 1, 1979, or a club before January 1, 1994, was used primarily for the furtherance of the taxpayer's trade or business will depend upon the facts and circumstances of each case. In order to establish that a facility was used primarily for the furtherance of his trade or business, the taxpayer shall maintain records of the use of the facility, the cost of using the facility, mileage or its equivalent (if appropriate), and such other information as shall tend to establish such primary use. Such records of use shall contain—

(A) For each use of the facility claimed to be in furtherance of the taxpayer's trade or business, the elements of an expenditure specified in paragraph (b)(3) of this section, and

(B) For each use of the facility not in furtherance of the taxpayer's trade or

business, an appropriate description of such use, including cost, date, number of persons entertained, nature of entertainment and, if applicable, information such as mileage or its equivalent. A notation such as "personal use" or "family use" would, in the case of such use, be sufficient to describe the nature of entertainment.

If a taxpayer fails to maintain adequate records concerning a facility which is likely to serve the personal purposes of the taxpayer, it shall be presumed that the use of such facility was primarily personal.

(iv) *Additional information.* In a case where it is necessary to obtain additional information, either—

(A) To clarify information contained in records, statements, testimony, or documentary evidence submitted by a taxpayer under the provisions of paragraph (c)(2) or (c)(3) of this section, or

(B) To establish the reliability or accuracy of such records, statements, testimony, or documentary evidence, the district director may, notwithstanding any other provision of this section, obtain such additional information by personal interview or otherwise as he determines necessary to implement properly the provisions of section 274 and the regulations thereunder.

(7) *Specific exceptions.* Except as otherwise prescribed by the Commissioner, substantiation otherwise required by this paragraph is not required for—

(i) Expenses described in section 274(e)(2) relating to food and beverages for employees, section 274(e)(3) relating to expenses treated as compensation, section 274(e)(8) relating to items available to the public, and section 274(e)(9) relating to entertainment sold to customers, and

(ii) Expenses described in section 274(e)(5) relating to recreational, etc., expenses for employees, except that a taxpayer shall keep such records or other evidence as shall establish that such expenses were for activities (or facilities used in connection therewith) primarily for the benefit of employees other than employees who are officers, shareholders or other owners (as defined in section 274(e)(5)), or highly compensated employees.

(d) *Disclosure on returns*—(1) *In general.* The Commissioner may, in his discretion, prescribe rules under which any taxpayer claiming a deduction or credit for entertainment, gifts, travel, or with respect to listed property, or any other person receiving advances, reimbursements, or allowances for such items, shall make disclosure on his tax return with respect to such items. The provisions of this paragraph shall apply notwithstanding the provisions of paragraph (f) of this section.

(2) *Business use of passenger automobiles and other vehicles.* (i) On returns for taxable years beginning after December 31, 1984, taxpayers that claim a deduction or credit with respect to any vehicle are required to answer certain questions providing information about the use of the vehicle. The information required on the tax return relates to mileage (total, business, commuting, and other personal mileage), percentage of business use, date placed in service, use of other vehicles, after-work use, whether the taxpayer has evidence to support the business use claimed on the return, and whether or not the evidence is written.

(ii) Any employer that provides the use of a vehicle to an employee must obtain information from the employee sufficient to complete the employer's tax return. Any employer that provides more than five vehicles to its employees need not include any information on its return. The employer, instead, must obtain the information from its employees, indicate on its return that it has obtained the information, and retain the information received. Any employer—

(A) That can satisfy the requirements of § 1.274-6T(a)(2), relating to vehicles not used for personal purposes,

(B) That can satisfy the requirements of § 1.274-6T(a)(3), relating to vehicles not used for personal purposes other than commuting, or

(C) That treats all use of vehicles by employees as personal use need not obtain information with respect to those vehicles, but instead must indicate on its return that it has vehicles exempt from the requirements of this paragraph (d)(2).

(3) *Business use of other listed property.* On returns for taxable years beginning

after December 31, 1984, taxpayers that claim a deduction or credit with respect to any listed property other than a vehicle (for example, a yacht, airplane, or certain computers) are required to provide the following information:

(i) The date that the property was placed in service,

(ii) The percentage of business use,

(iii) Whether evidence is available to support the percentage of business use claimed on the return, and

(iv) Whether the evidence is written.

(e) *Substantiation of the business use of listed property made available by an employer for use by an employee*—(1) *Employee*—(i) *In general.* An employee may not exclude from gross income as a

working condition fringe any amount of the value of the availability of listed property provided by an employer to the employee, unless the employee substantiates for the period of availability the amount of the exclusion in accordance with the requirements of section 274(d) and either this section or § 1.274-6T.

(ii) *Vehicles treated as used entirely for personal purposes.* If an employer includes the value of the availability of a vehicle (as defined in § 1.61-21(e)(2)) in an employee's gross income without taking into account any exclusion for a working condition fringe allowable under section 132 and the regulations thereunder with respect to the vehicle, the employee must substantiate any deduction claimed under §§ 1.162-25 and 1.162-25T for the business/investment use of the vehicle in accordance with the requirements of section 274(d) and either this section or § 1.274-6T.

(2) *Employer*—(i) *In general.* An employer substantiates its business/investment use of listed property by showing either—

(A) That, based on evidence that satisfies the requirements of section 274(d) or statements submitted by employees that summarize such evidence, all or a portion of the use of the listed property is by employees in the employer's trade or business and, if any employee used the property for personal purposes, the employer included an appropriate amount in the employee's income, or

(B) In the case of a vehicle, the employer treats all use by employees as

personal use and includes an appropriate amount in the employees' income.

(ii) *Reliance on employee records.* For purposes of substantiating the business/investment use of listed property that an employer provides to an employee and for purposes of the information required by paragraph (d)(2) and (3) of this section, the employer may rely on adequate records maintained by the employee or on the employee's own statement if corroborated by other sufficient evidence unless the employer knows or has reason to know that the statement, records, or other evidence are not accurate. The employer must retain a copy of the adequate records maintained by the employee or the other sufficient evidence, if available. Alternatively, the employer may rely on a statement submitted by the employee that provides sufficient information to allow the employer to determine the business/investment use of the property unless the employer knows or has reason to know that the statement is not based on adequate records or on the employee's own statement corroborated by other sufficient evidence. If the employer relies on the employee's statement, the employer must retain only a copy of the statement. The employee must retain a copy of the adequate records or other evidence.

(f) *Reporting and substantiation of expenses of certain employees for travel, entertainment, gifts, and with respect to listed property—(1) In general.* The purpose of this paragraph is to provide rules for reporting and substantiation of certain expenses paid or incurred by employees in connection with the performance of services as employees. For purposes of this paragraph, the term *business expenses* means ordinary and necessary expenses for travel, entertainment, gifts, or with respect to listed property which are deductible under section 162, and the regulations thereunder, to the extent not disallowed by section 262, 274(c), and 280F. Thus, the term *business expenses* does not include personal, living, or family expenses disallowed by section 262, travel expenses disallowed by section 274(c), or cost recovery deductions and credits with respect to listed property disallowed by section

280F(d)(3) because the use of such property is not for the convenience of the employer and required as a condition of employment. Except as provided in paragraph (f)(2), advances, reimbursements, or allowances for such expenditures must be reported as income by the employee.

(2) *Reporting of expenses for which the employee is required to make an adequate accounting to his employer—(i) Reimbursements equal to expenses.* For purposes of computing tax liability, an employee need not report on his tax return business expenses for travel, transportation, entertainment, gifts, or with respect to listed property, paid or incurred by him solely for the benefit of his employer for which he is required to, and does, make an adequate accounting to his employer (as defined in paragraph (f)(4) of this section) and which are charged directly or indirectly to the employer (for example, through credit cards) or for which the employee is paid through advances, reimbursements, or otherwise, provided that the total amount of such advances, reimbursements, and charges is equal to such expenses.

(ii) *Reimbursements in excess of expenses.* In case the total of the amounts charged directly or indirectly to the employer or received from the employer as advances, reimbursements, or otherwise, exceeds the business expenses paid or incurred by the employee and the employee is required to, and does, make an adequate accounting to his employer for such expenses, the employee must include such excess (including amounts received for expenditures not deductible by him) in income.

(iii) *Expenses in excess of reimbursements.* If an employee incurs deductible business expenses on behalf of his employer which exceed the total of the amounts charged directly or indirectly to the employer and received from the employer as advances, reimbursements, or otherwise, and the employee makes an adequate accounting to his employer, the employee must be able to substantiate any deduction for such excess with such records and supporting evidence as will substantiate each element of an expenditure (described in paragraph (b) of this section)

in accordance with paragraph (c) of this section.

(3) *Reporting of expenses for which the employee is not required to make an adequate accounting to his employer.* If the employee is not required to make an adequate accounting to his employer for his business expenses or, though required, fails to make an adequate accounting for such expenses, he must submit, as a part of his tax return, the appropriate form issued by the Internal Revenue Service for claiming deductions for employee business expenses (e.g., Form 2106, Employee Business Expenses, for 1985) and provide the information requested on that form, including the information required by paragraph (d)(2) and (3) of this section if the employee's business expenses are with respect to the use of listed property. In addition, the employee must maintain such records and supporting evidence as will substantiate each element of an expenditure or use (described in paragraph (b) of this section) in accordance with paragraph (c) of this section.

(4) [Reserved]. For further guidance, see § 1.274-5(f)(4).

(5) *Substantiation of expenditures by certain employees.* An employee who makes an adequate accounting to his employer within the meaning of this paragraph will not again be required to substantiate such expense account information except in the following cases:

(i) An employee whose business expenses exceed the total of amounts charged to his employer and amounts received through advances, reimbursements or otherwise and who claims a deduction on his return for such excess,

(ii) An employee who is related to his employer within the meaning of section 267(b), but for this purpose the percentage referred to in section 267(b)(2) shall be 10 percent, and

(iii) Employees in cases where it is determined that the accounting procedures used by the employer for the reporting and substantiation of expenses by such employees are not adequate, or where it cannot be determined that such procedures are adequate. The district director will determine whether the employer's accounting procedures are adequate by considering the facts

and circumstances of each case, including the use of proper internal controls. For example, an employer should require that an expense account be verified and approved by a reasonable person other than the person incurring such expenses. Accounting procedures will be considered inadequate to the extent that the employer does not require an adequate accounting from his employees as defined in paragraph (f)(4) of this section, or does not maintain such substantiation. To the extent an employer fails to maintain adequate accounting procedures he will thereby obligate his employees to substantiate separately their expense account information.

(g) [Reserved]. For further guidance, see § 1.274-5(g).

(h) *Reporting and substantiation of certain reimbursements of persons other than employees—(1) In general.* The purpose of this paragraph is to provide rules for the reporting and substantiation of certain expenses for travel, entertainment, gifts, or with respect to listed property paid or incurred by one person (hereinafter termed “independent contractor”) in connection with services performed for another person other than an employer (hereinafter termed “client or customer”) under a reimbursement or other expense allowance arrangement with such client or customer. For purposes of this paragraph, the term *business expenses* means ordinary and necessary expenses for travel, entertainment, gifts, or with respect to listed property which are deductible under section 162, and the regulations thereunder, to the extent not disallowed by sections 262 and 274(c). Thus, the term *business expenses* does not include personal, living, or family expenses disallowed by section 262 or travel expenses disallowed by section 274(c), and reimbursements for such expenditures must be reported as income by the independent contractor. For purposes of this paragraph, the term *reimbursements* means advances, allowances, or reimbursements received by an independent contractor for travel, entertainment, gifts, or with respect to listed property in connection with the performance by him of services for his

client or customer, under a reimbursement or other expense allowance arrangement with his client or customer, and includes amounts charged directly or indirectly to the client or customer through credit card systems or otherwise. See paragraph (j) of this section relating to the substantiation of meal expenses while traveling away from home.

(2) *Substantiation by independent contractors.* An independent contractor shall substantiate, with respect to his reimbursements, each element of an expenditure (described in paragraph (b) of this section) in accordance with the requirements of paragraph (c) of this section; and, to the extent he does not so substantiate, he shall include such reimbursements in income. An independent contractor shall so substantiate a reimbursement for entertainment regardless of whether he accounts (within the meaning of paragraph (h)(3) of this section) for such entertainment.

(3) *Accounting to a client or customer under section 274(e)(4)(B).* Section 274(e)(4)(B) provides that section 274(a) (relating to disallowance of expenses for entertainment) shall not apply to expenditures for entertainment for which an independent contractor has been reimbursed if the independent contractor accounts to his client or customer, to the extent provided by section 274(d). For purposes of section 274(e)(4)(B), an independent contractor shall be considered to account to his client or customer for an expense paid or incurred under a reimbursement or other expense allowance arrangement with his client or customer if, with respect to such expense for entertainment, he submits to his client or customer adequate records or other sufficient evidence conforming to the requirements of paragraph (c) of this section.

(4) *Substantiation by client or customer.* A client or customer shall not be required to substantiate, in accordance with the requirements of paragraph (c) of this section, reimbursements to an independent contractor for travel and gifts, or for entertainment unless the independent contractor has accounted to him (within the meaning of section 274(e)(4)(B) and paragraph (h)(3) of this section) for such entertainment. If an

independent contractor has so accounted to a client or customer for entertainment, the client or customer shall substantiate each element of the expenditure (as described in paragraph (b) of this section) in accordance with the requirements of paragraph (c) of this section.

(i) [Reserved]

(j) [Reserved]. For further guidance, see § 1.274-5(j).

(k) and (l) [Reserved] For further guidance, see § 1.274-5(k) and (l).

(m) *Effective date.* Section 274(d), as amended by the Tax Reform Act of 1984 and Public Law 99-44, and this section (except as provided in paragraph (d)(2) and (3) of this section) apply with respect to taxable years beginning after December 31, 1985. Section 274(d) and this section apply to any deduction or credit claimed in a taxable year beginning after December 31, 1985, with respect to any listed property, regardless of the taxable year in which the property was placed in service. However, except as provided in § 1.132-5(h) with respect to qualified nonpersonal use vehicles, the substantiation requirements of section 274(d) and this section do not apply to the determination of an employee's working condition fringe exclusion or to the determination under § 1.162-25(b) of an employee's deduction before the date that those requirements apply, under this paragraph (m), to the employer, if the employer is taxable. Paragraph (j)(3) of this section applies to expenses paid or incurred after September 30, 2002.

[T.D. 8061, 50 FR 46014, Nov. 6, 1985, as amended by T.D. 8063, 50 FR 52312, Dec. 23, 1985; T.D. 8276, 54 FR 51027, Dec. 12, 1989; T.D. 8451, 57 FR 57669, Dec. 7, 1992; T.D. 8601, 60 FR 36995, July 19, 1995; T.D. 8715, 62 FR 13990, Mar. 25, 1997; T.D. 8864, 65 FR 4123, Jan. 26, 2000; T.D. 9020, 67 FR 68513, Nov. 12, 2002; T.D. 9020, 67 FR 72273, Dec. 4, 2002; T.D. 9064, July 1, 2003; T.D. 9483, 75 FR 27937, May 19, 2010]

§ 1.274-6 Expenditures deductible without regard to trade or business or other income producing activity.

The provisions of §§ 1.274-1 through 1.274-5, inclusive, do not apply to any deduction allowable to the taxpayer without regard to its connection with the taxpayer's trade or business or other income producing activity. Examples of such items are interest,

taxes such as real property taxes, and casualty losses. Thus, if a taxpayer owned a fishing camp, the taxpayer could still deduct mortgage interest and real property taxes in full even if deductions for its use are not allowable under section 274(a) and § 1.274-2. In the case of a taxpayer which is not an individual, the provisions of this section shall be applied as if it were an individual. Thus, if a corporation sustains a casualty loss on an entertainment facility used in its trade or business, it could deduct the loss even though deductions for the use of the facility are not allowable.

[T.D. 8051, 50 FR 36576, Sept. 9, 1985]

§ 1.274-6T Substantiation with respect to certain types of listed property for taxable years beginning after 1985 (temporary).

(a) *Written policy statements as to vehicles*—(1) *In general.* Two types of written policy statements satisfying the conditions described in paragraph (a)(2) and (3) of this section, if initiated and kept by an employer to implement a policy of no personal use, or no personal use except for commuting, of a vehicle provided by the employer, qualify as sufficient evidence corroborating the taxpayer's own statement and therefore will satisfy the employer's substantiation requirements under section 274(d). Therefore, the employee need not keep a separate set of records for purposes of the employer's substantiation requirements under section 274(d) with respect to use of a vehicle satisfying these written policy statement rules. A written policy statement adopted by a governmental unit as to employee use of its vehicles is eligible for these exceptions to the section 274(d) substantiation rules. Thus, a resolution of a city council or a provision of state law or a state constitution would qualify as a written policy statement, as long as the conditions described in paragraph (a)(2) and (3) of this section are met.

(2) *Vehicles not used for personal purposes*—(i) *Employers.* A policy statement that prohibits personal use by an employee satisfies an employer's substantiation requirements under section 274(d) if all the following conditions are met—

(A) The vehicle is owned or leased by the employer and is provided to one or more employees for use in connection with the employer's trade or business,

(B) When the vehicle is not used in the employer's trade or business, it is kept on the employer's business premises, unless it is temporarily located elsewhere, for example, for maintenance or because of a mechanical failure,

(C) No employee using the vehicle lives at the employer's business premises,

(D) Under a written policy of the employer, neither an employee, nor any individual whose use would be taxable to the employee, may use the vehicle for personal purposes, except for de minimis personal use (such as a stop for lunch between two business deliveries), and

(E) The employer reasonably believes that, except for de minimis use, neither the employee, nor any individual whose use would be taxable to the employee, uses the vehicle for any personal purpose.

There must also be evidence that would enable the Commissioner to determine whether the use of the vehicle meets the preceding five conditions.

(ii) *Employees.* An employee, in lieu of substantiating the business/investment use of an employer-provided vehicle under § 1.274-5T, may treat all use of the vehicle as business/investment use if the following conditions are met—

(A) The vehicle is owned or leased by the employer and is provided to one or more employees for use in connection with the employer's trade or business,

(B) When the vehicle is not used in the employer's trade or business, it is kept on the employer's business premises, unless it is temporarily located elsewhere, for example, for maintenance or because of a mechanical failure,

(C) No employee using the vehicle lives at the employer's business premises,

(D) Under a written policy of the employer, neither the employee, nor any individual whose use would be taxable to the employee, may use the vehicle for personal purposes, except for de minimis personal use (such as a stop

for lunch between two business deliveries), and

(E) Except for de minimis personal use, neither the employee, nor any individual whose use would be taxable to the employee, uses the vehicle for any personal purpose.

There must also be evidence that would enable the Commissioner to determine whether the use of the vehicle meets the preceding five conditions.

(3) *Vehicles not used for personal purposes other than commuting*—(i) *Employers*. A policy statement that prohibits personal use by an employee, other than commuting, satisfies an employer's substantiation requirements under section 274(d) if all the following conditions are met—

(A) The vehicle is owned or leased by the employer and is provided to one or more employees for use in connection with the employer's trade or business and is used in the employer's trade or business,

(B) For bona fide noncompensatory business reasons, the employer requires the employee to commute to and/or from work in the vehicle,

(C) The employer has established a written policy under which neither the employee, nor any individual whose use would be taxable to the employee, may use the vehicle for personal purposes, other than for commuting or de minimis personal use (such as a stop for a personal errand on the way between a business delivery and the employee's home),

(D) The employer reasonably believes that, except for de minimis personal use, neither the employee, nor any individual whose use would be taxable to the employee, uses the vehicle for any personal purpose other than commuting,

(E) The employee required to use the vehicle for commuting is not a control employee (as defined in § 1.61-2T(f) (5) and (6)) required to use an automobile (as defined in § 1.61-2T(d)(1)(ii)), and

(F) The employer accounts for the commuting use by including in the employee's gross income the commuting value provided in § 1.61-2T(f)(3) (to the extent not reimbursed by the employee).

There must be evidence that would enable the Commissioner to determine

whether the use of the vehicle met the preceding six conditions.

(ii) *Employees*. An employee, in lieu of substantiating the business/investment use of an employer-provided vehicle under § 1.274-5T, may substantiate any exclusion allowed under section 132 for a working condition fringe by including in income the commuting value of the vehicle (determined by the employer pursuant to § 1.61-2T(f)(3)) if all the following conditions are met:

(A) The vehicle is owned or leased by the employer and is provided to one or more employees for use in connection with the employer's trade or business and is used in the employer's trade or business,

(B) For bona fide noncompensatory business reasons, the employer requires the employee to commute to and/or from work in the vehicle,

(C) Under a written policy of the employer, neither the employee, nor any individual whose use would be taxable to the employee, may use the vehicle for personal purposes, other than for commuting or de minimis personal use (such as a stop for a personal errand on the way between a business delivery and the employee's home),

(D) Except for de minimis personal use, neither the employee, nor any individual whose use would be taxable to the employee, uses the vehicle for any personal purpose other than commuting,

(E) The employee required to use the vehicle for commuting is not a control employee (as defined in § 1.61-2T(f) (5) and (6)) required to use an automobile (as defined in § 1.61-2T(d)(1)(ii)), and

(F) The employee includes in gross income the commuting value determined by the employer as provided in § 1.61-2T(f)(3) (to the extent that the employee does not reimburse the employer for the commuting use).

There must also be evidence that would enable the Commissioner to determine whether the use of the vehicle met the preceding six conditions.

(b) *Vehicles used in connection with the business of farming*—(1) *In general*. If, during a taxable year or shorter period, a vehicle, not otherwise described in section 274(i), § 1.274-5T(k), or paragraph (a) (2) or (3) of this section, is owned or leased by an employer and

used during most of a normal business day directly in connection with the business of farming (as defined in paragraph (b)(2) of this section), the employer, in lieu of substantiating the use of the vehicle as prescribed in § 1.274-5T(b)(6)(i)(B), may determine any deduction or credit with respect to the vehicle as if the business/investment use (as defined in § 1.280F-6T(d)(3)(i)) and the qualified business use (as defined in § 1.280F-6T(d)(2)) of the vehicle in the business of farming for the taxable year or shorter period were 75 percent plus that percentage, if any, attributable to an amount included in an employee's gross income. If the vehicle is also available for personal use by employees, the employer must include the value of that personal use in the gross income of the employees, allocated among them in the manner prescribed in § 1.132-5T(g).

(2) *Directly in connection with the business of farming.* The phrase *directly in connection with the business of farming* means that the vehicle must be used directly in connection with the business of operating a farm (i.e., cultivating land or raising or harvesting any agricultural or horticultural commodity, or the raising, shearing, feeding, caring for, training, and management of animals) or incidental thereto (for example, trips to the feed and supply store).

(3) *Substantiation by employees.* If an employee is provided with the use of a vehicle to which this paragraph (b) applies, the employee may, in lieu of substantiating the business/investment use of the vehicle in the manner prescribed in § 1.274-5T, substantiate any exclusion allowed under section 132 for a working condition fringe as if the business/investment use of the vehicle were 75 percent, plus that percentage, if any, determined by the employer to be attributable to the use of the vehicle by individuals other than the employee, provided that the employee includes in gross income the amount determined by the employer as includible in the employee's gross income. See § 1.132-5T(g)(3) for examples illustrating the allocation of use of a vehicle among employees.

(c) *Vehicles treated as used entirely for personal purposes.* An employer may

satisfy the substantiation requirements under section 274(d) for a taxable year or shorter period with respect to the business use of a vehicle that is provided to an employee by including the value of the availability of the vehicle during the relevant period in the employee's gross income without any exclusion for a working condition fringe with respect to the vehicle and, if required, by withholding any taxes. Under these circumstances, the employer's business/investment use of the vehicle during the relevant period is 100 percent. The employer's qualified business use of the vehicle is dependent upon the relationship of the employee to the employer (see § 1.280F-6T(d)(2)).

(d) *Limitation.* If a taxpayer chooses to satisfy the substantiation requirements of section 274(d) and § 1.274-5T by using one of the methods prescribed in paragraphs (a) (2) or (3), (b), or (c) of this section and files a return with the Internal Revenue Service for a taxable year consistent with such choice, the taxpayer may not later use another of these methods. Similarly, if a taxpayer chooses to satisfy the substantiation requirements of section 274(d) in the manner prescribed in § 1.274-5T and files a return with the Internal Revenue Service for a taxable year consistent with such choice, the taxpayer may not later use a method prescribed in paragraph (a) (2) or (3), (b), or (c) of this section. This rule applies to an employee for purposes of substantiating any working condition fringe exclusion as well as to an employer. For example, if an employee excludes on his federal income tax return for a taxable year 90 percent of the value of the availability of an employer-provided automobile on the basis of records that allegedly satisfy the "adequate records" requirement of § 1.274-5T(c)(2), and that requirement is not satisfied, then the employee may not satisfy the substantiation requirements of section 274(d) for the taxable year by any method prescribed in this section, but may present other corroborative evidence as prescribed in § 1.274-5T(c)(3).

(e) *Definitions—(1) In general.* The definitions provided in this paragraph (e) apply for purposes of section 274(d), § 1.274-5T, and this section.

(2) *Employer and employee.* The terms *employer* and *employee* include the following:

- (i) A sole proprietor shall be treated as both an employer and employee,
- (ii) A partnership shall be treated as an employer of its partners, and
- (iii) A partner shall be treated as an employee of the partnership.

(3) *Automobile.* The term *automobile* has the same meaning as prescribed in § 1.61-2T(d)(1)(ii).

(4) *Vehicle.* The term *vehicle* has the same meaning as prescribed in § 1.61-2T(e)(2).

(5) *Personal use.* *Personal use* by an employee of an employer-provided vehicle includes use in any trade or business other than the trade or business of being the employee of the employer providing the vehicle.

(f) *Effective date.* This section is effective for taxable years beginning after December 31, 1985.

[T.D. 8061, 50 FR 46037, Nov. 6, 1985, as amended by T.D. 8063, 50 FR 52312, Dec. 23, 1985]

§ 1.274-7 Treatment of certain expenditures with respect to entertainment-type facilities.

If deductions are disallowed under § 1.274-2 with respect to any portion of a facility, such portion shall be treated as an asset which is used for personal, living, and family purposes (and not as an asset used in a trade or business). Thus, the basis of such a facility will be adjusted for purposes of computing depreciation deductions and determining gain or loss on the sale of such facility in the same manner as other property (for example, a residence) which is regarded as used partly for business and partly for personal purposes.

[T.D. 6659, 28 FR 6507, June 25, 1963]

§ 1.274-8 Effective/applicability date.

Except as provided in §§ 1.274-2(a), 1.274-2(e), 1.274-2(f)(2)(iv)(F), and 1.274-5, §§ 1.274-1 through 1.274-7 apply to taxable years ending after December 31, 1962.

[T.D. 9625, 78 FR 46504, Aug. 1, 2013]

§ 1.274-9 Entertainment provided to specified individuals.

(a) *In general.* Paragraphs (e)(2) and (e)(9) of section 274 provide exceptions to the disallowance of section 274(a) for expenses for entertainment, amusement, or recreation activities, or for an entertainment facility. In the case of a specified individual (as defined in paragraph (b) of this section), the exceptions of paragraphs (e)(2) and (e)(9) of section 274 apply only to the extent that the expenses do not exceed the amount of the expenses treated as compensation (under section 274(e)(2)) or as income (under section 274(e)(9)) to the specified individual. The amount disallowed is reduced by any amount that the specified individual reimburses a taxpayer for the entertainment.

(b) *Specified individual defined.* (1) A specified individual is an individual who is subject to section 16(a) of the Securities Act of 1934 in relation to the taxpayer, or an individual who would be subject to section 16(a) if the taxpayer were an issuer of equity securities referred to in that section. Thus, for example, a specified individual is an officer, director, or more than 10 percent owner of a corporation taxed under subchapter C or subchapter S or a personal service corporation. A specified individual includes every individual who—

- (i) Is the direct or indirect beneficial owner of more than 10 percent of any class of any registered equity (other than an exempted security);
- (ii) Is a director or officer of the issuer of the security;
- (iii) Would be the direct or indirect beneficial owner of more than 10 percent of any class of a registered security if the taxpayer were an issuer of equity securities; or

(iv) Is comparable to an officer or director of an issuer of equity securities.

(2) For partnership purposes, a specified individual includes any partner that holds more than a 10 percent equity interest in the partnership, or any general partner, officer, or managing partner of a partnership.

(3) For purposes of this section, *officer* has the same meaning as in 17 CFR § 240.16a-1(f).

(4) A specified individual includes a director or officer of a tax-exempt entity.

(5) A specified individual of a taxpayer includes a specified individual of a party related to the taxpayer within the meaning of section 267(b) or section 707(b).

(c) *Specified individual treated as recipient of entertainment provided to others.* For purposes of section 274(a), a specified individual is treated as the recipient of entertainment provided to another individual because of the relationship of the other individual to the specified individual if the entertainment is a fringe benefit to the specified individual under section 61(a)(1) (without regard to any exclusions from gross income). Thus, expenses allocable to entertainment provided to the other individual are attributed to the specified individual for purposes of determining the amount of disallowed expenses.

(d) *Entertainment use of aircraft by specified individuals.* For rules relating to entertainment use of aircraft by specified individuals, see § 1.274-10.

(e) *Effective/applicability date.* This section applies to taxable years beginning after August 1, 2012.

[T.D. 9597, 77 FR 45483, Aug. 1, 2012]

§ 1.274-10 Special rules for aircraft used for entertainment.

(a) *Use of an aircraft for entertainment—(1) In general.* Section 274(a) disallows a deduction for certain expenses for entertainment, amusement, or recreation activities, or for an entertainment facility. Under section 274(a) and this section, no deduction otherwise allowable under chapter 1 is allowed for expenses for the use of a taxpayer-provided aircraft for entertainment, except as provided in paragraph (a)(2) of this section.

(2) *Exceptions—(i) In general.* Paragraph (a)(1) of this section does not apply to deductions for expenses for business entertainment air travel or to deductions for expenses that meet the exceptions of section 274(e), § 1.274-2(f), and this section. Section 274(e)(2) and (e)(9) provides certain exceptions to the disallowance of section 274(a) for expenses for goods, services, and facilities

for entertainment, recreation, or amusement.

(ii) *Expenses treated as compensation—(A) Employees who are not specified individuals.* Section 274(a), § 1.274-2(a) through (d), and paragraph (a)(1) of this section, in accordance with section 274(e)(2)(A), do not apply to expenses for entertainment air travel provided to an employee who is not a specified individual to the extent that a taxpayer—

(1) Properly treats the expenses relating to the recipient of entertainment as compensation to an employee under chapter 1 and as wages to the employee for purposes of chapter 24; and

(2) Treats the proper amount as compensation to the employee under § 1.61-21.

(B) *Persons who are not employees and are not specified individuals.* Section 274(a), § 1.274-2(a) through (d), and paragraph (a)(1) of this section, in accordance with section 274(e)(9), do not apply to expenses for entertainment air travel provided to a person who is not an employee and is not a specified individual to the extent that the expenses are includible in the income of that person. This exception does not apply to any amount paid or incurred by the taxpayer that is required to be included in any information return filed by the taxpayer under part III of subchapter A of chapter 61 and is not so included.

(C) *Specified individuals.* Section 274(a), § 1.274-2(a) through (d), and paragraph (a)(1) of this section, in accordance with section 274(e)(2)(B), do not apply to expenses for entertainment air travel of a specified individual to the extent that the amount of the expenses do not exceed the sum of—

(1) The amount treated as compensation to or included in the income of the specified individual in the manner specified under paragraph (a)(2)(ii)(A)(1) of this section (if the specified individual is an employee) or under paragraph (a)(2)(ii)(B) of this section (if the specified individual is not an employee); and

(2) Any amount the specified individual reimburses the taxpayer.

(iii) *Travel on regularly scheduled commercial airlines.* Section 274(a), § 1.274-

2(a) through (d), and paragraph (a)(1) of this section do not apply to expenses for entertainment air travel that a taxpayer that is a commercial passenger airline provides to specified individuals of the taxpayer on the taxpayer's regularly scheduled flights on which at least 90 percent of the seats are available for sale to the public to the extent the expenses are includible in the income of the recipient of the entertainment in the manner specified under paragraph (a)(2)(ii)(A)(1) of this section (if the specified individual is an employee) or under paragraph (a)(2)(ii)(B) of this section (if the specified individual is not an employee).

(b) *Definitions.* The definitions in this paragraph (b) apply for purposes of this section.

(1) *Entertainment.* For the definition of *entertainment* for purposes of this section, see § 1.274-2(b)(1). Entertainment does not include personal travel that is not for entertainment purposes. For example, travel to attend a family member's funeral is not entertainment.

(2) *Entertainment air travel.* *Entertainment air travel* is any travel aboard a taxpayer-provided aircraft for entertainment purposes.

(3) *Business entertainment air travel.* *Business entertainment air travel* is any entertainment air travel aboard a taxpayer-provided aircraft that is directly related to the active conduct of the taxpayer's trade or business or related to an expenditure directly preceding or following a substantial and bona fide business discussion and associated with the active conduct of the taxpayer's trade or business. See § 1.274-2(a)(1)(i) and (ii). Air travel is not business entertainment air travel merely because a taxpayer-provided aircraft is used for the travel as a result of a bona fide security concern under § 1.132-5(m).

(4) *Taxpayer-provided aircraft.* A *taxpayer-provided aircraft* is any aircraft owned by, leased to, or chartered to, a taxpayer or any party related to the taxpayer (within the meaning of section 267(b) or section 707(b)).

(5) *Specified individual.* For rules relating to the definition of a specified individual, see § 1.274-9.

(c) *Amount disallowed.* Except as otherwise provided, the amount disallowed under this section for an entertain-

ment flight by a specified individual is the amount of expenses allocable to the entertainment flight of the specified individual under paragraph (e)(2), (e)(3), or (f)(3) of this section, reduced (but not below zero) by the amount the taxpayer treats as compensation or reports as income under paragraph (a)(2)(ii)(C)(1) of this section to the specified individual, plus any amount the specified individual reimburses the taxpayer.

(d) *Expenses subject to disallowance under this section—(1) Definition of expenses.* In determining the amount of expenses subject to disallowance under this section, a taxpayer must include all of the expenses of operating the aircraft, including all fixed and variable expenses the taxpayer deducts in the taxable year. These expenses include, but are not limited to, salaries for pilots, maintenance personnel, and other personnel assigned to the aircraft; meal and lodging expenses of flight personnel; take-off and landing fees; costs for maintenance flights; costs of on-board refreshments, amenities and gifts; hangar fees (at home or away); management fees; costs of fuel, tires, maintenance, insurance, registration, certificate of title, inspection, and depreciation; interest on debt secured by or properly allocated (within the meaning of § 1.163-8T) to an aircraft; and all costs paid or incurred for aircraft leased or chartered to the taxpayer.

(2) *Leases or charters to third parties.* Expenses allocable to a lease or charter of a taxpayer's aircraft to an unrelated (as determined under section 267(b) or 707(b)) third-party in a bona-fide business transaction for adequate and full consideration are excluded from the definition of expenses in paragraph (d)(1) of this section. Only expenses allocable to the lease or charter period are excluded under this paragraph (d)(2).

(3) *Straight-line method permitted for determining depreciation disallowance under this section—(i) In general.* In lieu of the amount of depreciation deducted in the taxable year, solely for purposes of paragraph (d)(1) of this section, a taxpayer may elect to treat as its depreciation deduction the amount that would result from using the straight-line method of depreciation over the

class life (as defined by section 168(i)(1) and using the applicable convention under section 168(d)) of an aircraft, even if the taxpayer uses a different methodology to calculate depreciation for the aircraft under other sections of the Internal Revenue Code (for example, section 168). If the property qualifies for the additional first-year depreciation deduction provided by, for example, section 168(k), 168(n), 1400L(b), or 1400N(d), depreciation for purposes of this straight-line election is determined on the unadjusted depreciable basis (as defined in § 1.168(b)-1(a)(3)) of the property. However, the amount of depreciation disallowed as a result of this paragraph (d)(3) for any taxable year cannot exceed a taxpayer's allowable depreciation for that taxable year. For purposes of this section, a taxpayer that elects to use the straight-line method and class life under this paragraph (d)(3) for any aircraft it operates must use that methodology for all depreciable aircraft it operates and must continue to use the methodology for the entire period the taxpayer uses any depreciable aircraft.

(ii) *Aircraft placed in service in earlier taxable years.* The amount of depreciation for purposes of this paragraph (d)(3) for aircraft placed in service in taxable years before the taxable year of the election is determined by applying the straight-line method of depreciation to the unadjusted depreciable basis (or, for property acquired in an exchange to which section 1031 applies, the basis of the aircraft as determined under section 1031(d)) and over the class life (using the applicable convention under section 168(d)) of the aircraft as though the taxpayer used that methodology from the year the aircraft was placed in service.

(iii) *Manner of making and revoking election.* A taxpayer makes the election under this paragraph (d)(3) by filing an income tax return for the taxable year that determines the taxpayer's expenses for purposes of paragraph (d)(1) of this section by computing depreciation under this paragraph (d)(3). A taxpayer may revoke an election only for compelling circumstances upon consent of the Commissioner by private letter ruling.

(4) *Aggregation of aircraft—(i) In general.* A taxpayer may aggregate the expenses of aircraft of similar cost profiles for purposes of calculating disallowed expenses under paragraph (c) of this section.

(ii) *Similar cost profiles.* Aircraft are of similar cost profiles if their operating costs per mile or per hour of flight are comparable. Aircraft must have the same engine type (jet or propeller) and the same number of engines to have similar cost profiles. Other factors to be considered in determining whether aircraft have similar cost profiles include, but are not limited to, maximum take-off weight, payload, passenger capacity, fuel consumption rate, age, maintenance costs, and depreciable basis.

(5) *Authority for establishing safe harbors for determining expenses.* The Commissioner may establish in published guidance, see § 601.601(d)(2) of this chapter, one or more safe harbor methods under which a taxpayer may determine the amount of expenses paid or incurred for entertainment flights.

(e) *Allocation of expenses—(1) General rule.* For purposes of determining the expenses allocated to entertainment air travel of a specified individual under paragraph (a)(2)(ii)(C) of this section, a taxpayer must use either the occupied seat hours or miles method of paragraph (e)(2) of this section or the flight-by-flight method of paragraph (e)(3) of this section. A taxpayer must use the chosen method for all flights of all aircraft for the taxable year.

(2) *Occupied seat hours or miles method—(i) In general.* The occupied seat hours or miles method determines the amount of expenses allocated to a particular entertainment flight of a specified individual based on the occupied seat hours or miles for an aircraft for the taxable year. Under this method, a taxpayer may choose to use either occupied seat hours or miles for the taxable year to determine the amount of expenses allocated to entertainment flights of specified individuals, but must use occupied seat hours or miles consistently for all flights of all aircraft for the taxable year.

(ii) *Computation under the occupied seat hours or miles method.* The amount

of expenses allocated to an entertainment flight taken by a specified individual is computed under the occupied seat hours or miles method by determining—

(A) The total expenses for the year under paragraph (d) of this section for the aircraft or group of aircraft (if aggregated under paragraph (d)(4) of this section), as applicable;

(B) The number of occupied seat hours or miles for the taxable year for the aircraft or group of aircraft by totaling the occupied seat hours or miles of all flights in the taxable year flown by the aircraft or group of aircraft, as applicable. The occupied seat hours or miles for a flight is the number of hours or miles flown for the flight multiplied by the number of seats occupied on that flight. For example, a flight of 6 hours with three passengers results in 18 occupied seat hours;

(C) The cost per occupied seat hour or mile for the aircraft or group of aircraft, as applicable, by dividing the total expenses under paragraph (e)(2)(ii)(A) of this section by the total number of occupied seat hours or miles under paragraph (e)(2)(ii)(B) of this section; and

(D) The amount of expenses allocated to an entertainment flight taken by a specified individual by multiplying the number of hours or miles of the flight by the cost per occupied hour or mile for that aircraft or group of aircraft, as applicable, as determined under paragraph (e)(2)(ii)(C) of this section.

(iii) *Allocation of expenses of multi-leg trips involving both business and entertainment legs.* A taxpayer that uses the occupied seat hours or miles allocation method must allocate the expenses of a trip by a specified individual that involves at least one segment for business and one segment for entertainment between the business travel and the entertainment travel unless none of the expenses for the entertainment segment are disallowed. The entertainment cost of a multi-leg trip is the total cost of the flights (by occupied seat hours or miles) minus the cost of the flights that would have been taken without the entertainment segment or segments.

(iv) *Examples.* The following examples illustrate the provisions of this paragraph (e)(2):

Example 1. (i) A taxpayer-provided aircraft is used for Flights 1, 2, and 3, of 5 hours, 5 hours, and 4 hours, respectively, during the Taxpayer's taxable year. Each flight carries four passengers. On Flight 1, none of the passengers is a specified individual. On Flight 2, passengers A and B are specified individuals traveling for entertainment purposes and passengers C and D are not specified individuals. For Flight 2, Taxpayer treats \$1,200 as compensation to A, and B reimburses Taxpayer \$500. On Flight 3, all four passengers (A, B, E, and F) are specified individuals traveling for entertainment purposes. For Flight 3, Taxpayer treats \$1,300 each as compensation to A, B, E, and F. Taxpayer incurs \$56,000 in expenses for the operation of the aircraft for the taxable year. The aircraft is operated for 56 occupied seat hours for the period (four passengers times 5 hours (20 occupied seat hours) for Flight 1, plus four passengers times 5 hours (20 occupied seat hours) for Flight 2, plus four passengers times 4 hours (16 occupied seat hours) for Flight 3. The cost per occupied seat hour is \$1,000 (\$56,000/56 hours).

(ii) For purposes of determining the amount disallowed (to the extent not treated as compensation or reimbursed) for entertainment provided to specified individuals, \$5,000 ($\$1,000 \times 5$ hours) each is allocable to A and B for Flight 2, and \$4,000 ($\$1,000 \times 4$ hours) each is allocable to A, B, E, and F for Flight 3.

(iii) For Flight 2, because Taxpayer treats \$1,200 as compensation to A, and B reimburses Taxpayer \$500, Taxpayer may deduct \$1,700 of the cost of Flight 2 allocable to A and B. The deduction for the remaining \$8,300 cost allocable to entertainment provided to A and B on Flight 2 is disallowed (for A, \$5,000 less the \$1,200 treated as compensation, and for B, \$5,000 less the \$500 reimbursed).

(iv) For Flight 3, because Taxpayer treats \$1,300 each as compensation to A, B, E, and F, Taxpayer may deduct \$5,200 of the cost of Flight 3. The deduction for the remaining \$10,800 cost allocable to entertainment provided to A, B, E, and F on Flight 3 is disallowed (\$4,000 less the \$1,300 treated as compensation to each specified individual).

Example 2. (i) G, a specified individual, is the sole passenger on an aircraft that makes three flights. First, G travels on a two-hour flight from City A to City B for business purposes. G then travels on a three-hour flight from City B to City C for entertainment purposes, and returns from City C to City A on a four-hour flight. G's flights have resulted in nine occupied seat hours (two for the first segment, plus three for the second segment,

§ 1.274-10

26 CFR Ch. I (4-1-17 Edition)

plus four for the third segment). If G had returned directly to City A from City B, the flights would have resulted in four occupied seat hours.

(ii) Under paragraph (e)(2)(iii) of this section, five occupied seat hours are allocable to G's entertainment (nine total occupied seat hours minus the four occupied seat hours that would have resulted if the travel had been a roundtrip business trip without the entertainment segment). If Taxpayer's cost per occupied seat hour for the year is \$1,000, \$5,000 is allocated to G's entertainment use of the aircraft (\$1,000 × five occupied seat hours). The amount disallowed is \$5,000 minus the total of any amount the Taxpayer treats as compensation to G plus any amount that G reimburses Taxpayer.

(3) *Flight-by-flight method*—(i) *In general*. The flight-by-flight method determines the amount of expenses allocated to a particular entertainment flight of a specified individual on a flight-by-flight basis by allocating expenses to individual flights and then to a specified individual traveling for entertainment purposes on that flight.

(ii) *Allocation of expenses*. A taxpayer using the flight-by-flight method must combine all expenses (as defined in paragraph (d)(1) of this section) for the taxable year for the aircraft or group of aircraft (if aggregated under paragraph (d)(4) of this section), as applicable, and divide the total amount of expenses by the number of flight hours or miles for the taxable year for that aircraft or group of aircraft, as applicable, to determine the cost per hour or mile. Expenses are allocated to each flight by multiplying the number of miles for the flight by the cost per mile or the number of hours for the flight by the

cost per hour. The expenses for the flight then are allocated to the passengers on the flight per capita. Thus, if five passengers are traveling on a flight, and the total expense allocated to the flight is \$10,000, the expense allocable to each passenger is \$2,000.

(f) *Special rules*—(1) *Determination of basis*. (i) If any deduction for depreciation is disallowed under this section, the rules of § 1.274-7 apply. In that case, the basis of an aircraft is not reduced for the amount of depreciation disallowed under this section.

(ii) The provisions of this paragraph (f)(1) are illustrated by the following examples:

Example 1. (i) B Co. is a calendar-year taxpayer that owns an aircraft not used in commercial or contract carrying of passengers or freight. The aircraft is placed in service on July 1 of Year 1 and has an unadjusted depreciable basis of \$1,000,000. The class life of the aircraft for depreciation purposes is 6 years. For determining depreciation under section 168, B Co. uses the optional depreciation table that corresponds with the general depreciation system, the 200 percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. For determining the depreciation disallowance for each year under paragraph (d)(3) of this section, B Co. elects to use the straight-line method of depreciation and the class life of 6 years and, therefore, uses the optional depreciation table for purposes of section 168 that corresponds with the straight-line method of depreciation, a recovery period of 6 years, and the half-year convention. In each year, the aircraft entertainment use subject to disallowance under this section is 10 percent of the total use.

(ii) B Co. calculates the depreciation and basis of the aircraft as follows:

| | 200 Percent declining balance depreciation amount | Straight line depreciation amount | Depreciation disallowance under section 274 | Depreciation deduction | § 1.274-7 Basis of aircraft | Suspended basis. |
|--------------|---|-----------------------------------|---|---------------------------------|------------------------------------|------------------------------|
| Year 1 | 200,000 | 83,300 | 8,330 (.10 × 83,300). | 191,670 (200,000 minus 8,330). | 808,330 (1,000,000 minus 191,670). | 8,330. |
| Year 2 | 320,000 | 166,700 | 16,670 (.10 × 166,700). | 303,330 (320,000 minus 16,670). | 505,000 (808,330 minus 303,330). | 25,000 (8,330 plus 16,670). |
| Year 3 | 192,000 | 166,700 | 16,670 (.10 × 166,700). | 175,330 (192,000 minus 16,670). | 329,670 (505,000 minus 175,330). | 41,670 (25,000 plus 16,670). |
| Year 4 | 115,200 | 166,700 | 16,670 (.10 × 166,700). | 98,530 (115,200 minus 16,670). | 231,140 (329,670 minus 98,530). | 58,340 (41,670 plus 16,670). |
| Year 5 | 115,200 | 166,600 | 16,660 (.10 × 166,600). | 98,540 (115,200 minus 16,660). | 132,600 (231,140 minus 98,540). | 75,000 (58,340 plus 16,660). |
| Year 6 | 57,600 | 166,700 | 16,670 (.10 × 166,700). | 40,930 (57,600 minus 16,670). | 91,670 (132,600 minus 40,930). | 91,670 (75,000 plus 16,670). |
| Year 7 | | 83,300 | 8,330 (.10 × 83,300). | | 91,670 | 91,670. |

Internal Revenue Service, Treasury

§ 1.274-10

(iii) In Year 7, there is no further deduction for depreciation of the aircraft, therefore, under paragraph (d)(3) of this section, no depreciation expense is disallowed. Under § 1.274-7 and this paragraph (f)(1), basis is not reduced for disallowed depreciation. Therefore, at the end of Year 7, the basis of the aircraft for purposes of § 1.274-7 is \$91,670, which is the total amount of disallowed depreciation in Years 1 through 6. B Co.'s de-

ductions for depreciation total \$908,330, which added to \$91,670 equals \$1,000,000.

Example 2. (i) The facts are the same as in *Example 1*, except that B Co. does not elect to use the straight-line method of depreciation under paragraph (d)(3) of this section until Year 3.

(ii) B Co. calculates the depreciation and basis of the aircraft as follows:

| | 200 Percent declining balance depreciation amount | Straight line depreciation amount | Depreciation disallowance under section 274 | Depreciation deduction | § 1.274 Basis of aircraft | Suspended basis. |
|--------------|---|-----------------------------------|---|---------------------------------|------------------------------------|--------------------------------|
| Year 1 | 200,000 | | 20,000 (.10 × 200,000). | 180,000 | 820,000 (1,000,000 minus 180,000). | 20,000. |
| Year 2 | 320,000 | | 32,000 (.10 × 320,000). | 288,000 (320,000 minus 32,000). | 532,000 (820,000 minus 288,000). | 52,000 (20,000 plus 32,000). |
| Year 3 | 192,000 | 166,700 | 16,670 (.10 × 166,700). | 175,330 (192,000 minus 16,670). | 356,670 (532,000 minus 175,330). | 68,670 (52,000 plus 16,670). |
| Year 4 | 115,200 | 166,700 | 16,670 (.10 × 166,700). | 98,530 (115,200 minus 16,670). | 258,140 (356,670 minus 98,530). | 85,340 (68,670 plus 16,670). |
| Year 5 | 115,200 | 166,600 | 16,660 (.10 × 166,600). | 98,540 (115,200 minus 16,660). | 159,600 (258,140 minus 98,540). | 102,000 (85,340 plus 16,660). |
| Year 6 | 57,600 | 166,700 | 16,670 (.10 × 166,700). | 40,930 (57,600 minus 16,670). | 118,670 (159,600 minus 40,930). | 118,670 (102,000 plus 16,670). |
| Year 7 | | 83,300 | 8,330 (.10 × 83,300). | 0 | 118,670 | 118,670. |

(iii) In Year 7, there is no further deduction for depreciation of the aircraft, therefore, under paragraph (d)(3) of this section, no depreciation expense is disallowed. Under § 1.274-7 and this paragraph (f)(1), basis is not reduced for disallowed depreciation. Therefore, at the end of Year 7, the basis of the aircraft for purposes of § 1.274-7 is \$118,670, which is the total amount of disallowed depreciation in Years 1 through 6. B Co.'s deductions for depreciation total \$881,330, which added to \$118,670 equals \$1,000,000.

(2) *Pro rata disallowance.* (i) The amount of disallowed expenses, and any amounts reimbursed or treated as compensation, under this section are applied on a pro rata basis to all of the categories of expenses subject to disallowance under this section.

(ii) The provisions of this paragraph (f)(2) are illustrated by the following example:

Example. (i) C Co. owns an aircraft that it uses for business and other purposes. The expenses of operating the aircraft in the current year total \$1,000,000. This amount includes \$250,000 for depreciation (25 percent of total expenses).

(ii) In the same year, the aircraft entertainment use subject to disallowance under this section is 20 percent of the total use and C Co. treats \$80,000 as compensation to specified individuals. Thus, the amount of the dis-

allowance under this section is \$120,000 (\$1,000,000 × 20 percent (\$200,000) less \$80,000).

(iii) Under paragraph (f)(2) of this section, C Co. may calculate the amount by which a category of expense, such as depreciation, is disallowed by multiplying the total disallowance of \$120,000 by the ratio of the amount of the expense to total expenses. Thus, \$30,000 of the \$120,000 total disallowed expenses is depreciation (\$250,000/\$1,000,000 (25 percent) × \$120,000).

(iv) The result is the same if C Co. separately calculates the amount of depreciation in total disallowed expenses and in the amount treated as compensation and nets the result. Depreciation is 25 percent of total expenses, thus, the amount of depreciation in disallowed expenses is \$50,000 (25 percent × \$200,000 total disallowed expenses) and the amount of depreciation treated as compensation is \$20,000 (25 percent × \$80,000). Disallowed depreciation is \$50,000 less \$20,000, or \$30,000.

(3) *Deadhead flights.* (i) For purposes of this section, an aircraft returning without passengers after discharging passengers or flying without passengers to pick up passengers (deadheading) is treated as having the same number and character of passengers as the leg of the trip on which passengers are aboard for purposes of allocating expenses under paragraphs

(e)(2) or (e)(3) of this section. For example, when an aircraft travels from point A to point B and then back to point A, and one of the legs is a deadhead flight, for determination of disallowed expenses, the aircraft is treated as having made both legs of the trip with the same passengers aboard for the same purposes.

(ii) When a deadhead flight does not occur within a roundtrip flight, but occurs between two unrelated flights involving more than two destinations (such as an occupied flight from point A to point B, followed by a deadhead flight from point B to point C, and then an occupied flight from point C to point A), the allocation of passengers and expenses to the deadhead flight occurring between the two occupied trips must be based solely on the number of passengers on board for the two occupied legs of the flight, the character of the travel of the passengers on board (entertainment or nonentertainment) and the length in hours or miles of the two occupied legs of the flight.

(iii) The provisions of this paragraph (f)(3) are illustrated by the following examples:

Example 1. (i) Aircraft flies from City A to City B, a 6-hour trip, with 12 passengers aboard. Eight of the passengers are traveling for business and four of the passengers are specified individuals traveling for entertainment purposes. The aircraft flies empty (deadheads) from City B to City C, a 4-hour trip. At City C it picks up 12 passengers, six of whom are traveling for business and six of whom are specified individuals traveling for entertainment purposes, for a 2-hour trip to City A. The taxpayer uses the occupied seat hour method of allocating expenses.

(ii) The two legs of the trip on which the aircraft is occupied comprise 96 occupied seat hours (12 passengers \times 6 hours (72) for the first leg plus 12 passengers \times 2 hours (24) for the third leg). Sixty occupied seat hours are for business (8 passengers \times 6 hours (48) for the first leg plus 6 passengers \times 2 (12) hours for the third leg) and 36 occupied seat hours are for entertainment purposes (4 passengers \times 6 hours (24) for the first leg plus 6 passengers \times 2 (12) hours for the third leg). Dividing the 36 occupied seat entertainment hours by 96 total occupied seat hours, 37.5 percent of the total occupied seat hours of the two occupied flights are for entertainment.

(iii) The 4-hour deadhead leg comprises one-third of the total flight time of 12 hours. Therefore, the deadhead flight is deemed to

have provided one-third of the total 96 occupied seat hours, or 32 occupied seat hours ($96 \times \frac{1}{3} = 32$). Of the 32 deemed occupied seat hours, 37.5 percent, or 12 deemed occupied seat hours, are treated as entertainment under paragraph (f)(3)(ii) of this section. The 32 deemed occupied seat hours for the deadhead flight are included in the calculation under paragraph (e)(2)(ii)(B) of this section and expenses are allocated under paragraph (e)(2)(ii)(D) of this section to the 12 deemed occupied seat hours treated as entertainment.

Example 2. (i) The facts are the same as for *Example 1*, but the taxpayer uses the flight-by-flight method of allocation.

(ii) Of the 24 passengers on the occupied flights, 10 passengers, or 41.7 percent, are traveling for entertainment purposes. If the annual cost per flight hour calculated under paragraph (e)(3)(ii) of this section is \$1,000, \$4,000 is allocated to the 4-hour deadhead leg. Under paragraph (f)(3)(ii) of this section, 41.7 percent of the \$4,000, or \$1,667, is treated as an expense for entertainment. The calculation of the cost per mile or hour for the year under paragraph (e)(3)(ii) of this section includes the expenses and number of miles or hours flown for the deadhead leg.

(g) *Effective/applicability date.* This section applies to taxable years beginning after August 1, 2012.

[T.D. 9597, 77 FR 45483, Aug. 1, 2012]

§ 1.275-1 Deduction denied in case of certain taxes.

For description of the taxes for which a deduction is denied under section 275, see paragraphs (a), (b), (c), (e), and (h) of § 1.164-2.

[T.D. 6780, 29 FR 18148, Dec. 22, 1964, as amended by T.D. 7767, 46 FR 11264, Feb. 6, 1981]

§ 1.276-1 Disallowance of deductions for certain indirect contributions to political parties.

(a) *In general.* Notwithstanding any other provision of law, no deduction shall be allowed for income tax purposes in respect of any amount paid or incurred after March 15, 1966, in a taxable year of the taxpayer beginning after December 31, 1965, for any expenditure to which paragraph (b)(1), (c), (d), or (e) of this section is applicable. Section 276 is a disallowance provision exclusively and does not make deductible any expenses which are not otherwise allowed under the Code. For certain other rules in respect of deductions for

expenditures for political purposes, see §§ 1.162-15(b), 1.162-20, and 1.271-1.

(b) *Advertising in convention program—*

(1) *General rule.* (i) Except as provided in subparagraph (2) of this paragraph, no deduction shall be allowed for an expenditure for advertising in a convention program of a political party. For purposes of this subparagraph it is immaterial who publishes the convention program or to whose use the proceeds of the program inure (or are intended to inure). A convention program is any written publication (as defined in paragraph (c) of this section) which is distributed or displayed in connection with or at a political convention, conclave, or meeting. Under certain conditions payments to a committee organized for the purpose of bringing a political convention to an area are deductible under paragraph (b) of § 1.162-15. This rule is not affected by the provisions of this section. For example, such payments may be deductible notwithstanding the fact that the committee purchases from a political party the right to publish a pamphlet in connection with a convention and that the deduction of costs of advertising in the pamphlet is prohibited under this section.

(ii) The application of the provisions of this subparagraph may be illustrated by the following example:

Example. M Corporation publishes the convention program of the Y political party for a convention not described in subparagraph (2) of this paragraph. The corporation makes no payment of any kind to or on behalf of the party or any of its candidates and no part of the proceeds of the publication and sale of the program inures directly or indirectly to the benefit of any political party or candidate. P Corporation purchases an advertisement in the program. P Corporation may not deduct the cost of such advertisement.

(2) *Amounts paid or incurred on or after January 1, 1968, for advertising in programs of certain national political conventions.* (i) Subject to the limitations in subdivision (ii) of this subparagraph, a deduction may be allowed for any amount paid or incurred on or after January 1, 1968, for advertising in a convention program of a political party distributed in connection with a convention held for the purpose of nominating candidates for the offices of

President and Vice President of the United States, if the proceeds from the program are actually used solely to defray the costs of conducting the convention (or are set aside for such use at the next convention of the party held for such purpose) and if the amount paid or incurred for the advertising is reasonable. If such amount is not reasonable or if any part of the proceeds is used for a purpose other than that of defraying such convention costs, no part of the amount is deductible. Whether or not an amount is reasonable shall be determined in light of the business the taxpayer may expect to receive either directly as a result of the advertising or as a result of the convention being held in an area in which the taxpayer has a principal place of business. For these purposes, an amount paid or incurred for advertising will not be considered as reasonable if it is greater than the amount which would be paid for comparable advertising in a comparable convention program of a nonpolitical organization. Institutional advertising (e.g., advertising of a type not designed to sell specific goods or services to persons attending the convention) is not advertising which may be expected to result directly in business for the taxpayer sufficient to make the expenditures reasonable. Accordingly, an amount spent for institutional advertising in a convention program may be deductible only if the taxpayer has a principal place of business in the area where the convention is held. An official statement made by a political party after a convention as to the use made of the proceeds from its convention program shall constitute prima facie evidence of such use.

(ii) No deduction may be taken for any amount described in this subparagraph which is not otherwise allowable as a deduction under section 162, relating to trade or business expenses. Therefore, in order for any such amount to be deductible, it must first satisfy the requirements of section 162, and, in addition, it must also satisfy the more restrictive requirements of this subparagraph.

(c) *Advertising in publication other than convention program.* No deduction shall be allowed for an expenditure for

advertising in any publication other than a convention program if any part of the proceeds of such publication directly or indirectly inures (or is intended to inure) to or for the use of a political party or a political candidate. For purposes of this paragraph, a publication includes a book, magazine, pamphlet, brochure, flier, almanac, newspaper, newsletter, handbill, billboard, menu, sign, scorecard, program, announcement, radio or television program or announcement, or any similar means of communication. For the definition of inurement of proceeds to a political party or a political candidate, see paragraph (f)(3) of this section.

(d) *Admission to dinner or program.* No deduction shall be allowed for an expenditure for admission to any dinner or program, if any part of the proceeds of such event directly or indirectly inures (or is intended to inure) to or for the use of a political party or a political candidate. For purposes of this paragraph, a dinner or program includes a gala, dance, ball, theatrical or film presentation, cocktail or other party, picnic, barbecue, sporting event, brunch, tea, supper, auction, bazaar, reading, speech, forum, lecture, fashion show, concert, opening, meeting, gathering, or any similar event. For the definition of inurement of proceeds to a political party or a political candidate and of admission to a dinner or program, see paragraph (f) of this section.

(e) *Admission to inaugural event.* (1) No deduction shall be allowed for an expenditure for admission to an inaugural ball, inaugural gala, inaugural parade, or inaugural concert, or to any similar event (such as a dinner or program, as defined in paragraph (d) of this section), in connection with the inauguration or installation in office of any official, or any equivalent event for an unsuccessful candidate, if the event is identified with a political party or a political candidate. For purposes of this paragraph, the sponsorship of the event and the use to which the proceeds of the event are or may be put are irrelevant, except insofar as they may tend to identify the event with a political party or a political candidate. For the definition of admis-

sion to an inaugural event, see paragraph (f)(4) of this section.

(2) The application of the provisions of this paragraph may be illustrated by the following example:

Example. An inaugural reception for A, a prominent member of Y party who has been recently elected judge of the municipal court of F city, is held with the proceeds going to the city treasury. The price of admission to such affair is not deductible.

(f) *Definitions*—(1) *Political party.* For purposes of this section the term *political party* has the same meaning as that provided for in paragraph (b)(1) of § 1.271-1.

(2) *Political candidate.* For purposes of this section, the term *political candidate* is to be construed in accordance with the purpose of section 276 to deny tax deductions for certain expenditures which may be used directly or indirectly to finance political campaigns. The term includes a person who, at the time of the event or publication with respect to which the deduction is being sought, has been selected or nominated by a political party for any elective office. It also includes an individual who is generally believed, under the facts and circumstances at the time of the event or publication, by the persons making expenditures in connection therewith to be an individual who is or who in the reasonably foreseeable future will be seeking selection, nomination, or election to any public office. For purposes of the preceding sentence, the facts and circumstances to be considered include, but are not limited to, the purpose of the event or publication and the disposition to be made of the proceeds. In the absence of evidence to the contrary it shall be presumed that persons making expenditures in connection with an event or publication generally believe that an incumbent of an elective public office will run for reelection to his office or for election to some other public office.

(3) *Inurement of proceeds to political party or political candidate*—(i) *In general.* Subject to the special rules presented in subdivision (iii) of this subparagraph (relating to a political candidate), proceeds directly or indirectly inure to or for the use of a political party or a political candidate (a) if the

party or candidate may order the disposition of any part of such proceeds, regardless of what use is actually made thereof, or (b) if any part of such proceeds is utilized by any person for the benefit of the party or candidate. These conditions are equally applicable in determining whether the proceeds are intended to inure. Accordingly, it is immaterial whether the event or publication operates at a loss if, had there been a profit, any part of the proceeds would have inured to or for the use of a political party or a political candidate. Moreover, it shall be presumed that where a dinner, program, or publication is sponsored by or identified with a political party or political candidate, the proceeds of such dinner, program, or publication directly or indirectly inure (or are intended to inure) to or for the use of the party or candidate. On the other hand, proceeds are not considered to directly or indirectly inure to the benefit of a political party or political candidate if the benefit derived is so remote as to be negligible or merely a coincidence of the relationship of a political candidate to a trade or business profiting from an expenditure of funds. For example, the proceeds of expenditures made by a taxpayer in the ordinary course of his trade or business for advertising in a publication, such as a newspaper or magazine, are not considered as inuring to the benefit of a political party or political candidate merely because the publication endorses a particular political candidate or candidates of a particular political party, the publisher independently contributes to the support of a political party or candidate out of his own personal funds, or the principal stockholder of the publishing firm is a candidate for public office.

(ii) *Proceeds to political party.* If a political party may order the disposition of any part of the proceeds of a publication or event described in paragraph (c) or (d) of this section, such proceeds inure to the use of the party regardless of what the proceeds are to be used for or that their use is restricted to a particular purpose unrelated to the election of specific candidates for public office. Accordingly, where a political party holds a dinner for the purpose of raising funds to be used in a voter reg-

istration drive, voter education program, or nonprofit political research program, partisan or nonpartisan, the proceeds are considered to directly or indirectly inure to or for the use of the political party. Proceeds may inure to or for the use of a political party even though they are to be used for purposes which may not be directly related to any particular election (such as to pay office rent for its permanent quarters, salaries to permanent employees, or utilities charges, or to pay the cost of an event such as a dinner or program as defined in paragraph (d) of this section).

(iii) *Proceeds to political candidate.* Proceeds directly or indirectly inure (or are intended to inure) to or for the use of a political candidate if, in addition to meeting the conditions described in subdivision (i) of this subparagraph, (a) some part of the proceeds is or may be used directly or indirectly for the purpose of furthering his candidacy for selection, nomination, or election to any elective public office, and (b) they are not received by him in the ordinary course of a trade or business (other than the trade or business of holding public office). Proceeds may so inure whether or not the expenditure sought to be deducted was paid or incurred before the commencement of political activities with respect to the selection, nomination, or election referred to in (a) of this subdivision, or after such selection, nomination, or election has been made or has taken place. For example, proceeds of an event which may be used by an individual who, under the facts and circumstances at the time of the event, the persons making expenditures in connection therewith generally believe will in the reasonably foreseeable future run for a public office, and which may be used in furtherance of such individual's candidacy, generally will be deemed to inure (or to be intended to inure) to or for the use of a political candidate for the purpose of furthering such individual's candidacy. Or, as another example, proceeds of an event occurring after an election, which may be used by a candidate in that election to repay loans incurred in directly or indirectly furthering his candidacy, or in reimbursement of expenses incurred in

§ 1.278-1

26 CFR Ch. I (4-1-17 Edition)

directly or indirectly furthering his candidacy, will be deemed to directly or indirectly inure (or to be intended to inure) to or for the use of a political candidate for the purpose of furthering his candidacy. For purposes of this subdivision, if the proceeds received by a candidate exceed substantially the fair market value of the goods furnished or services rendered by him, the proceeds are not received by the candidate in the ordinary course of his trade or business.

(iv) The application of the provisions of this subparagraph may be illustrated by the following examples:

Example 1. Corporation O pays the Y political party \$100,000 per annum for the right to publish the Y News, and retains the entire proceeds from the sale of the publication. Amounts paid or incurred for advertising in the Y News are not deductible because a part of the proceeds thereof indirectly inures to or for the use of a political party.

Example 2. The X political party holds a highly publicized ball honoring one of its active party members and admission tickets are offered to all. The guest of honor is a prominent national figure and a former incumbent of a high public office. The price of admission is designed to cover merely the cost of entertainment, food, and the ballroom, and all proceeds are paid to the hotel where the function is held, with the political party bearing the cost of any deficit. No deduction may be taken for the price of admission to the ball since the proceeds thereof inure to or for the use of a political party.

Example 3. Taxpayer A, engaged in a trade or business, purchases a number of tickets for admission to a fundraising affair held on behalf of political candidate B. The funds raised by this affair can be used by B for the purpose of furthering his candidacy. These expenditures are not deductible by A notwithstanding that B donates the proceeds of the affair to a charitable organization.

Example 4. A, an individual taxpayer who publishes a newspaper, is a candidate for elective public office. X Corporation advertises its products in A's newspaper, paying substantially more than the normal rate for such advertising. X Corporation may not deduct any portion of the cost of that advertising.

(4) *Admission to dinners, programs, inaugural events.* For purposes of this section, the cost of admission to a dinner, program, or inaugural event includes all charges, whether direct or indirect, for attendance and participation at such function. Thus, for example, amounts spent to be eligible for door

prizes, for the privilege of sitting at the head table, or for transportation furnished as part of such an event, or any separate charges for food or drink, are amounts paid for admission.

[T.D. 6996, 34 FR 833, Jan. 18, 1969, as amended by T.D. 7010, 34 FR 7145, May 1, 1969]

§ 1.278-1 Capital expenditures incurred in planting and developing citrus and almond groves.

(a) *General rule.* (1)(i) Except as provided in subparagraph (2)(iii) of this paragraph and paragraph (b) of this section, there shall be charged to capital account any amount (allowable as a deduction without regard to section 278 or this section) which is attributable to the planting, cultivation, maintenance, or development of any citrus or almond grove (or part thereof), and which is incurred before the close of the fourth taxable year beginning with the taxable year in which the trees were planted. For purposes of section 278 and this section, such an amount shall be considered as "incurred" in accordance with the taxpayer's regular tax accounting method used in reporting income and expenses connected with the citrus or almond grove operation. For purposes of this paragraph, the portion of a citrus or almond grove planted in 1 taxable year shall be treated separately from the portion of such grove planted in another taxable year. The provisions of section 278 and this section apply to taxable years beginning after December 31, 1969, in the case of a citrus grove, and to taxable years beginning after January 12, 1971, in the case of an almond grove.

(ii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. T, a fiscal year taxpayer plants a citrus grove 5 weeks before the close of his taxable year ending in 1971. T is required to capitalize any amount (allowable as a deduction without regard to section 278 or this section) attributable to the planting, cultivation, maintenance, or development of such grove until the close of his taxable year ending in 1974.

Example 2. Assume the same facts as in Example 1, except that T plants one portion of such grove 5 weeks before the close of his taxable year ending in 1971 and another portion of such grove at the beginning of his

taxable year ending in 1972. The required capitalization period for expenses attributable to the first portion of such grove shall run until the close of T's taxable year ending in 1974. The required capitalization period for expenses attributable to the second portion of such grove shall run until the close of T's taxable year ending in 1975.

(2)(i) For purposes of section 278 and this section a *citrus grove* is defined as one or more trees of the rue family, often thorny and bearing large fruit with hard, usually thick peel and pulpy flesh, such as the orange, grapefruit, lemon, lime, citron, tangelo, and tangerine.

(ii) For purposes of section 278 and this section, an *almond grove* is defined as one or more trees of the species *Prunus amygdalus*.

(iii) An amount attributable to the cultivation, maintenance, or development of a citrus or almond grove (or part thereof) shall include, but shall not be limited to, the following developmental or cultural practices expenditures: Irrigation, cultivation, pruning, fertilizing, management fees, frost protection, spraying, and upkeep of the citrus or almond grove. The provisions of section 278(a) and this paragraph shall apply to expenditures for fertilizer and related materials notwithstanding the provisions of section 180, but shall not apply to expenditures attributable to real estate taxes or interest, to soil and water conservation expenditures allowable as a deduction under section 175, or to expenditures for clearing land allowable as a deduction under section 182. Further, the provisions of section 278(a) and this paragraph apply only to expenditures allowable as deductions without regard to section 278 and have no application to expenditures otherwise chargeable to capital account, such as the cost of the land and preparatory expenditures incurred in connection with the citrus or almond grove.

(iv) For purposes of section 278 and this section, a citrus or almond tree shall be considered to be "planted" on the date on which the tree is placed in the permanent grove from which production is expected.

(3)(i) The period during which expenditures described in section 278(a) and this paragraph are required to be capitalized shall, once determined, be

unaffected by a sale or other disposition of the citrus or almond grove. Such period shall, in all cases, be computed by reference to the taxable years of the owner of the grove at the time that the citrus or almond trees were planted. Therefore, if a citrus or almond grove subject to the provisions of section 278 or this paragraph is sold or otherwise transferred by the original owner of the grove before the close of his fourth taxable year beginning with the taxable year in which the trees were planted, expenditures described in section 278(a) or this paragraph made by the purchaser or other transferee of the citrus or almond grove from the date of his acquisition until the close of the original holder's fourth such taxable year are required to be capitalized.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. T, a fiscal year taxpayer, plants a citrus grove at the beginning of his taxable year ending in 1971. At the beginning of his taxable year ending in 1972, T sells the grove to X. The required period during which expenditures described in section 278 (a) are required to be capitalized runs from the date on which T planted the grove until the end of T's taxable year ending in 1974. Therefore, X must capitalize any such expenditures incurred by him from the time he purchased the grove from T until the end of T's taxable year ending in 1974.

(b) *Exceptions.* (1) Paragraph (a) of this section shall not apply to amounts allowable as deductions (without regard to section 278 or this section) and attributable to a citrus or almond grove (or part thereof) which is replanted by a taxpayer after having been lost or damaged (while in the hands of such taxpayer) by reason of freeze, disease, drought, pests, or casualty.

(2)(i) Paragraph (a) of this section shall not apply to amounts allowable as deductions (without regard to section 278 or this section), and attributable to a citrus grove (or part thereof) which was planted or replanted prior to December 30, 1969, or to an almond grove (or part thereof) which was planted or replanted prior to December 30, 1970.

§ 1.279-1

26 CFR Ch. I (4-1-17 Edition)

(ii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. T, a fiscal year taxpayer with a taxable year of July 1, 1969, through June 30, 1970, plants a citrus grove on August 1, 1969. Since the grove was planted prior to December 30, 1969, no expenses incurred with respect to the grove shall be subject to the provisions of paragraph (a).

Example 2. Assume the same facts as in *Example 1*, except that T plants the grove on March 1, 1970. Since the grove was planted after December 30, 1969, all amounts allowable as deductions (without regard to section 278 or this section) and attributable to the grove shall be subject to the provisions of paragraph (a). However, since paragraph (a) applies only to taxable years beginning after December 31, 1969, T must capitalize only those amounts incurred during his taxable years ending in 1971, 1972, and 1973.

[T.D. 7098, 36 FR 5214, Mar. 18, 1971, as amended by T.D. 7136, 36 FR 14731, Aug. 11, 1971]

§ 1.279-1 General rule; purpose.

An obligation issued to provide a consideration directly or indirectly for a corporate acquisition, although constituting a debt under section 385, may have characteristics which make it more appropriate that the participation in the corporation which the obligation represents be treated for purposes of the deduction of interest as if it were a stockholder interest rather than a creditors interest. To deal with such cases, section 279 imposes certain limitations on the deductibility of interest paid or incurred on obligations which have certain equity characteristics and are classified as corporate acquisition indebtedness. Generally, section 279 provides that no deduction will be allowed for any interest paid or incurred by a corporation during the taxable year with respect to its corporate acquisition indebtedness to the extent such interest exceeds \$5 million. However, the \$5 million limitation is reduced by the amount of interest paid or incurred on obligations issued under the circumstances described in section 279(a)(2) but which are not corporate acquisition indebtedness. Section 279(b) provides that an obligation will be corporate acquisition indebtedness if it was issued under certain circumstances and meets the four tests enumerated therein. Although an obligation may

satisfy the conditions referred to in the preceding sentence, it may still escape classification as corporate acquisition indebtedness if the conditions as described in sections 279(d) (3), (4), and (5), 279(f), or 279(i) are present. However, no inference should be drawn from the rules of section 279 as to whether a particular instrument labeled a bond, debenture, note, or other evidence of indebtedness is in fact a debt. Before the determination as to whether the deduction for payments pursuant to an obligation as described in this section is to be disallowed, the obligation must first qualify as debt in accordance with section 385. If the obligation is not debt under section 385, it will be unnecessary to apply section 279 to any payments pursuant to such obligation.

[T.D. 7262, 38 FR 5844, Mar. 5, 1973]

§ 1.279-2 Amount of disallowance of interest on corporate acquisition indebtedness.

(a) *In general.* Under section 279(a), no deduction is allowed for any interest paid or incurred by a corporation during the taxable year with respect to its corporate acquisition indebtedness to the extent that such interest exceeds:

(1) \$5 million, reduced by

(2) The amount of interest paid or incurred by such corporation during such year on any obligation issued after December 31, 1967, to provide consideration directly or indirectly for an acquisition described in section 279(b)(1) but which is not corporate acquisition indebtedness. Such an obligation is not corporate acquisition indebtedness if it:

(i) Was issued prior to October 10, 1969, or

(ii) Was issued after October 9, 1969, but does not meet any one or more of the tests of section 279(b) (2), (3), or (4), or

(iii) Was originally deemed to be corporate acquisition indebtedness but is no longer so treated by virtue of the application of paragraphs (3) or (4) of section 279(d) or

(iv) Is specifically excluded from treatment as corporate acquisition indebtedness by virtue of sections 279(d)(5), (f), or (i).

The computation of the amount by which the \$5 million limitation described in this paragraph is to be reduced with respect to any taxable year is to be made as of the last day of the taxable year in which an acquisition described in section 279(b)(1) occurs. In no case shall the \$5 million limitation be reduced below zero.

(b) *Certain terms defined.* When used in section 279 and the regulations thereunder:

(1) The term *issued* includes the giving of a note or other evidence of indebtedness to a bank or other lender as well as an issuance of a bond or debenture. In the case of obligations which are registered with the Securities and Exchange Commission, the date of issue is the date on which the issue is first offered to the public. In the case of obligations which are not so registered, the date of issue is the date on which the obligation is sold to the first purchaser.

(2) The term *interest* includes both stated interest and unstated interest (such as original issue discount as defined in paragraph (a)(1) of § 1.163-4 and amounts treated as interest under section 483).

(3) The term *money* means cash and its equivalent.

(4) The term *control* shall have the meaning assigned to such term by section 368(c).

(5) The term *affiliated group* shall have the meaning assigned to such term by section 1504(a), except that all corporations other than the acquired corporation shall be treated as includible corporations (without any exclusion under section 1504(b)) and the acquired corporation shall not be treated as an includible corporation. This definition shall apply whether or not some or all of the members of the affiliated group file a consolidated return.

(c) *Examples.* The provisions of paragraph (a) of this section may be illustrated by the following examples:

Example 1. On March 4, 1973, X Corporation, a calendar year taxpayer, issues an obligation which satisfies the test of section 279(b)(1) but fails to satisfy either of the tests of section 279(b) (2) or (3). Since at least one of the tests of section 279(b) is not satisfied the obligation is not corporate acquisition indebtedness. However, since the test of section 279(b)(1) is satisfied, the interest on

the obligation will reduce the \$5 million limitation provided by section 279 (a)(1).

Example 2. On January 1, 1969, X Corporation, a calendar year taxpayer, issues an obligation, which satisfies all the tests of section 279(b), requiring it to pay \$3.5 million of interest each year. Since the obligation was issued before October 10, 1969, the obligation cannot be corporate acquisition indebtedness, and a deduction for the \$3.5 million of interest attributable to such obligation is not subject to disallowance under section 279(a). However, since the obligation was issued after December 31, 1967, in an acquisition described in section 279(b)(1), under section 279(a)(2) the \$3.5 million of interest attributable to such obligation reduces the \$5 million limitation provided by section 279(a)(1) to \$1.5 million.

Example 3. Assume the same facts as in *Example 2*. Assume further that on January 1, 1970, X Corporation issues more obligations which are classified as corporate acquisition indebtedness and which require X Corporation to pay \$4 million of interest each year. For 1970 the amount of interest paid or accrued on corporate acquisition indebtedness, which may be deducted is \$1.5 million (\$5 million maximum provided by section 279(a)(1) less \$3.5 million, the reduction required under section 279(a)(2)). Thus, \$2.5 million of the \$4 million interest incurred on a corporate acquisition indebtedness is subject to disallowance under section 279(a) for the taxable year 1970.

Example 4. Assume the same facts as in *Example 3*. Assume further that on the last day of each of the taxable years 1971, 1972, and 1973 of X Corporation neither of the conditions described in section 279(b)(4) was present.

Under these circumstances, such obligations for all taxable years after 1973 are not corporate acquisition indebtedness under section 279(d)(4). Therefore, the \$2.5 million of interest previously not deductible is not deductible for all taxable years after 1973. Although such obligations are no longer treated as corporate acquisition indebtedness, the interest attributable thereto must be applied in further reduction of the \$5 million limitation. The \$5 million limitation of section 279(a)(1) is therefore reduced to zero. While the limitation is at the zero level any interest paid or incurred on corporate acquisition indebtedness will be disallowed.

[T.D. 7262, 38 FR 5844, Mar. 5, 1973]

§ 1.279-3 Corporate acquisition indebtedness.

(a) *Corporate acquisition indebtedness.* For purposes of section 279, the term *corporate acquisition indebtedness* means any obligation evidenced by a bond, debenture, note, or certificate or other

evidence of indebtedness issued after October 9, 1969, by a corporation (referred to in section 279 and the regulations thereunder as “issuing corporation”) if the obligation is issued to provide consideration directly or indirectly for the acquisition of stock in, or certain assets of, another corporation (as described in paragraph (b) of this § 1.279-3), is “subordinated” (as described in paragraph (c) of this § 1.279-3), is “convertible” (as described in paragraph (d) of this § 1.279-3), and satisfies either the ratio of debt to equity test (as described in paragraph (f) of § 1.279-5) or the projected earnings test (as described in paragraph (d) of § 1.279-5).

(b) *Acquisition of stock or assets.* (1) Section 279(b)(1) describes one of the tests to be satisfied if an obligation is to be classified as corporate acquisition indebtedness. Under section 279(b)(1), the obligation must be issued to provide consideration directly or indirectly for the acquisition of:

(i) Stock (whether voting or non-voting) in another corporation (referred to in section 279 and the regulations thereunder as “acquired corporation”), or

(ii) Assets of another corporation (referred to in section 279 and the regulations thereunder as “acquired corporation”) pursuant to a plan under which at least two-thirds (in value) of all the assets (excluding money) used in trades or businesses carried on by such corporation are acquired.

The fact that the corporation that issues the obligation is not the same corporation that acquires the acquired corporation does not prevent the application of section 279. For example, if X Corporation acquires all the stock of Y Corporation through the utilization of an obligation of Z Corporation, a wholly owned subsidiary of X Corporation, this section will apply.

(2) *Direct or indirect consideration.* Obligations are issued to provide direct consideration for an acquisition within the meaning of section 279(b)(1) where the obligations are issued to the shareholders of an acquired corporation in exchange for stock in such acquired corporation or where the obligations are issued to the acquired corporation in exchange for its assets. The applica-

tion of the provisions of this subsection relating to indirect consideration for an acquisition of stock or assets depends upon the facts and circumstances surrounding the acquisition and the issuance of the obligations. Obligations are issued to provide indirect consideration for an acquisition of stock or assets within the meaning of section 279(b)(1) where (i) at the time of the issuance of the obligations the issuing corporation anticipated the acquisition of such stock or assets and the obligations would not have been issued if the issuing corporation had not so anticipated such acquisition, or where (ii) at the time of the acquisition the issuing corporation foresaw or reasonably should have foreseen that it would be required to issue obligations, which it would not have otherwise been required to issue if the acquisition had not occurred, in order to meet its future economic needs.

(3) *Stock acquisition.* (i) For purposes of section 279, an acquisition in which the issuing corporation issues an obligation to provide consideration directly or indirectly for the acquisition of stock in the acquired corporation shall be treated as a stock acquisition within the meaning of section 279(b)(1)(A). Where the stock of one corporation is acquired from another corporation and such stock constitutes at least two-thirds (in value) of all the assets (excluding money) of the latter corporation, such acquisition shall be deemed an asset acquisition as described in section 279(b)(1)(B) and subparagraph (4) of this section. If the issuing corporation acquires less than two-thirds (in value) of all the assets (excluding money) used in trades or businesses carried on by the acquired corporation within the meaning of section 279(b)(1)(B) and subparagraph (4) of this paragraph and such assets include stock of another corporation, the acquisition of such stock is a stock acquisition within the meaning of section 279(b)(1)(A) and of this subparagraph. In such a case the amount of the obligation which is characterized as corporate acquisition indebtedness shall bear the same relationship to the total amount of the obligation issued as the fair market value of the stock acquired bears to the total of the fair market

value of the assets acquired and stock acquired, as of the date of acquisition. For rules with respect to acquisitions of stock, where the total amount of stock of the acquired corporation held by the issuing corporation never exceeded 5 percent of the total combined voting power of all classes of stock of the acquired corporation entitled to vote, see § 1.279-4(b)(1).

(ii) If the issuing corporation acquired stock of an acquired corporation in an acquisition described in section 279(b)(1)(A), and liquidated the acquired corporation under section 334(b)(2) and the regulations thereunder before the last day of the taxable year in which such stock acquisition is made, such obligation issued to provide consideration directly or indirectly to acquire such stock of the acquired corporation shall be considered as issued in an acquisition described in section 279(b)(1)(B).

(4) *Asset acquisition.* (i) For purposes of section 279, an acquisition in which the issuing corporation issues an obligation to provide consideration directly or indirectly for the acquisition of assets of an acquired corporation pursuant to a plan under which at least two-thirds of the gross value of all the assets (excluding money) used in trades and businesses carried on by such acquired corporation are acquired shall be treated as an asset acquisition within the meaning of section 279(b)(1)(B). For purposes of section 279(b)(1)(B), the gross value of any acquired asset shall be its fair market value as of the day of its acquisition. In determining the fair market value of an asset, no reduction shall be made for any liabilities, mortgages, liens, or other encumbrances to which the asset or any part thereof may be subjected. For purposes of this subparagraph, an asset which has been actually used in the trades and businesses of a corporation but which is temporarily not being used in such trades and businesses shall be treated as if it is being used in such manner. For purposes of this paragraph, the day of acquisition will be determined by reference to the facts and circumstances surrounding the transaction.

(ii) For purposes of the two-thirds test described in section 279(b)(1)(B),

the stock of any corporation which is controlled by the acquired corporation shall be considered as an asset used in the trades and businesses of such acquired corporation.

(5) *Certain nontaxable transactions.* (i) Under section 279(e), an acquisition of stock of a corporation of which the issuing corporation is in control in a transaction in which gain or loss is not recognized shall be deemed an acquisition described in section 279(b)(1)(A) only if immediately before such transaction the acquired corporation was in existence, and the issuing corporation was not in control of such corporation. If the issuing corporation is a member of an affiliated group, then in accordance with section 279(g), the affiliated group shall be treated as the issuing corporation. Thus, any stock of the acquired corporation, owned by members of the affiliated group, shall be aggregated in determining whether the issuing corporation was in control of the acquired corporation.

(ii) The \$5 million limitation provided by section 279(a)(1) is not reduced by the interest on an obligation issued in a transaction which, under section 279 (e), is deemed not to be an acquisition described in section 279(b)(1).

(iii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. On January 1, 1973, W Corporation, a calendar year taxpayer, issues to the public 10,000 10 year convertible bonds each with a principal of \$1,000 for \$9 million. On June 6, 1973, W Corporation transfers the \$9 million proceeds of such bond issue to X Corporation in exchange for X Corporation's common stock in a transaction that satisfies the provisions of section 351(a). On December 31, 1973, W Corporation's ratio of debt to equity is 1½ to 1 and its project earnings exceed three times the annual interest to be paid or incurred. Immediately prior to the transaction between the two corporations W Corporation owned no stock in X Corporation which had been in existence for several years. However, immediately after this transaction W Corporation is in control of X Corporation. Since X Corporation, the acquired corporation, was in existence and W Corporation, the issuing corporation, was not in control of X Corporation immediately before the section 351 transaction (a transaction in which gain or loss is not recognized) and since W Corporation is now in control of X Corporation, the acquisition of

X Corporation's common stock by W Corporation is not protected from treatment as an acquisition described in section 279(b)(1)(A). However, the obligation will not be deemed to be corporate acquisition indebtedness since the test of section 279(b)(4) is not met. The interest on the obligation will reduce the \$5 million limitation of section 279(a).

Example 2. Assume the facts are the same as described in *Example 1*, except that X Corporation was not in existence prior to June 6, 1973, but rather is newly created by W Corporation on such date. Since X Corporation, the acquired corporation, was not in existence before June 6, 1973, the date on which W Corporation, the issuing corporation, acquired control of X Corporation in a transaction on which gain or loss is not recognized, the acquisition is not deemed to be an acquisition described in section 279(b)(1)(A). Thus, under the provisions of subdivision (ii) of this subparagraph, the \$5 million limitation provided by section 279(a)(1) will not be reduced by the yearly interest incurred on the convertible bonds issued by W Corporation.

Example 3. Assume that the facts are the same as described in *Example 1*, except that W Corporation was in control of X Corporation immediately before the transaction. Since W Corporation was in control of X Corporation immediately before the section 351(a) transaction and is in control of X Corporation after such transaction, the result will be the same as in *Example 2*.

(c) *Subordinated obligation*—(1) *In general.* An obligation which is issued to provide consideration for an acquisition described in section 279(b)(1) is subordinated within the meaning of section 279(b)(2) if it is either:

(i) Subordinated to the claims of trade creditors of the issuing corporation generally, or

(ii) Expressly subordinated in right of payment to the payment of any substantial amount of unsecured indebtedness, whether outstanding or subsequently issued, of the issuing corporation, irrespective of whether such subordination relates to payment of interest, or principal, or both. In applying section 279(b)(2) and this paragraph in any case where the issuing corporation is a member of an affiliated group of corporations, the affiliated group shall be treated as the issuing corporation.

(2) *Expressly subordinated obligation.* In applying subparagraph (1)(ii) of this paragraph, an obligation is considered expressly subordinated whether the terms of the subordination are pro-

vided in the evidence of indebtedness itself, or in another agreement between the parties to such obligation. An obligation shall be considered to be expressly subordinated within the meaning of subparagraph (1)(ii) of this paragraph if such obligation by its terms can become subordinated in right of payment to the payment of any substantial amount of unsecured indebtedness which is outstanding or which may be issued subsequently. However, an obligation shall not be considered expressly subordinated if such subordination occurs solely by operation of law, such as in the case of bankruptcy laws. For purposes of this paragraph, the term *substantial amount of unsecured indebtedness* means an amount of unsecured indebtedness equal to 5 percent or more of the face amount of the obligations issued within the meaning of section 279(b)(1).

(d) *Convertible obligation.* An obligation which is issued to provide consideration directly or indirectly for an acquisition described in section 279(b)(1) is convertible within the meaning of section 279(b)(3) if it is either—(1) Convertible directly or indirectly into stock of the issuing corporation, or (2) Part of an investment unit or other arrangement which includes, in addition to such bond or other evidence of indebtedness, an option to acquire directly or indirectly stock in the issuing corporation. Stock warrants or convertible preferred stock included as part of an investment unit constitute options within the meaning of the preceding sentence. Indebtedness is indirectly convertible if the conversion feature gives the holder the right to convert into another bond of the issuing corporation which is then convertible into the stock of the issuing corporation. In any case where the corporation which in fact issues an obligation to provide consideration for an acquisition described in section 279(b)(1) is a member of an affiliated group, the provisions of section 279(b)(3) and this paragraph are deemed satisfied if the stock into which either the obligation or option which is part of an investment unit or other arrangement is convertible, directly or indirectly, is stock of any member of the affiliated group.

(e) *Ratio of debt to equity and projected earnings test.* For rules with respect to the application of section 279(b)(4) (relating to the ratio of debt to equity and the ratio of projected earnings to annual interest to be paid or incurred), see paragraphs (d), (e), and (f) of § 1.279-5.

(f) *Certain obligations issued after October 9, 1969—(1) In general.* Under section 279(i), an obligation shall not be corporate acquisition indebtedness if such obligation is issued after October 9, 1969, to provide consideration for the acquisition of:

(i) Stock or assets pursuant to a binding written contract which was in effect on October 9, 1969, and at all times thereafter before such acquisition, or

(ii) Stock in any corporation where the issuing corporation, on October 9, 1969, and at all times thereafter before such acquisition, owned at least 50 percent of the total combined voting power of all classes of stock entitled to vote of the acquired corporation.

Subdivision (ii) of this subparagraph shall cease to apply when (at any time on or after October 9, 1969) the issuing corporation has acquired control of the acquired corporation. The interest attributable to any obligation which satisfies the conditions stated in the first sentence of this subparagraph shall reduce the \$5 million limitation of section 279(a)(1).

(2) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. On September 5, 1969, M Corporation, a calendar year taxpayer, entered into a binding written contract with N Corporation to purchase 20 percent of the voting stock of N Corporation. The contract was in effect on October 9, 1969, and at all times thereafter before the acquisition of the stock on January 1, 1970. Pursuant to such contract M Corporation issued on January 1, 1970, to N Corporation an obligation which satisfies the tests of section 279(b) requiring it to pay \$1 million of interest each year. However, under the provisions of subparagraph (1)(i) of this paragraph, such obligation is not corporate acquisition indebtedness since it was issued to provide consideration for the acquisition of stock pursuant to a binding written contract which was in effect on October 9, 1969, and at all times thereafter before such acquisition. The \$1 million of yearly interest on the obligation

reduces the \$5 million limitation provided for in section 279(a)(1) to \$4 million since such interest is attributable to an obligation which was issued to provide consideration for the acquisition of stock in an acquired corporation.

Example 2. On October 9, 1969, O Corporation, a calendar year taxpayer, owned 50 percent of the total combined voting power of all classes of stock entitled to vote of P Corporation. P Corporation has no other class of stock. On January 1, 1970, while still owning such voting stock O Corporation issued to the shareholders of P Corporation to provide consideration for an additional 40 percent of P Corporation's voting stock an obligation which satisfied the tests of section 279(b) requiring it to pay \$4 million of interest each year. Hence, O Corporation acquired control of P Corporation, and the provisions of subparagraph (1)(ii) of this paragraph ceased to apply to O Corporation. Thus, 75 percent of the obligation issued by O Corporation to provide consideration for the stock of P Corporation is not corporate acquisition indebtedness (that is, of the 40 percent of the voting stock of P Corporation which was acquired, only 30 percent was needed to give O Corporation control). Since 25 percent of the obligation is corporate acquisition indebtedness, \$1 million of interest attributable to such obligation is subject to disallowance under section 279(a) for the taxable year 1970. The remaining \$3 million of interest attributable to the obligation will reduce the \$5 million limitation provided by in section 279(a)(1).

(g) *Exemptions for certain acquisitions of foreign corporations—(1) In general.* Under section 279(f), the term *corporate acquisition indebtedness* does not include any indebtedness issued to any person to provide consideration directly or indirectly for the acquisition of stock in, or assets of, any foreign corporation substantially all the income of which, for the 3-year period ending with the date of such acquisition or for such part of such period as the foreign corporation was in existence, is from sources without the United States. The interest attributable to any obligation excluded from treatment as corporate acquisition indebtedness by reason of this paragraph shall reduce the \$5 million limitation of 279(a)(1).

(2) *Foreign corporation.* For purposes of this paragraph, the term *foreign corporation* shall have the same meaning as in section 7701(a)(5).

(3) *Income from sources without the United States.* For purposes of this paragraph, the term *income from sources*

without the United States shall be determined in accordance with sections 862 and 863. If more than 80 percent of a foreign corporation's gross income is derived from sources without the United States, such corporation shall be considered to be deriving substantially all of its income from sources without the United States.

[T.D. 7262, 38 FR 5845, Mar. 5, 1973]

§ 1.279-4 Special rules.

(a) *Special 3-year rule.* Under section 279(d)(4), if an obligation which has been deemed to be corporate acquisition indebtedness for any taxable year would not be such indebtedness for each of any 3 consecutive taxable years thereafter if the ratio of debt to equity and the ratio of projected earnings to annual interest to be paid or incurred of section 279 (b)(4) were applied as of the close of each of such 3 years, then such obligation shall not be corporate acquisition indebtedness for any taxable years after such 3 consecutive taxable years. The test prescribed by section 279(b)(4) shall be applied as of the close of any taxable year whether or not the issuing corporation issues any obligation to provide consideration for an acquisition described in section 279(b)(1) in such taxable year. Thus, for example, if a corporation, reporting income on a calendar year basis, has an obligation outstanding as of December 31, 1975, which was classified as a corporate acquisition indebtedness as of the close of 1972 and such obligation would not have been classified as corporate acquisition indebtedness as of the close of 1973, 1974, and 1975 because neither of the conditions of section 279(b)(4) were present as of such dates, then such obligation shall not be corporate acquisition indebtedness for 1976 and all taxable years thereafter. Such obligation shall not be reclassified as corporate acquisition indebtedness in any taxable year following 1975, even if the issuing corporation issues more obligations (whether or not found to be corporate acquisition indebtedness) in such later years to provide consideration for the acquisition of additional stock in, or assets of, the same acquired corporation with respect to which the original obligation was issued. The interest attributable to

such obligation shall reduce the \$5 million limitation provided by section 279(a)(1) for 1976 and all taxable years thereafter.

(b) *Five percent stock rule*—(1) *In general.* Under section 279(d)(5), if an obligation issued to provide consideration for an acquisition of stock in another corporation meets the tests of section 279(b), such obligation shall be corporate acquisition indebtedness for a taxable year only if at sometime after October 9, 1969, and before the close of such year the issuing corporation owns or has owned 5 percent or more of the total combined voting power of all classes of stock entitled to vote in the acquired corporation. If the issuing corporation is a member of an affiliated group, then in accordance with section 279(g) the affiliated group shall be treated as the issuing corporation. Thus, any stock of the acquired corporation owned by members of the affiliated group shall be aggregated to determine if the percentage limitation provided by this subparagraph is exceeded. Once an obligation is deemed to be corporate acquisition indebtedness such obligation will continue to be deemed corporate acquisition indebtedness for all taxable years thereafter unless the provisions of section 279(d) (3) or (4) apply, notwithstanding the fact that the issuing corporation owns less than 5 percent of the combined voting power of all classes of stock entitled to vote of the acquired corporation in any or all taxable years thereafter.

(2) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. Corporation Y uses the calendar year as its taxable year and has only one class of stock outstanding. On June 1, 1972, X Corporation which is also a calendar year taxpayer and which has never been a shareholder of Y Corporation acquires from the shareholders of Y Corporation 4 percent of the stock of Y Corporation in exchange for obligations which satisfy the conditions of section 279(b). At no time during 1972 does X Corporation own 5 percent or more of the stock of Y Corporation. Accordingly, under the provisions of subparagraph (1) of this paragraph, for 1972 the obligations issued by X Corporation to provide consideration for the acquisition of Y Corporation's stock do not constitute corporate acquisition indebtedness.

Example 2. Assume the same facts as in *Example 1*. Assume further that on February 24, 1973, X Corporation acquires from the shareholders of Y Corporation an additional 7 percent of the stock of Y Corporation in exchange for obligations which satisfy all of the tests of section 279(b). On December 28, 1973, X Corporation sells all of its stock in Y Corporation. For 1973, the obligations issued by X Corporation in 1972 and in 1973 constitute corporate acquisition indebtedness since X Corporation at some time after October 9, 1969, and before the close of 1973 owned 5 percent or more of the voting stock of Y Corporation. Furthermore, such obligations shall be corporate acquisition indebtedness for all taxable years thereafter unless the special provisions of section 279(d) (3) or (4) could apply.

(c) *Changes in obligation*—(1) *In general.* Under section 279(h), for purposes of section 279:

(i) Any extension, renewal, or refinancing of an obligation evidencing a preexisting indebtedness shall not be deemed to be the issuance of a new obligation, and

(ii) Any obligation which is corporate acquisition indebtedness of the issuing corporation is also corporate acquisition indebtedness of any corporation which in any transaction or by operation of law assumes liability for such obligation or becomes liable for such obligation as guarantor, endorser, or indemnitor.

(2) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. On January 1, 1971, X Corporation, which files its return on the basis of a calendar year, issues an obligation, which satisfies the tests of section 279(b), and is deemed to be corporate acquisition indebtedness. On January 1, 1973, an agreement is concluded between X Corporation and the holder of the obligation whereby the maturity date of such obligation is extended until December 31, 1979. Under the provisions of subparagraph (1)(i) of this paragraph such extended obligation is not deemed to be a new obligation, and still constitutes corporate acquisition indebtedness.

Example 2. On June 12, 1971, X Corporation, a calendar year taxpayer, issued convertible and subordinated obligations to acquire the stock of Z Corporation. The obligations were deemed corporate acquisition indebtedness on December 31, 1971. On March 4, 1973, X Corporation and Y Corporation consolidated to form XY Corporation in accordance with State law. Corporation XY is liable for the obligations issued by X Corporation by oper-

ation of law and the obligations continue to be corporate acquisition indebtedness. In 1975 XY Corporation exchanges its own non-convertible obligations for the obligations X Corporation issued. The obligations of XY Corporation issued in exchange for those of X Corporation will be deemed to be corporate acquisition indebtedness.

[T.D. 7262, 38 FR 5847, Mar. 5, 1973; 38 FR 6893, Mar. 14, 1973]

§ 1.279-5 Rules for application of section 279(b).

(a) *Taxable years to which applicable*—(1) *First year of disallowance.* Under section 279(d)(1), the deduction of interest on any obligation shall not be disallowed under section 279(a) before the first taxable year of the issuing corporation as of the last day of which the application of either section 279(b)(4) (A) or (B) results in such obligation being classified as corporate acquisition indebtedness. See section 279(c)(1) and paragraph (b)(2) of this section for the time when an obligation is subjected to the test of section 279(b)(4).

(2) *General rule for succeeding years.* Under section 279(d)(2), except as provided in paragraphs (3), (4), and (5) of section 279(d), if an obligation is determined to be corporate acquisition indebtedness as of the last day of any taxable year of the issuing corporation, such obligation shall be corporate acquisition indebtedness for such taxable year and all subsequent taxable years.

(b) *Time of determination*—(1) *In general.* The determination of whether an obligation meets the conditions of section 279(b) (1), (2), and (3) shall be made as of the day on which the obligation is issued.

(2) *Ratio of debt to equity, projected earnings, and annual interest to be paid or incurred.* (i) Under section 279(c)(1), the determination of whether an obligation meets the conditions of section 279(b)(4) is first to be made as of the last day of the taxable year of the issuing corporation in which it issues the obligation to provide consideration directly or indirectly for an acquisition described in section 279(b)(1) of stock in, or assets of, the acquired corporation. An obligation which is not corporate acquisition indebtedness only because it does not satisfy the test of section 279(b)(4) in the taxable year of the issuing corporation in which the

obligation is issued for stock in, or assets of, the acquired corporation may be subjected to the test of section 279(b)(4) again. A retesting will occur in any subsequent taxable year of the issuing corporation in which the issuing corporation issues any obligation to provide consideration directly or indirectly for an acquisition described in section 279(b)(1) with respect to the same acquired corporation, irrespective of whether such subsequent obligation is itself classified as corporate acquisition indebtedness. If the issuing corporation is a member of an affiliated group, then in accordance with section 279(g) the affiliated group shall be treated as the issuing corporation. Thus, if any member of the affiliated group issues an obligation to acquire additional stock in, or assets of, the acquired corporation, this paragraph shall apply.

(ii) For purposes of section 279(b)(4) and this paragraph, in any case where the issuing corporation is a member of an affiliated group (see section 279(g) and § 1.279-6 for rules regarding application of section 279 to certain affiliated groups) which does not file a consolidated return and all the members of which do not have the same taxable year, determinations with respect to the ratio of debt to equity of, and projected earnings of, and annual interest to be paid or incurred by, any member of the affiliated group shall be made as of the last day of the taxable year of the corporation which in fact issues the obligation to provide consideration for an acquisition described in section 279(b)(1).

(3) *Redetermination where control or substantially all the properties have been acquired.* Under section 279(d)(3), if an obligation is determined to be corporate acquisition indebtedness as of the close of a taxable year of the issuing corporation in which section 279(c)(3)(A)(i) (relating to the projected earnings of the issuing corporation only) applied, but would not be corporate acquisition indebtedness if the determination were made as of the close of the first taxable year of such corporation thereafter in which section 279(c)(3)(A)(ii) (relating to the projected earnings of both the issuing corporation and the acquired corporation)

could apply, such obligation shall be considered not to be corporate acquisition indebtedness for such later taxable year and all taxable years thereafter. Where an obligation ceases to be corporate acquisition indebtedness as a result of the application of this paragraph, the interest on such obligation shall not be disallowed under section 279(a) as a deduction for the taxable year in which the obligation ceases to be corporate acquisition indebtedness and all taxable years thereafter. However, under section 279(a)(2) the interest paid or incurred on such obligation which is allowed as a deduction will reduce the \$5 million limitation provided by section 279(a)(1).

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. In 1971, X Corporation, which files its Federal income tax return on the basis of a calendar year, issues its obligations to provide consideration for the acquisition of 15 percent of the voting stock of both Y Corporation and Z Corporation. Y Corporation and Z Corporation each have only one class of stock. When issued, such obligations satisfied the tests prescribed in section 279(b) (1), (2), and (3) and would have constituted corporate acquisition indebtedness but for the test prescribed in section 279(b)(4). On December 31, 1971, the application of section 279(b)(4) results in X Corporation's obligations issued in 1971 not being treated as corporate acquisition indebtedness for that year.

Example 2. Assume the same facts as in *Example 1*, except that in 1972, X Corporation issues more obligations which come within the tests of section 279(b) (1), (2), and (3) to acquire an additional 10 percent of the voting stock of Y Corporation. No stock of Z Corporation is acquired after 1971. The application of section 279(b)(4)(B) (relating to the projected earnings of X Corporation) as of the end of 1972 results in the obligations issued in 1972 to provide consideration for the acquisition of the stock of Y Corporation being treated as corporate acquisition indebtedness. Since X Corporation during 1972 did issue obligations to acquire more stock of Y Corporation, under the provisions of section 279(c)(1) and subparagraph (2) of this paragraph the obligations issued by X Corporation in 1971 to acquire stock in Y Corporation are again tested to determine whether the test of section 279(b)(4) with respect to such obligations is satisfied for 1972. Thus, since such obligations issued by X Corporation to acquire Y Corporation's stock in 1971 previously came within the provisions of

section 279(b) (1), (2), and (3) and the projected earnings test of section 279(b)(4)(B) is satisfied for 1972, all of such obligations are to be deemed to constitute corporate acquisition indebtedness for 1972 and subsequent taxable years. The obligations issued in 1971 to acquire stock in Z Corporation continue not to constitute corporate acquisition indebtedness.

Example 3. Assume the same facts as in *Examples 1* and *2*. In 1973, X Corporation issues more obligations which come within the tests of section 279(b) (1), (2), and (3) to acquire more stock (but not control) in Y Corporation. On December 31, 1973, it is determined with respect to X Corporation that neither of the conditions described in section 279(b)(4) are present. Thus, the obligations issued in 1973 do not constitute corporate acquisition indebtedness. However, the obligations issued in 1971 and 1972 by X Corporation to acquire stock in Y Corporation continue to be treated as corporate acquisition indebtedness.

Example 4. Assume the same facts as in *Example 3*, except that X Corporation acquires control of Y Corporation in 1973. Since X Corporation has acquired control of Y Corporation, the average annual earnings (as defined in section 279(c)(3)(B) and the annual interest to be paid or incurred (as provided by section 279(c)(4)) of both X Corporation and Y Corporation under section 279(c)(3)(A)(ii) are taken into account in computing for 1973 the ratio of projected earnings to annual interest to be paid or incurred described in section 279(b)(4)(B). Assume further that after applying section 279(b)(4)(B) the obligations issued in 1973 escape treatment as corporate acquisition indebtedness for 1973. Under section 279(d)(3), all of the obligations issued by X Corporation to acquire stock in Y Corporation in 1971 and 1972 are removed from classification as corporate acquisition indebtedness for 1973 and all subsequent taxable years.

Example 5. In 1975, M Corporation, which files its Federal income tax return on the basis of a calendar year, issues its obligations to acquire 30 percent of the voting stock of N Corporation. N Corporation has only one class of stock. Such obligations satisfy the tests prescribed in section 279(b) (1), (2), and (3). Additionally, as of the close of 1975, M Corporation's ratio of debt to equity exceeds the ratio of 2 to 1 and its projected earnings do not exceed three times the annual interest to be paid or incurred. The obligations issued by M Corporation are corporate acquisition indebtedness for 1975 since all the provisions of section 279(b) are satisfied. In 1976 M Corporation issues its obligations to acquire from the shareholders of N Corporation an additional 60 percent of the voting stock of N Corporation, thereby acquiring control of N Corporation. However, with respect to the obligations issued by M

Corporation in 1975, there is no redetermination under section 279(d)(3) and subparagraph (3) of this paragraph as to whether such obligations may escape classification as corporate acquisition indebtedness because in 1975 it was the ratio of debt to equity test which caused such obligations to be corporate acquisition indebtedness. If in 1975, M Corporation met the conditions of section 279(b)(4) solely because of the ratio of projected earnings to annual interest to be paid or incurred described in section 279(b)(4)(B), its obligation issued in 1975 could be retested in 1976.

(c) *Acquisition of stock or assets of several corporations.* An issuing corporation which acquires stock in, or assets of, more than one corporation during any taxable year must apply the tests described in section 279(b) (1), (2), and (3) separately with respect to each obligation issued to provide consideration for the acquisition of the stock in, or assets of, each such acquired corporation. Thus, if an acquisition is made with obligations of the issuing corporation that satisfy the tests described in section 279(b) (2) and (3) and obligations that fail to satisfy such tests, only those obligations satisfying such tests need be further considered to determine whether they constitute corporate acquisition indebtedness. Those obligations which meet the test of section 279(b)(1) but which are not deemed corporate acquisition indebtedness shall be taken into account for purposes of determining the reduction in the \$5 million limitation of section 279(a)(1).

(d) *Ratio of debt to equity and projected earnings—(1) In general.* One of the four tests to determine whether an obligation constitutes corporate acquisition indebtedness is contained in section 279(b)(4). An obligation will meet the test of section 279(b)(4) if, as of a day determined under section 279(c)(1) and paragraph (b)(2) of this section, either:

(i) The ratio of debt to equity (as defined in paragraph (f) of this section) of the issuing corporation exceeds 2 to 1, or

(ii) The projected earnings (as defined in subparagraph (2) of this paragraph) of the issuing corporation, or of both the issuing corporation and acquired corporation in any case where subparagraph (2)(ii) of this paragraph is applicable, do not exceed three times

the annual interest to be paid or incurred (as defined in paragraph (e) of this section) by such issuing corporation, or, where applicable, by such issuing corporation and acquired corporation. Where paragraphs (d)(2)(ii) and (e)(1)(ii) of this section are applicable in computing projected earnings and annual interest to be paid or incurred, 100 percent of the acquired corporation's projected earnings and annual interest to be paid or incurred shall be included in such computation, even though less than all of the stock or assets of the acquired corporation have been acquired.

(2) *Projected earnings.* The term *projected earnings* means the "average annual earnings" (as defined in subparagraph (3) of this paragraph) of:

(i) The issuing corporation only, if subdivision (ii) of this subparagraph, does not apply, or

(ii) Both the issuing corporation and the acquired corporation, in any case where the issuing corporation as of the close of its taxable year has acquired control, or has acquired substantially all of the properties, of the acquired corporation.

For purposes of subdivision (ii) of this subparagraph, an acquisition of "substantially all of the properties" of the acquired corporation means the acquisition of assets representing at least 90 percent of the fair market value of the net assets and at least 70 percent of the fair market value of the gross assets held by the acquired corporation immediately prior to the acquisition.

(3) *Average annual earnings.* (i) The term *average annual earnings* referred to in subparagraph (2) of this paragraph is, for any corporation, the amount of its earnings and profits for any 3-year period ending with the last day of a taxable year of the issuing corporation in which it issues any obligation to provide consideration for an acquisition described in section 279(b)(1), computed without reduction for:

(a) Interest paid or incurred,

(b) Depreciation or amortization allowed under Chapter 1 of the Code,

(c) Liability for tax under Chapter 1 of the Code, and

(d) Distributions to which section 301(c)(1) apply (other than such distributions from the acquired corpora-

tion to the issuing corporation), and reduced to an annual average for such 3-year period. For the rules to determine the amount of earnings and profits of any corporation, see section 312 and the regulations thereunder.

(ii) Except as provided for in subdivision (iii) of this subparagraph, for purposes of subdivision (i) of this subparagraph in the case of any corporation, the earnings and profits for such 3-year period shall be reduced to an annual average by dividing such earnings and profits by 36 and multiplying the quotient by 12. If a corporation was not in existence during the entire 36-month period as of the close of the taxable year referred to in subdivision (i) of this subparagraph, its average annual earnings shall be determined by dividing its earnings and profits for the period of its existence by the number of whole calendar months in such period and multiplying the quotient by 12.

(iii) Where the issuing corporation acquires substantially all of the properties of an acquired corporation, the computation of earnings and profits of such acquired corporation shall be made for the period of such corporation beginning with the first day of the 3-year period of the issuing corporation and ending with the last day prior to the date on which substantially all of the properties were acquired. In determining the number of whole calendar months for such acquired corporation where the period for determining its earnings and profits includes 2 months which are not whole calendar months and the total number of days in such 2 fractional months exceeds 30 days, the number of whole calendar months for such period shall be increased by one. Where the number of days in the 2 fractional months total 30 days or less such fractional months shall be disregarded. After the number of whole calendar months is determined, the calculation for average annual earnings shall be made in the same manner as described in the last sentence of subdivision (ii) of this subparagraph.

(e) *Annual interest to be paid or incurred*—(1) *In general.* For purposes of section 279(b)(4)(B), the term *annual interest to be paid or incurred* means:

(i) If subdivision (ii) of this subparagraph does not apply, the annual interest to be paid or incurred by the issuing corporation only, for the taxable year beginning immediately after the day described in section 279(c)(1), determined by reference to its total indebtedness outstanding as of such day, or

(ii) If projected earnings are determined under paragraph (d)(2)(ii) of this section, the annual interest to be paid or incurred by both the issuing corporation and the acquired corporation for 1 year beginning immediately after the day described in section 279(c)(1), determined by reference to their combined total indebtedness outstanding as of such day. However, where the issuing corporation acquires substantially all of the properties of the acquired corporation, the annual interest to be paid or incurred will be determined by reference to the total indebtedness outstanding of the issuing corporation only (including any indebtedness it assumed in the acquisition) as of the day described in section 279(c)(1). The term *annual interest to be paid or incurred* refers to both actual interest and unstated interest. Such unstated interest includes original issue discount as defined in paragraph (a)(1) of § 1.163-4 and amounts treated as interest under section 483. For purposes of this paragraph and paragraph (f) of this section (relating to the ratio of debt to equity), the indebtedness of any corporation shall be determined in accordance with generally accepted accounting principles. Thus, for example, the indebtedness of a corporation includes short-term liabilities, such as accounts payable to suppliers, as well as long-term indebtedness. Contingent liabilities, such as those arising out of discounted notes, the assignment of accounts receivable, or the guarantee of the liability of another, shall be included in the determination of the indebtedness of a corporation if the contingency is likely to become a reality. In addition, the indebtedness of a corporation includes obligations issued by the corporation, secured only by property of the corporation, and with respect to which the corporation is not personally liable. See section 279(g) and § 1.279-6 for rules with respect to the

computation of annual interest to be paid or incurred in regard to members of an affiliated group of corporations.

(2) *Examples.* The provisions of these paragraphs may be illustrated by the following examples:

Example 1. Corporation X's earnings and profits calculated in accordance with section 279(c)(3)(B) for 1972, 1971, and 1970 respectively were \$29 million, \$23 million, and \$20 million. The interest to be paid or incurred during the calendar year of 1973 as determined by reference to the issuing corporation's total outstanding indebtedness as of December 31, 1972, was \$10 million. By dividing the sum of the earnings and profits for the 3 years by 36 (the number of whole calendar months in the 3-year period) and multiplying the quotient by 12, the average annual earnings for X Corporation is \$24 million. Since the projected earnings of X Corporation do not exceed by three times the annual interest to be paid or incurred (they exceed by only 2.4 times), one of the circumstances described in section 279(b)(4) is present.

Example 2. On March 1, 1972, W Corporation acquires substantially all of the properties of Z Corporation in exchange for W Corporation's bonds which satisfy the tests of section 279(b) (2) and (3). W Corporation files its income tax returns on the basis of fiscal years ending June 30. Z Corporation, which was formed on September 1, 1969, is a calendar year taxpayer. The earnings and profits of W Corporation for the last 3 fiscal years ending June 30, 1972, calculated in accordance with the provisions of section 279(c)(3)(B) were \$300 million, \$400 million, and \$380 million, respectively. The average annual earnings of W Corporation is \$360 million (\$1,080 million ÷ 36 × 12). The earnings and profits of Z Corporation calculated in accordance with the provisions of section 279(c)(3)(B) were \$4 million for the period of September 1, 1969 to December 31, 1969, \$10 million and \$14 million for the calendar years of 1970 and 1971, respectively, and \$2 million for the period of January 1, 1972, through February 29, 1972, or a total of \$30 million. To arrive at the average annual earnings, the sum of the earnings and profits, \$30 million, must be divided by 30 (the number of whole calendar months that Z Corporation was in existence during W Corporation's 3-year period ending with the day prior to the date substantially all the assets were acquired) and the quotient is multiplied by 12, which results in an average annual earnings of \$12 million (\$30 million ÷ 30 × 12) for Z Corporation. The combined average annual earnings of W Corporation and Z Corporation is \$372 million. The interest for the fiscal year ending June 30, 1973, to be paid or

incurred by W Corporation on its outstanding indebtedness as of June 30, 1972, is \$110 million. Since the projected earnings exceed the annual interest to be paid or incurred by more than three times, the obligation will not be corporate acquisition indebtedness, unless the issuing corporation's debt to equity ratio exceeds 2 to 1.

(f) *Ratio of debt to equity*—(1) *In general.* The condition described in section 279(b)(4)(A) is present if the ratio of debt to equity of the issuing corporation exceeds 2 to 1. Under section 279(c)(2), the term *ratio of debt to equity* means the ratio which the total indebtedness of the issuing corporation bears to the sum of its money and all its other assets (in an amount equal to adjusted basis for determining gain) less such total indebtedness. For the meaning of the term *indebtedness*, see paragraph (e)(1) of this section. See section 279(g) and § 1.279-6 for rules with respect to the computation of the ratio of debt to equity in regard to an affiliated group of corporations.

(2) *Examples.* The provisions of section 279(b)(4)(A) and this paragraph may be illustrated by the following example:

[$\$5$ million interest to be paid or incurred \times $\$80$ million owed to X Bank by its customers/ $\$100$ million total indebtedness]

Example 1. On June 1, 1971, X Corporation, which files its federal income tax returns on a calendar year basis, issues an obligation for $\$45$ million to the shareholders of Y Corporation to provide consideration for the acquisition of all of the stock of Y Corporation. Such obligation has the characteristics of corporate acquisition indebtedness described in section 279(b) (2) and (3). The projected earnings of X Corporation and Y Corporation exceed 3 times the annual interest to be paid or incurred by those corporations and, accordingly, the condition described in section 279(b)(4)(B) is not present. Also, on December 31, 1971, X Corporation has total assets with an adjusted basis of $\$150$ million (including the newly acquired stock of Y Corporation having a basis of $\$45$ million) and total indebtedness of $\$90$ million. Hence, X Corporation's equity is $\$60$ million computed by subtracting its $\$90$ million of total indebtedness from its $\$150$ million of total assets. Since X Corporation's ratio of debt to equity of 1.5 to 1 ($\$90$ million of total indebtedness over $\$60$ million equity) does not exceed 2 to 1, the condition described in section 279(b)(4)(A) is not present. Therefore, X Corporation's obligation for $\$45$ million is not corporate acquisition

indebtedness because on December 31, 1971, neither of the conditions specified in section 279(b)(4) existed.

(g) *Special rules for banks and lending or finance companies*—(1) *Debt to equity and projected earnings.* Under section 279(c)(5), with respect to any corporation which is a bank (as defined in section 581) or is primarily engaged in a lending or finance business, the following rules are to be applied:

(i) In determining under paragraph (f) of this section the ratio of debt to equity of such corporation (or of the affiliated group of which such corporation is a member), the total indebtedness of such corporation (and the assets of such corporation) shall be reduced by an amount equal to the total indebtedness owed to such corporation which arises out of the banking business of such corporation, or out of the lending or finance business of such corporation, as the case may be;

(ii) In determining under paragraph (e) of this section the annual interest to be paid or incurred by such corporation (or by the issuing corporation and acquired corporation referred to in section 279(c)(4)(B) or by the affiliated group of corporations of which such corporation is a member), the amount of such interest (determined without regard to this subparagraph) shall be reduced by an amount which bears the same ratio to the amount of such interest as the amount of the reduction for the taxable year under subdivision (i) of this subparagraph bears to the total indebtedness of such corporation; and

(iii) In determining under section 279(c)(3)(B) the average annual earnings, the amount of the earnings and profits for the 3-year period shall be reduced by the sum of the reductions under subdivision (ii) of this subparagraph for such period.

For purposes of this paragraph, the term *lending or finance business* means a business of making loans or purchasing or discounting accounts receivable, notes, or installment obligations. Additionally, the rules stated in this paragraph regarding the application of the ratio of debt to equity, the determination of the annual interest to be paid or incurred, and the determination of the average annual earnings also apply

Internal Revenue Service, Treasury

§ 1.279-6

if the bank or lending or finance company is a member of an affiliated group of corporations. However, the rules are to be applied only for purposes of determining the debt, equity, projected earnings and annual interest of the bank or lending or finance company which then are taken into account in determining the debt to equity ratio and ratio of projected earnings to annual interest to be paid or incurred by the affiliated group as a whole. Thus, these rules are to be applied to reduce the bank's or lending or finance corporation's indebtedness, annual interest to be paid or incurred, and average annual earnings which are taken into account with respect to the group, but are not to reduce the indebtedness of, annual interest to be paid or incurred by, and average annual earnings of, any corporation in the affiliated group which is not a bank or a lending or finance company. In determining whether any corporation which is a member of an affiliated group is primarily engaged in a lending or finance business, only the activities of such corporation, and not those of the whole group, are to be taken into account. See § 1.279-6 for the application of section 279 to certain affiliated groups of corporations.

(2) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. As of the close of the taxable year, X Bank has a total indebtedness of \$100 million, total assets of \$115 million, and \$80 million is owed to X Bank by its customers. Bank X's indebtedness is \$20 million (\$100 million total indebtedness less \$80 million owed to the X Bank by its customers) and its assets are \$35 million (\$115 million total assets less \$80 million owed to the bank by its customers). If its annual interest to be paid or incurred is \$5 million, such amount is reduced by \$4 million. Thus, X Bank's annual interest to be paid or incurred is \$1 million.

Example 2. Assume the same facts as in *Example 1*. X Bank has earnings and profits of \$23 million for the 3-year period used to determine projected earnings. In computing the average annual earnings, the \$23 million amount will be reduced by \$12 million (three times the \$4 million reduction of interest in *Example 1*, assuming that the reduction was the same for each year). Thus X Bank's earnings and profits for such 3-year period are \$11

million (\$23 million total earnings and profits less \$12 million reduction).

[T.D. 7262, 38 FR 5847, Mar. 7, 1973, as amended by T.D. 9264, 71 FR 30593, May 30, 2006]

§ 1.279-6 Application of section 279 to certain affiliated groups.

(a) *In general.* Under section 279(g), in any case in which the issuing corporation is a member of an affiliated group, the application of section 279 shall be determined by treating all of the members of the affiliated group in the aggregate as the issuing corporation, except that the ratio of debt to equity of, projected earnings of, and the annual interest to be paid or incurred by any corporation (other than the issuing corporation determined without regard to this paragraph) shall be included in the determinations required under section 279(b)(4) as of any day only if such corporation is a member of the affiliated group on such day, and, in determining projected earnings of such corporation under section 279(c)(3), there shall be taken into account only the earnings and profits of such corporation for the period during which it was a member of the affiliated group. The total amount of an affiliated member's assets, indebtedness, projected earnings, and interest to be paid or incurred will enter into the computation required by this section, irrespective of any minority ownership in such member.

(b) *Aggregate money and other assets.* In determining the aggregate money and all the other assets of the affiliated group, the money and all the other assets of each member of such group shall be separately computed and such separately computed amounts shall be added together, except that adjustments shall be made, as follows:

(1) There shall be eliminated from the aggregate money and all the other assets of the affiliated group intercompany receivables as of the date described in section 279(c)(1);

(2) There shall be eliminated from the total assets of the affiliated group any amount which represents stock ownership in any member of such group;

(3) In any case where gain or loss is not recognized on transactions between members of an affiliated group under

§ 1.279-7

26 CFR Ch. I (4-1-17 Edition)

paragraph (d)(3) of this section, the basis of any asset involved in such transaction shall be the transferor's basis;

(4) The basis of property in a transaction to which § 1.1502-13 applies is the basis of the property determined under that section; and

(5) There shall be eliminated from the money and all the other assets of the affiliated group any other amount which, if included, would result in a duplication of amounts in the aggregate money and all the other assets of the affiliated group.

(c) *Aggregate indebtedness.* For purposes of applying section 279(c), in determining the aggregate indebtedness of an affiliated group of corporations the total indebtedness of each member of such group shall be separately determined, and such separately determined amounts shall be added together, except that there shall be eliminated from such total indebtedness as of the date described in section 279(c)(1):

(1) The amount of intercompany accounts payable,

(2) The amount of intercompany bonds or other evidences of indebtedness, and

(3) The amount of any other indebtedness which, if included, would result in a duplication of amounts in the aggregate indebtedness of such affiliated group.

(d) *Aggregate projected earnings.* In the case of an affiliated group of corporations (whether or not such group files a consolidated return under section 1501), the aggregate projected earnings of such group shall be computed by separately determining the projected earnings of each member of such group under paragraph (d) of § 1.279-5, and then adding together such separately determined amounts, except that:

(1) A dividend (a distribution which is described in section 301(c)(1) other than a distribution described in section 243(c)(1)) distributed by one member to another member shall be eliminated, and

(2) In determining the earnings and profits of any member of an affiliated group, there shall be eliminated any amount of interest income received or accrued, and of interest expense paid or

incurred, which is attributable to intercompany indebtedness,

(3) No gain or loss shall be recognized in any transaction between members of the affiliated group, and

(4) Members of an affiliated group who file a consolidated return shall not apply the provisions of § 1.1502-18 dealing with inventory adjustments in determining earnings and profits for purposes of this section.

(e) *Aggregate interest to be paid or incurred.* For purposes of section 279(c)(4), in determining the aggregate annual interest to be paid or incurred by an affiliated group of corporations, the annual interest to be paid or incurred by each member of such affiliated group shall be separately calculated under paragraph (e) of § 1.279-5, and such separately calculated amounts shall be added together, except that any amount of annual interest to be paid or incurred on any intercompany indebtedness shall be eliminated from such aggregate interest.

[T.D. 7262, 38 FR 5850, Mar. 5, 1973, as amended by T.D. 8560, 59 FR 41675, Aug. 15, 1994; T.D. 8597, 60 FR 36679, July 18, 1995]

§ 1.279-7 Effect on other provisions.

Under section 279(j), no inference is to be drawn from any provision in section 279 and the regulations thereunder that any instrument designated as a bond, debenture, note, or certificate or other evidence of indebtedness by its issuer represents an obligation or indebtedness of such issuer in applying any other provision of this title. Thus, for example, an instrument, the interest on which is not subject to disallowance under section 279 could, under section 385 and the regulations thereunder, be found to constitute a stock interest, so that any amounts paid or payable thereon would not be deductible.

[T.D. 7262, 38 FR 5851, Mar. 5, 1973]

§ 1.280B-1 Demolition of structures.

(a) *In general.* Section 280B provides that, in the case of the demolition of any structure, no deduction otherwise allowable under chapter 1 of subtitle A shall be allowed to the owner or lessee of such structure for any amount expended for the demolition or any loss

Internal Revenue Service, Treasury

§ 1.280C-3

sustained on account of the demolition, and that the expenditure or loss shall be treated as properly chargeable to the capital account with respect to the land on which the demolished structure was located.

(b) *Definition of structure.* For purposes of section 280B, the term *structure* means a building, as defined in §1.48-1(e)(1), including the structural components of that building, as defined in §1.48-1(e)(2).

(c) *Effective date.* This section is effective for demolitions commencing on or after December 30, 1997.

[T.D. 8745, 62 FR 67726, Dec. 30, 1997]

§ 1.280C-1 Disallowance of certain deductions for wage or salary expenses.

If an employer elects to claim the targeted jobs credit under section 44B (as amended by the Revenue Act of 1978), or elects to claim the new jobs credit under section 44B (as in effect prior to enactment of the Revenue Act of 1978), the employer must reduce its deduction for wage or salary expenses paid or incurred in the year the credit is earned by the amount allowable as credit (determined without regard to the provisions of section 53). In the case in which wages and salaries are capitalized the amount subject to depreciation must be reduced by an amount equal to the amount of the credit (determined without regard to the provisions of section 53) in determining the depreciation deduction. In the case of an employer who uses the full absorption method of inventory costing under §1.471-11, the portion of the basis of the inventory attributable to the wage or salary expenses giving rise to the credit and paid or incurred in the year the credit is earned must be reduced by the amount of the credit allowable (determined without regard to the provisions of section 53). If the employer is an organization that is under common control (as described in §1.52-1), it must reduce its deduction for wage or salary expenses by the amount of the credit apportioned to it under §1.52-1 (a) or (b). The deduction for wage and salary expenses must be reduced in the year the credit is earned, even if the employer is unable to use

the credit in that year because of the limitations imposed by section 53.

(Secs. 44B, 381, and 7805 of the Internal Revenue Code of 1954, 92 Stat. 2834 (28 U.S.C. 44B); 91 Stat. 148 (26 U.S.C. 381(c)(26)); 68A Stat. 917 (28 U.S.C. 7805))

[T.D. 7921, 48 FR 52908, Nov. 23, 1983]

§ 1.280C-3 Disallowance of certain deductions for qualified clinical testing expenses when section 28 credit is allowable.

(a) *In general.* If a taxpayer is entitled to a credit under section 28 for qualified clinical testing expenses (as defined in section 28(b)), it must reduce the amount of any deduction for qualified clinical testing expenses paid or incurred in the year the credit is earned by the amount allowable as credit for such expenses (determined without regard to section 28(d)(2)).

(b) *Capitalization of qualified clinical testing expenses.* In a case in which qualified clinical testing expenses are capitalized, the amount chargeable to the capital account for a taxable year must be reduced by the excess of the amount of the credit allowable for the taxable year under section 28 (determined without regard to section 28(d)(2)) over the amount allowable as a deduction for qualified clinical testing expenses (determined without regard to paragraph (a) of this section) for the taxable year. See section 174 and the regulations thereunder.

(c) *Controlled group of corporations; organizations under common control.* In the case of a taxpayer described in paragraph (d)(5) of §1.28-1 of this chapter (relating to controlled groups of corporations and organizations under common control), paragraphs (a) and (b) of this section shall be applied in accordance with the rules prescribed for aggregation of expenditures under that paragraph.

(d) *Example.* The following example illustrates the application of paragraphs (a) and (b) of this section:

Example. A incurs \$1,000 in clinical testing expenses for which a \$500 credit is allowable under section 28. A also elects under section 174 of the Code to amortize these expenses over a 5-year period beginning in the year the credit is claimed. Under paragraph (a), the current year amortization deduction of \$200 ($\$1,000 \div 5$) is disallowed. Moreover, the

§ 1.280C-4

26 CFR Ch. I (4-1-17 Edition)

amount which would otherwise be capitalized, \$800, is reduced by the excess of the amount of the section 28 credit claimed for the taxable year over the amount of the allowable section 174 amortization deduction for the taxable year, or \$300 (\$500-\$200). Thus, the amount chargeable to the capital account for the taxable year is \$500 (\$800-\$300). A is entitled to amortize \$500 over the remaining amortization period resulting in a deduction of \$125 for each of the remaining four years.

[T.D. 8232, 53 FR 38715, Oct. 3, 1988]

§ 1.280C-4 Credit for increasing research activities.

(a) *In general.* An election under section 280C(c)(3) to have the provisions of section 280C(c)(1) and (c)(2) not apply and elect the reduced research credit under section 280C(c)(3)(B) shall be made on Form 6765, “Credit for Increasing Research Activities” (or any successor form). In order for the election to be effective, the Form 6765 must clearly indicate the taxpayer’s intent to make the section 280C(c)(3) election, and must be filed with an original return for the taxable year filed on or before the due date (including extensions) for filing the income tax return for such year, regardless of whether any research credits are claimed on the original return. An election, once made for any taxable year, is irrevocable for that taxable year.

(b) *Controlled groups of corporations; trades or businesses under common control—(1) In general.* A member of a controlled group of corporations (within the meaning of section 41(f)(5)), or a trade or business which is treated as being under common control with other trades or businesses (within the meaning of section 41(f)(1)(B)), may make the election under section 280C(c)(3). However, only the common parent (within the meaning of § 1.1502-77(a)(1)(i)) of a consolidated group may make the election on behalf of the members of a consolidated group. A member or trade or business shall make the election on Form 6765 and by the time prescribed in paragraph (a) of this section.

(2) [Reserved]. For further guidance, see § 1.280C-4T(b)(2).

(c)(1) *Effective/applicability date.* This section applies to taxable years ending on or after July 27, 2011.

(2) [Reserved]. For further guidance, see § 1.280C-4T(c)(2).

(3) [Reserved]. For further guidance, see § 1.280C-4T(c)(3).

[T.D. 9539, 76 FR 44801, July 27, 2011, as amended by T.D. 9717, 80 FR 18099, Apr. 3, 2015]

§ 1.280C-4T Credit for increasing research activities (temporary).

(a) [Reserved]. For further guidance, see § 1.280C-4(a).

(b) *Controlled groups of corporations; trades or businesses under common control.* (1) [Reserved]. For further guidance, see § 1.280C-4(b)(1).

(2) *Example.* The following example illustrates an application of paragraph (b) of this section: A, B, and C, all of which are calendar year taxpayers, are members of a controlled group of corporations (within the meaning of section 41(f)(5)). A, B, and C each attach a statement to the 2012 Form 6765, “Credit for Increasing Research Activities,” showing A and C were the only members of the controlled group to have qualified research expenses when calculating the group credit. A and C report their allocated portions of the group credit on the 2012 Form 6765 and B reports no research credit on Form 6765. Pursuant to § 1.280C-4(a), A and B, but not C, each make an election for the reduced credit under section 280(c)(3)(B) on the 2012 Form 6765. In December 2013, B determines it had qualified research expenses in 2012 resulting in an increased group credit. On an amended 2012 Form 6765, A, B, and C each report their allocated portions of the group credit. B reports its credit as a regular credit under section 41(a) and reduces the credit under section 280C(c)(3)(B). C may not reduce its credit under section 280(c)(3)(B) because C did not make an election for the reduced credit with its original return.

(c)(1) [Reserved]. For further guidance see § 1.280C-4(c)(1).

(2) *Taxable years beginning after December 31, 2011.* Section 1.280C-4T is applicable for taxable years beginning on or after April 3, 2015. Taxpayers may apply § 1.280C-4T to taxable years beginning after December 31, 2011, but before April 3, 2015. For a taxpayer that does not apply § 1.280C-4T to a taxable year beginning after December 31, 2011, but before April 3, 2015, the guidance that applies to such taxable year is contained in Notice 2013-20 (2013-15 IRB 902).

Internal Revenue Service, Treasury

§ 1.280F-2T

(3) *For taxable years ending before January 1, 2012.* See § 1.280C-4 as contained in 26 CFR part 1, revised April 1, 2014.

(4) *Expiration date.* The applicability of paragraph (b)(2) expires on April 2, 2018.

[T.D. 9717, 80 FR 18099, Apr. 3, 2015]

§ 1.280F-1T Limitations on investment tax credit and recovery deductions under section 168 for passenger automobiles and certain other listed property; overview of regulations (temporary).

(a) *In general.* Section 280F(a) limits the amount of investment tax credit determined under section 46(a) and recovery deductions under section 168 for passenger automobiles. Section 280F(b) denies the investment tax credit and requires use of the straight line method of recovery for listed property that is not predominantly used in a qualified business use. In certain circumstances, section 280F(b) requires the recapture of an amount of cost recovery deductions previously claimed by the taxpayer. Section 280F(c) provides that lessees are to be subject to restrictions substantially equivalent to those imposed on owners of such property under section 280F (a) and (b). Section 280F(d) provides definitions and special rules; note that section 280F(d) (2) and (3) apply with respect to all listed property, even if the other provisions of section 280F do not affect the treatment of the property.

(b) *Key to Code provisions.* The following table identifies the provisions of section 280F under which regulations are provided, and lists each provision below with its corresponding regulation section:

| Section 1.280F-2T | Section 1.280F-3T | Section 1.280F-4T | Sections 1.280F-5T and 1.280F-7 | Section 1.280F-6 |
|-------------------|-------------------|-------------------|---------------------------------|------------------|
| (a) | (b) | (d)(2) | (c) | (d)(3) |
| (d)(1) | (d)(1) | | | (d)(4) |
| (d)(8) | | | | (d)(5) |
| (d)(10) | | | | (d)(6) |

Sections 1.280F-2T(f) and 1.280F-4T(b) also provide special rules for improvements to passenger automobiles and other listed property that qualify as capital expenditures.

(c) *Effective dates—(1) In general.* This section and §§ 1.280F-2T through 1.280F-

6 apply to property placed in service or leased after June 18, 1984, in taxable years ending after that date. Section 1.280F-7 applies to property leased after December 31, 1986, in taxable years ending after that date.

(2) *Exception.* This section and §§ 1.280F-2T through 1.280F-6 shall not apply to any property:

(i) Acquired pursuant to a binding contract in effect on June 18, 1984, and at all times thereafter, or under construction by the taxpayer on that date, but only if the property is placed in service before January 1, 1985 (January 1, 1987, in the case of 15-year real property), or

(ii) Leased pursuant to a binding contract in effect on June 18, 1984, and at all times thereafter, but only if the lessee first uses such property under the lease before January 1, 1985 (January 1, 1987, in the case of 15-year real property).

(3) *Leased passenger automobiles.* Section 1.280F-5T(e) generally applies to passenger automobiles leased after April 2, 1985, and before January 1, 1987, in taxable years ending after April 2, 1985. Section 1.280F-5T(e) generally applies to passenger automobiles leased after April 2, 1985, in taxable years ending after that date. Section 1.280F-5T(e) does not apply to any passenger automobile that is leased pursuant to a binding contract, which is entered into no later than April 2, 1985, and which is in effect at all times thereafter, but only if the automobile is used under the lease before August 1, 1985. If § 1.280F-5T(e) does not apply to a passenger automobile, see paragraph (c) (1) and (2) of this section. Section 1.280F-7(a) applies to passenger automobiles leased after December 31, 1986, in taxable years ending after that date.

[T.D. 7986, 49 FR 42704, Oct. 24, 1984, as amended by T.D. 8061, 50 FR 46038, Nov. 6, 1985; T.D. 8218, 53 FR 29881, Aug. 9, 1988; T.D. 8473, 58 FR 19060, Apr. 12, 1993; T.D. 9133, 69 FR 35514, June 25, 2004]

§ 1.280F-2T Limitations on recovery deductions and the investment tax credit for certain passenger automobiles (temporary).

(a) *Limitation on amount of investment tax credit—(1) General rule.* The amount

of the investment tax credit determined under section 46(a) for any passenger automobile shall not exceed \$1,000. For a passenger automobile placed in service after December 31, 1984, the \$1,000 amount shall be increased by the automobile price inflation adjustment (as defined in section 280F(d)(7)) for the calendar year in which the automobile is placed in service.

(2) *Election of reduced investment tax credit.* If the taxpayer elects under section 48(q)(4) to reduce the amount of the investment tax credit in lieu of adjusting the basis of the passenger automobile under section 48(q)(1), the amount of the investment tax credit for any passenger automobile shall not exceed two-thirds of the amount determined under paragraph (a)(1) of this section.

(b) *Limitations on allowable recovery deductions—(1) Recovery deduction for year passenger automobile is placed in service.* For the taxable year that a taxpayer places a passenger automobile in service, the allowable recovery deduction under section 168(a) shall not exceed \$4,000. See paragraph (b)(3) of this section for the adjustment to this limitation.

(2) *Recovery deduction for remaining taxable years during the recovery period.* For any taxable year during the recovery period remaining after the year that the property is placed in service, the allowable recovery deduction under section 168(a) shall not exceed \$6,000. See paragraph (b)(3) of this section for the adjustment to this limitation.

(3) *Adjustment to limitation by reason of automobile price inflation adjustment.* The limitations on the allowable recovery deductions prescribed in paragraph (b) (1) and (2) of this section are increased by the automobile price inflation adjustment (as defined in section 280F(d)(7)) for the calendar year in which the automobile is placed in service.

(4) *Coordination with section 179.* For purposes of section 280F(a) and this section, any deduction allowable under section 179 (relating to the election to expense certain depreciable trade or business assets) is treated as if that deduction were a recovery deduction under section 168. Thus, the amount of

the section 179 deduction is subject to the limitations described in paragraph (b) (1) and (2) of this section.

(c) *Disallowed recovery deductions allowed for years subsequent to the recovery period—(1) In general.* (i) Except as otherwise provided in this paragraph (c), the “unrecovered basis” (as defined in paragraph (c)(1)(ii) of this section) of any passenger automobile is treated as a deductible expense in the first taxable year succeeding the end of the recovery period.

(ii) The term *unrecovered basis* means the excess (if any) of:

(A) The unadjusted basis (as defined in section 168(d)(1)(A), except that there is no reduction by reason of an election to expense a portion of the basis under section 179) of the passenger automobile, over

(B) The amount of the recovery deductions (including any section 179 deduction elected by the taxpayer) which would have been allowable for taxable years in the recovery period (determined after the application of section 280F (a) and paragraph (b) of this section and as if all use during the recovery period were used described in section 168(c)(1)).

(2) *Special rule when taxpayer elects to use the section 168(b)(3) optional recovery percentages.* If the taxpayer elects to use the optional recovery percentages under section 168(b)(3) or must use the straight line method over the earnings and profits life (as defined and described in §1.280F-3T(f)), the second succeeding taxable year after the end of the recovery period is treated as the first succeeding taxable year after the end of the recovery period for purposes of this paragraph (c) because of the half-year convention. For example, assume a calendar-year taxpayer places in service on July 1, 1984, a passenger automobile (i.e., 3-year recovery property) and elects under section 168(b)(3) to recover its cost over 5 years using the straight line optional percentages. Based on these facts, calendar year 1990 is treated as the first succeeding taxable year after the end of the recovery period.

(3) *Deduction limited to \$6,000 for any taxable year.* The amount that may be treated as a deductible expense under this paragraph (c) in the first taxable

year succeeding the recovery period shall not exceed \$6,000. Any excess shall be treated as an expense for the succeeding taxable years. However, in no event may any deduction in a succeeding taxable year exceed \$6,000. The limitation on amounts deductible as an expense under this paragraph (c) with respect to any passenger automobile is increased by the automobile price inflation adjustment (as defined in section 280F(d)(7)) for the calendar year in which such automobile is placed in service.

(4) *Deduction treated as a section 168 recovery deduction.* Any amount allowable as an expense in a taxable year after the recovery period by reason of this paragraph (c) shall be treated as a recovery deduction allowable under section 168. However, a deduction is allowable by reason of this paragraph (c) with respect to any passenger automobile for a taxable year only to the extent that a deduction under section 168 would be allowable with respect to the automobile for that year. For example, no recovery deduction is allowable for a year during which a passenger automobile is disposed of or is used exclusively for personal purposes.

(d) *Additional reduction in limitations by reason of personal use of passenger automobile or by reason of a short taxable year.* See paragraph (i) of this section for rules regarding the additional reduction in the limitations prescribed by paragraphs (a) through (c) of this section by reason of the personal use of a passenger automobile or by reason of a short taxable year.

(e) *Examples.* The provisions of paragraphs (a) through (c) of this section may be illustrated by the following examples. For purposes of these examples, assume that all taxpayers use the calendar year and that no short taxable years are involved.

Example 1. (i) On July 1, 1984, B purchases for \$45,000 and places in service a passenger automobile which is 3-year recovery property under section 168. In 1984, B does not elect under section 179 to expense a portion of the cost of the automobile. The automobile is used exclusively in B's business during taxable years 1984 through 1990.

(ii) The maximum amount of B's investment tax credit is \$1,000 (*i.e.*, the lesser of \$1,000 or $.06 \times \$45,000$). B's unadjusted basis for purposes of section 168 is \$44,500 (*i.e.*,

\$45,000 reduced under section 48(q)(1) by \$500). B selects the use of the accelerated recovery percentages under section 168(b)(1).

(iii) The maximum amount of B's recovery deduction for 1984 is \$4,000 (*i.e.*, the lesser of \$4,000 or $.25 \times \$44,500$); for 1985, \$6,000 (*i.e.*, the lesser of \$6,000 or $.38 \times \$44,500$); and for 1986, \$6,000 (*i.e.*, the lesser of \$6,000 or $.37 \times \$44,500$).

(iv) At the beginning of taxable year 1987, B's unrecovered basis in the automobile is \$28,500 (*i.e.*, $\$44,500 - \$16,000$). Under paragraph (c) of this section, B may expense \$6,000 of the unrecovered basis in the automobile in 1987. This expense is treated as a recovery deduction under section 168. For taxable years 1988 through 1990, B may deduct \$6,000 of the unrecovered basis per year. At the beginning of 1991, B's unrecovered basis in the automobile is \$4,500. During that year, B disposes of the automobile. B is not allowed a deduction for 1991 because no deduction would be allowable under section 168 based on these facts.

Example 2. (i) On July 1, 1984, C purchases for \$50,000 and places in service a passenger automobile which is 3-year recovery property under section 168. The automobile is used exclusively in C's business during taxable years 1984 through 1992. In 1984, C does not elect under section 179 to expense a portion of the automobile's cost. C elects under section 48(q)(4) to take a reduced investment tax credit in lieu of the section 48(q)(1) basis adjustment.

(ii) The maximum amount of C's investment tax credit is \$666.67 (*i.e.*, the lesser of $\frac{1}{3}$ of \$1,000 or $.04 \times \$50,000$). C's unadjusted basis for purposes of section 168 is \$50,000. C elects to use the optional recovery percentages under section 168(b)(3) based on a 5-year recovery period.

(iii) The maximum amount of C's recovery deduction for 1984 is \$4,000 (*i.e.*, the lesser of \$4,000 or $.10 \times \$50,000$); for taxable years 1985 through 1988, \$6,000 per year (*i.e.*, the lesser of \$6,000 or $.20$ of \$50,000). C's recovery deduction for 1989 is \$5,000 (*i.e.*, the lesser of $.10 \times \$50,000$ or \$6,000).

(iv) At the beginning of taxable year 1990, C's unrecovered basis in the automobile is \$17,000. Under paragraph (c) of this section, C may expense \$6,000 of the unrecovered basis in the automobile in 1990. This expense is treated as a recovery deduction under section 168. For taxable years 1991 and 1992, C may deduct \$6,000, and \$5,000, respectively of the unrecovered basis per year.

Example 3. Assume the same facts as in Example 2, except that C disposes of the passenger automobile on July 1, 1990. Under paragraph (c) of this section, C is not allowed a deduction for 1990 or for any succeeding taxable year because no deduction would be allowable under section 168 based on these facts.

Example 4. (i) On July 1, 1984, G purchases for \$15,000 and places in service a passenger

automobile which is 3-year recovery property under section 168. The automobile is used exclusively in G's business during taxable years 1984 through 1987. In 1984, G elects under section 179 to expense \$5,000 of the cost of the property.

(ii) The maximum amount of G's investment tax credit is \$600 (*i.e.*, the lesser of .06 \times \$10,000 or \$1,000).

(iii) G's unadjusted basis for purposes of section 168 is \$9,700 (*i.e.*, \$15,000 minus the sum of \$5,000 (the amount of the expense elected under section 179) and \$300 (one-half of the investment tax credit under section 48(q)(1))). Under paragraph (b)(4) of this section, the allowable deduction under section 179 is treated as a recovery deduction under section 168 for purposes of this section. Thus, the maximum amount of G's section 179 deduction is \$4,000 (*i.e.*, the lesser of \$4,000 or \$5,000 $+ .25 \times$ \$9,700). G is entitled to no further recovery deduction under section 168 for 1984. The amount of G's 1985 and 1986 recovery deductions are \$3,686 (*i.e.*, the lesser of .38 \times \$9,700 or \$6,000) and \$3,589 (*i.e.*, the lesser of .37 \times \$9,700 or \$6,000), respectively. At the beginning of 1987, G's unrecovered basis in the automobile is \$3,425 (*i.e.*, \$14,700 $-$ \$11,275). Under paragraph (c) of this section, G may expense the remaining \$3,425 in 1987.

Example 5. (i) On July 1, 1984, D purchases for \$55,000 and places in service a passenger automobile which is 3-year recovery property under section 168. The automobile is used exclusively in D's business during taxable years 1984 through 1993. In 1984, D elects under section 179 to expense \$5,000 of the cost of the property.

(ii) The maximum amount of D's investment tax credit is \$1,000 (*i.e.*, the lesser of \$1,000 or .06 \times \$50,000).

(iii) D's unadjusted basis for purposes of section 168 is \$49,500 (*i.e.*, \$55,000 minus the sum of \$5,000 (the amount of the expense elected under section 179) and \$500 (one-half of the investment tax credit under section 48(q)(1))). Under paragraph (b)(4) of this section, the allowable deduction under section 179 is treated as a recovery deduction under section 168 for purposes of this section. Thus, the maximum amount of D's section 179 deduction is \$4,000 (*i.e.*, the lesser of \$4,000 or \$5,000 $+ .25 \times$ \$49,500). D is entitled to no further recovery deduction under section 168 for 1984. The maximum amount of D's 1985 recovery deduction is \$6,000 (*i.e.*, the lesser of \$6,000 or .38 \times \$49,500); and for 1986, \$6,000 (*i.e.*, the lesser of \$6,000 or .37 of \$49,500).

(iv) At the beginning of 1987, D's unrecovered basis is \$38,500. D may expense the remaining unrecovered basis at the rate of \$6,000 per year through 1992 and \$2,500 in 1993.

Example 6. Assume the same facts as in *Example 5*, except that in 1993, D uses the automobile only 60 percent in his business. Under paragraph (c)(4) of this section for 1993, D may expense \$1,500 (*i.e.*, .60 \times \$2,500). D is en-

titled to no further deductions with respect to the automobile in any later year.

Example 7. (i) On July 1, 1984, F purchases for \$44,500 and places in service a passenger automobile which is 3-year recovery property under section 168. The automobile is used exclusively in F's business during taxable years 1984 through 1992. In 1984, F elects under section 179 to expense \$5,000 of the cost of the property.

(ii) F elects under section 48(q)(4) to take a reduced investment tax credit in lieu of the section 48(q)(1) basis adjustment. The maximum amount of F's investment tax credit is \$666.67 (*i.e.*, the lesser of $\frac{2}{3}$ of \$1,000 or .04 \times \$39,500).

(iii) F's unadjusted basis for purposes of section 168 is \$39,500 (*i.e.*, \$44,500 $-$ \$5,000 (the amount of the expense elected under section 179)). F elects to use the optional recovery percentage under section 168(b)(3) based on a 5-year recovery period. Under paragraph (b)(4) of this section, the allowable section 179 deduction is treated as a recovery deduction under section 168 for purposes of this section. Thus, the maximum amount of F's section 179 deduction is \$4,000 (*i.e.*, the lesser of \$4,000 or \$5,000 $+ .10 \times$ \$39,500). F is entitled to no further recovery deduction under section 168 for 1984. The maximum amounts of F's recovery deductions for 1985 through 1988 are \$6,000 per year (*i.e.*, the lesser of \$6,000 or .20 \times \$39,500). F's recovery deduction for 1989 (the first taxable year after the 5-year recovery period but the sixth recovery year for purposes of section 168) is \$3,950 (*i.e.*, the lesser of .10 \times \$39,500 or \$6,000).

(iv) Under paragraph (c), taxable year 1990 is considered to be the first taxable year succeeding the end of the recovery period. At the beginning of taxable year 1990, F's unrecovered basis in the automobile is \$12,550 (*i.e.*, \$44,500 $-$ \$31,950). Under paragraph (c), F may expense \$6,000 of his unrecovered basis in the automobile in 1990 and in 1991. This expense is treated as a recovery deduction under section 168. For taxable year 1992, F may expense the remaining \$550 of his unrecovered basis in the automobile.

(f) *Treatment of improvements that qualify as capital expenditures.* An improvement to a passenger automobile that qualifies as a capital expenditure under section 263 is treated as a new item of recovery property placed in service in the year the improvement is made. However, the limitations in paragraph (b) of this section on the amount of recovery deductions allowable are determined by taking into account as a whole both the improvement and the property of which the improvement is a part. If that improvement also qualifies as an investment in new

section 38 property under section 48(b) and § 1.48-2(b)(2), the limitation in paragraph (a)(1) of this section on the amount of the investment tax credit for that improvement is determined by taking into account any investment tax credit previously allowed for the passenger automobile (including any prior improvement considered part of the passenger automobile). Thus, the maximum credit allowable for the automobile (including the improvement) will be \$1,000 (or $\frac{2}{3}$ of \$1,000, in the case of an election to take a reduced credit under section 48(q)(4)) (adjusted under section 280F(d)(7) to reflect the automobile price inflation adjustment for the year the property of which the improvement is a part is placed in service).

(g) *Treatment of section 1031 or section 1033 transactions*—(1) *Treatment of exchanged passenger automobile.* For a taxable year in which a transaction described in section 1031 or section 1033 occurs, the unadjusted basis of an exchanged or converted passenger automobile shall cease to be taken into account in determining any recovery deductions allowable under section 168 as of the beginning of the taxable year in which the exchange or conversion occurs. Thus, no recovery deduction is allowable for the exchanged or converted automobile in the year of the exchange or conversion.

(2) *Treatment of acquired passenger automobile*—(i) *In general.* The acquired automobile is treated as new property placed in service in the year of the exchange (or in the replacement year) and that year is its first recovery year.

(ii) *Limitations on recovery deductions.* If the exchanged (or converted) automobile was acquired after the effective date of section 280F (as set out in § 1.280F-1(c)), the basis of that automobile as determined under section 1031(d) or section 1033(b) (whichever is applicable) must be reduced for purposes of computing recovery deductions with respect to the acquired automobile (but not for purposes of determining the amount of the investment tax credit and gain or loss on the sale or other disposition of the property) by the excess (if any) of:

(A) The sum of the amounts that would have been allowable as recovery

deductions with respect to the exchanged (or converted) automobile during taxable years preceding the year of the exchange (or conversion) if all of the use of the automobile during those years was use described in section 168(c), over

(B) The sum of the amounts allowable as recovery deductions during those years.

(3) *Examples.* The provisions of this paragraph (g) may be illustrated by the following examples:

Example 1. (i) In 1982, F purchases and places in service a passenger automobile which is 3-year recovery property under section 168. The automobile is used exclusively in F's business.

(ii) On July 1, 1984, F exchanges the passenger automobile and \$1,000 cash for a new passenger automobile ("like kind" property). Under paragraph (g)(1) of this section, no recovery deduction is allowed in 1984 for the exchanged automobile. Any investment tax credit claimed with respect to that automobile is subject to recapture under section 47.

(iii) F's basis in the acquired property (as determined under section 1031(d) and F's qualified investment are \$20,000. Under the provisions of paragraph (g)(2)(i) of this section, the acquired property is treated as new recovery property placed in service in 1984 to the extent of the full \$20,000 of basis. The maximum amount of F's investment tax credit is limited to \$1,000 (i.e., the lesser of \$1,000 or $.06 \times \$20,000$). Cost recovery deductions are computed pursuant to paragraph (b) of this section.

Example 2. (i) On July 1, 1984, E purchases for \$30,000 and places in service a passenger automobile which is 3-year recovery property under section 168. In 1984, E's business use percentage is 80 percent and such use constitutes his total business/investment use.

(ii) E elects under section 48(q)(4) to take a reduced investment tax credit in lieu of the section 48 (q)(1) basis adjustment. The maximum amount of E's investment tax credit is \$533.33 (i.e., the lesser of $\frac{2}{3}$ of $\$1,000 \times .80$ or $.80 \times .04 \times \$30,000$).

(iii) E's unadjusted basis for purposes of section 168 is \$30,000. E selects the use of the accelerated recovery percentages under section 168(b)(1). The maximum amount of E's recovery deduction for 1984 is \$3,200 (i.e., the lesser of $.80 \times \$4,000$ or $.80 \times .25 \times \$30,000$).

(iv) On June 10, 1985, E exchanges the passenger automobile and \$1,000 cash for a new passenger automobile ("like kind" property). Under paragraph (g)(1) of this section, no recovery deduction is allowable in 1985 for the exchanged automobile. The investment tax credit claimed is subject to recapture under

§ 1.280F-2T

26 CFR Ch. I (4-1-17 Edition)

section 47. Under paragraph (g)(2)(ii) of this section, E's basis in the acquired property for purposes of computing recovery deductions under section 280F is \$27,000 (*i.e.*, \$27,800 (section 1031(d) basis) – \$800). The acquired automobile is used exclusively in F's business during taxable years 1985 through 1988. Under paragraph (g)(2) of this section, the acquired property is treated as new recovery property placed in service in 1985. Assume that the automobile price inflation adjustment (as described under section 280F(d)(7)) is zero. E's qualified investment in the property, as determined under § 1.46-3(c)(1), is \$27,800. The maximum amount of E's investment tax credit is \$1,000 (*i.e.*, the lesser of \$1,000 or $.06 \times \$27,800$). E's unadjusted basis for purposes of section 168 is \$26,500 (*i.e.*, \$27,000 reduced under section 48(q)(1) by \$500). Cost recovery deductions are computed pursuant to paragraph (b) of this section.

(h) *Other nonrecognition transactions.*
[Reserved]

(i) *Limitation under this section applies before other limitations—(1) Personal use.* The limitations imposed upon the maximum amount of the allowable investment tax credit and the allowable recovery deductions (as described in paragraphs (a) through (c) of this section) must be adjusted during any taxable year in which a taxpayer makes any use of a passenger automobile other than for business/investment use (as defined in § 1.280F-6(d)(3)). The limitations on the amount of the allowable investment tax credit (as described in paragraph (a) of this section) and the allowable cost recovery deductions (as described in paragraphs (b) and (c) of this section) are redetermined by multiplying the limitations by the percentage of business/investment use (determined on an annual basis) during the taxable year.

(2) *Short taxable year.* The limitations imposed upon the maximum amount of the allowable recovery deductions (as described in paragraphs (a) through (c) of this section) must be adjusted during any taxable year in which a taxpayer has a short taxable year. In this case, the limitation is adjusted by multiplying the limitation that would have been applied if the taxable year were not a short taxable year by a fraction, the numerator of which is the number of months and part-months in the short taxable year and the denominator of which is 12.

(3) *Examples.* The provisions of this paragraph (i) may be illustrated by the following examples:

Example 1. On July 1, 1984, A purchases and places in service a passenger automobile and uses it 80 percent for business/investment use during 1984. Under paragraph (i)(1) of this section, the maximum amount of the investment tax credit that A may claim for the automobile is \$800 (*i.e.*, $.80 \times \$1,000$).

Example 2. Assume the same facts as in *Example 1*, except that A elects under section 48(q)(4) to take a reduced investment tax credit in lieu of the section 48(q)(1) basis adjustment. Under paragraph (i)(1) of this section, the maximum amount of the investment tax credit that A may claim for the automobile is \$533.33 (*i.e.*, $.80 \times \frac{2}{3} \times \$1,000$).

Example 3. On July 1, 1984, B purchases and places in service a passenger automobile and uses it 60 percent for business/investment use during 1984. Under paragraph (i)(1) of this section, the maximum amount of the investment tax credit that B may claim for the automobile is \$600 (*i.e.*, $.60 \times \$1,000$). B uses the car 70 percent for business/investment use during 1985 and 80 percent during 1986. Under paragraph (i)(1) of this section, the maximum amount of recovery deductions that B may claim for 1984, 1985, and 1986 are \$2,400 (*i.e.*, $.60 \times \$4,000$), \$4,200 (*i.e.*, $.70 \times \$6,000$), and \$4,800 (*i.e.*, $.80 \times \$6,000$), respectively.

Example 4. Assume the same facts as in *Example 3* with the added facts that B's unrecovered basis at the beginning of 1987 is \$6,000 and that B uses the automobile 85 percent for business/investment use during 1987. Under paragraph (i)(1) of this section, the maximum amount that B may claim as an expense for 1987 is \$5,000 (*i.e.*, $.85 \times \$6,000$).

Example 5. On August 1, 1984, C purchases and places in service a passenger automobile and uses it exclusively for business. Taxable year 1984 for C is a short taxable year which consists of 6 months. Under paragraph (i)(2) of this section, the maximum amount that C may claim as a recovery deduction for 1984 is \$2,000 (*i.e.*, $\frac{6}{12} \times \$4,000$).

Example 6. Assume the same facts as in *Example 5*, except that C uses the passenger automobile 70 percent for business/investment use during 1984. Under paragraph (i)(1) and (2) of this section, the maximum amount that C may claim as a recovery deduction for 1984 is \$1,400 (*i.e.*, $.70 \times \frac{6}{12} \times \$4,000$).

(98 Stat. 494, 26 U.S.C. 280F; 68A Stat. 917, 26 U.S.C. 7805)

[T.D. 7986, 49 FR 42704, Oct. 24, 1984, as amended by T.D. 9133, 69 FR 35514, June 25, 2004]

§ 1.280F-3T Limitations on recovery deductions and the investment tax credit when the business use percentage of listed property is not greater than 50 percent (temporary).

(a) *In general.* Section 280F(b), generally, imposes limitations with respect to the amount allowable as an investment tax credit under section 46(a) and the amount allowable as a recovery deduction under section 168 in the case of listed property (as defined in § 1.280F-6(b)) if certain business use of the property (referred to as “qualified business use”) does not exceed 50 percent during a taxable year. *Qualified business use* generally means use in a trade or business, rather than use in an investment or other activity conducted for the production of income within the meaning of section 212. See § 1.280F-6(d) for the distinction between “business/investment use” and “qualified business use.”

(b) *Limitation on the amount of investment tax credit—(1) Denial of investment tax credit when business use percentage not greater than 50 percent.* Listed property is not treated as section 38 property to any extent unless the business use percentage (as defined in section 280F(d)(6) and § 1.280F-6(d)(1)) is greater than 50 percent. For example, if a taxpayer uses listed property in a trade or business in the taxable year in which it is placed in service, but the business use percentage is not greater than 50 percent, no investment tax credit is allowed for that listed property. If, in the taxable year in which listed property is placed in service, the only business/investment use (as defined in § 1.280F-6(d)(3)) of that property is qualified business use (as defined in § 1.280F-6(d)(2)(i)), and the business use percentage is 55 percent, the investment tax credit is allowed for the 55 percent of the listed property that is treated as section 38 property. The credit allowed is unaffected by any increase in the business use percentage in a subsequent taxable year.

(2) *Recapture of investment tax credit.* Listed property ceases to be section 38 property to the extent that the business/investment use (as defined in § 1.280F-6(d)(3)) for any taxable year is less than the business/investment use

for the taxable year in which the property is placed in service. See § 1.47-2(c). If the business use percentage (as defined in § 1.280F-6(d)(1)) of listed property is greater than 50 percent for the taxable year in which the property is placed in service, and less than or equal to 50 percent for any subsequent taxable year, that property ceases to be section 38 property in its entirety in that subsequent taxable year. Under § 1.47-1(c)(1)(ii)(b), the property (or a portion thereof) is treated as ceasing to be section 38 property on the first day of the taxable year in which the cessation occurs.

(c) *Limitation on the method of cost recovery under section 168 when business use of property not greater than 50 percent—(1) Year of acquisition.* If any listed property (as defined in § 1.280F-6(b)) is not predominantly used in a qualified business use (as defined in § 1.280F-6(d)(4)) in the year it is acquired, the recovery deductions allowed under section 168 for the property for that taxable year and for succeeding taxable years are to be determined using the straight line method over its earnings and profits life (as defined in paragraph (f) of this section). Additionally, the taxpayer is not entitled to make any election under section 179 with respect to the property for that year.

(2) *Subsequent years.* If any listed property is not subject to paragraph (c)(1) of this section because such property is predominantly used in a qualified business use (as defined in § 1.280F-6(d)(4)) during the year it is acquired but is not predominantly used in a qualified business use during a subsequent taxable year, the rules of this paragraph (c)(2) apply. In such a case, the taxpayer must determine the recovery deductions allowed under section 168 for the taxable year that the listed property is not predominantly used in a qualified business use and for any subsequent taxable year as if such property was not predominantly used in a qualified business use in the year in which it was acquired and there had been no section 179 election with respect to the property. Thus, the recovery deductions allowable under section 168 for the remaining taxable years are computed by determining the applicable recovery percentage that would

§ 1.280F-3T

26 CFR Ch. I (4-1-17 Edition)

apply if the taxpayer had used the straight line method over the property's earnings and profits life beginning with the year the property was placed in service.

(3) *Effect of rule on recovery property that is not listed property.* The mandatory use of the straight line method over the property's earnings and profits life under paragraphs (d) (1) and (2) of this section does not have any effect on the proper method of cost recovery for other recovery property of that same class placed in service in the same taxable year by the taxpayer and does not constitute an election to use an optional recovery period under section 168(b)(3).

(d) *Recapture of excess recovery deductions claimed—(1) In general.* If paragraph (c)(2) of this section is applicable, any excess depreciation (as defined in paragraph (d)(2) of this section) must be included in the taxpayer's gross income and added to the property's adjusted basis for the first taxable year in which the property is not predominantly used in a qualified business use (as defined in § 1.280F-6(d)(4)).

(2) *Definition of excess depreciation.* For purposes of this section, the term *excess depreciation* means the excess (if any) of:

(i) The amount of the recovery deductions allowable with respect to the property for taxable years before the first taxable year in which the property was not predominantly used in a qualified business use, over

(ii) The amount of the recovery deductions which would have been allowable for those years if the property had not been predominantly used in a qualified business use for the year it was acquired and there had been no section 179 election with respect to the property.

For purposes of paragraph (d)(2)(i), any deduction allowable under section 179 (relating to the election to expense certain depreciable trade or business assets) is treated as if that deduction was a recovery deduction under section 168.

(3) *Recordkeeping requirement.* A taxpayer must be able to substantiate the use of any listed property, as prescribed in section 274(d)(4) and § 1.274-5T or § 1.274-6T, for any taxable year for which recapture under section

280F(b)(3) and paragraph (d) (1) and (2) of this section may occur even if the taxpayer has fully depreciated (or expensed) the listed property in a prior year. For example, in the case of 3-year recovery property, the taxpayer shall maintain a log, journal, etc. for six years even though the taxpayer fully depreciated the property in the first three years.

(e) *Earnings and profits life—(1) Definition.* The earnings and profits life with respect to any listed property is generally the following:

| In the case of— | The applicable recovery period is— |
|--|------------------------------------|
| 3-year property | 5 years. |
| 5-year property | 12 years. |
| 10-year property | 25 years. |
| 18-year real property and low-income housing | 40 years. |
| 15-year public utility property | 35 years. |

However, if the recovery period applicable to any recovery property under section 168 is longer than the above assigned recovery period, such longer recovery period shall be used. For example, generally, the recovery period for recovery property used predominantly outside the United States is the property's present class life (as defined in section 168(g)(2)). In many cases, a property's present class life is longer than the recovery period assigned to the property under the above table. Pursuant to this paragraph (e)(1), the property's recovery period is its present class life.

(2) *Applicable recovery percentages.* If the applicable recovery period is determined pursuant to the table prescribed in paragraph (e)(1) of this section, the applicable recovery percentage is:

(i) For property other than 18-year real property or low-income housing:

| If the recovery year is— | And the recovery period is— | | | |
|--------------------------|-----------------------------|-------|----|----|
| | 5 | 12 | 25 | 35 |
| 1 | 10 | 4 | 2 | 1 |
| 2 | 20 | 9 | 4 | 3 |
| 3 | 20 | 9 | 4 | 3 |
| 4 | 20 | 9 | 4 | 3 |
| 5 | 10 | 8 | 4 | 3 |
| 7 | | 8 | 4 | 3 |
| 8 | | 8 | 4 | 3 |
| 9 | | 8 | 4 | 3 |
| 10 | | 8 | 4 | 3 |
| 11 | | 8 | 4 | 3 |
| 12 | | 8 | 4 | 3 |
| 13 | | 4 | 4 | 3 |
| 14 | | | 4 | 3 |

Internal Revenue Service, Treasury

§ 1.280F-3T

| If the recovery year is— | And the recovery period is— | | | |
|--------------------------|-----------------------------|----|----|----|
| | 5 | 12 | 25 | 35 |
| 15 | | | 4 | 3 |
| 16 | | | 4 | 3 |
| 17 | | | 4 | 3 |
| 18 | | | 4 | 3 |

| 33 | | | | 2 |
| 34 | | | | 2 |
| 35 | | | | 2 |
| 36 | | | | 1 |

(ii) For 18-year real property: [Reserved]

(iii) For low-income housing: [Reserved]

(f) *Examples.* The provisions of this section may be illustrated by the following examples. For purposes of these examples, assume that all taxpayers use the calendar year and that no short taxable years are involved.

Example 1. On July 1, 1984, B purchases for \$50,000 and places in service an item of listed property (other than a passenger automobile) which is 3-year recovery property under section 168. For the first taxable year that the property is in service, B used the property 40 percent in a trade or business, 40 percent for the production of income, and 20 percent for personal purposes. Although B's total business/investment use is greater than 50 percent, the business use percentage for that taxable year is only 40 percent. Under paragraph (b)(1) of this section, no investment tax credit is allowed for the property.

Example 2. (i) On January 1, 1985, C purchases for \$40,000 and places in service an item of listed property (other than a passenger automobile) that is 3-year recovery property under section 168. Seventy percent of the use of the property is in C's trade or business and 30 percent of the use is for personal purposes. C does not elect a reduced investment tax credit under section 48(q)(4). The amount of C's investment tax credit is \$1,680 (i.e., $\$40,000 \times .60 \times .10 \times .70$).

(ii) In addition, in 1986, only 55 percent of the use of the property is in C's trade or business and 45 percent of the use is for personal purposes. Under paragraph (b)(2) of this section, the property ceases to be section 38 property to the extent that the use in a trade

or business decreased below 70 percent. As a result, a portion of the investment tax credit must be recaptured as an increase in tax liability for 1986 under the rules of section 47 (relating to the recapture of investment tax credit). See section 47(a)(5) and § 1.47-2(e) for rules relating to the computation of the recapture amount.

Example 3. On July 1, 1984, B purchases and places in service an item of listed property (other than a passenger automobile) that is 3-year recovery property. B elects to take a reduced investment tax credit under section 48(q)(4). In 1984, B uses the property exclusively in his business. Assume that B's 1984 allowable recovery deduction is \$12,500. In 1985 and 1986, the property is not predominantly used in a qualified business use. The investment tax credit claimed is subject to recapture in full under section 47 in 1985 since the property ceases to be section 38 property in its entirety on January 1, 1985. Under paragraph (c)(2) of this section, B must treat the property for 1985 and subsequent taxable years as if he recovered its cost over a 5-year recovery period (i.e., its earnings and profits life) using the straight line method (with the half-year convention) from the time it was placed in service. Therefore, taxable year 1985 is treated as the property's second recovery year (of its 5-year recovery period) and the applicable recovery deduction using the straight line method must be used to determine the recovery deduction. Under paragraph (d) of this section, B must recapture any excess depreciation claimed for taxable year 1984. If B had used the straight line method over a 5-year recovery period his recovery deduction for 1984 would have been \$5,000. Under paragraph (d)(2) of this section, B's excess depreciation is \$7,500 (i.e., $\$12,500 - \$5,000$) and that amount must be included in B's 1985 gross income and added to the property's basis. The taxable years 1986 through 1989 are the property's second through sixth recovery years, respectively, of such property's 5-year recovery period.

Example 4. Assume the same facts as in *Example 3*, except that in 1986 B used the property exclusively in his business. B is entitled to no investment tax credit with respect to the property in 1986 and must continue to recover the property's cost over a 5-year recovery period using the straight line method.

Example 5. On July 1, 1984, H purchases and places in service listed property (other than a passenger automobile) which is 3-year recovery property under section 168. H selects the use of the accelerated recovery percentages under section 168. In 1984 through 1986, H uses the property exclusively for business. In 1987, the property is not predominantly used in a qualified business use. Under paragraph (c)(2) of this section, H must compute

his 1987 and subsequent taxable year's recovery deductions using the straight line method over a 5-year recovery period with 1987 treated as the fourth recovery year. Under paragraph (d) of this section, H must recapture any excess depreciation claimed for taxable years 1984 through 1986 even though by 1987 the full cost of the property had already been recovered.

Example 6. Assume the same facts as in *Example 5*, except that H uses the property exclusively for personal purposes in 1987. Under paragraph (d) of this section, H must recapture any excess depreciation claimed for taxable years 1984 through 1986. H is entitled to no cost recovery deduction under the 5-year straight line method for 1987. Assume further that in 1988 H uses the property 70 percent in his business. Thus, H's business use percentage for that year is 70 percent. Under paragraph (c)(2) of this section, H must compute his 1988 cost recovery deduction using the straight line method over a 5-year recovery period with 1988 treated as the fifth recovery year.

Example 7. (i) On July 1, 1984, F purchases for \$70,000 and places in service listed property (other than a passenger automobile) which is 3-year recovery property under section 168. F's business use percentage for 1984 through 1986 is 60 percent. F elects under section 179 to expense \$5,000 of the cost of the property.

(ii) F elects a reduced investment tax credit under section 48(q)(4). The maximum amount of F's investment tax credit is \$1,560 (*i.e.*, $\$65,000 \times .04 \times .60$).

(iii) F's unadjusted basis for purposes of section 168 is \$65,000 (*i.e.*, \$70,000 reduced by the \$5,000 section 179 expense). F selects the use of the accelerated recovery percentages under section 168(b)(1). F's recovery deduction for 1984 is \$9,750 (*i.e.*, $\$65,000 \times .25 \times .60$).

(iv) In 1985, the property is not predominantly used in a qualified business use. The investment tax credit claimed is subject to recapture in full under section 47 in 1985 since the property ceases to be section 38 property in its entirety on January 1, 1985. Under paragraph (c)(2) of this section, F must treat the property for 1985 and subsequent taxable years as if he recovered its cost over a 5-year recovery period (*i.e.*, its earnings and profits life) using the straight line method (with the half year convention) from the time it was placed in service. Under paragraph (d) of this section, F must recapture any excess depreciation claimed for taxable year 1984. F's excess depreciation is \$10,550 [*i.e.*, $(\$65,000 \times .25 \times .60 + \$5,000) - (\$70,000 \times .10 \times .60)$]. This amount must be included in F's 1985 gross income and added to the property's adjusted basis.

Example 8. (i) On July 1, 1984, G purchases for \$60,000 and places in service a passenger automobile which is 3-year recovery property under section 168.

(ii) In 1984, G's business use percentage is 80 percent and such use constitutes his total business/investment use. G elects under section 48(q)(4) to take a reduced investment tax credit in lieu of the basis adjustment under section 48(q)(1). The maximum amount of G's investment tax credit is \$533.33 (*i.e.*, the lesser of $.80 \times \frac{2}{3} \times \$1,000$ or $\$60,000 \times .80 \times .04$).

(iii) In 1984, G does not elect under section 179 to expense a portion of the automobile's cost. G selects the use of the accelerated recovery percentages under section 168. G's unadjusted basis for purposes of section 168 is \$60,000. The maximum amount of G's 1984 recovery deduction is \$3,200 (*i.e.*, the lesser of $.80 \times \$4,000$ or $.80 \times .25 \times \$60,000$).

(iv) In 1985, G's business use percentage is 80 percent and such use constitutes his total business/investment use. The maximum amount of G's 1985 recovery deduction is \$4,800 (*i.e.*, the lesser of $.80 \times \$6,000$ or $.80 \times .38 \times \$60,000$).

(v) In 1986, G's business use percentage is 45 percent and such use constitutes his total business/investment use. Under paragraph (b)(2) of this section, as a result of the decline in the business use percentage to 50 percent or less, the automobile ceases to be section 38 property in its entirety and G must recapture (pursuant to §§ 1.47-1(c) and 1.47-2(e)) the investment tax credit previously claimed. Since G's business use percentage in 1986 is not greater than 50 percent, under the provisions of paragraph (d) of this section, G must recompute (for recapture purposes) his recovery deductions for 1984 and 1985 using the straight line method over a 5-year recovery period (*i.e.*, earnings and profits life for 3-year recovery property using the half-year convention) to determine if any excess depreciation must be included in his 1986 taxable income. G's recomputed recovery deductions for 1984 and 1985 are \$3,200 (*i.e.*, the lesser of $.80 \times \$4,000$ or $.80 \times .10 \times \$60,000$), and \$4,800 (*i.e.*, the lesser of $.80 \times \$6,000$ or $.80 \times .20 \times \$60,000$), respectively. G does not have to recapture any excess depreciation since his recovery deductions for 1984 and 1985 computed using the straight line method over a 5-year recovery period are the same as the amounts actually claimed during those years.

(vi) Under paragraph (c)(2) of this section, for 1986 and succeeding taxable years G must compute his remaining recovery deductions using the straight line method over a 5-year recovery period beginning with the third recovery year. The maximum amount of G's 1986 recovery deduction is \$2,700 (*i.e.*, the lesser of $.45 \times \$6,000$ or $.45 \times .20 \times \$60,000$). For taxable years 1987 through 1993, G's business use percentage is 55 percent and such use constitutes his total business/investment use. G's 1987 and 1988 recovery deductions are \$3,300 per year (*i.e.*, the lesser of $.55 \times \$6,000$ or $.55 \times .20 \times \$60,000$). For taxable year 1989 (the

last recovery year), G's recovery deduction is \$3,300 (*i.e.*, $.55 \times .10 \times \$60,000$ or $.55 \times \$6,000$).

(vii) As of the beginning of 1990, G will have claimed a total of \$20,600 of recovery deductions. Under § 1.280F-2T(c), G may expense his remaining unrecovered basis (up to a certain amount per year) in the first succeeding taxable year after the end of the recovery period and in taxable years thereafter. If G had used his automobile for 100 percent business use in taxable years 1984 through 1989, G could have claimed a recovery deduction of \$4,000 in 1984 and a recovery deduction of \$6,000 in each of those remaining years. At the beginning of 1990, therefore, G's unrecovered basis (as defined in section 280F(d)(8)) is \$26,000 (*i.e.*, $\$60,000 - \$34,000$). The maximum amount of G's 1990 recovery deduction is \$3,300 (*i.e.*, $.55 \times \$6,000$). At the beginning of 1991, G's unrecovered basis is \$20,000 (*i.e.*, $\$26,000$ adjusted under section 280F(d)(2) and § 1.280F-4T(a) to account for the amount that would have been claimed in 1990 for 100 percent business/investment use during that year). The maximum amount of G's 1991 recovery deduction is \$3,300 (*i.e.*, $.55 \times \$6,000$) and his unrecovered basis as of the beginning of 1992 is \$14,000 (*i.e.*, $\$20,000 - \$6,000$). In 1992, G disposes of the automobile. G is not allowed a recovery deduction for 1992.

(98 Stat. 494, 26 U.S.C. 280F; 68A Stat. 917, 26 U.S.C. 7805)

[T.D. 7986, 49 FR 42707, Oct. 24, 1984, as amended by T.D. 8061, 50 FR 46038, Nov. 6, 1985; T.D. 9133, 69 FR 35514, June 25, 2004]

§ 1.280F-4T Special rules for listed property (temporary).

(a) *Limitations on allowable recovery deductions in subsequent taxable years—*
(1) *Subsequent taxable years affected by reason of personal use in prior years.* For purposes of computing the amount of the recovery deduction for "listed property" for a subsequent taxable year, the amount that would have been allowable as a recovery deduction during an earlier taxable year if all of the use of the property was use described in section 168(c) is treated as the amount of the recovery deduction allowable during that earlier taxable year. The preceding sentence applies with respect to all earlier taxable years, beginning with the first taxable year in which some or all use of the "listed property" is use described in section 168(c). For example, on July 1, 1984, B purchases and places in service listed property (other than a passenger automobile) which is 5-year recovery

property under section 168. B selects the use of the accelerated percentages under section 168. B's business/investment use of the property (all of which is qualified business use as defined in section 280F(d)(6)(B) and § 1.280F-6(d)(2)) in 1984 through 1988 is 80 percent, 70 percent, 60 percent, and 55 percent, respectively, and B claims recovery deductions for those years based on those percentages. B's qualified business use for the property for 1989 and taxable years thereafter increases to 100 percent. Pursuant to this rule, B may not claim a recovery deduction in 1989 (or for any subsequent taxable year) for the increase in business use because there is no adjusted basis remaining to be recovered for cost recovery purposes after 1988.

(2) *Special rule for passenger automobiles.* In the case of a passenger automobile that is subject to the limitations of § 1.280F-2T, the amount treated as the amount that would have been allowable as a recovery deduction if all of the use of the automobile was use described in section 168(c) shall not exceed \$4,000 for the year the passenger automobile is placed in service and \$6,000 for each succeeding taxable year (adjusted to account for the automobile price inflation adjustment, if any, under section 280F(d)(7) and for short taxable year under § 1.280F-2T(i)(2)). See § 1.280F-3T(g). *Example 8.*

(b) *Treatment of improvements that qualify as capital expenditures—*(1) *In general.* In the case of any improvement that qualifies as a capital expenditure under section 263 made to any listed property other than a passenger automobile, the rules of this paragraph (b) apply. See § 1.280F-2T(f) for the treatment of an improvement made to a passenger automobile.

(2) *Investment tax credit allowed for the improvement.* If the improvement qualifies as an investment in new section 38 property under section 48(b) and § 1.48-2(b), the investment tax credit for that improvement is limited by paragraph (b)(1) of § 1.280F-3T, as applied to the item of listed property as a whole.

(3) *Cost recovery of the improvement.* The improvement is treated as a new item of recovery property. The method of cost recovery with respect to that improvement is limited by § 1.280F-

§ 1.280F-5T

26 CFR Ch. I (4-1-17 Edition)

3T(c), as applied to the item of listed property as a whole.

(98 Stat. 494, 26 U.S.C. 280F; 68A Stat. 917, 26 U.S.C. 7805)

[T.D. 7986, 49 FR 42710, Oct. 24, 1984, as amended by T.D. 9133, 69 FR 35514, June 25, 2004]

§ 1.280F-5T Leased property (temporary).

(a) *In general.* Except as otherwise provided in this section, the limitation on cost recovery deductions and the investment tax credit provided in section 280F (a) and (b) and §§ 1.280F-2T and 1.280F-3T do not apply to any listed property leased or held for leasing by any person regularly engaged in the business of leasing listed property. If a person is not regularly engaged in the business of leasing listed property, the limitations on cost recovery deductions and the investment tax credit provided in section 280F and §§ 1.280F-2T and 1.280F-3T apply to such property leased or held for leasing by such person. The special rules for lessees set out in this section apply with respect to all lessees of listed property, even those whose lessors are not regularly engaged in the business of leasing listed property. For rules on determining inclusion amounts with respect to passenger automobiles, see paragraphs (d), (e) and (g) of this section, and see § 1.280F-7(a). For rules on determining inclusion amounts with respect to other listed property, see paragraphs (f) and (g) of this section, and see § 1.280F-7(b).

(b) *Section 48(d) election.* If a lessor elects under section 48(d) with respect to any listed property to treat the lessee as having acquired such property, the amount of the investment tax credit allowed to the lessee is subject to the limitation prescribed in § 1.280F-3T(b) (1) and (2). If a lessor elects under section 48(d) with respect to any passenger automobile to treat the lessee as having acquired such automobile, the amount of the investment tax credit allowed to the lessee is also subject to the limitations prescribed in § 1.280F-2T (a) and (i).

(c) *Regularly engaged in the business of leasing.* For purposes of paragraph (a) of this section, a person shall be considered regularly engaged in the busi-

ness of leasing listed property only if contracts to lease such property are entered into with some frequency over a continuous period of time. The determination shall be made on the basis of the facts and circumstances in each case, taking into account the nature of the person's business in its entirety. Occasional or incidental leasing activity is insufficient. For example, a person leasing only one passenger automobile during a taxable year is not regularly engaged in the business of leasing automobiles. In addition, an employer that allows an employee to use the employer's property for personal purposes and charges such employee for the use of the property is not regularly engaged in the business of leasing with respect to the property used by the employee.

(d) *Inclusions in income of lessees of passenger automobiles leased after June 18, 1984, and before April 3, 1985—*(1) *In general.* If a taxpayer leases a passenger automobile after June 18, 1984, but before April 3, 1985, for each taxable year (except the last taxable year) during which the taxpayer leases the automobile, the taxpayer must include in gross income an inclusion amount (prorated for the number of days of the lease term included in that taxable year), determined under this paragraph (d)(1), and multiplied by the business/investment use (as defined in § 1.280F-6(d)(3)(i)) for the particular taxable year. The inclusion amount:

(i) Is 7.5 percent of the excess (if any) of the automobile's fair market value over \$16,500 for each of the first three taxable years during which a passenger automobile is leased.

(ii) Is 6 percent of the excess (if any) of the automobile's fair market value over \$22,500 for the fourth taxable year during which a passenger automobile is leased.

(iii) Is 6 percent of the excess (if any) of the automobile's fair market value over \$28,500 for the fifth taxable year during which a passenger automobile is leased.

(iv) Is 6 percent of the excess (if any) of the automobile's fair market value over \$34,500 for the sixth taxable year during which a passenger automobile is leased.

Internal Revenue Service, Treasury

§ 1.280F-5T

For the seventh and subsequent taxable years during which a passenger automobile is leased, the inclusion amount is 6 percent of the excess (if any) of the automobile's fair market value over the sum of (A) \$16,500 and (B) \$6,000 multiplied by the number of such taxable years in excess of three years. See paragraph (g)(2) of this section for the definition of fair market value.

(2) *Additional inclusion amount when less than predominant use in a qualified business use.* (i) If a passenger automobile, which is leased after June 18, 1984, and before April 3, 1985, is not used predominantly in a qualified business use during a taxable year, the lessee must add to gross income in the first taxable year that the automobile is not so used (and only in that year) an inclusion amount determined under this paragraph (d)(2). This inclusion amount is in addition to the amount required to be included in gross income under paragraph (d)(1) of this section.

(ii) If the fair market value (as defined in paragraph (h)(2) of this section) of the automobile is greater than \$16,500, the inclusion amount is determined by multiplying the average of the business/investment use (as defined in paragraph (h)(3) of this section) by the appropriate dollar amount from the table in paragraph (d)(2)(iii) of this section. If the fair market value (as defined in paragraph (h)(2) of this section) of the automobile is \$16,500 or less, the inclusion amount is the product of the fair market value of the automobile, the average business/investment use, and the applicable percentage from the table in paragraph (d)(2)(iv) of this section.

(iii) The dollar amount is determined under the following table:

| If a passenger automobile is not predominantly used in a qualified business use during— | The dollar amount: | | | |
|---|--------------------|-------|---------|-----------|
| | Lease term (years) | | | |
| | 1 | 2 | 3 | 4 or more |
| The first taxable year of the lease term | \$350 | \$700 | \$1,350 | \$1,850 |

| If a passenger automobile is not predominantly used in a qualified business use during— | The dollar amount: | | | |
|---|--------------------|---|-----|-----------|
| | Lease term (years) | | | |
| | 1 | 2 | 3 | 4 or more |
| The second taxable year of the lease term | | | 650 | 1,250 |
| The third taxable year of the lease term | | | | 650 |

(iv) The applicable percentage is determined under the following table:

| If a passenger automobile is not predominantly used in a qualified business use during— | The applicable percentage: | | | |
|---|----------------------------|------|------|-----------|
| | Lease term (years) | | | |
| | 1 | 2 | 3 | 4 or more |
| The first taxable year of the lease term | 3.0 | 6.0 | 10.2 | 13.2 |
| The second taxable year of the lease term | | 1.25 | 6.2 | 10.4 |
| The third taxable year of the lease term | | | 2.25 | 6.5 |
| The fourth taxable year of the lease term | | | | 1.7 |
| The fifth taxable year of the lease term | | | | 0.5 |

(e) *Inclusions in income of lessees of passenger automobiles leased after April 2, 1985, and before January 1, 1987—*(1) *In general.* For any passenger automobile that is leased after April 2, 1985, and before January 1, 1987, for each taxable year (except the last taxable year) during which the taxpayer leases the automobile, the taxpayer must include in gross income an inclusion amount determined under subparagraphs (2) through (5) of this paragraph (e). Additional inclusion amounts when a passenger automobile is not used predominantly in a qualified business use during a taxable year are determined under paragraph (e)(6) of this section. See paragraph (h)(2) of this section for the definition of fair market value.

(2) *Fair market value not greater than \$50,000: years one through three.* For any passenger automobile that has a fair market value not greater than \$50,000, the inclusion amount for each of the first three taxable years during which the automobile is leased is determined as follows:

§ 1.280F-5T

26 CFR Ch. I (4-1-17 Edition)

(i) For the appropriate range of fair market values in the table in paragraph (e)(2)(iv) of this section, select the dollar amount from the column for the quarter of the taxable year in which the automobile is first used under the lease,

(ii) Prorate the dollar amount for the number of days of the lease term included in the taxable year, and

(iii) Multiply the prorated dollar amount by the business/investment use for the taxable year.

(iv) *Dollar amounts: Years 1-3:*

DOLLAR AMOUNTS: YEARS 1-3

| Fair market value | | Taxable year quarter | | | |
|-------------------|-----------------------|----------------------|-------|-------|-------|
| Greater than— | But not greater than— | 4th | 3d | 2d | 1st |
| \$11,250 | \$11,500 | \$8 | \$7 | \$6 | \$6 |
| 11,500 | 11,750 | 24 | 21 | 19 | 17 |
| 11,750 | 12,000 | 40 | 35 | 32 | 29 |

| 40,000 | 41,000 | 1,350 | 1,062 | 774 |
| 41,000 | 42,000 | 1,410 | 1,122 | 834 |
| 42,000 | 43,000 | 1,470 | 1,182 | 894 |
| 43,000 | 44,000 | 1,530 | 1,242 | 954 |
| 44,000 | 45,000 | 1,590 | 1,302 | 1,014 |
| 45,000 | 46,000 | 1,650 | 1,362 | 1,074 |
| 46,000 | 47,000 | 1,710 | 1,422 | 1,134 |
| 47,000 | 48,000 | 1,770 | 1,482 | 1,194 |
| 48,000 | 49,000 | 1,830 | 1,542 | 1,254 |
| 49,000 | 50,000 | 11,890 | 1,602 | 1,314 |

(4) *Fair market value greater than \$50,000: years one through six.* (i) For any passenger automobile that has a fair market value greater than \$50,000, the inclusion amount for the first six taxable years during which the automobile is leased is determined as follows:

(A) Determine the dollar amount by using the appropriate formula in paragraph (e)(4)(ii) of this section,

(B) Prorate the dollar amount for the number of days of the lease term included in the taxable year, and

(C) Multiply this dollar amount by the business/investment use for the taxable year.

(ii) The dollar amount is computed as follows:

(A) If the automobile is first used under the lease in the fourth quarter of a taxable year, the dollar amount for each of the first three taxable years during which the automobile is leased is the sum of—

(1) \$124, and

(2) 11 percent of the excess of the automobile's fair market value over \$13,200.

(B) If the automobile is first used under the lease in the third quarter of a taxable year, the dollar amount for each of the first three taxable years during which the automobile is leased is the sum of—

(1) \$110, and

(2) 10 percent of the excess of the automobile's fair market value over \$13,200.

(C) If the automobile is first used under the lease in the second quarter of a taxable year, the dollar amount for each of the first three taxable years during which the automobile is leased is the sum of—

(1) \$100, and

(2) 9 percent of the excess of the automobile's fair market value over \$13,200.

(D) If the automobile is first used under the lease in the first quarter of a taxable year, the dollar amount for each of the first three taxable years during which the automobile is leased is the sum of—

(1) \$90, and

(2) 8 percent of the excess of the automobile's fair market value over \$13,200.

(E) For the fourth taxable year during which the automobile is leased, the dollar amount is 6 percent of the excess of the automobile's fair market value over \$18,000.

(F) For the fifth taxable year during which the automobile is leased, the dollar amount is 6 percent of the excess of the automobile's fair market value over \$22,800.

(G) For the sixth taxable year during which the automobile is leased, the dollar amount is 6 percent of the excess of the automobile's fair market value over \$27,600.

(5) *Seventh and subsequent taxable years.* (i) For any passenger automobile that has a fair market value less than or equal to \$32,400, the inclusion amount for the seventh and subsequent taxable years during which the automobile is leased is zero.

(ii) For any passenger automobile that has a fair market value greater than \$32,400, the inclusion amount for the seventh and subsequent taxable years during which the automobile is leased is 6 percent of—

(A) The excess (if any) of the automobile's fair market value, over

(B) The sum of—

(1) \$13,200 and

(2) \$4,800 multiplied by the number of taxable years in excess of three years.

(6) *Additional inclusion amount when less than predominant use in a qualified business use.* (i) If a passenger automobile, which is leased after April 2, 1985, and before January 1, 1987, is not

§ 1.280F-5T

predominantly used in a qualified business use during a taxable year, the lessee must add to gross income in the first taxable year that the automobile is not so used (and only in that year) an inclusion amount determined under this paragraph (e)(6). This inclusion amount is in addition to the amount required to be included in gross income under paragraph (e) (2), (3), (4), and (5) of this section.

(ii) If the fair market value (as defined in paragraph (h)(2) of this section) of the automobile is greater than \$11,250, the inclusion amount is determined by multiplying the average of the business/investment use (as defined in paragraph (h)(3) of this section) by the appropriate dollar amount from the table in paragraph (e)(6)(iii) of this section. If the fair market value of the automobile is \$11,250 or less, the inclusion amount is the product of the fair market value of the automobile, the average business/investment use, and the applicable percentage from the table in paragraph (e)(6)(iv) of this section.

(iii) The dollar amount is determined under the following table:

| If a passenger automobile is not predominantly used in a qualified business use during— | The dollar amount is: | | | |
|---|-----------------------|-------|---------|-----------|
| | Lease term (years)— | | | |
| | 1 | 2 | 3 | 4 or more |
| The first taxable year of the lease term | \$350 | \$700 | \$1,150 | \$1,500 |
| The second taxable year of the lease term | | 150 | 700 | 1,200 |
| The third taxable year of the lease term | | | 250 | 750 |

(iv) The applicable percentage is determined under the following table:

26 CFR Ch. I (4-1-17 Edition)

| If a passenger automobile is not predominantly used in a qualified business use during— | The applicable percentage: | | | |
|---|----------------------------|-------|-------|-----------|
| | Lease term (years)— | | | |
| | 1 | 2 | 3 | 4 or more |
| The first taxable year of the lease term | 3.0 | 6.0 | 10.2 | 13.2 |
| The second taxable year of the lease term | | 1.25 | 6.2 | 10.4 |
| The third taxable year of the lease term | | | 2.25 | 6.5 |
| The fourth taxable year of the lease term | | | | 1.7 |
| The fifth taxable year of the lease term | | | | 0.5 |

(f) *Inclusions in income of lessees of listed property other than passenger automobiles*—(1) *In general.* If listed property other than a passenger automobile is not used predominantly in a qualified business use in any taxable year in which such property is leased, the lessee must add an inclusion amount to gross income in the first taxable year in which such property is not so predominantly used (and only in that year). This inclusion amount is determined under paragraph (f)(2) of this section for property leased after June 18, 1984, and before January 1, 1987. The inclusion amount is determined under § 1.280F-7(b) for property leased after December 31, 1986.

(2) *Inclusion amount for property leased after June 18, 1984, and before January 1, 1987.* The inclusion amount for property leased after June 18, 1984, and before January 1, 1987, is the product of the following amounts:

(i) The fair market value (as defined in paragraph (h)(2) of this section) of the property,

(ii) The average business/investment use (as defined in paragraph (h)(3) of this section), and

(iii) The applicable percentage (as determined under paragraph (f)(3) of this section).

(3) *Applicable percentages.* The applicable percentages for 3-, 5-, and 10-year recovery property are determined according to the following tables:

(i) In the case of 3-year recovery property:

Internal Revenue Service, Treasury

§ 1.280F-5T

| Taxable year during lease term | For the first taxable year in which the business use percentage is 50 percent or less, the applicable percentage for such taxable year is— | | | | | |
|--------------------------------|--|-------|-------|-------|-------|-------------|
| | 1 | 2 | 3 | 4 | 5 | 6 and later |
| For a lease term of: | | | | | | |
| 1 year | 3.0 | | | | | |
| 2 years | 6.0 | 1.25 | | | | |
| 3 years | 10.2 | 6.2 | 2.25 | | | |
| 4 or more years | 13.2 | 10.4 | 6.5 | 1.7 | 0.5 | 0 |

(ii) In the case of 5-year recovery property:

| Taxable year during lease term | For the first taxable year in which the business use percentage is 50 percent or less, the applicable percentage for such taxable year is— | | | | | | | | | | | |
|--------------------------------|--|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| For a lease term of: | | | | | | | | | | | | |
| 1 year | 2.7 | | | | | | | | | | | |
| 2 years | 5.3 | 1.2 | | | | | | | | | | |
| 3 years | 9.9 | 6.1 | 1.6 | | | | | | | | | |
| 4 years | 14.4 | 11.1 | 7.3 | 2.3 | | | | | | | | |
| 5 years | 18.4 | 15.7 | 12.4 | 8.2 | 3.0 | | | | | | | |
| 6 or more years | 21.8 | 19.6 | 16.7 | 13.5 | 9.6 | 5.25 | 4.4 | 3.6 | 2.8 | 1.8 | 1.0 | 0 |

(iii) In the case of 10-year recovery property:

| Taxable year during lease term | For the first taxable year in which the business use percentage is 50 pct or less, the applicable percentage for such taxable year is— | | | | | | | | | | | | | | |
|--------------------------------|--|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 |
| For a lease term of: | | | | | | | | | | | | | | | |
| 1 year | 2.5 | | | | | | | | | | | | | | |
| 2 years | 5.1 | .6 | | | | | | | | | | | | | |
| 3 years | 9.8 | 5.6 | 1.0 | | | | | | | | | | | | |
| 4 years | 14.0 | 10.3 | 6.2 | 1.4 | | | | | | | | | | | |
| 5 years | 17.9 | 14.5 | 10.9 | 6.7 | 1.8 | | | | | | | | | | |
| 6 years | 21.3 | 18.3 | 15.1 | 11.4 | 7.1 | 2.1 | | | | | | | | | |
| 7 years | 21.9 | 19.0 | 15.9 | 12.4 | 8.4 | 3.9 | 2.4 | | | | | | | | |
| 8 years | 22.4 | 19.6 | 16.7 | 13.4 | 9.7 | 5.5 | 4.5 | 2.7 | | | | | | | |
| 9 years | 22.9 | 20.2 | 17.4 | 14.3 | 10.9 | 7.0 | 6.4 | 5.1 | 3.0 | | | | | | |
| 10 years | 23.5 | 20.9 | 18.2 | 15.2 | 11.9 | 8.3 | 8.1 | 7.2 | 5.7 | 3.3 | | | | | |
| 11 years | 23.9 | 21.4 | 18.8 | 16.0 | 12.8 | 9.3 | 9.4 | 8.9 | 7.7 | 5.9 | 3.1 | | | | |
| 12 years | 24.3 | 21.9 | 19.3 | 16.5 | 13.4 | 10.1 | 10.3 | 10.0 | 9.3 | 7.8 | 5.5 | 2.9 | | | |
| 13 years | 24.7 | 22.2 | 19.7 | 16.9 | 14.0 | 10.7 | 11.1 | 11.0 | 10.4 | 9.2 | 7.4 | 5.2 | 2.7 | | |
| 14 years | 25.0 | 22.5 | 20.1 | 17.3 | 14.4 | 11.1 | 11.6 | 11.7 | 11.3 | 10.3 | 8.8 | 6.9 | 4.8 | 2.5 | |
| 15 or more years | 25.3 | 22.8 | 20.3 | 17.5 | 14.7 | 11.5 | 12.0 | 12.2 | 11.9 | 11.1 | 9.8 | 8.2 | 6.5 | 4.5 | 2.3 |

(g) *Special rules applicable to inclusions in income of lessees.* This paragraph (g) applies to the inclusions in gross income of lessees prescribed under paragraphs (d)(2), (e)(6), or (f) of this section, or prescribed under § 1.280F-7(b).

(1) *Lease term commences within 9 months of the end of lessee's taxable year.* If:

(i) The lease term commences within 9 months before the close of the lessee's taxable year,

(ii) The property is not predominantly used in a qualified business use during that portion of the taxable year, and

(iii) The lease term continues into the lessee's subsequent taxable year, then the inclusion amount is added to gross income in the lessee's subsequent

§ 1.280F-5T

26 CFR Ch. I (4-1-17 Edition)

taxable year and the amount is determined by taking into account the average of the business/investment use for both taxable years and the applicable percentage for the taxable year in which the lease term begins (or, in the case of a passenger automobile with a fair market value greater than \$16,500, the appropriate dollar amount for the taxable year in which the lease term begins).

(2) *Lease term less than one year.* If the lease term is less than one year, the amount which must be added to gross income is an amount that bears the same ratio to the inclusion amount determined before the application of this paragraph (g)(2) as the number of days in the lease term bears to 365.

(3) *Maximum inclusion amount.* The inclusion amount shall not exceed the sum of all deductible amounts in connection with the use of the listed property properly allocable to the lessee's taxable year in which the inclusion amount must be added to gross income.

(h) *Definitions*—(1) *Lease term.* In determining the term of any lease for purposes of this section, the rules of section 168(i)(3)(A) shall apply.

(2) *Fair market value.* For purposes of this section, the fair market value of listed property is such value on the first day of the lease term. If the capitalized cost of listed property is specified in the lease agreement, the lessee shall treat such amount as the fair market value of the property.

(3) *Average business/investment use.* For purposes of this section, the average business/investment use of any listed property is the average of the business/investment use for the first taxable year in which the business use percentage is 50 percent or less and all preceding taxable years in which such property is leased. See paragraph (g)(1) of this section for special rule when lease term commences within 9 months before the end of the lessee's taxable year.

(i) *Examples.* This section may be illustrated by the following examples.

Example 1. On January 1, 1985, A, a calendar year taxpayer, leases and places in service a passenger automobile with a fair market value of \$55,000. The lease is to be for a period of four years. During taxable years 1985 and 1986, A uses the automobile exclusively

in a trade or business. Under paragraph (d)(1) of this section, A must include in gross income in both 1985 and 1986, \$2,887.50 (*i.e.*, $(\$55,000 - \$16,500) \times 7.5\%$).

Example 2. The facts are the same as in *Example 1*, and in addition, A uses the automobile only 45 percent in a trade or business during 1987. Under paragraph (d)(1) of this section for 1987, A must include in gross income \$1,299.38 (*i.e.*, $(\$55,000 - \$16,500) \times 7.5\% \times 45\%$). In addition, under paragraph (d)(2) of this section, A must also include in gross income in 1987, \$530.85 (*i.e.*, $\$650 \times 81.67\%$, average business/investment use).

Example 3. On August 1, 1985, B, a calendar year taxpayer, leases and places in service an item of listed property which is 5-year recovery property, with a fair market value of \$10,000. The lease is to be for a period of 5 years. B's qualified business use of the property is 40 percent in 1985, 100 percent in 1986, and 90 percent in 1987. Under paragraphs (f)(1) and (g)(1) of this section, before the application of paragraph (g)(3) of this section, B must include in gross income in 1986, \$1,288.00 (*i.e.*, $\$10,000 \times 70\% \times 18.4\%$, the product of the fair market value, the average business use for both taxable years, and the applicable percentage for year one from the table in paragraph (f)(3)(iii) of this section).

Example 4. On October 1, 1985, C, a calendar year taxpayer, leases and places in service an item of listed property which is 3-year recovery property with a fair market value of \$15,000. The lease term is 6 months (ending March 31, 1986) during which C uses the property 45 percent in a trade or business, the only business/investment use. Under paragraphs (f)(1) and (g)(1) and (2) of this section, before the application of paragraph (g)(3) of this section, C must include in gross income in 1986, \$100.97 (*i.e.*, $\$15,000 \times 45\% \times 3\% \times 182/365$, the product of the fair market value, the average business use for both taxable years, and the applicable percentage for year one from the table in paragraph (f)(3)(i) of this section, prorated for the length of the lease term).

Example 5. On July 15, 1985, A, a calendar year taxpayer, leases and places in service a passenger automobile with a fair market value of \$45,300. The lease is for a period of 5 years, during which A uses the automobile exclusively in a trade or business. Under paragraph (e)(2) and (3) of this section, for taxable years 1985 through 1989, A must include the following amounts in gross income:

| Taxable year | Dollar amount | Proration | Business use (percent) | Inclusion |
|--------------|---------------|-----------|------------------------|-----------|
| 1985 | \$3,327 | 170/365 | 100 | \$1,550 |
| 1986 | 3,327 | 365/365 | 100 | 3,327 |
| 1987 | 3,327 | 365/365 | 100 | 3,327 |
| 1988 | 1,650 | 366/366 | 100 | 1,650 |

| Taxable year | Dollar amount | Proration | Business use (percent) | Inclusion |
|--------------|---------------|-----------|------------------------|-----------|
| 1989 | 1,362 | 365/365 | 100 | 1,362 |

Example 6. The facts are the same as in *Example 1*, except that A uses the automobile only 45 percent in a trade or business during 1987 through 1990. Under § 1.280F-5T(e)(6), A must include in gross income for taxable year 1987, the first taxable year in which the automobile is not used predominantly in a trade or business, an additional amount based on the average business/investment use for taxable years 1985 through 1987. For taxable years 1985 through 1989, A must include the following amounts in gross income:

| Taxable year | Dollar amount | Proration | Business use (percent) | Inclusion |
|--------------|---------------|-----------|------------------------|-----------|
| 1985 | \$3,327 | 170/365 | 100 | \$1,550 |
| 1986 | 3,327 | 365/365 | 100 | 3,327 |
| 1987 | 3,327 | 365/365 | 45 | 1,497 |
| | 750 | | 81.67 | 612 |
| 1988 | 1,650 | 366/366 | 45 | 743 |
| 1989 | 1,362 | 365/365 | 45 | 613 |

(98 Stat. 494, 26 U.S.C. 280F; 68A Stat. 917, 26 U.S.C. 7805)

[T.D. 7986, 49 FR 42710, Oct. 24, 1984, as amended by T.D. 8061, 50 FR 46038, Nov. 6, 1985; T.D. 8218, 53 FR 29881, Aug. 9, 1988; T.D. 8473, 58 FR 19060, Apr. 12, 1993; T.D. 9133, 69 FR 35514, June 25, 2004]

§ 1.280F-6 Special rules and definitions.

(a) *Deductions of employee*—(1) *In general.* Employee use of listed property shall not be treated as business/investment use (as defined in paragraph (d)(3) of this section) for purposes of determining the amount of any recovery deduction allowable (including any deduction under section 179) to the employee unless that use is for the convenience of the employer and required as a condition of employment.

(2) *“Convenience of the employer” and “condition of employment” requirements*—(i) *In general.* The terms *convenience of the employer* and *condition of employment* generally have the same meaning for purposes of section 280F as they have for purposes of section 119 (relating to the exclusion from gross income for meals or lodging furnished for the convenience of the employer).

(ii) *“Condition of employment.”* In order to satisfy the “condition of em-

ployment” requirement, the use of the property must be required in order for the employee to perform the duties of his or her employment properly. Whether the use of the property is so required depends on all the facts and circumstances. Thus, the employer need not explicitly require the employee to use the property. Similarly, a mere statement by the employer that the use of the property is a condition of employment is not sufficient.

(iii) *“Convenience of employer”.* [Reserved]

(3) *Employee use.* For purposes of this section, the term *employee use* means any use in connection with the performance of services by the employee as an employee.

(4) *Examples.* The principles of this paragraph are illustrated in the following examples:

Example 1. A is employed as a courier with W, which provides local courier services. A owns and uses a motorcycle to deliver packages to downtown offices for W. W does not provide delivery vehicles and explicitly requires all of its couriers to own a car or motorcycle for use in their employment with the company. A's use of the motorcycle for delivery purposes is for the convenience of W and is required as a condition of employment.

Example 2. B is an inspector for X, a construction company with many construction sites in the local area. B is required to travel to the various construction sites on a regular basis; B uses her automobile to make these trips. Although X does not furnish B an automobile, X does not explicitly require B to use her own automobile. However, X reimburses B for any costs she incurs in traveling to the various job sites. B's use of her automobile in her employment is for the convenience of X and is required as a condition of employment.

Example 3. Assume the same facts as in *Example 2*, except that X makes an automobile available to B who chooses to use her own automobile and receive reimbursement. B's use of her own automobile is not for the convenience of X and is not required as a condition of employment.

Example 4. C is a pilot for Y, a small charter airline. Y requires its pilots to obtain x hours of flight time annually in addition to the number of hours of flight time spent with the airline. Pilots can usually obtain these hours by flying with a military reserve unit or by flying part-time with another airline. C owns his own airplane. C's use of his airplane to obtain the required flight hours is not for the convenience of the employer

and is not required as a condition of employment.

Example 5. D is employed as an engineer with Z, an engineering contracting firm. D occasionally takes work home at night rather than working late in the office. D owns and uses a computer which is virtually identical to the one she uses at the office to complete her work at home. D's use of the computer is not for the convenience of her employer and is not required as a condition of employment.

(b) *Listed property*—(1) *In general.* Except as otherwise provided in paragraph (b)(5) of this section, the term *listed property* means:

- (i) Any passenger automobile (as defined in paragraph (c) of this section),
- (ii) Any other property used as a means of transportation (as defined in paragraph (b)(2) of this section),
- (iii) Any property of a type generally used for purposes of entertainment, recreation, or amusement, and
- (iv) Any computer or peripheral equipment (as defined in section 168(i)(2)(B)), and
- (v) Any other property specified in paragraph (b)(4) of this section.

(2) *Means of transportation*—(i) *In general.* Except as otherwise provided in paragraph (b)(2)(ii) of this section, property used as a *means of transportation* includes trucks, buses, trains, boats, airplanes, motorcycles, and any other vehicles for transporting persons or goods.

(ii) *Exception.* The term “listed property” does not include any vehicle that is a qualified nonpersonal use vehicle as defined in section 274(i) and § 1.274-5(k).

(3) *Property used for entertainment, etc.*—(i) *In general.* Property of a type generally used for purposes of entertainment, recreation, or amusement includes property such as photographic, phonographic, communication, and video recording equipment.

(ii) *Exception.* The term *listed property* does not include any photographic, phonographic, communication, or video recording equipment of a taxpayer if the equipment is used either exclusively at the taxpayer's regular business establishment or in connection with the taxpayer's principal trade or business.

(iii) *Regular business establishment.* The regular business establishment of

an employee is the regular business establishment of the employer of the employee. For purposes of this paragraph (b)(3), a portion of a dwelling unit is treated as a regular business establishment if the requirements of section 280A(c)(1) are met with respect to that portion.

(4) *Other property.* [Reserved]

(5) *Exception for computers.* The term *listed property* shall not include any computer (including peripheral equipment) used exclusively at a regular business establishment. For purposes of the preceding sentence, a portion of a dwelling unit shall be treated as a regular business establishment if (and only if) the requirements of section 280A(c)(1) are met with respect to that portion.

(c) *Passenger automobile*—(1) *In general.* Except as provided in paragraph (c)(3) of this section, the term *passenger automobile* means any 4-wheeled vehicle which is:

- (i) Manufactured primarily for use on public streets, roads, and highways, and
- (ii) Rated at 6,000 pounds gross vehicle weight or less.

(2) *Parts, etc. of automobile.* The term *passenger automobile* includes any part, component, or other item that is physically attached to the automobile or is traditionally included in the purchase price of an automobile. The term does not include repairs that are not capital expenditures within the meaning of section 263.

(3) *Exception for certain vehicles.* The term *passenger automobile* shall not include any:

- (i) Ambulance, hearse, or combination ambulance-hearse used by the taxpayer directly in a trade or business,
- (ii) Vehicle used by the taxpayer directly in the trade or business of transporting persons or property for compensation or hire, or
- (iii) Truck or van that is a qualified nonpersonal use vehicle as defined under § 1.274-5T(k).

(d) *Business use percentage*—(1) *In general.* The term *business use percentage* means the percentage of the use of any listed property which is qualified business use as described in paragraph (d)(2) of this section.

(2) *Qualified business use*—(i) *In general.* Except as provided in paragraph (d)(2)(ii) of this section, the term *qualified business use* means any use in a trade or business of the taxpayer. The term *qualified business use* does not include use for which a deduction is allowable under section 212. Whether the amount of qualified business use exceeds 50 percent is determinative of whether the investment tax credit and the accelerated percentages under section 168 are available for listed property (or must be recaptured). See § 1.280F-3T.

(ii) *Exception for certain use by 5-percent owners and related persons*—(A) *In general.* The term *qualified business use* shall not include:

(1) Leasing property to any 5-percent owner or related person,

(2) Use of property provided as compensation for the performance of services by a 5-percent owner or related person, or

(3) Use of property provided as compensation for the performance of services by any person not described in paragraph (d)(2)(ii)(A)(2) of this section unless an amount is properly reported by the taxpayer as income to such person and, where required, there was withholding under chapter 24.

Paragraph (d)(2)(ii)(A)(1) of this section shall apply only to the extent that the use of the listed property is by an individual who is a related party or a 5-percent owner with respect to the owner or lessee of the property.

(B) *Special rule for aircraft.* Paragraph (d)(2)(ii)(A) of this section shall not apply with respect to any aircraft if at least 25 percent of the total use of the aircraft during the taxable year consists of qualified business use not described in paragraph (d)(2)(ii)(A).

(C) *Definitions.* For purposes of this paragraph:

(1) *5-percent owner.* The term *5-percent owner* means any person who is a 5-percent owner with respect to the taxpayer (as defined in section 416(i)(1)(B)(i)).

(2) *Related person.* The term *related person* means any person related to the taxpayer (within the meaning of section 267(b)).

(3) *Business/investment use*—(i) *In general.* The term *business/investment use*

means the total business or investment use of listed property that may be taken into account for purposes of computing (without regard to section 280F(b)) the percentage of cost recovery deduction for a passenger automobile or other listed property for the taxable year. Whether the accelerated percentages under section 168 (as opposed to use of the straight line method of cost recovery) are available with respect to listed property or must be recaptured is determined, however, by reference to qualified business use (as defined in paragraph (d)(2) of this section) rather than by reference to business/investment use. Whether a particular use of property is a business or investment use shall generally be determined under the rules of section 162 or 212.

(ii) *Entertainment use.* The use of listed property for entertainment, recreation, or amusement purposes shall be treated as business use to the extent that expenses (other than interest and property tax expenses) attributable to that use are deductible after application of section 274.

(iii) *Employee use.* See paragraph (a) of this section for requirements to be satisfied for employee use of listed property to be considered business/investment use of the property.

(iv) *Use of taxpayer's automobile by another person.* Any use of the taxpayer's automobile by another person shall not be treated, for purposes of section 280F, as use in a trade or business under section 162 unless that use:

(A) Is directly connected with the business of the taxpayer,

(B) Is properly reported by the taxpayer as income to the other person and, where required, there was withholding under chapter 24, or

(C) Results in a payment of fair market rent.

For purposes of this paragraph (d)(4)(iv)(C), payment to the owner of the automobile in connection with such use is treated as the payment of rent.

(4) *Predominantly used in qualified business use*—(i) *Definition.* Property is predominantly used in a qualified business use for any taxable year if the business use percentage (as defined in paragraph (d)(1) of this section) is greater than 50 percent.

(ii) *Special rule for transfers at death.* Property does not cease to be used predominantly in a qualified business use by reason of a transfer at death.

(iii) *Other dispositions of property.* [Reserved]

(5) *Examples.* The following examples illustrate the principles set forth in this paragraph.

Example 1. E uses a home computer 50 percent of the time to manage her investments. The computer is listed property within the meaning of section 280F(d)(4). E also uses the computer 40 percent of the time in her part-time consumer research business. Because E's business use percentage for the computer does not exceed 50 percent, the computer is not predominantly used in a qualified business use for the taxable year. Her aggregate business/investment use for purposes of determining the percent of the total allowable straight line depreciation that she can claim is 90 percent.

Example 2. Assume that E in *Example 1* uses the computer 30 percent of the time to manage her investments and 60 percent of the time in her consumer research business. E's business use percentage exceeds 50 percent. Her aggregate business/investment use for purposes of determining her allowable investment tax credit and cost recovery deductions is 90 percent.

Example 3. F is the proprietor of a plumbing contracting business. F's brother is employed with F's company. As part of his compensation, F's brother is allowed to use one of the company automobiles for personal use. The use of the company automobiles by F's brother is not a qualified business use because F and F's brother are related parties within the meaning of section 267(b).

Example 4. F, in *Example 3*, allows employees unrelated to him to use company automobiles as part of their compensation. F, however, does not include the value of these automobiles in the employees' gross income and F does not withhold with respect to the use of these automobiles. The use of the company automobiles by the employees in this case is not business/investment use.

Example 5. X Corporation owns several automobiles which its employees use for business purposes. The employees are also allowed to take the automobiles home at night. However, the fair market value of the use of the automobile for any personal purpose, e.g., commuting to work, is reported by X as income to the employee and is withheld upon by X. The use of the automobile by the employee, even for personal purposes, is a qualified business use with respect to X.

(e) *Method of allocating use of property—(1) In general.* For purposes of section 280F, the taxpayer shall allocate

the use of any listed property that is used for more than one purpose during the taxable year to the various uses in the manner prescribed in paragraph (e) (2) and (3) of this section.

(2) *Passenger automobiles and other means of transportation.* In the case of a passenger automobile or any other means of transportation, the taxpayer shall allocate the use of the property on the basis of mileage. Thus, the percentage of use in a trade or business for the year shall be determined by dividing the number of miles the vehicle is driven for purposes of that trade or business during the year by the total number of miles the vehicle is driven during the year for any purpose.

(3) *Other listed property.* In the case of other listed property, the taxpayer shall allocate the use of that property on the basis of the most appropriate unit of time the property is actually used (rather than merely being available for use). For example, the percentage of use of a computer in a trade or business for a taxable year is determined by dividing the number of hours the computer is used for business purposes during the year by the total number of hours the computer is used for any purpose during the year.

(f) *Effective date—(1) In general.* Except as provided in paragraph (f)(2) of this section, this section applies to property placed in service by a taxpayer on or after July 7, 2003. For regulations applicable to property placed in service before July 7, 2003, see § 1.280F-6T as in effect prior to July 7, 2003 (§ 1.280F-6T as contained in 26 CFR part 1, revised as of April 1, 2003).

(2) *Property placed in service before July 7, 2003.* The following rules apply to property that is described in paragraph (c)(3)(iii) of this section, was placed in service by the taxpayer before July 7, 2003, and was treated by the taxpayer as a passenger automobile under § 1.280F-6T as in effect prior to July 7, 2003 (pre-effective date vehicle):

(i) Except as provided in paragraphs (f)(2)(ii), (iii), and (iv) of this section, a pre-effective date vehicle will be treated as a passenger automobile to which section 280F(a) applies.

(ii) A pre-effective date vehicle will be treated as property to which section 280F(a) does not apply if the taxpayer

adopts that treatment in determining depreciation deductions on the taxpayer's original return for the year in which the vehicle is placed in service.

(iii) A pre-effective date vehicle will be treated, to the extent provided in this paragraph (f)(2)(iii), as property to which section 280F(a) does not apply if the taxpayer adopts that treatment on an amended Federal tax return in accordance with this paragraph (f)(2)(iii). This paragraph (f)(2)(iii) applies only if, on or before December 31, 2004, the taxpayer files, for all applicable taxable years, amended Federal tax returns (or qualified amended returns, if applicable (for further guidance, see Rev. Proc. 94-69 (1994-2 C.B. 804) and § 601.601(d)(2)(ii)(b) of this chapter)) treating the vehicle as property to which section 280F(a) does not apply. The applicable taxable years for this purpose are the taxable year in which the vehicle was placed in service by the taxpayer (or, if the period of limitation for assessment under section 6501 has expired for such year or any subsequent year (a closed year), the first taxable year following the most recent closed year) and all subsequent taxable years in which the vehicle was treated on the taxpayer's return as property to which section 280F(a) applies. If the earliest applicable taxable year is not the year in which the vehicle was placed in service, the adjusted depreciable basis of the property as of the beginning of the first applicable taxable year is recovered over the remaining recovery period. If the remaining recovery period as of the beginning of the first applicable taxable year is less than 12 months, the entire adjusted depreciable basis of the property as of the beginning of the first applicable taxable year is recovered in that year.

(iv) A pre-effective date vehicle will be treated, to the extent provided in this paragraph (f)(2)(iv), as property to which section 280F(a) does not apply if the taxpayer adopts that treatment on Form 3115, Application for Change in Accounting Method, in accordance with this paragraph (f)(2)(iv). The taxpayer must follow the applicable administrative procedures issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in method of accounting (for

further guidance, for example, see Rev. Proc. 2002-9 (2002-1 C.B. 327) and § 601.601(d)(2)(ii)(b) of this chapter). If the taxpayer files a Form 3115 treating the vehicle as property to which section 280F(a) does not apply, the taxpayer will be permitted to treat the change as a change in method of accounting under section 446(e) of the Internal Revenue Code and to take into account the section 481 adjustment resulting from the method change. For purposes of Form 3115, the designated number for the automatic accounting method change authorized for this paragraph (f)(2)(iv) is 89.

[T.D. 7986, 49 FR 42713, Oct. 24, 1984, as amended by T.D. 8061, 50 FR 46041, Nov. 6, 1985; T.D. 9069, 68 FR 40130, July 7, 2003; T.D. 9133, 69 FR 35514, June 25, 2004; T.D. 9483, 75 FR 27937, May 19, 2010]

§ 1.280F-7 Property leased after December 31, 1986.

(a) *Inclusions in income of lessees of passenger automobiles leased after December 31, 1986*—(1) *In general*. If a taxpayer leases a passenger automobile after December 31, 1986, the taxpayer must include in gross income an inclusion amount determined under this paragraph (a), for each taxable year during which the taxpayer leases the automobile. This paragraph (a) applies only to passenger automobiles for which the taxpayer's lease term begins after December 31, 1986. See §§ 1.280F-5T(d) and 1.280F-5T(e) for rules on determining inclusion amounts for passenger automobiles for which the taxpayer's lease term begins before January 1, 1987. See § 1.280F-5T(h)(2) for the definition of fair market value.

(2) *Inclusion Amount*. For any passenger automobile leased after December 31, 1986, the inclusion amount for each taxable year during which the automobile is leased is determined as follows:

(i) For the appropriate range of fair market values in the applicable table, select the dollar amount from the column for the taxable year in which the automobile is used under the lease (but for the last taxable year during any lease that does not begin and end in the same taxable year, use the dollar amount for the preceding taxable year).

§ 1.280F-7

26 CFR Ch. I (4-1-17 Edition)

(ii) Prorate the dollar amount for the number of days of the lease term included in the taxable year.

(iii) Multiply the prorated dollar amount by the business/investment use

(as defined in § 1.280F-6(d)(3)(i)) for the taxable year.

(iv) The following table is the applicable table in the case of a passenger automobile leased after December 31, 1986, and before January 1, 1989:

DOLLAR AMOUNTS FOR AUTOMOBILES WITH A LEASE TERM BEGINNING IN CALENDAR YEAR 1987 OR 1988

| Fair market value of automobile | Taxable year during lease | | | | | |
|---------------------------------|---------------------------|-----|-------|-------|-------------|-------|
| | 1st | 2nd | 3rd | 4th | 5 and later | |

| 180,000 | 190,000 | 2,394 | 5,232 | 7,758 | 9,301 | 10,737 |
| 190,000 | 200,000 | 2,533 | 5,536 | 8,208 | 9,841 | 11,360 |

(v) The applicable table in the case of a passenger automobile first leased after December 31, 1988, will be contained in a revenue ruling or revenue procedure published in the Internal Revenue Bulletin.

(3) *Example.* The following example illustrates the application of this paragraph (a):

Example. On April 1, 1987, A, a calendar year taxpayer, leases and places in service a passenger automobile with a fair market value of \$31,500. The lease is to be for a period of three years. During taxable years 1987

and 1988, A uses the automobile exclusively in a trade or business. During 1989 and 1990, A's business/investment use is 45 percent. The appropriate dollar amounts from the table in paragraph (a)(2)(iv) of this section are \$260 for 1987 (first taxable year during the lease), \$568 for 1988 (second taxable year during the lease), \$842 for 1989 (third taxable year during the lease), and \$842 for 1990. Since 1990 is the last taxable year during the lease, the dollar amount for the preceding year (the third year) is used, rather than the dollar amount for the fourth year. For taxable years 1987 through 1990, A's inclusion amounts are determined as follows:

| Tax year | Dollar amount | Proration | Business use (percent) | Inclusion amount |
|------------|---------------|-----------|------------------------|------------------|
| 1987 | \$260 | 275/365 | 100 | \$196 |
| 1988 | 568 | 366/366 | 100 | 568 |
| 1989 | 842 | 365/365 | 45 | 379 |
| 1990 | 842 | 90/365 | 45 | 93 |

(b) *Inclusions in income of lessees of listed property (other than passenger automobiles) leased after December 31, 1986—(1) In general.* If listed property other than a passenger automobile is not used predominantly in a qualified business use in any taxable year in

which such property is leased, the lessee must add an inclusion amount to gross income in the first taxable year in which such property is not so predominantly used (and only in that year). This year is the first taxable

§ 1.280F-7

26 CFR Ch. I (4-1-17 Edition)

year in which the business use percentage (as defined in § 1.280F-6(d)(1)) of the property is 50 percent or less. This inclusion amount is determined under this paragraph (b) for property for which the taxpayer's lease term begins after December 31, 1986 (and under § 1.280F-5T(f) for property for which the taxpayer's lease term begins before January 1, 1987). See also § 1.280F-5T(g).

(2) *Inclusion amount.* The inclusion amount for any listed property (other than a passenger automobile) leased after December 31, 1986, is the sum of the amounts determined under subdivi-

sions (i) and (ii) of this subparagraph (2).

(i) The amount determined under this subdivision (i) is the product of the following amounts:

(A) The fair market value (as defined in § 1.280F-5T(h)(2)) of the property,

(B) The business/investment use (as defined in § 1.280F-6(d)(3)(i)) for the first taxable year in which the business use percentage (as defined in § 1.280F-6(d)(1)) is 50 percent or less, and

(C) The applicable percentage from the following table:

| Type of property | First taxable year during lease in which business use percentage is 50% or less | | | | | | | | | | |
|---|---|-------|--------|--------|--------|--------|--------|--------|--------|--------|-----------------------|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11
12 and
Later |
| Property with a recovery period of less than 7 years under the alternative depreciation system (such as computers, trucks and airplanes) | 2.1 | - 7.2 | - 19.8 | - 20.1 | - 12.4 | - 12.4 | - 12.4 | - 12.4 | - 12.4 | - 12.4 | - 12.4 |
| Property with a 7- to 10-year recovery period under the alternative depreciation system (such as recreation property) | 3.9 | - 3.8 | - 17.7 | - 25.1 | - 27.8 | - 27.2 | - 27.1 | - 27.6 | - 23.7 | - 14.7 | - 14.7 |
| Property with a recovery period of more than 10 years under the alternative depreciation system (such as certain property with no class life) | 6.6 | - 1.6 | - 16.9 | - 25.6 | - 29.9 | - 31.1 | - 32.8 | - 35.1 | - 33.3 | - 26.7 | - 19.7 |

§ 1.280G-1

26 CFR Ch. I (4-1-17 Edition)

(ii) The amount determined under this subdivision (ii) is the product of the following amounts:

(A) The fair market value of the property,

(B) The average of the business/investment use for all taxable years (in

which such property is leased) that precede the first taxable year in which the business use percentage is 50 percent or less, and

(C) The applicable percentage from the following table:

| Type of property | First taxable year during lease in which business use percentage is 50% or less | | | | | | | | | | | |
|--|---|------|------|------|------|------|------|------|------|------|------|--------------|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 and Later |
| Property with a recovery period of less than 7 years under the alternative depreciation system (Such as computers, trucks and airplanes) | 0.0 | 10.0 | 22.0 | 21.2 | 12.7 | 12.7 | 12.7 | 12.7 | 12.7 | 12.7 | 12.7 | 12.7 |
| Property with a 7- to 10-year recovery period under the alternative depreciation system (such as recreation property) | 0.0 | 9.3 | 23.8 | 31.3 | 33.8 | 32.7 | 31.6 | 30.5 | 25.0 | 15.0 | 15.0 | 15.0 |
| Property with a recovery period of more than 10 years under the alternative depreciation system (such as certain property with no class life) | 0.0 | 10.1 | 26.3 | 35.4 | 39.6 | 40.2 | 40.8 | 41.4 | 37.5 | 29.2 | 20.8 | 12.5 |

(3) *Example.* The following example illustrates the application of this paragraph (b):

Example. On February 1, 1987, B, a calendar year taxpayer, leases and places in service a computer with a fair market value of \$3,000. The lease is to be for a period of two years. B's qualified business use of the property, which is the only business/investment use, is 80 percent in taxable year 1987, 40 percent in taxable year 1988, and 35 percent in taxable year 1989. B must add an inclusion amount to gross income for taxable year 1988, the first taxable year in which B does not use the computer predominantly for business (*i.e.*, the first taxable year in which B's business use percentage is 50 percent or less). Since 1988 is the second taxable year during the lease, and since the computer has a 5-year recovery period under the General and Alternative Depreciation Systems, the applicable percentage from the table in subdivision (i) of paragraph (b)(2) is -7.2%, and the applicable percentage from the table in subdivision (ii) is 10%. B's inclusion amount is \$154, which is the sum of the amounts determined under subdivisions (i) and (ii) of subparagraph (b)(2) of this paragraph. The amount determined under subdivision (i) is -\$86 [$\$3,000 \times 40\% \times (-7.2\%)$], and the amount determined under subdivision (ii) is \$240 [$\$3,000 \times 80\% \times 10\%$].

[T.D. 8218, 53 FR 29881, Aug. 9, 1988; 53 FR 32821, Aug. 26, 1988, as amended by T.D. 8298, 55 FR 13370, Apr. 12, 1990; Redesignated and amended at T.D. 8473, 58 FR 19060, Apr. 12, 1993; T.D. 9133, 69 FR 35515, June 25, 2004; T.D. 9483, 75 FR 27937, May 19, 2010]

§ 1.280G-1 Golden parachute payments.

The following questions and answers relate to the treatment of golden parachute payments under section 280G of the Internal Revenue Code of 1986, as added by section 67 of the Tax Reform Act of 1984 (Pub. L. No. 98-369; 98 Stat. 585) and amended by section 1804(j) of the Tax Reform Act of 1986 (Pub. L. No. 99-514; 100 Stat. 2807), section 1018(d)(6)-(8) of the Technical and Miscellaneous Revenue Act of 1988 (Pub. L. No. 100-647; 102 Stat. 3581), and section 1421 of the Small Business Job Protection Act of 1996 (Pub. L. No. 104-188; 110 Stat. 1755). The following is a table of subjects covered in this section:

Overview

Effect of section 280G—Q/A-1
Meaning of “parachute payment”—Q/A-2
Meaning of “excess parachute payment”—Q/A-3
Effective date of section 280G—Q/A-4

Exempt Payments

Exempt payments generally—Q/A-5

Effective Date

General effective date of section 280G—Q/A-47

Effective date of regulations—Q/A-48

Overview

Q-1: What is the effect of Internal Revenue Code section 280G?

A-1: (a) Section 280G disallows a deduction for any excess parachute payment paid or accrued. For rules relating to the imposition of a nondeductible 20-percent excise tax on the recipient of any excess parachute payment, see Internal Revenue Code sections 4999, 275(a)(6), and 3121(v)(2)(A).

(b) The disallowance of a deduction under section 280G is not contingent on the imposition of the excise tax under section 4999. The imposition of the excise tax under section 4999 is not contingent on the disallowance of a deduction under section 280G. Thus, for example, because the imposition of the excise tax under section 4999 is not contingent on the disallowance of a deduction under section 280G, a payee may be subject to the 20-percent excise tax under section 4999 even though the disallowance of the deduction for the excess parachute payment may not directly affect the federal taxable income of the payor.

Q-2: What is a parachute payment for purposes of section 280G?

A-2: (a) The term *parachute payment* means any payment (other than an exempt payment described in Q/A-5) that—

- (1) Is in the nature of compensation;
- (2) Is made or is to be made to (or for the benefit of) a disqualified individual;
- (3) Is contingent on a change—
 - (i) In the ownership of a corporation;
 - (ii) In the effective control of a corporation; or
 - (iii) In the ownership of a substantial portion of the assets of a corporation; and
- (4) Has (together with other payments described in paragraphs (a)(1), (2), and (3) of this A-2 with respect to the same disqualified individual) an aggregate present value of at least 3 times the individual's base amount.

(b) Hereinafter, a change referred to in paragraph (a)(3) of this A-2 is generally referred to as a change in ownership or control. For a discussion of the application of paragraph (a)(1), see Q/A-11 through Q/A-14; paragraph (a)(2), Q/A-15 through Q/A-21; paragraph (a)(3),

Q/A-22 through Q/A-29; and paragraph (a)(4), Q/A-30 through Q/A-36.

(c) The term *parachute payment* also includes any payment in the nature of compensation to (or for the benefit of) a disqualified individual that is pursuant to an agreement that violates a generally enforced securities law or regulation. This type of parachute payment is referred to in this section as a securities violation parachute payment. See Q/A-37 for the definition and treatment of securities violation parachute payments.

Q-3: What is an excess parachute payment for purposes of section 280G?

A-3: The term *excess parachute payment* means an amount equal to the excess of any parachute payment over the portion of the base amount allocated to such payment. Subject to certain exceptions and limitations, an excess parachute payment is reduced by any portion of the payment which the taxpayer establishes by clear and convincing evidence is reasonable compensation for personal services actually rendered by the disqualified individual before the date of the change in ownership or control. For a discussion of the nonreduction of a securities violation parachute payment by reasonable compensation, see Q/A-37. For a discussion of the computation of excess parachute payments and their reduction by reasonable compensation, see Q/A-38 through Q/A-44.

Q-4: What is the effective date of section 280G and this section?

A-4: In general, section 280G applies to payments under agreements entered into or renewed after June 14, 1984. Section 280G also applies to certain payments under agreements entered into on or before June 14, 1984, and amended or supplemented in significant relevant respect after that date. This section applies to any payment that is contingent on a change in ownership or control and the change in ownership or control occurs on or after January 1, 2004. For a discussion of the application of the effective date, see Q/A-47 and Q/A-48.

Exempt Payments

Q-5: Are some types of payments exempt from the definition of the term *parachute payment*?

A-5: (a) Yes, the following five types of payments are exempt from the definition of *parachute payment*—

(1) Payments with respect to a small business corporation (described in Q/A-6 of this section);

(2) Certain payments with respect to a corporation no stock in which is readily tradeable on an established securities market (or otherwise) (described in Q/A-6 of this section);

(3) Payments to or from a qualified plan (described in Q/A-8 of this section);

(4) Certain payments made by a corporation undergoing a change in ownership or control that is described in any of the following sections of the Internal Revenue Code: section 501(c) (but only if such organization is subject to an express statutory prohibition against inurement of net earnings to the benefit of any private shareholder or individual, or if the organization is described in section 501(c)(1) or section 501(c)(21)), section 501(d), or section 529, collectively referred to as *tax-exempt organizations* (described in Q/A-6 of this section); and

(5) Certain payments of reasonable compensation for services to be rendered on or after the change in ownership or control (described in Q/A-9 of this section).

(b) Deductions for payments exempt from the definition of *parachute payment* are not disallowed by section 280G, and such exempt payments are not subject to the 20-percent excise tax of section 4999. In addition, such exempt payments are not taken into account in applying the 3-times-base-amount test of Q/A-30 of this section.

Q-6: Which payments with respect to a corporation referred to in paragraph (a)(1), (a)(2), or (a)(4) of Q/A-5 of this section are exempt from the definition of *parachute payment*?

A-6: (a) The term *parachute payment* does not include—

(1) Any payment to a disqualified individual with respect to a corporation which (immediately before the change in ownership or control) would qualify as a small business corporation (as defined in section 1361(b) but without regard to section 1361(b)(1)(C) thereof), without regard to whether the corporation had an election to be treated as a

corporation under section 1361 in effect on the date of the change in ownership or control;

(2) Any payment to a disqualified individual with respect to a corporation (other than a small business corporation described in paragraph (a)(1) of this A-6) if—

(i) Immediately before the change in ownership or control, no stock in such corporation was readily tradeable on an established securities market or otherwise; and

(ii) The shareholder approval requirements described in Q/A-7 of this section are met with respect to such payment; or

(3) Any payment to a disqualified individual made by a corporation which is a tax-exempt organization (as defined in paragraph (a)(4) of Q/A-5 of this section), but only if the corporation meets the definition of a tax-exempt organization both immediately before and immediately after the change in ownership or control.

(b) For purposes of paragraph (a)(1) of this A-6, the members of an affiliated group are not treated as one corporation.

(c) The requirements of paragraph (a)(2)(i) of this A-6 are not met with respect to a corporation if a substantial portion of the assets of any entity consists (directly or indirectly) of stock in such corporation and any ownership interest in such entity is readily tradeable on an established securities market or otherwise. For this purpose, such stock constitutes a substantial portion of the assets of an entity if the total fair market value of the stock is equal to or exceeds one third of the total gross fair market value of all of the assets of the entity. For this purpose, *gross fair market value* means the value of the assets of the entity, determined without regard to any liabilities associated with such assets. If a corporation is a member of an affiliated group (which group is treated as one corporation under A-46 of this section), the requirements of paragraph (a)(2)(i) of this A-6 are not met if any stock in any member of such group is readily tradeable on an established securities market or otherwise.

(d) For purposes of paragraph (a)(2)(i) of this A-6, the term *stock* does not in-

clude stock described in section 1504(a)(4) if the payment does not adversely affect the redemption and liquidation rights of any shareholder owning such stock.

(e) For purposes of paragraph (a)(2)(i) of this A-6, stock is treated as readily tradeable if it is regularly quoted by brokers or dealers making a market in such stock.

(f) For purposes of paragraph (a)(2)(i) of this A-6, the term *established securities market* means an established securities market as defined in § 1.897-1(m).

(g) The following examples illustrate the application of this exemption:

Example 1. A small business corporation (within the meaning of paragraph (a)(1) of this A-6) operates two businesses. The corporation sells the assets of one of its businesses, and these assets represent a substantial portion of the assets of the corporation. Because of the sale, the corporation terminates its employment relationship with persons employed in the business the assets of which are sold. Several of these employees are highly-compensated individuals to whom the owners of the corporation make severance payments in excess of 3 times each employee's base amount. Since the corporation is a small business corporation immediately before the change in ownership or control, the payments are not parachute payments.

Example 2. Assume the same facts as in *Example 1*, except that the corporation is not a small business corporation within the meaning of paragraph (a)(1) of this A-6. If no stock in the corporation is readily tradeable on an established securities market (or otherwise) immediately before the change in ownership or control and the shareholder approval requirements described in Q/A-7 of this section are met, the payments are not parachute payments.

Example 3. Stock of Corporation S is owned by Corporation P, stock in which is readily tradeable on an established securities market. The Corporation S stock equals or exceeds one third of the total gross fair market value of the assets of Corporation P, and thus, represents a substantial portion of the assets of Corporation P. Corporation S makes severance payments to several of its highly-compensated individuals that are parachute payments under section 280G and Q/A-2 of this section. Because stock in Corporation P is readily tradeable on an established securities market, the payments are not exempt from the definition of *parachute payments* under this A-6.

Example 4. A is a corporation described in section 501(c)(3), and accordingly, its net earnings are prohibited from inuring to the

benefit of any private shareholder or individual. A transfers substantially all of its assets to another corporation resulting in a change in ownership or control. Contingent on the change in ownership or control, A makes a payment that, but for the potential application of the exemption described in A-5(a)(4), would constitute a *parachute payment*. However, one or more aspects of the transaction that constitutes the change in ownership or control causes A to fail to be described in section 501(c)(3). Accordingly, A fails to meet the definition of a *tax-exempt organization* both immediately before and immediately after the change in ownership or control, as required by this A-6. As a result, the payment made by A that was contingent on the change in ownership or control is not exempt from the definition of parachute payment under this A-6.

Example 5. B is a corporation described in section 501(c)(15). B does not meet the definition of a *tax-exempt organization* because section 501(c)(15) does not expressly prohibit inurement of B's net earnings to the benefit of any private shareholder or individual. Accordingly, if B has a change in ownership or control and makes a payment that would otherwise meet the definition of a *parachute payment*, such payment is not exempt from the definition of the term *parachute payment* for purposes of this A-6.

Q-7: How are the shareholder approval requirements referred to in paragraph (a)(2)(ii) of Q/A-6 of this section met?

A-7: (a) *General rule.* The shareholder approval requirements referred to in paragraph (a)(2)(ii) of Q/A-6 of this section are met with respect to any payment if—

(1) Such payment is approved by more than 75 percent of the voting power of all outstanding stock of the corporation entitled to vote (as described in this A-7) immediately before the change in ownership or control; and

(2) Before the vote, there was adequate disclosure to all persons entitled to vote (as described in this A-7) of all material facts concerning all material payments which (but for Q/A-6 of this section) would be parachute payments with respect to a disqualified individual.

(b) *Voting requirements—(1) General rule.* The vote described in paragraph (a)(1) of this A-7 must determine the right of the disqualified individual to receive the payment, or, in the case of a payment made before the vote, the

right of the disqualified individual to retain the payment. Except as otherwise provided in this A-7, the normal voting rules of the corporation are applicable. Thus, for example, an optionholder is generally not permitted to vote for purposes of this A-7. For purposes of this A-7, the vote can be on less than the full amount of the payment(s) to be made. Shareholder approval can be a single vote on all payments to any one disqualified individual, or on all payments to more than one disqualified individual. The total payment(s) submitted for shareholder approval, however, must be separately approved by the shareholders. The requirements of this paragraph (b)(1) are not satisfied if approval of the change in ownership or control is contingent, or otherwise conditioned, on the approval of any payment to a disqualified individual that would be a parachute payment but for Q/A-6 of this section.

(2) *Special rule.* A vote to approve the payment does not fail to be a vote of the outstanding stock of the corporation entitled to vote immediately before the change in ownership or control merely because the determination of the shareholders entitled to vote on the payment is based on the shareholders of record as of any day within the six-month period immediately prior to and ending on date of the change in ownership or control, provided the disclosure requirements described in paragraph (c) of this A-7 are met.

(3) *Entity shareholder.* (i) Approval of a payment by any shareholder that is not an individual (an entity shareholder) generally must be made by the person authorized by the entity shareholder to approve the payment. See paragraph (b)(4) of this A-7 if the person so authorized by the entity shareholder is a disqualified individual who would receive a parachute payment if the shareholder approval requirements of this A-7 are not met.

(ii) However, if a substantial portion of the assets of an entity shareholder consists (directly or indirectly) of stock in the corporation undergoing the change in ownership or control, approval of the payment by that entity

shareholder must be made by a separate vote of the persons who hold, immediately before the change in ownership or control, more than 75 percent of the voting power of the entity shareholder entitled to vote. The preceding sentence does not apply if the value of the stock of the corporation owned, directly or indirectly, by or for the entity shareholder does not exceed 1 percent of the total value of the outstanding stock of the corporation undergoing a change in ownership or control. Where approval of a payment by an entity shareholder must be made by a separate vote of the owners of the entity shareholder, the normal voting rights of the entity shareholder determine which owners shall vote. For purposes of this (b)(3)(ii), stock represents a substantial portion of the assets of an entity shareholder if the total fair market value of the stock held by the entity shareholder in the corporation undergoing the change in ownership or control is equal to or exceeds one third of the total gross fair market value of all of the assets of the entity shareholder. For this purpose, *gross fair market value* means the value of the assets of the entity, determined without regard to any liabilities associated with such assets.

(4) *Disqualified individuals and attribution of stock ownership.* In determining the persons entitled to vote referred to in paragraph (a)(1) or (b)(3) of this A-7, stock that would otherwise be entitled to vote is not counted as outstanding stock and is not considered in determining whether the more than 75 percent vote has been obtained under this A-7 if the stock is actually owned or constructively owned under section 318(a) by or for a disqualified individual who receives (or is to receive) payments that would be parachute payments if the shareholder approval requirements described in paragraph (a) of this A-7 are not met. Likewise, stock is not counted as outstanding stock if the owner is considered under section 318(a) to own any part of the stock owned directly or indirectly by or for a disqualified individual described in the preceding sentence. In addition, if the person authorized to vote the stock of an entity shareholder is a disqualified individual who would

receive a parachute payment if the shareholder approval requirements described in this A-7 are not met, such person is not permitted to vote such shares, but the entity shareholder is permitted to appoint an equity interest holder in the entity shareholder, or in the case of a trust another person eligible to vote on behalf of the trust, to vote the otherwise eligible shares. However, if all persons who hold voting power in the corporation undergoing the change in ownership or control are disqualified individuals or related persons described in this paragraph (b)(4), then such stock is counted as outstanding stock and votes by such persons are considered in determining whether the more than 75 percent vote has been obtained.

(c) *Adequate disclosure.* To be adequate disclosure for purposes of paragraph (a)(2) of this A-7, disclosure must be full and truthful disclosure of the material facts and such additional information as is necessary to make the disclosure not materially misleading at the time the disclosure is made. Disclosure of such information must be made to every shareholder of the corporation entitled to vote under this A-7. For each disqualified individual, material facts that must be disclosed include, but are not limited to, the event triggering the payment or payments, the total amount of the payments that would be parachute payments if the shareholder approval requirements described in paragraph (a) of this A-7 are not met, and a brief description of each payment (*e.g.*, accelerated vesting of options, bonus, or salary). An omitted fact is considered a material fact if there is a substantial likelihood that a reasonable shareholder would consider it important.

(d) *Corporation without shareholders.* If a corporation does not have shareholders, the exemption described in Q/A-6(a)(2) of this section and the shareholder approval requirements described in this A-7 do not apply. Solely for purposes of this paragraph (d), a shareholder does not include a member in an association, joint stock company, or insurance company.

(e) *Examples.* The following examples illustrate the application of this A-7:

Example 1. Corporation S has two shareholders—Corporation P, which owns 76 percent of the stock of Corporation S, and A, a disqualified individual who would receive a parachute payment if the shareholder approval requirements of this A-7 are not met. No stock of Corporation P or S is readily tradeable on an established securities market (or otherwise). The value of the stock of Corporation S equals or exceeds one third of the gross fair market value of the assets of Corporation P, and thus, represents a substantial portion of the assets of Corporation P. All of the stock of Corporation S is sold to Corporation M. Contingent on the change in ownership of Corporation S, severance payments are made to certain officers of Corporation S in excess of 3 times each officer's base amount. If the payments are approved by a separate vote of the persons who hold, immediately before the sale, more than 75 percent of the voting power of the outstanding stock entitled to vote of Corporation P and the disclosure rules of paragraph (a)(2) of this A-7 are complied with, the shareholder approval requirements of this A-7 are met, and the payments are exempt from the definition of *parachute payment* pursuant to A-6 of this section.

Example 2. (i) Stock of Corporation X, none of which is traded on an established market, is acquired by Corporation Y. In the voting ballot concerning the sale, the Corporation X shareholders are asked to vote either “yes” on the sale and “yes” to paying parachute payments to A, a disqualified individual with respect to Corporation A, or “no” on the sale and “no” to paying parachute payments to A.

(ii) Because the approval of the change in ownership or control is conditioned on the approval of the payments to A, the shareholder approval requirements of this A-7 are not satisfied. If the payments are made to A, the payments are not exempt from the definition of *parachute payment* pursuant to Q/A-6 of this section.

(iii) Assume the same facts as in paragraph (i) of this *Example 2*, except that the acquisition agreement between Corporation X and Corporation Y states that the acquisition is approved only if there are no parachute payments made to A. If the shareholder approval and the disclosure requirements described in this A-7 are met, the payments will not be parachute payments. Alternatively, if the shareholders do not approve the payments, the payments cannot be made (or retained). Thus, the transaction is not conditioned on the approval of the parachute payments. If the payments are made and the requirements of this A-7 are met, the payments are exempt from the definition of *parachute payment* pursuant to Q/A-6 of this section.

Example 3. Corporation M is wholly owned by Partnership P. No interest in either M or P is readily tradeable on an established securities

market (or otherwise). The value of the stock of Corporation M equals or exceeds one third of the gross fair market value of the assets of Partnership P, and thus, represents a substantial portion of the assets of Partnership P. Corporation M undergoes a change in ownership or control. Partnership P has one general partner and 200 limited partners. The general partner is not a disqualified individual. None of the limited partners are entitled to vote on issues involving the management of the partnership investments. If the payments that would be parachute payments if the shareholder approval requirements of this A-7 are not met are approved by the general partner and the disclosure rules of paragraph (a)(2) of this A-7 are complied with, the shareholder approval requirements of this A-7 are met, and the payments are exempt from the definition of *parachute payment* pursuant to A-6 of this section.

Example 4. Corporation A has several shareholders including X and Y, who are disqualified individuals with respect to Corporation A and would receive parachute payments if the shareholder approval requirements of this A-7 are not met. No stock of Corporation A is readily tradeable on an established securities market (or otherwise). Corporation A undergoes a change in ownership or control. Contingent on the change in ownership or control, severance payments are payable to X and Y that are in excess of 3 times each individual's base amount. To determine whether the shareholder approval requirements of paragraph (a)(1) of this A-7 are satisfied regarding the payments to X and Y, the stock of X and Y is not considered outstanding, and X and Y are not entitled to vote.

Example 5. Assume the same facts as in *Example 4*, except that after adequate disclosure of all material facts (within the meaning of paragraph (a)(2) of this A-7) to all shareholders entitled to vote, 60 percent of the shareholders who are entitled to vote approve the payments to X and Y. Because more than 75 percent of the shareholders holding outstanding stock who were entitled to vote did not approve the payments to X and Y, the payments cannot be made.

Example 6. Assume the same facts as in *Example 4* except that disclosure of all the material facts (within the meaning of paragraph (a)(2) of this A-7) regarding the payments to X and Y is made to two of Corporation A's shareholders, who collectively own 80 percent of Corporation A's stock entitled to vote and approve the payment. Both shareholders approve the payments. Assume further that no adequate disclosure of the material facts regarding the payments to X and Y is made to other Corporation A shareholders who are entitled to vote within the meaning of this A-7. Notwithstanding that 80 percent of the shareholders entitled to vote approve

the payments, because disclosure regarding the payments to X and Y is not made to all of Corporation A's shareholders who were entitled to vote, the disclosure requirements of paragraph (a)(2) of this A-7 are not met, and the payments are not exempt from the definition of *parachute payment* pursuant to Q/A-6.

Example 7. Corporation C has three shareholders—Partnership, which owns 20 percent of the stock of Corporation C; A, an individual who owns 60 percent of the stock of Corporation C; and B, an individual who owns 20 percent of Corporation C. Stock of Corporation C does not represent a substantial portion of the assets of Partnership. No interest in either Partnership or Corporation C is readily tradeable on an established securities market (or otherwise). P, a one-third partner in Partnership, is a disqualified individual with respect to Corporation C. Corporation C undergoes a change in ownership or control. Contingent on the change, a severance payment is payable to P in excess of 3 times P's base amount. To determine the persons who are entitled to vote referred to in paragraph (a)(1) of this A-7, one-third of the stock held by Partnership is not considered outstanding stock. If P is the person authorized by Partnership to approve the payment, none of the shares of Partnership are considered outstanding stock. However, Partnership is permitted to appoint an equity interest holder in Partnership (who is not a disqualified individual who would receive a parachute payment if the requirements of this A-7 are not met), to vote the two-thirds of the shares held by Partnership that are otherwise entitled to be voted.

Example 8. X, Y, and Z are all employees and disqualified individuals with respect to Corporation E. No stock in Corporation E is readily tradeable on an established securities market (or otherwise). Each individual has a base amount of \$100,000. Corporation E undergoes a change in ownership or control. Contingent on the change, a severance payment of \$400,000 is payable to X; \$600,000 is payable to Y; and \$1,000,000 is payable to Z. Corporation E provides each Corporation E shareholder entitled to vote (as determined under this A-7) with a ballot listing and describing the payments of \$400,000 to X; \$600,000 to Y; and \$1,000,000 to Z and the triggering event that generated the payments. Next to each name and corresponding amount on the ballot, Corporation E requests approval (with a "yes" and "no" box) of each total payment to be made to each individual and states that if the payment is not approved the payment will not be made. Adequate disclosure, within the meaning of this A-7 is made to each shareholder entitled to vote under this A-7. More than 75 percent of the Corporation E shareholders who are entitled to vote under paragraph (a)(1) of this A-7 approve each payment to each indi-

vidual. The shareholder approval requirements of this A-7 are met, and the payments are exempt from the definition of *parachute payment* pursuant to A-6 of this section.

Example 9. Assume the same facts as in Example 8 except that the ballot does not request approval of each total payment to each individual separately. Instead, the ballot states that \$2,000,000 in payments will be made to X, Y, and Z and requests approval of the \$2,000,000 payments. Assuming the triggering event and amount of the payments to X, Y, and Z are separately described to the shareholders entitled to vote under this A-7, the shareholder approval requirements of paragraph (a)(1) of this A-7 are met, and the payments are exempt from the definition of *parachute payment* pursuant to A-6 of this section.

Example 10. B, an employee of Corporation X, is a disqualified individual with respect to Corporation X. Stock of Corporation X is not readily tradeable on an established securities market (or otherwise). Corporation X undergoes a change in ownership or control. B's base amount is \$205,000. Under B's employment agreement with Corporation X, in the event of a change in ownership or control, B's stock options will vest and B will receive severance and bonus payments. Contingent on the change in ownership or control, B's stock options with a fair market value of \$500,000 immediately vest, \$200,000 of which is contingent on the change, and B will receive a \$200,000 bonus payment and a \$400,000 severance payment. Corporation X distributes a ballot to every shareholder of Corporation X who immediately before the change is entitled to vote as described in this A-7. The ballot contains adequate disclosure of all material facts and lists the following payments to be made to B: The contingent payment of \$200,000 attributable to options, a \$200,000 bonus payment, and a \$400,000 severance payment. The ballot requests shareholder approval of the \$200,000 bonus payment to B and states that whether or not the \$200,000 bonus payment is approved, B will receive \$200,000 attributable to options and a \$400,000 severance payment. More than 75 percent of the shareholders entitled to vote as described by this A-7 approve the \$200,000 bonus payment to B. The shareholder approval requirements of this A-7 are met, and the \$200,000 payment is exempt from the definition of *parachute payment* pursuant to A-6 of this section.

Q-8: Which payments under a qualified plan are exempt from the definition of *parachute payment*?

A-8: The term *parachute payment* does not include any payment to or from—

(a) A plan described in section 401(a) which includes a trust exempt from tax under section 501(a);

(b) An annuity plan described in section 403(a);

(c) A simplified employee pension (as defined in section 408(k)); or

(d) A simple retirement account (as defined in section 408(p)).

Q-9: Which payments of reasonable compensation are exempt from the definition of *parachute payment*?

A-9: Except in the case of securities violation *parachute payments*, the term *parachute payment* does not include any payment (or portion thereof) which the taxpayer establishes by clear and convincing evidence is reasonable compensation for personal services to be rendered by the disqualified individual on or after the date of the change in ownership or control. See Q/A-37 of this section for the definition and treatment of securities violation *parachute payments*. See Q/A-40 through Q/A-44 of this section for rules on determining amounts of reasonable compensation.

Payor of Parachute Payments

Q-10: Who may be the payor of parachute payments?

A-10: Parachute payments within the meaning of Q/A-2 of this section may be paid, directly or indirectly, by—

(i) The corporation referred to in paragraph (a)(3) of Q/A-2 of this section;

(ii) A person acquiring ownership or effective control of that corporation or ownership of a substantial portion of that corporation's assets; or

(iii) Any person whose relationship to such corporation or other person is such as to require attribution of stock ownership between the parties under section 318(a).

Payments in the Nature of Compensation

Q-11: What types of payments are in the nature of compensation?

A-11: (a) *General rule.* For purposes of this section, all payments—in whatever form—are payments in the nature of compensation if they arise out of an employment relationship or are associated with the performance of services. For this purpose, the performance of services includes holding oneself out as available to perform services and refraining from performing services (such as under a covenant not to compete or similar arrangement). Payments in the

nature of compensation include (but are not limited to) wages and salary, bonuses, severance pay, fringe benefits, life insurance, pension benefits, and other deferred compensation (including any amount characterized by the parties as interest thereon). A payment in the nature of compensation also includes cash when paid, the value of the right to receive cash, (including the value of accelerated vesting under Q/A-24(c), or a transfer of property. However, payments in the nature of compensation do not include attorney's fees or court costs paid or incurred in connection with the payment of any amount described in paragraphs (a)(1), (2), and (3) of Q/A-2 of this section or a reasonable rate of interest accrued on any amount during the period the parties contest whether a payment will be made.

(b) *When payment is considered to be made.* Except as otherwise provided in A-11 through Q/A-13 of this section, a payment in the nature of compensation is considered made (and is subject to the excise tax under section 4999) in the taxable year in which it is includible in the disqualified individual's gross income or, in the case of fringe benefits and other benefits excludible from income, in the taxable year the benefits are received.

(c) *Prepayment rule.* Notwithstanding the general rule described in paragraph (b) of this A-11, a disqualified individual may, in the year of the change in ownership or control, or any later year, prepay the excise tax under section 4999, provided that the payor and disqualified individual treat the payment of the excise tax consistently and the payor satisfies its obligations under section 4999(c) in the year of prepayment. The prepayment of the excise tax for purposes of section 4999 must be based on the present value of the excise tax that would be due in the year the excess parachute payment would actually be paid (calculated using the discount rate equal to 120 percent of the applicable Federal rate (determined under section 1274(d) and regulations thereunder; see Q/A-32)). For purposes of projecting the future value of a payment that provides for interest to be credited at a variable interest rate, it

is permissible to make a reasonable assumption regarding this variable rate. A disqualified individual is not required to adjust the excise tax paid under this paragraph (c) merely because the interest rates in the future are not the same as the rate used for purposes of projecting the future value of the payment. However, a disqualified individual may not apply this paragraph (c) of this A-11 to a payment to be made in cash if the present value of the payment would be considered not reasonably ascertainable under section 3121(v) and § 31.3121(v)(2)-1(e)(4) of this Chapter or to a payment related to health benefits or coverage. The Commissioner may provide additional guidance regarding the applicability of this paragraph (c) to certain payments in published guidance of general applicability under § 601.601(d)(2) of this Chapter.

(d) *Transfers of property.* Transfers of property are treated as payments for purposes of this A-11. See Q/A-12 of this section for rules on determining when such payments are considered made and the amount of such payments. See Q/A-13 of this section for special rules on transfers of stock options.

(e) The following example illustrates the principles of this A-11:

Example. D is a disqualified individual with respect to Corporation X. D has a base amount of \$100,000 and is entitled to receive two parachute payments, one of \$200,000 and the other of \$400,000. A change in ownership or control of Corporation X occurs on May 1, 2005, and the \$200,000 payment is made to D at the time of the change in ownership or control. The \$400,000 payment is to be made on October 1, 2010. Corporation X and D agree that D will prepay the excise tax and X will satisfy its obligations under section 4999(c) with respect to the \$400,000 payment. Using discount rate determined under Q/A-32, Corporation X and D determine that the present value of the \$400,000 payment is \$300,000 on the date of the change in ownership or control. The portions of the base amount allocated to these payments are \$40,000 ($(\$200,000/\$500,000) \times \$100,000$) and \$60,000 ($(\$300,000/\$500,000) \times \$100,000$), respectively. Thus, the amount of the first excess parachute payment is \$160,000 ($\$200,000 - \$40,000$) and that of the second excess parachute payment is \$340,000 ($\$400,000 - \$60,000$). The excise tax on the \$400,000 payment is \$68,000 ($\$340,000 \times 20$ percent). Assume the present value (calculated in accordance with paragraph (c) of this A-11) of \$68,000 is \$50,000. To prepay the

excise tax due on the \$400,000 payment, Corporation X must satisfy its obligations under section 4999 with respect to the \$50,000, in addition to the \$32,000 withholding required with respect to the \$200,000 payment.

Q-12: If a property transfer to a disqualified individual is a payment in the nature of compensation, when is the payment considered made (or to be made), and how is the amount of the payment determined?

A-12: (a) Except as provided in this A-12 and Q/A-13 of this section, a transfer of property is considered a payment made (or to be made) in the taxable year in which the property transferred is includible in the gross income of the disqualified individual under section 83 and the regulations thereunder. Thus, in general, such a payment is considered made (or to be made) when the property is transferred (as defined in § 1.83-3(a)) to the disqualified individual and becomes substantially vested (as defined in § 1.83-3(b) and (j)) in such individual. The amount of the payment is determined under section 83 and the regulations thereunder. Thus, in general, the amount of the payment is equal to the excess of the fair market value of the transferred property (determined without regard to any lapse restriction, as defined in § 1.83-3(i)) at the time that the property becomes substantially vested, over the amount (if any) paid for the property.

(b) An election made by a disqualified individual under section 83(b) with respect to transferred property will not apply for purposes of this A-12. Thus, even if such an election is made with respect to a property transfer that is a payment in the nature of compensation, for purposes of this section, the payment is generally considered made (or to be made) when the property is transferred to and becomes substantially vested in such individual.

(c) See Q/A-13 of this section for rules on applying this A-12 to transfers of stock options.

(d) The following example illustrates the principles of this A-12:

Example. On January 1, 2006, Corporation M gives to A, a disqualified individual, a bonus of 100 shares of Corporation M stock in connection with the performance of services to Corporation M. Under the terms of the bonus arrangement A is obligated to return the

Corporation M stock to Corporation M unless the earnings of Corporation M double by January 1, 2009, or there is a change in ownership or control of Corporation M before that date. A's rights in the stock are treated as substantially nonvested (within the meaning of § 1.83-3(b)) during that period because A's rights in the stock are subject to a substantial risk of forfeiture (within the meaning of § 1.83-3(c)) and are nontransferable (within the meaning of § 1.83-3(d)). On January 1, 2008, a change in ownership or control of Corporation M occurs. On that day, the fair market value of the Corporation M stock is \$250 per share. Because A's rights in the Corporation M stock become substantially vested (within the meaning of § 1.83-3(b)) on that day, the payment is considered made on that day, and the amount of the payment for purposes of this section is equal to \$25,000 ($100 \times \250). See Q/A-38 through 41 for rules relating to the reduction of the excess parachute payment by the portion of the payment which is established to be reasonable compensation for personal services actually rendered before the date of a change in ownership or control.

Q-13: How are transfers of statutory and nonstatutory stock options treated?

A-13: (a) For purposes of this section, an option (including an option to which section 421 applies) is treated as property that is transferred when the option becomes vested (regardless of whether the option has a readily ascertainable fair market value as defined in § 1.83-7(b)). For purposes of this A-13, *vested* means substantially vested within the meaning of § 1.83-3(b) and (j) or the right to the payment is not otherwise subject to a substantial risk of forfeiture within the meaning of section 83(c). Thus, for purposes of this section, the vesting of such an option is treated as a payment in the nature of compensation. The value of an option at the time the option vests is determined under all the facts and circumstances in the particular case. Factors relevant to such a determination include, but are not limited to: The difference between the option's exercise price and the value of the property subject to the option at the time of vesting; the probability of the value of such property increasing or decreasing; and the length of the period during which the option can be exercised. Thus, an option is treated as a payment in the nature of compensation on the date of grant or vesting, as applicable, without

regard to whether such option has an ascertainable fair market value. For purposes of this A-13, valuation may be determined by any method prescribed by the Commissioner in published guidance of general applicability under § 601.601(d)(2) of this Chapter.

(b) Any money or other property transferred to the disqualified individual on the exercise, or as consideration on the sale or other disposition, of an option described in paragraph (a) of this A-13 after the time such option vests is not treated as a payment in the nature of compensation to the disqualified individual under Q/A-11 of this section. Nonetheless, the amount of the otherwise allowable deduction under section 162 or 212 with respect to such transfer is reduced by the amount of the payment described in paragraph (a) of this A-13 treated as an excess parachute payment.

Q-14: Are payments in the nature of compensation reduced by consideration paid by the disqualified individual?

A-14: Yes, to the extent not otherwise taken into account under Q/A-12 and Q/A-13 of this section, the amount of any payment in the nature of compensation is reduced by the amount of any money or the fair market value of any property (owned by the disqualified individual without restriction) that is (or will be) transferred by the disqualified individual in exchange for the payment. For purposes of the preceding sentence, the fair market value of property is determined as of the date the property is transferred by the disqualified individual.

Disqualified Individuals

Q-15: Who is a disqualified individual?

A-15: (a) For purposes of this section, an individual is a disqualified individual with respect to a corporation if, at any time during the *disqualified individual determination period* (as defined in Q/A-20 of this section), the individual is an employee or independent contractor of the corporation and is, with respect to the corporation—

- (1) A shareholder (but see Q/A-17 of this section);
- (2) An officer (see Q/A-18 of this section); or

(3) A highly-compensated individual (see Q/A-19 of this section).

(b) For purposes of this A-15, a director is a disqualified individual with respect to a corporation if, at any time during the *disqualified individual determination period*, the director is, with respect to the corporation, a shareholder (see Q/A-17 of this section), an officer (see Q/A-18 of this section), or a highly-compensated individual (see Q/A-19 of this section).

(c) For purposes of this A-15, an individual who is an employee or independent contractor of a corporation other than the corporation undergoing a change in ownership or control is disregarded for purposes of determining who is a disqualified individual if such individual is employed by the corporation undergoing the change in ownership or control only on the last day of the disqualified individual determination period. Thus, for example, assume that E is an employee of Corporation X, that Y is acquired by Corporation X, and that Y undergoes a change in ownership or control. If E becomes an employee of Y on the date of the acquisition, in determining the disqualified individuals with respect to Y, E is disregarded under this paragraph (c).

Q-16: Is a personal service corporation treated as an individual?

A-16: (a) Yes. For purposes of this section, a personal service corporation (as defined in section 269A(b)(1)), or a noncorporate entity that would be a personal service corporation if it were a corporation, is treated as an individual.

(b) The following example illustrates the principles of this A-16:

Example. Corporation N, a personal service corporation (as defined in section 269A(b)(1)), has a single individual as its sole shareholder and employee. Corporation N performs personal services for Corporation M. The compensation paid to Corporation N by Corporation M puts Corporation N within the group of highly-compensated individuals of Corporation M as determined under A-19 of this section. Thus, Corporation N is treated as a highly-compensated individual with respect to Corporation M.

Q-17: Are all shareholders of a corporation considered shareholders for purposes of paragraphs (a)(1) and (b) of Q/A-15 of this section?

A-17: (a) No. Only an individual who owns stock of a corporation with a fair market value that exceeds 1 percent of the fair market value of the outstanding shares of all classes of the corporation's stock is treated as a disqualified individual with respect to the corporation by reason of stock ownership. An individual who owns a lesser amount of stock may, however, be a disqualified individual with respect to the corporation if such individual is an officer (see Q/A-18) or highly-compensated individual (see Q/A-19) with respect to the corporation.

(b) For purposes of determining the amount of stock owned by an individual for purposes of paragraph (a) of this A-17, the constructive ownership rules of section 318(a) apply. Stock underlying a vested option is considered owned by an individual who holds the vested option (and the stock underlying an unvested option is not considered owned by an individual who holds the unvested option). For purposes of the preceding sentence, however, if the option is exercisable for stock that is not substantially vested (as defined by §§1.83-3(b) and (j)), the stock underlying the option is not treated as owned by the individual who holds the option. Solely for purposes of determining the amount of stock owned by an individual for purposes of this A-17, mutual and cooperative corporations are treated as having stock.

(c) The following examples illustrate the principles of this A-17:

Example 1. E, an employee of Corporation A, received options under Corporation A's Stock Option Plan. E's stock options vest three years after the date of grant. E is not an officer or highly compensated individual during the disqualified individual determination period. E does not own, and is not considered to own under section 318, any other Corporation A stock. Two years after the options are granted to E, all of Corporation A's stock is acquired by Corporation B. Under Corporation A's Stock Option Plan, E's options are converted to Corporation B options and the vesting schedule remains the same. Under paragraph (b) of this A-17, the stock underlying the unvested options held by E on the date of the change in ownership or control is not considered owned by E. Because E is not considered to own Corporation A stock with a fair market value exceeding 1 percent of the total fair market value of all of the

outstanding shares of all classes of Corporation A and E is not an officer or highly-compensated individual during the disqualified individual determination period, E is not a disqualified individual within the meaning of Q/A-15 of this section with respect to Corporation A.

Example 2. Assume the same facts as in *Example 1*, except that Corporation A's Stock Option Plan provides that all unvested options will vest immediately on a change in ownership or control. Under paragraph (b) of this A-17, the stock underlying the options that vest on the change in ownership or control is considered owned by E. If the stock considered owned by E exceeds 1 percent of the total fair market value of all of the outstanding shares of all classes of Corporation A stock (including for this purpose, all stock owned or constructively owned by all shareholders, provided that no share of stock is counted more than once), E is a disqualified individual within the meaning of Q/A-15 of this section with respect to Corporation A.

Example 3. Assume the same facts as in *Example 1* except that E received nonstatutory stock options that are exercisable for stock subject to a substantial risk of forfeiture under section 83. Assume further that under Corporation A's Stock Option Plan, the non-statutory options will vest on a change in ownership or control. Under paragraph (b) of this A-17, E is not considered to own the stock underlying the options that vest on the change in ownership or control because the options are exercisable for stock subject to a substantial risk of forfeiture within the meaning of section 83. Because E is not considered to own Corporation A stock with a fair market value exceeding 1 percent of the total fair market value of all of the outstanding shares of all classes of Corporation A stock and E is not an officer or highly compensated individual during the disqualified individual determination period, E is not a disqualified individual within the meaning of Q/A-15 of this section with respect to Corporation A.

Q-18: Who is an officer?

A-18: (a) For purposes of this section, whether an individual is an officer with respect to a corporation is determined on the basis of all the facts and circumstances in the particular case (such as the source of the individual's authority, the term for which the individual is elected or appointed, and the nature and extent of the individual's duties). Any individual who has the title of officer is presumed to be an officer unless the facts and circumstances demonstrate that the individual does not have the authority of an officer. However, an individual who

does not have the title of officer may nevertheless be considered an officer if the facts and circumstances demonstrate that the individual has the authority of an officer. Generally, the term officer means an administrative executive who is in regular and continued service. The term officer implies continuity of service and excludes those employed for a special and single transaction.

(b) An individual who is an officer with respect to any member of an affiliated group that is treated as one corporation pursuant to Q/A-46 of this section is treated as an officer of such one corporation.

(c) No more than 50 employees (or, if less, the greater of 3 employees, or 10 percent of the employees (rounded up to the nearest integer)) of the corporation (in the case of an affiliated group treated as one corporation, each member of the affiliated group) are treated as disqualified individuals with respect to a corporation by reason of being an officer of the corporation. For purposes of the preceding sentence, the number of employees of the corporation is the greatest number of employees the corporation has during the disqualified individual determination period (as defined in Q/A-20 of this section). If the number of officers of the corporation exceeds the number of employees who may be treated as officers under the first sentence of this paragraph (c), then the employees who are treated as officers for purposes of this section are the highest paid 50 employees (or, if less, the greater of 3 employees, or 10 percent of the employees (rounded up to the nearest integer)) of the corporation when ranked on the basis of compensation (as determined under Q/A-21 of this section) paid during the disqualified individual determination period.

(d) In determining the total number of employees of a corporation for purposes of this A-18, employees are not counted if they normally work less than 17½ hours per week (as defined in section 414(q)(5)(B) and the regulations thereunder) or if they normally work during not more than 6 months during any year (as defined in section 414(q)(5)(C) and the regulations thereunder). However, an employee who is

not counted for purposes of the preceding sentence may still be an officer.

Q-19: Who is a highly-compensated individual?

A-19: (a) For purposes of this section, a highly-compensated individual with respect to a corporation is any individual who is, or would be if the individual were an employee, a member of the group consisting of the lesser of the highest paid 1 percent of the employees of the corporation (rounded up to the nearest integer), or the highest paid 250 employees of the corporation, when ranked on the basis of compensation (as determined under Q/A-21 of this section) earned during the disqualified individual determination period (as defined in Q/A-20 of this section). For purposes of the preceding sentence, the number of employees of the corporation is the greatest number of employees the corporation has during the disqualified individual determination period (as defined in Q/A-20 of this section). However, no individual whose annualized compensation during the disqualified individual determination period is less than the amount described in section 414(q)(1)(B)(i) for the year in which the change in ownership or control occurs will be treated as a highly-compensated individual.

(b) An individual who is not an employee of the corporation is not treated as a highly-compensated individual with respect to the corporation on account of compensation received for performing services (such as brokerage, legal, or investment banking services) in connection with a change in ownership or control of the corporation, if the services are performed in the ordinary course of the individual's trade or business and the individual performs similar services for a significant number of clients unrelated to the corporation.

(c) The total number of employees of a corporation for purposes of this A-19 is determined in accordance with Q/A-18(d) of this section. However, an employee who is not counted for purposes of the preceding sentence may still be a highly-compensated individual.

Q-20: What is the disqualified individual determination period?

A-20: The disqualified individual determination period is the twelve-month

period prior to and ending on the date of the change in ownership or control of the corporation.

Q-21: How is *compensation* defined for purposes of determining who is a disqualified individual?

A-21: (a) For purposes of determining who is a disqualified individual, the term *compensation* means the compensation which was earned by the individual for services performed for the corporation with respect to which the change in ownership or control occurs (changed corporation), for a predecessor entity, or for a related entity. Such compensation is determined without regard to sections 125, 132(f)(4), 402(e)(3), and 402(h)(1)(B). Thus, for example, compensation includes elective or salary reduction contributions to a cafeteria plan, cash or deferred arrangement or tax-sheltered annuity, and amounts credited under a non-qualified deferred compensation plan.

(b) For purposes of this A-21, a predecessor entity is any entity which, as a result of a merger, consolidation, purchase or acquisition of property or stock, corporate separation, or other similar business transaction transfers some or all of its employees to the changed corporation or to a related entity or to a predecessor entity of the changed corporation. The term *related entity* includes—

(1) All members of a controlled group of corporations (as defined in section 414(b)) that includes the changed corporation or a predecessor entity;

(2) All trades or businesses (whether or not incorporated) that are under common control (as defined in section 414(c)) if such group includes the changed corporation or a predecessor entity;

(3) All members of an affiliated service group (as defined in section 414(m)) that includes the changed corporation or a predecessor entity; and

(4) Any other entities required to be aggregated with the changed corporation or a predecessor entity pursuant to section 414(o) and the regulations thereunder (except leasing organizations as defined in section 414(n)).

(c) For purposes of Q/A-18 and Q/A-19 of this section, compensation that was contingent on the change in ownership or control and that was payable in the

year of the change is not treated as compensation.

Contingent on Change in Ownership or Control

Q-22: When is a payment contingent on a change in ownership or control?

A-22: (a) In general, a payment is treated as contingent on a change in ownership or control if the payment would not, in fact, have been made had no change in ownership or control occurred, even if the payment is also conditioned on the occurrence of another event. A payment generally is treated as one which would not, in fact, have been made in the absence of a change in ownership or control unless it is substantially certain, at the time of the change, that the payment would have been made whether or not the change occurred. (But see Q/A-23 of this section regarding payments under agreements entered into after a change in ownership or control.) A payment that becomes vested as a result of a change in ownership or control is not treated as a payment which was substantially certain to have been made whether or not the change occurred. For purposes of this A-22, *vested* means the payment is substantially vested within the meaning of § 1.83-3(b) and (j) or the right to the payment is not otherwise subject to a substantial risk of forfeiture as defined by section 83(c).

(b)(1) For purposes of paragraph (a), a payment is treated as contingent on a change in ownership or control if—

(i) The payment is contingent on an event that is closely associated with a change in ownership or control;

(ii) A change in ownership or control actually occurs; and

(iii) The event is materially related to the change in ownership or control.

(2) For purposes of paragraph (b)(1)(i) of this A-22, a payment is treated as contingent on an event that is closely associated with a change in ownership or control unless it is substantially certain, at the time of the event, that the payment would have been made whether or not the event occurred. An event is considered closely associated with a change in ownership or control if the event is of a type often preliminary or subsequent to, or otherwise closely associated with, a change in

ownership or control. For example, the following events are considered closely associated with a change in the ownership or control of a corporation: The onset of a tender offer with respect to the corporation; a substantial increase in the market price of the corporation's stock that occurs within a short period (but only if such increase occurs prior to a change in ownership or control); the cessation of the listing of the corporation's stock on an established securities market; the acquisition of more than 5 percent of the corporation's stock by a person (or more than one person acting as a group) not in control of the corporation; the voluntary or involuntary termination of the disqualified individual's employment; a significant reduction in the disqualified individual's job responsibilities; and a change in ownership or control as defined in the disqualified individual's employment agreement (or elsewhere) that does not meet the definition of a change in ownership or control described in Q/A-27, 28, or 29 of this section. Whether other events are treated as closely associated with a change in ownership or control is based on all the facts and circumstances of the particular case.

(3) For purposes of determining whether an event (as described in paragraph (b)(2) of this A-22) is materially related to a change in ownership or control, the event is presumed to be materially related to a change in ownership or control if such event occurs within the period beginning one year before and ending one year after the date of the change in ownership or control. If such event occurs outside of the period beginning one year before and ending one year after the date of change in ownership or control, the event is presumed not materially related to the change in ownership or control. A payment does not fail to be contingent on a change in ownership or control merely because it is also contingent on the occurrence of a second event (without regard to whether the second event is closely associated with or materially related to a change in ownership or control). Similarly, a payment that is treated as contingent

on a change in ownership or control because it is contingent on a closely associated event does not fail to be treated as contingent on a change in ownership or control merely because it is also contingent on the occurrence of a second event (without regard to whether the second event is closely associated with or materially related to a change in ownership or control).

(c) A payment that would in fact have been made had no change in ownership or control occurred is treated as contingent on a change in ownership or control if the change in ownership or control (or the occurrence of an event that is closely associated with and materially related to a change in ownership or control within the meaning of paragraph (b)(1) of this A-22), accelerates the time at which the payment is made. Thus, for example, if a change in ownership or control accelerates the time of payment of deferred compensation that is vested without regard to the change in ownership or control, the payment may be treated as contingent on the change. See Q/A-24 of this section regarding the portion of a payment that is so treated. See also Q/A-8 of this section regarding the exemption for certain payments under qualified plans and Q/A-40 of this section regarding the treatment of a payment as reasonable compensation.

(d) A payment is treated as contingent on a change in ownership or control even if the employment or independent contractor relationship of the disqualified individual is not terminated (voluntarily or involuntarily) as a result of the change.

(e) The following examples illustrate the principles of this A-22:

Example 1. A corporation grants a stock appreciation right to a disqualified individual, A, more than one year before a change in ownership or control. After the stock appreciation right vests and becomes exercisable, a change in ownership or control of the corporation occurs, and A exercises the right. Assuming neither the granting nor the vesting of the stock appreciation right is contingent on a change in ownership or control, the payment made on exercise is not contingent on the change in ownership or control.

Example 2. A contract between a corporation and B, a disqualified individual, provides that a payment will be made to B if the corporation undergoes a change in ownership or control and B's employment with the cor-

poration is terminated at any time over the succeeding 5 years. Eighteen months later, a change in the ownership of the corporation occurs. Two years after the change in ownership, B's employment is terminated and the payment is made to B. Because it was not substantially certain that the corporation would have made the payment to B on B's termination of employment if there had not been a change in ownership, the payment is treated as contingent on the change in ownership under paragraph (a) of this A-22. This is true even though B's termination of employment is presumed not to be, and in fact may not be, materially related to the change in ownership or control.

Example 3. A contract between a corporation and C, a disqualified individual, provides that a payment will be made to C if C's employment is terminated at any time over the succeeding 3 years (without regard to whether or not there is a change in ownership or control). Eighteen months after the contract is entered into, a change in the ownership or control of the corporation occurs. Six months after the change in ownership or control, C's employment is terminated and the payment is made to C. Termination of employment is considered an event closely associated with a change in ownership or control. Because the termination occurred within one year after the date of the change in ownership or control, the termination of C's employment is presumed to be materially related to the change in ownership or control under paragraph (b)(3) of this A-22. If this presumption is not successfully rebutted, the payment will be treated as contingent on the change in ownership or control under paragraph (b) of this A-22.

Example 4. A contract between a corporation and a disqualified individual, D, provides that a payment will be made to D upon the onset of a tender offer for shares of the corporation's stock. A tender offer is made on December 1, 2008, and the payment is made to D. Although the tender offer is unsuccessful, it leads to a negotiated merger with another entity on June 1, 2009, which results in a change in the ownership or control of the corporation. It was not substantially certain, at the time of the onset of the tender offer, that the payment would have been made had no tender offer taken place. The onset of a tender offer is considered closely associated with a change in ownership or control. Because the tender offer occurred within one year before the date of the change in ownership or control of the corporation, the onset of the tender offer is presumed to be materially related to the change in ownership or control. If this presumption is not rebutted, the payment will be treated as contingent on the change in ownership or control. If no change in ownership or control had occurred, the payment would not be

treated as contingent on a change in ownership or control; however, the payment still could be a parachute payment under Q/A-37 of this section if the contract violated a generally enforced securities law or regulation.

Example 5. A contract between a corporation and a disqualified individual, E, provides that a payment will be made to E if the corporation's level of product sales or profits reaches a specified level. At the time the contract was entered into, the parties had no reason to believe that such an increase in the corporation's level of product sales or profits would be preliminary or subsequent to, or otherwise closely associated with, a change in ownership or control of the corporation. Eighteen months later, a change in the ownership or control of the corporation occurs and within one year after the date of the change of ownership or control, the corporation's level of product sales or profits reaches the specified level. Under these facts and circumstances (and in the absence of contradictory evidence), the increase in product sales or profits of the corporation is not an event closely associated with the change in ownership or control of the corporation. Accordingly, even if the increase is materially related to the change in ownership or control, the payment will not be treated as contingent on a change in ownership or control.

Q-23: May a payment be treated as contingent on a change in ownership or control if the payment is made under an agreement entered into after the change?

A-23: (a) No. Payments are not treated as contingent on a change in ownership or control if they are made (or are to be made) pursuant to an agreement entered into after the change (a post-change agreement). For this purpose, an agreement that is executed after a change in ownership or control pursuant to a legally enforceable agreement that was entered into before the change is considered to have been entered into before the change. (See Q/A-9 of this section regarding the exemption for reasonable compensation for services rendered on or after a change in ownership or control.) If an individual has a right to receive a payment that would be a parachute payment if made under an agreement entered into prior to a change in ownership or control (pre-change agreement) and gives up that right as bargained-for consideration for benefits under a post-change agreement, the agreement is treated as a post-change agreement only to the

extent the value of the payments under the agreement exceed the value of the payments under the pre-change agreement. To the extent payments under the agreement have the same value as the payments under the pre-change agreement, such payments retain their character as parachute payments subject to this section.

(b) The following examples illustrate the principles of this A-23:

Example 1. Assume that a disqualified individual is an employee of a corporation. A change in ownership or control of the corporation occurs, and thereafter the individual enters into an employment agreement with the acquiring company. Because the agreement is entered into after the change in ownership or control occurs, payments to be made under the agreement are not treated as contingent on the change.

Example 2. Assume the same facts as in *Example 1*, except that the agreement between the disqualified individual and the acquiring company is executed after the change in ownership or control, pursuant to a legally enforceable agreement entered into before the change. Payments to be made under the agreement may be treated as contingent on the change in ownership or control pursuant to Q/A-22 of this section. However, see Q/A-9 of this section regarding the exemption from the definition of parachute payment for certain amounts of reasonable compensation.

Example 3. Assume the same facts as in *Example 1*, except that prior to the change in ownership or control, the individual and corporation enter into an agreement under which the individual will receive parachute payments in the event of a change in ownership or control of the corporation. After the change, the individual agrees to give up the right to payments under the pre-change agreement that would be parachute payments if made, in exchange for compensation under a new agreement with the acquiring corporation. Because the individual gave up the right to parachute payments under the pre-change agreement in exchange for other payments under the post-change agreement, payments in an amount equal to the parachute payments under the pre-change agreement are treated as contingent on the change in ownership or control under this A-23. Because the post-change agreement was entered into after the change, payments in excess of this amount are not treated as parachute payments.

Q-24: If a payment is treated as contingent on a change in ownership or control, is the full amount of the payment so treated?

A-24: (a)(1) *General rule.* Yes. If the payment is a transfer of property, the amount of the payment is determined under Q/A-12 or Q/A-13 of this section. For all other payments, the amount of the payment is determined under Q/A-11 of this section. However, in certain circumstances, described in paragraphs (b) and (c) of this A-24, only a portion of the payment is treated as contingent on the change. Paragraph (b) of this A-24 applies to a payment that is vested, without regard to the change in ownership or control, and is treated as contingent on the change in ownership or control because the change accelerates the time at which the payment is made. Paragraph (c) of this A-24 applies to a payment that becomes vested as a result of the change in ownership or control if, without regard to the change in ownership or control, the payment was contingent only on the continued performance of services for the corporation for a specified period of time and if the payment is attributable, at least in part, to services performed before the date the payment becomes vested. Paragraph (b) or (c) does not apply to any payment (or portion thereof) if the payment is treated as contingent on the change in ownership or control pursuant to Q/A-25 of this section. For purposes of this A-24, vested has the same meaning as provided in Q/A-22(a).

(2) *Reduction by reasonable compensation.* The amount of a payment under paragraph (a)(1) of this A-24 is reduced by any portion of such payment that the taxpayer establishes by clear and convincing evidence is reasonable compensation for personal services rendered by the disqualified individual on or after the date of the change of control. See Q/A-9 and Q/A-38 through 44 of this section for rules concerning reasonable compensation. The portion of an amount treated as contingent under paragraph (b) or (c) of this A-24 may not be reduced by reasonable compensation.

(b) *Vested payments.* This paragraph (b) applies if a payment is vested, without regard to the change in ownership or control, and is treated as contingent on the change in ownership or control because the change accelerates the time at which the payment is made. In

such a case, the portion of the payment, if any, that is treated as contingent on the change in ownership or control is the amount by which the amount of the accelerated payment exceeds the present value of the payment absent the acceleration. If the value of such a payment absent the acceleration is not reasonably ascertainable, and the acceleration of the payment does not significantly increase the present value of the payment absent the acceleration, the present value of the payment absent the acceleration is treated as equal to the amount of the accelerated payment. If the value of the payment absent the acceleration is not reasonably ascertainable, but the acceleration significantly increases the present value of the payment, the future value of such payment is treated as equal to the amount of the accelerated payment. For rules on determining present value, see paragraph (e) of this A-24, Q/A-32, and Q/A-33 of this section.

(c)(1) *Nonvested payments.* This paragraph (c) applies to a payment that becomes vested as a result of the change in ownership or control to the extent that—

(i) Without regard to the change in ownership or control, the payment was contingent only on the continued performance of services for the corporation for a specified period of time; and

(ii) The payment is attributable, at least in part, to the performance of services before the date the payment is made or becomes certain to be made.

(2) The portion of the payment subject to paragraph (c) of this A-24 that is treated as contingent on the change in ownership or control is the amount described in paragraph (b) of this A-24, plus an amount, as determined in paragraph (c)(4) of this A-24, to reflect the lapse of the obligation to continue to perform services. In no event can the portion of the payment treated as contingent on the change in ownership or control under this paragraph (c) exceed the amount of the accelerated payment, or, if the payment is not accelerated, the present value of the payment.

(3) For purposes of this paragraph (c) of this A-24, the acceleration of the vesting of a stock option or the lapse of

a restriction on restricted stock is considered to significantly increase the value of a payment.

(4) The amount reflecting the lapse of the obligation to continue to perform services (described in paragraph (c)(2) of this A-24) is 1 percent of the amount of the accelerated payment multiplied by the number of full months between the date that the individual's right to receive the payment is vested and the date that, absent the acceleration, the payment would have been vested. This paragraph (c)(4) applies to the accelerated vesting of a payment in the nature of compensation even if the time at which the payment is made is not accelerated. In such a case, the amount reflecting the lapse of the obligation to continue to perform services is 1 percent of the present value of the future payment multiplied by the number of full months between the date that the individual's right to receive the payment is vested and the date that, absent the acceleration, the payment would have been vested.

(d) *Application of this A-24 to certain payments*—(1) *Benefits under a nonqualified deferred compensation plan.* In the case of a payment of benefits under a nonqualified deferred compensation plan, paragraph (b) of this A-24 applies to the extent benefits under the plan are vested without regard to the change in ownership or control. Paragraph (c) of this A-24 applies to the extent benefits under the plan become vested as a result of the change in ownership or control and are attributable, at least in part, to the performance of services prior to vesting. Any other payment of benefits under a nonqualified deferred compensation plan is a payment in the nature of compensation subject to the general rule of paragraph (a) of this A-24 and the rules in Q/A-11 of this section.

(2) *Employment agreements.* The general rule of paragraph (a) of this A-24 (and not the rules in paragraphs (b) or (c)) applies to the payment of amounts due under an employment agreement on a termination of employment or a change in ownership or control that otherwise would be attributable to the performance of services (or refraining from the performance of services) during any period that begins after the

date of termination of employment or change in ownership or control, as applicable. For purposes of this paragraph (d)(2) of this A-24, an employment agreement means an agreement between an employee or independent contractor and employer or service recipient which describes, among other things, the amount of compensation or remuneration payable to the employee or independent contractor. See Q/A-42(b) and 44 of this section for the treatment of the remaining amounts of salary under an employment agreement.

(3) *Vesting due to an event other than services.* Neither paragraph (b) nor (c) of this A-24 applies to a payment if (without regard to the change in ownership or control) vesting of the payment depends on an event other than the performance of services, such as the attainment of a performance goal, and the event does not occur prior to the change in ownership or control. In such circumstances, the full amount of the accelerated payment is treated as contingent on the change in ownership or control under paragraph (a) of this A-24. However, see Q/A-39 of this section for rules relating to the reduction of the excess parachute payment by the portion of the payment which is established to be reasonable compensation for personal services actually rendered before the date of a change in ownership or control.

(e) *Present value.* For purposes of this A-24, the present value of a payment is determined as of the date on which the accelerated payment is made.

(f) *Examples.* The following examples illustrate the principles of this A-24:

Example 1. (i) Corporation maintains a qualified plan and a nonqualified supplemental retirement plan (SERP) for its executives. Benefits under the SERP are not paid to participants until retirement. E, a disqualified individual with respect to Corporation, has a vested account balance of \$500,000 under the SERP. A change in ownership or control of Corporation occurs. The SERP provides that in the event of a change in ownership or control, all vested accounts will be paid to SERP participants.

(ii) Because E was vested in \$500,000 of benefits under the SERP prior to the change in ownership or control and the change merely accelerated the time at which the payment was made to E, only a portion of the payment, as determined under paragraph (b) of

this A-24, is treated as contingent on the change. Thus, the portion of the payment that is treated as contingent on the change is the amount by which the amount of the accelerated payment (\$500,000) exceeds the present value of the payment absent the acceleration.

(iii) Assume the same facts as in paragraph (i) of this *Example 1*, except that E's account balance of \$500,000 is not vested. Instead, assume that E will vest in E's account balance of \$500,000 in 2 years if E continues to perform services for the next 2 years. Assume further that the SERP provides that all unvested SERP benefits vest immediately on a change in ownership or control and are paid to the participants. Because the vesting of the SERP payment, without regard to the change, depends only on the performance of services for a specified period of time and the payment is attributable, in part, to the performance of services before the change in ownership or control, only a portion of the \$500,000 payment, as determined under paragraph (c) of this A-24, is treated as contingent on the change. The portion of the payment that is treated as contingent on the change is the lesser of the amount of the accelerated payment or the amount by which the accelerated payment exceeds the present value of the payment absent the acceleration, plus an amount to reflect the lapse of the obligation to continue to perform services.

(iv) Assume the same facts as in paragraph (i) of this *Example 1*, except that in addition to the pay out of the vested account balance of \$500,000 on the change in ownership or control, an additional \$70,000 will be credited to E's account and included in the payment to E. Because the \$500,000 was vested without regard to the change in ownership or control, paragraph (b) of this A-24 applies to the \$500,000 payment. Because the \$70,000 is not vested, without regard to the change, and is not attributable to the performance of services prior to the change, the entire \$70,000 payment is contingent on the change in ownership or control under paragraph (a) of this A-24.

(v) Assume the same facts as in paragraph (i) of this *Example 1*, except that the benefit under the SERP is calculated using a percentage of final average compensation multiplied by years of service. If, contingent on the change in ownership or control, E is credited with additional years of service, an adjustment to final average compensation, or an increase in the applicable percentage, any increase in the benefit payable under the SERP is not attributable to the performance of services prior to the change, and the entire increase in the benefit is contingent on the change in ownership or control under paragraph (a) of this A-24.

Example 2. As a result of a change in the effective control of a corporation D, a disquali-

fied individual with respect to the corporation, receives accelerated payment of D's vested account balance in a nonqualified deferred compensation account plan. Actual interest and other earnings on the plan assets are credited to each account as earned before distribution. Investment of the plan assets is not restricted in such a manner as would prevent the earning of a market rate of return on the plan assets. The date on which D would have received D's vested account balance absent the change in ownership or control is uncertain, and the rate of earnings on the plan assets is not fixed. Thus, the amount of the payment absent the acceleration is not reasonably ascertainable. Under these facts, acceleration of the payment does not significantly increase the present value of the payment absent the acceleration, and the present value of the payment absent the acceleration is treated as equal to the amount of the accelerated payment. Accordingly, no portion of the payment is treated as contingent on the change.

Example 3. (i) On January 15, 2006, a corporation and a disqualified individual, F, enter into a contract providing for a retention bonus of \$500,000 to be paid to F on January 15, 2011. The payment of the bonus will be forfeited by F if F does not remain employed by the corporation for the entire 5-year period. However, the contract provides that the full amount of the payment will be made immediately on a change in ownership or control of the corporation during the 5-year period. On January 15, 2009, a change in ownership or control of the corporation occurs and the full amount of the payment (\$500,000) is made on that date to F. Under these facts, the payment of \$500,000 was contingent only on F's performance of services for a specified period and is attributable, in part, to the performance of services before the change in ownership or control. Therefore, only a portion of the payment, as determined under paragraph (c) of this A-24 is treated as contingent on the change. The portion of the payment that is treated as contingent on the change is the amount by which the amount of the accelerated payment (*i.e.*, \$500,000, the amount paid to the individual because of the change in ownership) exceeds the present value of the payment that was expected to have been made absent the acceleration (*i.e.*, \$406,838, the present value on January 15, 2009, of a \$500,000 payment on January 15, 2011, plus \$115,000 (1 percent \times 23 months \times \$500,000) which is the amount reflecting the lapse of the obligation to continue to perform services. Accordingly, the amount of the payment treated as contingent on the change in ownership or control is \$208,162, the sum of \$93,162 (\$500,000 - \$406,838) + \$115,000). This result does not change if F actually remains employed until the end of the 5-year period.

(ii) Assume the same facts as in paragraph (i) of this *Example 3*, except that the retention bonus will vest on the change in ownership or control, but will not be paid until January 15, 2011 (the original date in the contract). Because the payment of \$500,000 was contingent only on F's performance of services for a specified period and is attributable, in part, to the performance of services before the change in ownership or control, only a portion of the \$500,000 payment is treated as contingent on the change in ownership or control as determined under paragraph (c) of this A-24. Because there is accelerated vesting of the bonus, the portion of the payment treated as contingent on the change is the amount described in paragraph (b) of this A-27, which is \$0 under these facts, plus an amount reflecting the lapse of the obligation to continue to perform services which is \$93,573 (1 percent \times 23 months \times \$406,838 (the present value of a \$500,000 payment)).

Example 4. (i) On January 15, 2006, a corporation gives to a disqualified individual, in connection with her performance of services to the corporation, a bonus of 1,000 shares of the corporation's stock. Under the terms of the bonus arrangement, the individual is obligated to return the stock to the corporation if she terminates her employment for any reason prior to January 15, 2011. However, if there is a change in the ownership or effective control of the corporation prior to January 15, 2011, she ceases to be obligated to return the stock. The individual's rights in the stock are treated as substantially nonvested (within the meaning of § 1.83-3(b) and (j)) during that period. On January 15, 2009, a change in the ownership of the corporation occurs. On that day, the fair market value of the stock is \$500,000.

(ii) Under these facts, the payment was contingent only on performance of services for a specified period and is attributable, in part, to the performance of services before the change in ownership or control. Thus, only a portion of the payment, as determined under paragraph (c) of this A-24, is treated as contingent on the change in ownership or control. The portion of the payment that is treated as contingent on the change is the amount by which the present value of the accelerated payment on January 15, 2009 (\$500,000), exceeds the present value of the payment that was expected to have been made on January 15, 2011, plus an amount reflecting the lapse of the obligation to continue to perform services. At the time of the change, it cannot be reasonably ascertained what the value of the stock would have been on January 15, 2011. The acceleration of the lapse of a restriction on stock is treated as significantly increasing the value of the payment. Therefore, the value of such stock on January 15, 2011, is deemed to be \$500,000, the amount of the accelerated payment. The

present value on January 15, 2009, of a \$500,000 payment to be made on January 15, 2011, is \$406,838. Thus, the portion of the payment treated as contingent on the change is \$208,162, the sum of \$93,162 (\$500,000 - \$406,838), plus \$115,000 (1 percent \times 23 months \times \$500,000), the amount reflecting the lapse of the obligation to continue to perform services.

Example 5. (i) On January 15, 2006, a corporation grants to a disqualified individual nonqualified stock options to purchase 30,000 shares of the corporation's stock. The options will be forfeited by the individual if he fails to perform personal services for the corporation until January 15, 2009. The options will, however, vest in the individual at an earlier date if there is a change in ownership or control of the corporation. On January 16, 2008, a change in the ownership or control of the corporation occurs and the options become vested in the individual. The value of the options on January 16, 2008, determined in accordance with Q/A-13, is \$600,000.

(ii) The payment of the options to purchase 30,000 shares was contingent only on performance of services for the corporation until January 15, 2009, and is attributable, in part, to the performance of services before the change in ownership or control. Therefore, only a portion of the payment is treated as contingent on the change. The portion of the payment that is treated as contingent on the change is the amount by which the accelerated payment on January 16, 2008 (\$600,000) exceeds the present value on January 16, 2008, of the payment that was expected to have been made on January 15, 2009, absent the acceleration, plus an amount reflecting the lapse of the obligation to continue to perform services. At the time of the change, it cannot be reasonably ascertained what the value of the options would have been on January 15, 2009. The acceleration of vesting in the options is treated as significantly increasing the value of the payment. Therefore, the value of such options on January 15, 2009, is deemed to be \$600,000, the amount of the accelerated payment. The present value on January 16, 2008, of a \$600,000 payment to be made on January 15, 2009, is \$549,964. Thus, the portion of the payment treated as contingent on the change is \$116,036, the sum of \$50,036 (\$600,000 - \$549,964), plus an amount reflecting the lapse of the obligation to continue to perform services which is \$66,000 (1 percent \times 11 months \times \$600,000).

Example 6. (i) Assume the same facts as in *Example 5*, except that the options become vested periodically (absent a change in ownership or control), with one-third of the options vesting on January 15, 2007, 2008, and 2009, respectively. Thus, options to purchase 20,000 shares vest independently of the January 16, 2008, change in ownership or control and the options to purchase the remaining

10,000 shares vest as a result of the change in ownership or control.

(ii) The payment of the options to purchase 10,000 shares was contingent only on performance of services for the corporation until January 15, 2009, and is attributable, in part, to the performance of services before the change in ownership or control. Therefore, only a portion of the payment as determined under paragraph (c) of this A-24 is treated as contingent on the change in ownership or control. The portion of the payment that is treated as contingent on the change in ownership or control is the amount by which the accelerated payment on January 16, 2008 (\$200,000) exceeds the present value on January 16, 2008, of the payment that was expected to have been made on January 15, 2009, absent the acceleration, plus an amount reflecting the lapse of the obligation to perform services. At the time of the change in ownership or control, it cannot be reasonably ascertained what the value of the options would have been on January 15, 2009. The acceleration of vesting in the options is treated as significantly increasing the value of the payment. Therefore, the value of such options on January 15, 2009, is deemed to be \$200,000, the amount of the accelerated payment. The present value on January 16, 2008, of a \$200,000 payment to be made on January 15, 2009, is \$183,328.38. Thus, the portion of the payment treated as contingent on the change is \$38,671.62, the sum of \$16,671.62 (\$200,000 - \$183,328.38), plus an amount reflecting the lapse of the obligation to continue to perform services which is \$22,000 (1 percent \times 11 months \times \$200,000).

Example 7. Assume the same facts as in *Example 5*, except that the option agreement provides that the options will vest either on the corporation's level of profits reaching a specified level, or if earlier, on the date on which there is a change in ownership or control of the corporation. The corporation's level of profits do not reach the specified level prior to January 16, 2008. In such case, the full amount of the payment, \$600,000, is treated as contingent on the change in ownership or control under paragraph (a) of this A-24. Because the payment was not contingent only on the performance of services for the corporation for a specified period, the rules of paragraph (b) and (c) of this A-24 do not apply. See Q/A-39 of this section for rules relating to the reduction of the excess parachute payment by the portion of the payment which is established to be reasonable compensation for personal services actually rendered before the date of a change in ownership or control.

Example 8. On January 1, 2005, E, a disqualified individual with respect to Corporation X, enters into an employment agreement with Corporation X under which E will be paid wages of \$200,000 each year during the 5-year employment agreement. The employ-

ment agreement provides that if a change in ownership or control of Corporation X occurs, E will be paid the present value of the remaining salary under the employment agreement. On January 1, 2006, a change in ownership or control of Corporation X occurs, E is terminated, and E receives a payment of the present value of \$200,000 for each of the 4 years remaining under the employment agreement. Because the payment represents future salary under an employment agreement (*i.e.*, amounts otherwise attributable to the performance of services for periods that begin after the termination of employment), the general rule of paragraph (a) of this A-24 applies to the payment and not the rules of paragraphs (b) and (c) of this A-24. See Q/A-42(c) and 44 of this section for the treatment of the remaining payments under an employment agreement.

Presumption That Payment Is Contingent on Change

Q-25: Is there a presumption that certain payments are contingent on a change in ownership or control?

A-25: Yes, for purposes of this section, any payment is presumed to be contingent on such a change unless the contrary is established by clear and convincing evidence if the payment is made pursuant to—

(a) An agreement entered into within one year before the date of a change in ownership or control; or

(b) An amendment that modifies a previous agreement in any significant respect, if the amendment is made within one year before the date of a change in ownership or control. In the case of an amendment described in paragraph (b) of this A-25, only the portion of any payment that exceeds the amount of such payment that would have been made in the absence of the amendment is presumed, by reason of the amendment, to be contingent on the change in ownership or control.

Q-26: How may the presumption described in Q/A-25 of this section be rebutted?

A-26: (a) To rebut the presumption described in Q/A-25 of this section, the taxpayer must establish by clear and convincing evidence that the payment is not contingent on the change in ownership or control. Whether the payment is contingent on such change is determined on the basis of all the facts and circumstances of the particular

case. Factors relevant to such a determination include, but are not limited to, the content of the agreement or amendment and the circumstances surrounding the execution of the agreement or amendment, such as whether it was entered into at a time when a takeover attempt had commenced and the degree of likelihood that a change in ownership or control would actually occur. However, even if the presumption is rebutted with respect to an agreement, some or all of the payments under the agreement may still be contingent on the change in ownership or control pursuant to Q/A-22 of this section.

(b) In the case of an agreement described in Q/A-25 of this section, clear and convincing evidence that the agreement is one of the three following types will generally rebut the presumption that payments under the agreement are contingent on the change in ownership or control—

(1) A *nondiscriminatory employee plan or program* as defined in paragraph (c) of this A-26;

(2) A contract between a corporation and an individual that replaces a prior contract entered into by the same parties more than one year before the change in ownership or control, if the new contract does not provide for increased payments (apart from normal increases attributable to increased responsibilities or cost of living adjustments), accelerate the payment of amounts due at a future time, or modify (to the individual's benefit) the terms or conditions under which payments will be made; or

(3) A contract between a corporation and an individual who did not perform services for the corporation prior to the one year period before the change in ownership or control occurs, if the contract does not provide for payments that are significantly different in amount, timing, terms, or conditions from those provided under contracts entered into by the corporation (other than contracts that themselves were entered into within one year before the change in ownership or control and in contemplation of the change) with individuals performing comparable services.

(c) For purposes of this section, the term *nondiscriminatory employee plan or program* means: a group term life insurance plan that meets the requirements of section 79(d); a self insured medical reimbursement plan that meets the requirements of section 105(h); a cafeteria plan (within the meaning of section 125); an educational assistance program (within the meaning of section 127); a dependent care assistance program (within the meaning of section 129); a no-additional-cost service (within the meaning of section 132(b)) or qualified employee discount (within the meaning of section 132(c)); a qualified retirement planning services program under section 132(m); an adoption assistance program (within the meaning of section 137); and such other items as provided by the Commissioner in published guidance of general applicability under § 601.601(d)(2). Payments under certain other plans are exempt from the definition of *parachute payment* under Q/A-8 of this section.

(d) The following examples illustrate the application of the presumption:

Example 1. A corporation and a disqualified individual who is an employee of the corporation enter into an employment contract. The contract replaces a prior contract entered into by the same parties more than one year before the change in ownership or control and the new contract does not provide for any increased payments other than a cost of living adjustment, does not accelerate the payment of amounts due at a future time, and does not modify (to the individual's benefit) the terms or conditions under which payments will be made. Clear and convincing evidence of these facts rebuts the presumption described in A-25 of this section. However, payments under the contract still may be contingent on the change in ownership or control pursuant to Q/A-22 of this section.

Example 2. Assume the same facts as in *Example 1*, except that the contract is entered into after a tender offer for the corporation's stock had commenced and it was likely that a change in ownership or control would occur and the contract provides for a substantial bonus payment to the individual upon his signing the contract. The individual has performed services for the corporation for many years, but previous employment contracts between the corporation and the individual did not provide for a similar signing bonus. One month after the contract is entered into, a change in the ownership or control of the corporation occurs. All payments under the contract are presumed to be contingent on the change in ownership or

control even though the bonus payment would have been legally required even if no change had occurred. Clear and convincing evidence of these facts rebuts the presumption described in A-25 of this section with respect to all of the payments under the contract with the exception of the bonus payment (which is treated as contingent on the change). However, payments other than the bonus under the contract still may be contingent on the change in ownership or control pursuant to Q/A-22 of this section.

Example 3. A corporation and a disqualified individual, who is an employee of the corporation, enter into an employment contract within one year of a change in ownership or control of the corporation. Under the contract, in the event of a change in ownership or control and subsequent termination of employment, certain payments will be made to the individual. A change in ownership or control occurs, but the individual is not terminated until 2 years after the change in ownership or control. If clear and convincing evidence does not rebut the presumption described in A-25 of this section, because the payment is made pursuant to an agreement entered into within one year of the date of the change in ownership or control, the payment is presumed contingent on the change under A-25 of this section. This is true even though A's termination of employment is presumed not to be materially related to the change in ownership or control under Q/A-22 of this section.

Change in Ownership or Control

Q-27: When does a change in the ownership of a corporation occur?

A-27: (a) For purposes of this section, a change in the ownership of a corporation occurs on the date that any one person, or more than one person acting as a group (as defined in paragraph (b) of this A-27), acquires ownership of stock of the corporation that, together with stock held by such person or group, has more than 50 percent of the total fair market value or total voting power of the stock of such corporation. However, if any one person, or more than one person acting as a group, is considered to own more than 50 percent of the total fair market value or total voting power of the stock of a corporation, the acquisition of additional stock by the same person or persons is not considered to cause a change in the ownership of the corporation (or to cause a change in the effective control of the corporation (within the meaning of Q/A-28 of this section)). An increase in the percentage of stock owned by

any one person, or persons acting as a group, as a result of a transaction in which the corporation acquires its stock in exchange for property will be treated as an acquisition of stock for purposes of this section. This A-27 applies only when there is a transfer of stock of a corporation (or issuance of stock of a corporation) and stock in such corporation remains outstanding after the transaction. (See Q/A-29 for rules regarding the transfer of assets of a corporation).

(b) For purposes of paragraph (a) of this A-27, persons will not be considered to be acting as a group merely because they happen to purchase or own stock of the same corporation at the same time, or as a result of the same public offering. However, persons will be considered to be acting as a group if they are owners of a corporation that enters into a merger, consolidation, purchase or acquisition of stock, or similar business transaction with the corporation. If a person, including an entity shareholder, owns stock in both corporations that enter into a merger, consolidation, purchase or acquisition of stock, or similar transaction, such shareholder is considered to be acting as a group with other shareholders in a corporation only with respect to the ownership in that corporation prior to the transaction giving rise to the change and not with respect to the ownership interest in the other corporation.

(c) For purposes of this A-27 (and Q/A-28 and 29), section 318(a) applies to determine stock ownership. Stock underlying a vested option is considered owned by the individual who holds the vested option (and the stock underlying an unvested option is not considered owned by the individual who holds the unvested option). For purposes of the preceding sentence, however, if the option is exercisable for stock that is not substantially vested (as defined by sections 1.83-3(b) and (j)), the stock underlying the option is not treated as owned by the individual who holds the option. In addition, mutual and cooperative corporations are treated as having stock for purposes of this A-27.

(d) The following examples illustrate the principles of this A-27:

Example 1. Corporation M has owned stock with a fair market value equal to 19 percent of the value of the stock of Corporation N (an otherwise unrelated corporation) for many years prior to 2006. Corporation M acquires additional stock with a fair market value equal to 15 percent of the value of the stock of Corporation N on January 1, 2006, and an additional 18 percent on February 21, 2007. As of February 21, 2007, Corporation M has acquired stock with a fair market value greater than 50 percent of the value of the stock of Corporation N. Thus, a change in the ownership of Corporation N is considered to occur on February 21, 2007 (assuming that Corporation M did not have effective control of Corporation N immediately prior to the acquisition on that date).

Example 2. All of the corporation's stock is owned by the founders of the corporation. The board of directors of the corporation decides to offer shares of the corporation to the public. After the public offering, the founders of the corporation own a total of 40 percent of the corporation's stock, and members of the public own 60 percent. If no one person (or more than one person acting as a group) owns more than 50 percent of the corporation's stock (by value or voting power) after the public offering, there is no change in the ownership of the corporation.

Example 3. Corporation P merges into Corporation O (a previously unrelated corporation). In the merger, the shareholders of Corporation P receive Corporation O stock in exchange for their Corporation P stock. Immediately after the merger, the former shareholders of Corporation P own stock with a fair market value equal to 60 percent of the value of the stock of Corporation O, and the former shareholders of Corporation O own stock with a fair market value equal to 40 percent of the value of the stock of Corporation O. The former shareholders of Corporation P will be treated as acting as a group in their acquisition of Corporation O stock. Thus, a change in the ownership of Corporation O occurs on the date of the merger. See Q/A-29, *Example 3*, regarding whether there is a change in ownership or control of P.

Example 4. Assume the same facts as in *Example 3*, except that immediately after the change, the former shareholders of Corporation P own stock with a fair market value of 51 percent of the value of Corporation O stock and the former shareholders of Corporation O own stock with a fair market value equal to 49 percent of the value of Corporation O stock. Assume further that prior to the merger several Corporation O shareholders also owned Corporation P stock (overlapping shareholders). In the merger, those O shareholders received additional O stock by virtue of their ownership of P stock with a fair market value of 5 percent of the value of Corporation O stock. Including the

O stock attributable to the P shares, the O shareholders hold 54 percent of O after the transaction. However, those overlapping shareholders that owned both Corporation O stock and Corporation P stock prior to the merger are treated as acting as a group with the Corporation O shareholders only with respect to their ownership interest in Corporation O prior to the transaction. Therefore, because the Corporation O shareholders owned 49 percent of the value of Corporation O stock, a change in the ownership of Corporation O occurs on the date of the merger. See Q/A-29, *Example 3*, regarding whether there is a change in ownership or control of P.

Example 5. A, an individual, owns stock with a fair market value equal to 20 percent of the value of the stock of Corporation Q. On January 1, 2007, Corporation Q acquires in a redemption for cash all of the stock held by shareholders other than A. Thus, A is left as the sole shareholder of Corporation Q. A change in ownership of Corporation Q is considered to occur on January 1, 2007 (assuming that A did not have effective control of Corporation Q immediately prior to the redemption).

Example 6. Assume the same facts as in *Example 5*, except that A owns stock with a fair market value equal to 51 percent of the value of all the stock of Corporation Q immediately prior to the redemption. There is no change in the ownership of Corporation Q as a result of the redemption.

Q-28: When does a change in the effective control of a corporation occur?

A-28: (a) Notwithstanding that a corporation has not undergone a change in ownership under Q/A-27, for purposes of this section, a change in the effective control of a corporation is presumed to occur on the date that either—

(1) Any one person, or more than one person acting as a group (as determined under paragraph (e) of this A-28), acquires (or has acquired during the 12-month period ending on the date of the most recent acquisition by such person or persons) ownership of stock of the corporation possessing 20 percent or more of the total voting power of the stock of such corporation; or

(2) A majority of members of the corporation's board of directors is replaced during any 12-month period by directors whose appointment or election is not endorsed by a majority of the members of the corporation's board of directors prior to the date of the appointment or election.

(b) The presumption of paragraph (a) of this A-28 may be rebutted by establishing that such acquisition or acquisitions of the corporation's stock, or such replacement of the majority of the members of the corporation's board of directors, does not transfer the power to control (directly or indirectly) the management and policies of the corporation from any one person (or more than one person acting as a group) to another person (or group). For purposes of this section, in the absence of an event described in paragraph (a)(1) or (2) of this A-28, a change in the effective control of a corporation is presumed not to have occurred.

(c) In no event does a change in effective control under this A-28 occur in any transaction in which either of the two corporations involved in the transaction has a change in ownership or control under Q/A-27 or 29 of this section. Thus, for example, assume Corporation P transfers more than one-third of the total gross fair market value of its assets to Corporation O in exchange for 20 percent of O's stock. Because P has undergone a change in ownership of a substantial portion of its assets under Q/A-29 of this section, O does not have a change in effective control under Q/A-28.

(d) If any one person, or more than one person acting as a group, is considered to effectively control a corporation (within the meaning of this A-28), the acquisition of additional control of the corporation by the same person or persons is not considered to cause a change in the effective control of the corporation (or to cause a change in the ownership of the corporation within the meaning of Q/A-27 of this section).

(e) For purposes of this A-28, persons will not be considered to be acting as a group merely because they happen to purchase or own stock of the same corporation at the same time, or as a result of the same public offering. However, persons will be considered to be acting as a group if they are owners of a corporation that enters into a merger, consolidation, purchase or acquisition of stock, or similar business transaction with the corporation. If a person, including an entity shareholder, owns stock in both corporations that

enter into a merger, consolidation, purchase or acquisition of stock, or similar transaction, such shareholder is considered to be acting as a group with other shareholders in a corporation only with respect to the ownership in that corporation prior to the transaction giving rise to the change and not with respect to the ownership interest in the other corporation.

(f) For purposes of determining stock ownership, *see* Q/A-27(c).

(g) The following examples illustrate the principles of this A-28:

Example 1. Shareholder A acquired the following percentages of the voting stock of Corporation M (an otherwise unrelated corporation) on the following dates: 16 percent on January 1, 2005; 10 percent on January 10, 2006; 8 percent on February 10, 2006; 11 percent on March 1, 2007; and 8 percent on March 10, 2007. Thus, on March 10, 2007, A owns a total of 53 percent of M's voting stock. Because A did not acquire 20 percent or more of M's voting stock during any 12-month period, there is no presumption of a change in effective control pursuant to paragraph (a)(1) of this A-28. In addition, under these facts there is a presumption that no change in the effective control of Corporation M occurred. If this presumption is not rebutted (and thus no change in effective control of Corporation M is treated as occurring prior to March 10, 2007), a change in the ownership of Corporation M is treated as having occurred on March 10, 2007 (pursuant to Q/A-27 of this section) because A had acquired more than 50 percent of Corporation M's voting stock as of that date.

Example 2. A minority group of shareholders of a corporation opposes the practices and policies of the corporation's current board of directors. A proxy contest ensues. The minority group presents its own slate of candidates for the board at the next annual meeting of the corporation's shareholders, and candidates of the minority group are elected to replace a majority of the current members of the board. A change in the effective control of the corporation is presumed to have occurred on the date the election of the new board of directors becomes effective.

Q-29: When does a change in the ownership of a substantial portion of a corporation's assets occur?

A-29: (a) For purposes of this section, a change in the ownership of a substantial portion of a corporation's assets occurs on the date that any one person, or more than one person acting as a group (as determined in paragraph (c) of this A-29), acquires (or has acquired

during the 12-month period ending on the date of the most recent acquisition by such person or persons) assets from the corporation that have a total gross fair market value equal to or more than one-third of the total gross fair market value of all of the assets of the corporation immediately prior to such acquisition or acquisitions. For this purpose, *gross fair market value* means the value of the assets of the corporation, or the value of the assets being disposed of, determined without regard to any liabilities associated with such assets. This A-29 applies in any situation other than one involving the transfer of stock (or issuance of stock) in a parent corporation and stock in such corporation remains outstanding after the transaction. Thus, this A-29 applies to the sale of stock in a subsidiary (when that subsidiary is treated as a single corporation with the parent pursuant to Q/A-46) and to mergers involving the creation of a new corporation or with respect to the corporation that is not surviving entity.

(b) (1) There is no change in ownership or control under this A-29 when there is a transfer to an entity that is controlled by the shareholders of the transferring corporation immediately after the transfer, as provided in this paragraph (b). A transfer of assets by a corporation is not treated as a change in the ownership of such assets if the assets are transferred to—

(i) A shareholder of the corporation (immediately before the asset transfer) in exchange for or with respect to its stock;

(ii) An entity, 50 percent or more of the total value or voting power of which is owned, directly or indirectly, by the corporation;

(iii) A person, or more than one person acting as a group, that owns, directly or indirectly, 50 percent or more of the total value or voting power of all the outstanding stock of the corporation; or

(iv) An entity, at least 50 percent of the total value or voting power is owned, directly or indirectly, by a person described in paragraph (b)(1)(iii) of this A-29.

(2) For purposes of paragraph (b) and except as otherwise provided, a person's status is determined immediately

after the transfer of the assets. For example, a transfer to a corporation in which the transferor corporation has no ownership interest in before the transaction, but which is a majority-owned subsidiary of the transferor corporation after the transaction is not treated as a change in the ownership of the assets of the transferor corporation.

(c) For purposes of this A-29, persons will not be considered to be acting as a group merely because they happen to purchase assets of the same corporation at the same time, or as a result of the same public offering. However, persons will be considered to be acting as a group if they are owners of a corporation that enters into a merger, consolidation, purchase or acquisition of assets, or similar business transaction with the corporation. If a person, including an entity shareholder, owns stock in both corporations that enter into a merger, consolidation, purchase or acquisition of stock, or similar transaction, such shareholder is considered to be acting as a group with other shareholders in a corporation only to the extent of the ownership in that corporation prior to the transaction giving rise to the change and not with respect to the ownership interest in the other corporation.

(d) For purposes of determining stock ownership, see Q/A-27(c).

(e) The following examples illustrate the principles of this A-29:

Example 1. Corporation M acquires assets having a gross fair market value of \$500,000 from Corporation N (an unrelated corporation) on January 1, 2006. The total gross fair market value of Corporation N's assets immediately prior to the acquisition was \$3 million. Since the value of the assets acquired by Corporation M is less than one-third of the total gross fair market value of Corporation N's total assets immediately prior to the acquisition, the acquisition does not represent a change in the ownership of a substantial portion of Corporation N's assets.

Example 2. Assume the same facts as in *Example 1*. Also assume that on November 1, 2006, Corporation M acquires from Corporation N additional assets having a fair market value of \$700,000. Thus, Corporation M has acquired from Corporation N assets worth a total of \$1.2 million during the 12-month period ending on November 1, 2006. Since \$1.2 million is more than one-third of the total

gross fair market value of all of Corporation N's assets immediately prior to the earlier of these acquisitions (\$3 million), a change in the ownership of a substantial portion of Corporation N's assets is considered to have occurred on November 1, 2006.

Example 3. (i) All of the assets of Corporation P are transferred to Corporation O (an unrelated corporation). In exchange, the shareholders of Corporation P receive Corporation O stock. Immediately after the transfer, the former shareholders of Corporation P own 60 percent of the fair market value of the outstanding stock of Corporation O and the former shareholders of Corporation O own 40 percent of the fair market value of the outstanding stock of Corporation O. Because Corporation O is an entity more than 50 percent of the fair market value of the outstanding stock of which is owned by the former shareholders of Corporation P (based on ownership of Corporation P prior the change), the transfer of assets is not treated as a change in ownership of a substantial portion of the assets of Corporation P. However, a change in the ownership (within the meaning of Q/A-27) of Corporation O occurs.

(ii) The result in paragraph (i) would be the same if immediately after the change, the former shareholders of Corporation P own stock with a fair market value of 51 percent of the value of Corporation O stock because Corporation O is an entity more than 50 percent of the fair market value of the outstanding stock of which is owned by the former shareholders of Corporation P. See Q/A-27, *Example 4*, regarding whether there is a change in ownership or control of O.

Example 4. Corporation P sells all of the stock of its wholly-owned subsidiary, S, to Corporation Y. The fair market value of the affiliated group, determined without regard to its liabilities, is \$210 million. The fair market value of S, determined without regard to its liabilities, is \$80 million. Because there is a change in more than one-third of the gross fair market value of the total assets of the affiliated group, there is a change in the ownership of a substantial portion of the assets of the affiliated group.

Three-Times-Base-Amount Test for Parachute Payments

Q-30: Are all payments that are in the nature of compensation, are made to a disqualified individual, and are contingent on a change in ownership or control, parachute payments?

A-30: (a) No. To determine whether such payments are parachute pay-

ments, they must be tested against the individual's *base amount* (as defined in Q/A-34 of this section). To do this, the aggregate present value of all payments in the nature of compensation that are made or to be made to (or for the benefit of) the same disqualified individual and are contingent on the change in ownership or control must be determined. If this aggregate present value equals or exceeds the amount equal to 3 times the individual's base amount, the payments are parachute payments. If this aggregate present value is less than the amount equal to 3 times the individual's base amount, no portion of the payment is a parachute payment. See Q/A-31, Q/A-32, and Q/A-33 of this section for rules on determining present value. Parachute payments that are securities violation parachute payments are not included in the foregoing computation if they are not contingent on a change in ownership or control. See Q/A-37 of this section for the definition and treatment of securities violation parachute payments.

(b) The following examples illustrate the principles of this A-30:

Example 1. A is a disqualified individual with respect to Corporation M. A's base amount is \$100,000. Payments in the nature of compensation that are contingent on a change in the ownership or control of Corporation M totaling \$400,000 are made to A on the date of the change in ownership or control. The payments are parachute payments because they have an aggregate present value at least equal to 3 times A's base amount of \$100,000 ($3 \times \$100,000 = \$300,000$).

Example 2. Assume the same facts as in *Example 1*, except that the payments contingent on the change in the ownership or control of Corporation M total \$290,000. Because the payments do not have an aggregate present value at least equal to 3 times A's base amount, no portion of the payments is a parachute payment.

Q-31: As of what date is the present value of a payment determined?

A-31: (a) Except as provided in this section, the present value of a payment is determined as of the date on which the change in ownership or control occurs, or, if a payment is made prior to such date, the date on which the payment is made.

(b)(1) For purposes of determining whether a payment is a parachute payment, if a payment in the nature of compensation is the right to receive payments in a year (or years) subsequent to the year of the change in ownership or control, the value of the payment is the present value of such payment (or payments) calculated in accordance with Q/A-32 of this section and based on reasonable actuarial assumptions.

(2) If the payment in the nature of compensation is an obligation to provide health care, then for purposes of this A-31 and for applying the 3-times-base-amount test under Q/A-30 of this section, the present value of such obligation should be calculated in accordance with generally accepted accounting principles. For purposes of Q/A-30 and this A-31, the obligation to provide health care is permitted to be measured by projecting the cost of premiums for purchased health care insurance, even if no health care insurance is actually purchased. If the obligation to provide health care is made in coordination with a health care plan that the corporation makes available to a group, then the premiums used for this purpose may be group premiums.

Q-32: What discount rate is to be used to determine present value?

A-32: For purposes of this section, present value generally is determined by using a discount rate equal to 120 percent of the applicable Federal rate (determined under section 1274(d) and the regulations thereunder) compounded semiannually. The applicable Federal rate to be used for this purpose is the Federal rate that is in effect on the date as of which the present value is determined, using the period until the payment would have been made without regard to the change in ownership or control as the term of the debt instrument under section 1274(d). See Q/A-24 and 31 of this section. However, for any payment, the corporation and the disqualified individual may elect to use the applicable Federal rate that is in effect on the date that the contract which provides for the payment is entered into, if such election is made in the contract.

Q-33: If the present value of a payment to be made in the future is con-

tingent on an uncertain future event or condition, how is the present value of the payment determined?

A-33: (a) In certain cases, it may be necessary to apply the 3-times-base-amount test of Q/A-30 of this section, or to allocate a portion of the base amount to a payment described in paragraphs (a)(1), (2), and (3) of Q/A-2 of this section, at a time when the aggregate present value of all such payments cannot be determined with certainty because the time, amount, or right to receive one or more such payments is contingent on the occurrence of an uncertain future event or condition. For example, a disqualified individual's right to receive a payment may be contingent on the involuntary termination of such individual's employment with the corporation. In such a case, it must be reasonably estimated whether the payment will be made. If it is reasonably estimated that there is a 50-percent or greater probability that the payment will be made, the full amount of the payment is considered for purposes of the 3-times-base-amount test and the allocation of the base amount. Conversely, if it is reasonably estimated that there is a less than 50-percent probability that the payment will be made, the payment is not considered for either purpose.

(b) If the estimate made under paragraph (a) of this A-33 is later determined to be incorrect, the 3-times-base-amount test described in Q/A-30 of this section must be reapplied (and the portion of the base amount allocated to previous payments must be reallocated (if necessary) to such payments) to reflect the actual time and amount of the payment. Whenever the 3-times-base-amount test is applied (or whenever the base amount is allocated), the aggregate present value of the payments received or to be received by the disqualified individual is redetermined as of the date described in A-31 of this section, using the discount rate described in A-32 of this section. This redetermination may affect the amount of any excess parachute payment for a prior taxable year. Alternatively, if, based on the application of the 3-times-base-amount test without regard to the payment described in paragraph (a) of this A-33, a disqualified individual is

determined to have an excess parachute payment or payments, then the 3-times-base-amount test does not have to be reapplied when a payment described in paragraph (a) of this A-33 is made (or becomes certain to be made) if no base amount is allocated to such payment.

(c) To the extent provided in published guidance of general applicability under § 601.601(d)(2) of this Chapter, an initial estimate of the value of an option subject to Q/A-13 of this section is permitted to be made, with the valuation subsequently re-determined, and the 3-times-base-amount test re-applied.

(d) The following examples illustrate the principles of this A-33:

Example 1. A, a disqualified individual with respect to Corporation M, has a base amount of \$100,000. Under A's employment agreement with Corporation M, A is entitled to receive a payment in the nature of compensation in the amount of \$250,000 contingent on a change in ownership or control of Corporation M. In addition, the agreement provides that if A's employment is terminated within 1 year after the change in ownership or control, A will receive an additional payment in the nature of compensation in the amount of \$150,000, payable 1 year after the date of the change in ownership or control. A change in ownership or control of Corporation M occurs and A receives the first payment of \$250,000. Corporation M reasonably estimates that there is a 50-percent probability that, as a result of the change, A's employment will be terminated within 1 year of the date of the change. For purposes of applying the 3-times-base-amount test (and if the first payment is determined to be a parachute payment, for purposes of allocating a portion of A's base amount to that payment), because M reasonably estimates that there is a 50-percent or greater probability that, as a result of the change, A's employment will be terminated within 1 year of the date of the change, Corporation M must assume that the \$150,000 payment will be made to A as a result of the change in ownership or control. The present value of the additional payment is determined under Q/A-31 and Q/A-32 of this section.

Example 2. Assume the same facts as in *Example 1*, except that Corporation M reasonably estimates that there is a less than 50-percent probability that, as a result of the change, A's employment will be terminated within 1 year of the date of the change. For purposes of applying the 3-times-base-amount test, because Corporation M reasonably estimates that there is a less than 50-percent probability that, as a result of the

change, A's employment will be terminated within 1 year of the date of the change, Corporation M must assume that the \$150,000 payment will not be made to A as a result of the change in ownership or control.

Example 3. B, a disqualified individual with respect to Corporation P, has a base amount of \$200,000. Under B's employment agreement with Corporation P, if there is a change in ownership or control of Corporation P, B will receive a severance payment of \$600,000 and a bonus payment of \$400,000. In addition, the agreement provides that if B's employment is terminated within 1 year after the change, B will receive an additional payment in the nature of compensation of \$500,000. A change in ownership or control of Corporation P occurs, and B receives the \$600,000 and \$400,000 payments. At the time of the change in ownership or control, Corporation P reasonably estimates that there is a less than 50-percent probability that B's employment will be terminated within 1 year of the change. For purposes of applying the 3-times-base-amount test, because Corporation P reasonably estimates that there is a less than 50-percent probability that B's employment will be terminated within 1 year of the date of the change, Corporation P assumes that the \$500,000 payment will not be made to B. Eleven months after the change in ownership or control, B's employment is terminated, and the \$500,000 payment is made to B. Because B was determined to have excess parachute payments without regard to the \$500,000 payment, the 3-times-base-amount test is not reapplied and the base amount is not reallocated to include the \$500,000 payment. The entire \$500,000 payment is treated as an excess parachute payment.

Q-34: What is the base amount?

A-34: (a) The base amount of a disqualified individual is the average annual compensation for services performed for the corporation with respect to which the change in ownership or control occurs (or for a predecessor entity or a related entity as defined in Q/A-21 of this section) which was includible in the gross income of such individual for taxable years in the base period (including amounts that were excluded under section 911), or which would have been includible in such gross income if such person had been a United States citizen or resident. See Q/A-35 of this section for the definition of base period and for examples of base amount computations.

(b) If the base period of a disqualified individual includes a short taxable year or less than all of a taxable year,

compensation for such short or incomplete taxable year must be annualized before determining the average annual compensation for the base period. In annualizing compensation, the frequency with which payments are expected to be made over an annual period must be taken into account. Thus, any amount of compensation for such a short or incomplete taxable year that represents a payment that will not be made more often than once per year is not annualized.

(c) Because the base amount includes only compensation that is includible in gross income, the base amount does not include certain items that constitute parachute payments. For example, payments in the form of excludible fringe benefits are not included in the base amount but may be treated as parachute payments.

(d) The base amount includes the amount of compensation included in income under section 83(b) during the base period. See Q/A-35 for the definition of base period.

(e) The following example illustrates the principles of this A-34:

Example. A disqualified individual, D, receives an annual salary of \$500,000 per year during the 5-year base period. D defers \$100,000 of D's salary each year under the corporation's nonqualified deferred compensation plan. D's base amount is \$400,000 $(\$400,000 \times (5/5))$.

Q-35: What is the base period?

A-35: (a) The base period of a disqualified individual is the most recent 5 taxable years of the individual ending before the date of the change in ownership or control. For this purpose, the date of the change in ownership or control is the date the corporation experiences one of the events described in Q/A-27, Q/A-28, or Q/A-29 of this section. However, if the disqualified individual was not an employee or independent contractor of the corporation with respect to which the change in ownership or control occurs (or a predecessor entity or a related entity as defined in Q/A-21 of this section) for this entire 5-year period, the individual's base period is the portion of such 5-year period during which the individual performed personal services for the corporation or predecessor entity or related entity.

(b) The following examples illustrate the principles of Q/A-34 of this section and this Q/A-35:

Example 1. A disqualified individual, D, was employed by a corporation for 2 years and 4 months preceding the taxable year in which a change in ownership or control of the corporation occurs. D's includible compensation income from the corporation was \$30,000 for the 4-month period, \$120,000 for the first full year, and \$150,000 for the second full year. D's base amount is $\$120,000, ((3 \times \$30,000) + \$120,000 + \$150,000)/3$.

Example 2. Assume the same facts as in *Example 1*, except that D also received a \$60,000 signing bonus when D's employment with the corporation commenced at the beginning of the 4-month period. D's base amount is $\$140,000, ((\$60,000 + (3 \times \$30,000)) + \$120,000 + \$150,000) / 3$. Since the bonus will not be paid more often than once per year, the amount of the bonus is not increased in annualizing D's compensation for the 4-month period.

Example 3. E is a disqualified individual with respect to Corporation X who was not an employee or independent contractor for the full 5-year base period. In 2004 and 2005, E is a director of X and receives \$30,000 per year for E's services. In 2006, E becomes an officer of X. E's includible compensation from Corporation X is \$250,000 for 2006 and 2007, and \$300,000 for 2008. In 2008, X undergoes a change in ownership or control. E's base amount is $\$140,000 ((2 \times \$250,000) + (2 \times \$30,000) / 4)$.

Q-36: How is the base amount determined in the case of a disqualified individual who did not perform services for the corporation (or a predecessor entity or a related entity as defined in Q/A-21 of this section), prior to the individual's taxable year in which the change in ownership or control occurs?

A-36: (a) In such a case, the individual's base amount is the annualized compensation for services performed for the corporation (or a predecessor entity or related entity) which—

(1) Was includible in the individual's gross income for that portion, prior to such change, of the individual's taxable year in which the change occurred (including amounts that were excluded under section 911), or would have been includible in such gross income if such person had been a United States citizen or resident;

(2) Was not contingent on the change in ownership or control; and

(3) Was not a securities violation parachute payment.

(b) The following examples illustrate the principles of this A-36:

Example 1. On January 1, 2006, A, an individual whose taxable year is the calendar year, enters into a 4-year employment contract with Corporation M as an officer of the corporation. A has not previously performed services for Corporation M (or any predecessor entity or related entity as defined in Q/A-21 of this section). Under the employment contract, A is to receive an annual salary of \$120,000 for each of the 4 years that he remains employed by Corporation M with any remaining unpaid balance to be paid immediately in the event that A's employment is terminated without cause. On July 1, 2006, after A has received compensation of \$60,000, a change in the ownership or control of Corporation M occurs. Because of the change, A's employment is terminated without cause, and he receives a payment of \$420,000. It is established by clear and convincing evidence that the \$60,000 in compensation is not contingent on the change in ownership or control, but the presumption that the \$420,000 payment is contingent on the change is not rebutted. Thus, the payment of \$420,000 is treated as contingent on the change in ownership or control of Corporation M. In this case, A's base amount is \$120,000 ($2 \times \$60,000$). Since the present value of the payment which is contingent on the change in ownership of Corporation M (\$420,000) is more than 3 times A's base amount of \$120,000 ($3 \times \$120,000 = \$360,000$), the payment is a parachute payment.

Example 2. Assume the same facts as in *Example 1*, except that A also receives a signing bonus of \$50,000 from Corporation M on January 1, 2006. It is established by clear and convincing evidence that the bonus is not contingent on the change in ownership or control. When the change in ownership or control occurs on July 1, 2006, A has received compensation of \$110,000 (the \$50,000 bonus plus \$60,000 in salary). In this case, A's base amount is \$170,000 ($\$50,000 + (2 \times \$60,000)$). Because the \$50,000 bonus will not be paid more than once per year, the amount of the bonus is not increased in annualizing A's compensation. The present value of the potential parachute payment (\$420,000) is less than 3 times A's base amount of \$170,000 ($3 \times \$170,000 = \$510,000$), and therefore no portion of the payment is a parachute payment.

Securities Violation Parachute Payments

Q-37: Must a payment be contingent on a change in ownership or control in order to be a parachute payment?

A-37: (a) No, the term *parachute payment* also includes any payment (other than a payment exempted under Q/A-6 or Q/A-8 of this section) that is in the

nature of compensation and is to (or for the benefit of) a disqualified individual, if such payment is a securities violation payment. A securities violation payment is a payment made or to be made—

(1) Pursuant to an agreement that violates any generally enforced Federal or state securities laws or regulations; and

(2) In connection with a potential or actual change in ownership or control.

(b) A violation is not taken into account under paragraph (a)(1) of this A-37 if it is merely technical in character or is not materially prejudicial to shareholders or potential shareholders. Moreover, a violation will be presumed not to exist unless the existence of the violation has been determined or admitted in a civil or criminal action (or an administrative action by a regulatory body charged with enforcing the particular securities law or regulation) which has been resolved by adjudication or consent. Parachute payments described in this A-37 are referred to in this section as securities violation payments.

(c) Securities violation parachute payments that are not contingent on a change in ownership or control within the meaning of Q/A-22 of this section are not taken into account in applying the 3-times-base-amount test of Q/A-30 of this section. Such payments are considered parachute payments regardless of whether such test is met with respect to the disqualified individual (and are included in allocating base amount under Q/A-38 of this section). Moreover, the amount of a securities violation parachute payment treated as an excess parachute payment shall not be reduced by the portion of such payment that is reasonable compensation for personal services actually rendered before the date of a change in ownership or control if such payment is not contingent on such change. Likewise, the amount of a securities violation parachute payment includes the portion of such payment that is reasonable compensation for personal services to be rendered on or after the date of a change in ownership or control if such payment is not contingent on such change.

(d) The rules in paragraph (b) of this A-37 also apply to securities violation parachute payments that are contingent on a change in ownership or control if the application of these rules results in greater total excess parachute payments with respect to the disqualified individual than would result if the payments were treated simply as payments contingent on a change in ownership or control (and hence were taken into account in applying the 3-times-base-amount test and were reduced by, or did not include, any applicable amount of reasonable compensation).

(e) The following examples illustrate the principles of this A-37:

Example 1. A, a disqualified individual with respect to Corporation M, receives two payments in the nature of compensation that are contingent on a change in the ownership or control of Corporation M. The present value of the first payment is equal to A's base amount and is not a securities violation parachute payment. The present value of the second payment is equal to 1.5 times A's base amount and is a securities violation parachute payment. Neither payment includes any reasonable compensation. If the second payment is treated simply as a payment contingent on a change in ownership or control, the amount of A's total excess parachute payments is zero because the aggregate present value of the payments does not equal or exceed 3 times A's base amount. If the second payment is treated as a securities violation parachute payment subject to the rules of paragraph (b) of this A-37, the amount of A's total excess parachute payments is 0.5 times A's base amount. Thus, the second payment is treated as a securities violation parachute payment.

Example 2. Assume the same facts as in *Example 1*, except that the present value of the first payment is equal to 2 times A's base amount. If the second payment is treated simply as a payment contingent on a change in ownership or control, the total present value of the payments is 3.5 times A's base amount, and the amount of A's total excess parachute payments is 2.5 times A's base amount. If the second payment is treated as a securities violation parachute payment, the amount of A's total excess parachute payments is 0.5 times A's base amount. Thus, the second payment is treated simply as a payment contingent on a change in ownership or control.

Example 3. B, a disqualified individual with respect to Corporation N, receives two payments in the nature of compensation that are contingent on a change in the control of Corporation N. The present value of the first

payment is equal to 4 times B's base amount and is a securities violation parachute payment. The present value of the second payment is equal to 2 times B's base amount and is not a securities violation parachute payment. B establishes by clear and convincing evidence that the entire amount of the first payment is reasonable compensation for personal services to be rendered after the change in ownership or control. If the first payment is treated simply as a payment contingent on a change in ownership or control, it is exempt from the definition of *parachute payment* pursuant to Q/A-9 of this section. Thus, the amount of B's total excess parachute payment is zero because the present value of the second payment does not equal or exceed 3 times B's base amount. However, if the first payment is treated as a securities violation parachute payment, the amount of B's total excess parachute payments is 3 times B's base amount. Thus, the first payment is treated as a securities violation parachute payment.

Example 4. Assume the same facts as in *Example 3*, except that B does not receive the second payment and B establishes by clear and convincing evidence that the first payment is reasonable compensation for services actually rendered before the change in the control of Corporation N. If the payment is treated simply as a payment contingent on a change in ownership or control, the amount of B's excess parachute payment is zero because the amount treated as an excess parachute payment is reduced by the amount that B establishes as reasonable compensation. However, if the payment is treated as a securities violation parachute payment, the amount of B's excess parachute payment is 3 times B's base amount. Thus, the payment is treated as a securities violation parachute payment.

Computation and Reduction of Excess Parachute Payments

Q-38: How is the amount of an excess parachute payment computed?

A-38: (a) The amount of an excess parachute payment is the excess of the amount of any parachute payment over the portion of the disqualified individual's base amount that is allocated to such payment. For this purpose, the portion of the base amount allocated to any parachute payment is the amount that bears the same ratio to the base amount as the present value of such parachute payment bears to the aggregate present value of all parachute payments made or to be made to (or for the benefit of) the same disqualified individual. Thus, the portion of the base amount allocated to any parachute

payment is determined by multiplying the base amount by a fraction, the numerator of which is the present value of such parachute payment and the denominator of which is the aggregate present value of all such payments. See Q/A-31, Q/A-32, and Q/A-33 of this section for rules on determining present value and Q/A-34 of this section for the definition of *base amount*.

(b) The following example illustrates the principles of this A-38:

Example. An individual with a base amount of \$100,000 is entitled to receive two parachute payments, one of \$200,000 and the other of \$400,000. The \$200,000 payment is made at the time of the change in ownership or control, and the \$400,000 payment is to be made at a future date. The present value of the \$400,000 payment is \$300,000 on the date of the change in ownership or control. The portions of the base amount allocated to these payments are \$40,000 $((\$200,000/\$500,000) \times \$100,000)$ and \$60,000 $((\$300,000/\$500,000) \times \$100,000)$, respectively. Thus, the amount of the first excess parachute payment is \$160,000 $(\$200,000 - \$40,000)$ and that of the second is \$340,000 $(\$400,000 - \$60,000)$.

Q-39: May the amount of an excess parachute payment be reduced by reasonable compensation for personal services actually rendered before the change in ownership or control?

A-39: (a) Generally, yes. Except in the case of payments treated as securities violation parachute payments or when the portion of a payment that is treated as contingent on the change in ownership or control is determined under paragraph (b) or (c) of Q/A-24 of this section, the amount of an excess parachute payment is reduced by any portion of the payment that the taxpayer establishes by clear and convincing evidence is reasonable compensation for personal services actually rendered by the disqualified individual before the date of the change in ownership or control. Services reasonably compensated for by payments that are not parachute payments (for example, because the payments are not contingent on a change in ownership or control and are not securities violation parachute payments, or because the payments are exempt from the definition of parachute payment under Q/A-6 through Q/A-9 of this section) are not taken into account for this purpose. The portion of any parachute payment

that is established as reasonable compensation is first reduced by the portion of the disqualified individual's base amount that is allocated to such parachute payment; any remaining portion of the parachute payment established as reasonable compensation then reduces the excess parachute payment.

(b) The following examples illustrate the principles of this A-39:

Example 1. Assume that a parachute payment of \$600,000 is made to a disqualified individual, and the portion of the individual's base amount that is allocated to the parachute payment is \$100,000. Also assume that \$300,000 of the \$600,000 parachute payment is established as reasonable compensation for personal services actually rendered by the disqualified individual before the date of the change in ownership or control. Before the reasonable compensation is taken into account, the amount of the excess parachute payment is \$500,000 $(\$600,000 - \$100,000)$. In reducing the excess parachute payment by reasonable compensation, the portion of the parachute payment that is established as reasonable compensation (\$300,000) is first reduced by the portion of the disqualified individual's base amount that is allocated to the parachute payment (\$100,000), and the remainder (\$200,000) then reduces the excess parachute payment. Thus, in this case, the excess parachute payment of \$500,000 is reduced by \$200,000 of reasonable compensation.

Example 2. Assume the same facts as in *Example 1*, except that the full amount of the \$600,000 parachute payment is established as reasonable compensation. In this case, the excess parachute payment of \$500,000 is reduced to zero by \$500,000 of reasonable compensation. As a result, no portion of any deduction for the payment is disallowed by section 280G, and no portion of the payment is subject to the 20-percent excise tax of section 4999.

Determination of Reasonable Compensation

Q-40: How is it determined whether payments are reasonable compensation?

A-40: (a) In general, whether payments are reasonable compensation for personal services actually rendered, or to be rendered, by the disqualified individual is determined on the basis of all the facts and circumstances of the particular case. Factors relevant to such a determination include, but are not limited to, the following—

(1) The nature of the services rendered or to be rendered;

(2) The individual's historic compensation for performing such services; and

(3) The compensation of individuals performing comparable services in situations where the compensation is not contingent on a change in ownership or control.

(b) For purposes of section 280G, reasonable compensation for personal services includes reasonable compensation for holding oneself out as available to perform services and refraining from performing services (such as under a covenant not to compete).

Q-41: Is any particular type of evidence generally considered clear and convincing evidence of reasonable compensation for personal services?

A-41: Yes. A showing that payments are made under a nondiscriminatory employee plan or program (as defined in Q/A-26 of this section) generally is considered to be clear and convincing evidence that the payments are reasonable compensation. This is true whether the personal services for which the payments are made are actually rendered before, or are to be rendered on or after, the date of the change in ownership or control. Q/A-46 of this section (relating to the treatment of an affiliated group as one corporation) does not apply for purposes of this A-41. No determination of reasonable compensation is needed for payments under qualified plans to be exempt from the definition of *parachute payment* under Q/A-8 of this section.

Q-42: Is any particular type of evidence generally considered clear and convincing evidence of reasonable compensation for personal services to be rendered on or after the date of a change in ownership or control?

A-42: (a) Yes, if payments are made or to be made to (or on behalf of) a disqualified individual for personal services to be rendered on or after the date of a change in ownership or control, a showing of the following generally is considered to be clear and convincing evidence that the payments are reasonable compensation for services to be rendered on or after the date of the change in ownership or control—

(1) The payments were made or are to be made only for the period the individual actually performs such personal services; and

(2) If the individual's duties and responsibilities are substantially the same after the change in ownership or control, the individual's annual compensation for such services is not significantly greater than such individual's annual compensation prior to the change in ownership or control, apart from normal increases attributable to increased responsibilities or cost of living adjustments. If the scope of the individual's duties and responsibilities are not substantially the same, the annual compensation after the change is not significantly greater than the annual compensation customarily paid by the employer or by comparable employers to persons performing comparable services. However, except as provided in paragraph (b) and (c) of this A-42, such clear and convincing evidence will not exist if the individual does not, in fact, perform the services contemplated in exchange for the compensation.

(b) Generally, an agreement under which the disqualified individual must refrain from performing services (*e.g.*, a covenant not to compete) is an agreement for the performance of personal services for purposes of this A-42 to the extent that it is demonstrated by clear and convincing evidence that the agreement substantially constrains the individual's ability to perform services and there is a reasonable likelihood that the agreement will be enforced against the individual. In the absence of clear and convincing evidence, payments under the agreement are treated as severance payments under Q/A-44 of this section.

(c) If the employment of a disqualified individual is involuntarily terminated before the end of a contract term and the individual is paid damages for breach of contract, a showing of the following factors generally is considered clear and convincing evidence that the payment is reasonable compensation for personal services to be rendered on or after the date of change in ownership or control—

(1) The contract was not entered into, amended, or renewed in contemplation of the change in ownership or control;

(2) The compensation the individual would have received under the contract would have qualified as reasonable compensation under section 162;

(3) The damages do not exceed the present value (determined as of the date of receipt) of the compensation the individual would have received under the contract if the individual had continued to perform services for the employer until the end of the contract term;

(4) The damages are received because an offer to provide personal services was made by the disqualified individual but was rejected by the employer (including involuntary termination or constructive discharge); and

(5) The damages are reduced by mitigation. Mitigation will be treated as occurring when such damages are reduced (or any payment of such damages is returned) to the extent of the disqualified individual's earned income (within the meaning of section 911(d)(2)(A)) during the remainder of the period in which the contract would have been in effect. See Q/A-44 of this section for rules regarding damages for a failure to make severance payments.

(d) The following examples illustrate the principles of this A-42:

Example 1. A, a disqualified individual, has a three-year employment contract with Corporation M, a publicly traded corporation. Under this contract, A is to receive a salary for \$100,000 for the first year of the contract and, for each succeeding year, an annual salary that is 10 percent higher than the prior year's salary. During the third year of the contract, Corporation N acquires all the stock of Corporation M. Prior to the change in ownership, Corporation N arranges to retain A's services by entering into an employment contract with A that is essentially the same as A's contract with Corporation M. Under the new contract, Corporation N is to fulfill Corporation M's obligations for the third year of the old contract, and, for each of the succeeding years, pay A an annual salary that is 10 percent higher than A's prior year's salary. Amounts are payable under the new contract only for the portion of the contract term during which A remains employed by Corporation N. A showing of the facts described above (and in the absence of contradictory evidence) is regarded as clear and convincing evidence that all payments

under the new contract are reasonable compensation for personal services to be rendered on or after the date of the change in ownership. Therefore, the payments under this agreement are exempt from the definition of *parachute payment* pursuant to Q/A-9 of this section.

Example 2. Assume the same facts as in *Example 1*, except that A does not perform the services described in the new contract, but receives payment under the new contract. Because services were not rendered after the change, the payments under this contract are not exempt from the definition of *parachute payment* pursuant to Q/A-9 of this section.

Example 3. Assume the same facts as in *Example 1*, except that under the new contract A agrees to perform consulting services to Corporation N, when and if Corporation N requires A's services. Assume further that when Corporation N does not require A's services, the contract provides that A must not perform services for any other competing company. Corporation N previously enforced similar contracts against former employees of Corporation N. Because A is substantially constrained under this contract and Corporation N is reasonably likely to enforce the contract against A, the agreement is an agreement for the performance of services under paragraph (b) of this A-42. Assuming the requirements of paragraph (a) of this A-42 are met and there is clear and convincing evidence that all payments under the new contract are reasonable compensation for personal services to be rendered on or after the date of the change in ownership, the payments under this contract are exempt from the definition of *parachute payment* pursuant to Q/A-9 of this section.

Example 4. Assume the same facts as in *Example 1*, except that instead of agreeing not to compete with Corporation N, under the new agreement A agrees not to disparage either Corporation M or Corporation N. Because the nondisparagement agreement does not substantially constrain A's ability to perform services, no amount of the payments under this contract are reasonable compensation for the nondisparagement agreement.

Example 5. Assume the same facts as in *Example 1*, except that the employment contract with Corporation N does not provide that amounts are payable under the contract only for the portion of the term for which A remains employed by Corporation N. Shortly after the change in ownership, and despite A's request to remain employed by Corporation N, A's employment with Corporation N is involuntarily terminated. Shortly thereafter, A obtains employment with Corporation O. A commences a civil action against Corporation N, alleging breach of the employment contract. In settlement of the litigation, A receives an amount equal to the

present value of the compensation A would have received under the contract with Corporation N, reduced by the amount of compensation A otherwise receives from Corporation O during the period that the contract would have been in effect. A showing of the facts described above (and in the absence of contradictory evidence) is regarded as clear and convincing evidence that the amount A receives as damages is reasonable compensation for personal services to be rendered on or after the date of the change in ownership. Therefore, the amount received by A is exempt from the definition of *parachute payment* pursuant to Q/A-9 of this section.

Q-43: Is any particular type of payment generally considered reasonable compensation for personal services actually rendered before the date of a change in ownership or control?

A-43: Yes, payments of compensation earned before the date of a change in ownership or control generally are considered reasonable compensation for personal services actually rendered before the date of a change in ownership or control if they qualify as reasonable compensation under section 162.

Q-44: May severance payments be treated as reasonable compensation?

A-44: (a) No, severance payments are not treated as reasonable compensation for personal services actually rendered before, or to be rendered on or after, the date of a change in ownership or control. Moreover, any damages paid for a failure to make severance payments are not treated as reasonable compensation for personal services actually rendered before, or to be rendered on or after, the date of such change. For purposes of this section, the term *severance payment* means any payment that is made to (or for the benefit of) a disqualified individual on account of the termination of such individual's employment prior to the end of a contract term, but does not include any payment that otherwise would be made to (or for the benefit of) such individual on the termination of such individual's employment, whenever occurring.

(b) The following example illustrates the principles of this A-44:

Example. A, a disqualified individual, has a three-year employment contract with Corporation X. Under the contract, A will receive a salary of \$200,000 for the first year of the contract, and for each succeeding year,

an annual salary that is \$100,000 higher than the previous year. In the event of A's termination of employment following a change in ownership or control, the contract provides that A will receive the remaining salary due under the employment contract. At the beginning of the second year of the contract, Corporation Y acquires all of the stock of Corporation X. A's employment is terminated, and A receives \$700,000 (\$300,000 for the second year of the contract plus \$400,000 for the third year of the contract) representing the remaining salary due under the employment contract. Because the \$700,000 payment is treated as a severance payment, it is not reasonable compensation for personal services on or after the date of the change in ownership or control. Thus, the full amount of the \$700,000 is a parachute payment.

Miscellaneous Rules

Q-45: How is the term *corporation* defined?

A-45: For purposes of this section, the term *corporation* has the meaning prescribed by section 7701(a)(3) and § 301.7701-2(b) of this Chapter. For example, a *corporation*, for purposes of this section, includes a publicly traded partnership treated as a corporation under section 7704(a); an entity described in § 301.7701-3(c)(1)(v)(A) of this Chapter; a real estate investment trust under section 856(a); a corporation that has mutual or cooperative (rather than stock) ownership, such as a mutual insurance company, a mutual savings bank, or a cooperative bank (as defined in section 7701(a)(32)), and a foreign corporation as defined under section 7701(a)(5).

Q-46: How is an affiliated group treated?

A-46: For purposes of this section, and except as otherwise provided in this section, all members of the same affiliated group (as defined in section 1504, determined without regard to section 1504(b)) are treated as one corporation. Rules affected by this treatment of an affiliated group include (but are not limited to) rules relating to exempt payments of certain corporations (Q/A-6, Q/A-7 of this section (except as provided therein)), payor of parachute payments (Q/A-10 of this section), disqualified individuals (Q/A-15 through Q/A-21 of this section (except as provided therein)), rebuttal of the presumption that payments are contingent on a change (Q/A-26 of this section (except

Internal Revenue Service, Treasury

§ 1.280G-1

as provide therein)), change in ownership or control (Q/A-27, 28, and 29 of this section), and reasonable compensation (Q/A-42, 43, and 44 of this section).

Effective Date

Q-47: What is the general effective date of section 280G?

A-47: (a) Generally, section 280G applies to payments under agreements entered into or renewed after June 14, 1984. Any agreement that is entered into before June 15, 1984, and is renewed after June 14, 1984, is treated as a new contract entered into on the day the renewal takes effect.

(b) For purposes of paragraph (a) of this A-47, a contract that is terminable or cancellable unconditionally at will by either party to the contract without the consent of the other, or by both parties to the contract, is treated as a new contract entered into on the date any such termination or cancellation, if made, would be effective. However, a contract is not treated as so terminable or cancellable if it can be terminated or cancelled only by terminating the employment relationship or independent contractor relationship of the disqualified individual.

(c) Section 280G applies to payments under a contract entered into on or before June 14, 1984, if the contract is amended or supplemented after June 14, 1984, in significant relevant respect. For this purpose, a *supplement* to a contract is defined as a new contract entered into after June 14, 1984, that affects the trigger, amount, or time of receipt of a payment under an existing contract.

(d)(1) Except as otherwise provided in paragraph (e) of this A-47, a contract is considered to be amended or supplemented in significant relevant respect if provisions for payments contingent on a change in ownership or control (parachute provisions), or provisions in the nature of parachute provisions, are added to the contract, or are amended or supplemented to provide significant additional benefits to the disqualified individual. Thus, for example, a contract generally is treated as amended or supplemented in significant relevant respect if it is amended or supplemented—

(i) To add or modify, to the disqualified individual's benefit, a change in ownership or control trigger;

(ii) To increase amounts payable that are contingent on a change in ownership or control (or, where payment is to be made under a formula, to modify the formula to the disqualified individual's advantage); or

(iii) To accelerate, in the event of a change in ownership or control, the payment of amounts otherwise payable at a later date.

(2) For purposes of paragraph (a) of this A-47, a payment is not treated as being accelerated in the event of a change in ownership or control if the acceleration does not increase the present value of the payment.

(e) A contract entered into on or before June 14, 1984, is not treated as amended or supplemented in significant relevant respect merely by reason of normal adjustments in the terms of employment relationship or independent contractor relationship of the disqualified individual. Whether an adjustment in the terms of such a relationship is considered normal for this purpose depends on all of the facts and circumstances of the particular case. Relevant factors include, but are not limited to, the following—

(1) The length of time between the adjustment and the change in ownership or control;

(2) The extent to which the corporation, at the time of the adjustment, viewed itself as a likely takeover candidate;

(3) A comparison of the adjustment with historical practices of the corporation;

(4) The extent of overlap between the group receiving the benefits of the adjustment and those members of that group who are the beneficiaries of pre-June 15, 1984, parachute contracts; and

(5) The size of the adjustment, both in absolute terms and in comparison with the benefits provided to other members of the group receiving the benefits of the adjustment.

Q-48: What is the effective date of this section?

A-48: This section applies to any payments that are contingent on a change in ownership or control if the change in ownership or control occurs on or after

§ 1.280H-0T

January 1, 2004. Taxpayers may rely on these regulations after August 4, 2003, for the treatment of any parachute payment.

§ 1.280H-1T Limitation on certain amounts paid to employee-owners by personal service corporations electing alternative taxable years (temporary).

(a) *Introduction.* This section applies to any taxable year that a personal service corporation has a section 444 election in effect (an “applicable election year”). For purposes of this section, the term *personal service corporation* has the same meaning given such term in § 1.441-3(c).

(b) *Limitation on certain deductions of personal service corporations—(1) In general.* If, for any applicable election year, a personal service corporation does not satisfy the minimum distribution requirement in paragraph (c) of this section, the deduction otherwise allowable under chapter 1 of the Internal Revenue Code of 1986 (the Code) for applicable amounts, as defined in paragraph (b)(4) of this section, shall not exceed the maximum deductible amount, as defined in paragraph (d) of this section.

(2) *Carryover of nondeductible amounts.* Any amount not allowed as a deduction in an applicable election year under paragraph (b)(1) of this section shall be allowed as a deduction in the succeeding taxable year.

(3) *Disallowance inapplicable for certain purposes.* The disallowance of deductions under paragraph (b)(1) of this section shall not apply for purposes of subchapter G of chapter 1 of the Code (relating to corporations used to avoid income tax on shareholders) nor for determining whether the compensation of employee-owners is reasonable. Thus, for example, in determining whether a personal service corporation is subject to the accumulated earnings tax imposed by section 531, deductions disallowed under paragraph (b)(1) of this section are treated as allowed in computing accumulated taxable income.

(4) *Definition of applicable amount—(i) In general.* For purposes of section 280H and the regulations thereunder, the term *applicable amount* means, with respect to a taxable year, any amount

that is otherwise deductible by a personal service corporation in such year and includable at any time, directly or indirectly, in the gross income of a taxpayer that during such year is an employee-owner. Thus, an amount includable in the gross income of an employee-owner will be considered an applicable amount even though such employee owns no stock of the corporation on the date the employee includes the amount in income. See *Example 1* in paragraph (b)(4)(iii) of this section.

(ii) *Special rule for certain indirect payments.* For purposes of paragraph (b)(4)(i) of this section, amounts are indirectly includable in the gross income of an employee-owner of a personal service corporation that has made a section 444 election (an electing personal service corporation) if the amount is includable in the gross income of—

(A) The spouse (other than a spouse who is legally separated from the partner or shareholder under a decree of divorce or separate maintenance) or child (under age 14) of such employee-owner, or

(B) A corporation more than 50 percent (measured by fair market value) of which is owned in the aggregate by employee-owners (and individuals related under paragraph (b)(4)(ii)(A) of this section to such employee-owners), of the electing personal service corporation, or

(C) A partnership more than 50 percent of the profits and capital of which is owned by employee-owners (and individuals related under paragraph (b)(4)(ii)(A) of this section to such employee-owners) of the electing personal service corporation, or

(D) A trust more than 50 percent of the beneficial ownership of which is owned in the aggregate by employee-owners (and individuals related under paragraph (b)(4)(ii)(A) of this section to any such employee-owners), of the electing personal service corporation.

For purposes of this paragraph (b)(4)(ii), ownership by any person described in this paragraph (b)(4)(ii) shall be treated as ownership by the employee-owners of the electing personal service corporation. Paragraph (b)(4)(ii)(B) of this section will not apply if the corporation has made a

section 444 election to use the same taxable year as that of the electing personal service corporation. Similarly, paragraph (b)(4)(ii)(C) of this section will not apply if the partnership has made a section 444 election to use the same taxable year as that of the electing personal service corporation. Notwithstanding the general effective date provision of paragraph (f) of this section, this paragraph (b)(4)(ii) is effective for amounts deductible on or after June 1, 1988.

(iii) *Example.* The provisions of paragraph (b)(4) of this section may be illustrated by the following examples.

Example 1. A is an employee of P, an accrual basis personal service corporation with a taxable year ending September 30. P makes a section 444 election for its taxable year beginning October 1, 1987. On October 1, 1987, A owns no stock of P; However, on March 31, 1988, A acquires 10 of the 200 outstanding shares of P stock. During the period October 1, 1987 to March 31, 1988, A earned \$40,000 of compensation as an employee of P. During the period April 1, 1988 to September 30, 1988, A earned \$60,000 of compensation as an employee-owner of P. If paragraph (b) of this section does not apply, P would deduct for its taxable year ended September 30, 1988 the \$100,000 earned by A during such year. Based upon these facts, the \$100,000 otherwise deductible amount is considered an applicable amount under this section.

Example 2. I1 and I2, calendar year individuals, are employees of PSC1, a personal service corporation that has historically used a taxable year ending January 31. I1 and I2 also own all the stock, and are employees, of PSC2, a calendar year personal service corporation. For its taxable years beginning February 1, 1987, 1988, and 1989, PSC1 has a section 444 election in effect to use a January 31 taxable year. During its taxable years beginning February 1, 1986, 1987, and 1988, PSC1 deducted \$10,000, \$11,000, and \$12,000, respectively, that was included in PSC2's gross income. Furthermore, of the \$12,000 deducted by PSC1 for its taxable year beginning February 1, 1988, \$7,000 was deducted during the period June 1, 1988 to January 31, 1989. Pursuant to paragraph (b)(4)(ii)(B) of this section, the \$7,000 deducted by PSC1 on or after June 1, 1988, and included in PSC2's gross income is considered an applicable amount for PSC1's taxable year beginning February 1, 1988. Amounts deducted by PSC1 prior to June 1, 1988, are not subject to paragraph (b)(4)(ii)(B) of this section.

Example 3. The facts are the same as in *Example 2*, except that for its taxable years beginning February 1, 1987, 1988, and 1989, PSC2 has a section 444 election in effect to use a

January 31 taxable year. Since both PSC1 and PSC2 have the same taxable year and both have section 444 elections in effect, paragraph (b)(4)(ii)(B) of this section does not apply to the \$7,000 deducted by PSC1 for its taxable year beginning February 1, 1988.

(c) *Minimum distribution requirement—*

(1) *Determination of whether requirement satisfied—(i) In general.* A personal service corporation meets the minimum distribution requirement of this paragraph (c) for an applicable election year if, during the deferral period of such taxable year, the applicable amounts (determined without regard to paragraph (b)(2) of this section) for all employee-owners in the aggregate equal or exceed the lesser of—

(A) The amount determined under the “preceding year test” (see paragraph (c)(2) of this section), or

(B) The amount determined under the “3-year average test” (see paragraph (c)(3) of this section).

The following example illustrates the application of this paragraph (c)(1)(i).

Example. Q, an accrual-basis personal service corporation, makes a section 444 election to retain a year ending January 31 for its taxable year beginning February 1, 1987. Q has 4 employee-owners, B, C, D, and E. For Q’s applicable election year beginning February 1, 1987 and ending January 31, 1988, B earns \$6,000 a month plus a \$45,000 bonus on January 15, 1988; C earns \$5,000 a month plus a \$40,000 bonus on January 15, 1988; D and E each earn \$4,500 a month plus a \$4,000 bonus on January 15, 1988. Q meets the minimum distribution requirement for such applicable election year if the applicable amounts during the deferral period (*i.e.*, \$220,000) equal or exceed the amount determined under the preceding year test or the 3-year average test.

(ii) *Employee-owner defined.* For purposes of section 280H and the regulations thereunder, a person is an employee-owner of a corporation for a taxable year if—

(A) On any day of the corporation’s taxable year, the person is an employee of the corporation or performs personal services for or on behalf of the corporation, even if the legal form of that person’s relationship to the corporation is that of an independent contractor, and

(B) On any day of the corporation’s taxable year, the person owns any outstanding stock of the corporation.

(2) *Preceding year test—(i) In general.* The amount determined under the preceding year test is the product of—

(A) The applicable amounts during the taxable year preceding the applicable election year (the “preceding taxable year”), divided by the number of months (but not less than one) in the preceding taxable year, multiplied by

(B) The number of months in the deferral period of the applicable election year.

(ii) *Example.* The provisions of paragraph (c)(2) of this section may be illustrated by the following example.

Example. R, a personal service corporation, has historically used a taxable year ending January 31. For its taxable year beginning February 1, 1987, R makes a section 444 election to retain its January 31 taxable year. R is an accrual basis taxpayer and has one employee-owner, F. For R’s taxable year ending January 31, 1987, F earns \$5,000 a month plus a \$40,000 bonus on January 15, 1987. The amount determined under the preceding year test for R’s applicable election year beginning February 1, 1987 is \$91,667 (\$100,000, the applicable amounts during R’s taxable year ending January 31, 1987, divided by 12, the number of months in R’s taxable year ending January 31, 1987, multiplied by 11, the number of months in R’s deferral period for such year).

(3) *3-year average test—(i) In general.* The amount determined under the 3-year average test is the applicable percentage multiplied by the adjusted taxable income for the deferral period of the applicable election year.

(ii) *Applicable percentage.* The term *applicable percentage* means the percentage (not in excess of 95 percent) determined by dividing—

(A) The applicable amounts during the 3 taxable years of the corporation (or, if fewer, the taxable years the corporation has been in existence) immediately preceding the applicable election year, by

(B) The adjusted taxable income of such corporation for such 3 taxable years (or, if fewer, the taxable years of existence).

(iii) *Adjusted taxable income—(A) In general.* The term *adjusted taxable income* means taxable income determined without regard to applicable amounts.

(B) *Determination of adjusted taxable income for the deferral period of the applicable election year.* Adjusted taxable

income for the deferral period of the applicable election year equals the adjusted taxable income that would result if the personal service corporation filed an income tax return for the deferral period of the applicable election year under its normal method of accounting. However, a personal service corporation may make a reasonable estimate of such amount.

(C) *NOL carryovers.* For purposes of determining adjusted taxable income for any period, any NOL carryover shall be reduced by the amount of such carryover that is attributable to the deduction of applicable amounts. The portion of the NOL carryover attributable to the deduction of applicable amounts is the difference between the NOL carryover computed with the deduction of such amounts and the NOL carryover computed without the deduction of such amounts. For purposes of determining the adjusted taxable income for the deferral period, an NOL carryover to the applicable election year, reduced as provided in this paragraph (c)(3)(iii)(C), shall be allowed first against the income of the deferral period.

(D) *Examples.* The provisions of this paragraph (c)(3)(iii) may be illustrated by the following examples.

Example 1. S is a personal service corporation that has historically used a taxable year ending January 31. For its taxable year beginning February 1, 1987, S makes a section 444 election to retain its taxable year ending January 31. S does not satisfy the minimum distribution requirement for its first applicable election year, and the applicable amounts for that year exceed the maximum deductible amount by \$54,000. Under paragraph (b)(2) of this section, the \$54,000 excess is carried over to S's taxable year beginning February 1, 1988. Furthermore, if S continues its section 444 election for its taxable year beginning February 1, 1988, and desires to use the 3-year average test provided in this paragraph (c)(3)(iii)(A) of this section the \$54,000 will not be allowed to reduce adjusted taxable income for such year. See also section 280H(e) regarding the disallowance of net operating loss carrybacks to (or from) any taxable year of a corporation personal service election under section 444 applies.

Example 2. T, a personal service corporation with a section 444 election in effect, is determining whether it satisfies the 3-year average test for its second applicable election year. T had a net operating loss (NOL)

for its first applicable election year of \$45,000. The NOL resulted from \$150,000 of gross income less the sum of \$96,000 of salary, \$45,000 of other expenses, and \$54,000 of deductible applicable amounts. Pursuant to paragraph (c)(3)(iii)(C) of this section, the entire amount of the \$45,000 NOL is attributable to applicable amounts since the applicable amounts deducted in arriving at the NOL (*i.e.*, \$54,000) were greater than the NOL (*i.e.*, \$45,000). Thus, for purposes of computing the adjusted taxable income for the deferral period of T's second applicable election year, the NOL carryover to that year is \$0 (\$45,000 NOL less \$45,000 amount of NOL attributable to applicable amounts).

(d) *Maximum deductible amount*—(1) *In general.* For purposes of this section, the term *maximum deductible amount* means the sum of—

(i) The applicable amounts during the deferral period of the applicable election year, plus

(ii) An amount equal to the product of—

(A) The amount determined under paragraph (d)(1)(i) of this section divided by the number of months in the deferral period of the applicable election year, multiplied by

(B) The number of months in the nondeferral period of the applicable election year. For purposes of the preceding sentence, the term *nondeferral period* means the portion of the applicable election year that occurs after the portion of such year constituting the deferral period.

(2) *Example.* The provisions of paragraph (d)(1) of this section may be illustrated by the following example.

Example. U, an accrual basis personal service corporation with a taxable year ending January 31, makes a section 444 election to retain a year ending January 31 for its taxable year beginning February 1, 1987. For its applicable election year beginning February 1, 1987, U does not satisfy the minimum distribution requirement in paragraph (c) of this section. Furthermore, U has 3 employee-owners, G, H, and I. G and H have been employee-owners of U for 10 years. Although I has been an employee of U for 4 years, I did not become an employee-owner until December 1, 1987, when I acquired 5 of the 20 outstanding shares of U stock. For U's applicable election year beginning February 1, 1987, G earns \$5,000 a month plus a \$40,000 bonus on January 15, 1988, and H and I each earn \$4,000 a month plus a \$32,000 bonus on January 15, 1988. Thus, the total of the applicable

§ 1.274-5A

26 CFR Ch. I (4-1-17 Edition)

amounts during the deferral period of the applicable election year beginning February 1, 1987 is \$143,000. Based on these facts, U's deduction for applicable amounts is limited to \$156,000, determined as follows—\$143,000 (applicable amounts during the deferral period) plus \$13,000 (applicable amounts during the deferral period, divided by the number of months in the deferral period, multiplied by the number of months in the nondeferral period).

(e) *Special rules and definition*—(1) *Newly organized personal service corporations.* A personal service corporation is deemed to satisfy the preceding year test and the 3-year average test for the first year of the corporation's existence.

(2) *Existing corporations that become personal service corporations.* If an existing corporation becomes a personal service corporation and makes a section 444 election, the determination of whether the corporation satisfies the preceding year test and the 3-year average test is made by treating the corporation as though it were a personal service corporation for each of the 3 years preceding the applicable election year.

(3) *Disallowance of NOL carryback.* No net operating loss carryback shall be allowed to (or from) any applicable election year of a personal service corporation.

(4) *Deferral period.* For purposes of section 280H and the regulations thereunder, the term *deferral period* has the same meaning as under § 1.444-1T(b)(4).

(5) *Examples.* The provisions of this paragraph (e) may be illustrated by the following examples.

Example 1. V is a personal service corporation with a taxable year ending September 30. V makes a section 444 election for its taxable year beginning October 1, 1987, and incurs a net operating loss (NOL) for such year. Because an NOL is not allowed to be carried back from an applicable election year, V may not carry back the NOL from its first applicable election year to reduce its 1985, 1986, or 1987 taxable income.

Example 2. W, a personal service corporation, commences operations on July 1, 1990. Furthermore, for its taxable year beginning July 1, 1990, W makes a section 444 election to use a year ending September 30. Pursuant to paragraph (e)(1) of this section, W satisfies the preceding year test and the 3-year average test for its first year in existence. Thus, W may deduct, without limitation under this

section, any applicable amounts for its taxable year beginning July 1, 1990.

Example 3. The facts are the same as in *Example 2*. For its taxable year beginning October 1, 1990, W incurs an NOL and is not a personal service corporation. Furthermore, W desires to carry back the NOL to its preceding taxable year (a year that was an applicable election year). Pursuant to paragraph (e)(3) of this section, W may not carry back an NOL "to" its taxable year beginning July 1, and ending September 30, 1990, because such year was an applicable election year.

(f) *Effective date.* The provisions of this section are effective for taxable years beginning after December 31, 1986.

[T.D. 8205, 53 FR 19711, May 27, 1988]

TAXABLE YEARS BEGINNING PRIOR TO
JANUARY 1, 1986

§ 1.274-5A Substantiation requirements.

(a) *In general.* No deduction shall be allowed for any expenditure with respect to:

(1) Traveling away from home (including meals and lodging) deductible under section 162 or 212,

(2) Any activity which is of a type generally considered to constitute entertainment, amusement, or recreation, or with respect to a facility used in connection with such an activity, including the items specified in section 274(e), or

(3) Gifts defined in section 274, unless the taxpayer substantiates such expenditure as provided in paragraph (c) of this section. This limitation supercedes with respect to any such expenditure the doctrine of *Cohan v. Commissioner* (C.C.A. 2d 1930) 39 F. 2d 540. The decision held that, where the evidence indicated a taxpayer incurred deductible travel or entertainment expense but the exact amount could not be determined, the court should make a close approximation and not disallow the deduction entirely. Section 274(d) contemplates that no deduction shall be allowed a taxpayer for such expenditures on the basis of such approximations or unsupported testimony of the taxpayer. For purposes of this section, the term *entertainment* means entertainment, amusement, or recreation, and use of a facility therefore; and the

term *expenditure* includes expenses and items (including items such as losses and depreciation).

(b) *Elements of an expenditure*—(1) *In general.* Section 274(d) and this section contemplate that no deduction shall be allowed for any expenditure for travel, entertainment, or a gift unless the taxpayer substantiates the following elements for each such expenditure:

- (i) Amount;
- (ii) Time and place of travel or entertainment (or use of a facility with respect to entertainment), or date and description of a gift;
- (iii) Business purpose; and
- (iv) Business relationship to the taxpayer of each person entertained, using an entertainment facility or receiving a gift.

(2) *Travel.* The elements to be proved with respect to an expenditure for travel are:

- (i) *Amount.* Amount of each separate expenditure for traveling away from home, such as cost of transportation or lodging, except that the daily cost of the traveler's own breakfast, lunch, and dinner and of expenditures incidental to such travel may be aggregated, if set forth in reasonable categories, such as for meals, for gasoline and oil, and for taxi fares;
- (ii) *Time.* Dates of departure and return for each trip away from home, and number of days away from home spent on business;
- (iii) *Place.* Destinations or locality of travel, described by name of city or town or other similar designation; and
- (iv) *Business purpose.* Business reason for travel or nature of the business benefit derived or expected to be derived as a result of travel.

(3) *Entertainment in general.* Elements to be proved with respect to an expenditure for entertainment are:

- (i) *Amount.* Amount of each separate expenditure for entertainment, except that such incidental items as taxi fares or telephone calls may be aggregated on a daily basis;
- (ii) *Time.* Date of entertainment;
- (iii) *Place.* Name, if any, address or location, and designation of type of entertainment, such as dinner or theater, if such information is not apparent from the designation of the place;

(iv) *Business purpose.* Business reason for the entertainment or nature of business benefit derived or expected to be derived as a result of the entertainment and, except in the case of business meals described in section 274(e)(1), the nature of any business discussion or activity;

(v) *Business relationship.* Occupation or other information relating to the person or persons entertained, including name, title, or other designation, sufficient to establish business relationship to the taxpayer.

(4) *Entertainment directly preceding or following a substantial and bona fide business discussion.* If a taxpayer claims a deduction for entertainment directly preceding or following a substantial and bona fide business discussion on the ground that such entertainment was associated with the active conduct of the taxpayer's trade or business, the elements to be proved with respect to such expenditure, in addition to those enumerated in subparagraph (3)(i), (ii), (iii), and (v) of this paragraph, are:

- (i) *Time.* Date and duration of business discussion;
- (ii) *Place.* Place of business discussion;
- (iii) *Business purpose.* Nature of business discussion, and business reason for the entertainment or nature of business benefit derived or expected to be derived as the result of the entertainment;

(iv) *Business relationship.* Identification of those persons entertained who participated in the business discussion.

(5) *Gifts.* Elements to be proved with respect to an expenditure for a gift are:

- (i) *Amount.* Cost of the gift to the taxpayer;
- (ii) *Time.* Date of the gift;
- (iii) *Description.* Description of the gift;

(iv) *Business purpose.* Business reason for the gift or nature of business benefit derived or expected to be derived as a result of the gift; and

(v) *Business relationship.* Occupation or other information relating to the recipient of the gift, including name, title, or other designation, sufficient to establish business relationship to the taxpayer.

(c) *Rules for substantiation*—(1) *In general.* A taxpayer must substantiate

each element of an expenditure (described in paragraph (b) of this section) by adequate records or by sufficient evidence corroborating his own statement except as otherwise provided in this section. Section 274(d) contemplates that a taxpayer will maintain and produce such substantiation as will constitute clear proof of an expenditure for travel, entertainment, or gifts referred to in section 274. A record of the elements of an expenditure made at or near the time of the expenditure, supported by sufficient documentary evidence, has a high degree of credibility not present with respect to a statement prepared subsequent thereto when generally there is a lack of accurate recall. Thus, the corroborative evidence required to support a statement not made at or near the time of the expenditure must have a high degree of probative value to elevate such statement and evidence to the level of credibility reflected by a record made at or near the time of the expenditure supported by sufficient documentary evidence. The substantiation requirements of section 274(d) are designed to encourage taxpayers to maintain the records, together with documentary evidence, as provided in subparagraph (2) of this paragraph. To obtain a deduction for an expenditure for travel, entertainment, or gifts, a taxpayer must substantiate, in accordance with the provisions of this paragraph, each element of such an expenditure.

(2) *Substantiation by adequate records*—(i) *In general.* To meet the “adequate records” requirements of section 274(d), a taxpayer shall maintain an account book, diary, statement of expense or similar record (as provided in subdivision (ii) of this subparagraph) and documentary evidence (as provided in subdivision (iii) of this subparagraph) which, in combination, are sufficient to establish each element of an expenditure specified in paragraph (b) of this section. It is not necessary to record information in an account book, diary, statement of expense or similar record which duplicates information reflected on a receipt so long as such account book and receipt complement each other in an orderly manner.

(ii) *Account book, diary, etc.* An account book, diary, statement of expense or similar record must be prepared or maintained in such manner that each recording of an element of an expenditure is made at or near the time of the expenditure.

(a) *Made at or near the time of the expenditure.* For purposes of this section, the phrase *made at or near the time of the expenditure* means the elements of an expenditure are recorded at a time when, in relation to the making of an expenditure, the taxpayer has full present knowledge of each element of the expenditure, such as the amount, time, place and business purpose of the expenditure and business relationship to the taxpayer of any person entertained. An expense account statement which is a transcription of an account book, diary, or similar record prepared or maintained in accordance with the provisions of this subdivision shall be considered a record prepared or maintained in the manner prescribed in the preceding sentence if such expense account statement is submitted by an employee to his employer or by an independent contractor to his client or customer in the regular course of good business practice.

(b) *Substantiation of business purpose.* In order to constitute an adequate record of business purpose within the meaning of section 274(d) and this subparagraph, a written statement of business purpose generally is required. However, the degree of substantiation necessary to establish business purpose will vary depending upon the facts and circumstances of each case. Where the business purpose of an expenditure is evident from the surrounding facts and circumstances, a written explanation of such business purpose will not be required. For example, in the case of a salesman calling on customers on an established sales route, a written explanation of the business purpose of such travel ordinarily will not be required. Similarly, in the case of a business meal described in section 274(e)(1), if the business purpose of such meal is evident from the business relationship to the taxpayer of the persons entertained and other surrounding circumstances, a written explanation of

such business purpose will not be required.

(c) *Confidential information.* If any information relating to the elements of an expenditure, such as place, business purpose or business relationship, is of a confidential nature, such information need not be set forth in the account book, diary, statement of expense or similar record, provided such information is recorded at or near the time of the expenditure and is elsewhere available to the district director to substantiate such element of the expenditure.

(iii) *Documentary evidence.* Documentary evidence, such as receipts, paid bills, or similar evidence sufficient to support an expenditure shall be required for:

(a) Any expenditure for lodging while traveling away from home, and

(b) Any other expenditure of \$25 or more, except, for transportation charges, documentary evidence will not be required if not readily available.

Provided, however, that the Commissioner, in his discretion, may prescribe rules waiving such requirements in circumstances where he determines it is impracticable for such documentary evidence to be required. Ordinarily, documentary evidence will be considered adequate to support an expenditure if it includes sufficient information to establish the amount, date, place, and the essential character of the expenditure. For example, a hotel receipt is sufficient to support expenditures for business travel if it contains the following: name, location, date, and separate amounts for charges such as for lodging, meals, and telephone. Similarly, a restaurant receipt is sufficient to support an expenditure for a business meal if it contains the following: name and location of the restaurant, the date and amount of the expenditure, and, if a charge is made for an item other than meals and beverages, an indication that such is the case. A document may be indicative of only one (or part of one) element of an expenditure. Thus, a cancelled check, together with a bill from the payee, ordinarily would establish the element of cost. In contrast, a cancelled check drawn payable to a named payee would not by itself support a business expenditure without other evidence showing

that the check was used for a certain business purpose.

(iv) *Retention of documentary evidence.* The Commissioner may, in his discretion, prescribe rules under which an employer may dispose of documentary evidence submitted to him by employees who are required to, and do, make an adequate accounting to the employer (within the meaning of paragraph (e)(4) of this section) if the employer maintains adequate accounting procedures with respect to such employees (within the meaning of paragraph (e)(5) of this section).

(v) *Substantial compliance.* If a taxpayer has not fully substantiated a particular element of an expenditure, but the taxpayer establishes to the satisfaction of the district director that he has substantially complied with the *adequate records* requirements of this subparagraph with respect to the expenditure, the taxpayer may be permitted to establish such element by evidence which the district director shall deem adequate.

(3) *Substantiation by other sufficient evidence.* If a taxpayer fails to establish to the satisfaction of the district director that he has substantially complied with the “adequate records” requirements of subparagraph (2) of this paragraph with respect to an element of an expenditure, then, except as otherwise provided in this paragraph, the taxpayer must establish such element:

(i) By his own statement, whether written or oral, containing specific information in detail as to such element; and

(ii) By other corroborative evidence sufficient to establish such element.

If such element is the description of a gift, or the cost, time, place, or date of an expenditure, the corroborative evidence shall be direct evidence, such as a statement in writing or the oral testimony of persons entertained or other witness setting forth detailed information about such element, or the documentary evidence described in subparagraph (2) of this paragraph. If such element is either the business relationship to the taxpayer of persons entertained or the business purpose of an expenditure, the corroborative evidence may be circumstantial evidence.

(4) *Substantiation in exceptional circumstances.* If a taxpayer establishes that, by reason of the inherent nature of the situation in which an expenditure was made:

(i) He was unable to obtain evidence with respect to an element of the expenditure which conforms fully to the “adequate records” requirements of subparagraph (2) of this paragraph,

(ii) He is unable to obtain evidence with respect to such element which conforms fully to the “other sufficient evidence” requirements of subparagraph (3) of this paragraph, and

(iii) He has presented other evidence, with respect to such element, which possesses the highest degree of probative value possible under the circumstances, such other evidence shall be considered to satisfy the substantiation requirements of section 274(d) and this paragraph.

(5) *Loss of records due to circumstances beyond control of taxpayer.* Where the taxpayer establishes that the failure to produce adequate records is due to the loss of such records through circumstances beyond the taxpayer’s control, such as destruction by fire, flood, earthquake, or other casualty, the taxpayer shall have a right to substantiate a deduction by reasonable reconstruction of his expenditures.

(6) *Special rules—(i) Separate expenditure—(a) In general.* For the purposes of this section, each separate payment by the taxpayer shall ordinarily be considered to constitute a separate expenditure. However, concurrent or repetitious expenses of a similar nature occurring during the course of a single event shall be considered a single expenditure. To illustrate the above rules, where a taxpayer entertains a business guest at dinner and thereafter at the theater, the payment for dinner shall be considered to constitute one expenditure and the payment for the tickets for the theater shall be considered to constitute a separate expenditure. Similarly, if during a day of business travel a taxpayer makes separate payments for breakfast, lunch, and dinner, he shall be considered to have made three separate expenditures. However, if during entertainment at a cocktail lounge the taxpayer pays separately for each serving of refresh-

ments, the total amount expended for the refreshments will be treated as a single expenditure. A tip may be treated as a separate expenditure.

(b) *Aggregation.* Except as otherwise provided in this section, the account book, diary, statement of expense, or similar record required by subparagraph (2)(ii) of this paragraph shall be maintained with respect to each separate expenditure and not with respect to aggregate amounts for two or more expenditures. Thus, each expenditure for such items as lodging and air or rail travel shall be recorded as a separate item and not aggregated. However, at the option of the taxpayer, amounts expended for breakfast, lunch, or dinner, may be aggregated. A tip or gratuity which is related to an underlying expense may be aggregated with such expense. For other provisions permitting recording of aggregate amounts in an account book, diary, statement of expense or similar record see paragraph (b)(2)(i) and (b)(3) of this section (relating to incidental costs of travel and entertainment).

(ii) *Allocation of expenditure.* For purposes of this section, if a taxpayer has established the amount of an expenditure, but is unable to establish the portion of such amount which is attributable to each person participating in the event giving rise to the expenditure, such amount shall ordinarily be allocated to each participant on a pro rata basis, if such determination is material. Accordingly, the total number of persons for whom a travel or entertainment expenditure is incurred must be established in order to compute the portion of the expenditure allocable to each such person.

(iii) *Primary use of a facility.* Section 274(a) (1)(B) and (2)(C) denies a deduction for any expenditure paid or incurred before January 1, 1979, with respect to a facility, or paid or incurred at any time with respect to a club, used in connection with an entertainment activity unless the taxpayer establishes that the facility (including a club) was used primarily for the furtherance of his trade or business. A determination whether a facility before January 1, 1979, or a club at any time was used primarily for the furtherance of the taxpayer’s trade or business will

depend upon the facts and circumstances of each case. In order to establish that a facility was used primarily for the furtherance of his trade or business, the taxpayer shall maintain records of the use of the facility, the cost of using the facility, mileage or its equivalent (if appropriate), and such other information as shall tend to establish such primary use. Such records of use shall contain:

(a) For each use of the facility claimed to be in furtherance of the taxpayer's trade or business, the elements of an expenditure specified in paragraph (b) of this section, and

(b) For each use of the facility not in furtherance of the taxpayer's trade or business, an appropriate description of such use, including cost, date, number of persons entertained, nature of entertainment and, if applicable, information such as mileage or its equivalent. A notation such as "personal use" or "family use" would, in the case of such use, be sufficient to describe the nature of entertainment.

If a taxpayer fails to maintain adequate records concerning a facility which is likely to serve the personal purposes of the taxpayer, it shall be presumed that the use of such facility was primarily personal.

(iv) *Additional information.* In a case where it is necessary to obtain additional information, either:

(a) To clarify information contained in records, statements, testimony, or documentary evidence submitted by a taxpayer under the provisions of paragraph (c)(2) or (c)(3) of this section, or

(b) To establish the reliability or accuracy of such records, statements, testimony, or documentary evidence, the district director may, notwithstanding any other provision of this section, obtain such additional information as he determines necessary to properly implement the provisions of section 274 and the regulations thereunder by personal interview or otherwise.

(7) *Specific exceptions.* Except as otherwise prescribed by the Commissioner, substantiation otherwise required by this paragraph is not required for:

(i) Expenses described in section 274(e)(2) relating to food and beverages for employees, section 274(e)(3) relating to

expenses treated as compensation, section 274(e)(8) relating to items available to the public, and section 274(e)(9) relating to entertainment sold to customers, and

(ii) Expenses described in section 274(e)(5) relating to recreational, etc., expenses for employees, except that a taxpayer shall keep such records or other evidence as shall establish that such expenses were for activities (or facilities used in connection therewith) primarily for the benefit of employees other than employees who are officers, shareholders or other owners (as defined in section 274(e)(5)), or highly compensated employees.

(d) *Disclosure on returns.* The Commissioner may, in his discretion, prescribe rules under which any taxpayer claiming a deduction for entertainment, gifts, or travel or any other person receiving advances, reimbursements, or allowances for such items, shall make disclosure on his tax return with respect to such items. The provisions of this paragraph shall apply notwithstanding the provisions of paragraph (e) of this section.

(e) *Reporting and substantiation of expenses of certain employees for travel, entertainment, and gifts—(1) In general.* The purpose of this paragraph is to provide rules for reporting and substantiation of certain expenses paid or incurred by taxpayers in connection with the performance of services as employees. For purposes of this paragraph, the term *business expenses* means ordinary and necessary expenses for travel, entertainment, or gifts which are deductible under section 162, and the regulations thereunder, to the extent not disallowed by section 274(c). Thus, the term *business expenses* does not include personal, living or family expenses disallowed by section 262 or travel expenses disallowed by section 274(c), and advances, reimbursements, or allowances for such expenditures must be reported as income by the employee.

(2) *Reporting of expenses for which the employee is required to make an adequate accounting to his employer—(i) Reimbursements equal to expenses.* For purposes of computing tax liability, an employee need not report on his tax return business expenses for travel, transportation, entertainment, gifts,

and similar purposes, paid or incurred by him solely for the benefit of his employer for which he is required to, and does, make an adequate accounting to his employer (as defined in subparagraph (4) of this paragraph) and which are charged directly or indirectly to the employer (for example, through credit cards) or for which the employee is paid through advances, reimbursements, or otherwise, provided that the total amount of such advances, reimbursements, and charges is equal to such expenses.

(ii) *Reimbursements in excess of expenses.* In case the total of the amounts charged directly or indirectly to the employer or received from the employer as advances, reimbursements, or otherwise, exceeds the business expenses paid or incurred by the employee and the employee is required to, and does, make an adequate accounting to his employer for such expenses, the employee must include such excess (including amounts received for expenditures not deductible by him) in income.

(iii) *Expense in excess of reimbursements.* If an employee incurs deductible business expenses on behalf of his employer which exceed the total of the amounts charged directly or indirectly to the employer and received from the employer as advances, reimbursements, or otherwise, and the employee wishes to claim a deduction for such excess, he must:

(a) Submit a statement as part of his tax return showing all of the information required by subparagraph (3) of this paragraph, and,

(b) Maintain such records and supporting evidence as will substantiate each element of an expenditure (described in paragraph (b) of this section) in accordance with paragraph (c) of this section.

(3) *Reporting of expenses for which the employee is not required to make an adequate accounting to his employer.* If the employee is not required to make an adequate accounting to his employer for his business expenses or, though required, fails to make an adequate accounting for such expenses, he must submit, as a part of his tax return, a statement showing the following information:

(i) The total of all amounts received as advances or reimbursements from his employer, including amounts charged directly or indirectly to the employer through credit cards or otherwise; and

(ii) The nature of his occupation, the number of days away from home on business, and the total amount of business expenses paid or incurred by him (including those charged directly or indirectly to the employer through credit cards or otherwise) broken down into such categories as transportation, meals and lodging while away from home overnight, entertainment, gifts, and other business expenses.

In addition, he must maintain such records and supporting evidence as will substantiate each element of an expenditure (described in paragraph (b) of this section) in accordance with paragraph (c) of this section.

(4) *Definition of an "adequate accounting" to the employer.* For purposes of this paragraph an adequate accounting means the submission to the employer of an account book, diary, statement of expense, or similar record maintained by the employee in which the information as to each element of an expenditure (described in paragraph (b) of this section) is recorded at or near the time of the expenditure, together with supporting documentary evidence, in a manner which conforms to all the "adequate records" requirements of paragraph (c)(2) of this section. An adequate accounting requires that the employee account for all amounts received from his employer during the taxable year as advances, reimbursements, or allowances (including those charged directly or indirectly to the employer through credit cards or otherwise) for travel, entertainment, and gifts. The methods of substantiation allowed under paragraph (c)(4) or (c)(5) of this section also will be considered to be an adequate accounting if the employer accepts an employee's substantiation and establishes that such substantiation meets the requirements of such paragraph (c)(4) or (c)(5). For purposes of an adequate accounting the method of substantiation allowed under paragraph (c)(3) of this section will not be permitted.

(5) *Substantiation of expenditures by certain employees.* An employee who makes an adequate accounting to his employer within the meaning of this paragraph will not again be required to substantiate such expense account information except in the following cases:

(i) An employee whose business expenses exceed the total of amounts charged to his employer and amounts received through advances, reimbursements or otherwise and who claims a deduction on his return for such excess;

(ii) An employee who is related to his employer within the meaning of section 267(b) but for this purpose the percentage referred to in section 267(b)(2) shall be 10 percent; and

(iii) Employees in cases where it is determined that the accounting procedures used by the employer for the reporting and substantiation of expenses by such employees are not adequate, or where it cannot be determined that such procedures are adequate. The district director will determine whether the employer's accounting procedures are adequate by considering the facts and circumstances of each case, including the use of proper internal controls. For example, an employer should require that an expense account must be verified and approved by a responsible person other than the person incurring such expenses. Accounting procedures will be considered inadequate to the extent that the employer does not require an adequate accounting from his employees as defined in subparagraph (4) of this paragraph, or does not maintain such substantiation. To the extent an employer fails to maintain adequate accounting procedures he will thereby obligate his employees to separately substantiate their expense account information.

(f) *Substantiation by reimbursement arrangements or per diem, mileage, and other traveling allowances.* The Commissioner may, in his discretion, prescribe rules under which:

(1) Reimbursement arrangements covering ordinary and necessary expenses of traveling away from home (exclusive of transportation expenses to and from destination),

(2) Per diem allowances providing for ordinary and necessary expenses of

traveling away from home (exclusive of transportation costs to and from destination), and

(3) Mileage allowances providing for ordinary and necessary expenses of transportation while traveling away from home, will, if in accordance with reasonable business practice, be regarded as equivalent to substantiation by adequate records or other sufficient evidence for purposes of paragraph (c) of this section of the amount of such traveling expenses and as satisfying, with respect to the amount of such traveling expenses, the requirements of an adequate accounting to the employer for purposes of paragraph (e)(4) of this section. If the total travel allowance received exceeds the deductible traveling expenses paid or incurred by the employee, such excess must be reported as income on the employee's return. See paragraph (h) of this section relating to the substantiation of meal expenses while traveling.

(g) *Reporting and substantiation of certain reimbursements of persons other than employees—(1) In general.* The purpose of this paragraph is to provide rules for the reporting and substantiation of certain expenses for travel, entertainment, and gifts paid or incurred by one person (hereinafter termed "independent contractor") in connection with services performed for another person other than an employer (hereinafter termed "client or customer") under a reimbursement or other expense allowance arrangement with such client or customer. For purposes of this paragraph, the term *business expenses* means ordinary and necessary expenses for travel, entertainment, or gifts which are deductible under section 162, and the regulations thereunder, to the extent not disallowed by section 274(c). Thus, the term *business expenses* does not include personal, living or family expenses disallowed by section 262 or travel expenses disallowed by section 274(c), and reimbursements for such expenditures must be reported as income by the independent contractor. For purposes of this paragraph, the term *reimbursements* means advances, allowances, or reimbursements received by an independent contractor for travel, entertainment,

§ 1.281-1

26 CFR Ch. I (4-1-17 Edition)

or gifts, in connection with the performance by him of services for his client or customer, under a reimbursement or other expense allowance arrangement with his client or customer, and includes amounts charged directly or indirectly to the client or customer through credit card systems or otherwise. See paragraph (h) of this section relating to the substantiation of meal expenses while traveling.

(2) *Substantiation by independent contractors.* An independent contractor shall substantiate, with respect to his reimbursements, each element of an expenditure (described in paragraph (b) of this section) in accordance with the requirements of paragraph (c) of this section; and, to the extent he does not so substantiate, he shall include such reimbursements in income. An independent contractor shall so substantiate a reimbursement for entertainment regardless of whether he accounts (within the meaning of subparagraph (3) of this paragraph) for such entertainment.

(3) *Accounting to a client or customer under section 274(e)(4)(B).* Section 274(e)(4)(B) provides that section 274(a) (relating to disallowance of expenses for entertainment) shall not apply to expenditures for entertainment for which an independent contractor has been reimbursed if the independent contractor accounts to his client or customer to the extent provided by section 274(d). For purposes of section 274(e)(4)(B), an independent contractor shall be considered to account to his client or customer for an expense paid or incurred under a reimbursement or other expense allowance arrangement with his client or customer if, with respect to such expense for entertainment, he submits to his client or customer adequate records or other sufficient evidence conforming to the requirements of paragraph (c) of this section.

(4) *Substantiation by client or customer.* A client or customer shall not be required to substantiate, in accordance with the requirements of paragraph (c) of this section, reimbursements to an independent contractor for travel and gifts, or for entertainment unless the independent contractor has accounted to him (within the meaning of section

274(e)(4)(B) and subparagraph (3) of this paragraph) for such entertainment. If an independent contractor has so accounted to a client or customer for entertainment, the client or customer shall substantiate each element of the expenditure (as described in paragraph (b) of this section) in accordance with the requirements of paragraph (c) of this section.

(h) *Authority for an optional method of computing meal expenses while traveling.* The Commissioner may establish a method under which a taxpayer may elect to use a specified amount or amounts for meals while traveling in lieu of substantiating the actual cost of meals. The taxpayer would not be relieved of substantiating the actual cost of other travel expenses as well as the time, place, and business purpose of the travel. See paragraph (b)(2) and (c) of this section.

(i) *Effective date—(1) In general.* Section 274(d) and this section apply with respect to taxable years ending after December 31, 1962, but only with respect to period after that date.

(2) *Certain meal expenses.* Paragraph (h) of this section is effective for expenses paid or incurred after December 31, 1982.

[T.D. 6630, 27 FR 12931, Dec. 29, 1972, as amended by T.D. 7226, 37 FR 26711, Dec. 15, 1972; T.D. 7909, 48 FR 40370, Sept. 7, 1983; 48 FR 41017, Sept. 13, 1983; T.D. 8051, 50 FR 36576, Sept. 9, 1985. Redesignated by T.D. 8715, 62 FR 13990, Mar. 25, 1997; T.D. 8996, 67 FR 35008, May 17, 2002]

TERMINAL RAILROAD CORPORATIONS AND THEIR SHAREHOLDERS

§ 1.281-1 In general.

Section 281 provides special rules for the computation of the taxable incomes of a terminal railroad corporation and its shareholders when the terminal railroad corporation, as a result of taking related terminal income into account, reduces a charge which was made or which would be made for related terminal services furnished to a railroad corporation. Section 281 and paragraphs (a) and (b) of § 1.281-2 provide that the “reduced amount” described in paragraph (c) of § 1.281-2 is not includable in gross income of the terminal railroad corporation, is not

treated as a dividend or other distribution to its railroad shareholders, and is not treated as an amount paid -or incurred by the railroad shareholders to the terminal railroad corporation. Section 281 and paragraph (a)(2) of § 1.281-2 provide that no deduction otherwise allowable to a terminal railroad corporation shall be disallowed as a result of the "reduced amount" described in paragraph (c) of § 1.281-2. Section 1.281-3 defines the terms *terminal railroad corporation*, *related terminal income*, *related terminal services*, *agreement*, and *railroad corporation*. Section 1.281-4 describes the effective dates and special rules for application of section 281 to taxable years ending before October 23, 1962.

[T.D. 7356, 40 FR 23732, June 2, 1975]

§ 1.281-2 Effect of section 281 upon the computation of taxable income.

(a) *Computation of taxable income of terminal railroad corporations*—(1) *Income not considered received or accrued*. A terminal railroad corporation (as defined in paragraph (a) of § 1.281-3) shall not be considered to have received or accrued the "reduced amount" described in paragraph (c) of this section in the computation of its taxable income. Thus, income is not to be considered accrued or actually or constructively received by a terminal railroad corporation where, in the manner described in paragraph (c) of this section, (i) a charge which would be made to any railroad corporation for related terminal services is not made, or (ii) a portion of any liability payable by any railroad corporation with respect to related terminal services is discharged.

(2) *Deduction not disallowed*. In the computation of the taxable income of a terminal railroad corporation, a deduction relating to a "reduced amount", described in paragraph (c) of this section, which is otherwise allowable to it under chapter 1 of the Code (without regard to sec. 277) shall not be disallowed by reason of section 281. Thus, deductions for expenses attributable to services rendered to a shareholder are not to be disallowed to a terminal railroad corporation merely because, in the manner described in paragraph (c) of this section, (i) a charge which would be made to any railroad corporation for related terminal services is not

made, or (ii) a portion of any liability payable by any railroad corporation with respect to related terminal services is discharged. To the extent that section 281 applies to a deduction relating to a "reduced amount", such deduction shall not be disallowed under section 277.

(b) *Computation of taxable income of shareholders*—(1) *Income not considered received or accrued*. A shareholder of a terminal railroad corporation shall not be considered to have received or accrued any "reduced amount" (described in paragraph (c) of this section) in the computation of the shareholder's taxable income. Thus a dividend is not to be considered actually or constructively received by a shareholder of a terminal railroad corporation merely because, in the manner described in paragraph (c) of this section, (i) a charge which would be made to the shareholder or any other railroad corporation for related terminal services is not made, or (ii) a portion of any liability payable by it or any other railroad corporation with respect to related terminal services is discharged.

(2) *Expenses not considered paid or incurred*. In the computation of the taxable income of a shareholder of a terminal railroad corporation, the shareholder shall not be considered to have paid or incurred any "reduced amount" (described in paragraph (c) of this section). Thus, a shareholder of the terminal railroad corporation may not deduct as an expense for related terminal services (as defined in paragraph (c) of § 1.281-3) an amount in excess of the net cost to it of such services.

(c) *Amounts to which section 281 applies*—(1) *Reduced amount*. For purposes of this section, the term *reduced amount* means, subject to the limitation of paragraph (c)(4) of this section, the amount by which:

(i) A charge which would be made by a terminal railroad corporation for its taxable year for related terminal services provided to a railroad corporation; or

(ii) A liability of a railroad corporation, resulting from a charge made by a terminal railroad corporation for its taxable year, with respect to related terminal services provided by the terminal railroad corporation, is reduced

§ 1.281-2

26 CFR Ch. I (4-1-17 Edition)

by reason of the terminal railroad corporation's taking into account, pursuant to an agreement (as defined in paragraph (d) of § 1.281-3), related terminal income (as defined in paragraph (b) of § 1.281-3) received or accrued (without regard to section 281) during such taxable year.

(2) *Charge which would be made.* For purposes of this section, a "charge which would be made" by a terminal railroad corporation is the amount that would be charged to any railroad corporation for related terminal services provided if the terminal railroad corporation made the charge without taking related terminal income into account.

(3) *Reduction resulting from related terminal income.* For purposes of subparagraph (1) of this section, a charge or a liability is reduced by taking related terminal income into account to the extent that:

(i) Related terminal income is received or accrued (without regard to section 281) by the terminal railroad corporation for its taxable year in which the charge or liability is reduced; and

(ii) The charge or liability in question would have been larger than it is had such income not been received or accrued (without regard to section 281). The reduction must be made (directly or indirectly) on the books of the terminal railroad corporation, and in fact, for the same taxable year for which the charge would be made or for which the liability is incurred. The reduction of the charge or liability must be taken into account by the terminal railroad corporation in ascertaining the income, profit, or loss for such taxable year for the purpose of reports to shareholders and the Interstate Commerce Commission, and for credit purposes.

(4) *Limitation.* To the extent that a reduced amount (as described in paragraph (c)(1) of this section but without regard to the limitation under this subparagraph) would operate either to create or to increase a net operating loss for the terminal railroad corporation, this section shall not apply. Therefore, if a portion of a liability is discharged (in the manner described in this paragraph) and the discharged portion of

the liability exceeds an amount equal to the terminal railroad corporation's gross income minus the deductions allowed by chapter 1 of the Code (computed with regard to the modifications specified in section 172(d) but without regard to section 281 and this section), then section 281 and this section shall not apply to such excess. The limitation described in this subparagraph shall apply only to taxable years of terminal railroad corporations ending after October 23, 1962.

(d) *Examples.* The provisions of this section may be illustrated by the following examples. In these examples, references to "before the application of section 281", "after the application of section 281", "taxable income", and "allowable deductions" take no account of section 277, which may apply to deductions to which section 281 does not apply.

Example 1. (i) *Facts.* The T Company is a terminal railroad corporation which charges its three equal shareholders, the X, Y, and Z railroad corporations, a rental calculated monthly on a wheelage or user basis for the use of its services and facilities. The T Company and each of its shareholders report income on the calendar year basis. A written lease agreement to which all of the shareholders were parties was entered into in 1947. The agreement provides that at the end of each year the liabilities of each of the shareholders resulting from charges for rental obligations with respect to related terminal services shall be reduced by the shareholder's one-third share of the net income from each source of revenue that produced income (computed before reduction for Federal income taxes). For the calendar year 1973, the T Company's charges to its shareholders include the following charges for related terminal services: \$35,000 to the X Company, \$25,000 to the Y Company, and \$20,000 to the Z Company. Thus, prior to reduction, total shareholder liabilities to the T Company for related terminal services are \$80,000 at the end of 1973. The T Company's net income from all sources (before reduction of liabilities pursuant to the 1947 agreement and before reduction for Federal income taxes) and its taxable income, before the application of section 281, for 1973 are \$36,000 determined as follows:

| Source | Gross income | Allowable deductions | Income (or loss) |
|--------------------------------------|--------------|----------------------|------------------|
| Related terminal services performed: | | | |
| For shareholders | \$80,000 | \$65,000 | \$15,000 |
| For nonshareholders | 46,000 | 37,000 | 9,000 |

Internal Revenue Service, Treasury

§ 1.281-2

| Source | Gross income | Allowable deductions | Income (or loss) |
|----------------------------------|--------------|----------------------|------------------|
| Related terminal income | 126,000 | 102,000 | 24,000 |
| Nonrelated terminal income | 30,000 | 18,000 | 12,000 |
| Total | 156,000 | 120,000 | 36,000 |

The liability of each shareholder is, pursuant to the agreement, discharged in part by the T Company crediting \$12,000 against the rental due from each shareholder for a total discharge of liabilities of \$36,000 (the net income from all sources), resulting in net shareholder liabilities owing to the T Company at the end of 1973 of \$44,000 (\$80,000 less \$36,000): \$23,000 from the X Company, \$13,000 from the Y Company, and \$8,000 from the Z Company.

(ii) *Effect on terminal railroad corporation.* The reduced amount to which this section applies is \$24,000 (related terminal income of \$9,000 from nonshareholders and \$15,000 from shareholders). Thus, to the extent of \$24,000, the T Company is not considered to have received or accrued income from the discharged liabilities of \$36,000. Similarly, to the extent of the same \$24,000, the T Company is not disallowed deductions for expenses merely by reason of the discharge. The T Company's taxable income for 1973 after application of section 281 is \$12,000, computed as follows:

| | |
|--|-----------|
| Gross income (\$156,000 less \$24,000) | \$132,000 |
| Less allowable deductions | 120,000 |
| Taxable income | 12,000 |

(iii) *Effect on shareholders*—The reduced amount of \$24,000 shall not be deemed to constitute either a dividend to the shareholders of the T Company or an expense paid or incurred by them. Thus, under the facts described, neither the X Company, the Y Company, nor the Z Company shall be considered to have received or accrued a dividend of \$8,000, or to have paid or incurred an expense of \$8,000. Assuming the X Company's taxable income for 1973 before the application of section 281 would have been \$43,200, computed in the following manner, its taxable income for 1973 after the application of section 281 is \$50,000, determined as follows:

| | Before the application of sec. 281 | After the application of sec. 281 |
|--|------------------------------------|-----------------------------------|
| Gross income: | | |
| From sources other than T Co .. | \$146,000 | \$146,000 |
| Dividend considered received because of T Co.'s discharge of liabilities of \$12,000 | 12,000 | 4,000 |
| Total | 158,000 | 150,000 |
| Less allowable deductions: | | |
| From sources other than T Co .. | 69,600 | 69,600 |

| | Before the application of sec. 281 | After the application of sec. 281 |
|--|------------------------------------|-----------------------------------|
| 85 percent dividend received deduction under sec. 243 attributable to dividend considered received because of T Co.'s discharge of liabilities | 10,200 | 3,400 |
| Expenses for accrued charges for related terminal services performed by T Co | 35,000 | 27,000 |
| | 114,800 | 100,000 |
| Taxable income | 43,200 | 50,000 |

Example 2. Assume the same facts as in *Example 1*, except that the charges to each of the shareholders for related terminal services for 1973 were as follows: \$35,000 to the X Company, \$40,000 to the Y Company, and \$5,000 to the Z Company. Assume further that the Z Company, prior to the reduction in liabilities at the end of 1973, owed the T Company an additional \$4,000 resulting from charges for 1972 for related terminal services and \$6,000 resulting from the purchase of equipment. Since only \$21,000 (X Company \$8,000, Y Company \$8,000, Z Company \$5,000) of the liabilities which were discharged resulted from charges made for 1973 for related terminal services, the reduced amount to which this section applies is \$21,000 (instead of \$24,000 as in *Example 1*). Thus, the T Company's taxable income for 1973 would be \$15,000 (\$36,000 less \$21,000 reduced amount) and the amount which shall be considered not to have been received or accrued as a dividend nor paid or incurred as an expense of each shareholder is \$8,000 for the X Company, \$8,000 for the Y Company, and \$5,000 for the Z Company.

Example 3. Assume the same facts as in *Example 1*, except that the allowable deductions with respect to nonrelated terminal activities were \$39,000 instead of \$18,000. The T Company's net income from all sources (before reduction for Federal income taxes) and its taxable income, before the application of section 281, is therefore \$15,000, determined as follows:

| Source | Gross income | Allowable deductions | Income (or loss) |
|----------------------------------|--------------|----------------------|------------------|
| Related terminal income | \$126,000 | \$102,000 | \$24,000 |
| Nonrelated terminal income | 30,000 | 39,000 | (9,000) |
| Total | 156,000 | 141,000 | 15,000 |

The liability of each shareholder is nevertheless discharged in part, pursuant to the agreement, by the T Company crediting \$8,000 against the rental due from each shareholder for a total discharge of liabilities of \$24,000 (the net income from each

source of revenue that produced income). Assume further that none of the modifications specified in section 172(d) apply. If the limitation under paragraph (c)(4) of this section were not applied, the reduced amount for the purposes of this section would be \$24,000, and the operation of this section would result in a net operating loss of \$9,000, since the allowable deductions of \$141,000 would exceed the gross income of \$132,000 (\$156,000 less discharged liabilities of \$24,000) by that amount. Because of the limitation under paragraph (c)(4) of this section, however, \$9,000 is not included in the reduced amount to which this section applies. Accordingly, the reduced amount is \$15,000 (instead of \$24,000 as in *Example 1*). Thus, the T Company's taxable income for 1973 would be zero (\$15,000 less the \$15,000 reduced amount), and the amount which each shareholder shall be considered not to have received or accrued as a dividend nor paid or incurred as an expense is \$5,000.

Example 4. Assume the same facts as in *Example 1*, except that under the agreement income from the terminal parking lot would not reduce the shareholders' liabilities. Assume further that such income amounted to \$3,000 of the total related terminal income of \$24,000 for the taxable year 1973. The liability of each shareholder therefore is discharged by crediting \$11,000 against its rental due for a total discharge of liabilities of \$33,000. The reduced amount to which this section applies is \$21,000 (\$24,000 less \$3,000) since only to the extent of \$21,000 would there have been no such reduction under the agreement if there were no related terminal income.

Example 5. Assume the same facts as in *Example 1*, except that, pursuant to the agreement, the A Company, a nonshareholder railroad corporation, is to have its liabilities resulting from charges for rental obligations reduced equally with each of the shareholders. Assume further that the T Company's charges to the A Company for the calendar year 1973 included \$15,000 for related terminal services and that the liability of each shareholder and the A Company is discharged in part pursuant to the agreement by the T Company crediting \$9,000 against the rental due from each. The reduced amount to which this section applies is \$24,000. Thus, the T Company's taxable income for 1973 is \$12,000, and each shareholder shall not be considered to have received or accrued as a dividend nor paid or incurred as an expense \$6,000 (\$24,000/ \$36,000 × \$9,000) merely because of the discharge of its own liability. Similarly, each shareholder shall not be considered to have received or accrued as a dividend nor paid or incurred as an expense \$2,000 ($1/3 \times (\$24,000/\$36,000 \times \$9,000)$) merely because of the discharge of the liability of the A Company. Section 281 does not apply to the determination of the tax consequences of the transaction to the A Company. Similarly, the section does not apply to the de-

termination of the tax consequences to the shareholders resulting from that portion of the discharge of the liability of the A Company which is attributable to the application of income which is not related terminal income (\$3,000). Hence, such consequences shall be determined under the sections of the Internal Revenue Code which govern in the absence of section 281.

Example 6. (i) *Facts.* The TR Company is a terminal railroad corporation with three equal shareholders, the M, N, and O Railroad Corporations. The TR Company and each of its shareholders report income on the calendar year basis. Pursuant to a written agreement entered into in 1947 to which all shareholders were parties, the TR Company makes one annual charge to each of the three shareholders at the end of each year for the difference between the cost of operations, allocated on a wheelage or user basis for the use of its services and facilities provided to the shareholder during the year, and one-third of its net income from all other sources (computed before reduction for Federal income taxes). The TR Company's taxable income, before the application of section 281, for 1973 is \$21,000 determined as follows:

| Source | Gross income | Allowable deductions | Income (or loss) |
|---|--------------|----------------------|------------------|
| Related terminal services performed: | | | |
| For shareholders .. | \$65,000 | \$65,000 | 0 |
| For nonshareholders | 46,000 | 37,000 | \$9,000 |
| Related terminal income | 111,000 | 102,000 | 9,000 |
| Nonrelated terminal income from nonshareholders | 30,000 | 18,000 | 12,000 |
| Total | 141,000 | 120,000 | 21,000 |

For the calendar year 1973, the TR company's charges to its shareholders are \$23,000 (\$30,000 less \$7,000) to the M company, \$13,000 (\$20,000 less \$7,000) to the N company, and \$8,000 (\$15,000 less \$7,000) to the O company for a total of \$44,000 for related terminal services.

(ii) *Effect on terminal railroad corporation.* The reduced amount to which this section applies is \$9,000. The TR company is not considered to have received or accrued income of \$9,000 (related terminal income) merely because the charge of \$21,000 (net income from all sources other than shareholders) was not made. Similarly, to the extent of \$9,000, the TR company is not disallowed deductions for expenses merely because the full cost of services was not charged. The TR company's taxable income for 1973 after application of section 281, is \$12,000, computed as follows:

Internal Revenue Service, Treasury

§ 1.281-3

| | |
|--|-----------|
| Gross income (\$141,000 less \$9,000 charges not made) | \$132,000 |
| Less allowable deductions | 120,000 |
| Taxable income | 12,000 |

(iii) *Effect on shareholders.* Neither the M company, the N company, nor the O company shall be considered to have received or accrued a dividend of \$3,000 nor to have paid or incurred an expense of \$3,000 merely by reason of the reduced charges. Thus, assuming the M company's taxable income for 1973 before the application of section 281 would have been \$47,450, computed in the following manner, its taxable income for 1973 after the application of section 281 is \$50,000, determined as follows:

| | Before the application of sec. 281 | After the application of sec. 281 |
|--|------------------------------------|-----------------------------------|
| Gross income: | | |
| From sources other than TR Co | \$146,000 | \$146,000 |
| Dividend considered received because of TR Co's reduction of charges | 7,000 | 4,000 |
| Total | 153,000 | 150,000 |
| Less allowable deductions: | | |
| From sources other than TR Co | 69,600 | 69,600 |
| 85 percent dividend received deduction under sec. 243 attributable to dividend considered received because of TR Co's reduction of charges | 5,950 | 3,400 |
| Expenses for accrued charges for related terminal services performed by TR Co | 30,000 | 27,000 |
| | 105,550 | 100,000 |
| Taxable income | 47,450 | 50,000 |

[T.D. 7356, 40 FR 23733, June 2, 1975]

§ 1.281-3 Definitions.

(a) *Terminal railroad corporation.* The term *terminal railroad corporation* means a corporation which, in the taxable year, meets all of the following conditions:

(1) The corporation and each of its shareholders must be domestic corporations. Thus, all of the shareholders of the corporation, as well as the corporation itself, must be corporations which were organized or created in the United States, including only the States and the District of Columbia, or under the law of the United States or of any State or territory.

(2) All of the shareholders must be railroad corporations which are subject to Part I of the Interstate Commerce

Act. Thus, if any shareholder of the corporation, regardless of the class or percentage of stock owned, is not subject to the jurisdiction of the Interstate Commerce Commission under part I of that Act, the corporation cannot qualify as a terminal railroad corporation.

(3) The corporation must not be a member of an affiliated group of corporations (as defined in section 1504), other than as a common parent corporation. For this purpose it is immaterial whether or not the affiliated group has ever made a consolidated income tax return. Thus, if the X railroad corporation owns 80 percent of all of the outstanding stock of the Y railroad corporation, the X railroad corporation may qualify, but the Y railroad corporation cannot qualify, as a terminal railroad corporation.

(4) The primary business of the corporation must be that of providing to domestic railroad corporations subject to Part I of the Interstate Commerce Act and to the shippers and passengers of such railroad corporations one or more of the following facilities or services: (i) Railroad terminal facilities, (ii) railroad switching facilities, (iii) railroad terminal services, or (iv) railroad switching services. The designated facilities and services include the furnishing of terminal trackage, the operation of stockyards or a union passenger or freight station, and the operation of railroad bridges and ferries. The providing of the designated facilities includes the leasing of those facilities. A corporation shall be considered as having established that its primary business is that of providing the designated facilities and services if more than 50 percent of its gross income (computed without regard to section 281, and excluding dividends and gains and losses from the disposition of capital assets or property described in section 1231(b)) for the taxable year is derived from those sources. The fact that income from a service or facility is included within the definition of related terminal income is immaterial for purposes of determining whether that service or facility is one which is designated in this subparagraph. Thus, although income from the operation of a commuter railroad line may be related

terminal income, a corporation whose primary business is the operation of that facility is not a terminal railroad corporation, since its primary business is not the providing of the designated facilities or services.

(5) A substantial part of the services rendered by the corporation for the taxable year must be rendered to one or more of its shareholders. For purposes of this requirement, providing the use of facilities shall be considered the rendering of services.

(6) Each shareholder of the corporation must compute its taxable income on the basis of a taxable year which either begins or ends on the same day as the taxable year of the corporation.

(b) *Related terminal income*—(1) *In general.* Related terminal income is, generally, the type of income normally earned from the operation of a railroad terminal. The term *related terminal income* means the taxable income (computed without regard to sections 172, 277, or 281) which the terminal railroad corporation derives for the taxable year from the sources enumerated in paragraph (b)(2) of this section. Related terminal income must be derived from direct provision of the specified facilities or services by the terminal corporation itself. Thus, income consisting of rent from a lease of a terminal facility by a terminal corporation to a railroad user would qualify; but dividends from a corporation in which the terminal corporation owned stock and which provided such facilities or services to others would not qualify. The term does not include gain or loss derived from the sale, exchange, or other disposition of capital assets or section 1231 assets, whether or not section 1245 or section 1250 applies to part or all of that gain. For example, the term does not apply to gain from the sale of a terminal building or terminal equipment. All direct and indirect expenses and other deductible items attributable to related terminal services or facilities shall be deducted in determining related terminal income. Attribution shall be determined in accordance with customary railroad accounting practices accepted by the Interstate Commerce Commission, except that interest paid with respect to the indebtedness of a terminal railroad

corporation shall be deducted from related terminal income to the extent that the proceeds from the indebtedness were directly or indirectly applied to facilities or activities producing such income. The district director may either accept the use of the taxpayer's method of determining the application of the proceeds of all indebtedness of such corporation or prescribe the use of another method which, under all the facts and circumstances, appears to reflect more accurately the probable application of such proceeds.

(2) *Sources of related terminal income.* The term *related terminal income* includes only income derived from one or more of the following sources:

(i) From services or facilities of a character ordinarily and regularly provided by terminal railroad corporations for railroad corporations or for the employees, passengers, or shippers of railroad corporations. Whether the services or facilities are of a character ordinarily and regularly provided by terminal railroad corporations is to be determined by accepted industry practice. The fact that nonterminal businesses may also provide such services or facilities is immaterial. However, there must be a direct relationship between the service or facility provided and the operation of the terminal, including the operation of its trackage and switching facilities. Thus, the term *related terminal income* includes income derived from operating or leasing switching facilities and terminal facilities, such as income from charges to railroad corporations for the use of a union passenger or freight station. Also included for this purpose is income derived from charges to railroad shippers, including express companies and freight forwarders, for the use of sheds or warehouses, even though not directly intended for railroad use. The term includes income derived from leasing or operating restaurants, drugstores, barbershops, newsstands, ticket agencies, banking facilities, car rental facilities, or other similar facilities for passengers, in waiting rooms or along passenger concourses. Similarly, the term includes income derived from operating or leasing passenger parking facilities, and from renting taxicab space, located on or adjacent to the

terminal premises. Although the term does include income derived from the operation of a small hotel operated primarily for and usually occupied primarily by the employees of the railroad corporations, it does not include income derived from the operation of a hotel for passengers or other persons.

(ii) From any railroad corporation for services or facilities provided by the terminal railroad corporation in connection with railroad operations. A service or a facility is provided in connection with railroad operations if it is of a character ordinarily and regularly availed of by railroad corporations. For purposes of this subdivision, the income must be derived from railroad corporations. Thus, in addition to the income derived from sources described in paragraph (b)(2)(i) of this section, the term *related terminal income* includes income derived from switching facilities or leasing to any railroad corporation, or operating for the benefit of such corporation, a beltline or bypass railroad leading to or from the terminal premises. Also included are income derived from the rental of office space (whether or not services are provided to the occupants) in the terminal building to any railroad corporation for that corporation's administrative or operating divisions, and income derived from tolls charged to any railroad corporation for the use of a railroad bridge or ferry.

(iii) From the use by persons other than railroad corporations of a portion of a facility, or of a service, which is used primarily for railroad purposes. A facility or service is used primarily for railroad purposes if the predominant reason for its continued operation or provision is the furnishing of facilities or services described in either subdivision (i) or (ii) of this subparagraph. The determination required by this subdivision is to be made independently for each separate facility or service. Two substantial portions of a single structure may be considered separate facilities, depending upon the respective uses made of each. Moreover, any substantial addition, constructed after October 23, 1962, to a facility shall be considered a separate facility.

The term *related terminal income* includes income produced by operating a

commuter service or by renting tracks and facilities for a commuter service to an independent operator. The term also includes the sale or rental of advertising space at a terminal facility. If the conditions described in this subdivision are satisfied, the term *related terminal income* may include income which has no connection with the operation of the terminal. Thus, if a terminal railroad corporation operates a railroad bridge primarily to provide railroad corporations a means of crossing a river and the lower level of the bridge contains a roadway for similar use by automobiles, the term includes income derived from the tolls charged to the automobiles for the use of the bridge roadway. However, upon the discontinuance of operations of the railroad level of the bridge, the term would cease to include the automobile tolls. If excess steam from a steam plant operated primarily to supply steam to the terminal is sold to another business in the neighborhood, the term would include the income derived from such sale. However, because an oil or gas well or a mine constitutes a separate facility, the term *related terminal income* does not include income derived in any form from a deposit of oil, natural gas, or any other mineral located on property owned or leased by the terminal railroad corporation.

Similarly, while the term includes income derived from the rental of a small number of offices located in the terminal building (whether or not the lessees are railroad corporations), it does not include income derived from the leasing or operation, for the use of the general public, of a large number of offices or a large number of rooms for lodging, whether or not the space is physically part of the same structure as the terminal. Moreover, the term does not include income derived from the rental of offices to the general public in an addition to the terminal building constructed after October 23, 1962, unless the addition is primarily used for railroad purposes and the offices rented to the general public do not constitute a separate facility in the addition. Whether or not income from the addition is determined to be related terminal income, the income from the

§ 1.281-3

small number of offices which were included in the terminal building before the addition was constructed shall continue to be related terminal income.

(iv) From the United States in payment for facilities or services in connection with mail handling. The income must be derived directly from the U.S. Government, or any agency thereof (including for this purpose the U.S. Postal Service), through the receipt of payments for mail-handling facilities or services. Thus, the term would include income derived from the rental of space for a post office for use by the general public on the terminal premises or from the sorting of mail in a railroad box car.

(3) *Illustration.* The provisions of this paragraph may be illustrated by the following example:

Example. For its calendar year 1973, the R Company, a terminal railroad corporation, has taxable income of \$36,000, before the application of section 281 and taking no account of section 277, determined as follows:

| | |
|---|----------|
| Gross income: | |
| Switching charges | \$50,000 |
| Express companies | 2,000 |
| Commuter line | 4,000 |
| U.S. mail handling | 4,000 |
| Railroad bridge tolls: | |
| From railroads | 2,000 |
| From automobiles | 1,000 |
| Total | 3,000 |
| Station and train charges | 47,000 |
| Terminal parking lot | 4,000 |
| Rent from terminal building: | |
| Passenger facilities (ground level) | 8,000 |
| Offices leased to railroads (2d floor) | 3,000 |
| Offices leased to others (2d floor) | 1,000 |
| Hotel open to public (3d through 6th floors) | 14,000 |
| Total | 26,000 |
| Interest received from bond investments | 1,500 |
| Dividends received from wholly owned subsidiary | 10,000 |
| Amount realized from sale of equipment | 6,000 |
| Less: | |
| Adjusted basis | 1,000 |
| Expenses of sale | 500 |
| | 1,500 |
| | 4,500 |
| | 156,000 |
| Allowable deductions: | |
| Dividend received deduction | 8,500 |
| Interest paid: | |
| On loan for hotel furnishings | 1,500 |
| On loan for rolling stock | 2,000 |
| | 3,500 |
| Maintenance, depreciation, management and other expenses: | |
| Attributable to hotel | 3,000 |
| Attributable to parking lot | 1,000 |

26 CFR Ch. I (4-1-17 Edition)

| | |
|--|---------|
| Attributable to U.S. mail handling | 1,000 |
| All other | 98,000 |
| | 103,000 |
| Loss from sale of securities | 3,000 |
| Charitable contribution | 500 |
| Net operating loss deduction | 1,500 |
| | 120,000 |
| Taxable income before the application of sec. 281 | 36,000 |
| The R Co.'s related terminal income for 1973 is \$24,000, computed as follows: | |
| Taxable income (before the application of sec. 281) | 36,000 |
| Less: | |
| Dividend received | 10,000 |
| Minus dividend received deduction | 8,500 |
| | 1,500 |
| Interest received | 1,500 |
| Amount realized from sale of equipment | 6,000 |
| Less: | |
| Adjusted basis | 1,000 |
| Expense of sale | 500 |
| | 1,500 |
| | 4,500 |
| Hotel income | 14,000 |
| Less: | |
| Interest paid on loan for hotel | 1,500 |
| Other hotel expenses | 3,000 |
| | 4,500 |
| | 9,500 |
| | 17,000 |
| | 19,000 |
| Add: | |
| Loss from sale of securities | 3,000 |
| Charitable contribution | 500 |
| Net operating loss deduction | 1,500 |
| | 5,000 |
| Related terminal income | 24,000 |

(c) *Related terminal services.* The term *related terminal services* means only the services or the use of facilities, provided by the terminal railroad corporation, which are taken into account in computing related terminal income. Thus, the term includes the providing of terminal and switching services, the furnishing of terminal and switching facilities including the furnishing of terminal trackage, and the operation of bridges and ferries for railroad purposes. For example, upon the facts of the example in the preceding paragraph, the charges for related terminal services are \$126,000, determined as follows:

| | |
|-------------------------|----------|
| Switching charges | \$50,000 |
| Express companies | 2,000 |
| Commuter line | 4,000 |

Internal Revenue Service, Treasury

§ 1.281-4

| | |
|---------------------------------|---------|
| U.S. mail handling | 4,000 |
| Railroad bridge tolls | 3,000 |
| Station and train charges | 47,000 |
| Terminal parking lot | 4,000 |
| Rent from: | |
| Passenger facilities | 8,000 |
| Offices | 4,000 |
| Total | 126,000 |

(d) *Agreement.* As used in section 281 and § 1.281-2 the term *agreement* means a written contract, entered into before the beginning of the terminal railroad corporation's taxable year in question, to which all shareholders of the terminal railroad corporation are parties. The fact that other railroad corporations or persons are also parties will not disqualify an agreement. Section 281 applies only if, and to the extent that, the reduction of the liability or charge that would be made, as described in paragraph (c) of § 1.281-2, results from the agreement. Thus, where the other conditions of the statute are met, section 281 applies if a written agreement, to which all of the shareholders were parties and which was entered into prior to the beginning of the terminal railroad corporation's taxable year, provides that the net revenues of the terminal railroad corporation are to be applied as a reduction of what would otherwise be the charge for the taxable year for related terminal services provided to the shareholders. Similarly, section 281 applies, where its other requirements are fulfilled, if the agreement provides that the net revenues are to be credited against rental obligations resulting from related terminal services furnished to shareholders. However, section 281 does not apply where the agreement provides that the net revenues are to be divided among the shareholders and distributed to them in cash or held subject to their unconditional right of withdrawal instead of being applied to the computation of charges, or in reduction of liabilities incurred, for related terminal services.

(e) *Railroad corporation.* For purposes of section 281, § 1.281-2, and this section, the term *railroad corporation* means any corporation (regardless of whether it is a shareholder of the terminal railroad corporation) that is engaged as a common carrier in the furnishing or sale of transportation by railroad, or is a lessor of railroad equipment or facilities.

For purposes of the preceding sentence, a corporation is a lessor of railroad equipment or facilities only if (1) it is subject to part I of the Interstate Commerce Act, (2) substantially all of its railroad properties have been leased to a railroad corporation or corporations, (3) each lease is for a term of more than 20 years, and (4) 80 percent or more of its gross income for the taxable year is derived for such leases.

[T.D. 7356, 40 FR 23735, June 2, 1975]

§ 1.281-4 Taxable years affected.

(a) *In general.* Except as provided in paragraph (b) of this section, the provisions of section 281 and §§ 1.281-2 and 1.281-3 shall apply to all taxable years to which either the Internal Revenue Code of 1954 or the Internal Revenue Code of 1939 apply.

(b) *Taxable years ending before October 23, 1962.* (1)(i) In the case of a taxable year of a terminal railroad corporation ending before October 23, 1962, section 281 (a) shall apply only to the extent that the terminal railroad corporation (a) computed its taxable income on its return for such taxable year as if the "reduced amount", described in paragraph (c) of § 1.281-2, were not received or accrued, and (b) did not decrease its otherwise allowable deductions for such taxable year on account of that "reduced amount". Similarly, in the case of a taxable year of a shareholder of a terminal railroad corporation ending before October 23, 1962, section 281(b) shall apply only to the extent that such shareholder computed its taxable income on its return for such taxable year as if the shareholder had neither received or accrued as a dividend nor paid or incurred as an expense the "reduced amount" described in paragraph (c) of § 1.281-2. Such return must have been filed on or before the due date (including the period of any extension of time) for filing the return for the applicable taxable year. The fact that an amended return or claim for refund or credit of overpayment was subsequently filed, or a deficiency subsequently assessed, based upon a computation of taxable income which is inconsistent with the manner in which the taxable income was computed on the timely filed return, is immaterial.

(ii) The provisions of this paragraph may be illustrated by the following examples:

Example 1. The G Company is a terminal railroad corporation which in 1960 reduced the liabilities resulting from charges to its shareholders, pursuant to a 1947 written agreement, by its income from nonshareholder sources. For the calendar year 1960, the G Company's related terminal income was \$24,000, of which \$3,000 is attributable to income from the United States in payment for facilities and services in connection with mail handling. Although the shareholders' liabilities were reduced by \$24,000 as a result of taking related terminal income earned during the taxable year into account, on its timely filed 1960 income tax return the G Company treated the \$3,000 of liabilities which were reduced on account of income from mail handling as gross income received or accrued during the year. Assuming that the provisions of § 1.281-2 otherwise apply, their application to the determination of the 1960 tax liability of the G Company shall not extend to the entire "reduced amount" of \$24,000, but shall be limited to \$21,000 of that amount.

Example 2. Assume the same facts as in *Example 1*, and the following additional facts. The G Company had three shareholders in 1960, and an equal discharge of liability of \$8,000 resulted for each of them on account of related terminal income. Each shareholder treated, on its timely filed 1960 income tax return, \$1,000 of its liabilities, which were so reduced and were attributable to income from the United States in payment for facilities and services in connection with mail handling, as if it had received \$1,000 from the G Company as a dividend and paid that \$1,000 to the G Company for services. Each shareholder treated the remaining \$7,000 of its liabilities which were so reduced as if the liabilities which were reduced had never been incurred. Assuming that the provisions of § 1.281-2 otherwise apply, each shareholder shall not be considered to have received or accrued as a dividend, nor to have paid or incurred as an expense \$7,000 (instead of \$8,000).

(2) For any taxable year of a terminal railroad corporation ending before October 23, 1962, a claim for refund or credit of overpayment of income tax based upon section 281 may be filed, even though such refund or credit of overpayment was otherwise barred by operation of any law or rule of law on October 23, 1962, subject to the conditions set forth in paragraph (b)(2)(i) through (v) of this section.

(i) The claim for refund or credit of overpayment must not have been barred by a closing agreement (under either section 3760 of the Internal Revenue Code of 1939 or section 7121 of the Internal Revenue Code of 1954), or by a compromise (under section 3761 of the Internal Revenue Code of 1939 or section 7122 of the Internal Revenue Code of 1954);

(ii) The claim for refund or credit of overpayment shall be allowed only to the extent that the overpayment of income tax results from the recomputation of the terminal railroad corporation's taxable income in the manner described in paragraph (a) of § 1.281-2;

(iii) The claim for refund or credit of the overpayment must have been filed prior to October 23, 1963;

(iv) The claim for refund or credit of overpayment shall be allowed only to the extent that the manner in which the terminal railroad corporation's taxable income is recomputed is the manner in which the terminal railroad corporation's taxable income was computed on its timely filed income tax return for such taxable year; and

(v) Each railroad corporation which was a shareholder of the terminal railroad corporation during such taxable year must consent in writing to the assessment, within such period as may be agreed upon with the district director, of any deficiency for any year (even though assessment of the deficiency would otherwise be prevented by the operation of any law or rule of law at the time of filing the consent) to the extent that:

(A) The deficiency is attributable to the recomputation of the shareholder's taxable income in the manner described in paragraph (b) of § 1.281-2, and

(B) The deficiency results from the shareholder's allocable portion of the "reduced amount" (described in paragraph (c) of § 1.281-2) which gives rise to the refund or credit granted to the terminal railroad corporation under this subparagraph.

Table of OMB Control Numbers

The OMB control numbers for chapter I of title 26 were consolidated into §§ 601.9000 and 602.101 at 50 FR 10221, Mar. 14, 1985. At 61 FR 58008, Nov. 12, 1996, § 601.9000 was removed. Section 602.101 is reprinted below for the convenience of the user.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

§ 602.101 OMB Control numbers.

(a) *Purpose.* This part collects and displays the control numbers assigned to collections of information in Internal Revenue Service regulations by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980. The Internal Revenue Service intends that this part comply with the requirements of §§ 1320.7(f), 1320.12, 1320.13, and 1320.14 of 5 CFR part 1320 (OMB regulations implementing the Paperwork Reduction Act), for the display of control numbers assigned by OMB to collections of information in Internal Revenue Service regulations. This part does not display control numbers assigned by the Office of Management and Budget to collections of information of the Bureau of Alcohol, Tobacco, and Firearms.

(b) *Display.*

[T.D. 8011, 50 FR 10222, Mar. 14, 1985]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 602.101, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

List of CFR Sections Affected

All changes in this volume of the Code of Federal Regulations (CFR) that were made by documents published in the FEDERAL REGISTER since January 1, 2012 are enumerated in the following list. Entries indicate the nature of the changes effected. Page numbers refer to FEDERAL REGISTER pages. The user should consult the entries for chapters, parts and subparts as well as sections for revisions.

For changes to this volume of the CFR prior to this listing, consult the annual edition of the monthly List of CFR Sections Affected (LSA). The LSA is available at *www.fdsys.gov*. For changes to this volume of the CFR prior to 2001, see the “List of CFR Sections Affected, 1949–1963, 1964–1972, 1973–1985, and 1986–2000” published in 11 separate volumes. The “List of CFR Sections Affected 1986–2000” is available at *www.fdsys.gov*.
